The Australian Curriculum Languages

Overview

Introduction

The **Australian Curriculum: Languages** is designed to enable all students to engage in learning a language in addition to English. The design of the Australian Curriculum: Languages recognises the features that languages share as well as the distinctiveness of specific languages.

There are aspects of the curriculum that pertain to all languages. The key concepts of language, culture and learning, as described in the **Shape of the Australian Curriculum: Languages**, underpin the learning area. They also provide the basis for a common rationale and set of aims for all languages.

The Australian Curriculum: Languages includes language-specific curricula for world languages and a **Framework for Aboriginal Languages and Torres Strait Islander Languages**.

Language specificity

The curriculum content and achievement standards are different for each specific language because of inherent differences in the languages themselves.

Each language has its own distinctive structure, systems, conventions for use, related culture(s), place in the Australian and international communities, as well as its own history in Australian education.

Diversity of language learners

Understanding who learners are, as language learners and as young people, is the starting point for developing their language learning. An increasingly varied range of students now study languages in Australian classrooms. The changing pattern of migration to Australia is extending the range of languages students bring with them to school. Education systems seek to provide for this diversity of language background and for the fact that languages classrooms include students with varying degrees of experience of and proficiency in the language being learnt, as well as their particular affiliations with additional languages.

Learners come to learning languages with diverse linguistic, cultural and personal profiles, bringing distinctive biographies which include individual histories; biographies; previous experiences of and relationships with the target language and particular motivations, expectations, and aspirations.

As unique, social and cultural beings, students interpret the world and make sense of their experiences through their own social and cultural traditions, understanding and values.

Learners of languages in Australia comprise three major groups:

- second language learners
- background language learners
- first language learners.

Second language learners are those who are introduced to learning the target language at school as an additional, new language. The first language used before they start school and/or the language they use at home is not the language being learnt.

Background language learners are those who may use the language at home, not necessarily exclusively, and have varying degrees of knowledge of and proficiency in the language being learnt. These learners have a base for literacy development in the language.

First language learners are users of the language being learnt who have undertaken at least primary schooling in the target language. They have had their primary socialisation as well as initial literacy development in that language and use the target language at home. For Aboriginal languages and Torres Strait Islander languages, first language learners are learners whose primary socialisation is in the language being learnt and who may or may not have yet developed initial literacy.

Within each of these groups, there are differences in proficiency in the language being learnt. It is acknowledged that the span of language experiences of background learners is particularly wide, and learners in this group are likely to have quite diverse affiliations with the target language. Nevertheless, for pragmatic reasons, it is not feasible to identify further groupings.

A framework is being developed for Aboriginal languages and Torres Strait Islander languages that caters for different learner pathways that also take into account the state of the particular language involved.

Rationale

Through learning languages, students acquire:

- communication skills in the language being learnt
- an intercultural capability, and an understanding of the role of language and culture in communication
- a capability for reflection on language use and language learning.

Language learning provides the opportunity for students to engage with the linguistic and cultural diversity of the world and its peoples, to reflect on their understanding of experience in various aspects of social life, and on their own participation and ways of being in the world.

Learning languages broadens students' horizons in relation to the personal, social, cultural and employment opportunities that an increasingly interconnected and interdependent world presents. The interdependence of countries and communities means people in all spheres of life are required to negotiate experiences and meanings across languages and cultures. Despite its status as a world language, a capability in English only is no longer sufficient. A bilingual or plurilingual capability is the norm in most parts of the world.

Learning languages:

- extends the capability to communicate and extends literacy repertoires
- strengthens understanding of the nature of language, of culture, and of the processes of communication
- develops intercultural capability
- develops understanding of and respect for diversity and difference, and an openness to different experiences and perspectives
- develops understanding of how culture shapes worldviews and extends learners' understanding of themselves, their own heritage, values, culture and identity
- strengthens intellectual, analytical and reflective capabilities, and enhances creative and critical thinking.

Learning languages also contributes to strengthening the community's social, economic and international development capabilities. Language capabilities represent linguistic and cultural resources through which the community can engage socially, culturally and economically, in domains which include business, trade, science, law, education, tourism, diplomacy, international relations, health and communications.

Learning Aboriginal languages and Torres Strait Islander languages meets the needs and rights of young people to learn their own languages and recognises their significance in the language ecology of Australia. For Aboriginal and Torres Strait Islander students, learning their own languages is crucial to overall learning and achievements, to developing a sense of identity and recognition and understanding of language, culture, Country and Place. For all students, learning Aboriginal languages and Torres Strait Islander languages provides a distinctive means of understanding the country in which they live, including the relationship between land, the environment and people. The ongoing and necessary reclamation and revitalisation of these languages also contribute to reconciliation.

Aims

The Australian Curriculum: Languages aims to develop the knowledge, understanding and skills to ensure students:

- communicate in the target language
- understand language, culture, and learning and their relationship, and thereby develop an intercultural capability in communication
- understand themselves as communicators.

These three aims are interrelated and provide the basis for the two organising strands: Communicating and Understanding. The three aims are common to all languages.

Key ideas

Language and culture

The interrelationship of language, culture and learning provides the foundation for the Australian Curriculum: Languages.

In the languages learning area the focus is on both language and culture, as students learn to communicate meaningfully across linguistic and cultural systems, and different contexts. This process involves reflection and analysis, as students move between the new language being learnt and their own existing language(s). It is a reciprocal and dynamic process which develops language use within intercultural dimensions of learning experiences. It is not a 'one plus one' relationship between two languages and cultures, where each language and culture stay separate and self-contained. Comparison and referencing between (at least) two languages and cultures build understanding of how languages 'work', how they relate to each other and how language and culture shape and reflect experience; that is, the experience of language using and language learning. The experience of being in two worlds at once involves noticing, questioning and developing awareness of how language and culture shape identity.

Structure

Learner background and time-on-task are two major variables that influence language learning and they provide the basis for the structure of the Australian Curriculum: Languages. These variables are addressed through the specification of content and the description of achievement standards according to pathways and learning sequences respectively.

Pathways

In the Australian Curriculum: Languages, pathways for second language learners, background language learners and first language learners have been developed as appropriate to cater for the dominant group(s) of students learning each specific language within the current Australian context. For the majority of languages, one curriculum pathway has been developed for Years F–10, catering for the dominant cohort of learners for that language in the current Australian context. For Chinese, pathways have been developed for three learner groups: first language learners, background language learners and second language learners.

The Framework for Aboriginal languages and Torres Strait Islander Languages includes three learner pathways:

- first language learner pathway
- revival language learner pathway
- second language learner pathway.

Sequences of learning

The design of the Australian Curriculum: Languages takes account of different entry points into language learning across Foundation – Year 10, which reflects current practice in languages.

For the second language learner pathway and the background language learner pathway, there are two learning sequences:

- Foundation–Year 10 sequence
- Years 7–10 (Year 7 Entry) sequence.

For the first language learner pathway, there is one learning sequence:

- Years 7–10 (Year 7 Entry) sequence.

Content and achievement standards are described initially in a three-year band for Foundation–Year 2 followed by two-year bands of learning: Years 3–4; Years 5–6, Years 7–8 and Years 9–10.

The Framework for Aboriginal Languages and Torres Strait Islander Languages is written in the bands Foundation – Year 2, Years 3–6 and Years 7–10. In the absence of pedagogical evidence across the country for all these languages, the broader band distinctions provide maximum local flexibility in curriculum development.

Content structure

The content of the Australian Curriculum: Languages is organised through two interrelated strands which realise the three aims. The two strands are:

- **Communicating:** using language for communicative purposes in interpreting, creating and exchanging meaning
- **Understanding:** analysing language and culture as a resource for interpreting and creating meaning.

The strands reflect three important aspects of language learning:

- 1) communication
- 2) analysis of aspects of language and culture
- 3) reflection that involves
 - reflection on the experience of communicating
 - reflection on comparative dimensions of the languages available in students' repertoires (for example, the first language in relation to second language and self in relation to others).

Strands and sub-strands

A set of sub-strands has been identified within each strand, which reflects dimensions of language use and the related content to be taught and learned. The strands and sub-strands do not operate in isolation but are integrated in relation to language use for different purposes in different contexts. The relative contribution of each sub-strand differs for described languages, pathways and bands of learning. The sub-strands are further differentiated according to a set of 'threads' that support the internal organisation of content in each sub-strand. These 'threads' are designed to capture (1) range and variety in the scope of learning and (2) a means for expressing the progression of content across the learning sequences.

Diagram 1: Relationship between strands and sub-strands

The following table provides a brief description of each of the strands and sub-strands.

Strand	Sub-strand	Description
Communicating: <i>Using language for communicative purposes in interpreting, creating and exchanging meaning.</i>	1.1 Socialising	Interacting orally and in writing to exchange, ideas, opinions, experiences, thoughts and feelings; and participating in planning, negotiating, deciding and taking action.
	1.2 Informing	Obtaining, processing, interpreting and conveying information through a range of oral, written and multimodal texts; developing and applying knowledge.
	1.3 Creating	Engaging with imaginative experience by participating in, responding to and creating a range of texts, such as stories, songs, drama and music.
	1.4 Translating	Moving between languages and cultures orally and in writing, recognising different interpretations and explaining these to others.
	1.5 Reflecting	Participating in intercultural exchange, questioning reactions and assumptions; and considering how interaction shapes communication and identity.
Understanding: <i>Analysing and understanding language and culture as resources for interpreting and shaping meaning in intercultural exchange.</i>	2.1 Systems of language	Understanding language as a system, including sound, writing, grammatical and textual conventions.
	2.2 Language variation and change	Understanding how languages vary in use (register, style, standard and non-standard varieties) and change over time and place.
	2.3 The role of language and culture	Analysing and understanding the role of language and culture in the exchange of meaning.

Student diversity

ACARA is committed to the development of a high-quality curriculum that promotes excellence and equity in education for all Australian students.

All students are entitled to rigorous, relevant and engaging learning programs drawn from the Australian Curriculum: Languages. Teachers take account of the range of their students' current levels of learning, strengths, goals and interests and make adjustments where necessary. The three-dimensional design of the Australian Curriculum, comprising learning areas, general capabilities and cross-curriculum priorities, provides teachers with flexibility to cater for the diverse needs of students across Australia and to personalise their learning.

More detailed advice for schools and teachers on using the Australian Curriculum to meet diverse learning needs is available under Student Diversity on the Australian Curriculum website.

Students with disability

The ***Disability Discrimination Act 1992*** and the ***Disability Standards for Education 2005*** require education and training service providers to support the rights of students with disability to access the curriculum on the same basis as students without disability.

Many students with disability are able to achieve educational standards commensurate with their peers, as long as the necessary adjustments are made to the way in which they are taught and to the means through which they demonstrate their learning.

In some cases curriculum adjustments are necessary to provide equitable opportunities for students to access age-equivalent content in the Australian Curriculum: Languages. Teachers can draw from content at different levels along the Foundation to Year 10 sequence. Teachers can also use the extended general capabilities learning continua in Literacy, Numeracy and Personal and social capability to adjust the focus of learning according to individual student need.

English as an additional language or dialect

Languages play a crucial role in the educational experience of students and in the curriculum as a whole. Given the diversity of students in Australian education, it is important to recognise that a range of languages is used either as part of the formal curriculum or as part of learners' socialisation within and outside the school.

Learners bring their first language or languages as the one(s) they use for their initial socialisation in their family or community. For the majority, this is English. For many, it can be a range of different languages. Learners also encounter the language or languages of instruction at school. For most in Australia, this is English. For many students in Australia, the language of instruction is not the same as their first language. These students may learn through English as an additional language/dialect (EALD) programs.

In contemporary understandings of language acquisition, development and learning all the languages learners experience in their socialisation and education form part of learners' distinctive linguistic and cultural repertoires. These are variously developed by both the experience of schooling and broader social community experience. These repertoires are an integral part of learners' identities and what they bring to the learning of additional languages as part of the languages learning area within the school curriculum.

While the curriculum for languages primarily addresses the learning of languages, this learning cannot be separated from the development of learners' more general communicative repertoires. It is through such a relational and holistic approach to languages education that learners develop their capabilities in knowing and using multiple languages. Learners extend their communicative and conceptual development, learning and identity formation.

In various kinds of bilingual programs, students are afforded an opportunity to learn through the medium of English and another language (learners' first or additional language). These programs are of particular value in ensuring learners continue to develop at least two languages that are of value to them. They are of value to both their conceptual development and learning and to their identity formation.

Aboriginal and Torres Strait Islander communities recognise the importance of literacy to their children. They support literacy education programs that are founded on establishing literacy in their children's first language. These are the Aboriginal and Torres Strait Islander languages their communities use. Literacy in English is regarded as concomitant on first establishing students' literacy in their first language. Although most bilingual programs in Aboriginal and Torres Strait Islander languages are designed to help students' transition into learning in English, their fundamental value is in the development of bilingual literacy. Strengthening the bilingual literacy of Aboriginal and Torres Strait Islander students can significantly contribute to improving their overall academic achievement and success.

A national ***English as an Additional Language or Dialect: Teacher Resource*** has been developed to support teachers in making the Australian Curriculum: Foundation – Year 10 in each learning area accessible to EALD students.

Gifted and talented students

Teachers can use the Australian Curriculum: Languages flexibly to meet the individual learning needs of gifted and talented students.

Teachers can enrich learning by providing students with opportunities to work with learning area content in more depth or breadth; emphasising specific aspects of the general capabilities learning continua (for example, the higher order cognitive skills of the Critical and creative thinking capability); and/or focusing on cross-curriculum priorities. Teachers can also accelerate student learning by drawing on content from later levels in the Australian Curriculum: Languages and/or from local state and territory teaching and learning materials.

General capabilities

In the Australian Curriculum, general capabilities encompass knowledge, skills, behaviours, and dispositions that, together with curriculum content in each learning area and the cross-curriculum priorities, will enable students to live and work successfully in the 21st century.

There are seven general capabilities:

- literacy
- numeracy
- information and communication technology (ICT) capability
- critical and creative thinking
- personal and social capability
- ethical understanding
- intercultural understanding.

In the Australian Curriculum: Languages, general capabilities are identified wherever they are developed or applied in content descriptions.

They are also identified where they offer opportunities to add depth and richness to student learning through content elaborations. Icons indicate where general capabilities have been identified in languages content. Teachers may find further opportunities to incorporate explicit teaching of the capabilities, depending on their choice of activities.

Detailed descriptions and elaborations of each of the general capabilities and the way these capabilities may be developed, including learning continua, can be found in the Australian Curriculum website: www.australiancurriculum.edu.au

Literacy

Learning languages develops overall literacy. It is in this sense ‘value added’, strengthening literacy-related capabilities that are transferable across languages, both the language being learnt and all other languages that are part of the learner’s repertoire. Languages learning also strengthens literacy-related capabilities across domains of use, such as the academic domain and the domains of home language use, and across learning areas.

Literacy development involves conscious attention and focused learning. It involves skills and knowledge that need guidance, time and support to develop. These skills include the:

- ability to decode and encode from sound to written systems
- the learning of grammatical, orthographic and textual conventions
- development of semantic, pragmatic and interpretative, critical and reflective literacy skills.

Literacy development for second language learners is cognitively demanding. It involves these same elements but often without the powerful support of a surrounding oral culture and context. The strangeness of the additional language requires scaffolding. In the language classroom, analysis is prioritised alongside experience. Explicit, explanatory and exploratory talk around language and literacy is a core element. Learners are supported to develop their own meta-awareness, to be able to think and talk about how the language works and about how they learn to use it. Similarly, for first language learners, literacy development that extends to additional domains and contexts of use requires comparative analysis that extends literacy development in their first language and English.

Numeracy

Learning languages affords opportunities for learners to use the target language to develop skills in numeracy, to understand, analyse, categorise, critically respond to and use mathematics in different contexts. This includes processes such as using and understanding patterns, order and relationships to reinforce concepts such as number, time or space in their own and in others’ cultural and linguistic systems.

Information and communication technology (ICT) capability

Learning languages is enhanced through the use of multimodal resources, digital environments and technologies in the target language. Accessing live target language environments and texts via digital media contributes to the development of information technology capabilities as well as linguistic and cultural knowledge. Accessing different real-time contexts extends the boundaries of the classroom.

Critical and creative thinking

In learning a language, students interact with people and ideas from diverse backgrounds and perspectives, which enhances critical thinking, reflection and encourages creative, divergent and imaginative thinking. By learning to notice, connect, compare and analyse aspects of the target language, students develop critical, analytic and problem-solving skills.

Personal and social capability

Interacting effectively in an additional language and with people of diverse language backgrounds involves negotiating and interpreting meaning in a range of social and cultural situations. This involves understanding and empathising, which are important elements of social and intercultural competence. Being open-minded and recognising that people view and experience the world in different ways, and learning to interact in a collaborative and respectful manner are key elements of personal and social competence.

Ethical understanding

When learning another language, students are taught explicitly to acknowledge and value difference in their interactions with others and to develop respect for diverse ways of perceiving and acting in the world. Opportunities are provided to monitor and to adjust their own ethical points of view. In learning Aboriginal and Torres Strait Islander languages, students should consider appropriate ethical behaviour in terms of engaging with the owners and custodians of the languages. Similar consideration is required when interpreting and translating or when collecting and analysing primary research data.

Intercultural understanding

The development of intercultural understanding is a central aim of learning languages, as it is integral to communicating in the context of diversity, the development of global citizenship and lifelong learning. Students bring to their learning various preconceptions, assumptions and orientations shaped by their existing language(s) culture(s) to their learning that can be challenged by the new language experience. Learning to move between the existing and new languages and cultures is integral to language learning and is the key to the development of students' intercultural capability. By learning a new language, or learning to use an existing language in new domains and contexts, students are able to notice, compare and reflect on things previously taken for granted; to explore their own linguistic, social and cultural practices as well as those associated with the target language. They begin to see the complexity, variability and sometimes the contradictions involved in using language.

Learning a new language does not require forsaking the first language. It is an enriching and cumulative process, which broadens the learners' communicative repertoire, providing additional resources for interpreting and making meaning. Learners come to realise that interactions between different people through the use of different languages also involves interactions between the different kinds of knowledge, understanding and values that are articulated through language(s) and culture(s). They realise that successful intercultural communication is not only determined by what they do or say, but also by what members of the other language and culture understand from what they say or do.

Cross-curriculum priorities

The Australian Curriculum gives special attention to three cross-curriculum priorities:

- Aboriginal and Torres Strait Islander histories and cultures
- Asia and Australia's engagement with Asia
- sustainability.

The cross-curriculum priorities are embedded in the curriculum and will have a strong but varying presence depending on their relevance to each of the learning areas.

Aboriginal and Torres Strait Islander histories and cultures

Aboriginal and Torres Strait Islander communities are strong, rich and diverse. Aboriginal and Torres Strait Islander identity is central to this priority. It is intrinsically linked to living and learning in Aboriginal and Torres Strait Islander communities, deep knowledge of traditions and holistic world view.

A conceptual framework based on Aboriginal and Torres Strait Islander peoples' unique sense of identity has been developed as a tool for embedding Aboriginal and Torres Strait Islander histories and cultures within the Australian curriculum. This sense of identity is approached through the interconnected concepts of Country/Place, people and culture. Embracing these elements enhances all areas of the curriculum.

The Aboriginal and Torres Strait Islander priority provides opportunities for all learners to deepen their knowledge of Australia by engaging with the world's oldest continuous living cultures. This knowledge and understanding will enrich their ability to participate positively in the evolving history of Australia.

A direct way of learning about and engaging with diverse Aboriginal and Torres Strait Islander communities is to learn an Aboriginal language and/or a Torres Strait Islander language. There is an inseparable connection between Aboriginal languages and Torres Strait Islander languages and land/sea, Country/Place, the environment, fauna and flora. Aboriginal and Torres Strait Islander histories and cultures are an integral part of the learning of Aboriginal languages and Torres Strait Islander languages.

In learning all languages, there is a scope for making interlinguistic and intercultural comparisons across languages, including Aboriginal and Torres Strait Islander languages, to develop understanding of concepts related to the linguistic landscape of Australia and to the concepts of language and culture in general.

Asia and Australia's engagement with Asia

In the Australian Curriculum: Languages, the cross-curriculum priority of Asia and Australia's engagement with Asia enables the development of rich and engaging content and contexts for developing students' capabilities to engage with the languages and cultures of Asia and of people of Asian heritage within Australia.

The Australian Curriculum: Languages enables students to learn the languages of the Asian region, learning to communicate and interact in interculturally appropriate ways, exploring concepts, experiences and perspectives from within and across Asian cultures.

In the languages learning area, students develop an appreciation for the place of Australia within the Asian region, including the interconnections of languages and cultures, peoples and communities, histories and economies. Students learn how Australia is situated within the Asian region, how our national linguistic and cultural identity is continuously evolving both locally, regionally and within an international context.

Sustainability

In the Australian Curriculum: Languages, the priority of sustainability provides a context for developing students' capability to communicate ideas, understanding and perspectives on issues and concepts related to the environment.

The Australian Curriculum: Languages contributes to students' capabilities to investigate, analyse and communicate concepts and understandings related to sustainability in broad contexts, and to advocate, generate and evaluate actions for sustainable futures. Within each language, students engage with a range of texts focused on concepts related to sustainability.

These include:

- environment
- conservation
- social and political change
- linguistic and cultural ecologies
- change, both within the target language and culture, and across languages and cultures in general.

In this way, students develop knowledge, skills and understanding about sustainability within particular cultural contexts. This is crucial in the context of national and international concerns about, for example, climate change, food shortages and alternative ways of caring for land and agriculture. Through developing a capability to interact with others, negotiating meaning and mutual understanding respectfully and reflecting on communication, students learn to live and work in ways that are both productive and sustainable.

Learning Aboriginal languages and Torres Strait Islander languages contributes to the global effort to exchange knowledge among people with varied practices in caring for the land. It also contributes to the reconciliation process in Australia and goals for language revival.

Glossary

abstract symbols

can include: speech, sign language, Braille, alphabet, whole words, pictographs and line drawings

Accent

A manner of pronunciation of a language which marks speakers as belonging to identifiable categories such as geographical or ethnic origin, social class or generation.

Accent marks

Marks placed on a letter to indicate pronunciation, stress or intonation, or to indicate a different meaning or different grammatical usage for the word within which they appear. For example, *résumé*, *piñata*, *ou/ò*.

Accuracy

Production of structurally correct forms of the target language.

Adjective

A word that modifies or describes a noun or pronoun. For example, *astonishing* in *an astonishing discovery*.

Adverb

A word class that may modify or qualify a verb, an adjective or another adverb. For example, *beautifully* in *she sings beautifully*; *really* in *he is really interesting*; *very* and *slowly* in *she walks very slowly*.

Adverbial

A word or group of words that functions as an adverb.

adverbs

a word class that may modify a verb (for example, 'beautifully' in 'She sings beautifully'), an adjective (for example 'really' in 'He is really interesting') or another adverb (for example 'very' in 'She walks very slowly'). In English many adverbs have an -ly ending.

Aesthetic

Relates to a sense of beauty or appreciation of artistic expression.

Alliteration

A recurrence of the same consonant sounds at the beginning of words in close succession (for example, ripe, red raspberry)

Audience

Intended readers, listeners or viewers.

audiences

the intended group of readers, listeners or viewers that the writer, designer, filmmaker or speaker is addressing

Authentic (texts/materials)

Texts or materials produced for 'real-life' purposes and contexts as opposed to being created specifically for learning tasks or language practice.

Author

A composer or originator of a work (for example, a novel, film, website, speech, essay, autobiography).

behaviours that are not intentionally directed at another person

can include vocalising, turning away, startling, relaxing, frowning, smiling, blinking. The meaning of these behaviours is reliant on a communication partner interpreting and attributing meaning to them.

Bilingualism

An ability to use two or more languages.

Biography

A detailed account of an individual's life; a text genre that lends itself to different modes of expression and construction. In the context of intercultural language learning, the concept of biography can be considered in relation to identity, to the formation of identity over time, and to the understanding that language is involved in the shaping and expressing of identity.

Character components

Individual elements of a written character which have a separate linguistic identity.

Characters

- (i) graphic symbols used in writing in some languages
 - (ii) assumed roles in dramatic performance
-

Clause

A grammatical unit that contains a subject and a predicate (verb) and expresses the complete proposition.

clauses

a grammatical unit that refers to a happening or state (for example, 'The netball team won' [happening], 'The cartoon is an animation' [state]). A clause usually contains a subject and a verb group/phrase (for example, 'The team [subject] has played [verb group/phrase] a fantastic game'), which may be accompanied by an object or other complements (elements that are closely related to the verb – for example, 'the match' in 'The team lost the match') and/or adverbials (for example, 'on a rainy night' in 'The team won on a rainy night').

CLIL

Content and language integrated learning. An approach to learning content through an additional language.

Code-switching

A use of more than one language in a single utterance. For example, *Papa, can you buy me a panini, please?* A common feature of bilingual and multilingual language use.

Cognates

Similar or identical words which have shared origins. For example, *father* (English), *Vater* (German) and *pater* (Latin) have a shared origin. *Gratitude* (English) and *gratitud* (Spanish) are both derived from *gratitudo* (Latin). English *ship* and *skiff* share the same Germanic origin.

Cohesion

Grammatical or lexical relationships that bind different parts of a text together and give it unity. Cohesion is achieved through various devices such as connectives, ellipses and word associations. These associations include synonyms, antonyms (for example, *study/laze about*, *ugly/beautiful*), repetition (for example, *work, work, work – that's all we do!*) and collocation (for example, *friend* and *pal* in, *My friend did me a big favour last week. She's been a real pal.*)

cohesion

grammatical or lexical relationships that bind different parts of a text together and give it unity. Cohesion is achieved through various devices such as connectives, ellipses and word associations (sometimes called lexical cohesion). These associations include synonyms, antonyms (for example, 'study/laze about', 'ugly/ beautiful'), repetition (for example, 'work, work, work – that's all we do!') and collocation (for example, 'friend' and 'pal' in, 'My friend did me a big favour last week. She's been a real pal.')

Collocation

Words that typically occur in close association and in particular sequence. For example, *salt and pepper* rather than *pepper and salt* and *ladies and gentlemen* rather than *gentlemen and ladies*.

Communication

A mutual and reciprocal exchange of meaning.

Communicative competence

An acquired capability to understand and interact in context using the target language (TL). Defined by the use of appropriate phonological, lexical, grammatical, sociolinguistic and intercultural elements.

Complex sentence

A sentence with more than one clause. In the following examples, the subordinate clauses are indicated by square brackets: *I took my umbrella [because it was raining]; The man [who came to dinner] is my brother.*

complex sentence

has one or more subordinate clauses. In the following examples, the subordinate clauses are indicated by square brackets: 'I took my umbrella [because it was raining].'; '[Because I am studying for an exam], my time is limited.'; and 'The man [who came to dinner] is my brother.'

Complexity

A degree to which language use is complex as opposed to simple. Elements of language complexity include:

Composing

A process of producing written, spoken, graphic, visual or multi-modal texts. It includes:

It also includes applying knowledge and control of language forms, features and structures required to complete the task.

Compound sentence

A sentence with two or more main clauses of equal grammatical status, usually marked by a coordinating conjunction such as *or*, *and*, *but*. In the following examples, the main clauses are indicated by square brackets: *[Alice came home this morning] [but she didn't stay long]*. *[Kim is an actor]*, *[Pat is a teacher]*, *[and Sam is an architect]*.

compound sentences

has two or more main clauses of equal grammatical status, usually marked by a coordinating conjunction such as 'and', 'but' or 'or'. In the following examples below, the main clauses are indicated by square brackets: '[Jill came home this morning] [but she didn't stay long].'; '[Kim is an actor]', '[Pat is a teacher]', '[and Sam is an architect]'.

comprehension strategies

strategies and processes used by readers to make meaning from texts. Key comprehension strategies include: activating and using prior knowledge; identifying literal information explicitly stated in the text; making inferences, based on information in the text and their own prior knowledge; predicting likely future events in a text; visualising by creating mental images of elements in a text; summarising and organising information from a text; integrating ideas and information in texts; and critically reflecting on content, structure, language and images used to construct meaning in a text.

Comprehension strategies

Strategies and processes used by listeners, readers and viewers of text to understand and make meaning. These include:

- making hypotheses based on illustrations or text layout
 - drawing on language knowledge and experience (for example, gender forms)
 - listening for intonation or expression cues
 - interpreting grapho-phonetic, semantic and syntactic cues.
-

Comprehension/comprehending

An active process of making/constructing/deciphering meaning of language input through listening, reading, viewing, touching (as in braille) and combinations of these modes. It involves different elements: decoding, working out meaning, evaluating and imagining. The process draws upon the learner's existing knowledge and understanding, text-processing strategies and capabilities; for example, inferencing or applying knowledge of text types and social and cultural resources.

Concrete language

A language used to refer to the perceptible and material world and to particular persons, places and objects. For example, *school, girl*; as opposed to *abstract language*, used to refer to ideas or concepts removed from the material world such as *peace, kindness, beauty*.

concrete symbols

can include: whole or part of real objects; a miniature version of the real object; photographs; pictures (pictures must clearly depict the object)

Conjunction

A part of speech that signals relationships between people, things, events, ideas. For example, Sophie and her mother might come and visit, or they might stay at home. The conjunction *and* links the two participants, while *or* links alternative options.

conjunction

a word that joins other words, phrases or clauses together in logical relationships such as addition, time, cause or comparison. There are two types of conjunctions: coordinating conjunctions and subordinating conjunctions. Coordinating conjunctions are words that link words, groups/phrases and clauses in such a way that the elements have equal grammatical status. They include conjunctions such as 'and', 'or' and 'but'. Subordinating conjunctions introduce certain kinds of subordinate clauses. They include conjunctions such as 'after', 'when', 'because', 'if' and 'that'.

conjunctions

a word that joins other words, phrases or clauses together in logical relationships such as addition, time, cause or comparison. There are two types of conjunctions: coordinating conjunctions and subordinating conjunctions. Coordinating conjunctions are words that link words, groups/phrases and clauses in such a way that the elements have equal grammatical status. They include conjunctions such as 'and', 'or' and 'but'. Subordinating conjunctions introduce certain kinds of subordinate clauses. They include conjunctions such as 'after', 'when', 'because', 'if' and 'that'.

Content

A subject matter used as a vehicle for language learning.

context

the environment in which a text is responded to or created. Context can include the general social, historical and cultural conditions in which a text is responded to and created (the context of culture) or the specific features of its immediate environment (context of situation). The term is also used to refer to the wording surrounding an unfamiliar word that a reader or listener uses to understand its meaning.

Context

An environment and circumstances in which a text is created or interpreted. Context can include the general social, historical and cultural conditions in which a text exists or the specific features of its immediate environment, such as participants, roles, relationships and setting. The term is also used to refer to the wording surrounding an unfamiliar word that a reader or listener uses to understand its meaning.

contexts

the environment in which a text is responded to or created. Context can include the general social, historical and cultural conditions in which a text is responded to and created (the context of culture) or the specific features of its immediate environment (context of situation). The term is also used to refer to the wording surrounding an unfamiliar word that a reader or listener uses to understand its meaning.

Convention

An accepted language or communicative practice that has developed and become established over time. For example, use of punctuation or directionality.

conventional behaviours

can include: speech, actions, formal gesture (eg head nod, shake, wave hello/goodbye), directing others' attention and pointing.

conventions

an accepted language practice that has developed over time and is generally used and understood (for example, use of punctuation)

create

develop and/or produce spoken, written or multimodal texts in print or digital forms

Create

Develop and/or produce spoken, written or multimodal texts in print or digital forms.

Cues

Sources of information used to facilitate comprehension of language, that may be visual, grammatical, gestural or contextual.

Culture

In earlier models of language teaching and learning, *culture* was represented as a combination of literary and historical resources, and visible, functional aspects of a community group's way of life such as food, celebrations and folklore. While these elements of culture are parts of cultural experience and organisation, current orientations to language teaching and learning employ a less static model of culture. Culture is understood as a framework in which things come to be seen as having meaning. It involves the lens through which:

- people see, think, interpret the world and experience
- make assumptions about self and others
- understand and represent individual and community identity.

Culture involves understandings about 'norms' and expectations, which shape perspectives and attitudes. It can be defined as social practices, patterns of behaviour, and organisational processes and perspectives associated with the values, beliefs and understandings shared by members of a community or cultural group. Language, culture and identity are understood to be closely interrelated and involved in the shaping and expression of each other. The intercultural orientation to language teaching and learning is informed by this understanding.

De-centre

A capacity to step outside familiar frames of reference, to consider alternative views, experiences and perspectives and to look critically and objectively at one's own linguistic and cultural behaviour.

Decode

A process of working out the meaning of a text. Decoding strategies involve readers/listeners/viewers drawing on contextual, lexical, alphabetic, grammatical and phonic knowledge to decipher meaning. Readers who decode effectively combine these forms of knowledge fluently and automatically, using meaning to recognise when they make an error and to self-correct.

Dialect

A variant of a language that is characteristic of a region or social group.

Diaspora

A scattered population with a common origin in a smaller geographical area.

Digital media

Various platforms via which people communicate electronically.

Digital texts

Audio, visual or multimodal texts produced through digital or electronic technology. They may be interactive and include animations or hyperlinks. Examples of digital texts include DVDs, websites and e-literature.

digital texts

audio, visual or multimodal texts produced through digital or electronic technology, which may be interactive and include animations and/or hyperlinks. Examples of digital texts include DVDs, websites, e-literature

Digraph

Two letters that represent a single sound:

- vowel digraphs have two vowels (for example, 'oo', 'ea')
 - consonant digraphs have two consonants (for example, 'sh', 'th')
-

Diphthongs

Two vowel sounds pronounced in a single syllable with the individual vowel sounds distinguished. (For example, *hour*)

Directionality

A direction in which writing/script occurs, for example, from left to right, right to left.

Encode

A process of changing spoken language into symbols of written/digital language.

Enunciation

A clear and distinct pronunciation of language.

evaluative language

positive or negative language that judges the worth of something. It includes language to express feelings and opinions, to make judgments about aspects of people such as their behaviour, and to assess the quality of objects such as literary works. Evaluations can be made explicit (for example, through the use of adjectives as in: 'She's a lovely girl', 'He's an awful man', or 'How wonderful!'). They can also be left implicit (for example, 'He dropped the ball when he was tackled', or 'Mary put her arm around the child while she wept').

Face

A 'socio-dynamic' term which concerns self-delineated worth that comes from knowing one's status. Relates to concepts such as reputation, self-respect, honour and prestige. A key element of social relations in Chinese, Japanese and many other cultures.

Filler

A sound or word used in spoken conversation to signal a pause, hesitation or unfinished contribution. For example, *I went to the station...er... then I caught a train...* Frequent use of fillers characterises early stages of second language (L2) development, but proficient speakers and first language (L1) speakers also use them as an opportunity to reflect or recast.

Fluency

An ability to produce spoken or written language with appropriate phrasing, rhythm and pace. It involves the smooth flow of language, lack of hesitation or undue pausing and characterises the largely accurate use and automatism of the target language.

Form-focused learning activities

Activities designed to rehearse, practise, control and demonstrate particular language structures, forms or features. For example, drills, rehearsed role plays/dialogues, games and songs, set sequences of language patterns.

Formulaic language

Words or expressions which are commonly used in fixed patterns and learned as such without grammatical analysis. For example, *Once upon a time* (story-starter); *G'day, how are you going?* (greeting in Australian English).

Framing

A way in which elements of text are arranged to create a specific interpretation of the whole.

framing

the way in which elements in a still or moving image are arranged to create a specific interpretation of the whole. Strong framing creates a sense of enclosure around elements while weak framing creates a sense of openness

Genre

A category used to classify text types and language use; characterised by distinguishing features such as subject matter, form, function and intended audience. Examples of genres typically used in early language learning include greetings, classroom instructions and apologies. More advanced language proficiency includes the ability to use genres such as narrative or persuasive text, creative performance and debates.

The language we use and the description of language as a system. In describing language, attention is paid to both structure (form) and meaning (function) at the level of the word, the sentence and the text.

grammar

the language we use and the description of language as a system. In describing language, attention is paid to both structure (form) and meaning (function) at the level of the word, the sentence and the text

Grapho-phonetic knowledge

Knowledge of how letters in printed language relate to the sounds of the language and of how symbols (letters, characters) represent spoken language.

Homophone

A word identical in pronunciation with another but different in meaning (for example, *bare* and *bear*, *air* and *heir*).

Honorific

A grammatical form, typically a word or affix, that has at least part of its meaning the relative social status of the speaker in relation to the addressee, other participant or context. Parts of speech which signify respect, politeness and emphasize social distance or status.

Hybrid texts

Composite texts resulting from a mixing of elements from different sources or *genres*. For example, email, which combines the immediacy of talk and the expectation of a reply with the permanence of print.

Hypermedia

A multimedia system in which related items and forms of information, such as data, texts, graphics, video and audio, are linked and can be presented together by a hypertext program.

Hypertext

A text which contains links to other texts.

Identity

A person's conception and expression of individuality or group affiliation, self-concept and self-representation. Identity is closely connected to both culture and language. Thinking and talking about the self is influenced by the cultural frames, which are offered by different languages and cultural systems. Identity is not fixed. Second language learners' experience with different linguistic and cultural systems introduces them to alternative ways of considering the nature and the possibilities associated with identity.

Ideograph

A graphic character that indicates meanings without reference to the sounds used to pronounce the word.

Idiomatic expressions

A group of (more or less) fixed words having a meaning not deducible from the individual words. Idioms are typically informal expressions used by particular social groups and need to be explained as one unit (for example, *I am over the moon*, *on thin ice*, *a fish out of water*, *fed up to the back teeth*).

Indicative hours

An indication for the purposes of curriculum development of the assumption about learning time on task.

Infinitive

A base form of a verb.

informal behaviours

can include vocalising; turning/pushing/moving away; leaning/moving/reaching towards; frowning; smiling; blinking; looking at/touching/person; guiding person's hand; pointing to/touching desired object

Input

Direct contact with and experience of the target language; the stimulus required for language acquisition and learning. Input can take multiple forms and be received through different modes.

Intensifiers

Words that are usually used with adjectives to emphasise their meaning and are expressed by means of an adverb (for example, *very interesting*, *awfully boring*)

Intercultural capability

An ability to understand and to engage in the relationship between language, culture and people from diverse backgrounds and experience. This involves understanding the dynamic and interdependent nature of both language and culture, that communicating and interacting in different languages involves interacting with values, beliefs and experiences as well as with words and grammars. An intercultural capability involves being open to different perspectives, being flexible and curious, responsive and reflective; being able to decentre, to look objectively at one's own cultural ways of thinking and behaving, and at how these affect attitudes to others, shade assumptions and shape behaviours. Characteristics of an intercultural capability include cognitive and communicative flexibility and an orientation and ability to act in ways that are inclusive and ethical in relation to diversity and difference.

Intercultural language teaching and learning

An orientation to language teaching and learning that informs current curriculum design; framed by the understanding that language and culture are dynamic, interconnected systems of meaning-making; that proficiency in an additional language involves cultural and intercultural as well as linguistic capabilities. The focus is on developing communicative proficiency and on moving between language–culture systems. It includes the reflexive and reciprocal dimension of attention to learners' own language(s) and cultural frame(s).

Interpret

In the context of L2 learning, *interpret* refers to two distinct processes:

- the act of translation from one language to another
 - the process of understanding and explaining; the ability to conceive significance and construct meaning, and to explain to self or others
-

Intonation

A key component of communication, involving patterns of pitch and melody of spoken language that can be used like punctuation; for example, to express surprise or suggest a question, to shade, accentuate or diminish emphasis or meaning, and to regulate turn-taking in conversations.

Language

A human cognitive and communicative capability which makes it possible to communicate, to create and comprehend meaning, to build and sustain relationships, to represent and shape knowledge, and to imagine, analyse, express and evaluate.

Language is described and employed:

- **as code** – comprising systems, rules, a fixed body of knowledge; for example, grammar and vocabulary, sound and writing systems
- **as social practice** – used to do things, create relationships, interact with others, represent the world and the self; to organise social systems and practices in dynamic, variable, and changing ways
- **as cultural and intercultural practice** – means by which communities construct and express their experience, values, beliefs and aspirations
- **as cognitive process** – means by which ideas are shaped, knowledge is constructed, and analysis and reflection are structured

Language comprehension

A process of interpreting meaning from spoken, written, tactile and multimodal representations of language.

Language features

Features of language that support meaning; for example, sentence structure, noun group/phrase, vocabulary, punctuation, figurative language. Choices in language features and text structures together define a type of text and shape its meaning. These choices vary according to the purpose of a text, its subject matter, audience and mode or medium of production.

language features

the features of language that support meaning (for example, sentence structure, noun group/phrase, vocabulary, punctuation, figurative language). Choices in language features and text structures together define a type of text and shape its meaning. These choices vary according to the purpose of a text, its subject matter, audience and mode or medium of production

Language functions

Varied ways in which language is used to achieve particular purposes; for example, to persuade, to entertain, to apologise, to argue and/or to compliment.

Language patterns

Identifiable repeated or corresponding elements in a text. These include patterns of repetition or similarity, such as the repetition of imperative verb forms at the beginning of each step in a recipe, or the repetition of a chorus after each verse in a song. Patterns may alternate, as in the call and response pattern of some games, or the to-and-fro of a dialogue. Patterns may also contrast, as in opposing viewpoints in a discussion or contrasting patterns of imagery in a poem.

Language specificity

Distinguishing features of a particular language. These include lexico-grammatical and textual features, writing system(s), phonetic systems, and cultural elements which influence language use such as:

- politeness or kinship protocols
 - the nature of language communities which use the language
 - the historical and/or current relationship of a language with education in Australia
 - features of its 'learnability' in terms of teaching and learning in the context of Australian schooling.
-

Language systems

Elements that organise how a language works, including the systems of signs and rules (phonological, syntactic, semantic and pragmatic) that underpin language use. These systems have to be internalised for effective communication and comprehension.

layout

the spatial arrangement of print and graphics on a page or screen including size of font, positioning of illustrations, inclusion of captions, labels, headings, bullet points, borders and text boxes

Learning trajectory

A conceptualised developmental sequence of learning, including learning goals, learning activities, knowledge and skills to be developed at progressive levels.

Level statements

Descriptions in broad terms of the developmental characteristics of students and their language learning at particular phases along the Foundation–Year 12 continuum.

Lexical cohesion

A use of word associations to create links in texts. Links can be made through the use of repetition of words, synonyms, antonyms and words that are related, such as by class and subclass.

listen

to use the sense of hearing as well as a range of active behaviours to comprehend information received through gesture, body language and other sensory systems

Literacy resources

Individual resources and capabilities which learners bring to their learning experience; these include text knowledge, grammatical and vocabulary knowledge, knowledge of phonetic and writing systems. They also include critical, reflective and intercultural capabilities that support new literacy experience in a different language.

Macro skills

Four major language skills of listening, speaking, reading and writing.

Media texts

Spoken, print, graphic, or electronic communications created for a public audience. They often involve numerous people in their construction and are usually shaped by the technology used in their production. Media texts studied in different languages can be found in newspapers, magazines and on television, film, radio, computer software and the internet.

Mediate

To move between different linguistic and cultural systems, referencing own first language(s)/culture(s) while learning to use and to understand those of the target language. This movement involves:

- noticing, interpreting, responding sensitively and flexibly
- conveying culturally-shaped ideas, values, experience to others
- exploring how ideas and experiences are represented and conveyed in different languages and cultures
- considering similarities, overlaps, collisions and adjustments
- developing the capacity to communicate and represent different perspectives and interpretations.

Mediating operates in two distinctive ways:

- in practices such as interpreting and translating, with attention to what can happen in these processes in terms of 'losing' or 'gaining' meaning
- as the element of the learning experience, which involves noticing, responding, comparing and explaining differences in expression and perspective.

Medium

Resources used in the production and transmission of texts, including tools and materials used (for example, digital text and the computer, writing and the pen or the keyboard).

Metalinguage

A vocabulary used to discuss language conventions and use (for example, language used to talk about grammatical terms such as *sentence*, *clause*, *conjunction*; or about the social and cultural nature of language, such as *face*, *reciprocating*, *register*.)

Mnemonic

Memorising information by use of an aid such as a pattern, rhyme, acronym, visual image.

Modal verb

A verb attached to another verb to express a degree of probability (for example, *I might come home*) or a degree of obligation (for example, *You must give it to me*, *You are to leave now*).

Mode

Various processes of communication: listening, speaking, reading/viewing, signing and writing/creating. Modes are also used to refer to the semiotic (meaning making) resources associated with these communicative processes, such as sound, print, image and gesture.

Morpheme

The smallest meaningful unit in the grammar of a language. Morphemes are not necessarily the same as either words or syllables. The word *cat* has one morpheme while the word *cats* has two morphemes: *cat* for the animal and *s* to indicate that there is more than one. Similarly, *like* has one morpheme while *dislike* has two: *like* to describe appreciation and *dis* to indicate the opposite. The process of identifying morphemes assists comprehension, vocabulary building and spelling.

Morphology

Principles of word formation and inflection, especially with respect to constituent morphemes.

Multimodal text

A text which involves two or more communication modes; for example, the combining of print, image and spoken text in film or computer presentations.

multimodal text

combination of two or more communication modes (for example, print, image and spoken text, as in film or computer presentations)

multimodal texts

combination of two or more communication modes (for example, print, image and spoken text, as in film or computer presentations)

Narrative

A story of events or experiences, real or imagined.

Narrative devices

Techniques used to help in the narrating of a story or reported event. For example, imagery, metaphor, allusion.

narratives

ways of making sense of the past based on a selection of events. There are different types of narratives such as accounts of the past that relate a story (for example personal, fictitious) and historical recounts (such as the course of events during the Second World War)

Neologism

A new word is created, for example, *Smartphone*, *modem*, *AIDS* or an existing word is used in a new way, for example, *deadly*.

nominalisation

process for forming nouns from verbs (for example, 'reaction' from 'react' or 'departure' from 'depart') or adjectives (for example, 'length' from 'long', 'eagerness' from 'eager'). Nominalisation is also a process for forming noun groups/phrases from clauses (for example, 'their destruction of the city' from 'they destroyed the city'). Nominalisation is a way of making a text more compact and is often a feature of texts that contain abstract ideas and concepts.

Noun

A part of speech that includes all words denoting physical objects such as *man*, *woman*, *boy*, *girl*, *car*, *window*. These are *concrete nouns*. *Abstract nouns* express intangibles, such as *democracy*, *courage*, *success*, *idea*.

nouns

a word class that includes all words denoting physical objects such as 'man', 'woman', 'boy', 'girl', 'diamond', 'car', 'window' etc. These are called 'concrete nouns'. 'Abstract nouns' express intangibles such as 'democracy', 'courage', 'success', 'fact', 'idea'.

Oracy

An ability to express oneself in and to understand spoken language; it includes oral and aural proficiency.

Orthography

Writing words with correct letters or characters according to common usage.

Paralanguage

Additional elements of spoken communication which are integrated with vocal (voice) and verbal (words) elements, and contribute significantly to communication and meaning-making. For example, voice quality, volume and pacing, facial expressions, gestures, posture and body movement.

Paralinguistics

A study of paralanguage elements of expression.

Pedagogy

A combination of conceptual knowledge, practical skills and reflective capabilities which constitute the 'art and science' of teaching.

Performance

A use of the language in real situations, putting language knowledge into practice; it involves accuracy, fluency and complexity.

Phoneme

The smallest meaningful unit in the sound system of a language. For example, the word *is* has two phonemes: /i/ and /s/; *ship* has three phonemes: /sh/, /i/, /p/. A phoneme usually has several manifestations dependent on varying phonological contexts. For example, the *p* in *pin* and *spin* differs slightly in pronunciation but is regarded as being the same phoneme; that is, as having the same functional meaning within each word.

Phonics

A relationship between letters or characters and the sounds they make when pronounced. L2 learning involves developing phonic awareness and proficiency.

phonics

the term used to refer to the ability to identify the relationships between letters and sounds when reading and spelling

Phonological awareness

Understanding that every spoken word is composed of small units of sound, identifying relationships between letters and sounds when listening, reading and spelling. It includes understandings about words, rhyme and syllables.

Pragmatics

A study of how context affects communication; for example, in relation to the status of participants, the situation in which the communication is happening, or the intention of the speaker.

Prediction

An informed presumption about something that might happen. Predicting at text level can include working out what a text might contain by looking at the cover, or working out what might happen next in a narrative. Predicting at sentence level includes identifying what word is likely to come next in a sentence.

Prefix

A meaningful element (morpheme) added before the main part of a word to change its meaning. For example, unhappy.

prefixes

meaningful elements (morphemes) added to the beginning of words to change their meaning (for example, 'un' to 'happy' to make 'unhappy')

Preposition

A part of speech that precede a noun, noun phrase or pronoun, thereby describing relationships in a sentence in respect to:

- space/direction (below, in, on, to, under – for example, she sat on the table).
- time (after, before, since – for example, I will go to the beach after lunch).
- those that do not relate to space or time (of, besides, except, despite – for example, he ate all the beans except the purple ones)

Prepositions usually combine with a noun group or phrase to form a prepositional phrase. For example, in the office, besides these two articles.

prepositional phrases

typically consist of a preposition followed by a noun group/phrase. Prepositional phrases occur with a range of functions, including: adverbial in clause structure (for example, 'on the train' in 'We met on the train.');

modifier in noun group/phrase structure (for example, 'with two children' in 'a couple with two children');

and modifier in adjective group/phrase structure (for example, 'on golf' in 'keen on golf').

Productive language use

One of the two aspects of communication through language (see *receptive language*) involving the ability to express, articulate and produce utterances or texts in the target language.

Pronoun

A part of speech that refers to nouns, or substituting for them, within and across sentences. For example, *Ahmad chose a chocolate cake. He ate it that evening* (where *he* and *it* are personal pronouns; and *that* is a demonstrative pronoun).

Pronunciation

A manner in which a syllable is uttered.

Prosody

Patterns of rhythm, tempo, stress, pitch and intonation used in language; for example, in poetry or public speaking.

Proxemics

A use of space, posture and touch as elements of non-verbal communication.

Purposeful learning

Learning which results from authentic language experiences that involve real purpose and achievable outcomes.

Question

A commonly employed prompt to elicit language use. A key element of scaffolding to support learners' use of language and to encourage further contributions. Different types of questions provide different prompts:

- **closed questions** are questions for which there are predictable answers. For example, *What time is it?* These are typically used as prompts for short answers, as a framework for testing comprehension or reviewing facts, and for routinized interactions. They are frequently used to scaffold early language development.
- **open questions** are questions with unknown and unpredictable answers that invite and support more elaborated and extended contributions from learners. For example, *How do you feel about that? What do you think might happen next?* They are used as stimulus to discussion, reflection and investigation.

Questions are an important element of intercultural language teaching and learning. The quality of questions determines the quality and substance of the learning experience. Effective questions relating to the nature of language, culture and identity and the processes involved in language learning and intercultural experience guide the processes of investigating, interpreting and reflecting which support new understanding and knowledge development.

Read

Process visual or tactile symbols (for example, braille), words or actions in order to derive and/or construct meaning. Reading includes elements of decoding (of sounds and symbols), interpreting, critically analysing and reflecting upon meaning in a wide range of written, visual, print and non-print texts.

Receptive language

One of the two components of communication through language (see *productive language*): the 'receiving' aspect of language input, the gathering of information and making of meaning via listening, reading, viewing processes.

Reciprocating

An integrating element of intercultural communication that involves movement and relationship, interpreting and creating meaning, and understanding the process of doing so. It involves not only the exchange of words but also an exchange of understanding between the people involved. It comes into play when the learner 'self' encounters and interacts with the 'other' (the target language speaker, the target language itself as text or experience); when the existing language code and cultural frame encounters a different code and frame. This experience impacts on the learner's perspective and sense of identity and on their usual ways of communicating. Reciprocating involves conscious attention to the process: attention to the self (*intraculturality*) and to the likely impact of the self on the other person involved (*interculturality*). Things previously taken for granted are noticed in reference to new or different ways. Key elements of reciprocating include conscious attention, comparison, reflection and analysis:

- recognition that both partners in an exchange are involved in the 'effort of meaning'
 - willingness to work out what the other person means, the cultural and social context they are speaking from and the perspectives, which frame what they are saying
 - making necessary adjustments to own and each other's input, orientation and stance that will help the exchange to be successful.
-

Register

A variety of language used for a particular purpose or in a particular situation, the variation being defined by *use* as well as *user*. For example, informal register or academic register.

Romanisation

A transcription from a differently scripted language, such as Chinese or Japanese, into the Latin alphabet.

Root of a word

A word/word element that cannot be reduced to a smaller unit and from which other words are formed. For example, plant in replanting.

Scaffolding

Support provided to assist the learning process or to complete a learning task. Scaffolded language support involves using the target language at a level slightly beyond learners' current level of performance, and involves incremental increasing and decreasing of assistance. Task support provides assistance to perform just beyond what learners can currently do unassisted, to progress to being able to do it independently. Scaffolding includes modelling and structuring input in ways that provide additional cues or interactive questioning to activate existing knowledge, probe existing conceptions or cue noticing and reflecting.

Scanning

A text processing strategy adopted to search for specific words, ideas or information in a text without reading every word. For example, looking for a word in the dictionary or a name in a phone directory. Scanning involves moving the eyes quickly down the text looking for specific words and phrases to gain a quick overall impression/to get the gist.

Script

A writing system in which characters or symbols represent components of language (letters, syllables, words).

Semantic knowledge

Knowledge gained at a meaning rather than a decoding level. This involves understanding the relationship between signifiers (words, phrases, symbols, signs) and the meanings they represent. Semantic information is supported through reference to prior knowledge, cultural connotations and contextual considerations.

simple sentences

have the form of a single clause (for example, 'David walked to the shops.' or 'Take a seat.')

Skimming

A text processing strategy aimed at gaining information quickly without focusing on every word.

Speak

Convey meaning and communicate with purpose. Some students participate in speaking activities using communication systems and assistive technologies to communicate wants, and needs, and to comment about the world

Stereotype

A widely held but fixed and oversimplified image or idea of a particular type of person or thing

Stress

An emphasis in pronunciation that is placed on a particular syllable of a word; for example, *she will **conduct** the orchestra; her **conduct** is exemplary*.

Suffix

A meaningful element added after the root of a word to change its meaning (for example, to show its tense : *–ed* in *passed*. Common suffixes in English include *–ing*; *–ed*; *ness*; *–less*; *–able*).

suffixes

meaningful elements added to the ends of words to change their meaning (for example, to show its tense: 'ed' in 'passed'). Common suffixes are 'ing', 'ed', 'ness', 'less' and 'able')

Synchronous

Occurring or existing at the same time.

Syntax

An ordering of sentence elements such as words, group/phrases and clauses. In some education settings, the terms *syntax* and *grammar* are used interchangeably.

Talk

Convey meaning and communicate with purpose. Some students participate in speaking activities using communication systems and assistive technologies to communicate wants, and needs, and to comment about the world

Task

An integrated experience and use of language, set in a context, accomplishing a purpose, focused on meaning. A task provides an organising structure and context for meaning-focused language learning. Unlike form-focused language activities and exercises, task-based learning involves the achievement of a goal or authentic outcome. Learners draw from existing language resources and seek out unfamiliar resources as needed to complete the task. Scaffolding is provided by the teacher via the task cycle, which includes form-focused teaching. Examples of tasks: researching an issue, sharing ideas and then categorising and presenting results; planning and having a picnic; designing and publishing an online newsletter.

Task-based language learning (TBLL)

An orientation to language teaching and learning, which focuses on the use of the language in meaningful and 'life-like' tasks and activities. The completion of the task is not an end in itself, as tasks are part of the overall learning and using of the language, providing a context and purpose for developing language competence and a means of assessing and evaluating learning outcomes. Learners work independently and/or collaboratively, draw on existing language resources, generate solutions to communicative problems, seek out additional or new language and other resources needed to complete the task. Focused language work, such as grammar knowledge, vocabulary building, social and cultural competence, is integrated with task preparation and completion processes. Tasks provide opportunities to integrate the four modes of language use, to develop fluency, complexity and problem-solving capacity, as well as including work on accuracy and focus on form. A task has limits as a one-off learning event, but is used as a meaningful component of learners' overall learning progression.

tenses

a grammatical category marked by a verb in which the situation described in the clause is located in time. For example, present tense 'has' in 'Sarah has a headache' locates the situation in present time, while past tense 'had' in 'Sarah had a headache' locates it in past time. However, the relation between grammatical tense and (semantic) time is not always as simple as this. For example, present tense is typically used to talk about: present states, as in 'He lives in Darwin'; actions that happen regularly in the present, as in 'He watches television every night'; 'timeless' happenings, as in information reports such as 'Bears hibernate in winter'; references to future events, as in 'The match starts tomorrow' where the tense is present but the time future. Likewise in 'I thought the match started tomorrow' where the subordinate clause 'the match started tomorrow' has past tense but refers to future time texts.

Text

An identified stretch of language, used as a means for communication or the focus of learning and investigation. Text forms and conventions have developed to support communication with a variety of audiences for a range of purposes. Texts can be written, spoken or multimodal and in print or digital/online forms. Multimodal texts combine language with other systems for communication, such as print text, visual images, soundtrack and spoken word, as in film or computer presentation media.

Text processing strategies

Strategies learners use to decode and understand text. These involve drawing on contextual, semantic, grammatical and phonic knowledge in systematic ways to work out what a text says. They include predicting, recognising words and working out unknown words, monitoring comprehension, identifying and correcting errors, reading on and re-reading.

Text structure

Ways in which information is organised in different types of texts (for example, chapter headings, subheadings, tables of contents, indexes and glossaries, overviews, introductory and concluding paragraphs, sequencing, topic sentences, taxonomies, cause and effect). Choices in text structures and language features together define a text type and shape its meaning. Different languages/cultures structure texts differently in many instances.

text structures

the ways in which information is organised in different types of texts (for example, chapter headings, subheadings, tables of contents, indexes and glossaries, overviews, introductory and concluding paragraphs, sequencing, topic sentences, taxonomies, cause and effect). Choices in text structures and language features together define a text type and shape its meaning.

Text types (genres)

Categories of text, classified according to the particular purposes they are designed to achieve, which influence the features the texts employ. For example, texts may be imaginative, informative or persuasive; or can belong to more than one category. Text types vary significantly in terms of structure and language features across different languages and cultural contexts. For example, a business letter in French will be more elaborated than a similar text in English; a request or an offer of hospitality will be differently expressed in Japanese or German.

texts

the means for communication. Their forms and conventions have developed to help us communicate effectively with a variety of audiences for a range of purposes. Texts can be written, spoken or multimodal and in print or digital/online forms. Multimodal texts combine language with other systems for communication, such as print text, visual images, soundtrack and spoken word as in film or computer presentation media.

Textual features/conventions

Structural components and elements that combine to construct meaning and achieve purpose, and are recognisable as characterising particular text types (*see language features*).

Tone

A use of pitch and contour in spoken language to nuance words and, in some languages, to distinguish lexical or grammatical meaning. In Chinese, for example, the tones are distinguished by their pitch range (register), duration and contour (shape). All Chinese syllables have a set tone, which distinguishes it and its meaning from another syllable. However, in certain environments tones can change or be modified, while in rapid spoken Chinese a great many unstressed syllables carry no tone at all.

Translation

A process of translating words/text from one language into another, recognising that the process involves movement of meanings and attention to cultural context as well as the transposition of individual words.

Transliteration

Writing a letter or word using the closest corresponding letter or word from a different language or alphabet.

Verb

A part of speech which expresses existence, action, state or occurrence. For example, *they **watch** football; she **is** exhausted; the day finally **came**.*

auxiliary verb – a verb that combines with another verb in a verb phrase to form tense, mood, voice or condition. For example, *they **will** go, I **did** eat lunch, she **might** fail the exam.*

verb

a word class that describes a kind of situation such as a happening (for example, 'climbed' in 'She climbed the ladder') or a state (for example, 'is' in 'The koala is an Australian mammal').

verb groups

consists of a main verb, alone or preceded by one or more auxiliary or modal verbs as modifiers. For example, verb groups/phrases: create tense, as in 'He [was happy]', 'She [is working] at home', 'I [have seen] him before'; express modality using modal verbs such as 'can', 'may', 'must', 'will', 'shall' and so on, as in 'You [must be] mad', 'He [will have arrived] by now', 'She [may know] them'; and create passive voice, as in 'A photo [was taken]'.

verbs

a word class that describes a kind of situation such as a happening (for example, 'climbed' in 'She climbed the ladder') or a state (for example, 'is' in 'The koala is an Australian mammal').

view

observe with purpose, understanding and critical awareness. Some students participate in viewing activities by listening to an adult or peer describing the visual features of text, diagrams, pictures and multimedia

voice

in English grammar voice is used to describe the contrast between such pairs of clauses as 'The dog bit me' (active voice) and 'I was bitten by the dog' (passive voice). Active and passive clauses differ in the way participant roles are associated with grammatical functions. In clauses expressing actions, like the above examples, the subject of the active ('the dog') has the role of actor, and the object ('me') the role of patient; whereas, in the passive, the subject ('I') has the role of patient and the object of the preposition by ('the dog') the role of actor. In clauses that describe situations other than actions, such as 'Everyone admired the minister' and 'The minister was admired by everyone', the same grammatical difference is found, so that the object of the active ('the minister') corresponds to the subject of the passive; and the subject of the active ('everyone') corresponds to the object of the preposition 'by'. And in the literary sense, it can be used to refer to the nature of the voice projected in a text by an author (for example, 'authorial voice' in a literary text or 'expert voice' in an exposition).

Word borrowing

A practice of incorporating words from one language into another. For example, the use of Italian words such as *pianissimo*, *cannelloni* in English and the use of English ICT terms in many languages. The increasing frequency of word-borrowing between languages reflects intercultural contact, contemporary cultural shifts and practices in a globalised world, issues of ease of communication and efficiency and technological specialisation.

write

plan, compose, edit and publish texts in print or digital forms. Writing usually involves activities using pencils, pens, word processors; and/or using drawings, models, photos to represent text; and/or using a scribe to record responses or produce recorded responses

The Australian Curriculum Languages - Arabic

Overview

Context statement

The place of the Arabic culture and language in Australia and in the world

Arabic is spoken by approximately 280 million people in 22 countries over two continents. It is the official language of the Arab world, which includes countries of the Middle East, North Africa and the Gulf region, and is one of the official languages of the United Nations. The Arabic-speaking world has a long history, and the Arabic language has evolved and flourished over time, as evidenced by the richness of its literature. Arabic is comprised of a number of dialects that reflect the cultural diversity of Arabic-speaking countries, regions and communities.

Since the end of the nineteenth century, large communities of Arabic speakers have migrated to countries such as the United States, Europe and Australia. More than 370,000 Australians are of Arab descent, living predominantly in Sydney and Melbourne. Australia has strong relationships with countries in the Middle East, North Africa, the Gulf and the wider Arabic-speaking world through family ties, trade and education.

Arabic-speaking communities in Australia comprise diverse groups, differing in ancestral origins, religious backgrounds and histories. They hold a heritage that shares common linguistic and cultural traditions, and these are the ties that bind. Arabic language and culture represent an important part of the linguistic and cultural diversity of Australia. The Arabic-speaking community has made and continues to make a significant contribution to the development and enrichment of Australian society, in areas such as commerce, agriculture, industry, health, education, journalism, hospitality, tourism and international relations.

The place of the Arabic language in Australian education

The study of Arabic provides background students with the opportunity to connect with their family heritage and to communicate with speakers of Arabic in Australia and around the world. Following the early settlement of Arabic speakers in Australia, the teaching of Arabic was established for children of Arabic-speaking migrants in after-hours school settings. Since the 1980s, Arabic has been taught in primary and secondary schools and tertiary institutions across Australia as well as in after-hours schools run by community organisations. This reflected the growing Arabic-speaking community in Australia, as well as government policies of the time supporting multiculturalism. The demand for Arabic language education in Australia has increased due to the geopolitical importance of the Arabic-speaking world and greater awareness of business opportunities.

The nature of Arabic language learning

Arabic is a Semitic language, and shares linguistic and phonological similarities with other Semitic languages such as Syriac, Aramaic and Hebrew. Classical Arabic and its successor, Modern Standard Arabic, have been and continue to be the language of religious texts as well as the basis for a rich heritage of classical poetry and literary prose. Today, speakers of Arabic come from a variety of social, cultural and religious backgrounds. Their views, cultures and beliefs are manifested in the language they use formally and informally in every aspect of their private lives and public affairs. Language is an inseparable part of their identity and the way they view themselves and the world around them.

The Arabic language has two forms: Modern Standard Arabic (اللغة العربية الفصحى) and colloquial Arabic. Modern Standard Arabic is the official language taught worldwide and used in formal situations, such as at school and university and in mosques, churches and official media. Colloquial Arabic is used in everyday situations, such as at home and in the marketplace, the street, restaurants, cafés, and popular and social media. Modern Standard Arabic is common to all countries of the Arabic-speaking world, while colloquial Arabic varies according to geographical location. For example, two individuals from Iraq and Morocco speaking in dialects would not easily understand each other unless they injected elements of Modern Standard Arabic into the conversation.

Arabic is a scripted language and is written from right to left. There are 28 letters, which are all consonants with short and long vowels. These vowels are represented in the forms of letters and marks called diacritic symbols which identify how words and letters are pronounced. Arabic is a highly inflectional language, with words formed according to a root system. Various vowels, prefixes and suffixes are used with root letters to create the desired inflection of meaning.

The diversity of learners of Arabic

The Australian Curriculum: Languages – Arabic is pitched to background language learners, the dominant cohort of learners in the Australian context.

The background language learner pathway has been developed for students who have exposure to Arabic language and culture, and who may engage in active but predominantly receptive use of Arabic at home. The range of learners within the Arabic background language learner pathway is diverse, defined for the most part by different waves of migration, and their use of Arabic may extend beyond the home to everyday interactions with Arabic-speaking friends and involvement in community organisations and events. Other learners may have been born in an Arabic-speaking country, where they may have completed some education.

A key dimension of the Australian Curriculum: Languages – Arabic involves understanding the interrelationship between language and culture. The curriculum is designed with an intercultural language learning orientation to enable students to participate meaningfully in language and cultural experiences, to develop new ways of seeing and being in the world from a bilingual perspective, and to understand more about themselves in the process.

The Australian Curriculum Languages - Arabic Years F–10 Sequence

Foundation to Year 2

The nature of the learners

Children enter the early years of schooling with varying degrees of early literacy capability in Arabic and/or English. For young students, learning typically focuses on their immediate world of family, home, school, friends and neighbourhood. They are learning how to socialise with new people in settings outside the home, share with others, and participate in structured routines and activities at school.

Arabic language learning and use

Arabic is learnt in parallel with English language and literacy. While the learning of Arabic differs from the learning of English, each supports and enriches the other. Arabic is used at home and in familiar Arabic-speaking settings, and in classroom interactions, routines and activities, supported by the use of materials and resources, gestures and body language. At this stage, there is a focus on play, imaginative activities, games, music, dance and familiar routines, which provide scaffolding for language development. Repetition and consolidation help learners to identify familiar and new words and simple phrases, and to recognise the purpose of simple texts. Learners use Arabic for functions such as greeting (مرحباً؛ صباح الخير), sharing information (هذه أختي لينا؛ عمري ست سنوات), responding to instructions (نعم؛ أنا هنا؛ حاضر), and taking turns in games and simple shared tasks. The transition from spoken to written language is scaffolded via shared exploration of simple texts and language features. Learners use a variety of cues, including images, context and frequently used word patterns, to comprehend texts and communicate.

Contexts of interaction

The primary contexts for interaction in Arabic are the immediate environment of home and the classroom. Learners use Arabic to interact with each other and the teacher within the learning environment at school and with immediate family members at home. The use of information and communications technologies (ICT) enriches the learning of Arabic language and culture by providing alternative experiences, a range of resources, and opportunities to access authentic language in different contexts.

Texts and resources

Learners engage with a variety of spoken, written and visual texts, such as children's songs and nursery rhymes, stories from Big Books and interactive resources. Writing skills progress from identifying the alphabet to tracing, labelling and copying letters, and then to constructing simple, short texts using familiar vocabulary.

Features of Arabic language use

Learners become familiar with how the sounds of the Arabic language are represented in letters and words. They practise pronunciation and intonation through activities such as reciting rhymes and poems and singing songs, and experiment with sounds, short and long vowels, phonemes, words, simple phrases and sentences relating to pictures, objects and actions, for example, طاولة صغيرة. They learn to recognise the letters of the Arabic alphabet, including new sounds, for example, خ؛ ع؛ غ؛ ق؛ ص؛, and the way letters are joined to make words, for example, طار؛ طير؛ ذهب, and make comparisons with the English alphabet. They write letters, words and simple sentences using familiar vocabulary, prelearnt language features and structures, and formulaic expressions, for example, كان يا ما كان. They begin to recognise how language use changes according to the speakers and context.

Level of support

The classroom is a new context of communication where learners rely on the teacher to assist their learning. Learning experiences are supported by the teacher through scaffolding, modelling, cueing, monitoring, feedback and encouragement. Multiple and varied sources of input and stimulus are used, including visual cues, such as the use of gestures, and resources, for example, bilingual Big Books and picture books, subtitled cartoons and video programs, and realia, objects, maps and charts.

The role of English

Arabic is used as the medium for class interaction and to demonstrate and model new language acquisition. English may be used to explain features of language and aspects of culture. Both English and Arabic may be used when learners are communicating about similarities and differences between Arabic and other languages and cultures and reflecting on how they talk and behave in Arabic-speaking and English-speaking contexts.

Foundation to Year 2 Content Descriptions

Communicating

Socialising

Initiate interactions with peers and the teacher by asking and responding to questions and exchanging information about self and family, friends and school

[Key concepts: personal world, place, belonging; Key processes: introducing, exchanging, expressing preferences]

(ACLARC103)

Elaborations

- greeting peers and the teacher using appropriate expressions and body language, for example,
مرحباً؛ صباح الخير؛ كيف حالك/حالك؟؛ بخير شكراً
- introducing self, family and friends using formulaic expressions such as
إسمي عادل؛ إسمي رانيا؛ أنا مريم
هذا صديقي علي؛ هذه صديقتي ريم؛ هذا أبي وهذه أمي؛ اسم أخي رامي؛ هذا جدي؛ هذه أختي لينا؛ عمري ست سنوات؛ عمر أخي سنة؛ عمر أختي ثلاث سنوات
- describing self, family, friends and aspects of school, for example,
أنا طويل؛ أنا شاطر؛ بيتي صغير؛ غرفتي واسعة؛ صديقي علي ذكي؛ مدرستي كبيرة؛ معلمتي طيبة
- sharing information about self, home, family and favourite possessions, using simple sentence structures, familiar vocabulary and concrete materials such as toys, for example,
هذه لعبتي؛ اشتريت أمي لي هذه اللعبة في عيد ميلادي؛ أسمها "ميلاني"؛ أحب ميلاني كثيراً؛ تنام ميلاني معي في سريرتي
- initiating and sustaining interactions by asking and responding to questions about likes and dislikes, الديناصور،
أسمه "ريكس" أبي اشتراه لي في العطلة. ريكس صديقي؛ ألعب معه في البيت،
using simple language such as
من تحب في العائلة؟ ماذا تحب في المدرسة؟ هل تحب المدرسة؟ أحب جدي كثيراً؛ لا أحب الرياضة في المدرسة

- شكراً؛ شكراً جزيلاً

- following instructions such as **ضع يدك على رأسك؛ أغمض عينيك؛** أنظر إلي؛ ارفع يدك for a variety of language games
- providing simple information about familiar objects and people, using pictures and crafts to support communication, for example,
طاولة صغيرة؛ قلم رصاص؛ تلميذ شاطر؛ معلم جيد؛ شجرة كبيرة؛ بيت واسع؛
بنت جميلة؛ أمي طيبة؛ أبي حنون

- نعم؛ أنا هنا؛ حاضر؛ ممكن أن أتكلم؟

- asking and responding to questions, for example,
متى يبق الجرس؟ كيف أكتب ...؟ ما معنى...؟

لماذا تأخرت عن المدرسة؟ نمت كثيراً؛ توقفت سيارة أبي في الطريق؛ أخرنا أخي؛ بسبب أختي

- asking for permission and responding appropriately, for example, ممكن أن أذهب إلى الحمام؟ ممكن أن أأخذ الكتاب؛ يمكن أن أجلس هنا؛ شكراً؛ شكراً معلمة؛ مع السلامة؛ إلى اللقاء
- participating in games or activities that involve taking turns, making choices or swapping items, for example, forming groups using numbers or colours for activities such as telling the time or counting or memory games

Elaborations

Locate and organise information from simple spoken, written and visual texts to identify details about people and objects
[Key concepts: meaning, context; Key processes: listening, reading, locating, categorising]

(ACLARC106)

- listening for key words in stories, rhymes or songs, using intonation and visual cues such as gestures and facial expressions to assist understanding
- identifying letters, words and phrases in written Arabic, for example, titles, labels and captions, by labelling, matching, clicking and dragging, miming and using actions
- participating in shared reading of print and digital texts such as stories in Big Books and other texts relating to familiar events and contexts, using pictures, intonation and contextual cues to predict meaning and identify key information
- sorting and categorising information in graphic representations such as tables, including details about colour, quantity and place relating to people and objects, for example,

ما لون الفستان؟ لون الفستان أحمر؛ ما لون المقلمة؟ لون المقلمة أحمر

كم عدد الأقلام؟ كم كتاباً يوجد هنا؟ يوجد أربعة كتب

أين تعمل أمك؟ تعمل أمي في المستشفى؛ يدرس أخي في المدرسة

Share information obtained from different sources, including online and digital sources, by listing, tabulating or sequencing information and using illustrations and gestures to support meaning

[Key concepts: self, family, school; Key processes: describing, showing, presenting]

(ACLARC107)

- creating short texts to label and describe personal possessions and objects in the classroom using simple sentences, for example,
حقيبتي كبيرة وثقيلة؛ صفي صغير وجميل؛ طاولة المعلمة غير مرتبة؛ النافذة في الصف مكسورة؛ عندنا لوح ذكي جديد في الصف؛ صديقي وليد يجلس معي
- reporting information gathered from peers about their families, using modelled language such as
وليد لا يحب الحساب ولا القراءة؛ فادية عندها أخ صغير في المدرسة؛ فاطمة تسكن في شقة؛ مازن يحب الديناصورات
- contributing aspects of personal information to a class digital photo story, for example, writing or reading aloud captions to own photos
هذه أنا عندما كان عمري أربع سنوات؛ كان شعري طويلاً؛ هذا مازن؛ كان يبكي في الصباح؛ صورة أميرة كانت على حقيبتي؛ هاني يحب الكرة؛ هذه أنا أكتب الحروف؛ هذا شادي يلون صورة؛ هذه عبير ترسم شجرة
- sharing information about self, home, family and favourite possessions, using simple sentence structures, familiar vocabulary, appropriate gestures and concrete materials such as toys, for example,
هذه لعبتي؛ اشتريت أمي لي هذه اللعبة في عيد ميلادي؛ اسمها "ميلاني"؛ أحب ميلاني كثيراً؛ تمام ميلاني معي في سريري
هذا الديناصور اسمه "ريكس"؛ أبي اشتراه لي في العطلة؛ ريكس صديقي؛ أَلْعَب معه في البيت

Creating

Elaborations

Listen to, view and read to simple imaginative texts, including digital and multimodal texts, and respond by making simple statements about favourite elements and through action, mime, dance, drawing and other forms of expression
[Key concepts: imagination, response, character; Key processes: participating, acting, listening, reading]

(ACLARC108)

- participating in shared reading of imaginative texts, responding to questions and giving opinions about characters and events, for example,
سامي ولد نشيط؛ الثب حيوان لطيف؛ الأسد مفترس؛ الأسد صديق الفأر؛ الفراشة كبرت وعندها أجنحة

- listening to, reading or viewing Arabic versions of stories they are familiar with in print, online or digital form, such as اليرقة الجاعة جداً , and re-creating them through mime, dance and drawing
- responding to imaginative Arabic texts such as stories, rhymes and songs through play-acting, illustrating and movement
- making simple statements in response to favourite characters in stories, rhymes, storyboards or songs, for example,

أفضل الدب لأنه لطيف؛ أفضل السمكة الذهبية الجميلة

Create own representations of people or events in imaginative texts using familiar words, illustrations, actions and other verbal and non-verbal forms of expression
[Key concepts: performance, expression; Key processes: experimenting, drawing, captioning, labelling]

(ACLARC109)

- creating own version of a story by sequencing a series of pictures with captions or by creating a storyboard with labels, using modelled language, for example
كان يا ما كان؛ في يوم من الأيام؛ كان في مرة

- performing songs, raps, rhymes and action stories using simple language and non-verbal forms of expression, such as clapping, gestures and facial expressions, to support meaning
- creating a puppet play or dramatic performance based on an experience or aspect of a story, song, poem or cartoon
- creating and presenting a class Big Book and texts in digital form based on imagined scenarios in familiar contexts, using modelled language, for example,
كان دب كبير إسمه راين؛ عاش راين في جبل ضخم؛ أكل راين؛ شاهد راين ثعلباً صغيراً

Translating

Translate familiar Arabic and English words, phrases and expressions, using visual cues and word lists, and explain the meaning of particular words and verbal and non-verbal expressions
[Key concepts: meaning, expression; Key processes: noticing, matching, translating]

(ACLARC110)

Elaborations

- using Arabic and English to name familiar objects and conduct simple conversations, translating when necessary to help others understand
- translating and interpreting particular words and expressions and simple texts such as songs for friends and family
- playing matching games with Arabic and English words from Big Books and picture books
- demonstrating and explaining hand gestures, intonation patterns and facial expressions that can be used without language to convey meaning, for example, nodding to indicate agreement

Create simple print or digital bilingual texts in Arabic and English, such as word lists, labels and captions, for their class, school and family
[Key concepts: representation, equivalence; Key processes: naming, labelling, displaying]

(ACLARC111)

- creating a bilingual picture dictionary for classroom use
- making bilingual greeting cards in print or digital form for family celebrations such as Mother's Day, using greetings and simple expressions in Arabic and English, for example,

ماما، حبيبتي ماما؛ مبروك ماما؛ عيد أم سعيد

- creating a bilingual personal profile containing information relating to self, family and friends
- labelling photos in both Arabic and English for a display of a class event or experience such as a sports day or school concert

Reflecting

Describe the experience of using Arabic at home and at school, such as how it feels and the particular behaviours they associate with speaking Arabic

[Key concepts: self, identity, belonging; Key processes: identifying, comparing]

(ACLARC112)

Elaborations

- identifying the significance of gestures in Arabic, and noticing own level of comfort with these, for example, making or not making eye contact when talking to older people
- discussing one another's ways of communicating and their appropriateness in Arabic-speaking contexts, such as different ways of showing politeness, for example, when making requests من فضلك or thanking someone شكراً، شكراً جزيلاً
- sharing with peers how it feels to use Arabic, for example, when singing a song in class, speaking Arabic with friends or family members, and using gestures, such as nodding the head slightly when saying نعم أو لا

Identify themselves as members of different groups, including the Arabic class, the school, and their family and community, describing their roles within these different groups

[Key concepts: membership, roles, belonging; Key processes: recognising, describing, connecting]

(ACLARC113)

- listing various groups they belong to, for example, family, school, class or clubs, and reflecting on themselves as a member of multiple groups and the roles they play in these groups
- identifying themselves as belonging to a particular cultural and/or language group, for example, أتكلم العربي؛ صف العربي؛ أهلي من لبنان؛ أنا من الأردن؛ أنا أسترالي لكن أهلي من سوريا

- creating own profile using drawings or providing captions for photos to express roles in or membership of various groups, including their identity as a person who knows more than one language
- eliciting and giving information that signals identity in different contexts, such as home, school and community, for example, compiling a personal profile consisting of their name, age, and dialect spoken at home, using simple words and modelled sentences

Understanding

Systems of language

Elaborations

Recognise the letters and sounds of the Arabic alphabet and identify how letters are modified so they can be joined to form words

[Key concepts: phonic awareness, script, directionality (writing right to left); Key processes: recognising, distinguishing, listening]

(ACLARU114)

- recognising and reproducing the 28 letters of the alphabet and the three short and long vowels
- recognising that Arabic words are written from right to left, numbers from left to right
- recognising and producing distinctive Arabic sounds such as guttural sounds ع، غ، ق and other sounds such as ص، ض، ط، ظ، ح، خ

- recognising that making Arabic words requires most letters to be joined, for example طار، طير، ذهب، أكل، شرب، ولد، أب، أم

- developing pronunciation, phrasing and intonation skills by singing, reciting and repeating frequently used words and phrases, noticing that statements and questions have different intonation, for example، أكلت الطعام كله؟
-

Recognise parts of speech and frequently used words in familiar contexts, and understand the basic rules of word order in simple sentences, such as the role of verbs in a sentence; the masculine and feminine forms of nouns, verbs and adjectives; and simple possessive forms

[Key concepts: word order, gender variation; Key processes: noticing, selecting]

(ACLARU115)

- identifying and using high-frequency words and expressions related to home and school environments in interactions, for example,
بيت؛ عائلة؛ أب؛ إبرة؛ معلمة؛ مدرسة؛ حصة؛ صف؛ كتاب؛ دراسة؛ فرصة؛ وقت فراغ؛ أيام الأسبوع
- recognising word order in simple phrases and sentences, for example,
الجملة الفعلية: نام سليم؛ قام الولد؛ أكل سامي التفاحة؛ شربت سحر الحليب
- identifying different parts of speech, for example,
الاسم؛ الفعل؛ الصفة؛ الحرف
- recognising that nouns have definite and indefinite articles and gender, for example,
تلميذ/التلميذة؛ معلمة العلوم؛ المعلمة
- using masculine and feminine forms of singular nouns and adjectives, for example,
الأب الحنون؛ الأم الجميلة؛ كرسي كبير؛ الطاولة الصغيرة؛ أمد شرس؛ قطعة أليفة
- using simple present tense verbs to describe aspects of own daily activities, for example,
استيقظ في الصباح؛ أتناول الفطور؛ أركب الباص؛ أدخل الصف؛ أكمل الواجب؛ ألبس ثيابي
- using simple verbs to express likes and dislikes, for example,
أحب طعام أمي؛ لا أحب الأكل السريع؛ أحب الرياضة ولا أحب الرسم
- understanding and responding to imperative verb forms in familiar instructions, for example,
افتح الباب؛ اجلس في مكانك؛ لا تتكلم دون إذن؛ نظف غرفتك؛ اكمل طعامك
- using singular possessive adjectives related to self, for example,
بيتي؛ سريري؛ معلمتي؛ غرفتك؛ كتابك؛ حقبتها؛ دفتره
- understanding that adjectives follow nouns and their gender, for example, كتاب كبير؛ طاولة كبيرة
- using singular personal pronouns, both masculine and feminine, with appropriate simple present tense verbs to describe aspects of home or school life, for example,
أمي تحب العمل؛ هي نشيطة؛ أبي يحب الطبخ؛ هو ماهر؛ صديقي سليم شاطر؛ هو ذكي؛ هي تكتب القصص
- developing knowledge of cardinal numbers
- beginning to use simple conjunctions to link words and expressions, such as أيضا؛ أو؛ وأ

Recognise that language is organised as text, and that texts such as songs, stories and labels have different features
[Key concepts: textual features, form; Key processes: recognising, identifying]

(ACLARU116)

- listening to, reading and viewing different types of simple texts in Arabic, such as stories, songs and captions, understanding that the Arabic script is written from right to left and that books and papers are written from back to front
- observing typical features of familiar Arabic texts, such as stories, nursery rhymes and signs, for example,
ليلي والذئب؛ الارنب والسلحفاة؛ الخنازير الثلاثة؛ كان يا ما كان
- comparing similar texts in Arabic and English and noticing how they are the same or different, for example, a counting song, street sign, labels at a supermarket, or a cover of a picture book

Language variation and change

Recognise that there are variations in the language used by Arabic speakers in different situations, such as at home with family, and that the language used varies between different Arabic speakers

[Key concept: variation based on gender, age and context; Key processes: noticing, comparing, understanding]

(ACLARU117)

Elaborations

- understanding that different forms of address and greetings are used depending on the time of day and the gender, background and social status of the participants, for example,
مرحبا ؛ صباح الخير / مساء الخير؛ سلام ونعمة؛ السلام عليكم ورحمة الله وبركاته؛ سلام الرب معك
ماما؛ بابا؛ عم أمين؛ خالتي سعاد
- recognising that informal forms of address are very common among speakers of Arabic and are acceptable across Arabic communities, for example
عمو عادل؛ عمة هناء؛ خالة عبيد؛ ست أمل؛ تيتا وداد؛ جدو
- explaining how their spoken language at home may vary from the spoken language in class, and understanding similarities and differences between various dialects represented within the classroom

Recognise that Australia has speakers of many different languages, including Arabic, and that languages borrow words from one another

[Key concepts: place, word-borrowing; Key processes: noticing, selecting]

(ACLARU118)

- understanding that the world contains many different languages and that many people around the world speak more than one language
- recognising that Arabic has borrowed many words from English, for example, كومبيوتر، تلفاز، and that English has borrowed words from Arabic, such as 'admiral', 'candy', 'coffee', 'cotton', 'genie', 'sugar' and 'sultan'
- exploring the range of languages spoken in Australia, including Aboriginal languages and Torres Strait Islander languages

Role of language and culture

Elaborations

Understand that the languages people use and the way they use them relate to who they are, where and how they live and what is important to them

[Key concepts: language, culture and identity; Key processes: noticing, understanding, making connections]

(ACLARU119)

- exploring the meaning of 'culture', and understanding that it involves visible elements, such as ways of eating and behaving, and invisible elements, such as how people live, what they value and how they think of themselves and others
- recognising similarities and differences between naming systems across languages represented in the classroom, and noticing that Arabic-speaking students may have names derived from other cultures and languages
- understanding that some Australian-English terms and expressions have no equivalent in Arabic, for example, 'billabong' or 'the bush', and that terms such as 'the movies', 'footy' and 'backyard' reflect aspects of culture in the Australian context

Foundation to Year 2 Achievement Standard

By the end of Year 2, students interact with the teacher and peers to exchange information about themselves, their family and friends, for example, *إسمي هاني؛ أنا ليلي؛ عمري ست سنوات؛ أمي سميرة؛ أبي خالد؛ عندي أخ وأخت؛ صديقي رامي؛ صديقتي رنا*, and initiate interactions by asking and responding to questions. They use repetitive language when participating in shared activities and transactions and responding to classroom instructions. When speaking, they use the sounds of the Arabic language, for example, *حروف مثل خ، ح، ط، ظ، ص، ض، ع، غ، ق*. They locate information about people, places and objects in simple texts, and share information in different formats, using illustrations and gestures to support meaning, for example, *ما اسمك أين تسكن؟ كيف حالك؟ هل عندك أصدقاء؟ كم أخت*. They make simple statements about favourite elements in response to imaginative experiences, and create own representations of imagined characters and events, using illustrations, familiar language and non-verbal forms of expression. Students identify specific parts of speech, such as nouns, verbs and adjectives, in spoken and written texts, and use familiar words and phrases, for example, *المدرسة؛ العائلة؛ الأم؛ الأب؛ الأصدقاء؛ الصف؛ المعلمة؛ البيت* and *أسكن مع عائلتي؛ أحب؛ أكل؛ أذهب؛ ألعب؛ أغني؛ صغير/كبير؛ طويل/قصير؛ جميل؛ نظيف؛ المدرسة؛ بيتي؛ أختي؛ صديقي يوم السبت؛ في الصباح؛ الأمس؛ كل يوم* and sentence patterns in simple texts, such as *أحب أن أكل... لا أحب أن...؛ أذهب إلى؛ أذهب مع؛*. They recognise questions and commands, for example, *ما اسمك؛ إذا تحب أن تلعب؟ من صديقك في المدرسة؟ هل بيتك كبير؟ ما هي لعبتك المفضلة؟ أجلس هنا من فضلك؛ تكلم الآن؛ إرفع يدك؛ تعال إلى هنا*, and use vocabulary and simple sentences to communicate information about themselves, their family and classroom, such as *ذهب* and *البيت؛ الغرفة؛ الحديقة؛ المدرسة؛ الصف؛ المعلمة؛ المدرس؛ المدير؛ الشارع؛ الباص؛ الملعب؛ الدكان هذا أبي؛ إسمه عادل؛ هذه معلمتي؛* applying basic rules of word order and gender. Students translate frequently used words and simple phrases using visual cues, and create word lists, labels and captions in both Arabic and English for their immediate environment, for example, *إسمها أنسة هالة؛ أحب صديقتي كثيراً؛ أنا في فريق كرة القدم؛*. They describe their roles as members of particular groups, and share their feelings and ways of behaving as they use Arabic at home and in the classroom, such as

Students identify letters of the Arabic alphabet and join some letters to form simple words. They identify features of familiar texts. They distinguish between the language spoken by different Arabic speakers in different situations, such as at home with family or at school with the teacher, for example, *من فضلك؛ هل يمكن أن...؛ هل أقدر أن...؛ لوسمحت*. Students name some of the many languages that are spoken in Australia, including Arabic, and provide examples of simple words in Arabic that have been borrowed from English and vice versa. They identify how the ways people use language reflect where and how they live and what is important to them.

Years 3 and 4

The nature of the learners

At this level, children are developing awareness of their social worlds and their membership of various groups, including the Arabic class. They are further developing literacy capabilities in both Arabic and English, as well as biliteracy capabilities. They benefit from multimodal, activity-based learning that builds on their interests and capabilities and makes connections with other areas of learning.

Arabic language learning and use

Learners interact with family and the wider Arabic-speaking community, and at school they interact with their peers and the teacher in a variety of communicative activities. Specific language learning skills such as memory and communication strategies are developed. Learners primarily engage in a variety of listening and viewing activities, and understand familiar stories, songs and poems. They use Arabic in everyday interactions, such as giving and following instructions *أرسم خطأ على الورقة؛ أكتب العنوان فوق*, attracting attention and seeking help *عندي فكرة رائعة!؛ ممكن أن أتكلم؟*. They participate in collaborative activities such as sharing information about their routines, friendships and leisure activities. They listen to, view and read a range of print, digital and spoken texts, such as interactive stories and performances, and use their imagination to create simple texts such as dialogues, stories and cartoons. They locate and classify key points of information in spoken, written and multimodal texts, and convey information about their family, home and neighbourhood in simple texts such as diary entries, emails and short stories.

Contexts of interaction

The contexts in which students interact in learning and using Arabic are primarily the classroom, school and home. They have access to the wider community of Arabic speakers and resources through out-of-classroom activities and the use of virtual and digital technology. They work both independently and cooperatively, further developing their sense of personal as well as group identity, and of the cultural significance of family relationships.

Texts and resources

Learners develop biliteracy skills through interacting with a range of spoken, written, visual and multimodal texts. Texts such as recipes, reports and family profiles show how language is used in different ways and for different purposes.

Features of Arabic language use

Learners explore Arabic sounds, intonation and writing conventions to further develop their speaking and writing skills and initial understanding of their developing biliteracy. They use key grammatical forms and structures, such as verbs, pronouns, singular/plural forms and prepositions, to provide information in simple sentences and short texts about places *جاء وليد من مصر*, people, actions, events and feelings, for example, *عندما كان عمره أربع سنوات*, *عندما أعزف الموسيقى أشعر بالفرح*. They begin to develop a metalanguage for understanding and discussing language features, and make connections and comparisons between Arabic and English. Comparing the structures and patterns of Arabic with those of English helps learners understand both languages, assisting in the development of their biliteracy skills.

Level of support

In the classroom, this stage of learning involves extensive support through scaffolding. Teachers model what is expected, introduce language concepts and resources needed to manage and complete tasks, and make time for experimentation, drafting and redrafting, providing support for self-monitoring and reflection. Support includes a range of spoken, written, visual and interactive resources, such as poems, songs, video clips and digital games.

The role of English

Learners use Arabic in classroom routines, social interactions, learning tasks, and language experimentation and practice. Arabic and English are used for discussion, explanation and reflection. Learners explore connections between culture and language use in various Arabic-speaking communities and the wider Australian context, and reflect on their own sense of identity and their experiences as Arabic background speakers when communicating and interacting with others.

Years 3 and 4 Content Descriptions

Communicating

Socialising

Socialise and build relationships with the teacher, family and friends through the exchange of personal information relating to home and school environment, such as everyday routines [Key concepts: friendship, experiences, routine, time; Key processes: describing, expressing, sharing]

(ACLARC120)

Elaborations

- asking and answering questions about information relating to self, peers, friends and family members, for example,
أين ولدت؟ ماذا تتكلم في البيت؟ ماذا يعمل أبوك؟ أين تذهب يوم السبت؟ من هي صديقتك؟ لماذا تحب جدتك؟ ماذا تفعل بعد المدرسة؟ أي رياضة تلعب؟
ولدت في العراق؛ أتكلم العربية في البيت؛ أحب الشوكولاتة كثيراً؛ أحب أبي وأمي جداً؛ أبي يعمل في المستشفى؛ أُمي طبيبة؛ أخي يدرس في المدرسة؛ أختي في الجامعة؛ يوم السبت أذهب إلى بيت جدي؛ يوم الأحد أذهب إلى المطعم.
- sharing information about daily routines and favourite activities at home and school, for example,
أستيقظ باكراً؛ أكل الفطور؛ ألبس ثيابي؛ أشاهد التلفاز؛ أكمل فروض المدرسة؛ أَلعب ألعاباً إلكترونية؛ أرتب سريرِي؛ أنظف غرفتي؛ أَلعب كرة القدم؛ أذهب إلى المسجد.
- using common expressions and appropriate body language when responding to frequently used comments and questions, for example,
يبدو أنك متعب؛ متى نمت البارحة؟ لماذا تأخرت هذا الصباح؟ كيف تأتي إلى المدرسة؟ هل عندك طعام للفرصة؟
- exchanging simple correspondence such as notes, invitations or birthday cards in print or digital form, for example,
هل تحب أن تأتي إلى حفلة عيد ميلادي؟ سمير؛ أنا أدعوك إلى بيتي يوم السبت؛
تعال نلعب معاً.
عيد ميلاد سعيد؛ كل عام وأنت بخير؛ أتمنى لك عيداً سعيداً.

Participate in collaborative tasks and shared experiences that involve planning and simple transactional exchanges, such as playing games, role-playing dialogues, and preparing and presenting group work

[Key concepts: participation, cooperation, collaboration; Key processes: sharing, negotiating]

(ACLARC121)

- asking and responding to questions in group activities such as number and memory games, for example, كم ورقة عندك؟ أي عدد اخترت؟ ما هي الأعداد التي تريدها؟ اخترت عدد ثمانية؛ عددي المفضل ستة؛ وصلت إلى الرقعة الثالثة؛ أنا في الخانة الأولى

- negotiating roles for shared tasks using simple expressions such as ماذا عن دور الأب؟ أنت لا تقدر ان تكتب كل القصة؛ أنا اكتب النصف وأنت تكتب النصف الآخر؛ أنا دوري المشتري وأنت دورك البائع؛ هل تحب أن تكون البائع؟

- participating in role-plays, such as buying goods from a shop, using props, for example, هل عندك حليب؟, to engage in conversation
- preparing, rehearsing and presenting a group activity for class or school about a familiar situation or event, using expressions such as اليوم سوف نقدم لكم عرضاً عن عيد الأم؛ شكراً لاستماعكم؛ أنا كامل وهذه لدينا وهذا محمود؛ نرجو أن تستمتعوا بالعرض

Participate in everyday classroom activities, such as giving and following instructions, attracting the teacher's attention and asking for repetition

[Key concepts: respect, politeness; Key processes: participating, requesting, responding]

(ACLARC122)

- giving and following classroom instructions, for example, أكتب التاريخ هنا؛ أرسم خطأ على الورقة؛ أكتب العنوان فوق؛ إغلق الباب؛ اجلس في مكانك؛ توقف عن الكلام؛ دورك؛ تكلم
- attracting attention and asking for help in classroom situations, for example, عندي فكرة رائعة؛! ممكن أن أتكلم؟
- requesting repetition, for example, ممكن أن تعيدي السؤال؟ لم أفهم السؤال؟ من فضلك، أعد السؤال. ما معنى...؟
- praising and encouraging peers, and using formulaic expressions and interjections, for example, ممتاز؛! جيد جداً؛ هذا عمل رائع!

Informing

Elaborations

Locate and classify information relating to familiar contexts, routines and interests from spoken, written and visual texts
[Key concepts: time (routines), leisure; Key processes: listening, reading, viewing, selecting, sequencing]

(ACLARC123)

- recording and classifying information obtained from others, such as favourite foods and places to visit, for example,

يحب سالم التبول؛ يحب عادل الدجاج؛ تفضلّ سعاد الخضار؛ يحب علي كرة القدم؛ يفضلّ ماجد السباحة؛ ويفضلّ رامي العزف على الجيتار؛ تحب البنات الموسيقى بينما الأولاد يحبون الرياضة

- listening to short spoken texts with new vocabulary and unfamiliar language, and identifying key information, for example, the name and number on a recorded phone message

مرحباً

إسمي سهام

أريد التكلّم مع سامر بخصوص الإمتحان

أرجو الإتصال بي على الرقم 0456566777

- comparing profiles and stories in print and digital form about different people and their daily routines, and creating a display with names and short descriptions, for example,

هذه فادية؛ عمرها سبع سنوات؛ تسكن مع والديها وعندها أربع أخوات. تحب فادية المدرسة كثيراً وأيضاً تحب اللعب على الكمبيوتر والرسم والسباحة. فادية صديقة وقيّة وحنونة.

- gathering information about other people's interests, for example, through conducting interviews or surveys about weekend activities, and selecting specific information to include in a short report
- locating and sequencing information to describe people and events, for example,

البنّت تدرس؛ يساعد الولد أمه؛ ينظف الأب الحديقة؛ تحضرّ أمي الفطور في الصباح؛ ينظف أبي السيارة في المساء

- obtaining and using information from print, digital and multimodal texts related to a range of learning areas, such as completing a simple science experiment, or naming countries, significant land features and historical places on a map, for example,

أهرامات مصر؛ معبد الأقصر؛ قلعة بعلبك؛ ملوية سامراء؛ مدينة نينوى الأثرية

Present information relating to home, school, neighbourhood and leisure in a range of spoken, written and digital modes
[Key concept: representation (private life); Key processes: organising, selecting, presenting]

(ACLARC124)

- reporting on information gathered from sources such as interviews, surveys and brochures, using drawings, posters and collages
- creating print or digital texts to introduce family members and friends and describe relationships and personal information relating to their background and experiences, using simple descriptive language and supporting resources, for example,

وليد عنده ثلاث أخوات وأخ واحد صغير؛ يسكن وليد في منطقة رايد في بيت كبير مع عائلته. جاء وليد من مصر عندما كان عمره أربع سنوات. يحب وليد بيته وعائلته كثيراً

- creating a class book or visual/digital display relating to a school event such as an excursion to the zoo or museum, for example,

رحلة إلى حديقة الحيوان؛ في حديقة الحيوان؛ شاهدنا الأسد وهو نائم؛ كان هناك دب كبير وقرودة بأحجام مختلفة

رحلة المدرسة إلى المتحف؛ ذهبنا إلى المتحف يوم الخميس؛ شاهدنا هناك آلات قديمة وصور أثرية للسكان في أستراليا؛ وشاهدنا صوراً لسفينة تاريخية

- presenting information both orally and in writing on pastimes and activities relating to self and peers, describing actions, responses and feelings, for example,

ألعب كرة القدم جيداً؛ أصبح بمهارة؛ اقرأ بطلاقة؛ سمير يلعب الألعاب الإلكترونية بمهارة

عندما أعزف الموسيقى أشعر بالفرح؛ بالحزن؛ بالملل؛ بالنشاط؛ بالسعادة؛ أحب الرسم لأنني أرسم أبطال الكارتون

Creating

Respond to imaginative texts, such as interactive stories and performances, identifying and describing characters, events, ideas and favourite elements

[Key concepts: character, people, places, experiences; Key processes: participating, responding, relating, reflecting]

(ACLARC125)

Elaborations

- listening to, reading and viewing a range of print, digital and oral texts through shared and guided participation, and responding to questions about characters, ideas and events
- comparing an Arabic fable such as سندباد البحري؛ علاء الدين with an Aboriginal or Torres Strait Islander story and highlighting the similarities and differences in characters, events and the moral of the story

- discussing imaginative texts, using short statements to describe aspects such as characters, settings or events, and illustrating and captioning aspects of texts
- role-playing events in imaginative texts, using movement and actions to reinforce meaning and experimenting with voice and gestures to animate characters

Create and perform short imaginative texts, such as dialogues or collaborative stories based on Arabic fables, using formulaic expressions and modelled language

[Key concepts: imagination, experience; Key processes: presenting, creating, performing]

(ACLARC126)

- creating simple imaginative texts such as comics, short stories or poems, using modelled language to express own ideas and imagined experiences
- collaborating with peers to create and present picture or digital books, short plays or animations based on favourite characters in Arabic fables, using familiar language and formulaic expressions such as

هذا علي بابا؛ علي بابا هو البطل في قصة علي بابا والأربعين حرامي؛ علي بابا شاب ... يحب علي بابا ...

- modifying texts such as songs, for example, by substituting words in a well-known Arabic song or rhyme
- creating and performing alternative versions or endings of familiar stories, using voice, rhythm and gestures to animate characters

Translating

Translate and interpret words, expressions and sentences in simple English and Arabic texts, noticing similarities and differences or non-equivalence

[Key concepts: meaning, translation; Key processes: moving between languages, comparing]

(ACLARC127)

Elaborations

- using a picture or digital dictionary to find the meanings of simple vocabulary used in class, and comparing English and Arabic versions
- comparing Arabic expressions used in everyday interactions such as greetings with equivalent English expressions, identifying differences and similarities and words and expressions that do not translate easily, for example,

مرحباً؛ صباح الخير/صباح النور؛ كيف حالك؟ الحمد لله؛ نشكر الرب

- translating short, simple texts from Arabic into English and vice versa, using cues to interpret meaning, such as layout, headings and familiar vocabulary
- identifying words that change meaning according to the context and Arabic-speaking region, for example, لين/حليب، ميسوط

Produce bilingual texts and resources, including digital and online resources such as digital picture dictionaries, posters and signs, for their class and school community

[Key concepts: similarity, difference; Key processes: selecting, describing]

(ACLARC128)

- producing a parallel bilingual word list or digital picture dictionary by identifying known Arabic words or expressions and relating them to English equivalents, and vice versa, recognising that direct translation is not always possible
- composing captions for images in Arabic and English to create simple bilingual storybooks in print or digital formats
- creating texts in print, digital or online formats, such as descriptions in both Arabic and English on familiar topics, selecting from word lists vocabulary that best conveys the intended meaning in both languages
- creating simple action songs and raps which include alternative repetitive phrases in Arabic and English, to perform for the school community

Reflecting

Elaborations

Reflect on their experiences as Arabic background speakers when interacting in English and Arabic, observing differences in language use and behaviours

[Key concepts: culture, language, behaviour; Key processes: examining, connecting]

(ACLARC129)

- comparing their interactions in Arabic and English, noticing different behaviours and language used, for example, adding the words خالة عمو before the names of older family members and other adults to show respect, compared with addressing friends in English by their first name
- describing elements of Arabic language that are different from English, including gestures such as patting the heart a few times to indicate 'That's enough, thank you...'
- developing metalanguage for describing experiences of intercultural exchange in different contexts, for example,

أتكلم العربي في البيت مع جدي وجدتي ولكن مع إخوتي أتكلم بالإنجليزي؛ أمي تتكلم معي بالعربي

وأنا أرد عليها بالإنجليزي؛ عربيتي ليست قوية؛ أحب التكلم بالإنجليزية أكثر لأنها أسهل

Explore their own sense of identity, including elements such as family, background and experiences, and ways of using language in Arabic- and English-speaking contexts

[Key concepts: communication, identity; Key processes: reflecting, adjusting]

(ACLARC130)

- discussing the groups they belong to, including their families and Arabic cultural and language groups, and reflecting on how membership of these groups affects their own sense of identity
- creating texts in print, digital, online or multimodal formats that express personal views on identity, including as a member of different cultural and/or language groups, for example, their name, in English and/or Arabic, their life experiences overseas and in Australia, and reflecting on how these may be understood from an Australian and Arabic perspective
- mapping personal profiles by creating a chart, timeline or web profile to highlight significant experiences or events, for example, marking an event when they identified as Lebanese, Egyptian, Iraqi or Arab, such as during religious ceremonies or special national events
- noticing how they communicate in both Arabic- and English-speaking contexts, identifying differences in behaviour and discussing reasons for these, for example, how they would address their teacher compared to a family member such as an uncle

Understanding

Systems of language

Elaborations

Recognise and reproduce Arabic pronunciation and intonation patterns using vocalisation and features of individual syllable blocks, and understand that in Arabic script, most letters change appearance depending on their position

[Key concepts: sound and writing systems, syllables; Key processes: noticing, describing, comparing]

(ACLARU131)

- discriminating between simple vowels, for example, تَ، ثَ، نَ، long vowels or the three vowel letters ا، و، ي، such as تَ، ثَ، نَ and consonant letters in a syllable block
- using basic punctuation in writing, including question marks (?), commas (,) and full stops (.) and semi-colons (;)
- recognising that letters change form depending on their place in the word, for example,

لَ: كَتَبَ؛ يَكْتُبُ؛ كَتَابَكَ؛ ع: عَيْنٌ؛ مَعْلَمٌ؛ م

- noticing that vocalisation such as َ، ُ، ِ may change the function of the word depending on where it is placed, for example, كُتِبَ؛ كُتِبَ؛ لَعِبَ؛ لَعِبَ
- experimenting with Arabic words and vowels to construct and deconstruct syllable blocks, for example, كَاتِبٌ؛ سَالٌ؛ ... لَمْ؛ قَادِي؛ كَرِيسِي؛ غَرِيفَةٌ؛
- using basic pronunciation and intonation rules when speaking and reading aloud
- deducing from familiar sounds and contexts how to spell new words, for example, predicting how to spell هَادِي؛ فَادِي having learnt how to spell شَادِي
- comparing different forms of writing for the letter أ، for example, أ؛ إ؛ آ

Understand and use key grammatical forms and structures, such as basic pronouns and possessive pronouns, singular/plural forms of regular nouns and adjectives, and prepositions

[Key concepts: number, syntax, verb forms; Key processes: sequencing, applying, relating]

(ACLARU132)

- using subject–verb–object word order in simple sentences relating to home and school environment, recognising the use of the definite article and its impact on the meaning of the sentence, for example,
أكمل وسام الدرس؛ أكمل وسام درساً؛ نظفت سماح الغرفة؛ نظفت سماح غرفة
- understanding and applying singular nouns and regular plural noun endings in masculine and feminine forms, for example,
معلم- معلمون؛ معلمة - معلمات
- using singular, second person and plural possessive pronouns to describe relationship or ownership, for example,
هذا دفترك يا سمير؛ لدينا هذه حقبتك؛ أمي أليس هذا مفتاح سيارتك؟ أبي أين نظارتك؟ كتبهم؛ لعبكم؛ غرفنا
- using a range of adjectives in singular and plural form to describe appearance, feelings and personalities, for example,
أختي طويلة وأخي قصير؛ عين أخي واسعة؛ أبي طويل القامة؛ أمي نحيفة الجسم؛ أنا سعيد جداً؛ أختي حزينة لأنها أضاعت كتابها المفضل؛ أمي مرحة جداً وأبي ودود وضحوك
- using past tense verbs to recount events related to home and school contexts, for example,
قدمت فرضي للمعلمة؛ تأخرت عن الدرس؛ نمت متأخراً؛ نسيت كتبي في البيت
- using imperative forms of simple verbs when giving others instructions, for example,
كل طعامك؛ نظف أسنانك؛ أكتب الجملة؛ أفتحي كتابك؛ إمسكي القلم؛ إسالي أمك
- expressing negation in simple sentences, for example,
لا أحب مادة العلوم
- using adverbs of place and time to expand on expressions, for example
استيقظت باكراً؛ وصلت إلى المدرسة متأخراً؛ شاهدت المباراة في الملعب؛ قرأت الكتاب في مكتبة المدرسة
- using a variety of prepositions to expand on spoken and written interactions, for example
في وقت الفراغ؛ في العطلة؛ ذهبت من البيت إلى المدرسة؛ أثناء الغداء إتصلت بأبي
- understanding and using simple question words in interactions, for example
متى أتيت إلى البيت؟ من أعد لك الغطور؟؛ ماذا احضرت للغداء؟ كيف أتيت إلى المدرسة؟

Understand that familiar spoken and written Arabic texts, such as conversations and stories, have particular features and structures relating to different purposes and audiences
[Key concepts: linguistic features, genre, structure; Key processes: observing patterns, distinguishing]

(ACLARU133)

- noticing differences between different types of texts in Arabic, for example, comparing a verbal recount of a well-known fable with the written text, or a text message with a phone call, an email with letter
- recognising how elements of texts in print, digital and online formats, such as title, layout, illustrations and size of script in a Big Book, combine to make meaning
- identifying and comparing the features of different types of texts, observing similar patterns and identifying differences, for example, the opening and signature in an email and a letter, a description in a story and a diary entry
- classifying a range of texts in print, digital and online formats, such as stories, digital greeting cards, recipes, advertisements (print and online versions) and posters, according to their purpose(s), for example, to entertain, to describe, to inform or to persuade, and recognising language features typically associated with particular texts, such as the use of imperatives in recipes and time markers in stories

Language variation and change

Understand that Arabic as a spoken language varies according to region and country and that meaning can be influenced by gestures, tone and purpose
[Key concepts: dialect, variation; Key processes: observing, explaining]

(ACLARU134)

Elaborations

- reflecting on how they communicate with their family and friends and with people less close to them, noticing differences in word choice, language use and communicative behaviour
- understanding that Arabic as a language has a standard form called اللغة العربية الفصحى, which is mainly used in writing, and a range of spoken dialects that differ greatly from region to region, for example, Lebanese, Egyptian, Sudanese and the Iraqi and Gulf regional dialects
- understanding how differences in gestures and tone are used to change the meaning of spoken text, and how the purpose of interaction, such as to instruct or invite, changes the emphasis on words and expressions being used

Recognise that languages change over time and influence one another

[Key concepts: language change, influence, exchange; Key processes: observing, identifying, discussing]

(ACLARU135)

- identifying how Arabic has influenced other languages, for example, Indonesian (Kitab = كتاب, Kursi = كرسي) and Spanish (aceite = زيت), and the number system in English
- understanding that Arabic, like all languages, is constantly expanding in response to intercultural experiences to include new words and expressions, for example,

دردشة على الإنترنت

- recognising that some Arabic words are derived from other languages, such as الفستق, which is borrowed from Greek to mean 'pistachio'; or قز, which is borrowed from Persian to mean 'raw silk'
- understanding that some languages are continuously evolving while others are endangered or being revived, for example, indigenous languages throughout the world, including Aboriginal languages and Torres Strait Islander languages in Australia

Role of language and culture

Compare and reflect on cultural practices relating to ways in which language is used in various Arabic-speaking communities and in the wider Australian context

[Key concepts: difference, expression, practices; Key processes: identifying, distinguishing, relating, comparing]

(ACLARU136)

Elaborations

- examining aspects of Arabic culture in familiar contexts, for example, identifying language use such as كل عام وأنتم and behaviours such as eating sweets at different celebrations and occasions
- reflecting on and explaining to others the significance of some common Arabic cultural practices and events, such as offering visitors food and drink, and serving sweets during special occasions, or coffee in times of mourning
- comparing the cultural importance of music and traditional dance in different Arabic-speaking communities as expressions of identity and emotions, for example,

الدبكة اللبنانية والجوية العراقية؛ والرقص الصعيدي الفلكلوري

Years 3 and 4 Achievement Standard

By the end of Year 4, students interact with the teacher and peers to share personal information about aspects of their lives, such as experiences, everyday routines and leisure activities, for example, عمري تسع سنوات؛ أنا مولود في أستراليا؛ أتيت إلى أستراليا وأنا صغير, في الصباح أستيقظ باكراً؛ أنا في الساعة...؛ بعد المدرسة... في المساء... أذهب مع عائلتي إلى المتحف؛ البحر؛ الحديقة العامة؛ السوق؛ أذهب إلى المدرسة؛ أحب كرة القدم؛ أريد المساعدة؛ أنا أذهب إلى الحمام؟؛ هل, من فضلك هل يمكن أن تعيد الكلمة؟ الجملة؟؛ أستطيع أن؛ من فضلك هل يمكن أن تعيد الكلمة؟ الجملة؟؛. They use formulaic expressions when interacting, such as giving and following instructions, asking for repetition, planning shared activities and completing simple transactions, for example, هل, and modelled language to create short imaginative texts. They use features of Arabic pronunciation and intonation when speaking and reading aloud. Students locate and classify information relating to familiar contexts and present it in modelled spoken, written and visual texts. They describe characters, events and ideas and express opinions about favourite elements in imaginative texts, and use formulaic expressions, for example, في يوم من الأيام؛ كان هناك, and modelled language to create short imaginative texts. They use vocabulary related to school, home and everyday routines, for example, الدراسة؛ التعليم؛ فروع؛ مواد المدرسة؛ غرفة النوم؛, and modelled language to create short imaginative texts. Students use key grammatical forms and structures in simple spoken and written texts, such as word order, singular and plural forms of regular nouns and adjectives, personal and possessive pronouns, for example, كتاب/كتب؛ غرفة/غرف؛ صف/صفوف؛ صديق/أصدقاء؛ أنت/أنتي؛ هو/هي/هم؛, and prepositions such as في البيت؛ إلى المدرسة؛ بين الملعب والساحة؛ أثناء الدرس؛ بعد العشاء؛ قبل النوم, and prepositions such as في البيت؛ إلى المدرسة؛ بين الملعب والساحة؛ أثناء الدرس؛ بعد العشاء؛ قبل النوم. Students translate familiar and frequently used language relating to familiar environments and create simple bilingual texts for the classroom and school community. They describe how language involves behaviours as well as words and share their own experience as background speakers as they interact with others.

Students identify and use Arabic sound and writing patterns, for example, including combining letters to form words, vocalisation, and features of individual syllable blocks such as, أ؛ ن؛ ع؛ و؛ والياء؛ الألف المقصورة, the تنوين: إشتري أبي بيتاً؛ رأيت كلباً؛ في بيتي غرف. أكل؛. They identify the features and structure of different types of texts, for example, العنوان؛ الحكمة؛ النهاية القافية؛ فعل الأمر؛ الجمل؛, and modelled language to create short imaginative texts. They use vocabulary related to school, home and everyday routines, for example, الدراسة؛ التعليم؛ فروع؛ مواد المدرسة؛ غرفة النوم؛, and modelled language to create short imaginative texts. Students use key grammatical forms and structures in simple spoken and written texts, such as word order, singular and plural forms of regular nouns and adjectives, personal and possessive pronouns, for example, كتاب/كتب؛ غرفة/غرف؛ صف/صفوف؛ صديق/أصدقاء؛ أنت/أنتي؛ هو/هي/هم؛, and prepositions such as في البيت؛ إلى المدرسة؛ بين الملعب والساحة؛ أثناء الدرس؛ بعد العشاء؛ قبل النوم, and prepositions such as في البيت؛ إلى المدرسة؛ بين الملعب والساحة؛ أثناء الدرس؛ بعد العشاء؛ قبل النوم. Students translate familiar and frequently used language relating to familiar environments and create simple bilingual texts for the classroom and school community. They describe how language involves behaviours as well as words and share their own experience as background speakers as they interact with others.

Years 5 and 6

The nature of the learners

At this level, learners have established communication and literacy skills in Arabic that enable them to explore aspects of Arabic language and culture as well as topical issues drawn from other key learning areas. They are widening their social networks, experiences and communication repertoires in both Arabic and English and developing some biliteracy capabilities. They participate in collaborative tasks that both recycle and extend language. They are gaining greater independence and becoming more conscious of their peers and social context, and increasingly aware of the world around them.

Arabic language learning and use

Purposeful language use in authentic contexts and shared activities in the classroom develop language skills and enhance communication and understanding. Learning how Arabic is structured reinforces learners' oracy and literacy. Learners develop their speaking skills by interacting with teachers, peers, family and local Arabic speakers to share their own and enquire about others' experiences *أقرأ قصة قبل النوم؛ وأنت هل تقرأين قبل النوم؟*, social activities and opinions. They have access to a broader range of vocabulary, and use a growing range of strategies such as effective listening skills to support communication. They write more accurately and fluently for a range of purposes, contexts and audiences. They listen to, view and read Arabic folk tales, fables and films to engage with themes, characters and events, exploring embedded cultural beliefs, values and practices, and use their imagination to create and perform songs, poems, short plays and video clips. They obtain information from a range of sources about social, cultural and communicative aspects of lifestyles in Arabic-speaking communities, and present the information in different formats for particular audiences. Individual and group presentation and performance skills are developed through modelling, rehearsing and resourcing the content of presentations.

Contexts of interaction

Learners use Arabic in the classroom and in their extended social space, such as family, neighbourhood and the community, for a growing range of purposes, for example, exchanging information, expressing ideas and feelings, and responding to experiences. They are able to work more independently, but also enjoy working collaboratively in pairs and in groups. They explore cultural aspects of communication, and use information and communications technologies (ICT) to support and enhance their learning.

Texts and resources

Learners interact with an increasing range of informative, persuasive and imaginative texts about neighbourhoods, places, and Arabic-speaking communities and individuals. They refer to and use more established grammatical and lexical resources to understand and communicate in Arabic. The use of dictionaries is encouraged for accuracy and expansion of language acquisition.

Features of Arabic language use

Learners' pronunciation, intonation and phrasing are more confident, and they apply appropriate writing conventions, including spelling and punctuation, in a range of print, digital and multimodal texts. They use grammatical structures, such as verb conjugation, suffixes, linguistic elements such as conjunctions and a range of adjectives and adverbs to describe actions and events according to time and place *هو كتب؛ هي ركضت*, share information about life at home and school *أمي تطبخ طعاماً لذيذاً؛ أبي يغسل*, elaborate on ideas and information and express opinions relating to their personal and social worlds. They understand how language use varies when interacting with different people and for different purposes. They explore cross-linguistic and intercultural influences of other languages on Arabic, such as Aramaic, Syriac and Assyrian, and regional languages such as Persian, Kurdish and Turkish.

Level of support

While learners work both independently and collaboratively at this level, ongoing support and feedback are incorporated into task activities such as the production of written texts. Support includes the provision of models, scaffolds, stimulus materials, and resources such as word charts, vocabulary lists and dictionaries.

The role of English

Classroom interactions are increasingly bilingual. Arabic is used primarily for communication, while English and Arabic are used for discussion of linguistic features and cultural practices, and for reflective tasks and explanations. Learners are given opportunities to think about personal and community identity. They explore the relationship between language and culture, and ask questions about cultural values and practices and how these relate to their own sense of identity as Arabic background speakers when interacting in different Arabic- and English-speaking contexts.

Years 5 and 6 Content Descriptions

Communicating

Socialising

Socialise and maintain relationships with peers and the teacher by sharing information about their personal experiences and social activities

[Key concepts: relationships, experiences; Key processes: describing, listening, comparing, explaining]

(ACLARC137)

Elaborations

- exchanging information about everyday experiences, for example,
ماذا تفعل بعد المدرسة؟ متى تأكل طعام العشاء؟ أين تلعب الرياضة؟
بعد المدرسة ألعب كرة القدم؛ في الساعة الثامنة أذهب إلى النوم؛ وأنت متى تنام؟
أقرأ قصة قبل النوم؛ وأنت هل تقرأين قبل النوم؟
- describing friends and family members, including physical appearance and personal characteristics/qualities, for example,
أمي امرأة طويلة ورشيقة؛ تحافظ على صحتها؛ أبي شخص منظم في عمله ومسؤول في بيته؛ صديقي سامي مهندس ولكنه لا يهتم بدراسته ولا بصحته؛ أصدقائي جميعهم لطفاء ولكنهم لا يأخذون المدرسة بجدية
- sharing feelings about weekend activities, using different modes of communication such as text messages, email or social media, and giving reasons for choices made, for example,
يوم السبت ألعب التنس مع أبي؛ في العطلة الأسبوعية أذهب مع عائلتي إلى المطعم؛ أحضر حصة للموسيقى يوم الجمعة؛ أشعر بالسعادة في حصة الموسيقى؛ أحب العزف على البيانو كثيراً؛ أتعلم اللغة العربية يوم السبت صباحاً؛ اخترت الرياضة لأنها مفيدة للجسم؛ الموسيقى تساعدني على التفكير
- recounting experiences with family and friends in a variety of ways, for example, in conversations, diaries or digital presentation
ذهبت البارحة مع عائلتي إلى المتحف؛ شاهدت مع أخي фильماً جديداً في السينما؛ كانت لعبة الركبي ممتعة؛ كانت رحلة المدرسة إلى حديقة الحيوان ممتعة

Collaborate in group tasks and organise shared experiences that involve making suggestions and decisions and engaging in transactions

[Key concepts: organisation, transaction; Key processes: negotiating, explaining, advising, making choices]

(ACLARC138)

- making collaborative decisions and arrangements using expressions for counting, ordering and organising ideas, for example,
أولاً؛ نختار أفراد الفريق؛ ثانياً نوزع الأدوار؛ ثالثاً؛ نعرض الأفكار؛ أخيراً نعمل على دورنا

في البداية سوف أجمع الصور؛ بعد ذلك سوف نبحث في الإنترنت عن المعلومات وفي النهاية سنجمع كل شيء سوياً

- engaging in transactions by asking for and providing information, such as giving prices and asking for goods and services, for example,
ما سعر...؟ بكم هذه اللعبة؟ ما سعر كيلو البرتقال؟ بكم كيس الخبز؟ ربطة الخبز بدولار ونصف؟ سعر كيلو التفاح ثلاثة دولارات

أحتاج مساعدة من فضلك؛ هل تقدر أن تساعدني؟ أنا أبحث عن خونة لقيادة الدراجة؛ أين أجدها؟ هل عندكم الفيلم الكرتوني الجديد؟

- making suggestions and choices in the allocation of roles and explaining the reasons for such choices, for example,
أنا أحب أن أكون الطبيب؛ لماذا لا تكون أنت المعلم؟ لماذا لا تأخذ دور النادل في المطعم؟ دوري طبيب لأنني أحب أن أكون طبيباً في المستقبل؛ خذي دور الأم لأن دورها قصير
- creating displays, presentations or performances for family, friends or the school community to showcase their progress in learning Arabic

Interact in classroom activities, such as creating and following shared rules and procedures, expressing opinions, and asking for and providing clarification

[Key concepts: attitude, values, roles, responsibility; Key processes: expressing, sharing, requesting, clarifying, planning]

(ACLARC139)

- contributing to classroom activities by providing suggestions, such as for developing rules for a bilingual classroom, for example,
إستمع للمعلمة؛ إحترم الجميع؛ إنتظر دورك؛ لا تأخذ شيئاً ليس لك؛ إذهب إلى الحمام في الفرصة؛ أكمل كل دروسك في الصف؛ لا تصرخ
كن مؤدباً؛ لطيفاً؛ هادئاً؛ عادلاً؛ ودوداً؛ كوني هادئة؛ لطيفة؛ صادقة

- expressing opinions about procedures and experiences, for example,
هذا الواجب صعب؛ الإمتحان طويل؛ ما عندي وقت؛ المعلمة لم تصحح إمتحان الإملاء بعد
- asking for and providing clarification, for example,
أين أضع الصور؟ أين أكتب الجملة التالية؟ ماذا تقصد؟ أقصد: ضع الصورة تحت الكتابة؛ أكتب الجملة بجانب الصورة
- giving advice and sharing ideas with peers about biliteracy development and learning strategies, for example,
الأفضل أن نكتب حجم العنوان؛ هذه الكتابة أفضل من الأخرى؛ أقترح أن نستعمل الألوان في الرسم

Informing	Elaborations
<p>Listen to, view and read a range of texts to locate, classify and organise information relating to social and cultural worlds [Key concepts: time, place, media, culture; Key processes: listening, viewing, reading, selecting, organising]</p> <p>(ACLARC140)</p> 	<ul style="list-style-type: none"> identifying and classifying information in texts such as advertisements, conversations, brochures and announcements, and sharing the information with others in a different format, for example, presenting a chart of favourite television programs or computer games البرنامج التلفزيوني المفضل هو ...؛ أفضل برنامج ...؛ أحب برنامج ...؛ لعبتي الإلكترونية المفضلة هي ...؛ أفضل الألعاب الإلكترونية الحاسوبية reading texts and extracting key points relating to a range of topics, for example, social activities for young people in the local community, and discussing information with peers, using expressions such as الطقس هذه الأيام بارد جداً؛ الصيف هذا العام سيكون حاراً؛ قلة الأمطار هذه السنة الشباب يحبون رياضة كمال الأجسام ويذهبون إلى النوادي الرياضية؛ تحب البنات رقص الزومبا؛ هل تحبين الرقص أيضاً؟ reading, viewing and listening to a variety of texts to collect and organise information about an Arabic cultural event or celebration, such as الأعياد الوطنية أو الدينية, in a digital display for the class or school community identifying and comparing perspectives on cultural aspects of lifestyles in different Arabic-speaking communities as represented in spoken and written texts, for example, الجريدة المحلية كتبت أن الأغاني الجديدة مملّة؛ ولكن الجميع يحبها

Convey ideas and information on topics of interest and aspects of culture in different formats for particular audiences
[Key concepts: audience, context, lifestyle; Key processes: using, transposing, summarising]

(ACLARC141)

- presenting information or ideas in multimodal texts for a particular audience, such as a virtual tour of the school or neighbourhood for a sister school in an Arabic-speaking community overseas
- creating a performance or interactive display to inform younger children about the benefits of maintaining Arabic language
- conveying information relating to significant people, places or events in Arabic-speaking communities through different text types, such as a poster for a concert, a profile of a famous Arabic-speaking actor or a digital guide to a place of interest
- preparing and giving simple oral or visual presentations on aspects of their personal world, such as a timeline of growth and change, or family celebrations of birthdays and other special occasions, for example,

ولدت في العراق وأنيت إلى أستراليا وعمرى خمس سنوات؛ أنا مولود في أستراليا وعيد ميلادي في شهر مارس؛ ولدت في شهر أيلول؛ أحتفل بعيد ميلادي في ديسمبر؛ عيد زواج أبي وأمي في شهر آب

- presenting key ideas relating to aspects of lifestyle in the local community, using graphic organisers to convey information in particular ways, for example, to show priorities (list/table), compare statistics or ideas (Venn diagram), or highlight frequency (graphs)

الرياضة ضرورية للصحة؛ المأكولات السريعة وأضرارها؛ الألعاب الإلكترونية وعدم الإختلاط بالعائلة؛ السمنة والكسل

Creating

Elaborations

Share responses to a range of imaginative texts, including multimodal and digital texts, such as cartoons, folk tales, fables and films, by expressing opinions on key ideas, characters and actions, and making connections with own experiences and feelings

[Key concepts: connection, feelings; Key processes: interpreting, expressing, explaining, comparing]

(ACLARC142)

- listening to and viewing imaginative texts in print, digital and multimodal formats, such as cartoons, folk tales and fables, and sharing opinions or feelings about ideas, events and experiences, using expressions such as
سندباد رجل شجاع؛ علي بابا حرامي ظريف؛ لا أحب قصة علاء الدين والمصباح السحري؛ القصة مملة وغير معقولة؛ القصة فيها خرافات كثيرة؛ قصة المصباح السحري مثيرة لكنها غير واقعية

- responding to questions about characters in different types of imaginative texts, such as films or cartoons, by listing words or expressions associated with the character's personality and explaining how they can or cannot relate to them, for example,
شخصية الولد في الفيلم مثل شخصيتي؛ هو يحب اللعب وأنا كذلك؛ لقد سافر وهو صغير وأنا أيضاً أتيت إلى أستراليا وأنا صغير؛ البنات في الكارتون تحب الثياب الملونة مثلي ولكنها مشاغبة وأنا هادئة وأسمع كلام أُمي

- comparing favourite characters or events in imaginative texts such as cartoons, stories or digital games, using expressions such as
اللاعب الأول أقوى من اللاعب الثاني؛ هذه اللعبة أصعب من اللعبة الأخرى؛ أفضل شخصية في القصة هي صديقة عيبر لأنها أكثر واحدة تحب سناء وتساعدنا؛ أحب شخصية عدي هي سمير لأنه مضحك

- discussing key messages and cultural elements in imaginative texts, such as the moral of a story/fable, an idea or value in a song, or the qualities or behaviour of a character

Create and perform imaginative texts in print, digital or online formats, such as songs, stories, video clips or short plays, based on a stimulus, concept or theme

[Key concepts: imagination, creativity, expression; Key processes: composing, performing, imagining]

(ACLARC143)

- creating own imaginative texts based on characters, settings and events in familiar stories for own and others' enjoyment and interest
- creating individual or collaborative poetry, such as an acrostic poem or rap, experimenting with rhyme and rhythm
- creating, performing and filming own imaginative texts in print, digital or online formats, such as a commercial for a new product, a short video clip of a role-play, or an announcement about an event
- creating and performing alternative versions of known songs or short plays by creating new lyrics or dialogue and experimenting with voices and actions to convey different moods and feelings

Translating

Elaborations

Translate and interpret texts from Arabic into English and vice versa for peers, family and community, and identify words and expressions that may not readily correspond across the two languages

[Key concepts: correspondence, interpretation, audience; Key processes: translating, comparing, explaining]

(ACLARC144)

- identifying words and expressions in Arabic and English that cannot be readily translated, clarifying meanings and explanations, for example, *فزت فوزاً ساحقاً لعبت لعباً جميلاً، كالقمر*؛
- interpreting Arabic expressions in familiar texts such as greeting cards, menus and stories, and considering how these expressions reflect aspects of Arabic language and culture
- translating texts such as public signs, advertisements and food packaging from Arabic into English and vice versa, for example, 'no parking', 'no dogs', 'no-smoking zone', *الوقوف ممنوع؛ الكلاب ممنوعة؛ التدخين ممنوع*, to identify differences in elements of language structure and vocabulary use
- creating Arabic versions of school signs, notices and class rules, considering why some words and expressions require flexibility in translation, for example, 'the oval', 'the office', 'the canteen', 'out of bounds', 'no hat, no play'
الملعب؛ مكتب الإدارة؛ المقصف/دكان المدرسة؛ ممنوع اللعب في هذه المنطقة؛ اللعب غير مسموح بدون قبعة

Produce bilingual texts and resources such as displays, instructions and newsletters for own learning and for the school community, identifying cultural terms in either language to assist meaning

[Key concepts: bilingualism, linguistic landscape; Key processes: translating, modifying]

(ACLARC145)

- designing bilingual texts such as a poster for a class or school assembly performance, or a newsletter about a sports carnival or school event
- using bilingual dictionaries and electronic translating tools to create bilingual texts such as captions, menus and timetables, comparing own version with peers' and identifying differences in translation
- creating parallel lists of informal Arabic and English expressions for own use in everyday interactions with friends and family
- creating bilingual texts, such as songs, a board game, a web page for recipes or an instruction manual for a game, identifying and labelling culture-specific terms to support understanding

Reflecting

Elaborations

Reflect on their experiences of interacting in Arabic- and English-speaking contexts, discussing adjustments made when moving between languages

[Key concepts: biculturalism, meaning, context, belonging; Key processes: comparing, explaining]

(ACLARC146)

- explaining changes they make when moving between English- and Arabic-speaking contexts, for example, adjusting the way they communicate to adults and authority figures in Arabic by using *لو سمحت؛ من فضلك؛ أرجوك*, or how they use different introductions depending on the audience, such as using *بالإذن يا أبي؛ هذا سليم صديقي من المدرسة* to introduce friends to their parents and *عادل؛ تعال؛ هذا ماهر* to introduce friends to each other
- identifying changes they make when interacting in an Australian-English context, for example, using different forms of address, or different ways of showing politeness, and discussing why these adjustments are appropriate
- reflecting on instances when moving between Arabic- and English-speaking contexts has felt comfortable, awkward or difficult and explaining why this might be the case, for example, translating to parents what the teacher is saying, helping an elderly person who cannot speak English find the bus stop
- discussing the ways in which they communicate with Arabic speakers, for example, making appropriate eye contact, allowing for personal space, and respecting elderly people, parents and teachers, and making comparisons with the ways in which they communicate with English speakers

Reflect on how own biography, including family origins, traditions and beliefs, impacts on identity and communication

[Key concepts: self, complexity, belief systems; Key processes: finding connections, reflecting, discussing]

(ACLARC147)

- discussing how their Arabic cultural heritage influences who they are, how they think about things and how they interact and behave in different contexts
- identifying aspects of personal identity such as age, gender and social status that are important when interacting in Arabic-speaking contexts and may be understood differently in Australian cultural contexts
- identifying key influences on their sense of identity, such as their family origins, traditions, beliefs and significant events, for example, *مكان الولادة؛ التربية العائلية؛ عدد أفراد العائلة؛ العادات والتقاليد التي تربي عليها؛ خبرات الطفولة في المدرسة والبيت؛ تأثير الأصدقاء؛ المفاهيم الاجتماعية السائدة؛ المفردات التي تستخدم في البيت؛ في الشارع وفي المدرسة*
- exploring how they communicate with one another, their teachers and families, noticing if there are any changes in the way they see themselves in different contexts, for example, a family celebration, a school concert, or the birthday party of a non-Arabic-speaking friend

Understanding

Systems of language

Elaborations

Understand patterns of intonation and pronunciation, including the way vowels soften and extend sounds, and apply appropriate conventions to their writing

[Key concepts: sound systems, application, writing systems;

Key processes: analysing, applying]

(ACLARU148)

- understanding that vowel marks influence the way words are pronounced, for example,
أكلت التفاحة؟ أكلت التفاحة؛ المدرسة واسعة/في المدرسة
- discriminating between the use of alif, waaw and yih as either consonants or long vowels in words, for example,
سال الدم من يد سعاد/سال الولد المعطمة
- applying pronunciation rules when speaking and reading aloud, for example,
؛ المدة والشدة؛ والتنوين؛ والياء المقصورة والتاء المربوطة والطويلة م/ع/ل/مة؛ ت/ل/ميذ...
- recognising the different ways of pronouncing the long vowel ا, for example, ندى؛ لدا؛ لدى؛ متى؛ فتى, and writing the long vowel ء, for example, شيء؛ قراءة؛ مسؤول
- applying phonic knowledge to spell unfamiliar words, for example,
جنت؛ أكل؛ شيء
- applying accurate spelling in familiar words, phrases, sentences and texts

Develop and apply understanding of verb conjugation, suffixes, basic conjunctions and a range of adjectives and adverbs to construct simple sentences

[Key concepts: grammar, syntax, vocabulary knowledge; Key processes: applying, explaining, understanding]

(ACLARU149)

- applying rules of past tense verb conjugation to describe past actions and events, for example,
أنا أكلت؛ أنت شربت؛ أنت ذهبت؛ هو كتب؛ هي ركضت؛ هم تأخروا
- producing complex sentences using present tense verb conjugation, for example,
أمي تطبخ طعاماً لذيذاً؛ أبي يغسل السيارة كل أسبوع؛ أساعد في تنظيف البيت دائماً؛ المعلمون يتكلمون كثيراً
- expressing negation in complex sentences, for example
لا أريد أن ألعب هذه اللعبة؛ ليس عندي طعام مفضل؛ لم؛ لن
- using the imperative form of verbs to address different people and groups, orally, such as in speeches and presentations, or in writing, such as in a group email, for example,
تعالوا جميعاً نشارك في يوم تنظيف أستراليا؛ هيا شاركو معنا؛ قولوا للجميع؛ لا تتأخروا
understanding gender and number agreement
between nouns and adjectives, for example
رخيص؛ ثلاثة كتب رخيصة؛ عشرة كتب غالية؛ طاولة واحدة ثقيلة؛ أربع
طاولات قديمة؛ تسع طاولات كبيرة
using irregular adjectives to describe number, shape and colour, for example
فزت في المرتبة الأولى؛ أتيث الثاني في الإمتحان؛ حقيبتني حمراء؛ قميص
أحمر؛ قلم أخضر؛ ممحاة خضراء؛ شكل مدور؛ مثلث؛ مربع؛
describing a relationship using a possessive pronoun for singular and plural third person, for example
سليم يحب أبي كثيراً؛ هناء تستمع إلى أمها دائماً
- using conjunctions (بينما) to make comparisons between people or actions, for example, كامل صديق ودود بينما مازن شخص غيور؛ أمل تلعب التنس بينما علياء تسبح بمهارة
and to link ideas and sentences, for example, لكن؛ كذلك
- using adverbial phrases to expand on ideas and elaborate on information related to feelings, attitudes and abilities, for example
أمي تتكلم بثقة كبيرة؛ المعلم يشرح الدرس بطريقة مفهومة؛ أخي يتكلم في الخطب بجرأة كبيرة
- understanding and applying rhetorical questioning techniques in oral and written interactions to provoke thought and response, for example, أليس كذلك؟؛ من منا لا يحب اللعب على الكمبيوتر؟
- building compound sentences to express opinions, preferences or reasons, for example
الكاتب المفضل عندي هو... لأن قصصه مشوقة وفيها كثير من المفاجآت؛ قصص
مسلية وتحتوي على الخيال

Explore the structure and language features of spoken and written Arabic texts, such as news reports and conversations, recognising that language choices and the form of Arabic used depend on purpose, context and audience

[Key concepts: structure, coherence, textual features; Key processes: connecting, applying]

(ACLARU150)

- identifying the purpose, context and audience of a range of familiar texts, for example, fairy tales, songs, poems, short plays and video clips
- listening to, reading and viewing different types of texts with a common topic and comparing features, for example, examining a print report, a television report and an internet announcement about an accident and discussing how the different features of each text combine to make similar meaning
- discussing key features, audience and purpose of different types of texts, for example, a shopping list serves as a reminder to self of items to be purchased, whereas a permission note seeks permission from another person to do or have something
- making connections between the degree of formality of a situation and the form of Arabic used, such as the use of colloquial Arabic in informal spoken texts and of Modern Standard Arabic in formal spoken situations and in written texts
- analysing how different types of texts create specific effects by using particular aspects of language, for example, superlative adjectives and imperative verb forms in advertisements designed to persuade customers

Language variation and change

Elaborations

Explore how language use differs between spoken and written Arabic texts, and depends on the relationship between participants and on the context of the situation

[Key concepts: language, variation, context, relationship; Key processes: observing, explaining]

(ACLARU151)

- understanding the importance of using appropriate forms of address when interacting with different people, for example, the use of *سيد ماجد؛ أستاذ هاني؛ سيدة عبير؛ خالتي رانيا؛* with adults, both close relatives and strangers
- recognising how language use reflects the mood, feelings, attitudes or relationships of the people involved, for example, *إنها أُمِّي تتصل على المحمول مرة ثانية! سعاد، ماذا تريد الآن؟*
- experimenting with different vocabulary and language structures in Modern Standard Arabic, and making comparisons with Arabic dialects spoken by themselves and peers, discussing similarities and differences
- comparing spoken and written texts, for example, a spoken and a print advertisement, or a spoken conversation and an email, and explaining how mode relates to linguistic structures and features and how this affects meaning
- recognising differences in language use between class presentations and everyday conversations
- explaining why different forms of Arabic are used depending on the context of communication, such as the use of Modern Standard Arabic when communicating with people with different dialects or with the teacher in the classroom, compared with the use of colloquial Arabic at home

Explore the origins of Arabic and how it has been influenced by and influences other languages
[Key concepts: language, change, borrowing; Key processes: reflecting, selecting, connecting]

(ACLARU152)

- recognising that the Arabic alphabet has similarities with the Aramaic alphabet system (alpha being the first letter, and beta the second), and that the Arabic ordering system أ ب ج د is based on the Aramaic alphabet
- understanding that many words in Arabic are borrowed from indigenous languages of the Arabic-speaking world, such as Assyrian, Aramaic and Syriac, Phoenician and Berber, for example, رأس؛ دم؛ أخ؛ أخت؛ شمس؛ لسان؛ أنا؛ أنت؛ بوظة؛ دولاب؛ دولمة؛ بسطرمة؛ and regional languages such as Persian, Turkish and Kurdish, for example, بيت؛ سمع؛ كتاب؛ نحن؛ كلب؛ بابل؛ بحرین؛ سوريا؛ بيت لحم؛ موصل؛ لبنان؛ أور؛ بيروت؛
- exploring the meaning of famous names of people and places and reflecting on their origin and on naming systems, such as
- investigating the influence of Arabic on other languages such as Berber, Kurdish, Amharic, Tigrinya, Persian, Pashto, Urdu, Punjabi, Portuguese, Sindhi, Tagalog, Turkish, Spanish, Hindi, Swahili, Somali, Malay and Indonesian, for example, the Arabic word for 'book' كتاب is used in most of the languages listed
- identifying languages that were derived from Arabic, for example, Maltese and Nubi

Role of language and culture

Explore how language use reflects particular value systems, attitudes and patterns of behaviour by comparing ways of communicating across cultures
[Key concepts: values, attitudes, behaviour; Key processes: exploring, describing, comparing]

(ACLARU153)

Elaborations

- describing own and others' ways of communicating, and identifying aspects that reflect traditions, values and practices in Arabic-speaking communities
- exploring words or expressions commonly used in informal interactions in the Australian context, and interpreting or explaining them for young Arabic speakers, for example, 'mate' or 'fair dinkum'
- noticing similarities and differences between own ways of communicating and interactions between young Arabic and English speakers in different contexts and situations, for example, expressions of politeness or turn-taking in conversations, and reflecting on the influence of culture on language use

Years 5 and 6 Achievement Standard

By the end of Year 6, students use spoken and written Arabic to exchange personal information and describe people, places and ideas related to their personal experiences and social activities such as celebrations for example, أذهب مع عائلتي لزيارة جدي وجدتي, and other interests such as أشاهد sport (for example, أألعب رياضة المفضلة مع أصدقائي بعد المدرسة في الحديقة العامة, في الأعياد؛ في العطلة الأسبوعية أفلام الكارتون مع عائلتي في السينما؛ أألعب ألعاب إلكترونية). They make shared decisions, for example, ...أريد أن, provide suggestions such as ... يمكن أن, and complete transactions. When participating in classroom routines and activities, they follow shared rules and procedures, express opinions and ask for clarification, for example, ... ما معنى, Students use patterns of Arabic pronunciation and intonation when interacting. They locate, classify and organise information from a range of spoken, written and visual texts related to aspects of culture and lifestyle. They present ideas and information on topics of interest and aspects of culture in different formats for particular audiences. They respond to a range of imaginative texts by expressing opinions on key elements for example, ...من القصة نتعلم أن, characters for example, ...أحب الملك في الفيلم لأنه, and actions for example, ...أنا أيضا يجب أن..., and making connections with own experience, for example, ...أنا مثل. They create and perform short imaginative texts based on a stimulus, concept or theme. They use a variety of tenses for example, ...أذهب/ يذهب/ تذهب, suffixes for example, ...أكلت/أكل/أكلت, basic conjunctions for example, ...أو, and a range of adjectives for example, ...الصفة للمذكر والصفة للمؤنث للأشياء والأشخاص, and adverbs for example, ...سريعا؛ ليلا؛ صباحا؛ يوميا, to construct sentences and to produce short texts. Students translate texts from Arabic into English and vice versa, identifying words that are not easily translated, such as ...أيفون؛ تلفاز؛ كومبيوتر, and create bilingual texts for their own learning and for the school community. They identify ways in which their own biography for example, ...السيرة الذاتية؛ الخبرات, traditions for example, ...العادات العائلية والإجتماعية, and beliefs for example, ...المعتقدات الخاصة, impact on their identity and influence the ways in which they communicate in Arabic and English.

Students identify the role of vowels in softening and extending sounds and apply writing conventions to own constructions. They distinguish between the structure and features of different types of spoken and written Arabic texts and identify ways in which audience, context and purpose influence language choices and the form of Arabic used. They provide examples of how language use and ways of communicating vary according to the relationship between participants and the purpose of the exchange, for example, ...أنواع الجمل: الإسمية والفعلية؛ الترداد في بعض العبارات؛ طول الجمل والفواصل الشفهية فيها. They identify how languages influence one another, including the influence of indigenous languages of the Arabic-speaking world and regional languages such as Aramaic, Syriac, Phoenician, Persian, Kurdish and Turkish on Arabic, for example ...الأبجدية؛ المفردات المستعارة؛ أصل الكلمات. They give examples of how language use reflects particular value systems, attitudes and patterns of behaviour across cultures.

Years 7 and 8

The nature of the learners

These years represent a transition to secondary school. Students in this sequence are continuing to study Arabic, bringing with them an established capability to interact in different situations, to engage with a variety of texts and to communicate about their immediate world and that of Arabic-speaking countries and communities overseas.

Arabic language learning and use

The focus of learning shifts from the world of learners' own experience and imagination to the wider world. Learners make cross-curricular connections and explore intercultural perspectives and experiences relating to teenage life and interests. They engage in a range of interactions with others, expressing their feelings *أتمنى أن نسافر إلى كوينزلاند في عطلة المدرسة*, exchanging and clarifying their views *تأخرت في الصباح لأنني إستيقضت متأخراً*, describing and explaining their actions and responses *ما رأيك، سامي أعطنا رأيك*, and negotiating and making arrangements *أن ساعدتني في البحث؛ سنحصل على درجة عالية*. They increasingly access information from local sources and the internet to explore perspectives and views on topics of interest to teenagers, such as leisure, entertainment and special occasions. Learners use different processing strategies and their knowledge of language, increasingly drawing on their understanding of text types, when conveying information in a range of texts. They produce personal, informative and persuasive texts, such as blogs, diary entries, emails, reports, articles and speeches, about their own social and cultural experiences at home, at school, and in Arabic-speaking communities in the Australian context. They examine a range of imaginative texts, such as Arabic legends, to analyse and give their opinions on themes, characters, events, messages and ideas *الفيلم غير واقعي*, and discuss and compare how elements of Arabic culture are represented. They use their imagination to create and perform songs, short plays and stories to entertain different audiences. They use vocabulary and grammar with increasing accuracy, drafting and editing to improve structure and clarify expression and meaning.

Contexts of interaction

Learners work both collaboratively and independently, exploring different modes and genres of communication with particular reference to their current social, cultural and communicative interests. They pool language knowledge and resources to plan, problem-solve, monitor and reflect. They use Arabic to interact with teachers, peers and local Arabic speakers, participating in authentic situations at home, at school and within the local community. The context of interactions extends beyond the home and classroom and involves participation in community events or celebrations. Additional opportunities for interaction are provided by purposeful and integrated use of information and communications technologies (ICT), for example, videoconferencing and e-learning.

Texts and resources

Learners read, view and interact with a broad range of texts and resources specifically designed for learning Arabic in school contexts, such as textbooks, readers, videos and online materials, including those developed for computer-supported collaborative learning. They also access authentic materials created for Arabic-speaking communities, such as films, literature, websites and magazines. They use a range of dictionaries and translation methods to support comprehension.

Features of Arabic language use

Learners use appropriate pronunciation, intonation, rhythm patterns and writing conventions to convey specific meaning in a range of texts. By building their vocabulary knowledge, learners are able to develop and express more complex concepts in Arabic. They use a range of grammatical forms and structures to convey relationships between people, places, events and ideas. They employ a variety of sentence structures, including grammatical elements such as adjective–noun agreement, dual forms of nouns and verbs, and irregular plural, imperative and auxiliary verbs to describe and compare people, actions and events, elaborate on ideas and opinions and enrich their understanding and use of language. They make connections between texts and cultural contexts, identifying how cultural values and perspectives are embedded in language, and how Arabic speakers use particular language and gestures to convey their feelings about and attitudes towards other people and ideas.

Level of support

The class will likely comprise background learners with a range of prior experience in studying Arabic. Learners are supported through multilevel and differentiated tasks. Consolidation of prior learning is balanced with the provision of new, engaging and challenging experiences. As they develop increasing autonomy as language learners and users, learners are supported to self-monitor and reflect on language use in response to their experiences in diverse contexts.

The role of English

The classroom is increasingly characterised by bilinguality, with Arabic being the principal language of communication. English may be used separately or in conjunction with Arabic to express ideas, personal views and experiences relating to communicating in Arabic and English in different contexts of interaction. Learners continue to develop a metalanguage for thinking and communicating about language, culture and their sense of identity from a bilingual perspective, and about the importance of maintaining their Arabic cultural heritage.

Years 7 and 8 Content Descriptions

Communicating	
Socialising	Elaborations

Initiate and sustain interactions with others by expressing and exchanging opinions on topics of interest, and maintain relationships through apologising, inviting or praising
[Key concepts: experiences, attitudes, etiquette, respect; Key processes: speaking, writing, expressing, inviting, accepting and declining, explaining]

(ACLARC154)

- initiating conversations, including face-to-face and virtual conversations, by asking peers about personal interests, for example,

هل تحب المأكولات العربية؟ ما هو طعامك المفضل؟ أنا أيضاً أحب الوجبات السريعة ؛ هل تريد أن تأتي معي إلى مطعم الوجبات السريعة بعد المدرسة؟

أمي طبخة ماهرة؛ تعال إلى بيتنا يوم السبت؛ هل تحب الذهاب معنا إلى المنتزه/ الحديقة؟

أنا أسف؛ أمي لا تسمح لي. أعذرني ليس عندي وقت؛ سوف أسأل أبي. نعم؛ طبعاً؛ سوف أتصل بأبي أولاً.

ممتاز! هذا رائع!

- developing and sustaining conversations with peers, including online or virtual conversations, on topics of interest, such as sport, games and music, for example,

هل شاهدت أمس مباراة كرة القدم؟ برأيك من سيفوز بالكأس؟ من هو لاعبك المفضل؟ هل نزلت اللعبة الإلكترونية الجديدة إلى الأسواق؟ إنها لعبة مسلية.

هل تحبين الأغنية الجديدة؟

- exchanging information and opinions on a range of topics such as home, school, leisure and travelling, for example,

هل تحب المنطقة التي تسكن فيها؟ لماذا؟ منطقتي جميلة وشارع بيتي هادئ؛ أبي يريد أن يشتري بيتاً جديداً وأنا لا أريد أن أترك بيتنا؛ أنا أحب بيتنا كثيراً؛ أريد

ركوب الدراجة ولكن ليس عندي خوذة. ما رأيك بلعبة كرة القدم؟ أنا أحب القراءة كثيراً؛ وأنت؟

- expressing hopes and feelings, and describing personal plans for school holidays and the weekend, for example,

في عطلة نهاية الأسبوع أحب أن أذهب إلى البحر لأن الطقس سيكون حاراً؛

أتمنى أن نسافر إلى كوينزلاند في العطلة المدرسية. أنا سعيد لأننا سوف نسافر

في العطلة؛ في العطلة المدرسية سوف ألعب التنس كل يوم؛ يوم السبت القادم

سأذهب إلى السينما مع إخوتي؛ يوم الأحد القادم سأذهب إلى السوق مع أمي

لأشتري حذاءً جديداً للرياضة

- using communication strategies such as apologising, inviting and praising when interacting in social situations, for example,

عفواً؛ تفضل؛ أنت بنت ذكية

Take action in collaborative tasks, activities and experiences that involve negotiation, making arrangements, problem-solving and shared transactions

[Key concepts: negotiation, expressing preference, collaboration; Key processes: planning, discussing, agreeing/disagreeing, making decisions]

(ACLARC155)

- expressing preferences for plans, comparing and contrasting alternatives, and negotiating solutions, for example,

أفضل من ...؛ الأفضل...؛ الأحسن...

أفضل ان نشترى هذه اللعبة لأنها حديثة؛ لا أتفق معكم على الذهاب إلى السينما في المساء؛ ماذا لو نذهب في عطلة المدرسة؟ في المساء تكون السينما مزدحمة أما أثناء النهار فتكون هادئة. سأتصل بك في عطلة نهاية الأسبوع لأنّ ذلك أفضل من أيام الأسبوع

- collaborating with others in online or real settings to plan events, such as arranging a day out or a birthday party, and making shared decisions, such as negotiating how much to spend on presents, or a budget for a day out, for example,

هل تحب أن نذهب إلى البولنغ يوم السبت؟ أبي سوف يأخذني إلى هناك الساعة العاشرة صباحاً؛ هناك نلتقي؛ نلتقي بعد المدرسة؛ حفل عيد ميلاد قيس يوم الأحد. سأتي لأخذك معي إلى بيته. الحفلة ستبدأ الساعة السادسة

- responding to invitations in print, digital or online formats by accepting or declining and providing reasons for non-attendance, for example,

شكراً جزيلاً على الدعوة؛ سأحضر الحفلة؛ آسف لا أقدر أن آتي إلى السينما لأن أُمي لا تسمح لي. أنا مدعوة لحفل زواج ابن عمتي ولا أستطيع أن آتي معكم إلى البولنغ.

- asking for others' opinions on group weekend plans, and resolving disagreements by providing alternative suggestions, for example,

يا سمير؛ هل قررت أن تأتي معنا إلى السينما يوم السبت؟ لا تقلق كل شيء سوف يكون على ما يرام؛ الغالبية منا تفضل الذهاب إلى البولنغ؛ لذا من العدل أن تقبل يا هادي قرار الأغلبية؛ ماذا لو شاهدنا عرضاً مسرحياً؟ ربما عرضاً غنائياً؟ يا سلمى أنا أعرف أنك تحبين الموسيقى؛ لذلك تعالي نحجز تذكرة عرض "الأميرة النائمة" الموسيقي. ما رأيك؟

Engage in classroom interactions and exchanges, clarifying meaning, and describing and explaining actions and responses

[Key concepts: opinion, perspective, mindful learning, exchange; Key processes: describing, explaining, clarifying, expressing]

(ACLARC156)

- exchanging ideas and suggestions with peers, for example,
ماذا تقترح يا سامي؟ أعطنا رأيك؛ كيف يمكن أن ننظم الأدوار بيننا؟ ما رأيكم؟
- clarifying meaning of common expressions by giving examples, such as
أعني أن كل واحد منا يكتب صفحة؛ أقصد أنا وهناء نبحث عن الصور؛ وعادل ووفاء وسمر يكتبون المقاطع؛ مثلاً؛ مثل؛ على سبيل المثال
- contributing to class discussions by expressing opinions, using reflective language, for example,
لو كان لدينا وقتاً أطول؛ لأضفنا موسيقى على البحث؛ كان الإمتحان صعباً وطويلاً؛ أصبحت القراءة في الصف مملة
- describing actions and responses and giving reasons, for example,
وضعتُ الصورة هنا لأنها صغيرة ومناسبة؛ فاتني القطار لأنني استيقظت متأخراً؛ أنا متعب اليوم لأنني نمت الساعة العاشرة ليلاً. إن ساعدتني في البحث؛ سنحصل على درجة عالية

Informing

Locate, interpret and compare information and ideas from a variety of texts relating to topics of interest such as leisure, entertainment and special occasions

[Key concepts: representation, community; Key processes: identifying, classifying, comparing, summarising, relating, understanding]

(ACLARC157)

Elaborations

- identifying context, purpose and audience in a range of texts in print, online or digital formats, such as articles, reports and documentaries
- gathering information independently and collaboratively about events or people and comparing how various sources, such as magazines, newspapers and websites, use language to convey meaning
- listening to, viewing and reading texts to extract elements that reflect different aspects of Arabic culture related to topics such as entertainment and special occasions, for example,
حفلات المطربين؛ البرامج الترفيهية؛ برامج المسابقات
الأعياد الدينية المختلفة وطرق الإحتفال بها؛ عيد الأم؛ عيد الأب؛ أعياد الميلاد الخاصة؛ مناسبات الخطوبة والزواج
الأفلام العربية الحديثة؛ البرامج النقدية الساخرة؛ البرامج الحوارية؛ البرامج الوثائقية

Present information to describe, compare and report on ideas and experiences in print, digital and multimodal formats selected to suit audience and purpose

[Key concepts: representation, experience, audience; Key processes: describing, summarising, comparing, reporting]

(ACLARC158)

- conveying information in texts such as notices and newspaper announcements to inform others about an issue of interest or an upcoming event, for example, إعلان هام؛ تحتفل الجالية العربية بعيد الأم في إحتفال كبير في الحديقة العامة يوم السبت القادم؛ الدكتورة ريم ستلقي محاضرة عن الشباب والمستقبل في الجامعة

- presenting views on topics related to personal experiences in texts such as blogs, emails and speeches, for particular purposes and audiences
- organising information and presenting it to an Arabic-speaking audience, for example, creating a visual presentation comparing cultural aspects of life at school and at home for young Arabic speakers or a video recording of a cooking demonstration for their classmates
- reporting on own and others' experiences, such as holiday trips or a school camp, in a text such as a digital presentation, and comparing own experiences with others', using expressions such as

بالنسبة لي، الرحلة كانت ممتعة بينما غالبية تلاميذ الصف شعروا بالملل؛ بالرغم من الساعات الطويلة التي قضيناها في الطريق؛ إلا أنني لم أشعر بالتعب لكن أصدقائي كانوا متعبين جداً

Creating

Compare ways in which people, places and experiences are represented in different imaginative texts, analysing ideas, themes and messages and contrasting them with own experiences

[Key concepts: representation, morality, context; Key processes: analysing, comparing, contextualising, explaining]

(ACLARC159)

Elaborations

- expressing personal opinions on ideas presented in various texts such as stories, films, songs or video clips, for example, الفيلم يشجع الشباب على الدراسة وهذا ممتاز؛ المقطع الغنائي جميل ومؤثر؛ الفيلم غير واقعي؛ يعرض الفيلم مشاكل الشباب مع الأهل؛ الأغنية جميلة فهي تعبر عن الصداقة
- stating and explaining personal preferences about characters, themes, ideas and events in texts, using expressions such as أفضل شخصية في الفيلم هي سميرة لأنها تعرف ما تريد؛ عادل شخصيته مؤثرة لأنها تمثل شخصية معظم الشباب العربي وتعرض مشاكلهم؛ أحداث القصة متسلسلة ومنطقية؛ الأب في المسلسل ليس مثاليًا أبداً؛ الأم أيضا دورها تقليدي
- analysing how people, places and experiences are represented in a variety of imaginative texts, such as extracts from a play or scenes from a film, and comparing how key messages and beliefs are communicated
- expressing and exchanging opinions on typical features, language use and cultural elements in contemporary songs, films or video clips from the Arabic-speaking world, and comparing them with similar texts from the English-speaking world

Create and present imaginative texts, including multimodal and digital texts, such as songs, poems, plays, stories or video clips, involving fictional characters, events and contexts, to entertain different audiences

[Key concepts: imagination, emotion, context, audience; Key processes: composing, performing, building context and character, entertaining]

(ACLARC160)

- creating cartoons, plays or short stories to share in class about an imagined experience in their own life or a dream for the future
- illustrating own imaginative stories in print, visual or digital formats, such as captioned photo stories
- composing and performing imaginative texts for the school community, through role-plays, raps and video clips, using expressive language and movement to illustrate meaning and to entertain
- creating modified versions of traditional Arabic stories and films, such as علاء الدين والمصباح السحري, by introducing new characters or contexts or alternative endings

Translating

Translate and interpret texts from Arabic into English and vice versa, compare own translations with others', discuss differences and possible reasons and alternatives, and make language choices that best convey equivalent meaning

[Key concepts: meaning, equivalence, choice; Key processes: interpreting, comparing, refining]

(ACLARC161)

Elaborations

- translating and interpreting texts from Arabic into English and vice versa, using print and online dictionaries, and translation tools or programs, and experimenting with interpreting unknown words or expressions, reflecting on challenges associated with transferring meaning from one language to another
- comparing own and others' translations of the same text, commenting on differences and similarities between versions and considering possible reasons for these
- translating and interpreting texts, using print and online dictionaries, and translation tools or programs, identifying culturally specific vocabulary, for example, عفواً سلامتك, ألف مبروك الحمد لله على السلامة, and expressions, such as نشكر الرب, and discussing the translation process relating to choice of words that best reflect the meaning, equivalence and contextual appropriateness
- paraphrasing English words or expressions that have no specific equivalent in Arabic, such as 'mufti day' or 'fundraiser', and annotating them in order to convey their intended meaning

Create bilingual texts on particular themes or events in different modes, including multimodal and digital modes, such as menus, brochures, cartoons or video clips, explaining culture-specific words and expressions, for example, by using captions and descriptions

[Key concepts: language, culture, meaning; Key processes: selecting, relating interculturally, designing]

(ACLARC162)

- creating bilingual subtitles, captions or commentaries for texts, such as brochures in print and digital formats, digital presentations or digital video clips, that inform the school community about aspects of culture in the Arabic-speaking world
- producing bilingual texts in both Arabic and English about community events, such as promoting a concert or an interview with a celebrity on a community radio station, in print or multimedia formats, for example, posters or advertisements
- designing menus or programs for Arabic-themed events, with key items and information in Arabic and explanatory notes in English
- creating a short film about social interactions among different speakers of Arabic, explaining cultural elements that may vary in different parts of the Arabic-speaking world and which may be unfamiliar to English-speaking viewers

Reflecting	Elaborations
<p>Reflect on cultural differences between Arabic and English communicative styles, and discuss how and why they modify language for different cultural perspectives</p> <p>[Key concepts: communication, cultural perspectives; Key processes: reflecting, discussing, connecting]</p> <p>(ACLARC163)</p> 	<ul style="list-style-type: none"> discussing cultural cues in communication that suggest differences in traditions, ideas or values, for example, التحية المتكررة مثلاً: كيف حالك وكيف العائلة؟ ؛ التعابير الدينية مثل: إن شاء الله؛ إن شاء الرب وعشنا reflecting on the influence of Arabic culture on their own communication style, for example, using gestures, words or expressions with particular cultural significance in Arabic, such as kissing your own right hand, then raising your eyes and your right hand to express thanks, and discussing whether they modify their communication style when interacting in English comparing choices of language and behaviours when communicating in Arabic and English, explaining the modifications they make and why, for example, when addressing older people with titles such as عم (عمو)؛ خالة؛ (طنت) considering own and others' responses and reactions in Arabic–English intercultural exchanges and discussing reasons for different interpretations of meaning, for example, an Arabic-speaking man stroking his moustache in connection with an oath or promise indicates sincerity, while raising the right hand when swearing an oath is used in the Australian context
<p>Reflect on how and why being a speaker of Arabic contributes to their sense of identity and is an important part of their Arabic cultural heritage</p> <p>[Key concepts: cultural heritage, identity; Key processes: reflecting, explaining]</p> <p>(ACLARC164)</p> 	<ul style="list-style-type: none"> discussing how being bilingual allows them to present 'self' to others in particular ways, for example, as 'Arabic' or 'Lebanese'/'Egyptian'/'Iraqi', and recognising that identity includes culture as well as language reflecting on the role of language in expressing identity, considering when, with whom and why different languages are used, and reflecting on whether their own identity changes when they use different languages expressing to others how Arabic is part of their identity, reflecting on when, how and why they use Arabic sharing views of what their Arabic culture 'is', discussing what elements of culture they accept or reject, and exploring how culture relates to language, identity and experience, using statements such as 'My culture is ...', 'Culture can ...'
Understanding	
Systems of language	Elaborations

Understand and apply rules of intonation and pronunciation in spoken texts, and apply writing conventions with increased accuracy in written texts

[Key concepts: writing conventions, pronunciation, sounds;

Key processes: selecting, speaking, writing]

(ACLARU165)

- understanding that Arabic sentences can be separated by commas and that a paragraph may only have one full stop at the end
 - understanding that the marks used in the Arabic script such as التنوين، الشدة، المدة influence pronunciation and meaning in words and sentences, for example، أمل /أمال، دعوة/دعوى
 - using the rhythms of the Arabic language, including intonation, tone and stress, to increase fluency and enhance expression
 - applying spacing rules between words and using their knowledge of writing conventions to expand on ideas when writing short texts
 - making choices in relation to the use of punctuation such as (؛) and adjusting the flow of ideas by enhancing text cohesion and expression
-

Understand and use grammatical forms and structures, such as adjective–noun agreement, adverbial phrases (time, place and manner), and irregular plural, imperative and auxiliary verbs, to expand on spoken and written ideas

[Key concepts: grammar, accuracy; Key processes: elaborating, speaking, writing]

(ACLARU166)

- using سوف in addition to the present tense to express future plans, for example,
سوف أدخل إلى الجامعة بعد الثانوية العامة؛ سوف أشتري سيارة بعد الإمتحانات
- understanding and describing current, recurring and future actions, using auxiliary verbs, for example,
ما زال أبي يعمل في المطار؛ ما زالت أختي تدرس الطب
- using the conditional mood as a formulaic expression, for example,
لو نجحت في الأمتحان هذا العام فسوف يشتري لي أبي لعبة إلكترونية جديدة
- understanding and using the conjunction (بينما) to compare people or actions, and enhance expression, for example,
رياضة السباحة ممتعة ومفيدة خاصة هنا في أستراليا؛ بينما لعبة كرة القدم شعبية أكثر
- referring to a date of an event, such as a birthdate, and noticing that names of months vary in different regions of the Arabic-speaking world, for example,
الخامس من إبريل 1999؛ العاشر من نيسان ٢٠٠١
- using ordinal numbers to sequence ideas in oral interactions and written texts, for example,
أولاً؛ ثانياً؛ ثالثاً؛ أخيراً
- using interrogative words and expressions, such as هل، لم، to ask questions and make requests, for example,
لم تأخرت اليوم وأنت عندك إمتحان؟ هل فهمت ما قلت لك؟ رجاءً؛ أحضر البحث غداً لأنك لم تقدمه أمس؛ من فضلك هل تستطيع أن تقول لي كيف أذهب إلى البنك؟
- expanding their knowledge of noun–adjective agreement through understanding and applying the irregular plural form, for example,
بيت/بيوت كبيرة كرسى/كراسي جديدة؛ كتاب/كتب قيمة؛ يوم/أيام جميلة؛ تلميذ/تلاميذ مجتهدون؛ معلمون ملتزمون
- using specific structures relating to expressions of praise, encouragement and persuasion, for example,
ممتاز! أحسنت! عمل رائع؛ هيا واصل عملك أنت شخص ذكي؛ أكمل الصورة وقدمها للعرض؛ لا تتكاسل واصل الركض؛ إعرض كتاباتك على الصحيفة المحلية؛ أنت كاتب بارع
- using expressions such as الأكبر من؛ الأكبر to indicate preference and compare, for example,
هذا اللاعب أكبر من اللاعب القديم؛ إن مدرستنا فيها أدوات حديثة أكثر من المدارس الأخرى؛ بيتنا هو الأجد في المنطقة؛ سيارة أبي أقدم سيارة رأيتها في حياتي
- expressing opinions and feelings using expressions such as

أشعر بالسعادة عندما أسافر إلى المناطق الريفية في أستراليا؛ أعتقد أن أستراليا أجمل دولة في العالم

- using conjunctions such as **بِالرَّغْمِ مِنْ** to show differences and contrasts in ideas, for example,
بِالرَّغْمِ مِنْ أَنَّ الشَّمْسَ ساطعة إلا أَنَّ الطقس بارد؛ بالرَّغْمِ مِنْ نجاحي في الإمتحان لم يشتر لي أبي اللعبة الإلكترونية

Expand understanding of how the structure and language features of personal, informative and imaginative Arabic texts suit diverse audiences, contexts and purposes
[Key concept: textual conventions; Key processes: comparing, examining]

(ACLARU167)

- applying knowledge of texts and their purpose, and predicting the meaning of unfamiliar words and phrases
- analysing the language features and text structure of different samples of a particular type of text, including digital and online texts, such as a diary entry or a blog, to identify how ideas, representations and reflections are presented
- comparing the use of language features such as imagery and exaggeration in a range of imaginative texts, and discussing how these features are used to convey meaning to and entertain the audience
- examining how the structures and features of a variety of informative texts, including online and digital texts, such as reports and articles, reflect the intended purpose and how the choice of vocabulary reflects ideas and perspectives
- explaining linguistic choices made to vary texts according to their intended audience and degree of formality, for example, changing from Modern Standard Arabic to colloquial Arabic to indicate changes in relationship between participants or degree of (in)formality

Language variation and change

Elaborations

Explain how elements of communication and choice of language and register vary according to the cultural context and situation

[Key concepts: body language, expression, negotiation, choice; Key processes: reflecting, selecting, connecting]

(ACLARU168)

- understanding how particular gestures and body language used by various Arabic speakers, such as eye contact and the use of personal space, reflect feelings and attitudes towards other people and towards ideas
- recognising that different situations require different levels of politeness depending on the context and speaker, for example, a gift from parents to a teacher may be seen as a polite gesture in some Arabic cultures but as inappropriate in the Australian school context, while declaring an opposing opinion on a current issue may be acceptable in the Australian context but viewed as being disrespectful in some Arabic cultures
- identifying and reflecting on how emotions and attitudes, such as respect or embarrassment, and personal views are reflected in the choice of language in various social settings, such as public forums and school contexts
- identifying and comparing the features of language that distinguish the purpose for which it is used, for example
فعل الأمر مع واو الجماعة في الخطبة: هيا شاركوا في المهرجان العربي الحافل؛ استخدام "يا ليت؛ يا ليتني" في التعقيب على الأحداث في مدونة شخصية
- comparing informal classroom discussions of a current event or issue with news and current-affairs programs, and analysing differences

Explore and reflect on the impact of social, cultural and intercultural changes such as globalisation and new technologies on the use of Arabic in different contexts

[Key concepts: globalisation, technology, dynamic systems; Key processes: researching, explaining, reflecting]

(ACLARU169)

- investigating and describing the influence of globalisation and new technologies such as the internet on Arabic as a dynamic language
- exploring the power and function of Arabic regional dialects in digital and social media
- researching and reporting on the influence of Arabic language and culture in the local and broader Australian community, for example, the food industry (Lebanese restaurants and bakeries), the entertainment industry and the media (the Arab Film Festival, SBS Arabic radio and television, Arabic films) and education (Arabic bilingual schools)
- reflecting on changes in their own use of the Arabic language, identifying new terms and behaviours that they have adopted into their everyday language in response to changes in technology and social media

Role of language and culture

Elaborations

Understand and reflect on language choices made in everyday communication in order to express ideas and perspectives that relate to cultural elements

[Key concepts: cultural expression, representation; Key processes: analysing, selecting, reflecting]

(ACLARU170)

- identifying and discussing how values or attitudes are differently reflected in Arabic and English, for example, attitudes to being on time reflected in language such as لا تستعجل؛ لن تهرب الحفلة؛ لا تهتم يوجد وقت كثير and social interactions such as expressing thanks or appreciation more or less directly, or attitudes to making an apology
- considering how differences between ways of using language reflect cultural influences, for example, العبارات التي نقال في المناسبات: ألف مبروك؛ عتي للمنة عام؛ بالأفراح والمسرات؛ زواج مبارك
- examining how and why language and cultural practices are interconnected, for example, by identifying religious origins or connotations associated with places such as كربلاء؛ مكة الكرمة؛ أورشلیم المقدسة؛ دير الزور

Years 7 and 8 Achievement Standard

By the end of Year 8, students use written and spoken Arabic to initiate and sustain classroom interactions with others, to exchange views, for example, السباحة رياضة ممتعة؛ أعتقد أن السفر مفيد جدا , and express feelings such as أشعر بالفرح؛ بالسعادة عندما أَلعب رياضت , the trqim/walf and the iml and the qawad al ttrif; fawasl and nqf f nhayat al jml . They use language conventions, such as vocabulary and sentence structures to apologise (for example, أنا آسف؛ أعتذر عن , invite (for example, أرجو أن , and offer praise, for example, ... رأيت أن ... أعتقد أن . They clarify meaning, explain actions and responses, and complete transactions by negotiating, making arrangements and solving problems, for example, ماذا لو أكملنا البحث مع؟؛ هل تريد أن أساعدك؟ , سوف . They apply pronunciation and rhythm patterns in spoken Arabic to a range of sentence types. They locate, interpret and compare information and ideas on topics of interest from a range of written, spoken and multimodal texts, and convey information and ideas in a range of formats selected to suit audience and purpose. They express opinions on the ways in which characters and events are represented in imaginative texts, and explain ideas, themes and messages, for example, ... في القصة؛ هيام أذكى من عير ؛ في النص الأول... بينما في النص الثاني . Students create texts with imagined places, events, people and experiences in a range of forms to entertain different audiences. They use grammatical forms and features such as adjective–noun agreement for example, الشاب الوسيم/الشابة الجميلة , adverbial phrases to indicate time, place and manner for example, في منتصف الطريق , and irregular, plural, imperative and auxiliary verbs for example, to elaborate their oral and written communication. They translate texts from Arabic into English and vice versa, and compare own translations with others', explaining differences and possible reasons and alternatives. They make language choices that best reflect meaning to create bilingual texts, identifying and using words and expressions that carry specific cultural meaning. Students explain how and why they adjust their language use according to different cultural contexts, and how being a speaker of Arabic contributes to their own sense of identity.

Students apply their knowledge of writing conventions, such as punctuation, to convey specific meaning in a range of texts, for example, الفواصل وعلامات الإستفهام والاستنكار والتعجب والجمل المبينة . They analyse the structure and linguistic features of a range of personal, informative and imaginative texts and explain how these features are influenced by the context, audience and purpose. Students explain how and why changes to social settings affect verbal and non-verbal forms of communication. They explain the impact of social, cultural and intercultural changes such as globalisation and new technologies on the use of Arabic in different contexts. They explain how language choices they make reflect cultural ideas, assumptions and perspectives, for example, العبارات الشعبية؛ مصطلحات ذات دلالة دينية؛ العناوين الذكورية مثل رئيس للمذكر والمؤنث .

Years 9 and 10

The nature of the learners

At this level, students bring to their learning existing knowledge of Arabic language and culture and a range of strategies. They are increasingly aware of the world beyond their own and are engaging with youth-related and social and sustainability issues. They require continued guidance and mentoring but work increasingly independently to analyse, reflect on and monitor their language learning and intercultural experiences. They are considering future pathways and options, including the possible role of Arabic in these.

Arabic language learning and use

Learners are immersed in Arabic language, initiating and engaging in discussions and debates on topics of interest, and responding to enquiries. They reflect on the cultural and linguistic appropriateness of their language use in interactions and make necessary adjustments. They engage in an increasing range of interactions with others, seeking and giving advice لأنك تحب , and justifying their ideas and opinions discussing future plans and aspirations discussing future plans and aspirations لأنك تحب , and justifying their ideas and opinions لأنك تحب . They access and evaluate information about places, events, people, experiences and cultures from diverse sources, and convey perspectives and views on topical issues such as friends, family and relationships, social issues, youth culture, community matters and the natural and built environments, making connections with their own ideas and experiences. Learners produce a range of texts, such as informative, narrative, descriptive, procedural or persuasive texts, for a variety of contexts, audiences and purposes. They use their imagination to create and present texts, such as stories, plays, poems and speeches, and to express ideas, attitudes and values through different characters, events, settings and techniques. They develop translating and interpreting techniques and intercultural awareness in order to mediate between languages and cultures. Through their engagement with diverse texts and resources, students explore how cultural practices, concepts, values and beliefs are embedded in texts and how language choices shape and reflect perspectives and meaning.

Contexts of interaction

Learners interact with peers, the teacher and other Arabic speakers both locally and globally through a variety of means and modes of communication, including digital, online, collaborative performances and group discussions. The context of interaction extends beyond the classroom and involves investigating and reporting on issues in the local community and transacting with local Arabic speakers to negotiate services. These experiences provide learners with a sense of connectedness and purpose as Arabic and English speakers.

Texts and resources

Learners use diverse resources such as Arabic newspapers, magazines, documentaries, films, stories, songs, television programs, entertainment performances and web pages as references to assist them with discussions and research projects on Arabic language and culture. They explore a variety of text types, such as poems, articles, formal letters, interviews and speeches, and engage with a range of informative, historical or literary perspectives, views and arguments. Learners use a range of dictionaries and translation methods to support comprehension, build vocabulary and elaborate on ideas.

Features of Arabic language use

Learners apply appropriate pronunciation, rhythm, stress and tone and a variety of language features and complex sentence structures to enhance their spoken and written communication. They apply complex grammatical structures, such as indirect object pronouns and passive voice, to express their ideas objectively in texts such as articles and speeches, for example, لا تهتم . They expand on their views and opinions by using persuasive language, such as the subjunctive and imperative moods (لا تنسوا! شاهدوا الفيلم الاسطوري) and use cohesive devices to link and sequence ideas and information, for example, في البداية أود أن أحدثكم عن يوم النظافة. They analyse and explain how and why language use varies according to cultural contexts, relationships and purposes, and develop the language of reflection in Arabic.

Level of support

Support at this level of learning includes rich and varied stimulus materials, continued scaffolding and modelling of language functions and communicative tasks, and explicit instruction and explanation of the grammatical system, with opportunities for learners to discuss, clarify, practise and apply their knowledge. Critical and constructive teacher feedback combines with peer support and self-review to monitor and evaluate learning outcomes, for example, through portfolios, peer review or e-journaling.

The role of English

Arabic is predominantly used as the medium for classroom interaction and content delivery. English is used only when necessary to allow for further reflection on and discussion or explanation of more demanding concepts, particularly when making connections between language and culture. Learners explore how language influences cultural experiences and ways of thinking and of viewing the world. They examine their own personal and cultural identity and reflect on the nature of intercultural exchanges in which they are involved. They question the assumptions that Arabic and English speakers bring to interactions, and discuss ways to increase mutual understanding. They view their bilingualism and biculturalism as an asset for themselves and for Australia.

Years 9 and 10 Content Descriptions

Communicating	
Socialising	Elaborations

Initiate, sustain and extend interactions with others through seeking and giving advice, and discussing future plans, aspirations, relationships and social issues

[Key concepts: relationships, education, community, social issues; Key processes: advising, explaining, persuading, commenting, justifying]

(ACLARC171)

- sustaining interactions by asking for and providing specific information and elaborating on ideas, for example,
ماذا تعني بهذا؟ قلت بأنك تحب السفر؛ إلى أين تريد أن تسافر؟ ما معنى...؟
- extending on others' responses by providing suggestions and giving advice, for example,
بما أنك تحب الرياضة؛ أنصحك بالسباحة لأنها مفيدة جداً؛ لماذا لا تقرأ هذا الكتاب؟ جرب هذا القلم الجديد. ضع الصورة هنا؛ هذا مكان مناسب لها
- sharing ideas and making suggestions relating to own and others' experiences and aspirations, for example,
أنا أيضاً مثلك أحب السباحة؛ أُمي أيضاً لا تسمح لي باللعب على الحاسوب أيام الأسبوع؛ إن أردت سأرسل لك رسالة إلكترونية فيها كل المعلومات؛ أتمنى أن ألتحق بفريق التنس؛ أتمنى أن أتعلم الموسيقى
- participating in discussions, via online and virtual forums, relating to relationships and social issues such as youth employment, smoking and poverty, using reasoning and justification, for example,
لا يستطيع الشباب العمل بدوام جزئي لأن واجبات المدرسة كثيرة؛ التدخين مضر بالصحة فهو يسبب الكثير من الأمراض الخطيرة؛ يزداد الفقر في المجتمع ويجب على الجميع أن يحاربه

Negotiate actions and contribute ideas, opinions and suggestions in interactions related to shared tasks, transactions and problem-solving, managing different views and perspectives

[Key concepts: roles, perspectives, responsibility; Key processes: commenting, selecting, evaluating]

(ACLARC172)

- planning and negotiating collaboratively in scenarios related to travelling or living in an Arabic-speaking country, such as using transport, eating out or visiting tourist attractions, for example,
عندما أصل إلى القاهرة سوف أستأجر سيارة لأصل إلى الفندق؛ أفضل وسيلة مواصلات هي سيارة الأجرة؛ سوف أسافر إلى المناطق الريفية في القطر؛ في لبنان الأطعمة لذيذة لذلك سأذهب إلى مطاعم مختلفة؛ أحب المأكولات العربية الشعبية. سوف أزور جميع المناطق الأثرية في الأردن
- making complaints and recommendations and seeking solutions, for example,
أعترض على طريقة معاملة الزبائن؛ الفندق بحاجة إلى منظفين أكثر؛ الطعام كان بارداً ولم أقدر أن أكله؛ أسعار الثياب عالية جداً
- organising an event such as a youth meeting through social media to raise awareness of environmental or ethical issues

- contributing opinions using online and digital forms of communication such as emails, school chat forums and community websites to discuss various social issues such as youth employment opportunities or issues related to freedom and equality, for example,
أصبح وجود فرص للعمل مستحيلاً؛ إنها كارثة إنسانية؛ إنها عار على مجتمعنا؛ مساواة جميع المواطنين حق إنساني؛ حرية الإنسان في التعبير خط أحمر

Engage in language learning tasks and experiences,
discussing and justifying ideas and opinions
[Key concepts: interconnection across concepts and actions,
mindful learning; Key processes: discussing, connecting,
justifying]

(ACLARC173)

- expressing and justifying own opinion in class discussions and debates, for example,
أتفق معك جداً؛ أوافقك الرأي؛ أنا أحترم رأيك كثيراً
لا أتفق معك في رأيك. لا أوافقك الرأي
- eliciting, reflecting on and responding to others' opinions, for example,
ما رأيك في هذه الجملة؟ هل تتفق معي؟ هل توافقتني على كلامي؟ وأنت يا سعيد؛
ماذا تعتقد؟ سميرة؛ ما رأيك في الموضوع؟
كلامك صحيح مئة بالمئة؛ أنت على حق في قولك هذا صحيح!
أعتقد أن كلامك ليس صحيحاً؛ أنت لست دقيقاً في كلامك؛ مع احترامي لشخصك؛
أرى أن كلامك ليس منطقياً. أسفة رأيك غير مقنع
- making connections between ideas and consequences, and cause and effect, for example,
وصلت إلى المدرسة متأخراً لأن سيارة أُمي تعطلت في الطريق؛ لم أكمل الدرس
أمس لأن بيتنا كان مليئاً بالزوار؛ لم أكمل واجب العلوم لأنني لم أفهم السؤال
إن سبب صعوبة الإمتحان هي الأسئلة الأخيرة؛ المعلمة لم تشرح الدرس جيداً؛
عاقبني الأستاذ في الفرصة لأنني تأخرت عن الصف؛ اتصلت المعلمة بأُمي
لأنني أتكلم كثيراً في الصف ولا أستمع لشرحها
- praising, complimenting and encouraging peers when discussing ideas, for example,
ممتاز! رائع! فكرة هائلة! واصل مجهودك. هذه فكرة عبقرية! أنت ذكي جداً!
فكرتك مذهلة

Informing

Elaborations

Locate, analyse, interpret and evaluate information from online and digital sources on issues of interest to young people, making connections with own experiences and considering various perspectives

[Key concepts: representation, perspective, private and public world; Key processes: summarising, interpreting, evaluating, connecting, relating]

(ACLARC174)

- understanding main ideas and evaluating information from texts such as articles, reports, charts, diagrams and news items, on topics such as environmental sustainability, world sports, and youth culture, for example,

السخرية من وضع معين؛ التنديد بفعل معين؛ تزكية فكرة ما من خلال العبارات اللغوية والصور والتنسيق العام للتقرير

- distinguishing between fact and opinion in texts such as articles and reports in print and digital form, using critical literacy skills to recognise bias by evaluating textual purpose used, for example,

التحيز لفكر ما؛ المبالغة؛ إن جميع الشباب متهور؛ هذا جيل غير مسؤول

الحيادية تجاه الأفكار المؤيدة والمعارضة؛ هناك بعض الشباب المتهور؛ إن غالبية الشباب غير مسؤول

- analysing and interpreting information collected from various sources, including digital or online sources, such as concept maps, charts and tables, by summarising, sequencing and prioritising, considering audience, purpose and context and drawing personal conclusions, for example,

من الواضح أن...؛ في الخاتمة...؛ هذا يؤدي إلى...؛ خلاصة الكلام...؛ في النهاية

...

- using information obtained from a range of sources in order to debate issues of interest, such as the generation gap, teenage issues, immigration or parents' expectations, using persuasive and evaluative language, making connections with own experiences and considering different perspectives, for example,

الهوة بين الأهل والأبناء كبيرة وعميقة دون شك؛ يجب على الأهل مساعدة أبنائهم في مرحلة المراهقة؛ أليس كذلك؟ نحن بحاجة إلى تغيير الفكر؛ علينا أن ننظر إلى المسألة بحكمة؛ يجب علينا جميعاً أن ندعم الشباب في إختياراتهم

Construct and present texts in varied styles and formats to convey own and others' perspectives on ideas and information for different contexts, audiences and purposes
[Key concepts: audience, purpose, media, perspectives; Key processes: constructing, persuading, comparing, evaluating, connecting]

(ACLARC175)

- producing texts in oral, written and multimodal formats, such as blogs, print and online articles and oral presentations, to convey own ideas and interpretations of various texts for different contexts, audiences and purposes
- conveying information relating to community matters in texts such as posters, brochures and web pages, for example, a brochure promoting a holiday destination, a poster for a doctor's surgery encouraging healthy eating, or a web page reviewing a new Arabic film
- persuading others to express their opinions or think seriously about a particular issue of interest in texts such as blogs, using language expressions such as
لنفكر بجديّة؛ هل يُعقل أن...؟ لم لا؟ أليس هذا معقولاً؟ هذا خبرٌ في منتهى الغرابة!
لا بد وأن نأخذ موقفاً واضحاً؛ علينا جميعاً أن نشارك في هذا الإعتراض؛ هيا
نكتب رسالة لصاحب المحطة
- evaluating and reporting on a contemporary social, ethical or environmental sustainability issue using a range of presentation techniques, for example, flow charts, PowerPoint presentations or video clips

Creating

Explore a range of imaginative texts, analysing themes, values and techniques, and discussing how aspects of language and culture help create particular effects
[Key concepts: culture, emotion, values, style; Key processes: analysing, discussing, interpreting, evaluating]

(ACLARC176)

Elaborations

- listening to, reading and viewing a range of imaginative texts, including digital, online or multimodal texts, such as short stories, films and poetry, identifying technical aspects and analysing elements of language that convey emotions and values
- reading texts such as poems and short stories, analysing the main messages the author wishes to convey and discussing the values presented in the texts and connecting them to their own experiences
- analysing and evaluating the lyrics of contemporary Arabic songs, identifying themes, messages and cultural aspects expressed through language
- discussing how texts such as short films or video clips portray social issues such as relationships, wealth and poverty and cultural change, and values such as honesty and equality

Create and present imaginative texts to express ideas, attitudes and values through characters, events and settings for a range of audiences, contexts and purposes

[Key concepts: imagination, creativity, morality; Key processes: composing, engaging, projecting, presenting]

(ACLARC177)

- creating various types of imaginative texts, such as songs, stories or video clips for video-sharing websites, to convey messages that reflect own perspectives on Arabic values and practices such as traditional filial piety or the value of education in modern society
- creating imaginative texts in print, digital or online formats, such as short stories, video clips or plays, and building characters, themes and settings to entertain a specific audience, such as younger learners of Arabic
- composing and presenting imaginative poems and songs that relate to significant celebrations or events in both Australia and the Arabic-speaking world, for example, الأعياد الوطنية؛ عيد المعلم؛ العيد الوطني الأسترالي؛ عيد شهداء الأندلس

- creating reflective and critical texts such as diaries, blogs and articles to express own opinions on imaginative texts such as films, stories or poems, using expressions such as

يا إلهي كم كان الفيلم مملاً؛ دور الأم في الفيلم كان قاسياً جداً؛ لم أستمتع بقراءة القصة أبداً؛ لقد كانت أحداثها غير منطقية؛ قافية القصيدة جيدة لكن تعابيرها متكررة

Translating

Translate and interpret texts from Arabic into English and vice versa for different audiences and contexts, and reflect on how cultural values, attitudes and perspectives are represented in each language

[Key concepts: audience, context, perspective, values; Key processes: reflecting, interpreting, comparing, analysing]

(ACLARC178)

Elaborations

- translating texts such as advertisements and letters from Arabic into English and vice versa, with the assistance of print, electronic and online translators, identifying cultural elements and reflecting on how they are encoded in common words and expressions, for example,

هيا أسر عوا؛ لا تدعوا الفرصة تفوتكم؛ إنها رحلة العمر؛ صديقتي الغالية على قلبي؛ سلام حار أرسل لك من أستراليا؛ أشواقى وقلباتى لك ولجميع أفراد العائلة؛ ودمت لصديقتك ...

- reflecting on the difficulty of achieving equivalence in translations of creative texts such as poems, songs and video clips, identifying and explaining words and phrases that require particular elaboration or explanation, for example,

والله ولي التوفيق؛ رافقتك السلامة؛ على ما يرام؛

- experimenting with interpreting and translating popular Arabic expressions, proverbs or idioms, and reflecting on the social and cultural values that may be embedded in them, for example,

الجار قبل الدار؛ من جد وجد ومن زرع حصد؛ في الثأني السلامة وفي العجلة الندامة؛ الوقاية خير من العلاج

- analysing existing translations of texts, such as subtitled short films, making comparisons with own translations and reflecting on why versions may vary

Create bilingual texts that reflect aspects of culture for Arabic-speaking and English-speaking audiences in the school and wider community, for example, pamphlets, travel brochures or road directories

[Key concepts: representation, cultural literacy; Key processes: interpreting, referencing, relating interculturally]

(ACLARC179)

- considering how to maintain the integrity of original texts when translating into Arabic or English, for example, explaining culture-specific concepts relating to Arabic-speaking communities, such as التحيات والسلامات والسؤال عن الأهل والأقارب, or to the Australian context, such as 'the bush' or 'the outback', and representing original ideas and meanings bilingually
- producing bilingual texts, such as video clips with subtitles, explaining cultural practices in Australia for Arabic-speaking viewers, for example, bushwalking, Anzac Day commemorations
- producing digital and online texts in both Arabic and English, such as brochures and leaflets, for different contexts, purposes and audiences, such as Arabic-speaking students studying in Australia, Arabic-speaking tourists, or Australian schools hosting Arabic-speaking visitors, and reflecting on the process of working in both languages
- creating captions or commentaries in Arabic and English to accompany texts such as song lyrics, video clips, film extracts or parts of a television program, exchanging and comparing bilingual texts with peers using online forums and discussing the best ways of achieving consistency in meaning

Reflecting

Reflect on how meanings vary according to cultural assumptions that Arabic and English speakers bring to interactions, and take responsibility for contributing to mutual understanding

[Key concepts: cultural assumptions, judgement; Key processes: reflecting, relating interculturally]

(ACLARC180)

Elaborations

- considering how being bilingual offers additional ways of interpreting the world and representing experience
- challenging cultural assumptions and offering different perspectives to new cultural contexts or situations, for example, the idea that all Arabic-speaking people dress the same or eat the same food, many Arabic speakers speak more than two languages, every Middle Eastern country has its cultural uniqueness
- identifying moments of embarrassment or communication breakdown in own intercultural interactions, exploring reasons for these and suggesting adjustments that could be made to enhance mutual understanding, for example, explaining to a non-Arabic speaker that exposing the sole of your foot/shoe to a person's face would be considered extremely bad manners and interpreted as a grievous insult
- discussing elements of successful intercultural communication, for example, attentive listening and objectivity when discussing social issues, and understanding that mediating and negotiating differences in perspective can prevent and resolve interpersonal problems and conflicts

Reflect on own cultural identity and how it is both shaped by and influences ways of communicating, thinking and behaving
[Key concepts: perception, identity, communication; Key processes: discussing, evaluating, reflecting]

(ACLARC181)

- composing a cultural identity profile to exchange with non-Arabic speakers, making decisions about what points of information will be of most interest to others
- reflecting on choices made to present self to others in particular ways or to conceal aspects of identity when interacting across cultures, noticing differences in the way they communicate, think and behave in different contexts
- exploring how individual ways of communicating, thinking and behaving reflect and help to shape their own cultural identity, for example, why an Arabic-Australian teenager who speaks English better than they do Arabic and is more familiar with the Australian cultural context may view themselves as more Australian than Arabic
- comparing and contrasting an Arabic and an Australian experience, such as الإحتفالات العائلية
- considering how their own and others' identity may shift according to the place and time

Understanding

Systems of language

Understand how rules of Arabic pronunciation, including patterns of stress and rules of pause, and writing conventions enhance meaning and aesthetic effect
[Key concepts: fluency, complexity, appropriateness; Key processes: applying, analysing, synthesising]

(ACLARU182)

Elaborations

- understanding that certain sounds in Arabic words can be dropped from pronunciation, such as the t sound in السماء البنت مريضة؛ الشمس مشرقة and tashkeel in صافية
- understanding that sentences can contain one or more verbs and can be joined with و or other cohesive devices
- recognising the need for a pause or change of tone in complex sentences with embedded clauses, for example, كنت مع صديقي عماد؛ صديقي من المدرسة؛ عندما شاهدنا الحادث الأليم
- applying understanding of how tone can convey emotions and shade meaning, such as distinguishing between colloquial or formal language, for example, حقاً؟ يا إلهي! معقولة؟ تعال إلى هنا حالا
- reflecting on the role of pronunciation, rhythm, word stress and intonation in effective communication, and applying this knowledge to own interactions
- using knowledge of Arabic pronunciation and spelling rules when engaging with authentic spoken and written texts
- evaluating own spelling and pronunciation in relation to their understanding and expression

Analyse how the use of grammatical elements such as indirect object, passive voice, dual form, verb tense and word order impact on tone, speech level and formality, and on meaning-making

[Key concepts: register, grammatical systems, meaning; Key processes: analysing, explaining, manipulating, applying]

(ACLARU183)

- understanding that Arabic uses the dual form of nouns, verbs and adjectives, in both masculine and feminine forms, for example, هذان كتابان؛ الوردتان جميلتان، أنتما تلعبان؛ هذان كتابان؛ الوردتان جميلتان، أنتما تلعبان
- understanding the importance of vocalisation on the subject word and the object word and analysing how this affects the meaning of the sentence, for example, كلمت الأم البنّت؛ كلمت الأم البنّت
- manipulating interrogative verb forms to ask a range of questions, for example, قل لي لم لم تتصل بي؟ اتصلت بك عدة مرات ولم ترد عليّ أخبرني ماذا تريد أن تصبح في المستقبل؟ إشرح لي أسباب عدم قبولك دعوتي لحفل عيد ميلادي. ألسنا أصدقاء؟
- understanding and applying indirect object pronouns and passive voice to express ideas objectively in texts such as articles and speeches, for example, مُنِعَ الكتاب بسبب أفكاره الجريئة؛ خُصَصَ وقت بعد المدرسة لتعليم اللغة العربية
- using cohesive devices to sequence ideas, for example, في البداية أود أن أحدثكم عن يوم النظافة العالمي؛ وبعد ذلك سأشرح لكم طرق المشاركة في هذا اليوم؛ ثم سأريكم بعض الصور وختاماً سأخذكُم في جولة قصيرة حول الحديقة العامة
- extending use of negative forms, for example, لم أحب أبداً مشاهدة الأفلام القديمة التي تشاهدها أمي لأنها لا تناقش أموراً عصريّة؛ ليس كل ما تقرأونه في الكتب صحيحاً ولا ما تشاهدونه على التلفاز حقيقةً
- using إلا to express exceptions, for example, جميع أصدقائي يلعبون رياضة ما خلال الأسبوع إلا أنا
- using comparative and superlative forms of adjectives to describe people and objects, for example, صديقتي هناء هي أجمل فتاة رأيتها في حياتي؛ فهي أحسن صديقة؛ وأكثر واحدة تحب مساعدة الآخرين؛ إنها أيضاً أمهر طبّاخة والأفضل في كل شيء
- understanding how to use exaggeration and emphasis for effect, for example, ألف مبروك على رخصة القيادة؛ أنا أفكر بك دائماً؛ قلت للمرة المليون بأنني لم اسمع جرس المحمول لأردّ عليك
- developing metalanguage to discuss grammatical features and to explain how word order, tenses and moods, adjectives and adverbs can be used to enhance meaning and expand expression
- using imperative verb tenses to persuade, encourage and advise others, for example, شاركوا في الرّدّ على الموقع الإلكتروني؛ لا تنسوا شاهدوا الفيلم الأسطوري؛ سيعجبكم جداً؛ هيا تشددوا وحاولوا أن تكملوا البحث بجدارة؛ إتصلوا على الرقم المذكور في الإعلان

- using subjunctive mood to express doubt, uncertainty or emotion, for example,
قد يكون كلامك صحيحاً ولكنني لست متأكداً منه؛ ربما تقبل أمي أن أذهب معك
إلى الحفل لست متأكدة
- creating compound and complex sentences by using embedded clauses, for example,
أحب القراءة كثيراً بالرغم من أن الكثير من الناس لا يحبون أن يقرأوا بل
يفضلون مشاهدة التلفاز ؛ لا أعرف لماذا أصدقائي والذين أصولهم عربية؛ لا
يحبون الأغاني العربية!

Understand the relationship between purpose, audience, context, linguistic features, and the textual and cultural elements associated with different types of texts, such as persuasive, argumentative and expository texts
[Key concepts: perspective, purpose, audience; Key processes: analysing, correlating, discussing, explaining]

(ACLARU184)

- analysing how language choices help achieve particular purposes and effects in particular types of texts, such as descriptive language in documentaries; reflective language in personal blogs, diary or journal entries, including digital diaries; and persuasive language in advertisements and speeches
- analysing a range of expository texts such as news reports and feature articles, identifying language features and any elements of bias or objectivity
- discussing and evaluating how language is used to express ideas and justify opinions in texts such as debates or segments of a talk show on topical issues of interest to teenagers
- identifying and discussing the use of diacritics in texts for decorative purposes such as book titles, letter heads and nameplates
- examining a range of spoken and written texts, discussing similarities and differences in and connections between context, purpose and audience, and what the texts reveal about social relationships and processes, for example, reflections of status, authority, or concepts of respect and politeness

Language variation and change

Analyse and explain how variations in Arabic language use relate to roles, relationships and the context of interactions, and consider how and why these would differ from interactions in English or other languages represented in the classroom

[Key concepts: genre, variation, intercultural literacy; Key processes: analysing, explaining, reflecting]

(ACLARU185)

Elaborations

- investigating the nature and use of the Arabic language in different contexts of interaction, for example, by asking Arabic-speaking students in Australia when, with whom and for what purpose they use Arabic or English, and reflecting on similarities and differences in interactions in both languages
- reflecting on how various Arabic speakers' views on social or cultural roles and relationships are reflected in texts such as traditional sayings, idioms, proverbs, poetry and song lyrics
- comparing a variety of texts relating to interactions in different Arabic-speaking regions, and analysing how aspects of the language used in varying social contexts reflect certain values and world views

Reflect on the dynamic nature of language, relating it to constantly changing environments and cultural conditions such as contact with other languages and cultures and changing circumstances in local and global contexts
[Key concepts: communication, influence, power of language, changing environment; Key processes: investigating, examining, analysing, explaining, reflecting]

(ACLARU186)

- recognising that language changes over time, for example, by viewing classical and contemporary Arabic films and comparing how certain ideas and concepts are differently represented through the language used
- examining how English is influencing and modifying Arabic language use in particular settings, for example, in the entertainment industry, such as in films and television programs; in online contexts; and in language used to express global concepts such as الديمقراطية؛ الليبرالية
- considering how moving between Modern Standard Arabic and regional dialects reflects personal, social and political histories and changing contexts

Role of language and culture

Explore how language both shapes and reflects thoughts and world views and encourages action and reaction, and is shaped by community and individual cultural experiences
[Key concepts: cultural experience, thought, behaviour; Key processes: discussing, reflecting, expressing opinions]

(ACLARU187)

Elaborations

- recognising the importance of learning and maintaining Arabic and other languages in order to access the cultural understanding, values, beliefs and mindsets of others
- reflecting on personal encounters with cultural practices that have impacted on own ways of thinking and reacting and have helped to shape their attitudes to and views of the world around them, and discussing ways to increase intercultural understanding
- discussing and reflecting on how language use, such as persuasive, motivational or emotive language in texts, and in different forms of media, such as the internet, impacts on social behaviour, actions and reactions

Years 9 and 10 Achievement Standard

By the end of Year 10, students use written and spoken Arabic to initiate, sustain and extend formal and informal interactions with the teacher, peers and others in a range of settings. They use language spontaneously to respond to others, seek and give advice for example, *عندي أصدقاء كثير؛ علاقتي بعائلتي وطيدة؛ أحب معلمتي كثيرا لأنها...*, describe relationships for example, *كيف أستطيع أن...؛ أعتقد أ...*, discuss aspirations for example, *أريد أن أكون رائد فضاء*, and future plans (for example, *بيتتي القديم كان أجمل من بيتي الحالي*), compare experiences for example, *في المستقبل؛ أريد أن أسافر إلى أوروبا؛ عندما أكبر؛ أريد أن أدخل الجامعة*, and justify opinions for example, *(... لأن...؛ بسبب*) on social issues of interest to them. They listen to different views and perspectives when interacting with others, and take action, solve problems and contribute ideas, opinions and suggestions. They apply pronunciation rules and rhythm to complex sentences to enhance spoken interactions. They analyse, interpret and evaluate information on topical issues of interest to young people, making connections with their own experiences and considering various perspectives. They convey information and perspectives using different text types and modes of presentation to suit different contexts and audiences and to achieve different purposes. They share their response to different imaginative texts by analysing themes for example, *المشاعر التي يوججها* and values, and identify ways in which aspects of language and culture create particular effects, such as *الكناية والاستعارة*, techniques for example, *الفكرة الأساسية في النص؛ هدف النص؛ الموضوع*, and values, and identify ways in which aspects of language and culture create particular effects, such as *المشاعر التي يوججها* and values. Students create imaginative texts for a range of audiences, contexts and purposes, to express ideas, attitudes and values through characters, events and settings. When creating texts, they use a variety of grammatical elements to enhance meaning, such as indirect object, passive and active voice, negation for example, *ليس عندي وقت؛ لا يوجد وقت؛ لن أجد الوقت*, verb tense and word order for example, *في وقت من الأوقات؛ في*, and time and place clauses such as *في وقت من الأوقات؛ في*. Students translate and interpret texts from Arabic into English and vice versa and explain how cultural values, attitudes and perspectives are represented. They create a range of bilingual texts for a variety of purposes and audiences. They explain the relationship between language, culture and identity, question perceptions, and modify language and behaviours in intercultural interactions as appropriate.

Students apply their understanding of complex pronunciation rules and writing conventions, such as stress patterns and rules of pause, to enhance meaning and aesthetic effect. They analyse a range of persuasive, argumentative and expository texts and explain the relationship between context, purpose, audience, linguistic features, and textual and cultural elements such as *التحية*. They explain how and why variations in Arabic language use relate to roles, relationships and contexts of interaction. Students analyse the ways in which languages change in response to changing environments. They explain how language use reflects thoughts and world views and is shaped by cultural experiences.

The Australian Curriculum Languages - Arabic Years 7–10 (Year 7 Entry) Sequence

Years 7 and 8

The nature of the learners

Students who enter the background language learner pathway in Arabic in Year 7 may have strong connections to Arabic language and culture through family and community and varying degrees of oracy in Arabic. Their textual knowledge developed through English literacy supports the development of literacy in Arabic. Skills in analysing, comparing and reflecting on language and culture in both languages are mutually supportive.

Arabic language learning and use

Learners use modelled and rehearsed language in familiar and unfamiliar contexts and increasingly generate original and personal language. They interact in class routines and activities, expressing their ideas and feelings (أحب جدي كثيراً), exchanging opinions (هذا الواجب صعب؛ الإمتحان طويل) and managing shared tasks (أولاً؛ نختار أفراد الفريق؛ ثانياً نوزع الأدوار). They listen to, read and view a range of texts and create spoken and written texts to present ideas and information to a variety of audiences in different contexts. Learners work both collaboratively and independently, exploring different modes and genres of communication with particular reference to their current social, cultural and communicative interests. They explore and discuss themes, characters and events in Arabic folk tales, fables and films, and plan, draft and present imaginative texts, such as stories, plays, cartoons and comics. They make cross-curricular connections and explore intercultural perspectives and experiences through interaction with an increasing range of Arabic speakers.

Contexts of interaction

Learners come to the classroom understanding and using Arabic within the world of their experience, which is likely to be the home and community domains. At this level, possible contexts of interaction could include the world of learning, for example, discussing the shift from primary to secondary school, the concepts of home and friendship, family, shared events and leisure activities. Learners contextualise and use their background language and culture as much as possible while socialising and exchanging information. They pool language knowledge and resources to plan, problem-solve, monitor and reflect. This will not necessarily be characterised by the fluent use of Arabic, but rather by the way they use their background knowledge of Arabic language and culture in communication. Interactions are authentic in relating to the world of teenage experience, and performance based. Additional opportunities for interaction are provided through purposeful and integrated use of information and communications technologies (ICT), for example, videoconferencing and online activities such as e-learning.

Texts and resources

Learners work with a range of texts designed for language learning, such as textbooks, audio recordings, teacher-generated materials and online resources. They also use authentic materials such as blogs, newsletters, advertisements, magazines, video clips and apps. Their knowledge is extended through exploration of Arabic texts on the internet, and audiovisual materials, cultural performances, and community events and activities, such as the Arabic Film Festival. As background language learners, they are also likely to engage with bilingual, subtitled and captioned texts.

Features of Arabic language use

Learners understand and use features of the Arabic sound and writing systems, and make connections between spoken and written texts. They use appropriate pronunciation and intonation when communicating and interacting in a range of contexts, and apply spelling rules when writing in Arabic script. They explore Arabic syntax and linguistic structures and begin to use metalanguage by identifying grammatical terms. They apply elements of Arabic grammar to the production of texts, such as articles, nouns, adjectives, personal pronouns, verb tenses, conjunctions, adverbs, statements, negation and questions, to describe people, actions and events (أستيقظ في الصباح), discuss preferences (أحب طعام أمي؛ لا أحب الأكل السريع), expand on expression (في الطريق إلى المدرسة), and link ideas and information (أو؛ أيضاً؛ كذلك). They understand ways in which the English language works as a system and how English is similar to and different from Arabic. They discuss the influence of other languages and cultures on Arabic language, and recognise variations in language use across Arabic-speaking countries, regions and communities. They make connections between texts and cultural contexts, identifying how cultural values and perspectives are embedded in language and how language choices determine ways in which people, issues and circumstances are represented.

Level of support

Learners have varying degrees of Arabic oracy and literacy competence and are supported through multilevel and differentiated tasks. Support includes scaffolding, modelling and monitoring, explicit instruction and feedback, structured activities for practising new language, and the use of gesture and movement. Students are supported to develop autonomy as language learners and users, and to self-monitor and adjust their language use in response to their experience in diverse contexts. Opportunities to review and consolidate are an important component of learning at this level.

The role of English

Arabic is the main language of instruction and interaction. Arabic and English may be used when discussing concepts, functions and structures relating to language use, and when exchanging and comparing experiences in learning Arabic and English. English may be used for conceptually demanding explanations and discussions, particularly when making connections between Arabic and other languages and cultures and discussing how language and culture connect to make meaning. Learners are encouraged to reflect on how they interact in Arabic and English, and on their own sense of identity from a bilingual perspective.

Years 7 and 8 Content Descriptions

Communicating	
Socialising	Elaborations

Interact with peers and the teacher to exchange information about self, family and friends, routines, leisure activities, interests and special days, and express feelings, likes and dislikes

[Key concepts: personal world, leisure; Key processes: interacting, describing, socialising]

(ACLARC001)

- greeting the teacher and peers, and introducing themselves, family and friends, using formulaic expressions and appropriate body language, for example,

مرحباً؛ صباح الخير؛ كيف حالك/حالك؟؛ بخير شكراً

إسمي عادل؛ أنا مريم

هذا صديقي علي؛ هذه صديقتي ريم؛ هذا أبي وهذه أمي؛ اسم أخي رامي؛ عمري ست سنوات؛ عمر أخي سنة

- exchanging information about a range of topics, such as family, friends, routines, school and leisure activities, for example,

أنا طويل؛ أنا شاطر؛ بيتي صغير؛ غرفتي واسعة؛ صديقي علي ذكي؛ مدرستي كبيرة؛ معلمتي طيبة

أستيقظ باكراً؛ أكل الفطور؛ أليس ثيابي؛ أشاهد التلفاز؛ أكمل فروض المدرسة؛ أرتب سريري؛ أنظف غرفتي؛ أذهب كرة القدم؛ أذهب إلى المسجد

بعد المدرسة أذهب إلى النوم

يوم السبت أذهب للتنس مع أبي؛ في عطلة نهاية الأسبوع أذهب مع عائلتي إلى المطعم؛ أحضر حصة الموسيقى يوم الجمعة؛ أشعر بالسعادة في حصة الموسيقى؛ أحب العزف على البيانو كثيراً؛ أتعلم اللغة العربية يوم السبت صباحاً

- asking about and expressing likes and dislikes using simple language such as

من تحب في العائلة؟ ماذا تحب في المدرسة؟ هل تحب المدرسة؟ أحب جدتي كثيراً؛ لا أحب الرياضة في المدرسة

- asking and answering questions about personal experiences in relation to self, peers, friends and family members, for example,

أين ولدت؟ أي لغة تتكلم في البيت؟ ماذا يعمل أبوك؟ أين تذهب يوم السبت؟ من هي صديقتك؟ لماذا تحب جدتك؟ ماذا تفعل بعد المدرسة؟ أي رياضة تفضل؟

ولدت في العراق؛ أتكلم العربية في البيت؛ أحب الحلوى كثيراً؛ أحب أبي وأمي جداً؛ أبي يعمل في المستشفى؛ أمي طبيبة؛ أخي يدرس في المدرسة؛ أختي في الجامعة؛ يوم السبت أذهب إلى بيت جدتي؛ يوم الأحد أذهب إلى المطعم

- exchanging correspondence such as notes, invitations or birthday cards in print or digital form, for example,

هل تحب أن تأتي إلى حفل عيد ميلادي؟ سمير، أدعوك إلى بيتي يوم السبت؛ نعال نلعب معاً

عيد ميلاد سعيد؛ كل عام وأنت بخير؛ أتمنى لك عيداً سعيداً

- sharing experiences with family and friends in a variety of ways, for example, by recounting events such as special celebrations in conversations and through social media

ذهبت البارحة مع عائلتي إلى المتحف؛ شاهدت مع أخي فيلماً جديداً في السينما؛ كانت لعبة الركبي ممتعة؛ كانت الرحلة المدرسية إلى حديقة الحيوان ممتعة

Participate in collaborative planning, decision making and shared transactions, using different modes of communication
[Key concepts: collaborative learning, performance, presentation; Key processes: planning, listening, deciding, transacting]

(ACLARC002)

- making decisions about roles, using simple expressions such as
ماذا عن دور الأب؟ أنت لا تقدر ان تكتب كل القصة؛ أنا اكتب النصف الأول وأنت النصف الآخر؛ ليكن دوري المشتري وأنت دورك البائع؛ هل تحب أن تكون البائع؟
- planning, rehearsing and presenting a group activity for class or school relating to a familiar situation or event such as Mother's Day, using expressions such as
اليوم سوف نقدم لكم عرضاً عن عيد الأم؛ شكراً لاستماعكم؛ أنا كامل وهذه لدينا وهذا محمود؛ نرجو أن تستمتعوا بالعرض.
- making collaborative decisions and arrangements using expressions of counting, sequencing and organising ideas, for example,
أولاً نختار أفراد الفريق؛ ثانياً نوزع الأدوار؛ ثالثاً نعرض الأفكار؛ أخيراً نقوم بدورنا
في البداية أنا سوف أجمع الصور؛ وأنت تبحث عن المعلومات في الإنترنت وفي النهاية سنجمعها
- participating in transactions by asking for and providing information such as price, and requesting goods and services, for example,
ما سعر...؟ بكم هذه اللعبة؟ ما سعر كيلو البرتقال؟ بكم كيس الخبز؟ كيس الخبز بدولار ونصف؛ سعر كيلو التفاح ثلاثة دولارات
أحتاج مساعدة من فضلك؛ هل تستطيع أن تساعدني؟ أبحث عن خوذة لقيادة الدراجة أين أجدها؟ هل عندكم الفيلم الكارتوني الجديد؟

Interact in classroom routines and activities, developing language for a range of classroom functions and processes, such as following instructions, asking and answering questions, and requesting support by asking for repetition, permission and help

[Key concepts: roles, routines; Key processes: listening, responding, contributing]

(ACLARC003)

- participating in everyday classroom routines such as roll call, taking turns, giving and following classroom instructions, and asking questions and responding to the teacher and peers, for example,

نعم؛ أنا هنا؛ حاضر؛ ممكن أن أتكلم؟ ممكن أن أقول شيئاً؟

أكتب التاريخ هنا؛ أرسم خطأً على الورقة؛ أكتب العنوان فوق؛ إغلق الباب؛
أجلس في مكانك؛ افتح الدفتر؛

ضع الحقيبة على الأرض؛ ارفع يدك؛ إنتظر دورك متى يدق الجرس؟ كيف أكتب
...؟ ما معنى...؟

- making polite requests such as attracting attention and asking for help in classroom situations, requesting repetition, asking for and providing clarification, asking permission and responding appropriately, for example,

ممكن أن أتكلم؟ عندي فكرة رائعة!

ممكن أن تعيدي السؤال؟ لم أفهم السؤال؟ من فضلك أعد السؤال. ما معنى...؟

أين أضع الصورة؟ أين أكتب الجملة التالية؟ ماذا تقصد؟ أقصد ضع الصورة تحت
الكتابة. أكتب الجملة بجانب الصورة

هل يمكنني الذهاب إلى الحمام؟ هل يمكنني أن آخذ الكتاب؟ شكراً يا معلمة! مع
السلامة؛ إلى اللقاء

- responding to the teacher's questions, taking turns, praising and encouraging peers, and using formulaic expressions and interjections, for example,

لماذا تأخرت عن المدرسة؟ نمت كثيراً؛ أمتي تأخرت في البيت؛ توقفت سيارة أبي
في الطريق؛ أخي سبب لنا التأخير

- contributing to classroom activities, such as by developing classroom rules, expressing opinions on procedures and tasks, and giving advice and sharing ideas with peers, for example,

إستمع للمعلمة؛ إحترم الجميع؛ إنتظر دورك؛ إذهب إلى الحمام في الفرصة؛
أكمل كل دروسك في الصف؛ كن مؤدباً؛ لطيفاً؛ هادئاً؛ عادلاً؛ ودوداً؛ كوني هادئة؛
لطيفة؛ صادقة

هذا الواجب صعب؛ الإمتحان طويل؛ ما عندي وقت؛ لم تصح المعلمة إمتحان
الإملاء بعد؛ الأفضل أن نوضّح العنوان؛ هذا الخط أفضل من الآخر؛ أقترح
استعمال الألوان في الرسم

Informing

Elaborations

Listen to, read and view a range of spoken, written and multimodal texts; identify, sequence and classify key points of information such as details about people and events; and use the information in new ways

[Key concepts: information, text; Key processes: listening, reading, viewing, locating, transposing]

(ACLARC004)

- listening to and viewing texts such as stories, songs, notices or video clips and identifying key points of information, using intonation and visual cues such as gestures and facial expressions to assist understanding
- identifying letters, words and phrases in written Arabic, for example, titles, labels and captions
- participating in shared reading of print and digital texts such as short stories or other texts relating to familiar events and contexts, using pictures, intonation and contextual cues to predict meaning and identify key information
- locating and sequencing information used to describe people and events, for example,

البنت تدرس؛ الولد يساعد أمه؛ الأب ينظف الحديقة؛ في الصباح أمي تحضر
الطور؛ في المساء أبي ينظف السيارة

- responding to questions that elicit details such as colour, quantity and place about participants and objects, for example,

ما لون الفستان؟ لون الفستان أحمر؛ ما لون المقلمة؟ لون المقلمة أحمر

كم عدد الأقلام؟ كم كتاباً يوجد هنا؟ يوجد أربعة كتب

أين تعمل أمك؟ تعمل أمي في المستشفى؛ يدرس أخي في المدرسة

- classifying and categorising information gained from others, such as favourite foods and places to visit, for example,

سالم يحب التبولة؛ عادل يحب الدجاج؛ سعاد تفضل الخضار؛ علي يحب كرة
القدم؛ ماجد يفضل السباحة؛ رامي يفضل العزف على الغيتار

تحب البنات الموسيقى بينما الأولاد يحبون الرياضة

- listening to short spoken texts with unfamiliar language, and identifying specific details, for example, the name and number on a recorded voice message

مرحباً

إسمي سهام

أود التكلّم مع سامر بخصوص الإمتحان

أرجو الإتصال بي على الرقم 0456566777

- gathering information about other peers' activities through conducting interviews about weekend activities and selecting specific information to use in a short report

Convey and present ideas and information obtained from different sources relating to home, school, leisure and interests

[Key concepts: information, text, personal world; Key processes: presenting, conveying, reporting]

(ACLARC005)

- describing personal possessions and classroom items using simple sentences, for example,
حقيبتي كبيرة وثقيلة؛ صفي صغير وجميل؛ طاولة المعلمة غير مرتبة؛ النافذة في الصف مكسورة؛ عندنا لوح ذكي جديد في الصف؛ صديقي وليد يجلس معي
- reporting on information gathered from peers using simple structures such as
وليد لا يحب الرياضيات ولا القراءة؛ عند فادية أخ صغير في المدرسة؛ فاطمة تسكن في شقة؛ مازن يحب الديناصورات
- contributing to a class photo story, such as by writing or reading aloud captions to own photos and other aspects of personal information, for example,
هذه أنا عندما كان عمري أربع سنوات؛ كان شعري طويلاً؛ هذا مازن؛ كان يركب في الصباح؛ على حقيبتي صورة أميرة؛ هاني يحب أفلام الحركة؛ هذه أنا أكتب الحروف؛ هذا شادي يشاهد التلفاز؛ هذه عبير تشرب العصير
- using simple sentence structures, familiar vocabulary and supporting resources to describe immediate environment, family members and friends, and discussing relationships and personal information relating to own background and experiences, for example,
وليد عنده ثلاث أخوات وأخ صغير؛ يسكن وليد في منطقة ريفية في بيت كبير مع عائلته؛ جاء وليد من مصر عندما كان عمره أربع سنوات؛ يحب وليد بيته وعائلته كثيراً
- creating a class book, visual/digital display or collection related to a school excursion or camp
- presenting information in spoken or written form about own and peers' leisure activities, describing experiences and expressing feelings, for example,
ألعب كرة القدم جيداً؛ أسبح بمهارة؛ أقرأ بطلاقة؛ ألعب الألعاب الإلكترونية كثيراً؛ سميح يلعب التنس
عندما أعزف الموسيقى أشعر بالفرح؛ بالحزن؛ بالملل؛ بالنشاط؛ بالسعادة؛ أحب الرسم

Creating

Elaborations

Participate in imaginative experience by listening to, viewing and reading texts, such as songs, cartoons, folk tales and other stories, and sharing opinions, ideas and responses relating to characters, settings and events

[Key concepts: imagination, plot, tradition, character, message; Key processes: identifying, relating, describing]

(ACLARC006)

- participating in shared reading of imaginative texts, sharing opinions and responding to questions
- responding to imaginative texts such as stories, rhymes and songs through play-acting, or using illustrations, captions and movement, or miming favourite characters
- listening to, reading and viewing a range of texts in print, digital and oral formats, and participating in guided discussion, for example, by responding to questions about characters, ideas and events
- discussing imaginative texts and making short statements about aspects such as characters, settings or events
- listening to and viewing imaginative texts such as folk tales and fables and sharing opinions or feelings about them using expressions such as

أحبّ قصة علاء الدين لأنها مسلية؛ قصة علاء الدين مملّة لأنها قديمة

- describing characters, events or contexts in different types of imaginative texts such as films and cartoons, and listing words or expressions associated with a character's personality and explaining how they can relate to them, for example,

أنا أحبّ دور الولد في الفيلم لأنه شقيّ مثلي؛ البنت غيورة جداً؛ الأب في الفيلم حنون مثل أبي

- comparing favourite characters or events in imaginative texts such as cartoons, stories or digital games using expressions such as

البنت في القصة أفضل من أخيها لأنها صديقة ولا تكذب؛ عادل صديق مخلص أكثر من سمير

Create and adapt texts with imaginary scenarios, characters and events, using modelled language and different modes of presentation

[Key concepts: imagination, genre, performance; Key processes: creating, experimenting, presenting]

(ACLARC007)

- creating own version of a story by sequencing a series of pictures with captions or by creating a storyboard with labels using modelled language, for example,

استيقظ سامر صباحاً؛ غسل وجهه؛ بعدها ذهب إلى...؛ في طريقه شاهد ... في النهاية عاد إلى ...

- creating and presenting own story in digital form based on imaginary scenarios, using familiar contexts and modelled language, for example,

في يوم من الأيام؛ كان هناك...؛ كان يوجد مرة..

- producing and presenting picture/digital books or short plays or animations that use familiar Arabic words and expressions
- creating and performing alternative versions or endings of known stories, using voice, rhythm and gestures to animate characters
- creating and performing alternative versions of known songs or raps by creating new lyrics and using new voices to convey mood
- composing, performing or filming texts for own and others' enjoyment and interest, for example, a description of an imaginary character or animal, a commercial for a new product, a short film, or a poster advertising an event

Translating

Elaborations

Translate and interpret short spoken and written texts, such as dialogues, speeches, labels, signs and messages, from Arabic into English and vice versa, using contextual cues and textual features, and recognising aspects that are similar or different in each language

[Key concepts: equivalence, difference, context; Key processes: translating, interpreting, comparing, explaining]

(ACLARC008)

- demonstrating and explaining hand gestures and facial expressions that can be used without language to convey meaning
- using a picture or digital dictionary to find the meanings of words and expressions used in class, comparing English and Arabic versions of each word
- comparing Arabic expressions used in everyday interactions such as greetings with equivalent English expressions, identifying differences and similarities that reflect cultural associations or nuances, for example, مرحباً؛ كيف حالك؟ السلام عليكم؛ سلام ونعمة؛ صباح الخير؛ صباح النور
- interpreting Arabic expressions in dialogues and speeches and discussing how these expressions reflect aspects of Arabic language and culture, for example, لا؛ حقاً؟ يا إلهي! كلامك عجيب! لا لا قل لي الحقيقة؛ صدقتي يا سامي!؛ مع السلامة؛ الله معك؛ الرب معك
- translating texts such as labels, public signs and messages from Arabic into English and vice versa to identify differences in elements of language structure and vocabulary use, for example, 'no parking', 'no dogs', 'no-smoking zone', 'insert card'
- creating Arabic versions of school signs, notices, timetables and class rules, and considering why some words and expressions require flexibility in translation, for example, 'the oval', 'the office', 'the canteen', 'out of bounds', 'no hat, no play'

Create bilingual texts such as posters, games and signs for the classroom and school community, making decisions about words and expressions that do not readily translate

[Key concepts: bilingualism, audience, meaning; Key processes: translating, reasoning, explaining]

(ACLARC009)

- creating a digital bilingual dictionary for classroom use
- making bilingual greeting cards for family celebrations such as Mother's Day, using greetings in Arabic alongside English ones, for example, عيد أم سعيد؛ عيد أم مبارك؛ كل عام وأنت بخير؛ كل عام وأنت بألف خير؛ دمت لي سالمة
- creating captions in Arabic and in English for a display of a class event or experience such as a sports day or school concert
- producing a parallel bilingual word list by relating known Arabic words or expressions to English equivalents and vice versa, noticing that direct translation is sometimes inappropriate
- designing bilingual texts such as posters or signs for class or school assembly performances, a sports carnival, displays or events
- creating parallel lists of informal Arabic and English expressions for own use in everyday interactions with friends and family, including expressions drawn from various Arabic dialects represented within the classroom, for example, 'see you later', 'no worries'
- composing bilingual texts such as a board game or an instruction manual for a game

Reflecting	Elaborations
<p>Reflect on personal responses and reactions during interactions in Arabic, recognising how interaction involves culture as well as language</p> <p>[Key concepts: intercultural exchange, language, culture, response; Key processes: identifying, reflecting, explaining]</p> <p>(ACLARC010)</p> 	<ul style="list-style-type: none"> discussing their own level of comfort with using particular gestures when interacting across cultures, for example, making or not making eye contact when communicating with older people, kissing on the cheek, and hugging or not hugging when greeting someone sharing with peers how it feels to use Arabic and English in different contexts, for example, at home, at school and in the Arabic-speaking community, reflecting on instances when these interactions have felt comfortable, awkward or difficult and explaining why this might be the case developing language to describe personal reactions to and feelings about intercultural experiences, for example, أشعر بالراحة عندما...؛ لا أشعر بالراحة عندما...؛ أشعر بالخجل حين...؛ أشعر بالحزن...؛ أشعر بالتعب... noticing how their Arabic/Lebanese/Egyptian/Iraqi culture influences their linguistic choices, for example, changing terms of address and level of formality depending on the context of interaction and the relationship between participants, such as the use of 'عم؛ خالة' or title plus first name, for example, سيدة هناء؛ عم كريم؛ إستاذ هاني, when addressing people formally discussing how language reflects cultural concepts and values, for example, the importance of seeking agreement and compromise as reflected in the way Arabic people express disagreement (بالرغم من إحترامي لك؛ (لا اتفق معك), the importance of respect as seen in the way Arabic people greet each other or when showing emotion by hugging and tapping on shoulders
<p>Reflect on own identity, including aspects that relate to personal observations, experiences and feelings, and recognise how elements of identity such as family background, school and interests impact on intercultural exchange</p> <p>[Key concepts: self, profile, identity; Key processes: recognising, relating, discussing]</p> <p>(ACLARC011)</p> 	<ul style="list-style-type: none"> mapping their own linguistic and cultural profiles, for example, by creating a timeline or web profile to highlight formative elements such as family languages, traditions and beliefs, key relationships and intercultural experiences identifying events, relationships and experiences that have contributed to building a personal and/or collective sense of identity, for example, مكان الولادة؛ جنسية الأهل؛ أسس القيم التي تربي عليها؛ المجموعات أو الفرق التي ينتمي إليها مثل فريق كرة القدم؛ فرقة الرقص؛ فريق التمثيل المدرسي؛ فريق المناظرات identifying aspects of personal identity such as age, gender and social status that are important when interacting in Arabic, for example, using the correct personal pronouns to address elderly people (أنت/أنت)، shaking or not shaking hands depending on gender, and the number of kisses on the cheek comparing cultural and intercultural experiences and language capabilities with peers, and exchanging views on the benefits of being bilingual

Understanding

Systems of language	Elaborations
<p>Understand features of the Arabic sound system, including intonation and pronunciation, and how these are represented in written form, and apply writing conventions to form letters, words and texts</p> <p>[Key concepts: alphabetical systems, writing conventions, sound and letter differentiation; Key processes: distinguishing, relating, applying]</p> <p>(ACLARU012)</p> 	<ul style="list-style-type: none"> exploring the Arabic alphabet and script, noticing that sounds differ in both systems, for example, ح؛ ط؛ ظ؛ ع؛ خ؛ ط؛ ع؛ غ؛ ص؛ ض؛ ق باب؛ خال؛ حال؛ هذا؛ هي؛ discriminating between simple vowels, for example, ت؛ ث؛ long vowels such as تو؛ تي؛ تاء؛ and consonant letters in a syllable block recognising that letters change form depending on their place in the word, for example, ج؛ حصان؛ محب؛ سامح؛ ي؛ يد؛ لين؛ سامي inferring from familiar sounds and contexts how to spell new words, for example, predicting how to spell هادي؛ فادي having learnt how to spell فادي؛ شادي noticing that vocalisation such as َ؛ ُ؛ ِ may change the function of the word depending on where it is placed, for example, كُتِبَ؛ كُتِبَ؛ لَعِبَ؛ لَعِبَ comparing the different ways to write the letter (أ), for example, أ؛ إ؛ ؤ؛ ة؛ ء؛ pronouncing words following basic pronunciation rules recognising the different ways of sounding the long vowel (إ), for example, نداء؛ ندَى؛ لَذَا؛ لَذَى؛ مَتَى؛ مَتَى (أ), for example, قراءة؛ مسؤول, recognising variations in forms of spoken Arabic associated with particular regions, such as the pronunciation of رز and ميكر in the Levant compared with سُكْر and رُز in other Arabic-speaking regions

Understand and use aspects of key grammatical forms and structures in spoken and written texts, such as articles, nouns, adjectives, personal pronouns, verbs and verb tenses, conjunctions, adverbs, statements, negation and questions, and use vocabulary that relates to familiar environments and activities

[Key concepts: grammar, syntactic relationship; Key processes: understanding, applying, comparing]

(ACLARU013)

- learning frequently used words related to the home and school environment, for example,
بيت؛ عائلة؛ أب؛ أم؛ إخوة؛ معلمة؛ مدرسة؛ حصّة؛ صف؛ كتاب؛ دراسة؛
فرصة؛ وقت فراغ؛ أيام الأسبوع
- understanding the effect of word order in phrases and sentences, for example,
الجملة الفعلية: كتب الولد القصة؛ جاءت البنّت إلى المدرسة؛ يعمل أبي في المطار
- recognising the different parts of speech and categorising words into groups, for example, الاسم؛ الفعل؛ الصّفة؛ الحرف
- recognising definite and indefinite articles with nouns and knowing that nouns have a gender, for example, تلميذ/ التلميذ؛ مُعلّمة العلوم؛ المعلّمة
- understanding that adjectives have a gender and that they follow the noun and its gender, for example, الأب حنون؛ الأم جميلة؛ الكرسي كبير؛ الطاولة صغيرة
- describing aspects of own daily activities, using simple present tense verbs, for example, استيقظ في الصباح؛ تناول الفطور؛ استقلّ الباص؛ أدخل الصف؛ أكمل الواجب؛ أليس ثيابي
- understanding and using simple verbs to express likes and dislikes, for example, أحب طعام أمي؛ لا أحب الأكل السريع؛ أحب الرياضة ولا أحب الرسم
- using demonstrative pronouns to identify people, objects or animals, for example, هذا كتاب؛ هذه مسطرة
- using singular possessive pronouns, for example, بيتي؛ سريري؛ معلّمتي؛ غرفتك؛ كتابك؛ حقّبتّها؛ دفتره
- using singular personal pronouns, both masculine and feminine, with appropriate simple present tense verbs to describe aspects of home or school life, for example, تحبّ أمي العمل؛ هي نشيطة؛ يحبّ أبي الطبخ؛ هو ماهر
- understanding and responding to basic familiar instructions using imperatives, for example, افتح الباب؛ اجلس؛ في مكانك؛ لا تتكلم دون إذن؛ نظّف غرفتك؛ اكمل عمالك
- exploring the use of simple conjunctions such as أو؛ أيضاً؛ كذلك
- using adverbs of place and time to expand expression, for example,
بأكرأ؛ صباحاً؛ بعيداً؛ قريباً؛ شرقاً؛ غرباً
- understanding and using singular nouns and regular plural noun endings in masculine and feminine forms, for example, معلم/معلمون؛ معلّمة/معلّمات
- expressing negation in simple sentences, for example, لا أحب السفر؛ ليس لدي إخوة
- using a range of adjectives in singular form to describe appearance, feelings and personalities, for example,
أمي طويلة وأبي وسيم؛ صديقي سعيد ومعلّمتي حزينة؛ أخي طريف وأختي مزعجة
- using past tense verbs to recount events related to home and school contexts, for example,

قدمت فرضي للمعلمة؛ تأخرت عن الدرس؛ نمت متأخراً؛ نسيت كتيبي في البيت

- understanding and using simple question words in their interactions with peers, for example,
متى أتيت إلى البيت؟ من أعد لك الفطور؟ ماذا احضرت للغداء؟ كيف أتيت إلى المدرسة؟
- developing knowledge of cardinal and ordinal numbers to describe time and date, for example, (أذار) الساعة الواحدة،
ظهراً؛ اليوم السادس من إبريل (نيسان)/اليوم أربعة مارس
- applying rules of present tense verb conjugation when speaking to peers and the teacher, for example,
أنت تدرس كثيراً؛ أنت تلعبين مع غيري؛ أنتم تلاميذ مجتهدون
- building metalanguage to describe grammatical concepts and develop learning resources, for example, verb charts, vocabulary lists, and groups of pronouns, adverbs or adjectives

Identify the structure and textual features of a range of personal, informative and imaginative texts, and recognise how these contribute to meaning

[Key concepts: meaning, genre, structure; Key processes: identifying, sequencing, organising]

(ACLARU014)

- understanding that texts in Arabic can be short or long, spoken, written, digital, visual or multimodal, for example, labels, stories, signs, songs and captions
- understanding that texts have a purpose, for example, train timetables indicate the time the train arrives or departs the station, recounts describe past events and experiences, greeting cards convey feelings, and labels tell us information about an item
- recognising how elements of texts such as the title, layout and the size of the script all combine to make meaning
- identifying and comparing the features of different types of texts, observing similar patterns and identifying differences, for example, the opening and the signature of an email and a letter, a description in a recount and in a diary entry
- identifying the purpose, context and audience of a range of familiar texts, for example, songs, poems, short plays and video clips
- comparing texts on a common topic, for example, a print report, a television report and an internet announcement about an accident, and discussing how features of texts assist in making meaning
- describing key features of different types of texts and discussing audience and purpose, for example, a shopping list serves as a reminder to self to purchase particular items, while a permission note seeks permission to do or have something
- analysing how different types of texts in Arabic create specific effects through the use of different language features, for example, the use of superlatives in advertisements designed to persuade, or the use of repetition for emphasis in speeches

Language variation and change

Elaborations

Understand that spoken and written Arabic varies according to regions and countries, and according to context, situations and relationships

[Key concepts: variation, dialect, context; Key processes: identifying, distinguishing, relating, analysing]

(ACLARU015)

- recognising that forms of address and greetings may vary according to the time of day, gender, a person's background and the social status of the participants, for example,

مرحباً؛ أهلاً؛ صباح الخير / مساء الخير؛ سلام ونعمة؛ السلام عليكم ورحمة الله وبركاته؛ سلام الرب معك

سيد أمين؛ الأنسة هالة؛ الأستاذ فارس

- recognising that informal forms of address are commonly used and are accepted as the norm in various Arabic-speaking communities, for example,

عم جوزيف؛ عمّة سناء؛ خالة عبير؛ ست صباح؛ عم سليم

- identifying how they communicate with their family and friends and with people less close to them, noticing differences in word choice and language use and communicative behaviour
- explaining how their spoken language at home may differ from the language spoken in class, and recognising similarities and differences between various dialects represented within the classroom
- understanding that the Arabic language has a standard form called Al Fusha, اللغة العربية الفصحى, which is mainly used in writing, and a range of oral dialects that differ greatly from region to region, for example, regional dialects from Lebanon, Palestine, Morocco, Iraq, Egypt
- understanding how gestures and tone are used to change the meaning of speech, and how the purpose of interactions, such as to command or invite, would change the emphasis on words being used, for example,

زينب؛ تعالي! تعالي! يا زينب. ضع الكتاب على الطاولة؛ الكتاب؛ ضعه على الطاولة الآن!

Understand that the Arabic language has changed and continues to change through interaction with other languages and cultures

[Key concepts: change, language contact, intercultural contact; Key processes: observing, identifying, classifying]

(ACLARU016)

- recognising that Arabic has borrowed many words from English, for example, إنترنت; كومبيوتر; تلفاز, and English has borrowed words from Arabic, such as 'admiral', 'alcohol', 'algebra', 'coffee', 'genie', 'hazard' and 'sultan'
- recognising that Arabic as a language has experienced many changes over time and that classical Arabic is only used in ancient literature and religious texts
- understanding that Arabic, like all languages, is constantly expanding to include new words and expressions through interaction with other languages and cultures, for example, التواصل الاجتماعي; دردشة على الإنترنت,
- recognising that the Arabic alphabet has similarities with the Aramaic alphabet system (alpha being the first letter, and beta the second), and that the Arabic ordering system أ، ب، ج، د is based on the Aramaic alphabet
- recognising that many words in Arabic are borrowed from indigenous languages of the Arabic-speaking world such as Aramaic, for example, أب، رأس، دم، أخ، أخت، شمس، لسان، أنا، and that many colloquial words, for example, بوظة، دولاب، دولمة، بسطرمة, are borrowed from regional languages such as Persian and Turkish

Role of language and culture

Explore how language use reflects one's thoughts, perceptions and culture, recognising that language and culture are interrelated systems for meaning-making

[Key concepts: perception, influence; Key processes: reflecting, discussing, questioning, making meaning]

(ACLARU017)

Elaborations

- exploring the meaning of 'culture', and understanding that it involves visible elements, such as ways of eating and behaving, and invisible aspects, such as how people live, what they value and how they think of themselves and others
- noticing similarities and differences between naming systems across languages represented in the classroom, and noticing that Arabic-speaking students may have names from other cultures and languages
- understanding that particular Australian-English terms and expressions have no equivalent in Arabic, for example, 'billabong' and 'the bush', and that terms such as 'the movies', 'footy' and 'backyard' reflect aspects of Australian lifestyles
- recognising and explaining to others the significance of some common Arabic cultural practices and events, such as offering visitors food and drink, for example, تفضل صحة وهنا؛ بالهناء والشفاء
- exploring the importance of music and traditional dance in some Arabic cultures as an expression of identity and emotions, for example, الدبكة الفلسطينية والعراقية؛ والرقص الفلكلوري
- exploring words or expressions commonly used in informal Australian interactions, and deciding how to interpret or explain them to young Arabic speakers, for example, 'mate', 'fair dinkum'

Years 7 and 8 Achievement Standard

By the end of Year 8, students use written and spoken Arabic to exchange information about their personal worlds and to express feelings, likes and dislikes. They use formulaic language for a range of classroom functions and processes, such as asking and responding to questions, following instructions, requesting repetition and asking for permission and assistance, for example, متى أكملت البحث؟ من ساعدك في إكمال الواجب المدرسي؟ هل يمكن أن تعيد السؤال؟ لو سمحت؛ ممكن أن أستخدم الهاتف؟ من فضلك ممكن أن تساعدني في حمل صندوق الكتب؟. Students use rehearsed and some spontaneous language to engage in planning, transacting, making arrangements and negotiating. They apply features of pronunciation and rhythm in spoken Arabic to a range of sentence types. They locate, classify and sequence key points of information from a range of sources and communicate information and ideas related to home, school, leisure and interests using different modes of presentation. They share their responses to different imaginative texts by expressing feelings and ideas about the ways in which characters, settings and events are represented. Students use modelled language to create imaginative texts or alternative versions of texts they have listened to, read or viewed. They use key grammatical forms and structures in spoken and written texts, such as articles, nouns, adjectives, personal pronouns, verbs and verb tenses, conjunctions, adverbs (for example, ال التعريف البيت؛ المدرسة؛ الدراسة؛ العائلة؛ المواد الدراسية؛ الهوايات كبير/كبيرة؛ طويل/طويلة؛ ممتع/ممتعة؛ مفيد/مفيدة؛ مدرستي كبيرة؛ عائلتي صغيرة؛ بيتي واسع؛ شارعنا ضيق؛ أنت؛ أنت؛ أنتم؛ هو؛ هي؛ هم؛ أذهب إلى المدرسة؛ نذهب إلى السينما؛ ذهبت إلى السينما؛ ذهبن إلى زيارة الأقارب و؛ أو؛ كذلك؛ أيضاً؛ لأنّ يومياً؛ غالباً؛ أحياناً؛ بكيت بشدة؛ تكلمت بحماس؛ إستيقضت متأخراً؛ وصلت إلى المسرح باكراً لا أستطيع أن أكمل البحث؛ لم أستطع أن أجيب على جميع أسئلة الإمتحان أين نتمرّن لكرة القدم؟). They apply writing conventions to written texts, such as متى تلعب الرياضة؟ ما هي مادتك المفضلة؟ كم شخص يوجد في عائلتك؟ إستخدام العنوان؛ الفقرات؛ الفواصل؛ أدوات الترقيم؛ التوقيع في خاتمة الرسالة. They use contextual cues and textual features to translate and interpret everyday texts from Arabic into English and vice versa, and identify similarities and differences in translation. They create texts in Arabic and English, identifying words and expressions that do not readily translate, such as باللهناء والشفاء؛ والله ولي التوفيق. They compare ways of communicating in Arabic and English and explain how their own biography influences their cultural identity and ways of communicating.

Students identify and apply the writing conventions of the Arabic alphabet and script, making connections between spoken and written Arabic in texts. They identify the structure and features of different personal, informative and imaginative texts and provide simple explanations as to how these elements contribute to meaning. They identify ways in which spoken Arabic varies according to regions and countries, and provide examples of how Arabic has changed over time due to influences from other languages and cultures. Students identify how written Arabic varies in style and in the use of formal and informal forms, for example, أنت/حضرتك/حضرتكم, according to context, situation and the relationship between participants. They identify ways in which language use reflects cultural ideas, thoughts and perceptions.

Years 9 and 10

The nature of the learners

Learners increasingly communicate in Arabic in everyday interactions and in domains beyond the home. They continue to be immersed in Arabic language and culture, making connections and comparisons with other languages and cultures. They have a growing awareness of the wider world, including the diversity of languages, cultures and forms of intercultural communication. They begin to consider their role as bilingual, intercultural communicators in the Australian context. They are considering future pathways and prospects, including how Arabic may feature in these.

Arabic language learning and use

This is a period of language exploration, vocabulary expansion, and experimentation with different modes of communication. Learners use Arabic to communicate and interact, exchange information, express and justify opinions (أريد ركوب العجلة ولكن ليس), and plan, negotiate and solve problems in shared tasks and transactions (ماذا لو نذهب في عطلة المدرسة؟). They access and evaluate information from a range of sources, and present ideas and views from a range of perspectives in different formats and contexts and for particular audiences. They use their imagination to create a range of texts, such as stories, plays and video clips, about past events and experiences and future possibilities, using a range of techniques to entertain different audiences. There is a balance between activities that focus on language forms and structures and those that emphasise communicative tasks and performance. Learners recognise that moving between Arabic and English involves interpretation and personal response as well as literal translation and factual reporting. Task characteristics and conditions at this level are more complex and challenging, providing opportunities for collaborative as well as independent language planning and performance, and development and strategic use of language and cultural resources. Learners discuss the relationship between language, culture and identity, exploring in more depth the concept of being bilingual and bicultural.

Contexts of interaction

Greater control of language structures and systems increases confidence and interest in communicating in a wider range of contexts beyond the home. Contexts of interaction in Arabic move beyond the immediate world of teenage experience to more active participation in the local community, for example, by engaging in local community events or celebrations. Learners participate in discussions and presentations on topics of interest and on life experiences in different contexts and cultures, and view television programs, documentaries, music performances and films to further explore Arabic language and culture. Additional opportunities for interaction are provided by purposeful and integrated use of information and communications technologies (ICT), for example, videoconferencing and e-learning.

Texts and resources

Learners read, view and interact with a broad range of texts and resources specifically designed for learning Arabic in school contexts, such as textbooks, readers, videos and online materials, including those developed for computer-supported collaborative learning. They also access authentic materials created for Arabic-speaking communities, such as films, literature, websites and magazines. They use a range of dictionaries and translation methods to support comprehension, build vocabulary and elaborate on ideas.

Features of Arabic language use

Learners use appropriate pronunciation, rhythm and intonation in communication and interaction, and apply accurate spelling and punctuation in a range of written texts. They gain greater control of grammatical elements, such as word order, a range of tenses, conditional and subjunctive moods, embedded clauses, imperative forms, and vocative case, to elaborate on ideas and information relating to people and events (أخي يلعب كثيراً لكن أختي تدرس دائماً), discuss future plans and aspirations (سوف أذهب إلى), express doubt, uncertainty or emotion (ربما نذهب إلى السينما يوم السبت), and link and extend ideas and information (أخيراً). They analyse text more critically, identifying how language choices reflect perspectives and meaning in a range of texts, and developing their understanding of the relationship between context, purpose and audience. They demonstrate understanding of language variation and change, and of how intercultural experience, technology, popular culture, migration and globalisation influence forms of communication.

Level of support

This stage of learning involves consolidation and progression. Learners need opportunities for new challenges and more independent learning experiences. Continued scaffolding, modelling and monitoring are required to support these challenges. A range of resources is provided and processes modelled for the development of more autonomous self-monitoring and reflecting strategies, such as online journalling, video documenting and discussion forums. Continued focused attention on grammatical and textual features supports learners in the production of texts.

The role of English

The classroom is increasingly characterised by bilinguality, with Arabic being the principal language of communication. English continues to be used as the medium for substantive discussion, comparison, analysis and reflection, although learners at this level are able to discuss some abstract and complex views and ideas on language, culture and intercultural experience in Arabic. They explore the interrelationship between language, culture and identity, and reflect in more depth on the concept of being bilingual. They discuss the influence of Arabic and English on their ways of communicating, thinking and behaving, how living and moving between cultures has impacted on their own bilingual identity, and how successful communication requires flexibility, awareness and openness to alternative ways.

Years 9 and 10 Content Descriptions

Communicating	
Socialising	Elaborations

Initiate and sustain interactions to develop relationships with peers and adults, exchanging ideas, opinions and feelings, comparing experiences and discussing future plans
[Key concepts: relationships, opinion, experiences, future;
Key processes: exchanging, comparing, discussing]

(ACLARC018)

- initiating and sustaining conversations on topics of interest by using expressions such as
هل تحب المأكولات العربية؟ ما هي أكلتك المفضلة؟ أنا أيضاً أحب الوجبات السريعة؛ هل تريد أن تأتي معي إلى الحديقة بعد المدرسة؟
أمي طبخة ماهرة. تعال إلى بيتنا يوم السبت. هل تحب الذهاب معنا إلى المنتزه/ الحديقة؟
أنا آسف؛ أمي لا تسمح لي. أعذر ليس لدي وقت؛ سوف أسأل أبي. نعم؛ طبعاً؛ سوف أتصل بأمي أولاً.
هل شاهدت مباراة كرة القدم أمس؟ برأيك من سيفوز بالكأس؟ من هو لاعب المفضل؟ هل نزلت اللعبة الإلكترونية إلى الأسواق؟ إنها لعبة ممتعة. هل أكملت واجب المدرسة؟ أحتاج إلى مساعدة؛ إن الواجب صعب
- exchanging information and opinions on a range of topics such as home, school, leisure and travelling, for example,
هل تحب المنطقة التي تسكن فيها؟ لماذا؟ منطقتي جميلة وشارع بيتي هادئ؛ أبي يريد أن يشتري بيتاً جديداً وأنا لا أريد أن أترك بيتنا؛ أنا أحب بيتنا كثيراً؛ أريد ركوب الدراجة ولكن ليس عندي خوذة. ما رأيك بلعبة كرة القدم؟ أنا أحب القراءة كثيراً؛ وأنت؟
- expressing wishes and feelings, and describing personal plans for school holidays or weekend, for example,
في عطلة نهاية الأسبوع أحب أن أذهب إلى البحر؛ لأن الطقس سيكون حاراً؛ أتمنى أن نسافر في العطلة المدرسية. أنا سعيد لأننا سوف نسافر في العطلة؛ في عطلة المدرسة سوف ألعب التنس كل يوم؛ يوم السبت القادم سأذهب إلى السينما مع إخوتي؛ يوم الأحد القادم سأذهب إلى السوق مع أمي لأشتري حذاءً جديداً للرياضة.
- elaborating on others' responses by providing suggestions and giving advice, for example,
بما أنك تحب الرياضة، أنصحك بالسباحة لأنها مفيدة جداً؛ لماذا لا تقرأ هذا الكتاب؟ جرب هذا القلم الجديد. ضع الصورة هنا؛ هذا مكان مناسب لها
- comparing own and others' experiences and future aspirations by sharing ideas and making suggestions, for example,
أنا أيضاً مثلك أحب السباحة؛ أمي أيضاً لا تسمح لي باللعب على الحاسوب أيام الأسبوع؛ إذا أردت سأرسل لك رسالة إلكترونية فيها كل شيء؛ أتمنى أن ألتحق بفريق التنس؛ أتمنى أن أتعلم الموسيقى

Participate in collaborative projects, providing ideas and suggestions, negotiating and justifying options, solving problems and completing transactions

[Key concepts: participation, contribution, prioritisation; Key processes: suggesting, justifying, discussing, negotiating, transacting]

(ACLARC019)

- expressing preferences for plans, comparing and contrasting alternatives using

أفضل من...؛ الأفضل...؛ الأحسن...

أفضل ان نشترى هذه اللعبة لأنها حديثة؛ لا أتفق معكم على الذهاب إلى السينما في المساء؛ ماذا لو نذهب في عطلة نهاية الأسبوع؟ في المساء تكون السينما مزدحمة أما أثناء النهار فتكون هادئة. سأتصل بك في عطلة نهاية الأسبوع؛ هذا أفضل من أيام الأسبوع.

- making suggestions, such as when arranging a day out or a birthday party, for example,

هل تحب أن نذهب إلى البولنغ يوم السبت؟ أبي سوف يوصلني إلى هناك الساعة العاشرة صباحاً؛ هناك نلتقي؛ نلتقي بعد المدرسة؛ حفل عيد ميلاد قيس يوم الأحد. سأني لأخذك معي إلى بيته. الحفلة ستبدأ الساعة السادسة

- responding to invitations by accepting or declining and providing explanations, for example,

شكراً جزيلاً على الدعوة؛ سأحضر الحفلة. أسف لا أقدر أن آتي إلى السينما لأن أمي لا تسمح. أنا مدعوة لحفل زواج ابن عمتي ولا أقدر أن آتي معكم إلى البولنغ

- collaborating with peers to organise class displays and events, such as an Arabic music day, and agreeing or disagreeing with suggestions, for example, أنت فكرة رائعة؛ عيقرى

- completing tasks involving authentic or simulated transactions, such as asking for, giving and following directions to real locations, for example,

كيف أذهب إلى محطة القطر؟ أين البنك؟ أرجوك أرشدني إلى المكتبة

- discussing problems, such as a disagreement with parents, sibling or classmate over having to share a room or computer, or a complaint about unsatisfactory goods or services, and suggesting solutions

Contribute to structured discussions and tasks by asking and responding to questions, clarifying understanding, elaborating on opinions and expressing agreement or disagreement
[Key concepts: discussion, opinion; Key processes: discussing, clarifying, expressing]

(ACLARC020)

- initiating and sustaining discussions by inviting peers to make suggestions, clarifying meaning and giving examples, expressing agreement or disagreement, and praising, complimenting and encouraging others and their ideas, for example,

ماذا نقترح؟ ما رأيك؛ سامي أعطنا رأيك؛ كيف يمكن أن ننظم الأدوار بيننا؟ ما رأيكم؟

أقصد أن كل واحد منا يكتب صفحة؛ قصدي؛ أنا وهؤلاء نبحث عن الصور؛ وعادل ووفاء وسمر يكتبون المقاطع

مثلاً؛ مثل؛ على سبيل المثال

أتفق معك جداً؛ اتفق على ما تقول؛ أنا أحترم رأيك كثيراً

لا أتفق معك إطلاقاً؛ لا أتفق معك في رأيك. أنا لا أوافقك الرأي

ممتاز! رائع! فكرة رائعة! واصل مجهودك. أنت ذكي جداً!

- expressing own opinions, and eliciting and reflecting on the opinions of others, for example,

لو كان لدينا وقتاً أطول؛ لوضعنا موسيقى في البحث؛ كان الإمتحان صعباً وطويلاً؛ أصبحت القراءة سهلة

ما رأيك في هذه الجملة؟ هل تتفق معي؟ هل توافقتني على كلامي؟ وأنت يا سعيد؛ ماذا تعتقد؟ سميرة؛ ما رأيك في الموضوع؟

كلامك صحيح مئة بالمئة؛ أنت على حق؛ كلامك ليس صحيحاً؛ أسفة لا أتفق معك

- explaining actions and responses, for example,

وضعت الصورة هنا لأنها صغيرة ومناسبة؛ تأخرت في الصباح كثيراً؛ أنا متعب اليوم لأنني نمت الساعة العاشرة ليلاً. إن ساعدتني في البحث، سنحصل على درجة عالية

- giving reasons and making connections between ideas and consequences, for example,

وصلت إلى المدرسة متأخراً لأن سيارتي أمتي تعطلت في الطريق؛ لم أكمل الدرس بالأمس لأن بيتنا كان مليئاً بالزوار؛ لم أكمل واجب العلوم لأنني لم أفهم السؤال

عاقبني الأستاذ في الفرصة لأنني تأخرت عن الصف؛ اتصلت المعلمة بأمي لأنني أتكلم كثيراً في الصف

Informing

Elaborations

Extract, organise and evaluate information and ideas from a range of texts, analysing meaning, gist and purpose
[Key concepts: meaning, purpose, audience; Key processes: extracting, organising, analysing]

(ACLARC021)

- identifying the context, purpose and target audience of texts such as advertisements, messages and announcements
- independently and collaboratively gathering information on events or people and comparing how various media sources, such as texts from magazines, newspapers and websites, use language to convey meaning
- using concept maps, charts and tables to organise, summarise and evaluate information from spoken, written and visual texts that reflect different aspects of Arabic culture related to topics such as entertainment and special occasions, for example,

حفلات المطربين؛ البرامج الترفيهية؛ برامج المسابقات

الأعياد الدينية المختلفة وطرق الإحتفال فيها؛ عيد الأم؛ عيد الأب؛ أعياد الميلاد الخاصة؛ مناسبات الخطوبة والزواج

- analysing and summarising information about famous personalities or a recent film or music hit from texts such as television programs, reports and documentaries, for example,
الأفلام العربية الحديثة؛ البرامج النقدية الساخرة؛ البرامج الحوارية؛ البرامج الوثائقية

- reading texts and extracting key points and ideas on an issue or topic, such as the weather or leisure activities for young people, and discussing information with peers using expressions such as

الطقس هذه الأيام بارد جداً؛ الصيف هذا العام سيكون حاراً

يحب الشباب رياضة كمال الأجسام ويذهبون إلى النادي الرياضي؛ تحب البنات رقص الزومبا؛ هل تحبين الرقص أيضاً؟

- analysing and comparing perspectives represented in spoken and written texts, for example,
الجريدة المحلية كتبت أن الأغاني العصرية تافهة ؛ ولكن الجميع يحبها

Convey ideas and viewpoints from a range of perspectives to various audiences in familiar contexts using different modes of presentation

[Key concepts: context, audience, perspective; Key processes: selecting, conveying, constructing, presenting]

(ACLARC022)

- informing others about an issue of interest and upcoming events in texts such as notices and newspaper announcements, for example,

إعلان هام؛ تحتفل الجالية العربية بعيد الأم في إحتفال كبير في الحديقة العامة يوم السبت القادم؛ الدكتورة ريم ستلقي محاضرة عن الشباب والمستقبل في الجامعة

- producing texts such as letters, emails and speeches to convey information and personal viewpoints on topics connected to personal experiences, for particular purposes and audiences
- organising information for an Arabic-speaking audience, for example, creating a presentation comparing different cultural perspectives on a particular topic or a video recording of a cooking demonstration
- reporting on own and others' experiences, such as holiday trips or school camp, and comparing own experiences with others' using expressions such as

بالنسبة لي الرحلة كانت ممتعة بينما أغلبية التلاميذ شعروا بالملل؛ بالرغم من الساعات الطويلة التي قضيناها في الطريق إلا أنني لم أشعر بالتعب لكن أصدقائي كانوا متعبين

- creating a video clip to present information or ideas to a particular audience, such as a virtual tour of the school or the neighbourhood for prospective students and their parents
- conveying information relating to significant events, people or places in different formats, such as a poster for a concert, a profile of a famous Arabic actor, or a digital guide to a place of interest
- creating a group presentation of ideas and words and expressions relating to aspects of lifestyle, for example,

الرياضة ضرورية للصحة؛ المأكولات السريعة وأضرارها؛ الألعاب الإلكترونية وتأثيرها السلبي على العائلة

Creating

Elaborations

Respond to imaginative texts such as poems and films, explaining messages and key ideas, stating views on themes, events and values, and making connections with own experiences

[Key concepts: genre, theme, values, connection; Key processes: comparing, explaining, analysing]

(ACLARC023)

- responding to ideas presented in various texts, such as poems, films, songs or video clips, by expressing personal opinions, for example,
الشعر جميل ؛ القصيدة مؤثرة؛ الفيلم غير واقعي؛ يعرض الفيلم مشاكل الشباب مع الأهل؛ الأغنية تعبر عن الصداقة
- stating and explaining personal preferences about characters, attitudes and events in texts, using expressions such as
أفضل شخصية في الفيلم هي سميرة لأنها تعرف ما تريد؛ يحاول الفيلم تشجيع الشباب على الدراسة وهذا ممتاز
- analysing how people, places and experiences are described in imaginative texts, and comparing how key messages and beliefs are communicated in a variety of texts, such as fables
- exchanging opinions about typical features and expressive elements of contemporary songs, films or video clips from the Arabic-speaking world and comparing them equivalent texts in English-speaking contexts
- identifying emotional aspects of texts and analysing elements of language that convey emotions and values
- reading texts such as biographies and critically reflecting on others' experiences and relating them to their own
- analysing and evaluating lyrics of contemporary Arabic songs, identifying themes, messages and cultural aspects
- discussing how social issues, for example, relationships, wealth and poverty and change, and values, such as honesty, are portrayed in imaginative texts such as films, songs and poems

Create imaginative texts in multimodal forms, including digital, that draw on past experiences or future possibilities, experimenting with different techniques

[Key concepts: culture, narrative, creativity; Key processes: creating, imagining, entertaining, relating]

(ACLARC024)

- creating imaginative texts in multimodal forms that include illustrations, such as cartoons or captioned photo stories
- composing and performing or filming imaginative texts such as role-plays, raps and video clips, using expressive language and movement
- creating alternative versions of traditional Arabic stories and films by introducing new characters and contexts and alternative endings
- expressing imagined experiences in a range of texts such as poems and video clips that relate to significant celebrations or events in both Australia and the Arabic-speaking world, for example,
عيد الأم؛ عيد الأناذك؛ العيد الوطني الأسترالي ؛ الأعياد الدينية مثل عيد الميلاد وعيد القيامة وعيد الفطر وعيد الأضحى

Translating

Elaborations

Translate and interpret texts from Arabic into English and vice versa, compare own translations and interpretations with others' and discuss reasons for differences

[Key concepts: representation, perspectives, interpretation; Key processes: translating, interpreting, comparing, critical and cultural understanding]

(ACLARC025)

- translating existing texts and experimenting with unfamiliar words or expressions, reflecting on challenges associated with transferring meaning from one language to another
- comparing one another's translations of the same text, commenting on differences and similarities between versions and considering possible reasons for these
- translating texts, identifying culture-specific vocabulary and expressions, such as *والله ولي التوفيق؛ تقبل فائق الإحترام*, discussing strategies for choosing words that best reflect the intended meaning and context
- paraphrasing English words or expressions that have no specific equivalent in Arabic, such as 'mufti day' or 'fundraiser', and annotating them in order to convey their intended meaning
- reflecting on the difficulty of achieving equivalence in translations of creative texts such as poems, songs and film clips, identifying words and phrases that require particular elaboration or explanation
- experimenting with interpreting in English popular expressions, proverbs or idioms in Arabic, and reflecting on the social and cultural values that may be embedded in them
- analysing existing translations of texts, such as film subtitles, comparing them with own translation, and reflecting on why translations may vary

Create bilingual texts for the wider community, such as notices, promotional material, instructions or announcements, interpreting cultural and linguistic aspects

[Key concepts: culture, interpretation, equivalence; Key processes: interpreting, composing, selecting, explaining]

(ACLARC026)

- creating subtitles, captions or commentaries for texts such as a brochure, slideshow presentation or video clip that informs the school community of aspects of different Arabic-speaking cultures
- producing texts in print or multimodal format in both Arabic and English relating to community events, such as a poster or advertisement to promote a concert, advertise an interview with a celebrity on a community radio station, or provide details of a debate on sustainability issues
- designing menus or programs for Arabic-themed events, with key items/information in Arabic and explanatory notes in English
- creating a short film of Arabic-language social interactions among different speakers of Arabic, providing English explanations of elements that may be different in different parts of the Arabic-speaking world and which may be unfamiliar to Australian viewers
- considering how to maintain the integrity of original texts when translating, for example, explaining culture-specific concepts such as 'the bush' or 'the outback', and representing ideas and meanings bilingually
- producing bilingual texts such as video clips with subtitles explaining Australian cultural practices for Arabic-speaking viewers, for example, bushwalking, Anzac Day commemorations, the Melbourne Cup

Reflecting	Elaborations
<p>Reflect on how conventions of speech and Arabic cultural concepts can influence own communication style when using both English and Arabic</p> <p>[Key concepts: cultural concept, norms, communication; Key processes: understanding, explaining, reflecting]</p> <p>(ACLARC027)</p> 	<ul style="list-style-type: none"> comparing the ways in which they communicate in Arabic and non-Arabic contexts, for example, using different forms of address or different ways of showing politeness, and discussing why these choices are appropriate and how they enhance intercultural communication reflecting on own language choices and communicative gestures in different cultural contexts, considering how own ways of behaving and communicating might be perceived by people from different backgrounds, and making necessary adjustments to establish, maintain and improve relationships with immediate contacts such as family, teacher and peers exploring the reciprocal nature of intercultural communication, the two-way process of noticing and responding to differences in perceptions, understandings and behaviours, for example, degrees of formality, politeness and directness, use of personal space, and attitudes towards physical contact identifying moments of embarrassment or communication breakdown in own intercultural interactions, exploring reasons for these and suggesting adjustments that could be made to enhance mutual understanding discussing elements of successful intercultural communication, for example, flexibility and awareness of differences in cultural and religious practices such as respect for elderly people and attitudes towards privacy or directness
<p>Reflect on own sense of identity as an Arabic and English speaker, recognising how own cultural assumptions, practices and values influence ways of communicating, and considering reactions and how they adjust behaviours and language in own interactions</p> <p>[Key concepts: assumptions, values, impact, judgement, adjustments; Key processes: reflecting, connecting interculturally]</p> <p>(ACLARC028)</p> 	<ul style="list-style-type: none"> discussing how being bilingual allows them to present 'self' to others in particular ways, for example, as being Lebanese, Jordanian, Iraqi, Arab Australian, or Australian from a Syrian background reflecting on the role of language in expressing identity, considering when, with whom and why different languages are used, and reflecting on whether their own identity changes when they use different languages noticing how they communicate with one another, their teachers and families, noticing how they see themselves differently in different contexts, for example, as Arabic-speaking person, less traditional than parents reflecting on choices made to present self to others in particular ways or to conceal aspects of identity when interacting across cultures, noticing differences in the way they communicate, think and behave in different contexts
Understanding	
Systems of language	Elaborations

Understand rules of pronunciation and intonation and writing conventions, and apply these to own constructions to enhance meaning and aesthetic effect

[Key concepts: sound and writing systems; Key processes: experimenting, speaking, writing, connecting, transposing]

(ACLARU029)

- distinguishing the pronunciation of (التنوين) and (الشدة)
 - using the rhythms of the Arabic language, including intonation, tone and stress, to increase fluency and enhance expression
 - recognising that certain letters in Arabic appear in different variations, for example, تة, ة
 - applying spacing rules between words and using their knowledge of writing conventions to expand on ideas in written texts
 - making choices in relation to the use of punctuation such as (؛) and adjusting the flow of ideas, increasing text cohesion and enhancing expression
 - recognising the need for pauses or changes of tone in complex sentences with embedded clauses
 - understanding that there are variations in both spoken and written Arabic across different countries and regions, and analysing the reasons for such variations, for example, سوريا/سورية؛ ناديا/نادية؛ فاديا/فادية
 - noticing how tone can convey emotions and shade meaning, such as distinguishing between colloquial or formal language, for example, يا إلهي! تعال إلى هنا حالا
 - using Arabic pronunciation and spelling rules when listening to and reading authentic texts, and evaluating their own spelling and pronunciation in relation to their understanding and expression
-

Expand spoken and written expression by extending grammatical knowledge of Arabic, including features such as conditional and subjunctive moods, embedded clauses, imperative, future tense and vocative case, and acquisition of vocabulary and expressions that are culturally embedded [Key concepts: grammatical structures, irregularity, expansion of ideas; Key processes: applying, analysing, selecting]

(ACLARU030)

- using سوف in addition to the present tense to express future plans, for example, سوف أذهب إلى الجامعة؛ سوف أسافر مع أهلي؛ سوف أشتري سيارة؛ سوف أعمل في مطعم
- using the conditional mood as a formulaic expression, for example, لو: لو نجحت، سوف يشتري لي أبي محمولا جديداً
- understanding and using the conjunctions لكن to compare people and actions, expanding on their expression, for example, خالي غني لكن عمي فقير؛ أخي يلعب كثيرا لكن أختي تدرس دائم
- using interrogative pronouns and expressions such as لماذا؟ لم؟ هل؟ to ask questions and make requests, for example, لماذا أحضرت الكرة معك إلى الصف؟ هل تقدر أن تعطيني القلم؟ لم تحب الموسيقى؟
- expanding their knowledge of noun–adjective agreement through understanding and applying the irregular plural form, for example, بيت/بيوت كبيرة؛ كرسي/كراسي جديدة؛ كتاب/كتب قيمة؛ يوم/أيام جميلة؛ تلميذ/تلاميذ مجتهدون؛ معلمون ملتزمون
- using expressions to indicate preference and compare, for example, هذا أقل من هذا؛ الكتاب أخف من الكرسي؛ العلوم أفضل من الرياضة
- creating compound and complex sentences by using embedded clauses such as (والذي أحبه كثيرا) ... هو
- understanding that Arabic uses the dual form of nouns, verbs and adjectives, in both masculine and feminine forms, for example, هذان كتابان جديدان؛ هاتان صديقتان وفيتان
- understanding and applying indirect object pronouns and passive voice to express ideas objectively in texts such as articles and speeches, for example, أنهيت المباراة سريعا؛ دُق الجرس متأخرا
- using cohesive devices to sequence ideas, for example, في البداية؛ بعد ذلك؛ أخيرا
- extending use of negative forms, for example, لن أتصل بك؛ لم أتأخر عن الدرس؛ ليس عندي وقت
- using إلا to express exceptions, for example, أحب كل المواد، إلا الرياضيات
- describing people and objects using comparatives and superlatives, for example، رسمك جميل؛ رسم سامي أجمل من رسمي؛ رسم عننان الأجمل
- using elements of exaggeration and emphasis, for example، للمرة المليون أكرر هذه العبارة
- using a range of irregular adjectives to describe number,

shape and colour, for example, قميص أحمر؛ حقيبة حمراء؛ قلم،
أخضر؛ ممحاة خضراء؛ شكل مدور؛ مثلث؛ مربع؛ مستطيل

- using singular and plural third person possessive pronouns to indicate relationships, for example, أصدقائهم، كتابه؛ قلمها؛
 - using adverbial phrases to expand on ideas and provide further information related to feelings, attitudes and abilities, for example, متأخراً؛ باكراً؛ دائماً؛ مسرعاً،
 - developing metalanguage to discuss grammatical features and to explain how word order, tenses and moods, adjectives and adverbs can be used to enhance meaning and expand expression
 - using imperative verb forms to persuade, encourage, and give advice, for example,
لنذهب إلى المعلم ونسأله؛ هيا حاول مرة ثانية؛ ممتاز! أحسنت؛ تكلم مع سامر
 - using subjunctive mood to express doubt, uncertainty or emotion, for example,
ربما نذهب إلى السينما يوم السبت ؛ قد أسافر في العطلة
-

Analyse different texts in a variety of forms, including digital, , considering the relationship between audience, purpose and context, and the use of textual conventions, features and cohesive devices

[Key concepts: genre, purpose, audience, cohesion; Key processes: analysing, explaining, comparing]

(ACLARU031)

- applying knowledge of particular types of texts and their purpose to identify the gist and predict the meaning of unfamiliar vocabulary and phrases encountered in texts
- analysing different samples of a particular type of text, such as online diary entries, to analyse ideas and reflections through the language features used, for example,

ضمير المتكلم: أشعر بسعادة كبيرة؛ هذا عملي وأنا مسؤول عنه

التعبير عن التعجب والدهشة: يا إلهي! مستحيل! يا للكارثة!

الصور البلاغية: كنت كالفراشة أطيّر من فرحتي؛ كلامه كالخنجر في صدري

- exploring a range of imaginative texts to compare the use of language features such as imagery and exaggeration, and discussing how these are used to convey meaning to and entertain the audience
- examining a variety of informative texts, such as reports and articles, identifying how the structure and features of each text reflect the intended purpose and how the choice of vocabulary reflects ideas and perspectives
- experimenting with language appropriate to particular types of texts, for example, descriptive language in documentaries, reflective language in blogs, diary or journal entries, and persuasive language in advertisements and speeches
- analysing a range of expository texts, such as feature articles, identifying possible elements of bias and objectivity
- discussing and evaluating how language is used to express ideas and justify opinions on topical issues of interest to teenagers in debates or on a talk show
- identifying and discussing the level of formality in spoken and written texts, considering what these texts reveal about social relationships and processes, for example, reflections of status, authority, concepts of respect and politeness

Language variation and change

Elaborations

Explore how spoken and written forms of Arabic can be used for different purposes and audiences, in different contexts and situations, and with specific meanings and intentions

[Key concepts: formality, register, intention; Key processes: analysing, explaining]

(ACLARU032)

- understanding the importance of using appropriate forms of address when interacting with different people, for example, the use of

سيد ماجد؛ أستاذ هاني؛ سيّدة عبير؛ خالتي رانيا؛ عمي حبيب حضرتك؛ عم كريم؛

خالّة سامية with both close adult relatives and unknown adults

adults

- noticing that variation in language use often reflects the mood, feelings, attitudes or relationships of the people involved
- identifying how emotions and attitudes, such as embarrassment or respect, and personal views are reflected in the choice of language in various social settings, such as public forums and school contexts
- investigating the nature and use of the Arabic language in different contexts of interaction, for example, asking Arabic-speaking students in Australia when they use English or Arabic, with whom and why
- exploring how various individual speakers' views on roles and relationships are reflected in Arabic texts such as traditional sayings, idioms, proverbs, poetry and song lyrics
- comparing a variety of texts from different Arabic-speaking regions and analysing how aspects of the language used reflect particular values and world views

Explore and reflect on how the Arabic language influences and is influenced by cultural, political and social change

[Key concepts: globalisation, popular culture; Key processes: reflecting, discussing, examining]

(ACLARU033)

- investigating and explaining the influence of globalisation and new technologies such as the internet on Arabic as a dynamic language, and the power and function of regional dialects in both digital and social media
- researching and reporting on the influence of Arabic language and culture in the local and broader Australian community, for example, the food industry (Lebanese restaurants and bakeries), the entertainment industry and the media (the Arab Film Festival, SBS Arabic radio and television, Arabic films) and education (Arabic bilingual schools)
- reflecting on changes in their own use of the Arabic language, identifying new terms and behaviours that they have adopted into their everyday language in response to changes in technology and social media
- discussing how language changes over time, for example, by viewing classical Arabic and contemporary films and comparing how certain messages and concepts are represented through language
- examining how English is influencing and modifying Arabic language use in particular settings, for example, language used in the entertainment industry, such as in films and television programs, or language used to express global concepts, such as الليبرالية

Role of language and culture

Elaborations

Understand the symbolic nature and influence of language in local and global contexts and how the use of language determines the nature of intercultural communication

[Key concepts: symbolism, globalisation, new terminology;

Key processes: exploring, reflecting, evaluating, understanding]

(ACLARU034)

- identifying and discussing how values or attitudes are differently reflected in Arabic and English, for example, attitudes to being on time reflected in language such as لا تستعجل، لن تهرب الحفلة؛ لا تهتم يوجد وقت كثير and social interactions such as expressing thanks or appreciation more or less directly, or attitudes to making an apology
- recognising that language and cultural practices are interconnected, for example, by identifying religious origins or connotations associated with places such as كربلاء، مكة المكرمة، أورشليم المقدسة؛ دير الزور or by identifying ways in which the residual influences of traditional lifestyles are preserved in language reflecting the sustainable use of resources

- identifying similarities and differences between own ways of communicating and interactions between young Arabic speakers in different contexts and situations, for example, the expression of politeness or turn-taking in conversations
- reflecting on personal encounters with cultural practices that have helped shape their attitudes towards and views of the world around them
- discussing and reflecting on how language use such as persuasive, motivational and emotive language, can effect changes in social attitudes and mobilise actions and reactions
- exploring a range of Arabic and English idioms and proverbs and analysing the cultural values and perspectives they reflect, for example,

الجار قبل الدار؛ من جدّ وجد ومن زرع حصد؛ الوقت من ذهب؛ في التأني السلامة وفي العجلة الندامة

Years 9 and 10 Achievement Standard

By the end of Year 10, students use written and spoken Arabic to initiate and sustain interactions with peers and adults. They use language spontaneously to exchange ideas, opinions and feelings, compare experiences and discuss future plans. They sustain interactions by asking and responding to questions, requesting clarification (for example, هل تعني...؟ ما قصدك؟), elaborating on opinions, and expressing agreement or disagreement, for example, على أتفق؟ لا أتفق؛ أعترض. In classroom interactions, they share ideas and suggestions, negotiate options, solve problems and complete transactions. They apply pronunciation and intonation rules to convey emotions and enhance expression. They obtain information from multiple sources on a range of issues and analyse and evaluate meaning, gist and purpose. They convey ideas and viewpoints from a range of perspectives using different text types and modes of presentation selected to suit different audiences and to achieve different purposes. They share their responses to different imaginative texts by expressing opinions on themes, events and values and explaining key ideas and messages. They manipulate language and use different techniques to produce imaginative texts in a range of forms that draw on past experiences or future possibilities, such as التلاعب بالألفاظ بواسطة استخدام المفردات ذات المعاني المزدوجة؛ استخدام عبارات مثل لو سمح أبي لي، أتني معك ما نذهب إلى السينما يوم (السيبت؛ قد أسافر في العطلة؛ الكتاب المفضل لدي والذي أحبه كثيراً هو... لنذهب إلى المعلم ونسأله؛ هيا حاول مرة ثانية؛ ممتاز! أحسنت؛ تكلم مع سامر سوف أكتب رسالة إلى), future tense and vocative case to convey meaning. They use vocabulary and expressions that are culturally embedded, such as لييتني كنت...؛ فرحت فرحاً عظيماً؛ لو ربحت المسابقة. When creating texts, students use a variety of grammatical elements, such as conditional and subjunctive moods, embedded clauses and imperative forms (for example, لو سمح أبي لي، أتني معك ما نذهب إلى السينما يوم), future tense and vocative case to convey meaning. They use vocabulary and expressions that are culturally embedded, such as سوف أكتب رسالة إلى, and apply appropriate writing conventions to increase text cohesion and enhance expression. Students translate and interpret texts from Arabic into English and vice versa, comparing own interpretations with others' and explaining reasons for differences in translations. Students create bilingual texts for the wider community, interpreting cultural and linguistic aspects of texts. They explain how cultural concepts, practices and values influence ways in which they communicate from a bilingual perspective, and question assumptions and describe adjustments they make when moving from Arabic to English and vice versa.

Students identify the meaning and emotions conveyed in spoken texts, such as .. ها سمير ماذا قررت؟؛ لا لا ؛ لا أقصد هذا؛ كم مرة قلت لك. , and apply their understanding of the Arabic writing system to enhance meaning and aesthetic effect in written texts. They analyse the relationship between language choices and textual features, and the audience, purpose and context of different spoken, written and multimodal texts. Students explain how spoken and written forms of Arabic vary according to context, purpose and audience, and identify ways in which the Arabic language influences and is influenced by cultural, political and social change. They explain the power of language in determining the nature of intercultural communication in local and global contexts.

The Australian Curriculum Languages - Auslan

Overview

Introduction

As a native user of Auslan, and as an advocate for the language and for the Deaf community, I am thrilled to see a national curriculum in Auslan come to fruition. For the first time, deaf children will have access to a formal first language learner pathway for acquiring Auslan, acknowledging their status and strengths as visual learners and offering a 'Deaf gain' perspective to their lives. In turn, the second language learner pathway provides unparalleled opportunities for hearing children to access and use Auslan in their schools and in society, reducing barriers for participation and increasing equality in the wider community. Children learning Auslan in schools have the potential to fundamentally change the social fabric of Australia.

—Drisana Levitzke-Gray, Deaf advocate and Young Australian of the Year (2015)

Auslan (Australian Sign Language) is the language of the Deaf¹ community of Australia and is descended from British Sign Language (BSL). Auslan and other signed languages around the world are fully-fledged languages that are visual-gestural in nature. They have a complete set of linguistic structures and are complex and highly nuanced.

Signed languages evolve naturally in Deaf communities in which signers use mutually agreed signs and ways of ordering them to communicate with each other. Signed languages have their own grammar and lexicon which are not based on the spoken language of the country or region although they are influenced by them.

Signed languages fulfil the same functions as spoken languages in meeting the communicative, cognitive and social needs of a group of human beings. However, the modalities of a visual-gestural language like Auslan and those of an aural-oral language like English are markedly different. Although signed and spoken languages share many linguistic principles, the visual-gestural modality results in some unique features of signed languages not found in spoken languages.

There are many different signed languages around the world, some of which can be grouped into 'language families'. Auslan belongs to the BSL family, which includes the contemporary British, Australian and New Zealand sign languages, which all share a similar lexicon and grammar. Auslan can be traced back to the arrival of Europeans in Australia in the late 1700s, with BSL users arriving in Australia as convicts and as free settlers. Although now considered a relatively young language in its own right, the ancestral link Auslan shares with BSL gives it historical context as a member of one of the longest continuing signed language families in the world.

Aboriginal and Torres Strait Islander people share the oldest surviving cultures and languages in the world. These developed independently on the Australian continent, predating by vast periods of time the relatively recent arrival of Europeans and the subsequent development of Auslan. The signed languages of Aboriginal and Torres Strait Islander cultures vary greatly from one another and are quite different from Auslan in that they are largely used as gestural-visual representations, or substitutions, of the associated spoken languages. However, in some contemporary Aboriginal and Torres Strait Islander communities, deaf people have developed signed languages for independent use – for example, Yolngu Sign Language from the Northern Territory – but there has been limited research on these. In other communities, Auslan may co-exist alongside local signed languages.

Recognition of Auslan

The Deaf community has a rich history and culture; however, the signed languages of deaf people have not always been recognised as legitimate languages. Due in part to the modality of signed languages, they have often been inaccurately viewed as a form of pantomime or as a manual representation of ‘broken English’, incapable of the same kind of sophistication as spoken languages. As a result of such misunderstanding, signed languages like Auslan have historically been discouraged from widespread use in educational settings. Educational policies, fuelled by resolutions from a conference on the education of deaf children in Milan, Italy, in 1880, led to the prohibition of signed languages in schools in many countries for a considerable period of time, effectively marginalising Deaf communities and oppressing signed languages.

A language is considered legitimate by many when it has a widely accepted or standardised orthographic writing system; because none exists for Auslan, the Deaf community has been hindered in its attempts to capture and record its language in an effort to legitimise it. Although there are recently developed ‘sign writing’ or ‘gloss’ systems that sign linguists, teachers and researchers have developed to record and document signs, Auslan has no written form in the traditionally understood sense.

The United States of America is widely acknowledged for pioneering signed language research and formal development of signed language teaching programs, resulting in the first academic recognition of signed languages as meaningful and complete languages. Starting in the 1960s, the first sign linguistics research is credited to William Stokoe. The United Kingdom and parts of Europe followed suit in the 1970s, and Australia a little later in the 1980s. Auslan was first officially recognised as a legitimate language by the Australian Government in 1987 in a white paper on the languages of Australia (Lo Bianco, J, 1987).

Recent developments in digital recording and software for time-aligned multimedia annotations have allowed for improved documentation and analysis of much larger data sets of signed languages. These tools allow Auslan data, and the rich culture of Australian deaf people, to be captured and recorded in various ways. As a result, linguists, in consultation with the Deaf community, are increasingly conducting research on signed languages and encouraging the documentation of Auslan and other signed languages.

Societal attitudes have changed towards Auslan and towards deaf people. As usage has been documented, scholarly research published and dictionaries developed, policies now legitimise the use of Auslan, and interest has grown in teaching and learning the language in formal educational settings. Recognition of Auslan in the Australian Curriculum has significant historic value, and is to be celebrated.

The place of Auslan in Australian education

The use of Auslan for deaf children in Australian schools has been varied and inconsistent.

However, the recognition and improved status of the language in recent years has changed the educational landscape for deaf children. The move from segregated school settings for deaf children to mainstream school environments has influenced community and education sector interest in Auslan in recent years due to increased visibility of Auslan in school communities. Auslan has been increasingly embraced in many more mainstream school settings where deaf students may be placed.

In addition, between 1980 and 1990, many civil and political events around the world altered the circumstances of the Australian Deaf community. Advocacy by various groups, including deaf people, brought about legislative and social change in Australia, including the **Disability Discrimination Act** in 1992, as well as Acts regarding telecommunications access and television captioning.

Official government recognition of Auslan as a community language, and the implementation of relevant education and employment legislation arising from the aforementioned advocacy, have led to changes in society that have empowered deaf people to take up further studies and to enter previously inaccessible occupations. These shifts have also had an immeasurable impact on the perception of Auslan in the wider community, with increased enrolment of second language learners in tertiary-level Auslan classes for adults, and the establishment of Auslan interpreter training programs nationwide since 1986.

The availability and increased profile of Auslan as a language of formal study in primary and secondary schools for second language learners has, however, been less rapid or less well supported systemically in most states/territories of Australia. Historically, schools that have provided some form of teaching and learning in Auslan have offered informal lunchtime or hobby/interest classes rather than formal courses of study included in a school timetable alongside spoken languages and other subjects.

Victoria has been a leading exception in this regard; Auslan has been taught in a number of schools for many years, and a curriculum has been available at Victorian Certificate of Education (VCE) level since 1994. Other states have followed suit over time, with Auslan now formally available in several schools in New South Wales, Queensland, South Australia and Western Australia. A national agreement via the Collaborative Curriculum and Assessment Framework for Languages (CCAFL) exists for the formal study of Auslan in Year 11 and Year 12. This national syllabus was developed in Victoria under the auspices of CCAFL in 2002 and is available for endorsed use by each state and territory authority. There has been a demand to adopt this syllabus in an increasing number of states in recent years, with Auslan of growing interest to learners as a subject contributing to their Australian Tertiary Admission Rank (ATAR) or Overall Position score for university entrance.

Inconsistency across Australia in the provision of formal Auslan teaching for second language learners in schools from F–10, and the absence to date of any first language learner Auslan curriculum, means that this dual-pathway national curriculum for Auslan is groundbreaking. It systematises provision in Australian schools, serving both deaf and hearing student populations and rightfully acknowledging the place of Auslan and the culture of the Deaf community in Australian society. It offers access to the formal study of Auslan to deaf children through a first language learner pathway and to students interested in learning it as an additional language through a second language learner pathway.

When I was a school student, we were punished for using our sign language. I remember writing 100 times: 'I must not sign'. It makes me so happy to see that young people today are encouraged to learn Auslan, and to be proud of it.

—Nola Colefax, OAM, Deaf elder

1. In referring to deaf people who belong to a linguistic and cultural minority known as the Deaf community, the 'D' may be capitalised in reference to the individual, the culture or the group to accord respect and deference, for example, Deaf teacher. This is similar to being referred to as Aboriginal people, or members of the Macedonian community living in Australia. When referring simply to audiological status of a group, for example, deaf children, the lower case 'd' as in 'deaf' is the more common usage. ↩

Rationale

The formal study of Auslan contributes to the overall intellectual and social enrichment of both first language (L1) and second language (L2) learners by providing:

- opportunities for engagement with the Deaf community and insight into its rich cultural heritage
- opportunities to develop intercultural capabilities, understanding and respect for others, appreciation of diversity and openness to different perspectives and experiences.

This curriculum provides direction for an integrated, inclusive and meaningful approach to language education in Auslan for both first and second language learners.

As a parent of one deaf child and five hearing children, I have been lobbying for an Auslan curriculum in schools for years. A recently implemented course at my sons' school has changed our world as a family. Learning Auslan formally as a second language means my sons can now not only communicate with their deaf brother but even argue with him and share jokes! For my deaf son, being able to access a first language learning pathway in Auslan will mean everything. It will touch every subject and alter the trajectory of his life. It is that profound. A child armed with language can change the world, and deaf children will have a real chance at succeeding equally to their hearing peers if able to master their first language through recognised formal study of it in school. This is simply revolutionary.

—Lesley Klem, hearing parent of a deaf child

Rationale for first language learners

This curriculum meets the need of young deaf people to formally learn their own language, and it recognises the significance of Auslan in the linguistic landscape of Australia. It provides deaf children, and potentially hearing children of deaf parents, with access to education in and about their first language, playing an important part in the development of a strong sense of self-esteem and identity and contributing in crucial ways to overall learning and achievements. It enables learners to develop a wider recognition and understanding of their language, culture and identity, thus contributing to their psychological wellbeing as well as to their academic development.

Rationale for second language learners

Many deaf children today are educated in inclusive school settings, thus raising the profile of Auslan in the wider community. The presence of deaf students and interpreting practitioners in schools creates a need and offers opportunities for a wider range of peer-group communication partners, and not all interactions can or should be mediated by an interpreting practitioner. One of the key reasons for introducing Auslan in schools, therefore, is for humanistic purposes: to increase opportunities for interaction between deaf children and their hearing or hard of hearing peers, and to reduce barriers to communication. Through learning Auslan, L2 learners gain access to additional knowledge and understanding of the nature and purpose of human languages and of the use of a different language modality. In addition, from a vocational perspective, greater participation of deaf people in society in a diverse range of occupations and breadth of community spheres creates possibilities for future career options and personal fulfilment for L2 learners. In general educational terms, learning Auslan as a second language enables students to engage meaningfully with a different language and culture and to enhance understanding of their own language and culture. Such intercultural learning is essential in the increasingly diverse and changing contexts in which they live and will work.

For all learners

Learning Auslan:

- broadens students' understanding that each language is an integrated, evolving system for the framing and communication of meaning; and encourages understanding of the role of language as an expression of cultural and personal identity and a shaper of perspectives
- contributes to the overall curriculum intent by providing distinctive real-life and intellectual opportunities for students to expand their engagement with the wider world and to reflect on the cultural and social assumptions that underpin their own world view and language use. Such awareness of different perspectives is an integral part of effective communication
- contributes to the development of critical thinking and the ability to adapt to change and equips students with learning strategies and study habits that are the foundation not only for lifelong learning but also for any subsequent language learning.

The opportunity to learn Auslan formally is becoming available in an increasing number of Australian schools, and the aim of this national curriculum is to make this learning opportunity accessible in a systematic manner to students around Australia. Language learning is life enhancing. This national curriculum offers all Australian students the opportunity to benefit from the social, cultural, intellectual and emotional development that will result from learning the unique and sophisticated visual-gestural language of the Australian Deaf community.

Aims

The Australian Curriculum: Languages – Auslan aims to develop the knowledge, understanding and skills to enable students to:

- communicate in Auslan
- understand language, culture and learning and their relationship, and thereby develop an intercultural capability in communication
- understand themselves as communicators
- develop a knowledge and an understanding of the diversity of Deaf experience and the nature of identity.

These aims are interrelated and provide the basis for two organising strands for learning Auslan: Communicating and Understanding.

Learning Auslan

Some linguistic features of Auslan are similar to properties found in spoken languages and others are not. For example, the 26 fingerspelled letters of the Auslan alphabet are based on the 26 letters of English. The occasional contact Auslan has with English, such as in relation to mouthing (the use of lip patterns when signing) or fingerspelling, may support the early stages of learning Auslan for some L2 students, as might the apparent visual motivation of some signs. Although indigenous to the Australian Deaf community, Auslan shares some properties with other signed languages, which may make additional signed languages relatively easy to acquire once learners are fluent in Auslan.

Benefits

Benefits of learning Auslan include:

- development of neural pathways and cognitive processes unique to using a visual language
- greater access to the curriculum using increasingly sophisticated Auslan for L1 learners
- capacity to communicate with peers, friends and family members who use Auslan
- improved capacity for visual-gestural communication
- intellectual interest, engagement and personal challenge
- opportunities for meaningful cross-curricular integration, for example through the use of information and communication technology (ICT)
- access to alternative ways of thinking and expressing ideas
- opportunities to develop and reinforce social justice values
- awareness of deafness as difference rather than as disability
- development of interpersonal skills, access to wider social networks and more diverse experience
- appreciation of the notions of Deafhood, cultural identity and community membership
- increased understanding of inclusion and diversity
- acquisition of a portable mode of communication that involves learning strategies for gesture that may have international, cross-cultural application
- increased understanding of language acquisition, language systems and learning processes
- enhanced development of overall literacy capabilities
- accessibility for some non-traditional learners, students with disability and those who are primarily visual learners.

Deaf students located in schools that offer a L2 Auslan program have increased opportunity to expand their peer networks, potentially increasing their social circle, their resilience and inclusion in the school community. L2 learners learning in a school attended by deaf students have a unique opportunity to use their new language on a daily basis in an authentic context, impacting on accessibility and respect for linguistic and cultural difference.

Learner diversity and learner pathways

Pathways

There is diversity in the background of learners of Auslan. Learners may be deaf, hard of hearing or hearing, and may be learning Auslan as a first language or as a second language. To cater for distinct learner backgrounds, the Auslan curriculum has two pathways:

- First Language (L1) Learner Pathway
- Second Language (L2) Learner Pathway.

Learner diversity

The rationale for providing a L1 pathway is that native signers do not usually have an opportunity to formally study their natural first language in a classroom context. Such exploration and development of their L1 affords these students a more sophisticated understanding of their L1, and scaffolds their acquisition of English as their second/additional language. Formally studying Auslan at school provides L1 learners with powerful recognition of the value and status of their language and helps strengthen their sense of identity. The impact of this is healthier self-esteem, greater resilience, better mental health, an improved concept of self and a greater engagement with language, community and culture. In addition, formal learning of their L1 may give students increased opportunity to develop understanding, knowledge and valuable life skills across the curriculum.

The L1 pathway typically caters for deaf students whose native language is Auslan (that is, deaf children of deaf adults, or deaf children from hearing families who use Auslan at home); hearing children with signing deaf parents; and deaf students who are introduced to Auslan at school, for whom it is a highly accessible language and likely to be their future preferred or primary language. This latter group of deaf children might not have access to Auslan at home. Developing a strong L1 via this pathway from Foundation to Year 10 will particularly increase the educational capabilities of deaf children, encourage functional bilingualism in Auslan and English, and will improve learning and future employment opportunities.

The L2 pathway typically caters for students who are not members of the Deaf community; most often, hearing students learning Auslan as a second or additional language. It may also include deaf or hard of hearing children already fluent in another language, such as a different signed language in the case of a recent immigrant, or spoken English for some deaf and hard of hearing children who have residual hearing or access to speech. These children are being introduced to Auslan for the first time as an additional language to add to their existing linguistic repertoire.

Due to a range of complex factors, it is recognised that these two pathways may not be able to meet the complete learning needs of all students. For example, native signers of Auslan who are hearing (such as hearing children from deaf families) may not be adequately accounted for in an L1 pathway, due to the teaching and learning emphasis on the primary target group, deaf children. In addition, a deaf migrant already fluent in a native signed language from another country, such as American Sign Language, may not be entirely suited to an L2 learning pathway for Auslan as so many age-appropriate L1 features and linguistic competencies will already be present in his/her use of another signed language, making a second signed language easier to learn compared to other L2 learners being exposed to learning a signed language for the first time. Congenitally deafblind children, or other students with disability, may also present unique challenges with regard to determining language learning pathways.

Both L1 and L2 learners of Auslan are entitled to rigorous, relevant and engaging learning programs that address their individual learning needs. In teaching Auslan in Australian schools, it will be necessary to account for the diversity of learners of Auslan, including accommodating:

- students with a disability
- gifted and talented students
- students with English as an additional language or dialect
- students from regional and remote contexts

- students with diverse personal or cultural or religious backgrounds
- Aboriginal and Torres Strait Islander students
- students with a combination of equity and diversity needs.

Ultimately, this dual-pathway approach recognises that the key variable in the language learning experience is the diversity of the learners. It acknowledges that students bring specific backgrounds, diverse linguistic and cultural experience, individual knowledge and skills to their learning of Auslan, and that the programming and implementation in schools by teaching teams will need to reflect this, differentiating for learner diversity accordingly and drawing on the L1 or the L2 pathway and accommodating for individual learners as appropriate.

First Language Learner Pathway (L1): F–10 sequence

The first language learner pathway is pitched at two of the many types of potential learners in the Auslan cohort:

- native signing children from Deaf families who have fluent language models to interact with at home and have been exposed to the language since birth
- deaf children from hearing families with parents or older relatives who have learnt to sign and exposed their children early to rich signing models, such as in bilingual preschools.

There is another significant group of children in the L1 pathway: deaf children who arrive in a signing program in their first few years of schooling. These students begin learning Auslan with limited prior experience of any language, and may have additional disabilities that are hidden because of their language delay. The L1 pathway is appropriate for them since they will be using the language for more hours a week than just in the subject, thus making faster progress with language acquisition; and they have little experience of other language to make reference to, as in the L2 pathway. Teachers working with students with delayed access to Auslan will need to adapt and differentiate the curriculum extensively to scaffold their learning, particularly in their first years of study. Additionally, hearing children from deaf families who have Auslan as a first language may also benefit from the L1 pathway of learning.

The population of children who will follow the L1 pathway therefore has great variation in Auslan proficiency. Some will have had extensive access to a range of mature language users in early learning programs, in school and at home. Others will have limited quantity and quality of input in Auslan at home and sometimes even in school, and may not have attended an early intervention signing program prior to school. This pathway is primarily pitched at those students with exposure to Auslan prior to Foundation level; delayed language learners will require extra support to participate in the learning experiences outlined in this pathway.

Typically, L1 programs occur with constant involvement from a variety of fluent signers drawn from the Deaf community. A key expectation in the L1 pathway is that students will have opportunities to interact with elders and the Deaf community to consolidate and enhance their learning of the language and culture, ideally face to face, although accommodations via technology may need to be made in regional and remote areas.

First Language Learner Pathway (L1): 7–10 sequence

The nature of education of deaf students is such that some learners arrive at high school with a very limited knowledge of English, and little, if any, Auslan. These learners may have come from other countries where they have had no access to schooling for deaf children, or from educational programs overseas or in Australia from which they have learnt only rudimentary speech and language and have not had access to quality signed language models. This group of learners, therefore, comprises students who are learning their first language well beyond the age of typical language development.

As a result, this group of learners is very different from the similarly aged cohort from the F–10 sequence, who have had exposure to quality language since birth or early in life, and who approach high school learning with established fluency in Auslan, which enables them to focus much of their Auslan class time on the development of higher-order skills such as analysis and evaluation. Learners in the L1 pathway, 7–10 sequence begin learning Auslan with limited prior experience of any language. They may have additional disabilities, sometimes hidden, often caused by their language delay. Auslan is nonetheless considered their first or primary language, due to their lack of fluency in any other language. Learners require intensive support and extensive input from rich language models, especially at the initial stages. These learners are unlikely to reach native-like levels of fluency in any language, but will benefit greatly from the explicit teaching of Auslan as a subject to support their language acquisition and development.

First Language Learner Pathway (L1): Learner experiences

The experience of first language learners of Auslan will include:

- opportunities to expand domains of use in their first language and to develop skills in registers and genres not necessarily encountered in their home context, particularly in the case of delayed L1 learners of Auslan
- enhancement of essential skills that underpin other learning, including critical thinking and literacy in both Auslan and English
- reflection on their own identities, awareness of the values and beliefs that underpin their communication practices, and exploration of their expression of identity in Auslan and in Deaf culture and of how this can be extended to English and other languages and cultures
- understanding of the systems of Auslan and sociolinguistic variation of the language in context
- development of the capacity to translate and interpret activities that provide insights into cultural and linguistic differences and similarities between Auslan and English and between communicative practices in the two languages
- reflection on their linguistic environment at local, regional, national and international levels, including exploration of the status of Auslan and other signed languages, of ways in which it can be expanded to meet the needs of their own developing linguistic and cultural capabilities and their identity as a member of the Deaf community
- understanding of the history of deaf people and of their own ability to effect positive social change.

Second Language Learner Pathway (L2): F–10 and 7–10 sequences

The second language learner pathway caters for students learning Auslan as a second or additional language. This will typically be hearing children, but may include hard of hearing or deaf children who already have an established first language. These children are being introduced to Auslan for the first time as an additional language. The teaching team will use the curriculum to cater for L2 learners of different backgrounds by making appropriate adjustments to differentiate learning experiences for these students.

The first language of most L2 students will be a spoken language, and this pathway provides them with an opportunity to study a language that is very different from a spoken language. If L2 learners are learning in a school attended by deaf students, they will have a unique opportunity to use their new language on a daily basis in an authentic context. Deaf students located in schools that offer an L2 Auslan program have increased opportunity to expand their peer networks, potentially supporting transition between schools (from primary to secondary school, for example), and increasing their resilience and social networks, decreasing their risk of isolation, and increasing their sense of inclusion.

Typically, L2 programs occur with constant involvement from a variety of fluent signers drawn from the community. A key expectation of the L2 pathway of learning is that students will have opportunities to interact with elders and members of the Deaf community. This provides learners with the chance to develop a deeper appreciation of the nature and diversity of languages and cultures, and requires the acquisition of specific knowledge and skills necessary to learn and understand Auslan in its cultural context.

Second Language Learner Pathway (L2): Learner experiences

The experience of second language learners of Auslan will include:

- developing knowledge of Auslan needed to interact with others and to communicate personal information and ideas in a widening range of contexts
- observing and interacting with Auslan users and Auslan texts and beginning to recognise the culture-specific ways in which communication takes place
- reflecting on their own linguistic and cultural practices and beginning to apply this new understanding in their communication with others
- understanding of linguistic, historic and cultural trends and developments in the context of national and international Deaf communities and signed languages.

First Language Learner Pathway

Second Language Learner Pathway

Developing teaching and learning Sequences of learning

The Australian Curriculum: Languages – Auslan has two learning sequences: one from Foundation to Year 10, and another from Year 7 to Year 10 (Year 7 Entry). The curriculum is written in a series of bands, as follows: Foundation – Year 2, Years 3–4, Years 5–6, Years 7–8 and Years 9–10. Given the limited but growing research and pedagogical support for the teaching and learning of Auslan, there may be local flexibility in curriculum implementation, depending on suitability of learner pathway and entry point in the sequence.

Strands and sub-strands

The content of the Australian Curriculum: Languages is organised through two interrelated strands, which realise the four aims of learning Auslan. The two strands are:

- **Communicating:** using language for communicative purposes in interpreting, creating and exchanging meaning
- **Understanding:** analysing language and culture as resources for interpreting and creating meaning.

The strands reflect three important aspects of language learning:

- communication
- analysis of aspects of language and culture
- reflection, which involves
 - reflection on the experience of communicating
 - reflection on comparative dimensions of the languages available in students' repertoires, for example, the first language in relation to the second language, and the self in relation to others.

A set of sub-strands has been identified within each strand to reflect dimensions of language use and the related content to be taught and learnt. The strands and sub-strands do not operate in isolation but are integrated in relation to language use for different purposes in different contexts. The relative contribution of each sub-strand differs for described languages, pathways and bands of learning.

Table 1 gives a brief description of each of the strands and sub-strands for Auslan.

Strand	Sub-strand	Description
Communicating <i>Using language for communicative purposes in interpreting, creating and exchanging meaning</i>	1.1 Socialising	Interacting to exchange ideas, opinions, experiences, thoughts and feelings; and participating in planning, negotiating, deciding and taking action
	1.2 Informing	Obtaining, processing, interpreting and conveying information through a range of Auslan texts; developing and applying knowledge
	1.3 Creating	Engaging with imaginative experience by participating in, responding to and creating a range of texts, such as stories, poetry, art and performance
	1.4 Translating	Moving between languages and cultures, understanding that words and signs do not always have direct equivalence and recognising different interpretations and explaining these to others

	1.5 Identity	Exploring and expressing their sense of identity as individuals and as members of the Deaf community and culture and as deaf, hard of hearing or hearing people
	1.6 Reflecting	Participating in intercultural exchange, questioning reactions and assumptions; and considering how interaction shapes communication and identity
Understanding <i>Analysing and understanding language and culture as resources for interpreting and shaping meaning in intercultural exchange</i>	2.1 Systems of language	Understanding the language system, including visual-gestural language parameters, conventions and grammar
	2.2 Language variation and change	Understanding how language use varies according to individual difference and context and across time and place
	2.3 Language awareness	Analysing and understanding language and culture over time, including language attitudes, language policy, language rights, international contexts and language vitality
	2.4 The role of language and culture	Analysing and understanding the role of language and culture in the exchange of meaning

The sub-strands are further differentiated according to a set of 'threads' that support the internal organisation of content in each sub-strand. These threads (shown in Table 2) are designed to capture: range and variety in the scope of learning; and a means for expressing the progression of content across the learning sequences.

Table 2: Strands, sub-strands and threads for Auslan across the learner pathways

Strand	Sub-strand	First Language Learner Pathway	Second Language Learner Pathway
Communicating <i>Using language for communicative purposes in interpreting, creating and exchanging meaning</i>	1.1 Socialising	Socialising and interacting	Socialising and interacting
		Taking action	Taking action

Text types

Text types include signed or spoken texts, written texts (in English), digital texts and multimodal texts. They are central to curriculum development, as all work in language learning can be seen as textual work. The selection of quality Auslan texts produced by native or native-like proficient signers is important: texts define and reflect past and present and linguistic and cultural identity, making the people and experiences of a particular culture distinctive; they also provide the opportunity for developing intercultural understanding.

Band descriptions

The band descriptions give a general description of language learning that is typical at particular year levels along the F–10 continuum. They have been developed to correspond to learning in the following bands: Foundation – Year 2, Years 3–4, Years 5–6, Years 7–8 and Years 9–10. Each band description includes discussion of:

- nature of the learner
- Auslan learning and use
- contexts of interaction
- texts and resources
- features of Auslan use
- level of support
- the role of English.

Developing teaching and learning programs

In developing teaching and learning programs, the two strands – Communicating and Understanding – are integrated to ensure holistic learning in order to attend to active language use and the development of related knowledge, understandings and reflective capabilities. The set of strands and sub-strands capture a range of dimensions of language use. As such, they are designed to capture the range and variety of content to be experienced and learnt by students. The teaching team will design teaching and learning programs by drawing on the content descriptions from a number of sub-strands and integrating these to create meaningful learning experiences for their particular learners. The emphases across the strands and sub-strands may vary for different bands and pathways and for different contexts. Since the content descriptions indicate the nature and scope of the learning over several year spans, the teaching team will make decisions about what aspects of the content descriptions will be taught in what year of their program. Programs can then be used to inform the development of short-term programs year by year (for example, one term/several weeks). Taken together, band descriptions, content descriptions, content elaborations and achievement standards provide an overall sense of ‘level’ or expectations about language teaching and learning at a given moment in time and over time. In the development of programs, they give a sense of the level of complexity at which student learning can be pitched. In relation to assessment, they provide a reference point for making judgements about students’ progress in learning. The teaching team will make decisions about pedagogies that best meet the learning needs of their particular students and the context of their particular program.

Development and implementation protocol

Engagement and appropriate consultation with the local Deaf community in an ethical, respectful and sustainable manner is the cornerstone of respectful Auslan program development and key to a successful Auslan teaching program. Deaf people are the custodians of their language. Consultation with native or native-like and proficient users of Auslan who have ownership of the language is strongly recommended as a special consideration for Auslan programs, to ensure the language is taught in a contextually and culturally correct manner. Teaching Auslan without due consideration of/ liaison with the Deaf community may result in linguistic and cultural appropriation and the disenfranchisement of deaf people.

Issues to consider

- the presence of deaf students within the school environment, for whom the provision of an L1 or L2 Auslan program would be of academic, social, emotional and vocational benefit
- the proportion of Deaf teachers, mentors, language models and Deaf community members in the region, and available access to them
- the availability of skilled and appropriate personnel for teaching Auslan, such as qualified Auslan instructors/language teachers, and the capacity to team teach in deaf/hearing teams as needed in a culturally sensitive manner
- the possibility of excursions to Deaf community events and the development of ongoing relationships with community members (such as Deaf seniors) to support pedagogy and to build and perpetuate mutual understanding and connections for the benefit of students and the community
- the three-dimensional visual-spatial nature of Auslan means that it is ideally taught in a face-to-face context. ICT will play an important role in providing access to a variety of signers and signed texts, however, particularly for rural and remote learners
- the range of cross-cultural considerations that need to be addressed when working in and teaching Auslan in Aboriginal and Torres Strait Islander communities. The teaching team should consult the local community about particular topics, local context and relevant cultural considerations, so that offence and embarrassment can be avoided
- the importance of promoting further research of Auslan and the development, collection and digitisation of quality texts, teaching materials, resources and assessment and reporting tools for teaching purposes
- the need for investment in the professional development of suitable Auslan teachers to meet future anticipated interest and demand in Auslan programs in schools; and for recognition of the fact that the success of Auslan programs depends on the fundamental premise that suitably skilled and qualified teachers, including native or native-like proficient users of Auslan, have key roles in their development and implementation
- schools enrolling deaf and hard of hearing students on the same site may wish to consider offering both L1 and L2 Auslan pathways or a blend of the two as needed. Authentic opportunities for deaf, hard of hearing and hearing peers to engage with each other, either face to face or via technology, allows L2 students to practise language in a real-world context. Such practice benefits for hearing students transfer to deaf students by broadening their peer network, increasing communication across the school and over several year levels for the deaf students, and potentially have social, emotional, cultural, psychological, academic and vocational benefits for all students in the program.

For more specific guidance and to connect with the Deaf community, contact the national peak body representing the needs and interests of Auslan users, Deaf Australia, or the relevant state association.

As a native signer, sharing my language with students is a gift I give willingly, knowing with language comes greater understanding, acceptance and respect. Students learn to appreciate my community and culture because they engage directly with me, a Deaf teacher, which is incredibly powerful in the learning experience. I believe my own deaf children will grow up in a much more tolerant and accessible society because of Auslan in schools.

—Josie Hodgetts, Deaf parent of deaf children, Auslan teacher

Languages - Auslan: Auslan glossing conventions and principles

Context statement

Years F–10 Sequence

The first language learner (L1) pathway is pitched at two of the many types of potential learners in the Auslan cohort:

- native signing children from Deaf families who have fluent language models to interact with at home and have been exposed to the language since birth
- deaf children from hearing families with parents or older relatives who have learnt to sign and exposed their children early to rich signing models, for example in bilingual preschools.

There is another significant group of children in the L1 pathway: deaf children who arrive in a signing program in their first few years of schooling. These students begin learning Auslan with limited prior experience of any language, and may have additional disabilities that are hidden because of their language delay. The L1 pathway is appropriate for them since they will be using the language for more hours a week than just in the subject, thus making faster progress with language acquisition; and they have no other language to reference, as in the L2 pathway. Teachers working with students with delayed access to Auslan will need to adapt and differentiate the curriculum extensively to scaffold their learning, particularly in their first years of study. Additionally, hearing children from Deaf families who have Auslan as a first language may also be suited to the L1 pathway of learning.

The population of children who will follow the L1 pathway therefore has great variation in Auslan proficiency. Some will have had extensive access to a range of mature language users in early learning programs, in school and at home. Others will have limited quantity and quality of input in Auslan at home and sometimes even in school, and may not have attended an early intervention signing program prior to school. This pathway is primarily pitched at those students with exposure to Auslan prior to Foundation level; delayed language learners will need extra support to participate in the learning experiences outlined in this pathway.

Typically, L1 programs occur with constant involvement from a variety of fluent signers from the community. A key expectation in the L1 pathway is that students will have opportunities to interact with elders and members of the Deaf community.

Years 7–10 (Year 7 Entry) Sequence

The nature of education of deaf students is such that some learners arrive at high school with a very limited knowledge of English, and little, if any, Auslan. These learners may have come from other countries where they have had no access to schooling for deaf children, or from educational programs overseas or in Australia from which they have learnt only rudimentary speech and language, and not had access to quality signed language models. This group of learners, therefore, comprises students who are learning their first language well beyond the age of typical language development.

As a result, this group of learners are very different from the similarly aged cohort from the F–10 sequence, who have had exposure to quality language since birth or early in life, and who approach high school learning with established fluency in Auslan, which enables them to focus much of their Auslan class time on the development of higher-order skills, such as analysis and evaluation. Learners in the L1 pathway, 7–10 sequence begin learning Auslan with limited prior experience of any language. They may have additional disabilities, sometimes hidden, often caused by their language delay. Auslan is nonetheless considered their first or primary language, due to their lack of fluency in any other language. These learners need intensive support and extensive input from rich language models, especially at the initial stages. They are unlikely to reach native-like levels of fluency in any language, but will benefit greatly from the explicit teaching of Auslan as a subject to support their language acquisition and development.

Context statement

Years F–10 Sequence

The second language learner (L2) pathway caters for students learning Auslan as a second or additional language. This will usually be students who are not members of the Deaf community; typically, hearing students who may or may not already know a second language. The L2 pathway may also include deaf or hard of hearing children already fluent in another language, such as a different signed language in the case of a recent immigrant, or spoken English for some deaf children who have residual hearing or access to speech. These students are introduced to Auslan as a language to add to their existing linguistic repertoire. Teachers will use the curriculum to cater for learners of different backgrounds by making appropriate adjustments to differentiate learning experiences.

The first language of most L2 students will be a spoken language, and this pathway gives them an opportunity to study a language that is very different from a spoken language. If L2 learners are learning in a school attended by deaf students, they will have a unique opportunity to use their new language on a daily basis in an authentic context.

L2 programs occur with constant involvement from a variety of fluent signers from the community. A key expectation is that students will have opportunities to interact with elders and members of the Deaf community.

Years 7–10 (Year 7 Entry) Sequence

The second language learner pathway Years 7–10 sequence offers students the opportunity to learn Auslan as a second or additional language commencing in their first year of high school. These learners are typically hearing students with little prior exposure to the language or to the Deaf community; but many will have learnt an additional language in primary school and some have proficiency in different home languages. They consequently bring existing language learning strategies and intercultural awareness to the new experience of learning Auslan. This cohort also includes deaf or hard of hearing students already fluent in another language, such as different signed languages in the case of recent immigrants or spoken English for deaf children who have residual hearing or access to speech. These students are introduced to Auslan to add to their existing linguistic repertoire. Teachers will use the curriculum to cater for learners of different backgrounds by making appropriate adjustments to differentiate learning experiences.

The first language of most L2 students will be a spoken language, and this pathway provides an opportunity to study a language that is very different from a spoken language. L2 learners learning in a school attended by deaf students have a unique opportunity to use their new language on a daily basis in an authentic context.

L2 programs occur with constant involvement from a variety of fluent signers from the community. A key expectation is that students will have opportunities to interact with elders and members of the Deaf community.

The Australian Curriculum Languages - Auslan First Language Learner Pathway - Years F–10 Sequence

Foundation to Year 2

The nature of the learners

Most hearing children, or deaf children from signing families, enter the early years of schooling with established communication in one or more languages. Cognitive and social development at this stage is exploratory and egocentric; thus learning typically focuses on students' immediate world of family, home, school and friends. Children at this age are learning how to socialise with new people, share with others, and participate in structured routines and activities at school. Auslan is learnt in parallel with English literacy and, for some children, spoken English. Some learners arrive at school with little experience of English and will learn it as a second language, while others may use spoken English with their hearing family members. The learning of Auslan supports and enriches deaf children's learning of English and vice versa.

Auslan learning and use

Rich language input characterises the first stages of learning. Most children are familiar with the forms of signs and their fluency and accuracy is further developed through activities such as play, games and viewing texts. The curriculum builds on children's interests and sense of enjoyment and curiosity, with an emphasis on active, experiential learning and confidence building. Creative play provides opportunities for using the language for purposeful interaction in less familiar contexts.

Children build vocabulary for thinking and talking about school topics, routines and processes, and expand their knowledge and understanding by interacting with other deaf children and adults in new contexts and by participating in more structured routines and activities. They use Auslan for different language functions, such as asking and responding to questions, expressing wishes, responding to and giving directions, greeting, thanking, apologising, agreeing and disagreeing, and taking turns in games and simple shared learning activities.

Contexts of interaction

Across Foundation to Year 2, learning occurs largely through interaction with peers and the teaching team, with some access to members of the Deaf community for additional enrichment and authentication of students' language learning. Information and communication technology (ICT) resources provide additional access to Auslan and to the cultural experience of deafness. A key expectation in the L1 pathway is that students will have opportunities to interact with a variety of native or near-native signing models.

Texts and resources

Children engage with a variety of signed texts, live and recorded. They watch the teacher signing, share ideas and join in activities and stories and various forms of play and conversational exchanges. Text types include descriptions of appearances, relationships between people, and stories and recounts, as well as texts that talk about self, such as comparing likes and dislikes with others. Students become familiar with ways of recording Auslan, either through film, photos of signs, line drawings of signs, or simple symbols. An important source of natural signed texts are members of the deaf community. The early stage of language learning is also supported by extensive use of concrete materials and resources. Play and imaginative activities, games, and familiar routines provide essential scaffolding and context for language development.

Features of Auslan use

Children in Foundation to Year 2 learn to produce all handshapes, movements and locations of single signs. They make use of handling and size and shape specifiers (SASS) depicting signs with increasing accuracy, and use entity depicting signs to talk about simple movement and locations. Children in this band level produce a range of clause structures with the correct sign order and non-manual features (NMFs), such as questions, negatives and topic-comment structures, as well as using a range of non-manual adverbs. They learn to modify indicating verbs to show participants involved in events and can sometimes maintain those locations across multiple clauses. They are learning to integrate multiple viewpoints, such as that of narrator and of one or two characters, through constructed action and marking manner in longer signed texts.

As children learn to adjust their language to suit different purposes and situations, they begin to understand how culture shapes language use. They compare how they feel when they use different languages and how they view different languages and people who use them. This introduction to the meta dimension of intercultural learning develops the ability to ‘decentre’, to consider different perspectives and ways of being, and to become aware of themselves as communicators and cultural participants. Metalinguistically, children learn to describe features of signs, such as handshapes, to identify whether they are iconic; to recognise the importance of space in Auslan; and to categorise signs as nouns, verbs and adjectives.

Level of support

Learning is supported through the provision of experiences that are challenging but achievable with appropriate scaffolding and support. This involves modelling, monitoring and moderating by the teacher; provision of multiple and varied sources of input; opportunities for revisiting, recycling and reviewing; and continuous cueing, feedback, response and encouragement. Use of recounting, experiencing and retelling assists in establishing early language skills based on real-life experiences.

The role of English

Auslan is the language of all classroom interactions, routines and activities. It is the principal medium of instruction in L1 pathway classrooms. English may play a complementary role, such as when comparing signs and words and looking at fingerspelling. English is necessarily discussed in the translating strand.

Foundation to Year 2 Content Descriptions

Communicating	
Socialising	Elaborations

Communicate with teacher, peers and familiar adults in guided and free interactions that develop social and communicative skills

[Key concepts: self, family, interaction, experience, preference; Key processes: interacting, greeting, asking/answering questions, recounting, describing, comparing]

(ACLASFC001)

- interacting with others using greetings according to relationship, context and time of day, for example:
HELLO, HOW-ARE-YOU? SEE LATER, GOOD MORNING M-R-J-O-N-E-S
- asking and answering questions about families, friends, pets, routines or pastimes, for example:
PRO2 ARRIVE SCHOOL HOW? CAR TAXI WALK G:WELL?
How do you get to school?
WHAT POSS2 FAVOURITE SPORT WHAT?
What's your favourite sport?
POSS1 BIRTHDAY WHEN D-E-C
My birthday is in December.

- using everyday social exchanges such as thanking, apologising, expressing wishes or congratulations, for example:
THANK-YOU HELP_{-me}
Thank you for helping me.
SORRY A-C-C
I'm sorry, it was an accident.
GOOD-LUCK POSS2 RACE
Good luck for your race.

- introducing themselves or a friend to class visitors, for example:
HELLO POSS1 NAME G-A-V-I-N SIGN-NAME:GAVIN
Hi, my name's Gavin and this is my sign name.

- supporting interaction when socialising with their peers, for example by indicating agreement or disagreement through nodding or head shaking
- recounting personal experiences using specific time markers such as BEFORE, AFTER, LONG-TIME-AGO, YESTERDAY
- recounting experiences shared as a class, such as excursions or special visitors, using appropriate sequencing of information
- describing family members, friends or teachers in terms of physical appearance and characteristics, for example:
PRINCIPAL YOU-KNOW SHORT LONG-HAIR GLASSES?
You know the principal? She's short, has long hair and wears glasses.
POSS1 BROTHER OLD++ TALL SKINNY
My brother is older; he's tall and skinny.

- comparing likes, dislikes and preferences, for example:
PRO1 LIKE APPLE PRO1 DON'T-LIKE ORANGE
I like apples but I don't like oranges.

- exploring different ways of expressing emotion through the use of NMFs and lexical signs, for example:
PRO3 TEASE_{-me}
She teased me.
NOW PRO1 HAPPY BEFORE PRO1 CRANKY

I'm happy now but before I was cranky.

▶ Auslan

- sharing their opinions about classmates or classroom resources using evaluative language and superlatives, for example:

S-A-M RUN FAST C-H-R-I-S WOW FAST SPEED

Sam runs fast but Chris runs the fastest.

THAT BEST COMPUTER

That's the best computer.

▶ Auslan

- sharing information about personal experiences or recent events, using time markers that incorporate numerals, such as THREE-DAYS-AGO, NEXT-WEEK, LAST YEAR, IN-TWO-DAYS
- referring to family members' and classmates' names using fingerspelling or sign names as appropriate

- describing class activities using plain or indicating verbs, modifying the indicating verbs some of the time, for example:

THERE SIT BOOK READ, FINISH PUT++

Over there we sit and read books, and when we're finished we put them away.

PENCIL PRO1 GIVE++

I'll give out the pencils.

▶ Auslan

- conversing with friends using appropriate turn-taking strategies
- asking and answering questions related to time, place, number, days of the week, months and seasons, for example:
WHY SHOULD LOOK_{-left} LOOK_{-right} BEFORE ROAD CROSS
Why do we need to look left and right before crossing the road?
ONE WEEK DS:length HOW-MANY DAY?
How many days in a week?

▶ Auslan

- describing relationships between members of their family or between classmates, for example:

PRO3 POSS1 COUSIN WE2 GOOD FRIEND.

She's my cousin; we're good friends.

POSS3 FATHER PUNISH PRO3

Her father punished her.

▶ Auslan

Participate in group learning activities that involve taking turns, playing action games, making choices or swapping and classifying items

[Key concepts: play, action-learning, problem-solving; Key processes: participating, playing, collaborating]

(ACLASFC002)

- participating in signing songs and games that involve repeated signs, gestures and NMFs, for example, *I went to the market and I bought ... Old MacDonald had a farm ...*
 - participating in activities that involve classifying objects by attributes such as shapes, colours and numbers
 - following directions in activities such as an obstacle course or action game, using directional terms or depicting signs such as
DS:turn-left DEAD-END DS:turn-right
Go left, then at the end turn right.
PLEASE BRING MILK FRIDGE DS:open-door POINT
Please bring the milk; it's at the bottom of the fridge door.

 - playing games that involve choice, memory or information exchange to reinforce number skills or language patterns
 - collaborating in art or craft activities that involve making decisions about choices or contributions
 - participating in barrier games and other information-gap activities that focus on describing appearance or scenes, such as a game of 'Guess Who' on paper with some characters named on paper A and some not named on paper B, and vice versa; taking turns to describe appearance of the characters with no name and having partner fingerspell their names back
 - participating in role-plays that involve scenarios such as ordering a meal, buying food or other items, transacting payment or giving feedback
-

Participate in classroom routines and activities such as following directions, attracting attention, responding to questions and turn-taking

[Key concepts: direction, response, support, protocol; Key processes: participating, responding, interacting, turn-taking]

(ACLASFC003)

- recognising their own and their classmates' fingerspelled names used in games or routines such as roll call
- asking for help, offering assistance or requesting permission in polite ways, for example:
PLEASE HELP_{-me}?
Can you help me, please?
CAN SHARE?
Can we share these?

- demonstrating attentive watching across a range of school contexts, such as assemblies or classroom discussions
- following instructions for class routines, for example:
PLEASE WITH-2++ DS:sit-opposite
Please find a partner and sit opposite each other.
DS:line-up PLEASE
Line up, please.
LOOK-AT_{-me} PRO1
Look to the front.

- gaining others' attention in appropriate ways, relying less on tap and more on other strategies, and responding to others' attempts to gain their attention
- following protocols such as stopping when lights are flashed, and observing appropriate distance between signers
- learning to be a supportive group discussion member, for example by asking relevant questions, providing feedback, prompting, using NMFs to indicate agreement or disagreement
- formulating different kinds of open and closed questions, including WHEN, WHY and HOW questions
- signing appropriately to maintain or change a topic, to remain on task and take turns
- interacting with each other or the teacher by using eye gaze and other NMFs to indicate agreement/disagreement or understanding/lack of understanding
- negotiating turn-taking, for example:
PRO1 FIRST YOUR-TURN
It's my turn first, then your turn.

- watching, remembering and responding to increasingly complex instructions of two or more steps, for example by moving or locating objects in the classroom
- using the appropriate NMFs for asking questions and making statements when interacting in small groups

Informing

Elaborations

Identify specific points of information in simple Auslan texts and use the information to complete guided tasks

[Key concepts: information, family, games, hobbies; Key processes: collecting information, identifying, retelling, categorising, recording]

(ACLASFC004)

- retelling and responding to key points of information in class messages, directions or introductions
- gathering information from their peers about topics such as family members, favourite foods, toys or games to report back to the class
- identifying information in simple Auslan texts that relates to properties such as colour, number, size or shape and responding through activities such as manipulating concrete materials and objects
- identifying and categorising signs in simple Auslan texts according to handshape
- following a signed text that involves several steps to progressively collect information needed to complete a task, such as an obstacle course
- watching short Auslan texts about topics such as hobbies, animals or sports, recording key points of information using tables or graphic organisers
- watching a presentation by a teacher, peer or visitor and recalling and retelling specific points of information
- recording new language in personal sign dictionaries acquired from simple Auslan texts in different curriculum areas, for example, when learning about the weather or countries of the world

Present information about self, family, people, places and things using signed descriptions and visual prompts

[Key concepts: self, family, routines, home, community; Key processes: providing information, describing, presenting, demonstrating, labelling, reporting]

(ACLASFC005)

- describing an object, animal or person using lexical adjectives, for example colours, or SASS depicting signs relating to size and shape
 - contributing to a digital class presentation such as a video by signing a description of their own photo or piece of work
 - demonstrating a simple procedure using list buoys and related sign vocabulary to demonstrate the different steps
 - labelling objects in the classroom and in learning resources such as books and wall charts with pictures of signs
 - recounting to the class details of a personal experience such as a holiday or weekend event
 - reporting aspects of their daily routines or family life, such as how they travel to school or what they eat for lunch
 - categorising and displaying pictures of signs, for example on a handshape wall
 - presenting specific information such as a weather report using visual prompts or a digital presentation
 - sharing information about their family, home or local community with their classmates, for example, through signed commentary to a display or digital presentation
 - reporting key elements obtained from predominantly visual infographics or diagrams related to different learning areas, for example, life cycle charts
 - providing information needed to complete an information-gap activity, for example, '20 Questions' with yes/no answers, or 'Guess Who?'
-

Creating	Elaborations
<p>Participate in a range of imaginative experiences and respond through drawing, telling with familiar signs and written words or enacting with constructed action</p> <p>[Key concepts: imagination, story, character, emotion; Key processes: viewing, retelling, expressing, responding, interpreting]</p> <p>(ACLASFC006)</p> 	<ul style="list-style-type: none"> viewing fairytales or stories from sources such as National Simultaneous Storytime books, demonstrating understanding through retelling or enacting engaging in imaginative play that involves the creation of mood or momentum through repeated use of signs, handshapes and facial expressions to modify manner or intensify adjectives responding to forms of Deaf art such as handshape creations, for example by reproducing key elements in their own artwork and indicating emotional response using lexical signs such as LOVE, LIKE, LOOK GOOD, NOT BAD, UGLY responding to performances of Deaf poetry that evoke emotions such as sadness, fear or excitement, for example by indicating enjoyment or personal feelings interacting with a signing puppet or doll in a fantasy context or situation, for example by asking questions such as WHAT YOUR NAME? or YOU HUNGRY G:WELL? participating in indoor and outdoor games that use signs, handshapes and body movements in creative ways and focus on all Auslan parameters, for example, 'Simon Says' participating in Auslan games that use simple clauses in creative ways, for example, playing the improvisation game 'Space Jump' drawing a personal interpretation of a 'visual vernacular' description of a character's appearance viewing short Auslan stories and responding by identifying and comparing favourite elements, characters and events

Express imaginative experience through creative games, role-play and mime, using familiar signs, modelled language and constructed action

[Key concepts: imagination, emotion, expression; Key processes: creating, enacting, expressing, experimenting, imagining]

(ACLASFC007)

- changing elements of favourite stories to create their own versions, with a focus on varying manner or constructed action
- interacting with imaginary characters using lexical and non-lexical signs and NMFs to express emotions such as excitement, fear or amazement
- using iconic signs to create their own variations on familiar nursery rhyme actions, such as in 'Incy Wincy Spider'
- depicting the movement of people, animals or means of transport by using handshapes in creative ways
- creating amusing sequences of signs using a fixed handshape, such as YOU THINK PRO1 SHY
- experimenting with NMFs and handshapes to play games such as 'Simon Says', taking turns to be Simon
- experimenting with facial expressions to match different emotional expressions, such as HAPPY, SCARED, TIRED
- changing an aspect of a cartoon or picture story, using gestures, handshapes and NMFs to explain differences
- representing objects using combined bodies and hands in amusing or creative ways
- exploring the use of constructed action such as eye gaze change, body shift and head orientation when enacting imagined adventures
- making their own handshape creations
- assuming the role of a character from a story and responding to signed questions from classmates, such as:
YOUR NOSE DS:long-nose WHY?
Why is your nose so long, Pinocchio?

▶ Auslan

Translating

Translate familiar words and phrases from Auslan into English and vice versa, using visual cues, signs and English words, noticing how signs and words differ

[Key concepts: similarity, difference, meaning; Key processes: noticing, recognising, identifying, translating, explaining]

(ACLASFC008)

Elaborations

- recognising that every language uses words or signs to make meaning
- identifying aspects of Auslan which are the same in English, such as the fingerspelled alphabet
- participating in shared reading of children's books containing Auslan images and English text, asking and answering questions about unfamiliar words and phrases, and noticing the comparative number of signs and words used in the book
- translating simple Auslan signs to family and friends by fingerspelling or writing the English word, for example, DOG, CAT, BIRD
- comparing Auslan expressions used in everyday interactions such as greetings with equivalent English expressions, for example, HOW-ARE-YOU? compared to *How are you?*

Create simple print or digital texts such as labels, posters, wall charts or cards that use both Auslan images and English words

[Key concepts: code, translation; Key processes: labelling, creating, captioning]

(ACLASFC009)

- labelling objects and classroom items in both English and Auslan, using posters, word cards and alphabet cards, pictures and images of Auslan signs and words, for example, 'a is for apple' with a fingerspelled letter for 'a'
- creating and using handshape images to represent signs and label with words, for example, flat hand = **FISH**
- developing a simple handshape dictionary with English captions
- using photos of family members to create a family tree or similar representation of relationships, captioning and labelling in English with corresponding images of Auslan signs for each family member

Identity

Elaborations

Explore ideas of identity, social groupings, relationship, space and place, and how these relate to the Deaf community

[Key concepts: identity, self, relationship, community, place, space, connection; Key processes: identifying, exploring, describing, talking about]

(ACLASFC010)

- describing themselves as belonging to their family and to social groups such as their class or age cohort of deaf children
- exploring concepts of difference and sameness
- representing their relationships with others by drawing pictures, adding captions to photos, creating posters or digital presentations to depict their family, labelling immediate and extended family members as *deaf* or *hearing*
- identifying themselves as members of different groups and describing their relationships with deaf, hard of hearing and hearing children, family members, the Deaf community and the wider 'hearing' society
- identifying and describing physical markers of identity among deaf children, for example hearing devices such as hearing aids, cochlear implants and FM systems
- identifying and discussing their own and each other's family names, given name/s and name signs
- identifying elements of their behaviours or relationships that mark their individual or Deaf community identity such as the use of Auslan
- identifying places that are significant to them personally and are important to their identity
- exploring relationships between place, space and people, considering why some places and spaces make deaf people feel comfortable and promote a sense of belonging, for example those that facilitate face-to-face communication
- considering roles and responsibilities in relation to membership of a Deaf community, for example by describing how they can help others to be aware of their communication preferences in the classroom or with extended family
- exploring their shared experience as 'people of the eye', for example by identifying the importance of space for waving or using flashing lights to gain attention or to give visual applause

Reflecting	Elaborations
<p>Notice similarities and differences between Auslan and spoken languages in relation to ways of interacting, sharing stories and playing games</p> <p>[Key concepts: language, culture, similarity, difference, respect; Key processes: noticing, comparing, responding]</p> <p>(ACLASFC011)</p> 	<ul style="list-style-type: none"> comparing aspects of their lives as signing children with those of non-signing children represented in digital images, video clips or stories, for example, ways of playing games, telling stories or interacting at school, home and in the community discussing changes or adaptations they have to make to their communicative style when interacting with non-signers

Understanding

Systems of language	Elaborations
<p>Recognise the main formational elements of handshape, movement and location in Auslan signs, and understand that a sign is the same as a spoken or written word even though it can be iconic</p> <p>[Key concepts: handshape, movement, location, iconicity; Key processes: noticing, recognising, understanding]</p> <p>(ACLASFU012)</p> 	<ul style="list-style-type: none"> noticing the handshape of individual signs, and identifying signs that are made with a particular handshape, for example, COCKATOO (hs:5) and SOCCER (hs:fist) recognising that signs are categorised by the handshape at the start of the sign understanding that signs can be organised by handshape, for example in Johnston's Auslan dictionaries or localised handshape dictionaries in schools, and that this is useful if an English word for a sign is not known noticing the path movement of a particular sign and identifying signs associated with the major types of path movements, for example, THROUGH (forwards) or FULL (down to up) noticing the five major locations of signs on the body or in space, and identifying signs associated with each, such as SEE (head/face), SAY (mouth/chin), WHY (chest), TALK (hand) and ONE (signing space) understanding that sounds in English words are like handshapes, movements and locations in Auslan in the sense that they are combined together to make signs recognising that some signs are iconic, linking to the appearance of a referent, for example, HOUSE, TREE, DRINK, ELEPHANT and that some are not, such as SISTER, WHY, SIMPLE recognising that unlike English, which can be spoken or written, signed languages are not usually written down but occur 'through the air' experimenting with different methods of capturing the signed language, such as: a class-invented script, drawing pictures, videoing, English glosses or ASL-phabet

Recognise that signing happens in a finite space that can be used meaningfully within individual signs, learning in particular how depicting signs, some verbs, pronouns and enacting make use of spatial relationships

[Key concepts: signing space, numeral incorporation, verb modification to show who; Key processes: explaining, describing, noticing, identifying]

(ACLASFU013)

- realising that meaning is communicated through the use of signs, pictures, written or spoken words or miming
 - describing the range of signing space in normal signed discourse
 - noticing that single-digit numbers can be separate lexical items or merged into other signs (numeral incorporation) such as those for ages (for example, 5-YEARS-OLD) or adverbs of time (for example, 3-WEEKS-AGO) or pronouns (WE3, WE4)
 - noticing that Auslan pronouns are different from English ones because they don't show gender but they can show location and a specific number of referents, for example, WE2 (inclusive) and WE3 (inclusive) or WE2-NOT-INCLUDING-YOU (exclusive)
 - noticing that enacting a role or modifying the beginning and end locations of some verbs can show the referents involved, for example:
PRO1 ASK PRO3 versus PRO1 ASK_{-her}
PRO3 ASK_{-me} CA:I-was-shocked

 - identifying what sort of things can be represented in a DS by a particular handshape, for example a distant *person*, *pole* or *tree* can be represented by a point handshape, and a *cylinder* can be traced by a C handshape
-

Recognise that groups of words combine to make clauses and include nouns and pronouns (people, places, things), adjectives (qualities) and verbs (happenings, states); and distinguish between statements and questions based on non-manual features

[Key concepts: sign class, clauses, telling versus showing; Key processes: recognising, observing, distinguishing]

(ACLASFU014)

- categorising noun signs into those for people, animals, places or things
- understanding that proper nouns can have a sign name or be fingerspelled
- knowing that adjectives describe nouns in different ways, such as how they look (BIG or RED), feel (SOFT or HOT), smell (SMELLY) or sound (LOUD)
- identifying verb signs (SIT, EAT, FEEL, WONDER, HAVE) and recognising that they are central to a clause
- recognising that there is no verb 'to be' in Auslan
- understanding that a clause is one or more signs expressing a single idea and that a clause has at least one verb, but often one or more nouns as well, for example,
CALL-him
I called him.
MAN THERE GO-TO POSS3 HOUSE
That man went to his house.
BIG MONSTER SCREAM
A big monster screamed.

▶ Auslan

- recognising different nouns in clauses, including those that are shown with a pointing sign, such as GIRL READ versus PRO3 READ, or VISIT FRIEND versus VISIT PRO3
- noticing that Auslan has more flexibility in word order than English
- distinguishing between clauses that are statements and those that are questions
- knowing that signing involves either telling with signs or showing with DSs and periods of constructed action (CA)
MAN WALK SLOW
DS(point):man-walks-slowly
CA:man-swinging-arms-nonchalantly

▶ Auslan

Understand that texts are made up of units of meaning, such as words, gestures or sentences/clauses and that different types of texts have particular features that help serve their purpose

[Key concepts: text, referent; Key processes: recognising, identifying, discussing]

(ACLASFU015)

- recognising that texts are made up of one or more clauses which together make meaning
- recognising that different signed texts serve different purposes, and discussing and comparing these purposes (for example, the text genre *procedure* is to explain how, a *narrative* is to narrate, tell or entertain)
- identifying characteristic structures and features of particular types of Auslan texts and noticing how they suit the intended purpose, for example, the expression of emotions in a recount compared to presenting facts in an information report
- identifying different signs used by a signer to refer to the same person in a text, considering how this helps to maintain interest and understanding

Language variation and change

Elaborations

Understand that all languages including signed languages vary and borrow words and signs from each other
[Key concepts: dialect, language borrowing, variation; Key processes: noticing, recognising]

(ACLASFU016)

- understanding that there are two main Auslan dialects: the southern dialect used in Victoria, South Australia, Western Australia, the Northern Territory and Tasmania and the northern dialect used in New South Wales, Queensland and the Australian Capital Territory
- viewing videoed examples of Auslan signers from different parts of Australia, identifying the different signs used in southern and northern dialects, for example, signs for colours and some numbers
- noticing that words such as proper nouns for names of people, places or schools are borrowed from English by fingerspelling and mouthing, but some also have sign names
- recognising that Auslan borrows from other languages just as English does, and collecting words and signs used in their everyday lives that come from different signed and spoken languages
- noticing the variation in 'handedness' between signers in relation to signs and fingerspelling: right handers using their right hand as their dominant (main) hand; left handers doing the opposite

Language awareness

Recognise that Auslan is a legitimate language, one of many languages used in Australia and around the world
[Key concept: language diversity; Key processes: identifying, recognising, comparing]

(ACLASFU017)

Elaborations

- identifying different languages used by their classmates or members of their families, for example by creating a class profile or language map
- exploring similarities and differences between the many languages used in Australia and represented in the school, including spoken and signed Aboriginal and Torres Strait Islander languages, and comparing the ways different languages use writing, sound/speech, gestures, drawings, art and signs to communicate
- recognising the unique nature of signed languages and understanding that there are many different signed languages in use around the world, including in Aboriginal and Torres Strait Islander communities, and that there is not one 'universal' signed language
- recognising that Auslan is a legitimate language, different from mime and gestures such as those used to accompany songs in spoken languages

Role of language and culture

Elaborations

Understand that people use language in ways that reflect their culture, such as where and how they live, who they live with and what is important to them

[Key concepts: language, culture, community, observable phenomena; Key processes: noticing, recognising, questioning, making connections]

(ACLASFU018)

- recognising that people from different places and backgrounds may use different languages and have ways of living and communicating that differ from their own
- appreciating that culture and cultural difference means that people may value different things or live differently, and noticing observable examples of such difference, such as ways of greeting (bowing versus shaking hands) or conveying information (through words versus signs)
- exploring how hearing people live in ways that may be different from how deaf people live, for example by responding to stimuli such as: *Compare how deaf and hearing people know someone is at the front door.* or *How do deaf and hearing people wake up in the morning?*
- recognising the importance of facial expression, eye gaze and non-manual features in conveying information in a visual-gestural language and culture
- recognising the importance of language, community and culture in relation to their own lives and in relation to other language groups and their communities
- considering how some spaces make deaf people feel comfortable, for example, contexts where distance between signers allows for easy visual access

Foundation to Year 2 Achievement Standard

By the end of Year 2, students interact with the teaching team, class visitors and each other to share information about themselves, their families, friends, routines, pastimes and experiences. They use fingerspelling or sign names as appropriate and lexical adjectives or size and shape specifiers (SASS) depicting signs (DS) to describe the appearance and characteristics of family members, friends or teachers, for example, POSS1 BROTHER OLD++ TALL SKINNY or POSS3 SISTER FRECKLES. Students recount shared and personal experiences and favourite activities, using plain or indicating verbs that are modified, such as PRO1 GO-TO_{-right}, PLAY_{-continuous}, RETURN_{-left}, or LAST-WEEK PRO1_{-plural} VISIT NANNA. They sequence events correctly using time markers such as YESTERDAY, LAST-YEAR, TWO-DAYS-AGO. They use everyday social exchanges such as greeting, thanking and apologising, and express feelings through the use of NMFs and lexical signs. They compare likes, dislikes and preferences, for example, PRO1 LIKE APPLE DON'T-LIKE ORANGE. They use appropriate NMFs to ask and respond to a range of **wh**- questions and **yes/no** questions. They indicate agreement/disagreement or understanding/lack of understanding by using other NMFs. They follow directions for class routines, for example, PLEASE DS:line-up-facing-front, and give and follow instructions of two or more steps, using directional terms or DSs such as DS:turn-left T-JUNCTION DS:turn-right. Students follow culturally appropriate protocols, such as responding to and using attention-gaining strategies such as flashing lights, waving or tapping a shoulder or table, using voice-off while signing, and observing appropriate distance between signers. They recall and retell specific points of information from texts such as class messages, directions, introductions and 'visual vernacular' descriptions, and they recognise familiar fingerspelled words. They follow procedural texts involving several steps and retell them using list buoys. They view short Auslan stories and respond by identifying and comparing favourite elements, characters and events. They use features of constructed action (CA) such as shifting eye gaze, or head or body-head orientation when creating imagined texts, and use NMFs to modify manner or intensify adjectives, such as REMEMBER PRO1 JUMP_{-really-far-and-high}. They identify themselves as members of different groups and describe their relationships with deaf, hard of hearing and hearing children, family members, and the community. They identify similarities and differences between how people interact and share stories in Auslan and in spoken languages.

Students know that Auslan is a language in its own right, different from mime and gestures used in spoken languages. They know that eye contact is necessary for effective communication and that meaning is communicated visually through the use of signs, fingerspelling, NMFs and non-conventional gestures. They recognise and describe the main elements of Auslan signs: handshape, movement and location; and identify and categorise signs according to these. They recognise that some signs link to visual images, for example DRINK, ELEPHANT. Students know that some words, such as proper nouns, are borrowed from English by fingerspelling and mouthing, and that locations or orientations of signs can be modified meaningfully, for example to show who is involved in an event. They recognise that signers can **tell** with lexical signs or **show** with DSs and CA, and that clauses include a verb and sometimes nouns. They recognise the importance of facial expression, eye gaze and NMFs in a visual-gestural language and culture.

Years 3 and 4

The nature of the learners

Learners at this level are developing their cognitive and social capabilities and their communicative repertoire in the language, as well as becoming increasingly aware of their social worlds and their membership of various groups, including the Deaf community. They are more independent and less egocentric, enjoying both competitive and cooperative activities. Learners are able to conceptualise and reason, and have better memory and focus. They benefit from varied, activity-based learning that builds on their interests and capabilities and makes connections with other areas of learning.

Auslan learning and use

Learners in this band engage in a range of activities involving watching and responding to signed texts. They build proficiency through the provision of rich language input from a variety of sources where grammatical forms and language features are purposefully integrated. They develop more elaborate conversational and interactional skills, including initiating and sustaining conversations, reflecting on and responding to others' contributions, making appropriate responses and adjustments, and engaging in debate and discussion.

Learners at this stage express ideas and feelings related to their personal worlds, give and follow directions, negotiate with and persuade others, paraphrase content of texts, form factual questions to request information, check and clarify understanding and participate in play and shared tasks, including planning and rehearsing presentations or performances.

They watch and create short texts on topics relevant to their interests and enjoyment, such as family, pets, favourite activities or food. They continue to build vocabulary that relates to a wider range of domains, such as areas of the curriculum that involve some specialised language use. The language used in routine activities is re-used and reinforced from lesson to lesson in different situations, making connections between what has been learnt and what is to be learnt.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team in the language classroom and the school environment, with some sharing of their learning at home. Additional enrichment and authentication of learning experience is provided through interactions with elders and other signers in the Deaf community. Access to wider communities of Auslan signers and resources also occurs through virtual and digital technology.

Texts and resources

Learners interact with a growing range of live and digital signed texts. They engage primarily with a variety of teacher-generated materials, stories and games, and with materials produced for young signers, such as storytelling apps. They have access to materials produced for signing children from the BAZSL family of languages as a means of broadening their cultural knowledge and awareness of the diversity of language experience.

Features of Auslan use

Learners recognise and apply elements of Auslan grammar, such as marking manner or aspect on verbs. They use increasingly sophisticated means of showing constructed action, and of using space to track a character or location through a text for purposes of cohesion. They develop metalanguage for talking about language, understanding and using terms such as fully- or partly-lexical signs, entity, handling or SASS depicting signs, constructed action, and adverbs and clauses.

Learners talk about differences and similarities they notice between Auslan and English, and also between cultural behaviours and ways of communicating. A balance between language knowledge and language use is established by integrating focused attention to grammar, vocabulary building, and non-verbal and cultural dimensions of language use with communicative and purposeful learning activity.

Learning Auslan in school contributes to the process of making sense of the learners' worlds, which characterises this stage of development. Students are increasingly aware that various signed languages are used in Deaf communities across the world. As they engage consciously with differences between languages and cultures, they make comparisons and consider differences and possibilities in ways of communicating in different languages. This leads them to explore concepts of identity and difference, to think about cultural and linguistic diversity, and about what it means to speak more than one language in the contemporary world.

Level of support

While learners work more independently at this level, ongoing support is incorporated into tasks, and the process of learning is supported by systematic feedback and review. Form-focused activities, particularly those increasing metalinguistic awareness, build grammatical knowledge and support the development of accuracy and control in Auslan. Opportunities to use this knowledge in meaningful activities build communicative skills, confidence and fluency. Tasks are carefully scaffolded: teachers provide models and examples; introduce language, concepts and resources needed to manage and complete learning activities; make time for experimentation and polishing rehearsed texts; and provide support for self-monitoring and reflection. The language students see is authentic with some modification. Discussion supports learning and develops learners' conceptual frame for talking about systems of language and culture.

The role of English

Auslan is the principal medium of instruction in L1 pathway classrooms. English plays a complementary role; for example, it is used when translating, creating bilingual/multilingual texts or comparing and contrasting languages. Discussion in Auslan supports learning, develops conceptual frames and builds metalanguage. The process of moving between languages consolidates the already established sense of what it means to be bilingual or multilingual and provides opportunities for reflection on the experience of living interculturally in intersecting language communities. Auslan is learnt in parallel with English literacy and, for some children, spoken English. The learning of Auslan supports and enriches deaf children's learning of English, and vice versa.

Years 3 and 4 Content Descriptions

Communicating		
Socialising	Elaborations	

Communicate with each other and with teachers about aspects of their personal worlds, daily routines, preferences and pastimes

[Key concepts: self, routines, preferences, pastimes; Key processes: expressing, describing, comparing, recounting, persuading]

(ACLASFC019)

- sharing feelings about important experiences or events, for example:
PRO1 EXCITED HOLIDAY SOON
I am excited about the holidays.
POSS1 FRIEND CHANGE OTHER SCHOOL PRO1 SAD
I was sad when my friend moved away.

- discussing preferences in relation to school or community activities, using comparatives and superlatives
PRO1 LIKE MATH, SCIENCE BUT POSS1 FAVOURITE ART
I like maths and science, but my favourite subject is art.

- comparing routines or activities, using signs for time, sequence and location, such as:
WHAT TIME PRO2 GO-TO-BED?
What time do you go to bed?
EVERY MONDAY POSS1 CLASS LIST-BUOY-1
READING LIST-BUOY2 MATHS LIST-BUOY-3
SWIMMING. POSS2 CLASS G:WELL?
Every Monday my class has reading, then maths, then swimming. What about your class?

- telling each other about daily routines or habits showing aspectual marking on verbs to indicate frequency, such as brushing teeth for a long time
- interacting with younger children or with people who are just beginning to learn to sign, adapting language to suit the situation
- describing actions and activities using NMFs to show manner, for example, PRO1 **WORK** versus PRO1 **WORK**_{-hard}
- participating in online exchanges such as vlogs to compare daily routines or interests with other deaf children or families
- using persuasive language in social interactions with each other, for example:
PLEASE POPCORN GIVE-me++ BEG?
Please can I have some of your popcorn?

Contribute to class activities and shared learning tasks that involve transacting, planning and problem-solving, using collaborative language

[Key concepts: collaboration, roles, responsibilities, memory;

Key processes: negotiating, collaborating, planning, transacting]

(ACLASFC020)

- working together in shared tasks such as cooking, craft activities or creating displays, signing questions or statements, for example:
BOOK WHICH WANT MAKE WHICH? PICK.
Which recipe do you want to make? You choose.
PLEASE PRO2 BRING SCISSORS PLUS PAPER?
Can you please bring scissors and paper?

- negotiating roles and responsibilities and expressing preferences when working on shared projects, using expressions such as I would prefer to do that; What job do you want to do?
PRO1 FILM PRO2 QUESTION_{-her}
I'll film; you ask her the questions.

- contributing to the development of a set of class rules
- engaging in activities such as treasure hunts that involve making choices, solving problems and giving and following directions, for example:
LIBRARY IN DS:turn-right AUSLAN DICTIONARY
DS:fat-book SHELF++ THAT. PLEASE BRING_{-me}
Go into the library, turn right and the Auslan dictionary will be on the second shelf. Bring that back to me.

- playing games that involve the exchange or discovery of hidden information, using descriptive language and appropriate questioning, for example:
HAVE BROWN EYES CURLY HAIR?
Does he have brown eyes and curly hair
CAN COOK WITH?
Can you use it for cooking?

- checking on understanding when completing learning activities, for example:
KNOW WHAT PRO1 MEAN?
Do you know what I mean?
THIS PRO2 FINISH THIS?
Do you think that's finished now?

- participating in games that involve turn-taking, active watching, memory and information exchange
- working together in design projects such as short films or displays to demonstrate content knowledge from different curriculum areas, sharing decisions about content, vocabulary and sequencing

Adjusting and responding to language and behaviour for various purposes in the classroom and wider school community, for example by asking and responding to questions, and indicating understanding
[Key concepts: respect, behaviour, protocol, group work; Key processes: clarifying, responding, asking and answering questions, encouraging]

(ACLASFC021)

- asking for repetition and clarification, for example:
WHAT?
What was that?
PLEASE AGAIN SIGN
Please sign that again.
WHAT MEAN?
What do you mean?

- responding to instructions when completing work or preparing for class
- adopting different roles for effective group or pair-work interactions, such as group leader, note taker or reporter
- using appropriate protocols when gaining the attention of a group, such as flashing lights, waving, multiple tapping or foot stomping in some contexts, waiting for eye contact or pauses in signing and using language such as EXCUSE or SORRY INTERRUPT or QUICK INTERRUPT when interrupting a conversation
- responding appropriately to impromptu or more formal class and school announcements, such as assembly procedures
- indicating understanding, for example:
RIGHT-YEAH
Aaah, right.

- clarifying points of information, for example by asking:
PRO2 MEAN...?
Do you mean ...?
THAT RIGHT?
Is that right?
...RIGHT PRO1?
... am I right?

- using eye contact and clear signing with peers, teachers, visitors and community members
- using an increasing range of interaction skills, such as initiating, maintaining and changing topics, remaining on task and taking turns in conversations
- understanding how to walk between signers engaged in conversation without interrupting
- developing appropriate conversational behaviours such as sharing ideas, acknowledging and extending others' contributions and making use of discourse markers, fillers and NMFs, such as:
SURPRISE
ooh (with appropriate intonation)
INCREDIBLE
No way!
WOW
Wow!
UM
um

- understanding and producing phrases to encourage and praise each other, for example, GOOD, EXCELLENT, CONGRATULATIONS

Informing	Elaborations
<p>Collect, classify and paraphrase information from a variety of Auslan texts and sources used in school and in the Deaf community</p> <p>[Key concepts: information, facts, vocabulary, findings; Key processes: recalling, paraphrasing, interviewing, surveying, recording, presenting]</p> <p>(ACLASFC022)</p> 	<ul style="list-style-type: none"> recalling specific points of information in signed classroom instructions or descriptions and responding to comprehension questions in Auslan paraphrasing the content of selected community texts, such as public service or promotional announcements on the Deaf Emergency Info website conducting an interview with a member of the Deaf community and reporting back to the class on key points using factual questions to request information about planned events or activities, for example in relation to details such as place, time or cost surveying peers about interests, preferences or routines, presenting findings in formats such as profiles, charts or graphs locating, organising and presenting information from Auslan resources related to other learning areas, such as science materials or cooking demonstrations, for example, <i>Sign & Cook for Kids</i> (Auslan Storybooks) learning new Auslan vocabulary and language structures through interacting with Deaf visitors and mentors, recording the new language in personal sign dictionaries
<p>Conveying information about aspects of school, culture and community, using knowledge of the intended audience to modify content</p> <p>[Key concepts: school, cultural events, games; Key processes: conveying information, explaining, planning, rehearsing]</p> <p>(ACLASFC023)</p>  	<ul style="list-style-type: none"> assembling an information pack about their school to support newly arrived deaf students using Auslan and visuals, including a signed glossary of the most relevant signs conveying information about cultural events, for example a digital report about a Deaf visitor for a school newsletter or a class website presenting factual information related to cultural activities and significant events such as Deaf festivals or sporting events, using visual supports such as a timeline explaining a favourite computer game, sport or playground game to a younger audience, highlighting key terms and supporting the information with pictures, gestures and demonstrated actions planning, rehearsing and delivering short presentations on chosen topics that take into account the particular purpose and intended audience relaying messages between different members of groups/teams during different stages of a group activity such as a cross-country or relay event, noting any changes in meaning or content at the end of the process signing a weekly informative text such as announcements, news updates or weather forecasts for the school website
Creating	Elaborations

Engage with imaginative texts such as stories, games, poems or cartoons, to demonstrate comprehension and express enjoyment

[Key concepts: story, emotion, expression, humour; Key processes: identifying, expressing emotion, re-enacting, experimenting, shadowing]

(ACLASFC024)

- viewing a signed story that involves progressive action, tension and resolution
 - identifying how signers use space to track a character or location throughout a text
 - viewing and responding to a range of Deaf poetry for children, for example by creating an alternative ending or extra verse
 - using NMFs to express changing emotions such as anticipation, fear or relief in response to elements of live or recorded signed stories
 - viewing and responding to short recorded skits, for example by re-enacting favourite elements and modifying manner or aspect to provide additional emphasis or expression
 - freezing cartoons or video clips of people/animals in amusing situations, signing a commentary on what has just happened and predicting what might happen next
 - experimenting with different Auslan parameters to create and perform examples of gestural humour, as modelled in performances by companies such as the Hong Kong Theatre of the Deaf
 - participating in games that focus on modifying manner or aspect for effect
 - viewing a theatre performance designed for a deaf audience and sharing their reactions to the experience of viewing a theatre performance designed for a deaf audience
 - engaging with different examples of Deaf humour or Deaf jokes and comparing them with examples of humour in spoken English or in silent films or mime
 - shadowing signed elements of theatrical or cinematographic texts that use handshapes, such as the scene with hand-faces in the film *Labyrinth*
 - comparing two signed versions of a story such as 'The Hare and the Tortoise' and indicating their preference for one version over the other
 - responding to elements of signed stories such as refrains or exclamations, for example by shadowing repeated signs, movements or facial expressions
-

Create or adapt imaginative texts and expressive performances that feature favourite characters, amusing experiences or special effects

[Key concepts: emotion, humour, performance, character; Key processes: creating, performing, adapting, dancing]

(ACLASFC025)

- performing stories for a live audience with a focus on the visual communication of emotion and humour
- adapting an element of a familiar cartoon or story to achieve a different effect, for example by varying the use of manner
- adapting a signed advertisement for a product popular with their age group to create a change in effect, for example by inserting additional elements, mood or characters
- signing stories or participating in play-based activities that require the use of constructed action to represent other people's actions, thoughts, feelings or attitudes
- adapting key elements of a popular picture book to create a short signed performance suitable for younger children being introduced to Auslan
- experimenting with the genre of storytelling, adapting the use of signing space and signing techniques and changing perspectives according to character
- performing an adaptation of a humorous story with two or more characters, using elements of constructed action such as shifting eye gaze and head orientation
- creating the next scene, a new character or an alternative ending for a signed fable, short story or cartoon
- choreographing and performing music-less dance, focusing on matching timing, beat and rhythm
- creating original handshape poetry to present at a school assembly or community festival
- playing with light and shadow, handshapes and movement, for example in shadow puppet performances

Translating

Elaborations

Translate high-frequency signs/words and expressions in simple texts such as repeated lines in a story or captions, noticing similarities, differences and instances of equivalence
[Key concepts: literal, difference, meaning, equivalence; Key processes: comparing, matching, identifying, translating]

(ACLASFC026)

- comparing key signs in Auslan used in versions of children's stories, for example, 'Jack and the Beanstalk', to English words used in written texts, and noticing how signs can convey rich, multilayered meaning which might not have a direct match in English captioning
- playing matching-pair games with Auslan sign flashcards and English word cards, matching cards in both languages associated with concepts such as weather or animals
- discussing the types of words/signs that seem to have direct matches/equivalents and those that equate to chunks of English in a single sign, for example GO-TO meaning *to travel to/to attend/to go to* in English
- identifying the iconicity of some signs, such as RAINBOW or DRINK, and how similar they are to the object/referent, and discussing how this transparency might help 'translatability' of concepts for non-signers
- identifying a list of gestures used by deaf people that might be easily understood by hearing people, for example, head nodding and shaking, pointing to the wrist for *time*, shrugging shoulders for *don't know*
- creating a class signed translation of repeated lines in familiar children's stories, such as *I'll huff and I'll puff and I'll blow your house down* and filming segments of such stories to screen to younger children in story reading sessions

Create bilingual versions of different types of texts, such as captioned recordings of Auslan phrases or classroom resources such as posters and digital displays
[Key concepts: bilingualism, meaning; Key processes: creating, identifying, categorising]

(ACLASFC027)

- creating captions in English for basic recorded signed texts, for example, a 'welcome to the school' video
- creating bilingual texts for the classroom or school community, such as posters including signed images or digital library displays, and discussing how to represent meaning in different languages for different audiences
- creating cards for use by younger children that contain pictures, labels and signs, for example, cards relating to different forms of transport
- making their own bilingual picture dictionaries with English labels, images and simple descriptions of signs, identifying and categorising signs according to handshape

Identity

Elaborations

Consider how individual and community relationships combine to create family and social networks, influence social behaviours and contribute to a sense of belonging and identity
[Key concepts: identity, relationship, belonging, place, behaviour, ways of interacting; Key processes: exploring, sharing, describing explaining]

(ACLASFC028)

- creating individual family trees and identifying deaf and hearing family members
- interacting with Deaf elders to discuss visual ways of being, interacting and behaving associated with identity
- designing visual representations such as concept maps, posters or captioned slide presentations to show individual and group connections within the Deaf community such as friendship, family or sporting groups, or state and national Deaf community associations, discussing how these contribute to a sense of identity
- exploring the concept of 'family' as it relates to the Deaf community, considering how it extends beyond the traditional concept to include broader social networks
- explaining how deaf families play a key role in language maintenance and shared sense of identity across generations
- exploring how name signs are created and form part of an individual identity, for example by providing contemporary examples such as signs for their peers, teachers and Deaf elders
- using a vlog journal entry to discuss how having peers who share the same language develops social bonds, personal confidence and a sense of shared identity
- responding to presentations by Deaf visitors to the classroom who share their experiences of education, family life, social networks, community and sense of identity, for example by discussing similarities and differences to their own lives
- sharing views on why certain places have special significance to the Deaf community, evoking a sense of belonging and pride and representing particular bonds between people, place and experience, for example, Deaf schools or sites of historic significance such as original Deaf Society/Mission buildings or other former meeting places
- identifying how deaf people share modifications to space to maximise visual attention, such as adjusting seating or removing visual obstacles

Reflecting

Elaborations

Describe some ways in which Auslan and associated communicative behaviours are similar to or different from wider community spoken languages and forms of cultural expression

[Key concepts: language, culture, values, similarity, difference, communication; Key processes: noticing, comparing, describing, explaining, questioning, reflecting]

(ACLASFC029)

- reflecting on their observations of similarities and differences between ways of communicating in Auslan and in Australian English in different social situations, for example, when greeting/leave-taking, introducing people or using body language, facial expression and eye contact
- considering the impact of the increased use of Auslan among their hearing peers when members of their school community are learning Auslan, and reflecting on their experience of interacting with these learners
- comparing their own and each other's reflections on the experience of learning and communicating in English as a second language
- reflecting on similarities and differences in communication that relate to culture, such as the extent of incidental learning available to hearing children compared to deaf children through interaction with their external environment, for example by overhearing conversations or news on the radio
- reflecting on the need for sustained eye contact when using Auslan in order to understand a message and before teacher instructions can proceed, and considering how this differs for hearing students in a spoken language environment
- describing how it feels to use Auslan to communicate outside their inner circle or school, or to watch Auslan being used by others, for example by responding to questions such as *What are the main differences you notice when observing a conversation between deaf people and one between hearing people?*

Understanding

Systems of language

Elaborations

Identify and demonstrate how the formational elements of handshape and its orientation, movement, location and non-manual features can be arranged in signs which may be iconic, and explore ways of recording Auslan

[Key concepts: orientation, hand dominance, iconicity, non-manual features, recording language; Key processes: identifying, recognising, comparing, distinguishing, comparing, describing, decoding]

(ACLASFU030)

- noticing the orientation of handshapes in signs
- identifying and demonstrating signs with a change in handshape, for example FIND or BEST
- identifying and demonstrating signs with a change in orientation, for example CAN-NOT or HOW
- distinguishing between single, double and two-handed signs, and identifying which hand is dominant and which is non-dominant in two-handed signs
- thinking of body-anchored signs, such as HEAD or WHY, and signs that are not body anchored, such as HAVE or STOP and recognising that non-body anchored signs can be located in space around the signer
- understanding that NMFs can also be an element of a sign and can show emotional states such as a happy expression or grammatical information, for example, a frown to mark a negative
- comparing iconic signs that provide visual images of referents, such as DRINK, ELEPHANT, with English words that map to the sound images of the referents, such as animal noises, or words for sounds such as *bang*
- describing how the movement changes between groups of related numbers, for example, 5, 15, 50, 5th
- learning to film themselves and analyse the video or to read simple glosses produced by the teacher, and understanding that the English word used is often not an exact match for the meaning of the sign

Observe that signers can include different information, including gestural overlays, within a single sign, and identify examples of signers using space grammatically through points, depicting signs and constructed action

[Key concepts: space, function of points, indicating verbs, depicting signs, constructed action; Key processes: recognising, identifying, discussing, comparing]

(ACLASFU031)

- recognising that Auslan has fully-lexical signs that are in the dictionary and have a standard handshape, movement and location, and partly-lexical signs that cannot be listed in a dictionary in all forms as they change their form each time they are signed, such as DSs
- noticing that fully- and partly-lexical signs can include grammatical information not included in a 'citation' form, for example, the sign TELL _{-me} is not listed separately to TELL (towards neutral space) and GO-TO includes GO-TO _{-often}
- discussing the functions of different pointing signs, such as pronouns, determiners and locatives
- understanding that some verb forms in Auslan indicate who is involved in a verb by changing the direction of the movement or orientation of the handshape
- noticing the relationship between the location of referents and the direction of some indicating verbs
- recognising who is the actor and undergoer of the verb in a clause
- identifying with support examples of DSs and becoming familiar with the terms *entity*, *handling* and *SASS DSs*
- comparing English adjectives with SASS DSs
- knowing that signers can reconstruct/act out their own or another's talk and/or actions and that this is called CA

Understand that clauses can be enriched through the use of adjectives and adverbs (when, where, how), often produced with non-manual features

[Key concepts: verb types, adverbs, clause structure, questions; Key processes: recognising, exploring]

(ACLASFU032)

- exploring different semantic types of verbs in a text, for example by showing how:
 - *doing* (WALK, WRITE) and *saying* (TELL, CALL-OUT, ANNOUNCE) verbs in narrative texts give information about a characters' actions
 - *sensing* (SEE, THINK) or possessing (THAT'S-TYPICAL-OF-THEM, OWN) verbs indicate what characters think, feel or own
 - *relating* verbs identify or describe a noun (for example, HAVE in PRO3 HAVE LONG-HAIR)
- noticing that some signs modify the meaning of verbs, such as READ **CAREFUL** and that these are called adverbs
- contributing examples of signs that tell:
 - when a verb happens (**IN-2-WEEKS** PRO1 HOLIDAY or WANT LUNCH **NOW**)
 - where a verb happens (PRO3 RUN **FAR** or COME **HERE**)
 - how a verb happens (**FAST** or **SLOW** or PRO2 **QUICK** FINISH)
- noticing that sometimes Auslan signers have information about how a verb happens through NMFs rather than separate signs, for example, WRITE ^{carelessly}
- noticing that clauses can be made more vivid by integrating CA or DSs to show with body or hands or by showing adverbial or adjectival meanings
- understanding that, in terms of meaning, a basic clause represents: a happening or a state (verb), who or what is involved (noun or nouns) and the surrounding circumstances (adverb or adverbs)
- distinguishing between yes/no questions and wh-questions and noticing that each type of question has different NMFs

Understand how signers make different language choices in different types of texts depending on the purpose and intended audience, and explore how space is used in Auslan for purposes of textual cohesion

[Key concepts: textual features, similarity, difference, cohesion; Key processes: identifying, examining, comparing]

(ACLASFU033)

- noticing that differing purposes in the creation of Auslan texts result in differing types and amounts of signing, for example, the use of more CA in narratives
- comparing a short text in Auslan with an equivalent type of English text (for example, a recount in both languages) and noticing similarities and differences in structure and language features
- identifying with support, examples of signers associating non-present referents with locations in signing space
- identifying examples of signers pointing to an established location to refer to something
- identifying how signers establish locations and noticing how this helps the audience to recognise who or what the referents are (actor and undergoer)

Language variation and change

Elaborations

Recognise that there is variation in Auslan use, for example in different locations or physical environments

[Key concepts: variation, adaptation; Key processes: identifying, recognising, exploring, considering]

(ACLASFU034)

- exploring similarities and differences in Auslan dialects through building webcam relationships with other schools or through identifying and collecting signs that differ in the 'northern' (NSW, Qld and ACT) and 'southern' (Vic., SA, WA, NT and Tas.) dialects, such as DINNER or AFTERNOON
- recognising that variation also occurs in spoken languages and noticing some different words for the same thing in English, such as cossie/cozzie, togs or bathers
- identifying Auslan signs or informal home signs that might be different from signs used by other people
- considering adaptations to Auslan use when communicating in different physical environments, such as in video chats, across a large yard, or when one or both hands are occupied, for example, variations in vocabulary, size of signing space, clarity of signs, use of fingerspelling and NMFs
- recognising variation in adaptation of signing between different users of Auslan, for example, people who are deafblind use hand-over-hand signing and tactile fingerspelling

Language awareness

Elaborations

Develop awareness of the social and cultural nature and context of Auslan and other sign languages, of their different modes of expression and of the related issue of language vitality

[Key concepts: communication, culture, language vitality; Key processes: identifying, describing, recognising, understanding]

(ACLASFU035)

- identifying different ways Deaf community members communicate with each other and with members of the wider hearing community, including face to face or via technology such as NRS or VRS, through social media, the use of English or the use of interpreters
- describing the visibility and use of Auslan in the wider community, for example in television programs; on the news; at community events, sporting fixtures; and in emergency announcements
- recognising that Aboriginal and Torres Strait Islander peoples' use of signed languages is culturally determined and shaped by their beliefs and values
- exploring the vitality of Auslan and other spoken and signed languages, appreciating that a language with strong vitality is one used by many people in the home and other domains, across generations, to talk about most topics
- understanding that some languages used in Australia such as English have large numbers of users, while others, such as many spoken and signed Aboriginal and Torres Strait Islander languages, are endangered or in the process of being revived or reclaimed
- understanding that Aboriginal and Torres Strait Islander signed languages arise from specific needs, for example, certain cultural restrictions on speech, or the presence of deaf people
- identifying behaviours, rights, roles and responsibilities in relation to the ownership and maintenance of Auslan, and identifying how this ownership rests with the Deaf community and is determined by traditional social groupings/families, place, history and stories

Role of language and culture

Elaborations

Explore connections between identity and cultural values and beliefs and the expression of these connections in Auslan
[Key concepts: language, culture, symbol; Key processes: exploring, understanding, noticing, recognising, questioning, making connections]

(ACLASFU036)

- exploring culture as an essential part of human life, understanding that it is shared and passed on between generations and is closely connected to language and to identity
- understanding that culture is more than the visible aspects of people's lives; that it also includes invisible elements such as beliefs and values, how people think about themselves and others, how they relate to their social and physical environments, and how these understandings apply to themselves as users of Auslan and members of the Deaf community
- recognising that in each culture there are general rules for what to say and do, when, where and with whom, and that these rules differ from culture to culture, for example, the Deaf culture places greater importance on eye contact than cultures that communicate through spoken languages
- recognising that language reflects values and beliefs, such as in expressions of personal identity or in the recognition of others (*sameness* and *difference*), for example by identifying deaf family members as part of introductions, and by relaying cultural information about background and context and shared knowledge when interacting with others
- appreciating the social and cultural nature of deaf humour in a visual language

Years 3 and 4 Achievement Standard

By the end of Year 4, students communicate with each other, the teaching team and others about aspects of their personal worlds, daily routines, preferences and pastimes at school and in the Deaf community. They show aspectual marking on verbs to indicate frequency when communicating about daily routines, for example *pro3 tap-shoulder-repeatedly*, and use modifications to show manner when describing actions and activities. They initiate and maintain interaction by using discourse markers such as fillers, checking and clarifying their understanding. They contribute to class activities and shared learning tasks that involve transacting, planning and problem-solving, for example, by giving and following directions, LIBRARY IN DS: turn-right AUSLAN DICTIONARY DS: fat-book SHELF++ THAT. PLEASE BRING-me, expressing preferences, asking for clarification and using persuasive language PLEASE POPCORN GIVE-me++ BEG? They use appropriate cultural protocols in different situations, for example, to gain the attention of a group, such as flashing lights, waving, multiple tapping or foot stomping in some contexts, waiting for eye contact or pauses in signing and walking between signers without interrupting them. They paraphrase information from a variety of Auslan texts and sources used in school and in the Deaf community. They recall specific points of information and recount main points in correct sequence EVERY MONDAY POSS1 CLASS LIST-BUOY-1 READING LIST-BUOY-2 MATHS LIST-BUOY-3 SWIMMING. They plan, rehearse and deliver short presentations about topics such as cultural activities or events in the Deaf community, with the support of materials such as photos, props, timelines or maps. They take into account the purpose and intended audience of a text. They view imaginative texts such as stories, poems and theatre performances, identifying how signers represent their own or others' actions through constructed action (CA). They create simple imaginative texts of their own, using CA to represent their own or other people's actions, thoughts, feelings or attitudes. They create signed class translations, for example, of repeated lines in familiar children's stories, and simple bilingual texts for the classroom or school community, such as posters or bilingual picture dictionaries. Students identify places that are important to the Deaf community and describe how such places evoke a sense of belonging and pride. They recognise that the single most unifying factor of the community is the use of Auslan; and they describe ways in which Auslan and associated communicative and cultural behaviours are similar to or different from wider community spoken languages and forms of cultural expression.

Students demonstrate how the formational elements of handshapes and their orientation, movement, location and non-manual features can be arranged in signs, identifying, for example, whether a sign is body anchored or not, or is single, double or two-handed. They know the functions of different pointing signs, such as pronouns, determiners or locatives; and can identify examples of signers using a location to refer to a previous referent. They use metalanguage to talk about Auslan, using terms such as *constructed action*, *depicting signs*, *indicating verbs*, *non-manual features*, *pointing signs* and *clauses*. They recognise variation in how Auslan is used, for example by recognising regional dialects and differences in signing space. They identify different ways that Deaf community members communicate with each other and with members of the wider hearing community, for example, face to face, via technology, social media and interpreters. They know that culture is closely related to language and to identity and that it involves visible and invisible elements.

Years 5 and 6

The nature of the learners

This is a key transitional phase of learning. Learners communicate more confidently, are more self-directed, and self-reference in relation to wider contexts. Response to experience is more analytical and critical, allowing for a reflective dimension to language learning and to referencing cultural frameworks. The curriculum ensures that learning experiences and activities are flexible enough to cater for learner variables, while being appropriate for learners' general cognitive and social levels.

Auslan learning and use

At upper primary level, learners use Auslan for a widening range of purposes, such as paraphrasing or summarising key ideas; conversing with visitors in formal and informal contexts, contributing their own ideas, questions and opinions; discussing cause and effect; providing instructions for a group activity; planning and conducting an interview; and contributing to discussions by clarifying and critiquing ideas and developing supporting arguments.

At this level, there is focused attention on language structures and systems, and comparisons are made between Auslan and English. Learners' communicative capabilities are stronger and more elaborate. They draw on a wider range of grammatical and lexical resources to compose and comprehend more complex language. With support, they build increasing cohesion and complexity into their signing in both content and expression. They watch a range of varied input from different sources and build more elaborate conversational and interactional skills. This includes initiating and sustaining conversations, using turn-taking protocols, 'reading' language for cultural and contextual meaning, reflecting on and responding to others' contributions, making appropriate responses and adjustments, and engaging in debate and discussion.

Shared learning activities develop social, cognitive and language skills and provide a context for purposeful language experience and experimentation. Individual and group oral presentation and performance skills are developed through researching and organising information, structuring and resourcing presentation of content, and selecting appropriate language to engage a particular audience. Learners use ICT to support their learning in increasingly independent and intentional ways, exchanging resources and information with each other and with young people of the same age in other signing communities, accessing media resources, maintaining vlogs and other web pages, and participating in social networks.

Contexts of interaction

Learners interact in Auslan with each other and the teaching team and with members of their families who can sign, and the Deaf community. They have access to Deaf visitors and cultural resources in wider contexts and communities through the use of ICT and through the media. Language development and use are incorporated into collaborative and interactive learning experiences, games and activities.

Texts and resources

Learners engage with a growing range of signers and digital signed texts. They also engage with resources prepared by their teacher, including games, performances, presentations and language exercises. They may have additional access to BANZSL resources created for the Australian, New Zealand or British Deaf communities, such as children's television programs, websites, music or video clips. They also make use of texts from other signed languages that make extensive use of the 'visual vernacular'.

Features of Auslan use

Learners draw on grammatical and lexical resources to produce and understand more complex language. With support, they build increasing cohesion and complexity into their language production in both content and expression. Learners expand their understanding of Auslan grammatical forms and features, including mastering the range of grammatical NMFs and gaining full control of depicting signs. They increase their pragmatic skills, such as using eye gaze to gain, hold or finish a turn; making constructive comments to keep a conversation flowing; and sharing information and providing context to new participants to a conversation.

They build metalanguage to talk about aspects of language such as grammar, for example, identifying types of verbs in Auslan in terms of how they use space to indicate referents, as well as recognising the types of depiction available in Auslan. They begin learning how signers put these forms of depiction and enacting together into composite utterances. Discussion, reflection and explanation ensure the continued development of learners' knowledge base and metalinguistic and intercultural capabilities.

Understanding of the relationship between language, culture and identity is developed through guided investigation of how language features and expressions carry specific cultural meaning; through critical analysis of cultural stereotypes, attitudes and perspectives; and through exploration of issues related to personal and community identities. Learners take account of the variability of language use and practice in relation to various factors. They reference themselves in relation to similar variables, reflecting on the relationship between language, culture, identity and intercultural experience through the lens of their own bicultural experiences.

Level of support

While learners are becoming more autonomous and independent at the upper primary years, ongoing support is still incorporated into task activity, including explicit instruction, structured modelling and scaffolding, and provision of appropriate stimulus materials. Additional systematic feedback and review support the interactive process of learning. Learning experiences incorporate implicit and explicit form-focused language learning activities and examples of texts and tasks. Learners are supported to use electronic and print reference resources, such as word banks, dictionaries and translating tools, and are encouraged to adopt a critical approach to resource selection.

The role of English

Auslan is the primary language for classroom routines, discussions, reflections, interactions and language learning tasks, and for explanation of content drawn from other learning areas. English is used for metalinguistic analyses and comparisons, and within the 'Translation' sub-strand. English may also be used for researching cultural issues where relevant sources or materials are not available in Auslan.

Years 5 and 6 Content Descriptions

Communicating	
Socialising	Elaborations

Interact with people for different purposes, using descriptive and expressive language to give opinions, talk about themselves and show interest in others

[Key concepts: experience, opinion, values, ideas; Key processes: comparing, socialising, discussing, summarising, identifying]

(ACLASFC037)

- comparing personal experiences and opinions and expressing agreement or disagreement in a respectful manner, for example:
AGREE YES or PRO1 AGREE
Yes, I agree.
PRO1 KNOW WHAT MEAN, BUT ...
I know what you mean, but ...
DOUBT
I'm not sure
AGREE-NOT
I don't agree ...

 - using NMFs and eye gaze to gain, hold or finish a turn when communicating in pairs or groups
 - discussing school experiences or events, for example:
THEATRE GOOD, LONG-^{really}
I liked the theatre performance but it was soo long.
SCHOOL SWIMMING RACE, GOOD BAD, PRO2 THINK WHAT?
What did you think about the swimming carnival?

 - using interactional strategies such as paraphrasing, questioning and interpreting non-verbal cues when communicating with their peers or teacher
 - participating in online exchanges such as vlogs with deaf Auslan users in other contexts to discuss topics of shared interest, such as peer pressure or family expectations
 - exchanging views with their peers to identify values that they hold as important, for example, caring for the environment or providing support resources for the deaf community such as subtitles on TV/movies
-

Collaborate with peers to plan and conduct shared events or activities such as performances, presentations, demonstrations or transactions

[Key concepts: negotiation, perspective, design; Key processes: planning, suggesting, organising, presenting]

(ACLASFC038)

- working in teams to plan an event such as a performance for a younger audience or a presentation for school assembly
 - negotiating roles, responsibilities and priorities in activities such as cooking or science experiments, making suggestions such as:
PRO2 THINK BEST THIS FIRST, FINISH, NEXT THAT
Do you think we should do this first and when that's done, that next

 - and using conditional language such as:
IF FINISH, CAN NEXT++, IF NOT-YET HEADSHAKE
If we finish this we can go on to the others; if we don't, we can't.

 - organising activities such as excursions, using questions such as:
WE2 MEET WHERE?
Where are we meeting?
TIME MEET?
What time should we get there?
ARRIVE HOW?
How are we getting there?

 - using digital technologies to prepare a humorous, dynamic perspective on a controversial proposition, such as 'Homework should be banned' to present to teachers or parents
 - playing games that involve working competitively within groups to categorise or classify information
 - problem-solving in teamwork activities, using language such as:
HOW FIX SOLVE?
How can we solve this?
WHAT DO?
What can we do next?

 - planning, rehearsing and producing a performance for school assembly or parent open night
 - working in a group to plan a visual story to present to a younger group at school or via video
 - planning and conducting an interview with a deaf visitor to class, using questions to elicit extra information
 - working on collaborative tasks that involve negotiation and shared decision-making about content and design, for example, designing a class garden, creating digital picture books for 'buddy' classes, or promoting a school event
 - conducting, recording and presenting observations and findings of collaborative science experiments
-

Contribute to discussions and shared learning activities by asking and responding to questions to clarify or indicate comprehension, managing interactions and monitoring and evaluating their learning

[Key concepts: discussion, conversation, participation; Key processes: supporting, managing, clarifying, reflecting

(ACLASFC039)

- helping to manage discussion, for example by asking specific questions to check meaning, making constructive comments to keep conversation moving, reviewing ideas expressed and conveying tentative conclusions
- using strategies that support effective participation in shared learning activities, including signing clearly, pausing for others to respond, asking pertinent questions, rephrasing, repeating and linking their own contributions to those of others
- exploring and clarifying others' ideas and summarising their own, and reporting back to a larger group
- engaging in conversations and discussions with guest speakers, using active watching behaviours and contributing their own ideas, questions and opinions
- reflecting on their learning experiences, checking on their own and each other's progress and providing each other with feedback, advice or reminders
- sharing information and providing context for a new participant joining a conversation
- contributing to discussions by clarifying and critiquing ideas and developing and supporting arguments, using statements such as:
I FEEL YOU RIGHT TALK OVER BECAUSE...
I think it's good you are talking about, because...

- making connections between ideas, actions and effects, using reflective language such as:
FAIL WHY? BECAUSE THAT DS:length WRONG, FAIL
Because this happened ... then ...
IF LIE++, HAPPEN TRUE, PEOPLE STILL DOUBT.
If you always lie, when you tell the truth, people will still doubt you.

Informing

Elaborations

Identify, summarise and compare information obtained from different types of Auslan texts or from their own data collection

[Key concepts: informative text, topic, data, analysis; Key processes: interviewing, surveying, collating, analysing, summarising, presenting]

(ACLASFC040)

- viewing different types of informative Auslan texts, such as instructional sports videos or science demonstrations, showing understanding by responding to questions in Auslan
 - viewing live or recorded interviews or informal conversations between Auslan users in different situations and contexts, summarising key points and topics covered
 - collating and analysing information obtained from Auslan media reports on people or events, organising the information visually in a mind map
 - surveying a range of hearing and deaf people on an issue of shared interest, analysing and presenting results through short signed presentations or in chart, graph or table form
 - interviewing a deaf adult about their educational experiences and comparing these with their own
 - summarising and contrasting information contained in two differently sourced Auslan texts on a selected topic
 - summarising key ideas and information provided by deaf visitors using active watching behaviours and contributing questions and responses
-

Present information to describe, explain, persuade or report on different experiences or activities in ways likely to engage the intended audience

[Key concepts: report, audience, intention, technique; Key processes: instructing, informing, persuading, reporting]

(ACLASFC041)

- providing step-by-step instructions to peers, for example directions to a location or explanations of how to build a model
- creating signed announcements that use persuasive techniques to inform others about upcoming events, for example a Deaf theatre performance or National Week of Deaf People
- reporting in digital form on their experiences of shared events such as school camps or concerts to send as feedback to the organisers
- creating a video report of an event in Deaf history as a contribution to a shared e-book resource
- developing a signed news report or public announcement to inform or alert an imagined audience of a recent or impending natural disaster
- providing instructions for a group activity such as a maths or computer game
- creating a digital clip or social media post that presents information on a selected issue in ways designed to persuade or dissuade the intended audience, for example an anti-smoking post or a clean-up-the-environment appeal
- engaging with deaf visitors from different groups and backgrounds by creating a vlog about the visits and their responses to different identity stories
- explaining a new concept encountered in content areas such as geography or history, such as erosion or revolution
- preparing a short signed presentation for their peers drawing on information obtained from library resources or media texts on topics related to other curriculum areas such as visual arts or history

Creating

Elaborations

Engage with different types of creative and imaginative texts by identifying important elements, discussing ideas, characters and themes and making connections with their own ideas and experience

[Key concepts: emotion, manner, visual expression, theatre conventions; Key processes: comparing, responding, expressing, creating]

(ACLASFC042)

- comparing their reactions to imaginative texts that evoke positive or negative emotional responses, making connections with experiences in their own lives that have produced similar feelings
- participating in performance activities such as unscripted response-to-stimulus role-plays, recognising how characters' feelings and attitudes are expressed through NMFs and manner
- viewing and comparing expressions of Deaf experience through different visual art forms, such as painting, photography or sculpture, comparing with their own use of visual forms of expression of feelings and experience
- drawing comparisons and making connections between their own experiences and those of fictional characters in popular television series or films
- comparing the use of rhyme in written verse with the repetition of handshapes and movement paths in signed poetry performance
- identifying cultural conventions of Deaf theatre, such as maintaining eye contact and positioning of characters
- identifying key messages or values conveyed through folktales, myths or legends, for example by creating mind maps to show relationships between concepts such as courage, loyalty, love
- describing the shape and sequence of a shared story or skit, identifying elements such as setting the scene, climax and resolution
- considering how different modes of creative expression, such as theatre or visual arts, influence personal response to texts
- tracking and reflecting on the experiences of deaf dancers and choreographers, for example as contestants in shows such as *So You Think You Can Dance*
- viewing and responding to sign poetry from around the world, for example by comparing responses to differences and similarities in 'visual vernacular'

Create live or filmed performances that engage specific audiences and present imagined experiences, people or places

[Key concepts: suspense, humour, dramatic structure, stimulus; Key processes: creating, performing, narrating, reinterpreting, improvising]

(ACLASFC043)

- working collaboratively to create a filmed episode of a pilot for a new Deaf sitcom, incorporating elements such as conflict, suspense or humour
- creating and performing imaginary scenarios that reflect experiences in their own lives
- creating a performance for a class or school talent show, such as a signed song, skit or humorous retelling of an anecdote
- signing different versions of a familiar short story, changing perspectives according to different characters
- creating original stories or short plays for younger learners of Auslan, incorporating scene-setting, action/conflict and resolution, and including opportunities for audience participation
- creating a video record of an imagined formal or informal interview, incorporating elements of humour or tension and building character and mood through the use of NMFs and pauses
- creating additional dimensions or changing the focus of a fictional experience by varying the use of manner, constructed action, space and aspect
- participating in a class storytelling competition, conforming to conventions of character perspective and relationship with audience
- creating amusing reinterpretations or spoofs of traditional fairytales, using exaggerated elements of sign and gesture
- improvising spontaneous responses to a stimulus such as 'Sixty Seconds to Make the Audience Laugh, Cry ...'

Translating

Elaborations

Translate a variety of familiar school and community texts from Auslan to English and vice versa, identifying which words or phrases may not readily correspond across the two languages

[Key concepts: equivalence, meaning, culture-specific concepts; Key processes: identifying, interpreting, translating, determining, predicting, creating, comparing, explaining]

(ACLASFC044)

- finding and using phrases that have direct sign-for-word translations between Auslan and English, such as *Goodnight*, *Happy birthday* and *Happy New Year*, and some that do not, such as *None of your business!*
- identifying issues associated with translation, such as multiple meanings for words like *run*, the fact that meaning is not always literal and that sign translations of a word will vary according to the meaning of the concept in context
- conducting sight translations of simple English texts such as short news articles
- translating short texts such as children's fairytales, simple song lyrics or a short poem from English to Auslan
- translating and explaining the meaning of words or expressions associated with figurative language use in Auslan, such as *TRAIN GONE*, *SORRY* and comparing these to English idioms
- determining the meaning of technical English words used in other curriculum areas, for example, natural disasters or global warming, demonstrating how they would translate or explain them in Auslan
- translating the school song into Auslan, identifying lexical challenges and finding suitable Auslan equivalents to match the English concept
- identifying and explaining signs that are not easy to translate into English because of culture-specific meaning and history, for example, signs such as *Deaf school*

Create their own bilingual texts and learning resources to use themselves or to share with others, such as Auslan–English dictionaries, posts to websites, digital newsletters or school performances

[Key concepts: equivalence, bilingualism; Key processes: composing, creating]

(ACLASFC045)

- composing bilingual texts for class or school assembly performances, events or displays, for example, National Week of Deaf People announcements
- using bilingual online dictionaries and electronic tools to compose bilingual texts, for example, captioned Auslan texts such as an online Auslan–English version of a school newsletter
- constructing and co-maintaining a bilingual website with a Deaf school
- creating bilingual texts for younger children, such as a mini Auslan–English dictionary of school-specific signs

Identity

Elaborations

Consider the influence of the Deaf community on identity development, focusing on language, social systems and sense of space and place

[Key concepts: identity, relationship, community, place, space, story, social mores, history, Deafhood, Deaf gain; Key processes: identifying, describing, investigating, discussing, explaining]

(ACLASFC046)

- identifying markers of social and cultural identity that may be important across cultures as well as in the Deaf community, for example, elements of language or behaviours associated with family, community, location, age or gender
- building a basic understanding of the concept of Deafhood and of how individual journeys of identity contribute to social relationships and community, for example, by describing their own journey of identity development, including elements such as family, the influence of Deaf role models, significant life events or personal connections with the local Deaf community
- working with elders to map relationships and connections within their community, for example by identifying links between notable deaf families, and by considering how personal connections with the community contribute to their sense of identity
- investigating the historical origins of signs linked to identities, for example, the signs for LIBRARY and ADELAIDE were derived from original name signs for people
- considering how the relationship between language and identity plays a role in contributing to individual, peer group and community wellbeing
- exploring how different technologies are used by deaf people to support social networks and strengthen their sense of shared identity
- explaining the significance of stories linked to Deaf social history and the responsibility of the Deaf community to convey shared experiences that relate to Deaf space, for example through stories about school days by past pupils
- exploring the role of personal narratives in teaching and supporting deaf children to develop strategies to navigate a hearing world, such as carrying paper and pen or smart phone to type notes
- learning from Deaf elders about roles and responsibilities with respect to caring for their culture's places and spaces and preserving a sense of shared identity, for example, by maintaining and passing on artefacts, images and stories, creating new uses for Deaf places or participating in Deaf festivals, fair days and National Week of Deaf People activities
- recognising that their first language is a birthright that contributes to their identification with the Deaf community and its traditions
- identifying examples of deaf people who have been recognised for different reasons in the wider society, for example, Alastair McEwin, and discussing whether such recognition contributes to their own sense of identity and belonging
- interviewing local Deaf elders about their experiences in Deaf schools and other Deaf places and discussing how their experiences create a collective sense of identity
- discussing the concept of 'Deaf gain' in relation to their personal identity, for example, in using a visual language and being able to communicate from a distance

Reflect on how different language and cultural backgrounds and experiences influence perceptions of Auslan and of the Deaf community and also of the hearing community

[Key concepts: influence, perspective, self-reflection; Key processes: composing, comparing sharing, monitoring, identifying, analysing, explaining, reflecting]

(ACLASFC047)

- reflecting on and providing possible explanations for assumptions that hearing people might make about deaf people or about signed languages
- examining some misconceptions about hearing people and culture held by members of the Deaf community, for example, that hearing people hear and understand everything, or that hearing people can hear from a distance
- identifying how various emotions and attitudes, such as respect, shyness, exuberance or embarrassment, are expressed and may be perceived across different languages and cultures, comparing their experience of such differences in their own interactions with speakers of English or other spoken languages
- explaining how their assumptions about users of other languages and ways of understanding the world are changing as a result of intercultural language and experiential learning
- reflecting on language and cultural differences in forms of address in signed and spoken languages that need to be taken into account when interacting interculturally, for example, the frequent use of a person's name when addressing them directly in Australian English but not in Auslan
- reflecting on the role of personal storytelling in teaching and supporting deaf children to navigate a hearing world

Understanding

Systems of language

Elaborations

Describe the elements of sign production, including non-manual features, and explore the processes of annotating Auslan with multimedia software and/or glossing or transcribing signed texts on paper

[Key concepts: types of iconicity, annotation, transcription; Key processes: identifying, recognising, annotating, describing, understanding]

(ACLASFU048)

- describing a sign's form in terms of handshape, hand arrangement, orientation, movement and location
- identifying some iconic signs and considering how they are iconic
- identifying, demonstrating and describing the various types of NMFs: movements of the eyebrows, eyes, nose, mouth, cheeks, shoulders and body
- noticing that, in a stretch of connected signing, a sign will often be produced differently to the way it is shown in a dictionary
- understanding that many features of signed languages occur simultaneously, compared to spoken language features which typically occur sequentially
- recognising that some signs can occur with a standard mouth gesture and that these are sometimes called multi-channel signs
- identifying and classifying examples of DSs and CA in a video text using video annotation software, for example, ELAN
- 'reading' a glossed text, including interpreting the markings that show how a sign is modified in space, NMFs, DSs and examples of CA
- glossing a text with support, identifying what signs are used, any NMFs, and using a system of recording handshapes when describing DSs

Identify different types of verbs based on their ability to integrate space into the sign, and recognise types of depiction available to a signer, namely, entity, handling and SASS depicting signs and constructed action

[Key concepts: establishing a spatial location, types of depicting signs, function of constructed action; Key processes: identifying, distinguishing]

(ACLASFU049)

- identifying where and how a signer has established a location in space, for example through the use of points, non-body-anchored signs or fingerspelled words
- distinguishing, with support, between directional and locational indicating verbs, and noticing that verbs differ depending on whether modification of movement happens at the start, end or start and end of a sign
- identifying examples of DSs in an Auslan text, and recognising that handshape and movement represent different things in each type of DS, for example:
 - *entity DSs*: the handshape is an object or person, and the movement is the movement or location of that object or person
 - *handling DSs*: the handshape represents a person's hands touching or moving another object, and the movement shows how the hands move
 - *SASS DSs*: the handshape and movement outline the shape or size of something
- learning that the function of CA is to represent the words, thoughts or actions of a protagonist in a text, either themselves or another
- knowing that in CA a signer can shift into the role of another, or themselves at a different time, through eye gaze change, body shift, head orientation change, and matching facial expressions

Understand that the starting point of a clause gives prominence to the message, that clauses can be linked equally or unequally with conjunctions and connectives, and that signers can show as well as tell about an event to provide more detail

[Key concepts: gestural overlays, clause conjunction, variable sign order; Key processes: recognising, distinguishing]

(ACLASFU050)

- recognising that quantifiers such as FEW or THERE are also types of adjective signs
- recognising that some adverbs modify adjectives, not verbs, for example VERY and that these modifications to adjectives can also be expressed with NMFs, for example changes in mouth patterns and movement of signs can intensify adjectives, for example, RED ^{-really}, PLEASED ^{-really}, TALL ^{-really}
- distinguishing between the citation form of a sign and the adverbial NMF overlaid and what meaning each part carries, for example: MAN SPRINT (base form), MAN SPRINT _{-fast} (manner added)
- recognising how conjunctions such as PLUS, IF or BUT are used to join clauses and create cohesion
- recognising that clauses can be linked equally, for example:
STUDENT BORED, TRY FOCUS
The student was bored and tried to focus.

- or unequally, where one clause depends on another, for example:
I-F BORED, OPEN-BOOK READ
If you are bored, read a book.

- recognising that the element of a clause that a signer wants to focus on most in Auslan is sometimes moved to be signed first and that this process of topicalisation involves particular NMFs
- noticing that word order within a clause is freer in Auslan than in English and that parts of a clause can be signed simultaneously, making it hard to establish word order
- realising that in many clauses signers 'tell' with fully-lexical signs at the same time as 'show' with DS, CA and other gestural elements
- recognising that some nouns are not signed overtly in a clause, for example in the clauses below, the noun (the swimmer) is given in the first clause but not repeated in the second
PRO2 SWIM DETERMINED SWIM, NOT WIN
You swam really hard but you didn't win.

Identify structures, language features and cohesive devices used in different types of texts, recognising that language choices reflect purpose, context and audience

[Key concepts: referent, cohesion, space; Key processes: identifying, noticing]

(ACLASFU051)

- examining different examples of an Auslan text type (for example, one to inform or one to persuade) and identifying choices signers made, for example the amount of fingerspelling they used
- noticing how signers achieve textual cohesion and coherence through the use of connectives that create links between clauses, for example BUT and G:WELL
- identifying the many ways signers can refer to the same referent in a text, for example by using DSs, points, list buoys, and how such strategies support understanding
- annotating in ELAN or similar software where a signer is using established locations to refer to a noun referent

Language variation and change

Elaborations

Explore variation in terms of the impact of other languages on Auslan across contexts and over time

[Key concepts: influence, language borrowing, style shifts; Key processes: noticing, recognising, explaining]

(ACLASFU052)

- noticing different ways that English words are borrowed into Auslan, for example, the use of fully fingerspelled words, such as D-U-E, N-O-U-N, the fingerspelling of the first letter of corresponding English words, for example TOILET, FATHER, or abbreviations of English words, for example, state names: S-A, N-S-W, V-I-C, T-A-S, and organisation names: N-A-B-S, W-A-A-D, N-S-W-A-D, D-C-S-S-A
- creating lists of fingerspelled words which have become lexicalised, for example, HOW, BUT, ABOUT, FOR, and looking at how this process has changed the form of words over time
- recognising that Auslan includes loan signs from Signed English, some of which were invented for Signed English (for example, TOY or DAD) and some that were from the southern dialect and incorporated into Signed English, for example, YELLOW
- looking at style shifts in domains where English is in closer contact with Auslan, such as the use of more English-like structures in formal and educational settings
- explaining the influence of other signed languages such as BSL, ISL and ASL on Auslan over different periods of time and discussing reasons for such influence

Language awareness

Elaborations

Explore the current status and profile of Auslan and of the Deaf community in contemporary Australian society, considering issues such as language transmission, usage and documentation

[Key concepts: diversity, representation, language transmission, documentation; Key processes: describing, discussing, investigating, representing]

(ACLASFU053)

- discussing the diversity of Auslan users in the Australian community, including people who are deaf, those who are hard of hearing and hearing people such as CODAs and interpreters
- investigating the signed languages used by deaf and hard of hearing members of Aboriginal and Torres Strait Islander communities
- exploring variation in Auslan fluency among classmates and members of the Deaf community, considering the relevance of factors such as where and when individual users learnt to sign and whether they are from a Deaf or hearing family
- mapping sign language use around the world using data from Ethnologue, for example by identifying and labelling countries with correct naming of the sign language used, such as France = LSF: Langue des Signes Française; Germany = DGS: Deutsche Gebärdensprache
- finding representations of signing deaf people in the media or in literary texts, and evaluating how they and the language are represented
- investigating the profile and distribution of members of the Deaf community, for example across states of Australia or by age or gender, using data from censuses and other sources to summarise and represent information in graph/visual forms, and to suggest possible explanations of patterns or statistics
- understanding the role and function of Auslan–English interpreters and Deaf interpreters and the access and opportunities they provide to language users
- recognising that many languages are well-documented, strong, healthy and widely used by many people across generations while others are less documented and robust
- recognising that some languages have no written form and have historically been passed on face to face/orally, which means that they are less well recorded or documented
- recognising language documentation as an important means of recording, maintaining, transmitting and revitalising a language
- understanding the nature of transmission of Auslan, for example, that in most cases Auslan is not passed on from parent to child but from peers, or is learnt by children from adults outside the family, and that some deaf people learn Auslan later in early adulthood
- describing how Auslan has been transmitted across generations and how it has been recorded, investigating reasons for the 'oral' tradition language transmission
- using the UNESCO atlas to map the world's minority languages and those that are in critical endangerment and to document the vitality of signed languages

Role of language and culture

Elaborations

Reflect on how communities' ways of using language are shaped by and reflect cultural values and beliefs, and how these may be differently interpreted by users of other languages

[Key concepts: cultural expression, transmission, values, beliefs; Key processes: observing, making connections, discussing, investigating]

(ACLASFU054)

- explaining the role of Auslan and Deaf culture in maintaining, reflecting and strengthening the Deaf community and its networks and significant places
- understanding that knowledge about past and present Deaf people and cultural experience and values is embodied in and transmitted through Auslan, for example ways of producing the sign for SIGN reflects cultural values placed on fluency
- identifying the cultural importance of different elements of communication, such as the use of signing space and proxemics by Auslan users, particularly in relation to a person passing between two signers or the positioning of communication partners
- identifying cultural differences between the use of personal names in Auslan and other languages, such as the fact that Auslan signers do not use a person's name when addressing them directly as do users of many spoken languages
- recognising that different types of expressive and imaginative performance in Auslan carry cultural as well as linguistic information, for example, a film or theatrical performance that represents typical miscommunication experiences
- understanding that 'sound' is accessed differently in Deaf culture, that the meaning and importance of sound in deaf people's lives is usually not the same as in hearing people's experience
- exploring ways in which deaf people's art incorporates sign language motifs and images as forms of cultural expression
- analysing stories about deaf people's history for the ways in which they embody cultural values and information, for example accounts of Thomas Pattison, FJ Rose and William Thomson establishing the first schools for deaf children

Years 5 and 6 Achievement Standard

By the end of Year 6, students use Auslan to interact with people for a range of different purposes. They use descriptive and expressive language to share and compare experiences, ideas and opinions, such as THEATRE GOOD, LONG_{-really}, LONG_{-really}. They participate in class discussions and show interest and respect for others, for example by using active watching behaviours, signing clearly, pausing for others to respond, asking pertinent questions, making constructive comments, rephrasing, repeating and linking their own contributions. Students use non-manual features (NMFs) such as eye gaze to gain, hold or finish a turn when communicating in pairs or groups. They provide context for a new participant joining a conversation, PRO1 TALK-OVER MATH TEACHER. They use action-oriented language to make shared arrangements, organise events and complete transactions, negotiating roles, responsibilities and priorities and taking into account the views of others. Students locate, summarise and compare information from a range of sources. They present information on selected issues to inform, alert or persuade people, for example, by creating announcements to inform about an emergency or about a clean-up the environment appeal, or instructions for a computer game. They use a range of connectives to create textual cohesion. They view and compare expressions of Deaf experience through different visual art forms, such as painting, photography or sculpture. They view and respond to different types of creative and imaginative texts, discussing ideas, characters and themes; and they identify how a signer has referred to the same referent in different ways, for example with a lexical noun then with a depicting sign (DS). They create and perform their own short imaginative texts based on a stimulus, concept or theme using space to track a character or location throughout a text. They translate a variety of familiar school and community texts from Auslan to English and vice versa, identifying which words/signs/phrases require interpretation or explanation. They create bilingual texts and resources for their own language learning and to support interactions with non-signing people. They describe their connections with the Deaf community and how these contribute to their sense of identity. They reflect on differences between how signed language and spoken language users may be perceived, for example in relation to different protocols when joining interactions, taking turns, using names, or passing between people who are communicating with each other.

Students describe a sign's form in terms of all the elements and how they are put together, including types of NMFs. They recognise when a signer has established a location in space in a text and describe how this was done, for example through the use of points, non-body-anchored signs or fingerspelled words. They distinguish between the three types of DSs and what they represent and how they are used in clauses. They identify and describe how constructed action (CA) can be shown in different ways, for example, through a change in eye gaze, body, or head orientation, and by matching facial expressions and reference to another character. They identify how signers use space to track a referent through a text, for example by pointing back to an established location to refer to a noun or by modifying indicating verbs. They understand different ways that English words are borrowed into Auslan and identify connections between Auslan and other signed languages, for example, BSL, ISL and ASL. They recognise the diversity of Auslan users in the community, including people who are deaf, hard of hearing and hearing people such as CODAs or interpreters. Students recognise how Auslan has been transmitted across generations and describe different ways it has been documented and recorded. Students reflect on the ways culture is differently interpreted by others, for example by identifying how stereotypes about deaf and hearing people influence perceptions.

Years 7 and 8

The nature of the learners

The transition to secondary schooling involves social and academic demands that coincide with a period of maturational and physical change. Learners are adjusting to a new school culture with sharper divisions between curriculum areas. There is a need for continuity through change in relation to their language learning. Learners at this level may find themselves in classes that include learners with a range of previous experience with Auslan. A multilevel and differentiated approach to teaching and task design responds to this diversity of prior experience. For bilingual learners at this level, such as deaf students who also use spoken English, the duality of living between languages and cultural frames impacts on the process of identity construction.

Learners at this level bring a range of learning strategies to their language learning. They are increasingly aware of the world beyond their own and are engaging with broader issues related to youth and society, land and environment, education and identity, while establishing a balance between increasing personal independence and social responsibilities. They are considering their future pathways and choices, including how their own language could be part of these.

Auslan learning and use

Auslan is used for classroom interactions and transactions, for creating and maintaining classroom relationships, for explaining and practising language forms, and for developing cultural understanding. Learners use a range of grammatical structures and language features to convey more complex ideas and experiences. They use descriptive and expressive language to create particular effects and to engage interest, and expand their vocabulary to domains beyond their personal experience and interests. They use language to dramatise narratives, follow detailed directions, demonstrate and explain activities, evaluate events and ideas, debate and give presentations that take account of different perspectives.

They are increasingly aware of the nature of the relationship between languages and cultures, making connections between texts and cultural contexts, identifying how cultural values and perspectives are embedded in language and noticing how language choices influence how people, issues and circumstances are represented.

Additional opportunities for interaction in Auslan are provided by purposeful and integrated use of ICT. Learners work collaboratively and independently, exploring different modes and genres of communication with particular reference to their current social, cultural and communicative interests. They pool language knowledge and resources to plan, problem-solve, monitor and reflect. They create and present more complex and varied texts, for example, shared stories, poems, vlogs and reports; and plan, draft and present imaginative and informative texts, making cross-curricular connections. They use vocabulary and grammar with increasing accuracy and complexity, planning and polishing pre-prepared signed texts to improve structure and clarify meaning.

Contexts of interaction

While the primary context of interaction remains the Auslan classroom through interaction with peers and the teaching team, additional enrichment and authentication of the learning experience is provided through visiting members of the Deaf community, media and community events, and social media. Students may also have opportunities to participate in school excursions or camps.

Texts and resources

Learners work with a broad range of live and digital signed texts designed for learning Auslan in school and for authentic non-school purposes. Texts come from a range of domains and genres, such as oral histories, community announcements, vlogs and stories, and they serve a variety of purposes, such as informative, transactional, communicative, imaginative and expressive. Learners may also have access to community facilities and functions. The Deaf community is the most important resource for learning, as the origin of most of the texts and communicative situations engaged with by learners.

Features of Auslan use

Learners continue to expand their language use to additional domains beyond their personal experience and interests. They use a range of grammatical forms and language structures to convey more complex relationships between ideas and experiences, creating compound and complex sentences by using lexical conjunctions as well as NMFs. They become increasingly aware of the rich choices available to a signer in composite utterances, for example by shifting from depicting signs to constructed action to lexical items. They recognise that signers shift perspectives between character or observer space to show different viewpoints.

Learners develop awareness of how language structures shape textual features. They use descriptive and expressive language, including iconicity and metaphor, to create particular effects and engage interest. They adopt a wider range of processing strategies and broader language knowledge when encountering unfamiliar signed texts, drawing increasingly on their understanding of text conventions and patterns.

Learners make connections between texts and cultural contexts, identifying how cultural values and perspectives are embedded in language and how language choices determine how people, issues and circumstances are represented. They are increasingly aware of the nature of the relationship between languages and cultures, noticing, for example, how values such as family commitment and respect are expressed in cultural practices as well as embedded in Auslan grammatical and vocabulary systems. They reflect on the nature of bicultural and intercultural experience, on how languages change in response to social and cultural change, and on their individual identities as users of two or more languages in a multicultural social context.

Level of support

Particular support is required at this stage of learning to manage the transition to secondary schooling and to encourage continued engagement with language learning. Opportunities to review and consolidate prior learning are balanced against provision of engaging and relevant new experiences and tasks that are more challenging. While learners at this level are less reliant on teacher support during interactions, the teacher continues to provide implicit and explicit modelling and scaffolding in relation to meaningful language use in a range of contexts, and explicit instruction and explanation in relation to language structures, grammatical functions, vocabulary and abstract cultural concepts. Opportunities for learners to discuss, clarify, rehearse and apply their knowledge are critical in consolidating language capabilities and developing autonomy. Learners at this level are encouraged to self-monitor, for example, by keeping records of feedback and through peer support, and to self-review and adjust language in response to their experiences in different contexts. Students are encouraged to engage more critically with resources such as websites, dictionaries, translating tools and other language resources designed to enrich their receptive and productive language capabilities.

The role of English

Auslan is used for all classroom interaction, and English is used in the translating sub-strand or when required for research purposes where a source text is not available in Auslan. Students may have varying skills in English. Using Auslan to express ideas and feelings, exchange opinions and manage shared activities increasingly involves cultural as well as linguistic choices; personal and social elements as well as grammatical ones, such as making decisions about whether to use more or less English-like signing. At this stage, learners can move from the ‘what’ considerations to the ‘why’ and ‘how’ questions: from noticing that language and communication are culturally shaped to thinking about the values, experiences and perspectives which lie inside these cultural differences, and about how these impact on their own experience as they move between linguistic and cultural systems.

Years 7 and 8 Content Descriptions

Communicating	
Socialising	Elaborations
<p>Initiate and sustain interactions to share ideas and interests, report on experiences, offer opinions and connect with events in their school and local community</p> <p>[Key concepts: ideas, interests, community, issues; Key processes: comparing, contrasting, discussing, expressing]</p> <p>(ACLASFC055)</p> <p></p>	<ul style="list-style-type: none"> exchanging opinions about topics such as food, sport, lifestyles, health, music or travel participating in videoconferencing to compare and contrast aspects of their school experience, for example by communicating online with deaf students from different schools in another state/territory discussing the relationship between events in their school or local community and interest groups they identify with by conducting an in-class survey describing aspects of their school, community, home or social lives, for example: SCHOOL DS(5CLAW):located-at DS(C):l-shape... <i>The school is located here, and then there's a large L-shaped building on the right.</i> WEEKEND, I VISIT HEARING FRIEND WE2 WATCH MOVIE OR DS:2-people-walk SHOPS OR SOMETIMES STAY HOME DS:press-console <i>On the weekends, my hearing friend and I like to go to the movies or the shops, but sometimes we just play video games.</i>  offering opinions about issues under consideration in their class or school community, such as their school policy on social media use developing narrative and expressive skills by exchanging accounts of personally significant influences, experiences or milestones, identifying common experiences, such as describing their favourite holiday or their personal hero comparing their experience of involvement in the Deaf community, and sharing their views on the importance of this experience in their lives by describing their relationships with deaf people outside of school

Engage in collaborative activities that involve planning, project design, problem-solving and evaluation of events or activities

[Key concepts: project design, procedure, direction; Key processes: creating, showcasing, reporting, evaluating]

(ACLASFC056)

- working with a partner to create a visual resource that promotes Auslan as an important subject choice
 - working in groups to create a series of promotional resources for the school website
 - organising and participating in visits by respected members of the Deaf community to their school to share knowledge and to promote Auslan skills in the wider community
 - planning presentations to showcase aspects of Deaf culture likely to be unfamiliar to the hearing community
 - reporting on and evaluating completed events or activities that they had planned together, for example:
FIRST PRO1 DOUBT I-F WILL GO-WELL, HAVE-A-LOOK GO-ALONG GOOD
At the start, I wasn't sure it would work, but after a while I thought it went well.
PRO1 WRONG NEVER AGAIN DO SAME
I won't do that ever again.

 - following sequenced directions that involve the use of practical information, for example:
SEE DS:wavy-surface, KNOW WHERE SCRATCH? S-A-N-D POLISH MORE DS:thick-to-thin 2MM SMOOTH
See where the surface is uneven? You sand that back 2 mm and it gets smooth.

 - working in pairs to create instructional or procedural texts that demonstrate and explain activities
 - planning and presenting a cultural item for a school open day, such as celebration through drama or visual story of an important member of the Deaf community
 - discussing in pairs possible design options for an item such as language flag, artefact or logo that incorporates elements of significance to the Deaf community, presenting reasons for specific design suggestions, then voting as a class on a preferred design
-

Use interactions to support discussion and debate and to demonstrate culturally appropriate behaviours in and beyond the classroom

[Key concepts: protocol, debate, role, feedback; Key processes: debating, clarifying, eliciting, evaluating]

(ACLASFC057)

- following protocols for interacting with sign language interpreters in various contexts in and out of school
- using statements and discussion techniques to participate in class and school debates, for example by acknowledging others' opinions and supporting their own with examples and accounts of personal experiences
- understanding and adopting different roles in a debate, using more elaborated sentence structures and interactional strategies to support discussion and provide clarification, for example:
PRO2 DIGRESS NEED COME-BACK-TO-POINT
You've gone off the topic. Can you get back to your point?
SUMMARY...
In summary;
PRO2 CONFUSE. PRO1 WIND-BACK
I've confused you; let's go back ...

- using evaluative language to acknowledge strengths in others' arguments or to challenge others' views in a courteous manner, for example:
RIGHT-YEAH, PRO2 DIFFERENT PERSPECTIVE.
PRO1 NEVER THOUGHT
Oh yeah, that's a different take on it. I never thought about it that way.
G:WELL RIGHT-YEAH, BUT I WANT ADD COMMENT
Well, yes, that's true but I'd like to add something.

- being a supportive group participant, for example by asking relevant questions, providing feedback, prompting and eliciting contributions from others

Informing

Elaborations

Investigate and synthesise information collected from a range of perspectives and sources, identifying how culture and context affect how information is presented

[Key concepts: perspective, culture, context, source, representation; Key processes: researching, comparing, critically reviewing, profiling, summarising]

(ACLASFC058)

- summarising ideas and information included in presentations by deaf visitors
 - collecting and summarising information on a selected topic sourced from different contexts, considering how context affects presentation of data
 - viewing Auslan texts that present different views on an issue of relevance to their age group, such as cochlear implants or social inclusion, considering how context and culture shape perspectives
 - researching information relating to deaf political movements at different times and in different contexts, drawing comparisons with current deaf organisations, such as the Deaf President Now movement and recruitment of Deaf CEOs
 - surveying peers or members of their family/community on topics related to deafness and the use of Auslan, discussing how commentaries they collect reflect different viewpoints and cultural perspectives
 - collecting information from texts such as interviews, documentaries or presentations to use in new forms, for example, to create a profile of notable Deaf Australians, such as Alastair McEwin, Nola Colefax, Colin Allen or Drisana Levitzke-Gray
 - paraphrasing and evaluating segments of recorded interviews with deaf artists on social media talking about their experience and artistic practice, for example, Deaf Arts Network
-

Exchange/provide information, opinions and experiences in either formal or informal contexts

[Key concepts: debate, persuasive text, perspective, critical review; Key processes: summarising, comparing, evaluating]

(ACLASFC059)

- working in groups to create an informative multimedia text that invites debate of a social or cultural question, such as the medical versus cultural view of deafness
- viewing two or more related signed texts on a selected topic, summarising and comparing key points of information and rephrasing for a class presentation
- creating texts such as vlogs or advertisements that present information intended to convince or persuade others of the importance of learning Auslan
- giving presentations that include different perspectives on a selected issue, for example identifying and evaluating differences in views in relation to Deaf education
- creating and presenting explanations about simple biological or mechanical processes, such as how the ear, hearing aids and cochlear implants work
- presenting a critical review of media profiles of respected/high-profile members of the Australian Deaf community, focusing on the relationship between texts and contexts
- summarising visual ways of communicating, transmitting and receiving information and how these influence group learning and information sharing among Deaf people
- working with an interpreter to decide how to present information on a selected topic to a hearing audience
- identifying and profiling Deaf artists who make use of music, as in work associated with the Deaf Performing Arts Network

Creating

Elaborations

Interpret a range of texts that involve the creative expression of emotions or ideas and the imaginative representation of people, events and cultural experiences

[Key concepts: imagination, representation, characterisation, artistic practice, Deaf experience; Key processes: paraphrasing, evaluating, exploring, analysing, profiling, shadowing]

(ACLASFC060)

- exploring how cultural values in relation to identity are reflected in different forms of artistic expression, such as poetry performances by Walter Kadiki or John Wilson's 'Home'
- viewing performances by deaf artists who communicate elements of the Deaf experience through different art forms, for example the deaf rapper Signmark or the singer/signer Sean Forbes
- analysing performances of Deaf poetry, for example by discussing themes, expression and construction and comparing how sign choice and stylistic techniques combine to convey ideas and emotions
- watching performances of Deaf theatre groups such as the Australian Theatre of the Deaf, and identifying all the ways a signer refers to the same referent throughout
- recognising the contribution of NMFs to characterisation and emotional expression in signed stories, skits or sketches
- identifying the different roles of storytelling in Deaf culture, such as teaching, entertaining, communicating values or traditions, finding examples of these in well-known stories, fables or legends
- evaluating Deaf performances or art forms that use technology such as camera and lighting techniques to expressive effect, for example performances by Ian Sanborn or Edan Chapman
- exploring and describing the use of colour and images by different deaf artists such as Juan Fernández Navarrete or Nancy Rourke
- engaging with signed versions of media texts, comparing visual elements to those for a hearing audience, for example, the teen drama Switched at Birth or teen dramas from BSL Zone
- exploring the concept of metaphorical iconicity used in poems and narratives, for example by shadowing selected elements
- analysing how elements of theatre performance, such as emotional nuance, are communicated through interpreters in a live setting
- engaging with animations made by or about deaf people and critiquing the effectiveness of conveying all parameters of signing, for example, The Long Knife, or Gallaudet: The Film by Braam Jordaan
- identifying how Deaf art forms represent people, experiences and Deaf spaces and contribute to the building of a sense of identity and cultural awareness

Create imaginative and expressive texts that draw from their experience as Auslan users and members of the Deaf community and which support the experience of younger learners

[Key concepts: Deaf experience, emotional expression, signed theatre, signed space; Key processes: composing, performing, creating, re-creating]

(ACLASFC061)

- composing and performing soliloquies that capture elements of the Deaf experience in a hearing world
- creating resources to support younger learners of Auslan, such as signed versions of games such as 'Guess Who?', riddles, treasure hunts or amusing tales
- creating imaginative texts that present abstract ideas, such as hope, inclusion, friendship, in creative or amusing ways
- creating an Auslan version of a popular song, using elements of all parameters to convey key messages and nuance emotional expression
- creating a piece of art, such as a drawing, painting or photo collage, that reflects their experience of living in and moving between the Deaf and hearing worlds
- engaging with the work of Deaf theatre groups such as the Australian Theatre of the Deaf, using elements of performances as models for their own experimentation with signed theatre
- creating a performance for a school or Deaf festival based on the lives of celebrated or historical members of the Deaf community
- presenting a short story based on their own experience of being a deaf student in a hearing school community, incorporating key elements of narrative structure, such as character introduction, problem/conflict, resolution
- re-creating a theatre set from a two-dimensional image using signed space

Translating

Elaborations

Translate and interpret unfamiliar texts in Auslan or English and compare their translation to those of their classmates, considering why there might be differences in interpretation and how language reflects elements of culture and experience [Key concepts: equivalence, representation, meaning, interpretation; Key processes: translating, interpreting, creating, paraphrasing, summarising, shadowing, comparing, explaining, role-playing]

(ACLASFC062)

- identifying Auslan phrases and expressions encountered in unfamiliar texts that do not translate literally into English, comparing their interpretation with those of their classmates
- considering possible consequences of lack of equivalence between Auslan and English words and phrases in terms of intercultural communication, providing examples from their own experience
- analysing an Auslan version of a frozen text such as the Australian National Anthem, considering why some words or expressions require freer translation than others
- developing in consultation with deaf Aboriginal and Torres Strait Islander students and elders an Acknowledgement of Country in Auslan that is appropriate to their school location for use in gatherings, events and school assemblies
- paraphrasing and summarising short Auslan texts containing unfamiliar content, providing simple translations in written English
- translating simple filmed texts in Auslan into transcribed written English captions
- shadowing quality signed texts in Auslan as a pre-interpreting skill and as a means to enhance presenting skills and confidence as a subset of interpreting skills
- comparing translations in Auslan, BSL and International Sign of stories such as 'Little Red Riding Hood' to Auslan versions of the same stories, discussing differences in vocabulary and approaches to translation on a free to literal continuum
- comparing their own translations of short set texts in Auslan or English with those of their classmates, noting variations and discussing possible reasons for these
- observing and interacting with deaf guests to the classroom who use different signed languages, such as ASL or a traditional signed language used by deaf Aboriginal and Torres Strait Islander people, identifying any differences between languages and acting as an interpreter with support
- evaluating different interpretations of selected texts, using translation resources such as Mac software, digital dictionaries and online materials, considering questions such as *Does this represent the exact meaning? What other ways could this be interpreted or translated?*
- explaining the role of accredited Auslan–English interpreters and that of Deaf interpreters in the Deaf community, demonstrating through role-play correct protocols for working with interpreters
- exploring metaphors used in Deaf art and discussing whether these translate well to the hearing world
- role-playing basic sight translation techniques with simple, school-specific or everyday texts, using an autocue or text and signing the translation to camera
- developing a written English glossary of terminology in relation to sign language translation and interpreting

Create bilingual texts to use in the wider school community, identifying words/signs or expressions that carry specific cultural meaning in either Auslan or English

[Key concepts: equivalence, interpretation; Key processes: creating, captioning, transcribing]

(ACLASFC063)

- creating bilingual texts that inform the school community about Deaf culture
- captioning examples of deaf poetry, noticing areas of difficulty and considering possible reasons for this, and comparing individual translations with those of classmates to determine if similar challenges were faced by others
- creating bilingual public information texts, such as details about Deaf community events such as the National Week of Deaf People schedule and the importance of the event, and posting these on the school website
- transcribing short, simple spoken texts such as instructions or procedures into Auslan and filming the translations, for example, recipe requests by food technology teachers for their classes

Identity

Elaborations

Explore the relationship between identity, community and visual ways of being and the nature and significance of relationship between people, culture and place/space
[Key concepts: identity, relationship, Deafhood, place, space, responsibility, ownership, Deaf gain, story, guidance; Key processes: comparing, describing, exploring, discussing, investigating]

(ACLASFC064)

- creating and comparing individual biographies, including elements such as family origins, traditions, beliefs, experiences, and considering how these influence their sense of identity
- identifying elements of visual awareness in deaf people, such as good observation skills of body language and alertness to hazards in the environment while walking/driving and signing
- describing how the concept of Deafhood applies to them and to others by evaluating texts and media portrayals of deaf identity
- discussing visual ways of transmitting and receiving information and how these influence group learning and information sharing among Deaf people
- exploring how Deaf cultures around the world build shared group identity, for example through gathering formally as national and international communities through activities such as Deaf film festivals, performing arts or sporting events such as Deaf Way, Australian Deaf Games, Deaflympics
- discussing when and how they learnt Auslan and how this contributed to their sense of identity
- analysing ways in which Deaf people design and adapt spaces in cultural ways ('Deaf space'), for example, by eliminating visual obstacles to signed communication; using circles or semicircles for meeting and learning spaces; and using open-plan areas, lighting and window placement to maximise visual access to information, with reference to Gallaudet University's Deaf space design principles
- considering how accounts by different deaf visitors to the classroom of their lives, work, education, interests and experience reflect a sense of identity and relationship with Auslan and Deaf culture
- identifying ways in which members of the Deaf community demonstrate responsibility for relationships within the community and between it and the wider 'hearing' society, for example, describing past learning from deaf adults or other deaf peers about navigating relationships
- investigating and explaining connections between rules, culture and community, identifying how these are demonstrated in Deaf culture through visual ways of being and using language, for example, exploring the values and beliefs which influence observable behaviours and social rules
- suggesting how reciprocity works in relation to community members sharing responsibility for each other's wellbeing, comparing examples of how they themselves negotiate relationships with each other and look out for each other
- exploring the concept of 'Deaf gain' and providing examples of how wider society may 'gain' from the Deaf community, for example the benefits of captioning for groups such as elderly people or newly arrived migrants
- describing how the Deaf community maintains Deaf

places and keeps them relevant to new generations, for example by acknowledging Deaf pioneers in the naming of places and identifying historical links with places

- discussing with elders how patterns of ownership and management of Deaf spaces and places impact on the Deaf community
- describing their experience of moving between English and Auslan, comparing how this feels and considering changes in their sense of identity when communicating in either language
- sharing their understandings of Deafhood and Deaf gain with Deaf elders and comparing these the elders' views on these concepts

Reflecting	Elaborations
<p>Participate in and reflect on intercultural interactions and experiences, for example by considering and comparing their responses and strategies when engaging with hearing people [Key concepts: intercultural experience, ways of knowing and being, discrimination; Key processes: comparing, analysing, explaining, reflecting, exploring]</p> <p>(ACLASFC065)</p> 	<ul style="list-style-type: none"> • comparing their experience of interacting with hearing people in various domains online or face to face, such as after-school sports clubs, analysing these experiences in terms of their perceptions, understandings or attitudes • reflecting on how differences between signed and spoken language users may be perceived, for example in relation to different protocols when joining interactions, taking turns, using names, or passing between people who are communicating with each other • reflecting on the concepts of insider and outsider views of the Deaf community and on their own position as first language learners of Auslan • reflecting on their own and others' social attitudes and responses to differences in behaviours or communicative styles, for example on how they feel when hearing people do not make eye contact during an interaction • reflecting on how their own ways of communicating may be interpreted by hearing people, and on how they need to modify or consider other communication strategies and behaviour, such as the use of eye contact, facial expression or body language • comparing strategies used by deaf and hearing adults to negotiate the physical environment, for example, different behaviours that reflect different perceptual perspectives in contexts such as travelling in a lift
Understanding	
Systems of language	Elaborations

Investigate and explain why signs are structured as they are, including with respect to iconicity, and compare transcription of Auslan video annotation software with glosses

[Key concepts: levels and types of iconicity, transcription; Key processes: identifying, recognising, glossing, annotating]

(ACLASFU066)

- understanding that signs can be iconic in a number of ways, such as representing a whole object or part of an object
- identifying signs with different levels of iconicity, for example, those that are fully transparent, translucent or arbitrary
- recognising that signed languages show more iconicity than spoken languages because they are visual not auditory, and that most referents have visual features
- identifying and classifying examples of spatial modifications of nouns and verbs in a video text using video annotation software, for example, ELAN
- glossing a text independently, identifying what signs are used, any NMFs, and any examples of DSs and CA
- beginning to use annotations in a glossed text to show spatial modification of nouns and verbs

Distinguish between character and observer space, categorise different verb types and identify constructed action in a text

[Key concepts: fully- or partly-lexical signs, character and observer space, depicting signs; Key processes: recognising, distinguishing, classifying, observing]

(ACLASFU067)

- noticing that meaning is created in Auslan from fully-lexical signs, partly-lexical signs and non-lexical CA and gesture
 - recognising that signers can set up referents in the signing space as if they are part of that space (character space, for example, using a bC handshape (use of non-dominant hand) to indicate putting a glass on a table) or as if they are outside it (observer, for example, using 5claw in two locations to represent two houses)
 - recognising that in character space, signers can use locations for present referents, non-present referents, or abstract referents that do not exist in space
 - recognising that signers can give information about how a verb happens over time by changing the movement, for example, signing WATCH versus WATCH ^{for-a-long-time} or with lexical signs such as WATCH AGAIN++
 - recognising that nouns can be pluralised by locating them repeatedly regardless of their original location
 - categorising the type of depicting sign being used by a signer
 - distinguishing between directional and locational indicating verbs
 - observing examples of CA in an Auslan text and discussing how it was marked
-

Understand that utterances in Auslan can consist of a mix of gestural and signed components, and that non-manual features are often used to link clauses into equal or unequal relationships

[Key concepts: clause types, sign order, conjunctions; Key processes: recognising, observing, analysing]

(ACLASFU068)

- recognising the nature and function of word classes and understanding that the context of the sign is important and Auslan signs will not always have the same word class as an English word, for example, adjectives can act like verbs in Auslan, for example, PRO3 BIG
- recognising that some verbs and nouns use the same sign but change the movement in a regular way making noun-verb pairs, such as SCISSORS versus CUT-WITH-SCISSORS
- being able to describe various types of clauses and recognising that these often co-occur with particular NMFs, such as questions, topicalised sentences, negation or conditionals
- analysing yes/no questions and wh- questions to identify how NMFs and particular lexical signs are used to make each type of question
- recognising how NMFs can create emphasis or stress
- recognising that clauses can be joined by conjunctions to make longer sentences and these conjunctions can be shown with separate signs, such as PLUS or THEN, or NMFs, for example by pausing between clauses
- noticing with support, when signers are using composite utterances, that is, those that have elements of CA, DSs, points and DSs, and fully-lexical signs in the same utterance
- identifying clauses that are linked equally and unequally, where one clause depends on another

Explain the structure and organisation of particular types of texts, such as conversations or information reports, and identify language features used by signers to meet specific purposes and to create cohesion

[Key concepts: grammar, choice, coherence; Key processes: identifying, applying, analysing]

(ACLASFU069)

- analysing linguistic structures and features associated with more dynamic texts, such as back-channels and hesitations used in casual conversations
- applying knowledge of choices a signer can make in texts, for example by comparing two signers' texts about the same topic and evaluating different language choices each made, such as when to tell and when to enact, or when to use DSs
- analysing signers' use of pausing in a description or information report
- identifying all the ways a signer refers to the same referent throughout a text
- identifying examples of ellipsis, such as dropping the participants in verbs
- recognising that nouns that are being introduced are more frequently overt than when they are given already in a text
- recognising signs that function as interjections or discourse markers

Language variation and change

Elaborations

Understand that Auslan has evolved and developed through different periods of influence and cultural and societal change
[Key concepts: change, evolution, contact, technology; Key processes: identifying, recognising, researching]

(ACLASFU070)

- researching how BSL from the 1800s evolved into Auslan, NZSL and modern BSL, for example by finding and classifying examples from Auslan, NZSL and BSL signbanks
- understanding that while the structure of individual signs can change over time in regular ways, there is little information about this process in signed languages due to lack of historic records of signing
- understanding that greater contact between signers internationally has led to increased borrowing between sign languages, for example, signs that refer to different nation states and cities around the globe, for example, the old Auslan sign for America versus the current sign, or the ASL vehicle handshape in DSs
- identifying changes to Auslan that reflect changes in social relationships and community attitudes, for example in relation to words/signs such as DEAF^DUMB, DISABILITY, HEARING^IMPAIRED/H-O-H, DEAF^WORLD/DEAF^COMMUNITY, HUMAN^RIGHT
- interviewing older members of Deaf families or Deaf communities and reporting back to the class about any differences in signing they noticed, such as more use of fingerspelled words, less use of NMFs and depicting signs, or the use of different signs, such as FILM (old sign), TOILET (old sign)
- recognising that languages constantly expand to include new words, signs and expressions due to influences such as changing technologies and digital media, for example, COMPUTER, COMPUTER-MOUSE, INTERNET, FACEBOOK, WIFI, SELFIE

Language awareness

Elaborations

Understand historical and contemporary factors that impact on awareness, support and use of Auslan and its vitality in contemporary Australia, comparing it with that of other signed languages around the world

[Key concepts: influence, transmission, vitality, evolution, endangerment; Key processes: investigating, exploring, describing, comparing, analysing, reflecting]

(ACLASFU071)

- considering the impact of international historical events such as the Milan Congress (1880) and the linguistic recognition and documentation of signed languages (1960s and 1970s) on the use of signed languages in education and deaf people's feelings of ownership and pride in their languages
- analysing the impact of migration and settlement of deaf people from the UK and other countries in Australia on the development of Auslan
- investigating the geographical location, origins and history of deaf schools in Australia and the impact of these institutions on the transmission, use and status of Auslan
- considering the contemporary influences and pressures on Aboriginal and Torres Strait Islander signed languages and how these may affect their vitality
- describing the role religion has played in influencing Auslan in terms of usage and spread, for example, by religious orders, early Deaf Societies and Bible translation projects
- exploring multilingualism in the Deaf community, including the use of Auslan, English and other signed and spoken languages such as Irish-Australian sign language, and how and when users typically switch between languages and dialects
- investigating the use and impact of generic digital technology and specific forms of communication by Auslan users, for example, video chat, social media, SMS/texting, and NRS and VRS
- reflecting on the role of Auslan interpreters in raising awareness and understanding of Auslan in the wider community and in influencing the function and nature of Auslan, for example by the introduction of new signs for temporary use in certain contexts
- investigating historical patterns of employment of deaf people in certain trades and fields of work, and the impact of these traditional employment domains on Auslan development
- considering ways that Auslan is evolving due to influences such as globalisation and the capacity for new technology to store, record and share sign languages internationally
- comparing levels of endangerment of different sign languages, such as NZSL, village sign languages, ASL, Scandinavian, South American sign languages and Auslan, for example by using UNESCO data by reviewing the iSLanDS survey findings
- understanding the challenges faced by Auslan and other signed languages due to intergenerational disjunction in language transmission
- investigating how new or specialised language associated with domains such as technology, engineering, cooking or fashion are used but not documented in the Deaf community, and how such language impacts on language vitality

- identifying contexts and circumstances that support increased usage and acceptance of newly coined Auslan terms, for example, a workplace with several deaf employees
- researching the role of the World Federation of the Deaf in mapping and monitoring the vitality of sign languages around the world and in protecting sign language diversity

Role of language and culture	Elaborations
------------------------------	--------------

Reflect on how language use is influenced by communities' world views and sense of identity and on how language and culture influence each other

[Key concepts: culture, knowledge, value, transmission; Key processes: explaining, reflecting, exploring, analysing, comparing]

(ACLASFU072)

- exploring the nature of culture and how it is related to ways of thinking and using language, for example by comparing the cultural concept of Deaf identity with a medical model of deafness
- exploring ways in which language choices, such as sign choices, reflect attitudes towards certain topics, for example, oralism
- analysing how concepts related to cultural practices are expressed through language, for example, by identifying particular elements of naming systems, such as the use of pointing, NMFs and name signs, as in the case of number name signs of older deaf people who attended the Victorian School for Deaf Children
- identifying and discussing core cultural concepts reflected in Auslan such as the collective nature of the Deaf community, the importance of respect for elders and of reciprocity and responsibility, for example, how signing TAP-MANY, TAP-2H++ reflects understanding of responsibility to share information and pass on knowledge, or greater use of the 'flat hand' rather than the 'point hand' and use of full titles in acknowledgements and forms of address when introducing an esteemed Deaf elder
- investigating how Auslan users interact with their social and physical environment, for example, locating other signers, gravitating to spaces that are visually accessible
- identifying culturally significant attitudes and beliefs conveyed through Auslan that relate to history, significant individuals, places or events, for example, attitudes to spoken language that reflect the history of suppression of signed languages, as in the use of signs that reference tensions between oral and signing deaf people or between hearing and deaf people, such as the sign for communication breakdown which infers lack of awareness or understanding of cultural values, beliefs and language on the part of the other party
- comparing elements of communication in different contexts and exchanges that are culturally specific, such as back-channelling, the use of silence or eye contact, head nodding to indicate understanding rather than agreement, and the implications of such cultural variability in contexts such as courts of law
- observing that concepts may be culture and language specific, for example, in relation to time and space, as in the spatial mapping for timelines in Auslan
- understanding how developing sign language literatures which recount significant journeys and events associated with the beginnings of Deaf education and the development of Deaf communities not only map history but also embody values and mores of Deaf cultures, for example, accounts of the Gallaudet and Clerc reciprocal relationship, or the US Civil War deaf soldiers' story as told by Ben Bahan
- exploring ways in which the production and affect related to the sign for COCHLEAR-IMPLANT have evolved over time due to shifting values and perceptions of the Deaf community in relation to the implant, noting, for example,

the transition from a negative affect to more neutral production of the sign

- researching examples of deaf leaders who have established organisations or services which met the cultural needs of their community, for example, Dorothy Shaw and Deaf Action Books, Nola Colefax and the Australian Theatre of the Deaf

Years 7 and 8 Achievement Standard

By the end of Year 8, students interact to share ideas and interests and to offer opinions, using compound and complex sentences, for example by using lexical conjunctions as well as non-manual features (NMFs). They participate in discussions and debates, acknowledging others' opinions and developing and supporting arguments. They collaborate in activities that involve planning, project design and problem-solving, for example, G:WELL RIGHT-YEAH , BUT I WANT ADD COMMENT. They use evaluative language to reflect on learning activities and to provide feedback to others. They follow protocols for interacting with sign language interpreters in various contexts. Students locate, collate, summarise and analyse ideas and information from a variety of sources, such as interviews, documentaries or speeches, and they use such information in new forms. They use primary or secondary signed sources in their research, for example, when exploring significant events in Deaf history. They use specialised language to create texts such as vlogs, advertisements or research-based factual reports designed to convince or persuade others. They analyse elements of different imaginative texts such as poetry, performances, signed stories, skits and sketches, and explain how sign choice, NMFs and the use of different stylistic techniques combine to convey ideas and emotions. They create imaginative and expressive texts that draw from their experience as Auslan users and members of the Deaf community, including metaphorical iconicity to create particular effects and to engage interest. Students translate and interpret unfamiliar texts in Auslan or English and compare their own translations to those of their classmates, considering why there might be differences between them. They create bilingual texts to use in the wider school community. They describe how the concept and the experience of Deafhood and visual ways of being apply to themselves and others. They reflect on how their own ways of communicating may be interpreted when interacting with hearing people, and on their use of different communication strategies and behaviours, such as their use of gesture, facial expression and body language.

Students know that signs can be iconic in a number of ways, and identify iconic signs that represent a whole object or part of an object. They distinguish between character and observer space, classify verb types according to how they use space, and identify constructed action in a text. They explain the form and function of a range of clause types, including what NMFs are used, for example, questions, topicalisation, negation or conditionals. They identify all the ways a signer refers to the same referent throughout a text to create cohesion. They recognise that Auslan is constantly evolving and changing, for example, by identifying changes to Auslan that reflect changes in social relationships, community attitudes and changing technology. Students reflect on how all ways of language use are influenced by communities' world views and identities, for example by comparing the cultural concept of Deaf identity with the medical model of deafness.

Years 9 and 10

The nature of the learners

This stage of learning coincides with social, physical and cognitive changes associated with adolescence. Increased cognitive maturity enables learners to work more deductively with language and culture systems, to apply more intentional learning strategies and to reflect productively on their learning. Motivation and engagement with language learning and use are influenced by peer-group dynamics, personal interests and values, and issues related to self-concept. This is particularly the case for bilingual learners, especially for deaf students who also use spoken English, for whom the duality of living between languages and cultural frames impacts continually on the process of identity construction. The role of language is central to this process and is reflected in the degree to which learners define themselves as members of language communities, how they position themselves in relation to peer groups, and choices they make in relation to linguistic and social practices. These processes are fluid and context-responsive and impact on learners' engagement with both Auslan and English language learning. Learners at this level are increasingly aware of the world beyond their own and are engaging with youth, social and environmental issues. They are considering their future pathways and choices, including how Auslan could be part of these.

Auslan learning and use

This is a period of language exploration. Task characteristics and conditions at this level are more complex and challenging, involving collaborative as well as independent language planning and performance, and the development and strategic use of language and cultural resources. Elements of tasks involve interpreting, creating, evaluating and performing. Working with media resources, fictional and non-fictional texts, performances and research projects allows for the exploration of themes of personal and contemporary relevance, such as global and environmental issues, identity and relationship issues, questions of diversity and inclusivity.

Learners use Auslan to debate, clarify and interrogate ideas and concepts; to appraise and summarise opinions and to engage in elaborated discussions, developing and supporting arguments and sharing and evaluating opinions. They communicate in a wide range of contexts, such as a whole-school forum, present sustained signed explanations of abstract topics, and participate in imaginative and creative experiences.

Contexts of interaction

Learners interact with peers, teachers and other Auslan signers in immediate and local contexts, and with wider Deaf communities as well as cultural resources via virtual and online environments. They may participate in community events such as film or cultural festivals or intercultural forums.

Texts and resources

Learners use an extensive range of texts and materials designed for in-class learning of Auslan, as well as authentic texts produced in broader contexts. They are encouraged to source extra materials to support their learning and to pursue personal interests and explore various aspects of Auslan or Deafhood.

Features of Auslan use

Learners extend their grammatical knowledge to a range of forms and functions that give them control of more complex elements of text construction and sign formation. They have a greater degree of self-correction and repair. This greater control of language structures and systems increases confidence and interest in communicating in a wider range of contexts. Learners design, interpret and analyse a wider range of texts and experiences. Textual knowledge and capability are strengthened through maintaining a balance between activities that focus on language forms and structures and communicative tasks and performance.

Learners experiment with ways to refine a text, for example to strengthen it for entertainment, information or persuasion purposes. They understand that reordering clauses or parts of clauses can create subtle meaning differences. They use depicting signs to innovate where there are lexical gaps, and make richer use of the 'visual vernacular', producing complex narratives that combine and switch between methods of depiction (CA, DSs and lexical signs) and frames of spatial reference (character or observer). They demonstrate understanding of language variation and change, and of how intercultural experience, technology, media and globalisation influence language use and forms of communication. They investigate texts through more critical analysis, identifying how language choices reflect perspectives and shape meaning, and how they in turn are shaped by context and intention.

Learners at this level understand the relationship between language, culture and identity. They explore in more depth and detail the processes involved in learning and using different languages, recognising them as cognitive, cultural and personal as well as linguistic resources. They identify how meaning-making and representation in different languages involve interpretation and personal response as well as literal translation and factual reporting. They explore the reciprocal nature of intercultural communication: how moving between different languages and cultural systems impacts on their ways of thinking and behaving; and how successful communication requires flexibility, awareness and openness to alternative ways. They develop a capacity to 'decentre' from normative ways of thinking and communicating, to consider their own cultural ways through the eyes of others, and to communicate in interculturally appropriate ways.

Level of support

While learners at this level are increasingly less reliant on the teaching team for support during communicative interactions, continued provision of rich language input and modelled language is needed to consolidate and sustain language development. The teaching team provides implicit and explicit modelling and scaffolding in relation to meaningful language use in a range of contexts, situations and learning experiences; and explicit instruction and explanation in relation to complex structures, grammatical functions and abstract concepts and vocabulary. Provision of opportunities to discuss, clarify, rehearse and apply their knowledge is critical in consolidating knowledge and skills and in developing autonomy. Learners are encouraged to self-monitor, for example by keeping records of feedback, through peer support and self-review or by creating and maintaining a video journal or folio which they use to reflect on their language learning and intercultural experiences. They are increasingly aware of and responsible for their own learning, working independently to address their needs, for example by accessing technologies and additional learning resources, such as Signbank, to assist their learning. They use graphic organisers, modelled texts, dictionaries and teacher feedback to interpret and create texts.

The role of English

Learners and the teaching team use Auslan as the primary medium of interaction in language-oriented and most content-oriented learning experiences. English is used for comparative analysis and for research when a source text in Auslan cannot be found. Learners are encouraged to reflect on the different roles English and Auslan play in their academic work and in their conceptual development.

Years 9 and 10 Content Descriptions

Communicating	
Socialising	Elaborations

Use interactions within the school and wider community to build relationships and to discuss personal aspirations or social issues

[Key concepts: register, debate, discussion; Key processes: debating, chatting, initiating, discussing]

(ACLASFC073)

- competing in inter-class or inter-school debates, using appropriate conventions and protocols to support or oppose a proposition, for example, using space and NMFs to contrast views
- contributing to exchanges with peers and teachers when discussing their personal, educational and professional future wishes
- participating in role-plays on social and cultural issues, for example, the role of interpreters or the impact of social media
- communicating using digital technologies to chat with a student from another school, for example about the influence of 'text talk' and social media on Auslan, such as the use of signs for LOL, WHATEVER
- participating in a whole-school forum on current school or community issues
- communicating via video calls or social media platforms with other deaf children in different contexts to build relationships and exchange views on topics of mutual interest
- using strategies to initiate and sustain discussion, for example by providing the context of a conversation to new participants:
PRO3 SAY...
She was saying that ...

 Auslan

Participate in actions and interactions involving advocacy and consideration of cultural diversity, perspective and experience

[Key concepts: diversity, perspective, inclusion, advocacy;

Key processes: managing, promoting, advocating, collaborating]

(ACLASFC074)

- managing shared learning experiences that require consideration of different views, opinions and cultural perspectives
 - designing and enacting hypothetical scenarios that address issues related to Deaf experience, for example in the domains of sport or education
 - collaborating with a partner to take action on an issue affecting the Deaf community, such as advocating for provision of captioning or funding for Deaf organisations
 - organising an awareness campaign that reflects or mediates views on issues of relevance to their peer group/community, for example, creating a positive promotional video about successful deaf people in their state, outlining strategies to support achievement
 - advocating for a change in particular school processes or practices, such as ensuring all public school performances (such as theatre or dance festivals) automatically have interpreters present, for example by meeting with the student council, principal or parent group to advocate
-

Engage proactively in language learning experiences through discussion, justification of opinions and reflection on the experience of learning and using Auslan

[Key concepts: language learning, argument, ideas, reflection;
Key processes: clarifying, interrogating, reflecting, comparing]

(ACLASFC075)

- participating in discussion and debate, clarifying and interrogating ideas, developing and supporting arguments, sharing and evaluating information, experiences and opinions
- making connections between their own and each other's ideas or beliefs and real-life experiences and consequences, using reflections such as:
SOMETIMES POSSIBLE HAPPEN++ WHY I-F PRO2
PAST THINK-ABOUT WILL TRUE HAPPEN
Sometimes things happen because you think they will, so it comes true.
I-F YOU THINK PRO2 CAN PRO2 CAN. IF PRO2 THINK YOU CAN'T YOU CAN'T.
If you think you can, you can. If you think you can't, you can't.

- comparing opinions about culturally appropriate behaviours when engaging with unfamiliar members of the Deaf community
- using skills such as paraphrasing, questioning, interpreting non-verbal cues and appropriate vocabulary selection to support elaborated discussion
- discussing and experimenting with ways to strengthen and refine signed texts to entertain, inform, persuade or inspire different audiences
- exchanging reflections on the experience of using Auslan in different contexts and situations, comparing challenges or satisfactions and reflecting on how the same event can be differently experienced or interpreted

Informing

Elaborations

Research and evaluate information from different sources and perspectives, summarising opinions and critically appraising relationships between texts and contexts

[Key concepts: debate, evidence, bias, critical analysis, context; Key processes: researching, evaluating, debating, providing feedback, summarising]

(ACLASFC076)

- evaluating information collected from different sources to debate issues of interest and significance to the Deaf community, such as eugenics, deaf technology or interpreter ethics
- using critical literacy skills to recognise textual bias and to distinguish between fact and opinion in differently sourced texts relating to the Deaf community and/or deafness
- researching a significant event that affects/has affected the Deaf community, summarising findings in the form of contributions to a panel discussion or debate
- evaluating information presented by their peers or teachers, providing constructive feedback supported by evidence
- appraising and summarising opinions expressed in formally and informally signed texts
- using stories by elders and excursions to sites of significance to document, describe and provide explanatory detail of places of importance to the Deaf community
- using primary or secondary signed sources to research significant events in Deaf history to present a critical overview of how information can be differently presented

Prepare and present researched information on a range of issues, considering the context in which the information will be received

[Key concepts: audience, context, source, evidence, bias, statistics; Key processes: presenting, explaining, interpreting data, evaluating]

(ACLASFC077)

- presenting a sustained signed explanation on a given topic, using information selected from a range of sources to suit the intended audience
- using evidence selected from independent research sources and evaluative or persuasive language to respond to arguments about issues such as eugenics, deaf technology or interpreter ethics
- presenting information on current affairs or news items, identifying bias and the effect of context on the shaping of texts
- arguing a predetermined, evidence-based position in a panel discussion/debate on controversial questions, for example, the inclusion of deaf members of a jury
- designing the presentation of an Auslan text for a vlog that requires voice interpreting with notes to indicate emphasis and to clarify meaning
- providing explanations of abstract or technical concepts, such as poverty or radiation from uranium, shaping the style of the presentation to suit the intended audience, for example through significant use of depicting signs
- presenting an interpretation of graphs and statistics that provide information relating to the Deaf community, discussing findings and making predictions about future changes or patterns

Creating

Elaborations

Analyse different types of imaginative, creative and performative texts, considering how different techniques and modalities are employed to communicate with different audiences

[Key concepts: meaning, mood, imagery, rhyme, metaphor;
Key processes: analysing, interpreting, discussing, responding, reflecting]

(ACLASFC078)

- analysing examples of signed performance poetry, identifying patterns and conventions such as repetition of handshapes and movement paths of signs to create rhyme and to convey meaning
 - interpreting visual representations of Deaf experience, including the use of metaphors, perspectives, colours and textures in visual art forms such as sculpture, painting, photography, printmaking or ceramics
 - responding to forms of Deaf art that challenge perceptions and stimulate discussion, such as the work of Christine Sun Kim or members of the Australian Theatre of the Deaf or Deafinitely
 - comparing responses to imaginative texts that present particular values or points of view, for example, Deaf slam poetry
 - reflecting on the multilayered dimension of signed narrative, identifying how dynamic handshapes, facial expressions and body movements provide simultaneous narrative, commentary and emotional expression
 - comparing different recordings of signed storytelling, for example of young children making up stories or older people telling traditional tales, noticing differences in their language
 - comparing their interpretations of/responses to performances by deaf comedians, storytellers or poets
 - viewing and reviewing media texts that use aesthetic, artistic or realistic techniques to interpret and communicate dimensions of the Deaf experience, for example the documentary *Deaf Jam* (2011)
 - exploring the use of technology in Deaf art, film or performance, for example to help build mood or emotional expression
 - identifying relationships between elements such as imagery or signed sequences in texts such as ballads, free verse or narratives, for example by working with Auslan translations of Shakespearean texts
 - responding to signed poems that use extended metaphor to communicate values and ideas or to express emotional experience, for example, 'Butterfly Hands' by Walter Kadiki
 - comparing the visual nature of signed narratives with oral traditions of Indigenous cultures
 - analysing responses of hearing audiences to deaf performances, for example by evaluating comments made by judges on reality/talent television shows
 - discussing the complexity of live theatre performance interpretation and the use of deaf interpreters and consultants
 - creating highly complex narratives combining and switching between ways of reference, for example, CA, DS, lexical signs and frames of spatial reference
-

Create imaginative texts designed to engage and/or reflect the interests of specific audiences and to stimulate discussion of cultural issues and experiences

[Key concepts: mode, multimodality, visual imagery, metaphor, intercultural experience; Key processes: creating, adapting, experimenting, performing]

(ACLASFC079)

- creating a dynamic multimodal performance suitable for different modes of entertainment, such as a vlog, television or live performance
- adapting the mode and style of delivery of a narrative or poem to suit either a younger or older audience
- creating a class anthology of Auslan poems that reflect the diversity of cultural experience represented in their school community
- experimenting with different modes of expression and visual imagery to explore the poetics of visual language
- creating poems or raps that represent emotional accounts of personal stories, successes or struggles to enter into a class slam poetry competition
- plan, rehearse and perform short dramatisations that explore social/cultural issues relevant to their peer group or community, selecting language features, images and forms of expression to suit the intended audience
- using metaphors to extend or redirect a favourite text that invites reflection on cultural or intercultural experiences
- creating an animation with a deaf character or theme related to the Deaf community
- creating a piece of art such as a sculpture, collage or film clip that reflects their experience of moving between Deaf and hearing worlds
- creating a signed poem that reflects elements of their own emotional response to a particular personal experience

Translating

Elaborations

Translate Auslan and English texts composed for different audiences and contexts and consider the dynamic nature of translating and interpreting and the role of culture when transferring meaning from one language to another

[Key concepts: equivalence, representation, meaning, interpretation, ethics, culture; Key processes: translating, interpreting, comparing, explaining, analysing]

(ACLASFC080)

- experimenting with literal Auslan translations of popular English idioms, noticing when this creates confusion (for example, *raining cats and dogs*) and discussing how to interpret such idioms accurately
- comparing online Auslan and English public announcements and government policy/information texts in terms of different approaches to translation and preservation of content, for example, free versus literal
- viewing and discussing the effectiveness and accuracy of online Auslan translations, such as the *Catching Fire* series of safety videos or the emergency disaster preparedness videos
- trialling different resources to assist in translation, including online dictionaries and footage, for example by comparing individual translations, back-translating, and reviewing useful references
- considering the nature of translation with reference to different strategies such as decoding literal meaning (word for sign), reading for meaning (sense for sense) and cultural reading (between the lines)
- recognising the need to sometimes recast language and considering why one language may use more words/signs than another to communicate a particular meaning or concept, for example, in relation to the use of space and depicting signs in Auslan in describing a scene compared to the linear spoken modality of English
- critically evaluating the accuracy and effectiveness of English subtitles to an Auslan text, for example the range of community service Auslan messages produced by the Deaf Society of NSW
- providing annotated examples of translations of poems or other types of text, identifying challenges involved in transferring meaning, expression, culture and mood from one language to another
- comparing examples of BSL and Auslan literature and evaluating translations from both/each into English, for example of poems by Dorothy Miles or Walter Kadiki
- translating suitable jokes, songs, poems, stories or plays from English into Auslan and vice versa
- analysing existing translations of texts, such as short subtitled films or TV programs containing deaf characters using various sign languages, making comparisons with their own translations into Auslan or English and reflecting on identified variations
- identifying the range of reference materials and resources available to assist in language documentation and translation tasks, for example ELAN, and exploring how to use them
- researching aspects of available interpreting services in their area, for example, the role of interpreters, qualifications required, ethical considerations and issues associated with interpreting and translating in specialised contexts such as health, education, legal settings
- exploring the role of deaf people as Deaf interpreters and as language consultants on interpreted theatre events,

considering the work this involves and the skills needed for it

- considering culturally appropriate and ethical behaviour when interpreting and translating, for example by explaining appropriate behaviour in interpreting contexts and considering potential consequences of inaccurate interpreting
- analysing codes of ethics of interpreters, comparing existing codes in Australia, such as the ASLIA and AUSIT codes, and developing simple translations of the main principles of each code
- role-playing the part of a Deaf interpreter for unfamiliar deaf guests who are non-conventional Auslan users or users of another signed language in a simple context such as an interaction in a library
- comparing signed texts in International Sign with translated Auslan versions created by students, using H3 broadcasts as a resource
- participating in formal situations where interpreters are working, discussing observed translation choices made

Create resources such as videos, glossaries and classifications in English to interpret cultural aspects of Auslan texts

[Key concepts: expression, bilingualism; Key processes: recording, creating, captioning]

(ACLASFC081)

- collecting and explaining to non-Auslan users expressions and culturally specific terms encountered in Auslan texts, for example, *hearing*, *residential school*
- collecting and recording different signs, attaching English captions with appropriate translations, for example, PAH! = *finally*, TALK = *communicate in speech or Auslan*, CHAT = *talk in Auslan*
- creating a bilingual virtual tour of the school for use on the school website
- developing a signed and captioned film presentation, for example, about how to work with an interpreter
- making a short bilingual documentary in Auslan and English about a topical issue, moving through the processes of drafting, translating and captioning the final product
- capturing and presenting stories recorded from interviews in Auslan with members of the Deaf community, captioning the interviews in English

Identity

Elaborations

Identify ways in which deaf people relate to and are perceived by society as 'people of the eye', how they demonstrate connections with culturally rich places and associations, and how their sense of identity, roles and responsibilities change over time

[Key concepts: identity, relationship, Deafhood, reciprocity, guidance, place, space, rights, responsibility, social action; Deaf gain; Key processes: discussing, comparing, investigating, reflecting]

(ACLASFC082)

- discussing the notion of 'Deaf eyes' and the capacity of deaf people to determine the deaf/hearing status of others in their environment based on eye behaviour
- considering how deaf people are perceived to be more observant and more astute visually, for example, as drivers, in sports or in terms of visual memory, comparing anecdotal findings and documented research on this issue
- discussing how identity may shift depending on what is most salient in any context or setting, and how as people mature they learn to navigate 'multiple identities' in relation to different elements of their experience, such as background ethnicity and culture and Deaf identity/culture
- reflecting on the concept of Deafhood as it applies to and informs life choices made by young Deaf people, for example in relation to social group participation, communication preferences, ways of identifying, describing and introducing themselves to others
- considering how relationships between changing technology and Deaf people are managed to express and to reflect identity, for example, the rejection of hearing devices or, alternatively, highlighting them with colour or prominent placement
- considering whether a strong sense of shared identity influences the capacity for awareness and advocacy for Deaf people's rights
- discussing how social groups such as Deaf communities form intergenerational patterns that determine relationships and shape behaviours, for example, by interviewing a member of a Deaf family of two or more generations
- investigating ways the Deaf ecosystem works and the reciprocal nature of relationships in some Deaf communities, for example in business or professional domains, and the contribution this ecosystem makes to collective identity
- discussing how the Deaf community expresses different elements of their identity, for example through behaviours associated with Deaf spaces, greetings and introductions which illustrate community status and affiliation
- investigating how a strong sense of identity impacts on social and emotional health and wellbeing by exploring the available research on wellbeing and identity in deaf people
- identifying and describing intersections between national and international Deaf communities and organisations, and how these contribute to a transnational sense of belonging, for example, by evaluating shared experiences by viewing online texts produced by deaf people in different countries
- comparing changing values and status of place and space in different international Deaf communities, for example, the loss of Deaf clubs or closure of Deaf schools, and reflecting on the implications of these changes over time for Deaf identity
- responding to different philosophical and social views

about deafness, considering the impact of varying attitudes on a deaf person's developing identity

- discussing ways in which the philosophy of 'Deaf gain' can be applied to personal circumstances, such as classroom accommodations and sporting participation
- summarising elements of elders' guidance on how cultural values, beliefs and traditions are expressed and connected through shared experience of visual ways of being, providing examples of how these are demonstrated in community behaviour and in interactions with the wider community
- describing and comparing their personal sense of social responsibility towards their Deaf community, for example as demonstrated through attending, organising or volunteering at festivals, camps or youth groups
- exploring the wider political landscape of the Deaf community as it impacts on individual and community identity, for example, by identifying the impact of activism and Deaf empowerment movements such as the Deaf President Now campaign at Gallaudet University, a 'Deaf place', in effecting change and strengthening Deaf communities' connection to 'place'

Reflecting

Elaborations

Reflect on the experience of learning and using Auslan formally in school, and considering how intercultural communication involves shared responsibility for making meaning

[Key concepts: intercultural communication, perspective, insight, self-reflection, making meaning, discrimination; Key processes: comparing, analysing, explaining, reflecting]

(ACLASFC083)

- reflecting and reporting on how learning Auslan formally in school provides insights into the general nature of language and culture as well as an explicit means of interpreting the world in which they live
- considering the relationship that exists between language, culture and issues of access and identity, and the significance of issues of discrimination, inclusion and exclusion
- keeping a journal of experiences (humorous, satisfying or challenging) associated with using Auslan in school and in wider community contexts, noting changes in their responses and reflections over time and comparing insights gained through interactions with other languages and cultures
- considering the layers of intercultural complexity and depth in the Deaf community, for example in relation to the insider/outsider concept or the role of deaf members of deaf families, and reflecting on their own position within such frameworks
- sharing and comparing cultural and intercultural experiences and capabilities in different signed and spoken/written languages including Auslan, and identifying benefits of using more than one language, such as a larger repertoire of communication strategies, additional insights and perspectives, opportunities for new experiences
- reflecting on their experience of living and communicating in a visual world and on particular challenges and benefits they have experienced
- discussing how intercultural communication is a two-way process which involves shared responsibility for meaning-making and ensuring understanding

Understanding

Systems of language

Elaborations

Understand the perceptual and articulatory reasons for the structure of signs, and analyse how iconicity can be used to create metaphors in Auslan and critically evaluate video annotation software as a means of transcribing and analysing Auslan

[Key concepts: iconicity, metaphor, transcription; Key processes: analysing, applying, categorising, demonstrating, describing, evaluating]

(ACLASFU084)

- understanding that the elements of a sign can be arbitrary (for example, the handshape or movement of the sign WHY), or meaningful, such as the movement and the handshape in the sign GIVE
- exploring perceptual and articulatory reasons why some handshapes are more common than others
- beginning to identify and describe metaphorical iconicity, for example, LOVE, AVOID/RESIST, and discussing how it relates to metaphors in English, for example the 'time as space' metaphor in both languages
- applying knowledge of iconicity in signed languages, for example how the path movement of a verb can be a metaphor for the timing of an action, for example, PRO1 WAIT_{for-a-long-time} PRO2, observing that English can do the same with changes to the length of phonemes, for example, *I screeeeeeeeaaaamed!*
- using annotation software such as ELAN as a tool to transcribe and analyse signed languages

Analyse signed texts in terms of spatial frames of reference used, and explain how signers show periods of constructed action

[Key concepts: character and observer space, constructed action; Key processes: contrasting, analysing]

(ACLASFU085)

- analysing a signed text for examples of character and observer space and describing why the signer has chosen that viewpoint
- appreciating the production of reciprocal forms of some indicating signs, such as LOOK, GIVE, INVITE
- identifying some of the aspectual modifications to verbs in an Auslan text, such as WORK_{for-a-long-time} or GO-TO_{repeatedly}
- analysing a video of a signed narrative and identifying the moments in which a signer shifts into a different role in CA, and how they show that, for example, eye gaze change

Understand the difference between main and subordinate clauses and how the inclusion of constructed action and depicting signs has an impact on clause structure

[Key concepts: auxiliary and main verbs, clause types, reference; Key processes: recognising, comparing, identifying]

(ACLASFU086)

- understanding that verbs can be either auxiliary (**CAN** JUMP or **TRY** REACH) or main verbs (WORK)
- noticing how to use modal verbs and NMFs to express possibility, obligation and ability (MIGHT, SHOULD)
- understanding the difference between definite and indefinite reference and how Auslan makes this distinction
- recognising the function of some signs as interjections or discourse markers
- recognising that conditionals have a main and dependent clause and associated NMFs
- identifying coordinated clauses showing causation and describing how it is shown, for example PRO3 STUDY_{hard} BECAUSE WANT EXAM MARKS GOOD

- recognising how emphasis in sentences can be changed by reordering clauses or parts of clauses
- recognising that the presence of CA or DSs affects how a clause is structured

Understand the interrelationship between text types, linguistic features, cohesive devices, audience, context and purpose
[Key concepts: audience, choice, convention, cohesion; Key processes: analysing, identifying, discussing, applying]

(ACLASFU087)

- analysing expository texts, identifying characteristic language elements and features
- analysing a videoed class debate to identify how language is used to justify opinions and persuade others
- analysing an Auslan text in depth, for example by identifying characteristic features of the particular text type and discussing how language choices are made to take account of a text's intended audience and purpose
- noticing how grammatical choices shade meaning, reflect perspective and establish relationship between text participants, for example choosing to be more or less English-like in a particular context or relationship
- noticing how signers can compare or contrast ideas by locating things in the same or opposing sides of signing space
- applying knowledge of ellipsis to achieve cohesion

Language variation and change

Investigate and analyse the nature of and community attitudes to variation in the use of Auslan

[Key concepts: standardisation, contact, evolution, flexibility, variability; Key processes: recognising, investigating, researching, analysing, considering]

(ACLASFU088)

Elaborations

- recognising that there is a greater degree of flexibility and variability in 'oral', face-to-face languages such as Auslan compared to spoken/written languages passed on from parents to children, for example, less standardisation and minimal 'frozen texts', and considering reasons for such differences
- researching different aspects of variation in the use of Auslan, considering influences such as geographical location, social groupings, history, educational experience, age of learning, family background and contact with Signed English or other languages
- debating the merits and disadvantages of creating a standard form of Auslan, for example the benefits of mutual comprehensibility versus the practical problems involved in who decides on the standard and how to get signers to comply
- considering the effect that expanding sign language interpreter services might have on standardising Auslan, especially in the areas of education and medicine
- noticing ways people might adapt language according to situation of use, such as when signing to a large audience, the use of one hand or two, clarity of sign production, size of signing space, pace, NMFs, pauses and amount of fingerspelling
- considering how Auslan has been influenced by the use of Signed English in education settings (especially from the 1970s to the 1990s) and cultural attitudes towards Signed English

Language awareness

Elaborations

Investigate and compare the nature and status of Auslan and other signed languages, considering issues such as language and education policies, language rights, representation and processes of language preservation and language building
[Key concepts: policy, rights, representation, status, recognition, documentation; Key processes: describing, researching, comparing, investigating, analysing, evaluating]

(ACLASFU089)

- identifying historical events, government policies and educational initiatives that have impacted on the status of Auslan and the identity of the Deaf community, such as ALLP, DDA, the mainstreaming of deaf students
- researching the nature of International Sign, including its relationship to national signed languages and its use by deaf people
- analysing subjective measures of language vitality, such as societal attitudes towards Auslan or the perceived strength of the language identity group, and identifying challenges facing Auslan in terms of societal attitudes, provision of resources, access, education systems and social networks
- analysing the status and use of Aboriginal and Torres Strait Islander signed languages and comparing these to Auslan
- appreciating the impact of the use of Auslan in settings such as education, health care and different workplace settings in terms of the evolution of the language and specialised terminology
- analysing representations of deaf people and sign language in the Australian media and wider community, making comparisons with representations of other languages and cultures
- investigating how Auslan and Deaf culture are promoted in the wider community, for example, through the influence of organisations such as Deaf Australia, of high-profile individuals such as activists or actors and of events such as NWDP Deaf Festival, Australian Deaf Games or Deaf art exhibitions
- considering how processes of language building and evolution may expand existing Auslan linguistic and cultural resources in the Australian community
- investigating programs and initiatives that maintain and strengthen Auslan use, such as school language programs; bilingual education and research programs; recording, archiving and documentation of the language; and the establishment of websites and databases
- appreciating the importance of documenting and promoting Auslan in raising community awareness of the richness and value of signed languages
- recognising that Auslan requires maintenance, development and documentation, considering historical and contemporary circumstances which have either contributed to or impeded these processes, for example the use of technology such as ELAN for capturing and documenting the language
- considering domains where Auslan may grow in the future, and contributing to localised Auslan signbanks on specific topics, for example, creating a bank/dictionary of signs used by deaf students and interpreters in Year 9 Science
- researching the status and recognition of signed languages in other countries, for example, New Zealand, the USA, the UK, the Scandinavian nations, considering issues such as language rights, documentation and

development efforts

- discussing the concept of 'language health' and how it applies to Auslan, for example by designing a chart of relevant factors such as status (social, economic, historical), demography (number and distribution of users) and institutional support (media, government, education, religion, industry, culture)

Role of language and culture	Elaborations
------------------------------	--------------

Understand that Auslan and Deaf culture are interrelated, that they shape and are shaped by each other and that their relationship changes over time and across contexts

[Key concepts: knowledge, value, relationship, transmission;
Key processes: reflecting, exploring, analysing, comparing]

(ACLASFU090)

- exploring the relationship between language and culture, for example by analysing language used in pathological and sociocultural models of deafness and the impact that each philosophy and the language used to express it may have in regard to services for deaf people
- appreciating the complexity of the relationship between language and culture, for example by discussing distinctions between Deaf cultures and other cultural minorities, such as the fact that most deaf people are born to hearing parents and typically access and experience Deaf culture through communicating with peers and other Auslan users in and out of school, in addition to their cultural experience in their families of origin
- recognising the cultural significance of symbols and language features used in Auslan, for example the use of *light* and *darkness* in stories, poetry and performance, as in *gaslight* stories
- considering cultural explanations for conversational strategies used by Auslan signers to avoid conflict and to maintain privacy, such as changing signing space and style, using indirect language such as signing lower or under the table, fingerspelling instead of signing overtly, or modifying a sign choice such as *menstruation* to suit the context
- understanding that Auslan plays an important role in the expression and maintenance of Deaf culture, that each deaf person has a right to learn and use Auslan as part of their birthright and as a key element of their membership of the Deaf community, and that they become custodians and owners of the language
- appreciating the cultural value and importance of festivals and events in the Deaf community, such as NWDP, as celebrations of language, history, culture and identity
- analysing ways in which deaf people interpret and exploit the possibilities and cultural meanings of sound, for example, in games and stories which incorporate signs for sound and reactions to sound, for example, a door slamming
- recognising that Auslan signs change over time due to shifting cultural values and changing experiences, for example, the sign for APPRENTICE modified to refer to TAFE, the shifting values around the sign DEAF^DEAF (culturally Deaf reference for deaf-mute), and unsuccessful attempts to reframe this with an audiological focus
- reflecting on the ways culture is interpreted by others, for example by identifying how stereotypes about deaf and hearing people influence perceptions
- recognising that cultural beliefs and behaviours are embedded in Auslan, for example, recounts by deaf people of interactions with hearing people might include language that reflects beliefs about English and 'hearing-ness', for example, an anecdote about a frustrating interaction might be concluded with *hearing, their way*
- reflecting on the labels 'deaf' and 'hearing', considering

what they mean to different people and their implications in terms of status, access, opportunity and privilege

- analysing ways in which deaf people's jokes and humorous narratives reflect cultural values about deaf/hearing relationships and how deaf people navigate the world, for example the 'Bob's House' commercial
- exploring how advocacy strategies can reflect deaf people's cultural practices and values, for example the 'TTY-in' used to advocate for the National Relay Service

Years 9 and 10 Achievement Standard

By the end of Year 10, students exchange information, ideas and opinions on a broad range of social, environmental, educational and community issues. They summarise and justify points of view and use reflective language to respond to others' opinions and perspectives, for example, RIGHT-YEAH, PRO2 DIFFERENT PERSPECTIVE NEVER THOUGHT. They initiate, sustain, support and extend discussion, using strategies such as paraphrasing, inviting opinions and elaborating responses, for example PRO2 CONFUSE PRO1 WIND-BACK. They select appropriate vocabulary and use supporting evidence when clarifying and justifying statements. They use respectful language to negotiate, problem-solve and to manage different perspectives when engaging in collaborative tasks, for example, PRO1 FEEL PRO2 RIGHT TALK OVER.... BECAUSE.... Students research, analyse and evaluate information from a range of sources and perspectives, and create sustained signed texts designed to entertain, inform, persuade or inspire different audiences. They use non-manual prosodic features to create emphasis or other effects. Students analyse different types of creative and performative texts, considering how specific techniques and modalities are used to different effect, for example, using repetition of handshapes and movement paths of signs to create rhyme, or the use of visual metaphors to convey meaning. They compare responses to texts that present particular values or points of view, for example, Deaf poetry. They create their own imaginative texts such as narratives or poems, combining and switching between types of language, for example, telling with lexical signs or showing with constructed action (CA) or depicting signs (DSs) and frames of spatial reference to indicate character or observer point of view. Students translate and interpret a range of signed texts, comparing their translations and explaining factors that may have influenced their interpretation. They identify the relationship that exists between language, culture and identity and explore how individual and community identity are conveyed through cultural expression and language use. They reflect on the experience of communicating in a visual world and on associated challenges and advantages experienced as deaf people in a hearing world.

Students identify and describe metaphorical iconicity, for example, love, avoid/resist, and compare this with the use of metaphors in English. They distinguish character or observer frame of reference in a text; between main and subordinate clauses; and demonstrate how the inclusion of CA and DSs impacts on clause structure. They analyse different types of text, such as expository texts, identifying characteristic language elements and features. They investigate variation in the use of Auslan, explaining influences such as geographical location, social groupings and history, educational experience, the age of learners, family background and degree of contact with Signed English or other languages. They make comparisons between the ecologies of Auslan and those of signed languages in other countries, taking into account issues such as language policies and language rights, advocacy, reform and language vitality. They identify factors that help to maintain and strengthen Auslan use, such as intergenerational contact and bilingual school programs. Students know that Auslan plays an important role in the expression and maintenance of Deaf culture and in assuring the rights of deaf people.

The Australian Curriculum Languages - Auslan First Language Learner Pathway - Years 7–10 (Year 7 Entry) Sequence

Years 7 and 8

The nature of the learners

The transition to secondary schooling involves social and academic demands that coincide with a period of maturational and physical change. Learners are adjusting to a new school culture with sharper divisions between curriculum areas. Learners in this pathway have had little or no experience with Auslan, but are learning it with the expectation that it will be their primary language in the future. They have a range of experience with other signed or spoken languages, or a home gesture system, but may not be fluent in any standard language, and may have associated cognitive challenges. A multilevel and differentiated approach to teaching and task design responding to this diversity of prior experience is necessary, including using as much visual support as possible.

Auslan is learnt in parallel with English literacy. Learners in this sequence and pathway have little experience of English and are learning English literacy simultaneously to Auslan. As they have no access to spoken English, this poses particular challenges. The learning of Auslan supports and enriches deaf students' learning of English.

Auslan learning and use

Rich language input characterises the first stages of learning. Learners engage in a range of activities designed to immerse them in language scaffolded to their level of linguistic and cognitive development. They build vocabulary for thinking and talking about school and home, routines and social worlds. They interact in structured routines and activities with their peers, family members and as many fluent signing adults as possible. They are supported to use Auslan for different language functions, such as asking and responding to questions, expressing wishes, responding to directions, and taking turns in games and simple shared learning activities. Learners may initially need time to watch Auslan without pressure to respond, until they feel comfortable with the situation and context. When they produce Auslan, they use well-known phrases to participate in familiar routines and structured conversations. Over this band, they continue to develop confidence in communicating about the here and now, and gradually begin to talk about the past or future and non-present entities or events.

Contexts of interaction

Learners at this level are given as much opportunity as possible to interact with their peers, the teaching team and members of the Deaf community for additional enrichment and authentication of their language learning. Information and communication technology (ICT) resources provide extra access to Auslan and to the cultural experience of deafness. A key expectation in the L1 pathway is that students will have opportunities to interact with a variety of native or near-native signing models. The familiarity and routine dimension of the classroom context provide scaffolding and opportunities for language practice and experimentation. Language development and use are incorporated into structured collaborative and interactive learning experiences, games and activities.

Texts and resources

Learners engage with a variety of signed texts, live and recorded. They watch the teacher signing, share ideas and join in activities, stories and conversational exchanges. They become familiar with ways of recording Auslan, either through film, photos of signs, line drawings of signs or simple symbols. An important source of texts is the Deaf community and older members of it.

Features of Auslan use

Learners in Years 7–8 can identify the handshape movement and location of signs. Depending on their access to home-sign systems, they make use of varying levels of handling or SASS depicting signs, gradually learning the conventions of Auslan. They learn to use entity depicting signs to discuss movement and location, decreasing their signing space to the conventional area. Learners at this stage use simple clause structures, modifying some verbs for present referents, and begin to understand and ask basic questions.

Level of support

The early stage of language learning is supported by extensive use of concrete materials and resources, gestures and body language. If the student has existing idiosyncratic gestures or home signs the teacher can access, these are used to scaffold their learning of Auslan. Learning is also supported through the provision of experiences that are challenging but achievable with appropriate scaffolding and support. This involves modelling, monitoring and moderating by the teacher; provision of multiple and varied sources of input; opportunities for revisiting, recycling and reviewing; and continuous cueing, feedback, response and encouragement. Use of recounting and retelling assists in establishing early language skills based on real-life experiences. The teacher provides implicit and explicit modelling and scaffolding in relation to meaningful language use in a range of contexts.

The role of English

Auslan is the language of all classroom interactions, routines and activities. Because these students do not have any English, they cannot make comparisons between English and Auslan. Research work in English is not an option for these learners. The students’ learning is focused primarily on developing Auslan capabilities as intensively as possible with a view to progressing to a state of communicative competence as soon as possible.

Years 7 and 8 Content Descriptions

Communicating	
Socialising	Elaborations

Interact with peers and teachers to exchange information about self, family, friends and interests, describe people and objects and express some feelings and preferences

[Key concepts: interaction, communication, introduction, description; Key processes: socialising, expressing feelings, exchanging greetings, asking/responding to questions]

(ACLASFC091)

- exchanging greetings, thanks and apologies, for example, HELLO, HOW-ARE-YOU? GOOD MORNING M-R-J-O-N-E-S, THANK-YOU, SORRY
- expressing feelings using lexical signs and affective NMFs, for example:
PRO1 HAPPY
I'm happy.
PRO3 GRUMPY
She's grumpy.
- using formulaic language to express wishes for particular occasions or events, for example, HAPPY BIRTHDAY, GOOD-LUCK
- making arrangements using simple time-related signs without numeral incorporation, for example, LAST-WEEK, MONDAY and with numeral incorporation, such as THREE-DAYS-AGO, TWO-YEARS-AGO, IN-TWO-DAYS
- stating likes, dislikes and preferences using associated NMFs, for example:
PRO1 LIKE TV
I like TV.
DON'T-LIKE DRAWING
I don't like drawing.
- introducing self and family and explaining relationships using possessive pronouns, for example:
POSS1 NAME X, PRO1 12-YEARS-OLD
My name is X, and I'm 12 years old.
PRO3 POSS1 BROTHER
He's my brother.
- asking and responding to questions about a familiar topic such as their family, a hobby or an interest, or a recent event, for example:
PAST WEEKEND, YOU GO WHERE?
Where did you go last weekend?
FAMILY PRO1 GO PLAY SOCCER
My family and I went to play soccer.
- referring to family members and classmates by fingerspelling a name or by using a sign name and describing their appearance or characteristics, for example:
POSS1 SISTER TALL SKINNY HAVE BLACK HAIR
My sister is tall and thin and has black hair.
- describing what they are doing in class activities using plain verbs, for example, PRO1 WRITE, PRO1 READ

Participate in guided group activities such as signing games and simple tasks using repeated language structures, non-manual features and gestures

[Key concepts: game, learning activity, instruction, role-play, task; Key processes: participating, following instructions, classifying, exchanging, transacting, collaborating]

(ACLASFC092)

- participating in games or activities that involve repeated signs, gestures and NMFs, for example, *I went to the market and I bought ...*
- following instructions by locating or moving classroom objects in activities that involve concepts such as space, place and memory, such as by hiding a marker pen and playing 'hot/cold' to find the pen
- participating in activities that involve exchanging or classifying objects and attributes such as by shapes, colours and amounts
- using questions and affirmative and negative answers when participating in role-plays that involve transactions such as ordering food at the tuckshop
- participating in barrier games and other information-gap activities
- working together in collaborative tasks such as craft or cooking activities
- attracting attention or asking for clarification or help to complete a task, for example:
WHAT MEAN?
What do you mean?
PLEASE AGAIN SIGN
Please sign that again.

▶ Auslan

Develop communication and interaction skills such as asking and responding to simple questions and statements and following protocols for participation in Auslan classes and engaging with the Deaf community

[Key concepts: protocol, greeting, signing space, visual applause; Key processes: recognising, following instructions, gaining attention]

(ACLASFC093)

- recognising and using fingerspelled names for roll call and games
- exchanging greetings with peers and teachers and stating the day and date
- following instructions for class routines, such as:
DS:line-up PLEASE
Line up, please.
PLEASE WITH-2++ DS:sit-opposite
Please find a partner and sit opposite each other.
- asking for help or permission, for example:
PLEASE HELP_{-me}?
Can you help me, please?
CAN++?
Can I?
- gaining someone's attention, for example by waving or tapping a shoulder or table
- stopping activities and paying attention when lights are flashed or hands are waved
- using NMFs such as focused eye gaze, nodding and head shaking to show affirmation and negation
- keeping appropriate signing space between themselves and others
- using visual applause to show enjoyment of entertainment or commendation

▶ Auslan

Informing

Elaborations

Locate specific points of information from signed texts about familiar topics and use the information in new ways
[Key concepts: information, topics, directions; Key processes: identifying, responding, following directions]

(ACLASFC094)

- responding to signed information such as class messages or short introductions, for example, by identifying names, numbers or times
- identifying and applying specific information in signed texts using visual pictures and props to complete guided tasks such as craft activities
- gathering information from peers about topics such as family members or favourite foods
- identifying information in simple texts that relate to properties such as colour, size, shape or amount, for example when interacting with materials and concrete objects
- following directions for simple activities involving visual cues such as a treasure hunt, for example:
DS:turn-left DEAD-END DS:turn-right
Go left, then at the end turn right.

- identifying and categorising signs appearing in simple texts according to handshape
- watching short Auslan texts about topics such as hobbies or sports, recording key points of information using tables or graphic organisers

Present factual information about familiar topics using signs that have been modelled
[Key concepts: description, procedure, recount; Key processes: describing, demonstrating, recounting, reporting]

(ACLASFC095)

- describing an object, space, animal or person using modelled lexical signs and short phrases, for example, describing the layout of key items in the classroom
- contributing to a digital presentation such as a class video by signing a basic description of their own family members
- demonstrating simple procedures such as getting ready before school in the morning, using gestures, objects and buoys
- recounting an experience they have shared, sequencing events through the use of modelled signs and photos
- reporting on aspects of their daily routines, using modelled signs and visual prompts, for example outlining a travel route home from school
- producing a series of signs for peers to complete a simple action-based activity such as a sign circle game

Creating

Elaborations

Participate in the viewing of recorded or live imaginative signed texts, responding through drawing, miming, gesture or modelled signs

[Key concepts: story, imagination, Deaf art, gesture, mime;

Key processes: viewing, drawing, responding, mimicking, shadowing]

(ACLASFC096)

- viewing narratives in Auslan, for example, from the Auslan Storybooks website, demonstrating understanding through drawing, gesture and modelled signs
- responding to short expressive texts that involve the movement of people, animals or vehicles, demonstrating understanding through drawings or familiar signs
- responding to key elements of short signed stories, for example by mimicking facial expressions or repeated signs
- participating in interactions in Auslan that involve imaginative responses to stimuli such as cartoons using gestures, handshapes, facial expressions and simple signs to suggest what happens next in the story
- engaging with different forms of Deaf art, such as handshape creations, and responding by creating their own piece of art on a similar theme
- shadowing NMFs in short Auslan poems or narratives
- retelling favourite events of an Auslan story using modelled signing
- engaging in imaginative interactions that involve the creation of mood or momentum through repeated use of signs, handshapes and facial expressions to modify manner or intensify adjectives
- responding to performances of Deaf poetry that evoke emotions such as sadness, fear or excitement, for example by indicating enjoyment or different personal feelings

Express imaginative ideas and visual thinking through the use of mime, gestures, drawing and modelled signs

[Key concepts: story, animation, constructed action; Key processes: re-enacting, depicting, constructing, representing]

(ACLASFC097)

- re-enacting individual short stories or wordless animations using gestures, actions and modelled signs
- depicting the movement of people, animals or means of transport by using handshapes in creative ways
- creating amusing sequences of signs using a fixed handshape, such as *point* in PRO2 THINK PRO1 SHY
- using gestures and modelled signs to create their own short stories or mimes
- creating an imaginative scenario that features the movements and characteristics of a particular animal through the use of constructed action
- participating in storytelling games or imaginative activities, such as the joint construction of a humorous story
- working with classmates to represent objects using combined bodies and hands in amusing or creative ways
- changing elements of familiar narratives to create their own versions, with a focus on varying manner or constructed action
- adapting an element of a familiar cartoon or story to achieve a different outcome

Translating

Elaborations

Translate familiar words and phrases from Auslan to English and vice versa, noticing similarities and differences in meaning

[Key concepts: meaning, interpretation, translation; Key processes: translating, interpreting, identifying, comparing, recognising, paraphrasing, summarising]

(ACLASFC098)

- recognising that every language uses words or signs to make meaning
- identifying aspects of Auslan which are the same in English, such as the fingerspelled alphabet
- participating in shared reading of age-appropriate high-interest, low-readability books containing images and plain English text, asking and answering questions about unfamiliar words and phrases, working collaboratively to produce an Auslan version of the text
- comparing key signs used in Auslan versions of familiar and simple texts, such as stories from the Auslan Storybooks site, to words used in written English texts, and noticing how signs can convey rich, multilayered meaning, which might not have a direct match in English captioning
- playing matching-pair games with Auslan sign flashcards and English word cards, matching cards in each language associated with concepts such as weather or animals
- identifying examples of words and signs that seem to have direct matches/equivalents in Auslan and English and examples of those that do not, such as GO-TO in Auslan requiring more than one English word
- finding and using phrases that have direct sign-for-word translations between Auslan and English, such as *Goodnight*, *Happy birthday* and *Happy New Year* and others that do not, such as *None of your business!*
- identifying challenges associated with Auslan–English translation, such as multiple meanings for words like *run*, the fact that meaning is not always literal and that sign translations of a word will vary according to the meaning in context
- paraphrasing and summarising short Auslan texts containing familiar content, providing simple translations in written English, and following the reverse process working from texts in written English into Auslan

Create different types of bilingual texts to support their classroom learning

[Key concepts: bilingual, meaning, translation, equivalent; Key processes: translating, labelling, developing, creating, captioning]

(ACLASFC099)

- using images of Auslan signs and equivalent words in English to name and label familiar objects, classroom items or school resources, using posters and digital glossaries with captions
- developing a handshape dictionary using palm cards or digital means, including equivalent English terms
- using photos of family members to create a family tree or chart, captioning and labelling in English each family member with corresponding images of Auslan signs
- creating bilingual texts for younger children, such as a mini Auslan–English dictionary of school-specific signs
- making their own bilingual dictionaries with English labels, Auslan sign images and simple descriptions of signs, identifying and categorising signs according to handshape

Identity

Elaborations

Explore the concepts of identity, social groupings, relationships, community and place and space, and deaf people's visual ways of being and negotiating these networks

[Key concepts: identity, self, relationship, community, Deafhood, visual ways of being, place, space, reciprocity, responsibility; Key processes: identifying, discussing, exchanging]

(ACLASFC100)

- identifying themselves as members of different groups and describing their relationships with deaf, hard of hearing and hearing students, family members, the larger Deaf community and wider 'hearing' world
- identifying and describing physical markers of identity among deaf people, such as the use of sign language and/or hearing devices such as hearing aids, cochlear implants and FM systems
- creating a poster depicting their own family and labelling immediate and extended family members as *deaf/hearing*
- identifying and discussing family names, given name/s and name signs for themselves and for others
- exchanging views on how their individual biographies, including family origins, traditions, beliefs, communicative practices, interests and experiences, shape their sense of identity and impact on their ways of communicating
- building an understanding of the concept of Deafhood and how each individual's journey of identity development contributes to social relationships and to the formation of community, for example, by creating an individual identity map or a hand map
- discussing visual ways of being, including interacting, transmitting and receiving information and behaving according to Deaf cultural values, and how these influence group learning and information sharing among Deaf people
- investigating Deaf cultures around the world and how they shape visual ways of being, for example by considering how Deaf people from different countries and ethnic groups express shared group identity through practices such as gathering formally as a national or international community via opportunities such as Deaf film festivals; performing arts events, for example, Deaf Way; theatrical events; art exhibitions; or sporting events such as ADG, Deaflympics
- responding to deaf people from different groups and backgrounds who visit and present about their education, families, social networks and sense of community/identity, for example by discussing similarities and differences between visitors' reported experiences and their own lives
- identifying the importance of place and space in the Deaf community, exploring why some places and spaces make deaf people feel comfortable or promote a sense of belonging, for example by identifying factors that make a classroom 'Deaf friendly', such as U-shape seating, minimisation of window glare/reflection, good lighting and acoustics, flashing lights, suitable interpreter location
- identifying examples of deaf people's visual orientation towards the world ('people of the eye'), such as waving in space or using flashing lights to gain attention, visual applause
- identifying their own stories, history, roles, responsibilities and links to the Deaf community and considering how these relate to their sense of identity
- recognising that signed language is a birthright which

establishes their identity with respect to the Deaf community and its traditions

- viewing and creating accounts of their own and each other's experience and roles in the Deaf community and identifying examples of the different ways of being deaf that they describe
- discussing behaviour associated with cultural practices and traditions, for example, by discussing the concept of reciprocity as a manifestation of how community members share responsibility for each other's wellbeing

Reflecting	Elaborations
<p>Reflect on ways in which Auslan and associated communicative and cultural behaviours are similar to or different from other language(s) and forms of cultural expression</p> <p>[Key concepts: intercultural experience, ways of knowing and being; Key processes: comparing, analysing, discussing, reflecting]</p> <p>(ACLASFC101)</p> 	<ul style="list-style-type: none"> • comparing aspects of their lives as young deaf people with those of young hearing people as represented in digital images, video clips and narratives, for example, ways of engaging in different games and activities, exchanging stories and interacting socially at school, at home and in the community • discussing changes or adaptations they make to their communicative style when communicating with non-signers • reflecting on similarities and differences between ways of communicating in Auslan and in Australian English in different social situations, for example, ways of greeting/leave-taking, introducing people and using body language, facial expression and eye contact • reflecting on the need for sustained eye contact when using Auslan in order to understand a message and before teacher instructions can proceed, and considering how this may differ for hearing students in a spoken language environment • reflecting on language differences in forms of address in signed and spoken language, for example, using a person's name when addressing them directly in Australian English but not in Auslan • examining general misconceptions that deaf people may have about hearing people and culture, for example, that hearing people hear and understand everything, or that hearing people can hear from a distance • reflecting on and providing possible explanations for assumptions hearing people might have about deaf people or about signed languages

Understanding

Systems of language	Elaborations
---------------------	--------------

Identify and describe all elements of sign production, including handshape and its orientation, movement, location and non-manual features and understand that signs can look like what they represent

[Key concepts: handshape, orientation, movement, location, hand dominance; Key processes: identifying, recognising, describing, understanding]

(ACLASFU102)

- realising that meaning is communicated through the use of signs, pictures, written or spoken words or miming
 - identifying the handshape of a sign, for example, COCKATOO (hs:5, palm left) and SOCCER (hs:fist, palm towards signer) and identifying signs of a particular handshape
 - identifying and demonstrating signs with a change in handshape, for example FIND or BEST
 - identifying and demonstrating signs with a change in orientation, for example CAN-NOT or HOW
 - noticing the path movement of a particular sign and identifying signs associated with the major types of path movements, for example, THROUGH (forwards) or FULL (down to up)
 - describing how the movement changes between groups of related numbers, for example, 5, 15, 50, 5th)
 - noticing the five major locations of signs on the body or in space, and identifying signs associated with each, such as SEE (head/face), SAY (mouth/chin), WHY (chest), TALK (hand) and ONE (signing space)
 - understanding that NMFs are important in sign language for showing feelings of the signer or others
 - identifying single, double and two-handed signs, and recognising which hand is dominant (the pen hand) and which is non-dominant (paper) within two-handed signs
 - thinking of body-anchored signs, such as HEAD or WHY, and signs that are not body anchored, such as HAVE or STOP, and recognising that non-body anchored signs can be located in space around the signer
 - understanding that signs can be organised by handshape, for example in Johnston's Auslan dictionaries or localised handshape dictionaries in schools, and that this is useful if an English word for a sign is not known
 - recognising that some signs are iconic, that is, provide a visual image of a referent, for example, HOUSE, TREE, DRINK, ELEPHANT, and that some are not, such as SISTER, WHY, SIMPLE
 - experimenting with different methods of capturing the signed language, such as: a class-invented script, drawing pictures, videoing, English glosses or ASL-phabet
-

Recognise and restrict signing to the standard signing space, and understand that particular signs, depicting signs, some verbs, enacting and pronouns make use of spatial relationships

[Key concepts: signing space, function of points, verb modification, depicting signs; Key processes: noticing, recognising, describing, comparing, distinguishing]

(ACLASFU103)

- describing the range of signing space in normal signed discourse
 - recognising that non-body-anchored nouns can be located in the signing space and identifying instances of this
 - noticing that Auslan pronouns are different from English because they don't show gender but they can show the location and a specific number of referents, for example, WE2 (inclusive) and WE3 (inclusive) or WE2-NOT-INLCLUDING-YOU (exclusive)
 - noticing that a point can refer to a person, place or thing
 - noticing that enacting a role or modifying the beginning and end locations of some verbs can show the referents involved, for example:
PRO1 ASK PRO3 versus PRO1 ASK_{-her}
PRO3 ASK_{-me} CA:I-was-shocked
-  Auslan
- identifying what sorts of things can be represented in a DS by a particular handshape, for example a distant person, pole or tree can be represented by a point handshape, and a cylinder can be traced by a C handshape
 - distinguishing between entity, handling or SASS DSs by looking at what the handshape represents in each type:
 - entity: the handshape is an object or person
 - handling: the handshape represents a person's hands touching or moving another object
 - SASS: the handshape traces the shape or size
-

Recognise and use elements of clause structure, such as noun groups/phrases or verb groups/phrases and using conjunctions to shape structure

[Key concepts: sign class, nouns, adjectives, verbs, adverbs, clause; Key processes: recognising, observing, distinguishing, understanding]

(ACLASFU104)

- categorising noun signs into those for people, animals, places or things
- learning that proper nouns can have a sign name or be fingerspelled
- recognising different nouns in clauses, including those that are shown with a pointing sign, such as GIRL READ versus PRO3 READ, or VISIT FRIENDS versus VISIT PRO3
- knowing that adjectives describe nouns in different ways, such as how they look (BIG or RED), feel (SOFT or HOT), smell (SMELLY) or sound (LOUD)
- understanding that changes in mouth patterns and movement of signs can intensify adjectives, for example, RED^{-really}, PLEASED^{-really}, TALL^{-really}
- identifying verb signs (SIT, EAT, FEEL, WONDER, HAVE) and recognising that they are central to a clause
- noticing that some signs modify the meaning of verbs, such as WORSE as in WORSE OLD and that these are called adverbs
- contributing examples of signs that tell:
 - when a verb happens (IN-2-WEEKS PRO1 HOLIDAY or WANT LUNCH NOW)
 - where a verb happens (PRO3 RUN FAR or COME HERE)
 - how a verb happens (FAST or SLOW or PRO2 QUICK FINISH)
- understanding that a clause is one or more signs expressing a single idea and that a clause has at least one verb, but often one or more nouns as well, for example:
CALL^{-him}
I called him.
MAN THERE GO-TO POSS3 HOUSE
That man went to his house.
BIG MONSTER SCREAM
A big monster screamed.

- distinguishing between clauses that are statements and those that are questions
- distinguishing between yes/no questions, wh- questions and statements and their corresponding NMFs
- knowing that signing involves either telling with signs or showing with DSs and periods of CA, for example,
MAN WALK SLOW
DS(point):*man-walks-slowly*
CA:man-swinging-arms-nonchalantly

Recognise similarities and differences in language features of different types of texts, and notice how signers build cohesion in texts

[Key concepts: text, textual features, referent tracking; Key processes: recognising, identifying]

(ACLASFU105)

- recognising that texts are made up of one or more clauses, which have one or more signs in them, which together make meaning
- looking at short recounts or narratives in Auslan and identifying information necessary to communicate with others such as who was involved or when and where the event happened
- recognising that different signed texts serve different purposes and discussing and comparing these purposes, for example, a procedure is to explain how, a narrative is to entertain
- identifying how signers use space to track participants through a text, for example by pointing back to an established location to refer to a noun referent
- identifying the many ways signers can refer to the same referent in a text, for example by using DSs, points or list buoys, and noticing how such strategies help maintain interest and support understanding

Language variation and change

Recognise that there is variation in how Auslan is used depending on context, environment and influences of other signed languages

[Key concepts: language variation, influence, word-borrowing, change; Key processes: exploring, identifying, classifying, describing]

(ACLASFU106)

Elaborations

- exploring different ways to show the same concept, for example through a picture, a spoken word, a sign, a home sign or a gesture
- exploring similarities and differences in the two main Auslan dialects, the northern dialect used in New South Wales, Queensland and the Australian Capital Territory, and the southern dialect used in Victoria, South Australia, Western Australia, Tasmania and the Northern Territory, for example through building webcam relationships with other schools or by identifying and collecting signs that differ in the two forms
- noticing different ways that English words are borrowed into Auslan, for example, the use of fully fingerspelled words, such as D-U-E, N-O-U-N, the fingerspelling of the first letter of corresponding English words, for example TOILET, FATHER, or abbreviations of English words, for example, state names: S-A, N-S-W, V-I-C, T-A-S, and organisation names: N-A-B-S, W-A-A-D, N-S-W-A-D, D-C-S-S-A, and lexicalised fingerspelling, such as HOW, BUT, ABOUT, FOR
- noticing the variation in 'handedness' between signers in relation to signs and to fingerspelling: right handers using their right hand as their dominant (main) hand; left handers doing the opposite
- considering adaptations to language use when communicating in different physical environments, such as in video chats, across a large yard, or when one or both hands are occupied, for example choice of vocabulary, size of signing space, clarity of signs, use of fingerspelling and NMFs

Language awareness

Elaborations

Develop awareness of the sociocultural context, nature and status of Auslan and of the Deaf community in Australia and the impact of this on language change

[Key concepts: communication, transmission, accessibility, language vitality; Key processes: identifying, describing, recognising, investigating, discussing]

(ACLASFU107)

- identifying where and when different people learnt to sign and whether they are from deaf or hearing families
- exploring and providing possible explanations for variation in Auslan fluency among their classmates and members of the Deaf community
- understanding the nature of the transmission of Auslan, for example, how in most cases Auslan is not passed on from parent to child, but from child to child (horizontal language transmission) or to children by deaf adults outside the family
- investigating the use of digital technology/communication by Auslan users, for example, social media, SMS/texting and NRS and VRS, discussing how these modes of communication impact on accessibility and communication for members of the Deaf community
- considering ways that Auslan is evolving due to different influences, including the capacity for new technologies to store, record and share sign languages
- discussing the degree to which their classroom/school is an Auslan-accessible and Deaf-friendly environment, and how this might be further enhanced
- investigating how Auslan and Deaf culture are promoted in the wider community, for example through the influence of organisations such as Deaf Australia, high-profile individuals such as activists or actors or events such as NWDP, Deaf festivals, Australian Deaf Games or Deaf art exhibitions

Role of language and culture	Elaborations
------------------------------	--------------

Explore connections between language, identity and cultural practices, values and beliefs and the expression of these connections in Auslan

[Key concepts: language, culture, identity difference, transmission; Key processes: recognising, exploring, understanding, identifying]

(ACLASFU108)

- recognising that people from different places and backgrounds may use different languages and have ways of living and communicating that differ from their own
- appreciating that culture and cultural difference means that people may value different things or live differently, noticing observable examples of 'difference', such as ways of greeting (bowing versus shaking hands) or conveying information (through words versus signs)
- recognising how they as deaf people live in ways that may be different from how hearing people live and that these ways are primarily visual, for example by responding to prompts such as: *Compare how deaf and hearing people get the attention of someone on the other side of the room;* and *How do deaf and hearing people make sure they wake up at a particular time in the morning?*
- recognising the importance of facial expression, eye gaze and non-manual features in conveying information in a visual-gestural language and culture
- understanding that culture is more than the visible aspects of people's lives, that it also includes invisible elements such as beliefs and values, how people think about themselves and others, how they relate to their social and physical environments; and considering how this understanding applies to themselves as users of Auslan
- recognising that in each culture there are general rules for what to say and do, when, where and with whom, and that these rules differ from culture to culture, for example, the Deaf culture places greater importance on eye contact than cultures that communicate through spoken languages
- identifying the importance of signing space and proxemics in Auslan, particularly in relation to a person passing between two signers, or the positioning of communication partners
- recognising that shared experiences shape cultural values in Auslan and in other cultures, for example, the experience of deaf children being excluded from family and social discourse during dinner table conversations or social events gives rise to the value placed in the Deaf community on sharing information with each other
- considering how some spaces make deaf people feel comfortable, for example, open-plan spaces with long sight lines allowing easy visual access

Years 7 and 8 Achievement Standard

By the end of Year 8, students interact with the teaching team, class visitors and each other to share information about themselves, their families, friends, routines, pastimes and experiences. They refer to family members and classmates using fingerspelling or sign names as appropriate, and use lexical adjectives and some SASS depicting signs to describe people's physical appearance and characteristics, for example POSS1 SISTER E-M-M-A, PRO3 SHORT RED HAIR. They use entity depicting signs to discuss movement and location. They recount shared and personal experiences, using simple clause structures, modifying some verbs for present referents or single absent referents for example PRO1 LIKE TV. They ask and respond to simple questions and distinguish between statements and questions using grammatical non-manual features (NMFs). They express likes, dislikes and feelings using lexical signs and affective NMFs, such as DON'T-LIKE DRAWING. They follow directions for class routines and instructions of two or more steps, using directional terms or depicting signs such as DS:turn-left DEAD END DS:turn-right. Students follow culturally appropriate protocols, such as responding to and using attention-gaining strategies such as flashing lights, waving or tapping a shoulder or table, using voice-off while signing and observing appropriate distance between signers. They identify specific points of information in signed texts, for example, colours, numbers, size or time. They present factual information about familiar topics, using modelled lexical signs and formulaic constructions. They demonstrate simple procedures using known signs, gestures, objects and list buoys. They recount and sequence events, using familiar signs and visual prompts and time markers such as 3-YEARS-AGO, IN-TWO-WEEKS or LAST NIGHT. They restrict signing to the standard signing space. They view short imaginative and expressive texts, such as poems and stories, demonstrating understanding through drawing, gesture and modelled signs. They create simple imaginative texts and retell wordless animations, using familiar signs, gestures, modelled language and visual supports, modifying NMFs and lexical signs to indicate manner. They translate high-frequency signs/words and expressions in simple texts. Students identify themselves as members of different groups and describe their relationships with deaf, hard of hearing students, family members and the larger Deaf community and also with the wider 'hearing' world. They consider how these different relationships contribute to their sense of identity. They identify places that are important to the Deaf community and describe how such places evoke a sense of belonging and pride. They recognise that one of the most unifying features of the Deaf community is the use of Auslan.

Students know that Auslan is a language in its own right, different from mime and gestures used in spoken languages, and that eye contact is necessary for effective communication. They know that meaning is communicated visually through the use of signs, fingerspelling, NMFs and non-conventional gestures. They identify and describe the handshapes, movements and locations of signs. They identify some signs that link to visual images, for example HOUSE, DRINK, and demonstrate signs that are body anchored, such as HUNGRY or SLEEP, and non-body anchored, such as HAVE or GO-TO. They identify how signers use space to track participants through a text, for example by pointing back to an established location to refer to a noun referent; and they identify ways signers refer to the same referent in a text, for example, by using DSs, points or list buoys. They know that signs can be displaced in space for a range of purposes, such as to show locations or to indicate participants in a verb. They know that signing involves telling, depicting or enacting. Students recognise variation in the use of Auslan, such as regional dialects and differences in signing space. They understand different ways that English words are borrowed into Auslan and how these become lexicalised. They recognise variation in how Auslan is used, for example by recognising regional dialects and differences in signing space and explain the nature of transmission of Auslan. They identify different ways Deaf community members communicate with each other and with members of the wider hearing community; and describe how digital forms of communication, such as social media, SMS/texting and NRS, have improved accessibility for the Deaf community and contribute to the vitality of Auslan. They recognise the importance of facial expression, eye gaze and NMFs in a visual-gestural language and culture.

Years 9 and 10

The nature of the learners

This stage of learning coincides with social, physical and cognitive changes associated with adolescence. Learners at this level are developing their cognitive and social capabilities and their communicative repertoire in the language, although it is likely they are still impacted by their late access to language and possibly by other challenges. As their language develops, so does their ability to conceptualise and reason, and their memory and focus improves. They are more independent and less egocentric, enjoying both competitive and cooperative activities. Learners at this level benefit from varied, activity-based learning that builds on their interests and capabilities and makes connections with other areas of learning. The curriculum ensures that learning experiences and activities are flexible enough to cater for learner variables, while being appropriate for learners' general cognitive and social levels.

Auslan learning and use

Learners in this band engage in a range of activities that involve watching and responding to a variety of signed texts. They build proficiency through the provision of rich language input from a range of sources where grammatical forms and language features are purposefully integrated. Learners build more elaborated conversational and interactional skills, including initiating and sustaining conversations, reflecting on and responding to others' contributions, making appropriate responses and adjustments, and engaging in debate and discussion. The language they see and sign is authentic with some modification. They follow instructions, exchange simple information and express ideas and feelings related to their personal worlds. They negotiate interactions and activities and participate in shared tasks and games.

Shared learning activities develop social, cognitive and language skills and provide a context for purposeful language experience and experimentation. Individual and group presentation and performance skills are developed through researching and organising information, structuring and resourcing presentation of content, and selecting appropriate language to engage a particular audience. Learners use ICT to support their learning in increasingly independent and intentional ways, exchanging resources and information with each other and with young people of the same age in other signing communities. They access a variety of media resources, maintain vlogs and other web pages, and participate in social networks. They view and create texts on topics relevant to their interests and enjoyment and continue to build vocabulary that relates to a wider range of domains, such as areas of the curriculum that involve some specialised language use. The language used in routine activities is re-used and reinforced from lesson to lesson in different situations, making connections between what has been learnt and what is to be learnt.

Contexts of interaction

Learners interact in Auslan with each other, their teaching team, members of their families who can sign and members of the Deaf community. They have access to Deaf visitors and cultural resources in wider contexts and communities through the use of ICT and through the media. Language development and use are incorporated into collaborative and interactive learning experiences, games and activities.

Texts and resources

Learners work with a broad range of live and digital signed texts designed for learning Auslan in school and for wider authentic use in the Deaf community. They also engage with resources prepared by their teacher, including games, performances, presentations and language exercises. They may have additional access to BANZSL resources created for the Australian, New Zealand or British Deaf communities, such as children’s television programs, websites, music or video clips. In addition, they work with texts from other signed languages that make extensive use of the ‘visual vernacular’. Learners may also have access to community facilities and functions. The Deaf community is the most important resource for learning as it is the origin of most of the texts and communicative situations that learners engage with.

Features of Auslan use

Learners at this level increasingly use conventional Auslan: lexical signs or depicting signs with conventional classifier handshapes, and rely less on their idiosyncratic systems. They learn to modify some indicating verbs for non-present referents and use constructed action to represent themselves or others in recounts. They use a range of NMFs to distinguish questions from statements or negatives, and use more cohesion when signing texts. A balance between language knowledge and language use is established by integrating focused attention to grammar, vocabulary building, and non-verbal and cultural dimensions of language use with communicative and purposeful learning activity. Learners are increasingly aware that various signed languages are used in Deaf communities across the world. As they engage consciously with differences between languages and cultures, they make comparisons and consider differences and possibilities in ways of communicating in different languages. They build metalanguage to talk about aspects of language such as nouns, verbs and constructed action.

Level of support

While learners work more independently at this level, ongoing support is incorporated into task activity and the process of learning is supported by systematic feedback and review. Form-focused activities build students’ grammatical knowledge and support the development of accuracy and control in Auslan. Opportunities to use this knowledge in meaningful activities build communicative skills, confidence and fluency. Tasks are carefully scaffolded: teachers provide models and examples; introduce language, concepts and resources needed to manage and complete learning activities; make time for experimentation and for polishing rehearsed texts; and provide support for self-monitoring and reflection. Discussion supports learning and develops students’ conceptual frame for talking about systems of language and culture. Learners are encouraged to engage more with resources such as websites, dictionaries, translating tools and other materials designed to enrich their receptive and productive language use.

The role of English

Auslan is the language of all classroom interactions, routines and activities. As these learners are in the unique position of not having acquired a first language until very late in life, time spent developing their Auslan must be maximised. While these learners are simultaneously developing English literacy skills, use of English is limited to the translating thread and to small amounts of research with source texts in simple English.

Years 9 and 10 Content Descriptions

Communicating	
Socialising	Elaborations

Describe activities and experiences and share and respond to ideas and feelings about people they know, their daily lives, social worlds and school community

[Key concepts: idea, feeling, description, experience; Key processes: recounting, describing, interacting, comparing]

(ACLASFC109)

- recounting classroom events using indicating, plain and depicting verbs, for example:
MONDAY PRO1-^{plural} DS:many-people-go-to SPORT DAY. PRO1 ENJOY
We all went to a sports day on Monday. I enjoyed it.
- describing the appearance of people, objects and places using SASS depicting signs and spatial location
- recounting personal experiences using specific time-related signs and conjunctions, such as:
LAST HOLIDAYS PRO1 CAMP
Last holidays I went camping.
- describing activities they have completed using some verb modifications to show manner, for example:
PRO1 WRITE-^{carelessly}
I wrote it very quickly.
- interacting with members of the Deaf community to share details of their personal world
- describing relationships between themselves and members of their school community, for example:
PRO3 POSS1 BEST FRIEND
She's my best friend.
M-R-S S-M-I-T-H POSS1 SCIENCE TEACHER
Mrs Smith is my science teacher.
- recounting events involving more than one person using constructed action
- describing events that they have experienced and how they made them feel, for example:
MONDAY DEAF PERSON VISIT SCHOOL PRO1 EXCITED MEET
On Monday a Deaf visitor came to school. I was excited to meet them.
MOVIE SCARY BUT PRO1 LIKE
The movie was scary but I liked it.
- comparing attributes or characteristics of classmates or classroom objects, for example:
S-A-M RUN FAST C-H-R-I-S WORSE FAST SPEED
Sam runs fast but Chris runs the fastest.
THAT BEST COMPUTER
That's the best computer.
- comparing weekend or holiday routines, interests and activities, using signs associated with time, sequence and location, for example:
REGULAR SUMMER PRO1-^{plural} GROUP-MOVE-TO COUNTRY STAY++ TWO WEEK
We go to the beach for three weeks in summer.
WEEKEND PRO1 GO-TO-AND-BACK++ CAMP
I go camping on weekends.

▶ Auslan

▶ Auslan

Participate in shared learning activities that involve planning, transacting and problem-solving, using simple signed statements, questions and directions

[Key concepts: planning, role, responsibility, support, information exchange; Key processes: negotiating, encouraging, describing, expressing preference]

(ACLASFC110)

- negotiating roles and responsibilities in shared learning activities, using expressions such as:
PRO2 TYPE PRO1 WRITE
You type and I'll write.
 - understanding and using expressions of support, encouragement or praise during shared activities, for example, EXCELLENT, THAT GREAT
 - playing games that involve detailed information exchange, such as a 'murder mystery' type game, asking for and supplying descriptions about the suspect, for example:
PRO3 HAVE GLASSES?
Does he have glasses?
 - working collaboratively to plan an event such as a handball competition, using expressions related to place, time and numbers, for example:
BEST PLAY WHERE?
Where will we play?
TEAM+ HOW MANY?
How many teams are there?
 - following and giving directions for outdoor activities such as an obstacle course
 - expressing preferences in relation to roles and responsibilities in shared learning activities, using NMFs and statements such as:
HANDWRITING PRO1 DON'T-LIKE RATHER TYPING
I don't like handwriting; I prefer to type it

 - working with peers to plan for a visit from a Deaf community member, prioritising and sequencing tasks
-

Communicate clearly in different classroom interactions and contexts, demonstrating appropriate protocols when communicating with each other, teachers and deaf people

[Key concepts: instruction, interaction, protocol; Key processes: responding, negotiating, indicating, initiating, interrupting]

(ACLASFC111)

- responding to multistep classroom instructions, for example:
IN YOUR COMPUTER FINISH CLICK-ON ELAN
Log in to your computer and then click on ELAN.
- asking for repetition or clarification, for example:
THAT RIGHT THAT?
Is that right?
PRO1 DON'T-UNDERSTAND
I don't get it.
- negotiating turn-taking by using visual or tactile methods in taking or yielding a turn, for example:
PRO2 FIRST NEXT-TURN^{-around-circle}
You go first then we'll take turns around the group.
- using NMFs such as raised eyebrows to indicate interest, or head tilt to indicate lack of understanding
- initiating protocols within the classroom such as:
 - gaining group attention through flashing lights, tapping, foot stomping and waving
 - maintaining eye gaze and back-channelling
 - positioning seating to keep visual communication clear, for example, sitting across from signers when communicating
- following protocols and using appropriate language when using or accessing an interpreter, for example:
SIT THERE PLEASE CAN YOU?
Can you sit there, please?
- following protocols for interrupting others, such as waiting for pauses in conversations and eye contact, or by using language such as:
HOLD
Hold that thought.
QUICK INTERRUPT
Can I just interrupt you quickly?

Informing

Elaborations

Identify, paraphrase or compare information obtained from a variety of signed texts or from their own data collection and present the information in different forms

[Key concepts: information, likes/dislikes, interests, preferences; Key processes: retelling, recording, organising, identifying, surveying, categorising]

(ACLASFC112)

- retelling key points of multistep information used in classroom interactions, such as announcements or directions for a task
- watching signed texts that show people expressing likes and dislikes and recording and organising their observations in table form
- watching a presentation by a teacher or peer, identifying specific points of information, such as where they went for a holiday or what activities they did
- surveying peers in relation to their interests and preferences, categorising and comparing findings in charts or graphs
- following the steps of a signed demonstration of procedures, such as how to cook something or play a new game
- learning new Auslan vocabulary and language structures through interacting with Deaf visitors, teachers and mentors, recording the new language in personal sign dictionaries
- viewing live or recorded interviews or informal conversations between deaf people in different situations and contexts, identifying key points and topics covered
- viewing different types of signed texts, such as instructional sports videos or science demonstrations, showing understanding by responding to questions

Convey factual information and opinions in signed texts

[Key concepts: routine, event, hobby, procedure; Key processes: describing, reporting, explaining, presenting, instructing]

(ACLASFC113)

- describing home and school routines in the correct sequence, for example, weekend activities or their school timetable
- reporting to the class about a shared school event such as Deaf Sports Day or school camp
- creating signed texts to explain a hobby or interest using visual supports such as photos or props
- presenting descriptions of school equipment such as those used in woodwork, science or sports and giving simple signed explanations of how they work
- instructing the class in a procedural text such as a simple recipe, using props

Creating

Elaborations

Engage with different types of creative texts, identifying and discussing characters, events and personal responses through the use of familiar signs, actions and artwork

[Key concepts: performance, character, personal response, creativity; Key processes: viewing, responding, participating, comparing]

(ACLASFC114)

- participating in Auslan games using simple clauses in creative ways, for example, a freeze tag game, building on a text
 - viewing creative performance texts and identifying characters and events from Auslan narratives, poems and theatre performances, such as the Australian Theatre of the Deaf
 - viewing and expressing personal responses to creative visual texts such as handshape art and art produced by/about Deaf people, Deaf culture or signed languages, for example, paintings by Nancy Rourke and animations by Braam Jordaan
 - comparing versions of creative signed texts and indicating preferences, for example, between different Auslan versions of the same story signed by different deaf people
 - responding to signed poems and 'visual vernacular' descriptions of a character's appearance by shadowing, mimicking and drawing, for example, work by Frédéric Vaghi
 - participating in performance activities such as unscripted response-to-stimulus role-plays, recognising how characters' feelings and attitudes are expressed through NMFs and manner
 - viewing and comparing expressions of Deaf experience through different visual art forms, such as painting, photography or sculpture, comparing with their own use of visual forms of expression of feelings and experience
-

Create or adapt imaginative texts and live or filmed expressive performances that involve imagined experiences and feature different characters, amusing experiences or special effects

[Key concepts: appearance, character, audience, animation, emotion, manner; Key processes: depicting, creating, presenting, re-enacting, reinterpreting, choreographing, performing]

(ACLASFC115)

- participating in games and activities that focus on depicting the appearance and characteristics of people, animals or objects and their relationships
- working collaboratively to create and present signed skits to entertain a targeted audience
- re-enacting individual short stories or wordless animations that include two or more characters and their interactions through the use of constructed action
- reinterpreting creative texts for effect, for example by changing emotions or movements through the use of NMFs and manner
- using 'visual vernacular' to enact short scenarios involving imaginary characters, contexts and objects, by employing a range of depicting signs and constructed action
- choreographing and performing a creative text (dance, signed song, poem), incorporating Auslan and focusing on matching timing, beat and rhythm
- performing stories for a live audience with a focus on the visual communication of emotion and humour
- creating the next scene, a new character or an alternative ending for a signed fable, short story or cartoon
- creating original handshape poetry to present at a school assembly or community festival
- creating a video record of an imagined formal or informal interview, incorporating elements of humour or tension and building character and mood through the use of NMFs and pauses

Translating

Elaborations

Translate and interpret different types of familiar short texts, demonstrating awareness of individual interpretations of meaning

[Key concepts: equivalence, translation, meaning, interpretation, ethics, culture; Key processes: translating, interpreting, comparing, researching, shadowing, explaining]

(ACLASFC116)

- translating the school song into Auslan with support, identifying words or phrases that do not easily translate and finding suitable equivalents in Auslan that match the English concept
- shadowing online Auslan translations and captioning, such as the *Catching Fire* series of safety videos or the emergency disaster preparedness videos
- comparing their own translations of short familiar texts with those of their classmates, noting discrepancies or variations and discussing possible reasons for these
- observing and interacting with deaf guests to the classroom who use different signed languages, such as ASL or a traditional signed language used by deaf Aboriginal and Torres Strait Islander elders, identifying differences between the languages and acting as interpreter with support
- creating basic translations of song lyrics or simple poems from English to Auslan
- translating and explaining the meaning of words or expressions associated with figurative language use in Auslan, such as *train gone*, *sorry* and comparing these to some common English idioms
- conducting sight translations of plain, high-interest, low-readability English texts such as short news articles that are written for their age group
- comparing existing translations in Auslan of narratives, such as fairytales or short stories, to their own ideas of how they would translate specific segments of these texts
- explaining the role of accredited Auslan–English interpreters and that of Deaf interpreters, demonstrating through role-play correct protocols for working with interpreters

Create bilingual texts such as notices, displays or newsletters for use in the wider school community

[Key concepts: translation, meaning, bilingualism, information; Key processes: translating, composing, comparing, creating, contributing]

(ACLASFC117)

- creating captions for pre-recorded signed texts to be used in a variety of school contexts, for example, a translation of the Auslan version of the school song or a 'welcome to the school' video
- creating bilingual texts for use in the school community, such as informative posters that include signed images or digital library displays about Auslan, considering how to represent meaning in the two languages for different audiences
- composing bilingual texts for class or school assembly performances, events or displays, for example, NWDP announcements
- using bilingual online dictionaries and electronic tools to compose bilingual texts such as an online Auslan–English version of a school newsletter
- contributing items of signed news and information to a bilingual school website or web page associated with their class, school or local community

Identity

Elaborations

Identify and analyse ways in which deaf people behave and relate within society as a distinct social group as 'people of the eye', demonstrate responsibility for connections between the Deaf community and the wider 'hearing' society, and for culturally rich and appropriate places and spaces

[Key concepts: identity, relationship, Deafhood, advocacy, society, place, Deaf space, Deaf gain, responsibility, guidance; Key processes: identifying, discussing, comparing]

(ACLASFC118)

- using a vlog journal entry to discuss how having peers who share the same language provides a social bond and builds confidence
- identifying characteristics of deaf people's visual awareness, such as good observation of body language and heightened alertness to hazards in the environment while walking/driving and signing
- comparing strategies used by deaf and hearing adults to negotiate physical environments, for example, different behaviours at a bank of lifts, identifying how deaf people draw on additional perceptual resources in ways hearing people are unaware of
- exploring technologies used by deaf people to communicate visually, such as videoconferencing apps, to support social networks and to strengthen a sense of individual or shared identity
- investigating ways in which a sense of confidence in relation to identity influences awareness and a capacity for advocacy for Deaf rights, for example in relation to issues such as the provision of interpreters or captioning
- discussing how their sense of identity may shift according to context and situation, and how as people mature they learn to manage 'multiple identities' in relation to different elements of experience, such as background ethnicity and culture and Deaf identity culture
- identifying strategies used by deaf people to negotiate the hearing world, such as travelling with paper and pen or smart phone to take notes
- using the concept of Deafhood to map and communicate their own journeys of identity development, for example, their identification with particular Deaf role models, and considering the role identity plays in contributing to individual, peer group and community health and wellbeing
- engaging with deaf visitors from different groups and backgrounds about their experiences in the Deaf community, for example by interviewing the visitors and recording their responses
- using drawings, photos or presentations to describe characteristic features of Deaf spaces beyond the classroom, such as removal of visual obstacles to signed communication, circles or semicircles for meeting and learning spaces, open-plan areas, lighting and window placement to maximise visual access to information
- documenting and discussing places of importance to the Deaf community, such as Deaf schools, and understanding the value of these based on stories by elders and excursions to sites of significance
- responding to elders' guidance on how cultural values, beliefs and traditions are connected through shared life experience and visual ways of being, and how they are demonstrated in community behaviour and interactions with the wider community
- describing ways in which they can take responsibility for increasing others' awareness of their communication and learning preferences, for example in the classroom and

with extended family

- exploring the concept of 'Deaf gain' and identifying examples of how wider society may 'gain' from the Deaf community, for example, benefits of captioning for other sectors of the broader community, such as elderly people or newly arrived migrants
- discussing their sense of responsibility for each other as members of the Deaf community, and the need to support younger deaf individuals in the community

Reflecting	Elaborations
<p>Reflect on the experience of learning and using Auslan in and out of school, and ways in which their understanding of intercultural communication has developed</p> <p>[Key concepts: intercultural communication, perspective, insight, self-reflection, making meaning, discrimination; Key processes: comparing, analysing, explaining, reflecting]</p> <p>(ACLASFC119)</p> 	<ul style="list-style-type: none">• describing how it feels to use Auslan to communicate outside their inner circle or school, or to watch Auslan being used by others, responding to prompts such as <i>What are the main differences you notice when observing a conversation between deaf people and one between hearing people?</i>• reflecting on similarities and differences in language and communication access, such as the extent of incidental learning acquired by hearing children through interaction with their external environment, for example by overhearing conversations or news on the radio• reflecting on similarities and differences between signed language and spoken language users when joining interactions, taking turns, using names, or passing between people who are communicating with each other• identifying and comparing how various emotions and different attitudes such as respect, shyness, exuberance or embarrassment are expressed across different languages and cultures• reflecting on the experience of interacting with hearing people in various domains online or face to face, such as after-school sports clubs, analysing these experiences in terms of their own perceptions, understandings or attitudes• reflecting on social attitudes and on their own reactions to observed responses to differences in behaviours or communicative styles, such as their feelings when hearing people fail to make eye contact with them during interactions in the wider community• reflecting on how their own ways of communicating may be interpreted when interacting with hearing people, and on how they may need to modify elements of their behaviour, such as the use of eye contact, facial expression or body language, and to consider other communication strategies such as the use of notes or gestures
Understanding	
Systems of language	Elaborations

Explore various types of non-manual features, types of iconicity in signs and the use of software to transcribe signs
[Key concepts: transcription, iconicity; Key processes: identifying, noticing, understanding]

(ACLASFU120)

- understanding that NMFs are important in sign language for marking forms such as questions
- identifying, demonstrating and describing the various types of NMFs: movements of the eyebrows, eyes, nose, mouth, cheeks, shoulders and body
- identifying the NMFs in statements, yes/no questions, wh- questions, and negatives
- noticing that in signed languages meaning can be expressed through signs or through fingerspelling
- understanding that signs can be iconic in a number of ways, such as representing a whole object or part of an object
- identifying signs with different levels of iconicity, for example, those that are fully transparent, translucent or arbitrary
- exploring, with support, software such as ELAN to annotate signed texts

Understand that signs can include different information, including a gestural overlay, and identify how signers establish spatial locations, types of depicting signs and ways of showing constructed action

[Key concepts: spatial location, grammatical use of space, constructed action, depicting signs; Key processes: noticing, identifying, recognising]

(ACLASFU121)

- noticing that meaning is created in Auslan from fully-lexical signs, partly-lexical signs and non-lexical signing and gesture
 - understanding that fully-lexical signs are in the dictionary and have a standard handshape, movement and location, and partly-lexical signs can be changed to show information such as location or who is involved in indicating verbs
 - noticing that single-digit numbers can be separate lexical items or merged into other signs (numeral incorporation) such as those for ages, for example, 5-YEARS-OLD or adverbs of time, for example, 3-WEEKS-AGO or pronouns, for example, WE3, WE4
 - identifying where and how a signer has established a location in space (through pointing, modifying the movement of a verb, or locating a non-body-anchored noun sign)
 - recognising that signers must make explicit which referent is associated with a location
 - recognising that signers can set up referents in the signing space close to them (viewer space), for example, using a bC handshape (use of non-dominant hand) to indicate putting a glass on a table or distant (diagrammatic) for example, using 5claw in two locations to represent two houses
 - identifying independently instances of DSs and their type
 - learning that the function of CA is to represent the words, thoughts or actions of a protagonist in a text, either themselves or another
 - knowing that in CA a signer can shift into the role of another, or themselves at a different time, through eye gaze change, body shift, head orientation change, and matching facial expressions
-

Understand and control additional elements of Auslan grammar, such as the use of non-manual features for topicalisation, negation or question forms, and develop awareness of how signers use constructed action and depicting signs

[Key concepts: topicalisation, negation, composite utterances;
Key processes: recognising, distinguishing, understanding]

(ACLASFU122)

- noticing that sometimes Auslan signers have information about how a verb happens through NMFs not separate signs (for example WRITE_{-carelessly})
- distinguishing between the citation form of a sign and the adverbial NMF overlaid and what meaning each part carries, for example: MAN-SPRINT (base form), MAN SPRINT_{-fast} (manner added)
- understanding that, in terms of meaning, a basic clause represents: a happening or a state (verb), who or what is involved (noun or nouns) and the surrounding circumstances (adverb or adverbs)
- noticing that clauses can be made more vivid by integrating CA or DSs to show with body or hands or by showing adverbial or adjectival meanings
- recognising how conjunctions such as PLUS, IF or BUT are used to join clauses and create cohesion
- recognising that the element of a clause that a signer wants to focus on most in Auslan is sometimes moved to be signed first and that this process of topicalisation involves particular NMFs
- recognising that signers may include both linguistic and gestural elements in a clause, that is, signers can tell, show or do both in a composite utterance
- realising that in many clauses signers 'tell' with lexical signs at the same time as 'show' with DS, CA and other gestural elements

Explore the relationship between particular text types, audience, purpose and context and analyse language features used by signers to create cohesion and achieve the purpose of the text

[Key concepts: audience, purpose, convention, coherence;
Key processes: noticing, identifying, analysing]

(ACLASFU123)

- identifying differences in different types of texts, for example by looking at a monologic recount compared to a dialogic one, and noticing differences such as the use of back-channels or hesitations
- conducting an analysis of a selected sign text, taking into account audience, purpose and topic to explain language choices made by the signer
- noticing how signers can compare or contrast ideas by locating things in the same or opposing sides of signing space
- noticing how signers achieve textual cohesion and coherence through the use of connectives that create links between clauses, for example BUT and G:WELL
- identifying where signers have established referents in locations in a text and noticing how this helps the audience to recognise who or what the referents are (actor and undergoer)
- noticing how signers construct cohesive and coherent texts through the use of text connectives such as lexical signs NEXT or G:WELL or NMFs and pausing

Language variation and change

Elaborations

Explore the concept of language flexibility, variation and change in relation to the use of Auslan across different contexts and times

[Key concepts: language variation, standardisation, change, language borrowing, adaptation; Key processes: researching, interviewing, comparing, identifying, analysing, discussing]

(ACLASFU124)

- recognising that there is a greater degree of flexibility and variability in 'oral' languages such as Auslan that only exist in face-to-face form, compared to spoken languages that are written down and that are passed on from parents to children
- understanding that other signed languages such as BSL, ISL and ASL have influenced Auslan over different periods of time
- recognising that languages constantly expand to include new words, signs and expressions due to influences such as changing technologies and digital media, for example, COMPUTER, COMPUTER-MOUSE, INTERNET, FACEBOOK, WIFI, SELFIE
- interviewing older members of Deaf families or Deaf communities and reporting back to the class about any differences in signing they noticed, such as more use of fingerspelled words, less use of NMFs and depicting signs, or the use of different signs, such as FILM (old sign), TOILET (old sign)
- understanding that greater contact between signers internationally has led to increased borrowing between sign languages, for example, signs that refer to different nation states and cities around the globe, or the vehicle handshape in depicting signs

Language awareness

Elaborations

Understand the range of factors that influence the profile, diversity and distribution of Auslan use in the wider Australian society, and consider the concept of Auslan vitality in comparison with that of other languages

[Key concepts: influence, transmission, language documentation, language vitality; Key processes: recognising, identifying, describing, exploring]

(ACLASFU125)

- understanding that strong and healthy languages are those used by many people across generations in most domains to communicate about most topics
- mapping the distribution of Auslan users across Australian states and demographics, using data from censuses and other sources to present findings in graph/visual representation forms
- exploring the vitality of different languages by obtaining information from the UNESCO interactive online atlas and/or Ethnologue to compare numbers of speakers/signers of different languages
- recognising that some languages have no written form and have historically been passed on face to face/orally, making them less well recorded and documented
- understanding that some languages used in Australia, such as English, have large numbers of users, while others, such as many Aboriginal and Torres Strait Islander languages, are endangered or in the process of being revived or reclaimed
- describing the role religion has played in influencing the usage and spread of Auslan, for example, through religious orders, early Deaf Societies and Bible translation projects
- reflecting on the role of Auslan interpreters in raising awareness and understanding of Auslan in the wider community, and considering ways in which they influence the function and nature of Auslan, for example by the introduction of neologisms
- identifying language documentation tools, such as ELAN, as important ways of recording, transmitting and maintaining the vitality of a language
- recognising that languages may be perceived as 'weak' or 'strong' based on community values and the existence of documentation and literature in the language

Role of language and culture

Elaborations

Understand that Auslan and Deaf culture are interrelated, that they shape and are shaped by each other, that their relationship changes over time and across contexts, and that they may be differently interpreted by users of other languages

[Key concepts: knowledge, value, transmission, reciprocity, responsibility, stereotype; Key processes: reflecting, exploring, understanding, identifying, considering]

(ACLASFU126)

- appreciating distinctions between Deaf cultures and other cultural minorities, such as the fact that most deaf people are born to hearing parents and acquire Deaf culture in addition to the culture of their families of origin from peers and other Auslan users in school or as adults in the Deaf community
- exploring ways in which language choices reflect attitudes towards certain topics, such as oralism or cochlear implants, identifying examples of sign choices that reflect particular attitudes or views
- understanding that knowledge about past and present Deaf people and about Deaf cultural values is embodied in and transmitted through Auslan, for example, ways of producing the sign for SIGN embody cultural meaning, regarding distinctions made and values placed on fluent or awkward signing
- identifying differences between the use of personal names in Auslan and in other languages, for example, Auslan signers not using a person's name sign when addressing them directly, in contrast to the practice in many spoken languages
- considering cultural explanations for conversational strategies used by Auslan signers to avoid conflict and to maintain privacy, such as changing signing space and style, and using indirect language such as signing lower or under the table, or fingerspelling instead of signing overtly
- appreciating the cultural value and importance of festivals and other events in the Deaf community, such as NWDP, as celebrations of language, history, culture and identity
- reflecting on the ways that culture is interpreted by others, for example by identifying how stereotypes about deaf and hearing people influence perceptions among members of either community
- understanding that 'sound' is accessed differently in Deaf culture, that the meaning and importance of sound in deaf people's lives is usually not the same as in hearing people's experience

Years 9 and 10 Achievement Standard

By the end of Year 10, students use Auslan to share information, experiences, interests, thoughts and feelings in relation to their personal and immediate worlds. They describe the appearance of people, objects and places using SASS depicting signs and spatial location, for example, HAVE DS: round-oval DS: located HERE NEXT-TO HAVE BUILDING BIG. THERE. *There's an oval there and next to it is a big building. It's there.* They participate in shared learning activities and experiences that involve planning, transacting and problem-solving, using simple signed statements and asking for repetition and clarification when required. They follow protocols when interacting with each other, with interpreters or Deaf visitors to the classroom, for example, waiting for eye contact or pauses to walk in-between signers engaged in conversation without interrupting them. Students increasingly use conventional Auslan signs or classifier handshapes in depictions and rely less on their idiosyncratic systems. They modify some indicating verbs for non-present referents and use constructed action to represent others in recounts. They make explicit which referent is associated with location, for example, BROTHER THERE HAVE OWN IPAD. They recall and retell specific points of information from texts such as class messages, directions, procedures, introductions and 'visual vernacular' descriptions. They create textual cohesion through the use of connectives such as lexical signs NEXT or G:WELL, or non-manual features (NMFs) and pausing. They create bilingual texts such as notices or digital displays and resources for the classroom. They reflect on how their own ways of communicating may be interpreted when interacting with hearing people, and on how they adapt their ways of communicating and behaving when interacting with them. They reflect on the experience of communicating in a visual world and on the challenges and advantages experienced by deaf people in a hearing world.

Students describe how constructed action (CA) can be shown in different ways, including eye gaze, head orientation change or body shift. They identify where and how a signer establishes location in space, and they distinguish between real and abstract space. They build metalanguage to talk about aspects of Auslan, for example, using terms such as SASS, NMFs, CA, depicting signs; and they make connections with terms they use in learning English, such as verb, adjective, noun. They know that different languages and cultures influence and borrow from each other and identify connections between Auslan and other signed languages, for example, BSL, ISL and ASL. They make comparisons between Auslan and signed languages in other countries. Students know that Auslan plays an important role in the expression and maintenance of Deaf culture and in assuring the rights of every deaf person.

The Australian Curriculum Languages - Auslan Second Language Learner Pathway - Years F–10 Sequence

Foundation to Year 2

The nature of the learners

Children enter the early years of schooling with established communication in one or more languages and Auslan will be learnt as an additional language. Cognitive and social development at this stage is exploratory and egocentric; thus learning typically focuses on their immediate world of family, home, school and friends. Children at this level are learning how to socialise with new people, share with others and participate in structured routines and activities at school. Auslan will be learnt in parallel with English literacy, and the learning of each language assists with the learning of the other.

Auslan learning and use

Rich language input characterises the first stages of learning. The curriculum builds on children's interests and sense of enjoyment and curiosity, with an emphasis on active, experiential learning and confidence building. In these years there is an emphasis on developing language to enable learners to participate in class activities such as storytelling and games. Creative play provides opportunities for using the language for purposeful interaction in a relaxed and informal context.

Children build vocabulary for thinking and talking about school topics, routines and processes. They build knowledge and understanding of Auslan by interacting with each other, the teacher and deaf children, and by participating in structured routines and activities. With support and modelling, they use Auslan for different functions such as greeting, thanking, apologising, asking and responding to questions, expressing wishes, likes or dislikes, following simple directions, and taking turns in games and simple shared learning activities. They learn to produce signed phrases independently using modelled language, for example by describing simple pictures.

Contexts of interaction

The primary context for interaction is the language classroom, with the Auslan teacher and classmates. Learners' use of Auslan primarily relates to classroom routines and activities and to talking about their own life. Additional language enrichment may be gained through interactions with visitors from the Deaf community.

Texts and resources

Texts include filmed children's stories and teacher-generated materials such as pictures or short descriptions. Learners watch live and filmed texts such as explanations. They respond to resources such as short video clips, or substitution or matching exercises, and produce texts such as conversations using formulaic language.

Features of Auslan use

Children in Foundation to Year 2 become familiar with all handshapes, movements and locations of single signs. They are learning to produce simple positive and negative statements with some time marking, and to use plain verbs or unmodified indicating verbs. They learn to describe familiar objects, animals or people using simple lexical adjectives and to depict the movement of people, animals and means of transport using an appropriate classifier handshape in an entity depicting sign. They are able to use simple handling and SASS depicting signs. They explore emotions through the use of NMFs, and begin to use NMFs for grammatical purposes in modelled language. They learn to use simple constructed action to represent the characteristics of a single animal or themselves or another. They learn the metalanguage of nouns, verbs and adjectives, and learn that signers can modify verbs to show the referents involved.

As children learn to adjust their language to suit different purposes and situations, they begin to understand how culture shapes language use. They compare how they feel when they use different languages and how they view different languages and people who use them. This introduction to the meta dimension of intercultural learning develops the ability to ‘decentre’, to consider different perspectives and ways of being, and to become aware of themselves as communicators and cultural participants.

Level of support

Support is provided through visual and tactile materials, such as pictures, objects and charts, and the use of gesture and modelling. The main source of support is the teacher’s talk, such as questions and statements, explanations, prompts, recycling of language, stories and feedback. Learners rely on modelled language and scaffolded tasks to create their own texts, for example, choosing signs to complete sentences or using pictures to sequence a story that has been told to them.

The role of English

Learners are encouraged to use Auslan whenever possible, with the teacher providing rich and supported language input. English is used as a medium of instruction and for explanation and discussion or in areas from the Understanding strand. This allows learners to talk about differences and similarities that they notice between Auslan and their first language(s) and culture(s), to ask questions about language and culture, to consider how they feel when they see or use Auslan.

Foundation to Year 2 Content Descriptions

Communicating	
Socialising	Elaborations

Participate in simple interactions with their peers and teachers using high-frequency signs, non-manual features and gestures to talk about self, family and class activities

[Key concepts: self, family, friends, experience, feelings; Key processes: interacting, greeting, asking/answering questions, describing]

(ACLASFC127)

- using greetings and farewells following modelled signs such as HELLO, HOW-ARE-YOU? SEE LATER, GOOD MORNING M-R J-O-N-E-S
- asking and answering questions that require an affirmative or negative response, for example:
WANT PLAY HIDE-AND-SEEK?
Do you want to play hide and seek?
PRO2 ALIGHT?
Are you alright?

- asking and answering simple questions about family, friends and pets, such as:
PRO2 BIRD HAVE PRO2?
Do you have a bird?
PRO1 DON'T-HAVE
I don't have one.
SISTER-BROTHER HOW MANY?
How many brothers and sisters do you have?
2 BROTHER 1 SISTER
Two brothers and one sister.

- describing the appearance of people or objects using simple statements and supporting pictures or props, for example:
PRO3 HAVE DS:curly-hair
He has curly hair.
THAT HORSE BIG
The horse is big.

- expressing likes and dislikes using simple statements such as:
PRO1 LIKE SCHOOL
I like school.
FLOWER DON'T-LIKE
I don't like flowers.
PRO1 HATE APPLES
I hate apples.

- expressing feelings using lexical signs and affective NMFs, for example:
PRO1 HAPPY
I'm happy.
PRO3 GRUMPY
She's grumpy.

- expressing wishes for particular occasions or events, for example, THANK-YOU, GOOD-LUCK or HAPPY BIRTHDAY
- making arrangements using simple time markers without numeral incorporation, for example, TODAY, TOMORROW, NEXT-WEEK
- referring to family members and classmates by fingerspelling a name or using a sign name
- describing what they are doing in class activities using plain verbs, for example, PRO1 RUN, PRO1 READ

Participate in guided group activities such as signing games and simple tasks using repeated language structures, facial expressions and gestures

[Key concepts: games, space, place, memory; Key processes: playing, singing, following instructions, exchanging, classifying]

(ACLASFC128)

- participating in games or songs that involve the use of repeated phrases, expressions, actions and NMFs, for example, *I went to market and I bought ... The wheels on the bus ...*
- following instructions by locating or moving classroom objects in activities, for example, hiding a marker pen somewhere in the classroom, describing where and then signing from mild to exaggerated 'cold to hot' as the student tries to find it
- using appropriate signs and NMFs when taking turns in games such as 'Go Fish'
- participating in collaborative tasks that involve selecting, exchanging or classifying objects by attributes such as shape, colour or number
- using question signs and affirmative and negative answers when swapping or 'buying' objects

Develop interaction and communication skills for participation in regular class routines and activities

[Key concepts: fingerspelling, attention, signing space, visual communication; Key processes: interacting, signing, recognising, gaining attention]

(ACLASFC129)

- recognising and using fingerspelled names for roll call and games
- following instructions for class routines, such as:
DS:line-up PLEASE
Line up, please.
LOOK-AT_{-me} PRO1
Eyes to the front.
PLEASE WITH-2++
Please find a partner.

- asking for help or permission, for example:
PLEASE HELP_{-me}?
Can you help me, please?
PRO1_{-plural} CAN SHARE?
Can we share these?

- gaining attention in appropriate ways, for example by waving or tapping a shoulder or table
- stopping activities and paying attention when lights are flashed or hands are waved
- using NMFs such as focused eye gaze, nodding and head shaking to show affirmation and negation
- using voice-off when possible while signing and keeping appropriate signing space between signers
- positioning seating to keep visual communication clear or sitting across from/opposite signers when communicating
- using visual applause to show enjoyment of entertainment or commendation

Informing

Elaborations

Identify specific points of information in simple Auslan texts relating to people, places and things and use the information to complete guided tasks

[Key concepts: information, topics; Key processes: identifying, categorising responding, gathering]

(ACLASFC130)

- responding to signed information such as class messages or short introductions, for example by identifying names, school locations, numbers or times
- identifying and applying specific information in Auslan texts to complete guided tasks such as colouring-in and craft activities
- gathering information from each other about topics such as family members, favourite foods, toys and games to report back to the class using familiar structures and modelled language, for example:
SISTER-BROTHER HOW-MANY?
How many brothers and sisters do you have?

- identifying information in simple Auslan texts that relates to properties such as colour, number, size or shape, for example when interacting with materials and objects
- identifying and categorising a select range of signs according to handshape
- following an Auslan text to gain information needed to complete an action-based activity, such as an obstacle course

Present information about self, family, school and significant objects, using modelled signs and formulaic phrases

[Key concepts: self, family, routines; Key processes: presenting, describing, contributing, demonstrating, recounting]

(ACLASFC131)

- describing an object, animal or person using familiar lexical adjectives such as RED, TALL and SMALL
- contributing to a digital presentation such as a class video by signing a basic description of their family members
- labelling objects in the classroom with pictures of signs
- recounting a class excursion, sequencing events through the use of familiar signs, gestures and photos
- reporting aspects of their daily routines using modelled signs and visual prompts
- sequencing points of signed information needed to complete an action-based activity such as a treasure hunt

Creating

Elaborations

Participate in the shared viewing of recorded or live imaginative signed texts, responding through drawing, miming, gesture or familiar signs

[Key concepts: imagination, expression; Key processes: viewing, drawing, re-enacting, mimicking, signing]

(ACLASFC132)

- viewing recorded or live children's stories and nursery rhymes in Auslan, for example National Simultaneous Storytime books, demonstrating understanding through drawing, gesture, modelled signs or voice
- responding to short expressive texts that involve the movement of people, animals and/or vehicles, using drawings, familiar signs or re-enactments with puppets or props
- playing with key elements of short signed stories, for example by mimicking facial expressions or repeated signs
- interacting with a signing puppet or doll in an imaginary setting, for example by signing simple questions such as:
WHAT NAME PRO2?
What is your name?
WHAT LIKE D-O PRO2?
What do you like to do?

- participating in interactions in Auslan that involve imaginative responses to stimuli, using gestures, handshapes, facial expressions and simple signs
- engaging with different forms of Deaf art, such as handshape creations
- shadowing non-manual features in short Auslan poems or stories

Express imaginative ideas and visual thinking through the use of familiar signs, mime and gestures, with a focus on emotions, appearance and actions

[Key concepts: imagination, emotion, expression; Key processes: re-enacting, depicting, creating]

(ACLASFC133)

- using iconic signs to create variations to actions involved in familiar nursery rhymes, such as 'Incy Wincy Spider'
- exploring emotions through the use of NMFs, for example by re-enacting a familiar scenario and modifying emotions each time, for example by switching from fear to excitement to anger
- depicting the movement of people, animals or means of transport by using handshapes in creative ways
- creating amusing sequences of signs using a fixed handshape, such as the index finger 'point',
PRO2 THINK PRO1 SHY?
Do you think I'm shy?

- using gestures and modelled signs to create short skits that convey emotions and behaviours associated with characters from familiar stories or rhymes
- enacting the movements and characteristics of a particular animal through the use of constructed action

Translating

Elaborations

Translate words used in everyday contexts from Auslan into English and vice versa

[Key concepts: similarity, difference, meaning; Key processes: recognising, comparing, identifying, translating, explaining]

(ACLASFC134)

- recognising that every language uses words or signs to make meaning
- identifying aspects of Auslan which are the same in English, such as the fingerspelled alphabet
- comparing and contrasting the iconicity of some simple signs in terms of their similarity to the object/referent, for example, drink, food, kangaroo, considering how this may help with translation between languages
- explaining to family and friends the meaning and use of simple signs and expressions, for example, DOG, CAT, BIRD

Create simple print or digital texts such as labels, posters, wall charts or cards that use Auslan images and English words

[Key concepts: meaning, code, bilingualism; Key processes: labelling, creating]

(ACLASFC135)

- using images of Auslan signs to name and label familiar objects and classroom items, using posters, word cards with pictures or alphabet cards with images, for example, A is for *apple* with fingerspelled letter for A
- creating and using handshape images to represent signs and label with words, for example, flat hand = *FISH*
- making their own bilingual picture dictionaries with English labels, images of signs and simple descriptions of signs

Identity

Elaborations

Describe aspects of themselves, such as membership of family and their school/class and languages they use, considering how these different elements contribute to their sense of identity

[Key concepts: identity, similarity, difference, self, family, belonging; Key processes: noticing, identifying, describing, explaining, comparing]

(ACLASFC136)

- describing themselves and their family using supports such as pictures, photos and family trees
- identifying themselves as belonging to a family, class or peer group, representing these relationships through captioned pictures or photos or by creating simple digital presentations
- identifying friends, favourite places, objects or languages they know or are learning that contribute to their identity

Reflecting

Elaborations

Notice what is similar to or different from their own language and culture when interacting with stories, games and different forms of artistic expression in Auslan and from Deaf culture

[Key concepts: language, culture, similarity, difference, respect; Key processes: noticing, comparing, responding]

(ACLASFC137)

- responding to teacher prompts in Auslan or English to capture their impressions when viewing images, video clips or stories in Auslan, for example:
PRO2 LOOK VIDEO. LOOK WHAT?
You saw the video. What did you notice?
HAVE SAME? HAVE DIFFERENT? WHAT?
What's the same? What's different?

- comparing aspects of their own lives with those of deaf children represented in digital images, video clips and stories, for example, ways of playing games, telling stories or interacting at school, home and in the community
- describing how it feels to use Auslan to communicate or to watch Auslan being used by others, for example by responding to questions such as *What are the main differences you notice when observing conversations between hearing people and between deaf people?*
- discussing changes or adaptations they make to their communicative style when using Auslan, for example waiting until they have a deaf person's visual attention before signing to them, maintaining eye contact when the other person is signing to them

Understanding

Systems of language	Elaborations
<p>Recognise that meaning can be expressed through English words or Auslan signs and that signs have set handshapes, movements and locations, and identify and reproduce them independently</p> <p>[Key concepts: handshape, movement, location, iconicity; Key processes: identifying, noticing, recognising, understanding]</p> <p>(ACLASFU138)</p> 	<ul style="list-style-type: none"> • realising that meaning is communicated through the use of signs, pictures, written or spoken words or miming • identifying the handshape of a sign, for example, COCKATOO (hs:5) and SOCCER (hs:fist) • recognising major types of path movements • understanding that sounds in English words are like handshapes, movements and locations in Auslan in the sense that they are combined together to make signs • noticing that in signed languages meaning can be expressed through whole signs or through fingerspelling • recognising that some signs are iconic, linking to the appearance of a referent, for example, HOUSE, TREE, DRINK, ELEPHANT, and that some are not, such as SISTER, WHY, SIMPLE • understanding that while English is spoken and heard as well as written and read, Auslan is usually uniquely 'through the air' and not written down • experimenting with different ways of recording signs, including video, writing an English word or drawing pictures

Recognise and restrict signing to the standard signing space, and understand that pronouns, depicting signs and verbs can be located meaningfully in that space

[Key concepts: signing space, verb modification, depicting signs; Key processes: noticing, identifying, recognising]

(ACLASFU139)

- describing the range of signing space in normal signed discourse
- comparing and contrasting Auslan and English pronouns
- noticing that the beginning and end locations of some verbs can be modified to show the referents involved, for example:
PRO1 ASK PRO3 versus PRO1 ASK_{-her}

- identifying what sorts of things can be represented in a DS by handshape, for example, point can mean a person or tree or pole

Recognise that groups of words are combined to make a clause and that Auslan has word classes such as nouns, adjectives or verbs, and distinguish between statements and questions

[Key concepts: sign class, clauses, statements, questions; Key processes: recognising, observing]

(ACLASFU140)

- categorising noun signs into those for people, animals, places or things
- learning that proper nouns can have a sign name or be fingerspelled
- knowing that adjectives describe nouns in different ways, such as how they look (BIG or RED), feel (SOFT or HOT), smell (SMELLY) or sound (LOUD)
- identifying verb signs (SIT, EAT, FEEL, WONDER, HAVE) and recognising that they are central to a clause
- noticing there is no equivalent of the verb 'to be' in Auslan, which is a significant difference to English
- understanding that a clause is one or more signs expressing a single idea and that a clause has at least one verb, but often one or more nouns as well, for example:
CALL_{-him}
I called him.
MAN THERE GO-TO POSS3 HOUSE
That man went to his house.
BIG MONSTER SCREAM
A big monster screamed.

- recognising different nouns in clauses, including those that are shown with a pointing sign, such as GIRL READ versus PRO3 READ, or VISIT FRIEND versus VISIT PRO3
- noticing that Auslan has more flexibility in word order than in English
- distinguishing between clauses that are statements and those that are questions

Understand that texts are made up of units of meaning such as groups of words or sentences and that different types of texts have different features that help serve their purpose

[Key concepts: text, text types; Key processes: recognising, noticing]

(ACLASFU141)

- recognising that texts are created to achieve different purposes, for example some texts tell stories or entertain while others give information
- noticing differences in facial expressions of a signer when presenting different types of text, for example a procedure versus a narrative

Language variation and change	Elaborations
<p>Understand that all languages including signed languages vary and borrow words and signs from each other</p> <p>[Key concepts: language borrowing, variation; Key processes: noticing, recognising]</p> <p>(ACLASFU142)</p> 	<ul style="list-style-type: none"> • understanding that there are two main Auslan dialects: the southern dialect used in Victoria, South Australia, Western Australia, Tasmania and the Northern Territory; and the northern dialect used in New South Wales, Queensland and the Australian Capital Territory • viewing videoed examples of Auslan signers from different parts of Australia, identifying the different signs used in southern and northern dialects, for example, signs for colours and some numbers • noticing that words such as proper nouns for names of people, places or schools are borrowed from English by fingerspelling and mouthing, but some also have sign names • recognising that Auslan borrows from other languages just as English does, and collecting words and signs used in their everyday lives that come from different signed and spoken languages • noticing the variation in 'handedness' between signers in relation to signs and fingerspelling: right handers using their right hand as their dominant (main) hand; left handers doing the opposite

Language awareness	Elaborations
<p>Recognise that Auslan is a legitimate language, one of many languages used in Australia and around the world</p> <p>[Key concepts: language diversity, difference, vitality; Key processes: identifying, exploring, recognising]</p> <p>(ACLASFU143)</p>  	<ul style="list-style-type: none"> • identifying different languages used by their classmates or members of their families, for example by creating a class profile or language map • exploring similarities and differences between the many languages used in Australia and represented in the school, including spoken and signed Aboriginal and Torres Strait Islander languages, and comparing the ways different languages use writing, sound/speech, gestures, drawings, art and signs to communicate • recognising the unique nature of signed languages and understanding that there are many different signed languages in use around the world, including in Aboriginal and Torres Strait Islander communities, and that there is not one 'universal' signed language • recognising that Auslan is a legitimate language, different from mime and gestures such as those used to accompany songs in spoken languages • exploring why and how some people are deaf, and identifying different ways that they access language; and investigating the use of hearing aids, FM systems or cochlear implants

Role of language and culture	Elaborations
------------------------------	--------------

Notice that people use language in ways that reflect their culture, such as where and how they live, who they live with and what is important to them

[Key concepts: language, culture, community, observable phenomena; Key processes: noticing, recognising, questioning, making connections]

(ACLASFU144)

- recognising that people from different places and backgrounds may use different languages and have ways of living and communicating that differ from their own
- appreciating that culture and cultural difference means that people may value different things or live differently, noticing observable examples of such difference, such as ways of greeting (bowing versus shaking hands) or conveying information (through words versus signs)
- exploring how learning Auslan involves entering into a visual world or culture, for example by exploring different connections with physical space, such as being able to communicate through windows, or from a distance
- exploring how deaf people live in ways that may be different from how hearing people live, for example by responding to stimulus questions such as *How do deaf people ensure they can always see other people who are signing? How do deaf people watch movies or television programs?*
- recognising the importance of facial expression, eye gaze and NMFs in conveying information in a visual-gestural language and culture
- recognising the importance of community and culture in relation to their own lives and communities and in relation to other language groups and their communities

Foundation to Year 2 Achievement Standard

By the end of Year 2, students interact with teachers and each other to talk about themselves, their families, friends and immediate environment. They follow instructions to complete action-based activities such as signing games or transactional activities, using repeated constructions, gestures and affective non-manual features (NMFs). They interact in familiar classroom routines by responding to requests, such as DS:line-up PLEASE, LOOK-AT_{me} PRO1. Students ask and respond to simple questions and distinguish between statements and questions. They express likes, dislikes and feelings using lexical signs and affective NMFs. They recognise and produce fingerspelled names for roll call and games and produce modelled signs, phrases and sentence patterns in familiar contexts. They use culturally appropriate protocols, such as maintaining eye contact and responding to and gaining attention by waving or tapping a shoulder or table. They identify specific information in signed texts, such as the properties of colour, number, size or shape, and describe people and objects, for example, PRO3 5-YEARS-OLD, PRO1 HAVE 2 BROTHER, or THAT BALL BIG. Students demonstrate simple procedures using known signs, gestures, objects and list buoys. They recount and sequence shared events using familiar signs and visual prompts. They view short imaginative and expressive texts such as stories and nursery rhymes, demonstrating understanding through drawing, gesture, modelled signs or English. They use fixed handshapes in creative ways, for example to create amusing sequences of signs to enact movements, and portray characteristics through the use of constructed action. They identify similarities and differences in ways they interact when communicating in English and in Auslan.

Students know that Auslan is a language in its own right, different from mime and gestures used in spoken languages. They know that eye contact is necessary for effective communication and that meaning is communicated visually through the use of whole signs, gestures or fingerspelling. They identify and categorise signs according to handshape and they recognise major types of path movements. They know that some signs link to the appearance of a referent, for example PEN, HOUSE, and that some words, such as proper nouns, are borrowed from English by fingerspelling and mouthing. They know that locations of signs can be modified to change meaning, for example when pointing to people. They recognise the importance of facial expression, eye gaze and other NMFs in a visual-gestural language and culture and know that sign order is flexible in Auslan.

Years 3 and 4

The nature of the learners

Learners at this level are developing their cognitive and social capabilities and their communicative repertoire in the language, as well as becoming increasingly aware of their social worlds and their membership of various groups, including their Auslan class. They are more independent and less egocentric, enjoying both competitive and cooperative activities. They are able to conceptualise and reason, and have better memory and focus. They benefit from varied, activity-based learning that builds on their interests and capabilities and makes connections with other areas of learning.

Auslan learning and use

Learners in this band engage in a range of activities in Auslan and share ideas about the language. They respond to teacher-generated questions about texts, participate in games and give brief presentations about topics such as family, pets, or a favourite game or object. They continue to build vocabulary for thinking and talking about school topics. The language used in routine activities is re-used and reinforced from lesson to lesson in different situations, making connections between what has been learnt and what is to be learnt. Learners follow instructions, watch stories and participate in creating short texts on topics relevant to their interests and enjoyment, such as family, pets, favourite activities or food. They recount experiences, interact with visitors, follow directions, negotiate roles in a group and retell important information.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team in the language classroom and the broader school environment, with some sharing of their learning at home. They also have some access to the wider Deaf community and resources through virtual and digital technology. The familiarity and routine dimension of the classroom context provide scaffolding and opportunities for language practice and experimentation.

Texts and resources

Learners typically interact with teacher-generated materials, games and songs, and materials produced for learning Auslan, such as computer games or online videos. They may be exposed to texts developed for deaf children as a way of developing their cultural awareness.

Features of Auslan use

Learners at this stage are increasingly aware of differences between Auslan and English. They are developing a wide range of vocabulary and can use simple clause structures to generate their own ideas in structured tasks. They use depicting signs to talk about simple movements and shapes, and with support can represent the viewpoint of a single participant through constructed action. They begin modifying more indicating verbs for present referents and use specific time marking incorporating numerals in their recounts. They are learning to use NMFs to mark manner on verbs or to express negation. Students at this level explore cultural constructs and practices and the language associated with these. Metalinguistically, learners can describe differences between how to show or tell about an event, understand that adverbs modify verbs and that clauses contain what happened, who was involved and surrounding circumstances.

Level of support

The primary support for learners is the Auslan teacher, who provides instruction, explanation, examples, repetition, reinforcement and feedback. Learners create their own texts based on modelled language and teacher guidance. Form-focused activities, particularly those increasing metalinguistic awareness, build students' grammatical knowledge and support the development of accuracy and control in Auslan. Tasks and activities are carefully scaffolded and resourced with supports such as pictures, flashcards, gestures, objects and multimedia. Discussion supports learning and develops learners' conceptual frame for talking about systems of language and culture.

The role of English

Learners use Auslan for classroom routines and structured learning tasks, and for watching texts. They are supported by the teacher to notice and discuss aspects of Auslan and Deaf culture, and to compare Auslan to other known languages and cultures. English is used for class discussions when noticing, comparing and reflecting on both English and Auslan, as well as for accessing some printed material related to topics in the Understanding strand.

Years 3 and 4 Content Descriptions

Communicating	
Socialising	Elaborations

Communicate with each other and with teachers about aspects of their personal worlds, daily routines, preferences and pastimes

[Key concepts: routines, interests, personal worlds; Key processes: recounting, describing, expressing preferences]

(ACLASFC145)

- asking each other about their daily routines, interests or pastimes, for example:
PRO2 ARRIVE SCHOOL HOW? CAR TAXI WALK
G:WELL?
How do you get to school?
PRO2 REGULAR GO-TO-BED WHAT TIME?
What time do you go to bed?
WEEKEND OR HOLIDAYS, WHAT D-O?
What do you do in your free time?

- recounting personal experiences using specific time-related signs and conjunctions, such as BEFORE, AFTER, LONG-TIME-AGO, for example:
LONG-TIME-AGO PRO1 FLY NEW ZEALAND
A long time ago I went on a plane to New Zealand.

- recounting classroom events using some indicating, plain and depicting verbs
- describing activities they have completed, interests or favourite pastimes, using modifications to show manner, for example:
PRO1 WORK LITTLE, LATER WORK-REALY HARD
I worked on it a little bit, then later I worked really hard on it.
PRO1 SWIM_{fast} SWIM_{slow}
I swam really fast till I got tired and slowed down.

- expressing preferences in relation to people, places or things, for example:
PRO1 LIKE THAT, THAT, BUT THAT BEST BOOK
I like that one, and that one, but that one is the best book.

- interacting with members of the Deaf community to share details of their personal worlds
- identifying significant people in their lives, such as family members or friends, describing their appearance, characteristics or personality, for example:
PRINCIPAL YOU-KNOW LONG-HAIR GLASSES?
You know the principal? She has long hair and wears glasses.
POSS1 BROTHER OLD++ TALL REAL FUNNY
My brother is older; he's tall and really funny.

Participate in shared learning activities that involve planning, transacting and problem-solving, using simple signed statements, questions and directions

[Key concepts: task, role, responsibility, clarification, encouragement; Key processes: collaborating, following directions, negotiating, asking for help]

(ACLASFC146)

- working together in collaborative tasks such as cooking or craft activities, using interactional phrases such as: BOOK WHICH WANT MAKE WHICH? PICK.
Which recipe do you want to make? You choose.
PLEASE PRO2 BRING SCISSORS PLUS PAPER?
Can you please bring scissors and paper?

 - following directions for activities such as a treasure hunt or creating a garden, using prepositions such as ON, UNDER, BEHIND and entity depicting signs, such as: DS:turn-left DEAD-END DS:turn-right.
Go left, then at the end turn right.
PLEASE BRING MILK FRIDGE DS:open-door POINT
Please bring the milk; it's at the bottom of the fridge door.

 - negotiating roles and responsibilities in shared learning activities, using expressions such as:
PRO3 TYPE PRO1 WRITE PRO2 D-O WHAT?
He will type, I'll write, and what are you doing?

 - playing games that involve identifying and classifying specific points of information, for example, 'Celebrity Heads'
 - understanding and using expressions of support, encouragement or praise during shared activities, for example, GOOD, EXCELLENT, CONGRATULATIONS
-

Respond to questions, directions and requests, using non-manual features and simple questions and statements to ask for help, to indicate understanding or agreement and to negotiate turn-taking

[Key concepts: instruction, clarification, turn-taking, back-channel, attention, eye contact; Key processes: responding, asking for help, turn-taking, using back-channel, gaining attention]

(ACLASFC147)

- responding to classroom instructions such as
PLEASE WITH-2++ DS:sit-opposite
Please find a partner and sit opposite each other.
DS:line-up PLEASE
Line up, please.
LOOK-AT_{-me}
Look to the front.

- attracting attention or asking for help, repetition or clarification, for example:
PLEASE HELP_{-me}?
Can you help me, please?
PLEASE AGAIN SIGN
Please sign that again.
PLEASE EXPLAIN_{-to self} AGAIN
Please explain that again.
WHAT MEAN?
What do you mean?
PRO2 MEAN...?
Do you mean ...?

- negotiating turn-taking, for example:
PRO1 FIRST YOUR-TURN
It's my turn first, then your turn.

- using back-channels, for example, head nodding to indicate understanding, or raised eyebrows or head shaking to indicate lack of understanding
- gaining the attention of a group or an individual, for example by flashing classroom lights, waving or multiple tapping or tapping or pointing to alert third parties
- maintaining eye contact when communicating

Informing

Organise and summarise key points of information obtained from different types of Auslan texts

[Key concepts: sequence, information, format; Key processes: organising, summarising, identifying, surveying, retelling, recording]

(ACLASFC148)

Elaborations

- retelling key points of information used in classroom interactions and school activities, such as announcements or directions for a game or task
- watching Auslan texts that show people expressing likes and dislikes, and recording observations in table form
- watching a signed presentation by a teacher, peer or visitor and identifying specific points of information
- surveying peers in relation to their interests and preferences, summarising findings in formats such as profiles, charts or graphs
- following the steps of a signed demonstration or procedure such as baking/cooking or simple science experiments, checking with each other about ingredients and processes
- recounting in correct sequence the main points of a shared event such as an assembly performance or sports carnival

Present information associated with their home, school and community activities and routines, using signed descriptions and visual prompts

[Key concepts: recount, description, sequence; Key processes: presenting, demonstrating, recounting]

(ACLASFC149)

- recounting to the class a personal or community experience such as a holiday or weekend event
- presenting routine class information, such as weather reports or daily schedules, using visual prompts and signed descriptions
- sharing selected points of information from their home or local community, such as family traditions or cultural events, conveying key points of information from visual infographics or diagrams
- providing information needed to complete an information-gap activity
- demonstrating a simple procedure using gestures, objects and list buoys

Creating

Engage with different types of imaginative texts, identifying favourite elements, characters and events and responding through modelled signing, actions and drawing

[Key concepts: story, character, response; Key processes: responding, comparing, retelling, drawing]

(ACLASFC150)

Elaborations

- viewing short Auslan stories and responding by identifying and comparing favourite elements, characters and events
- participating in Auslan games using simple clauses in creative ways, for example, playing the improvisation game 'Space Jump'
- engaging with different kinds of Deaf expression such as handshape poems or art, indicating their response using lexical signs such as:
 LIKE THAT
I like that one.
 DON'T LIKE
I don't like it.
 PRO1 HATE THAT
I hate that.

- comparing two signed versions of a story such as 'The Hare and the Tortoise' and indicating their preference for one version over the other
- retelling favourite elements of a signed story using modelled signing
- drawing a personal interpretation of a 'visual vernacular' description of a character's appearance

Create simple texts that demonstrate imagination and playfulness, using familiar signs, gestures, modelled language and visual supports

[Key concepts: play, imagination, character; Key processes: creating, performing, retelling]

(ACLASFC151)

- assuming the role of a character from a story and responding to signed questions from classmates, such as:
YOUR NOSE DS:long-nose WHY?
Why is your nose so long, Pinocchio?

- participating in storytelling games or imaginative activities, for example, the joint construction of a progressive story such as *I went to market and bought ...*
- retelling a wordless animation, modifying NMFs and lexical signs to indicate manner, for example, walk, sprint, march
- creating a humorous skit using constructed action that involves interaction between two characters
- using a 'visual vernacular' description to create an imaginary character, incorporating physical attributes and personality traits
- working with classmates to use hands to visually represent an object or animal

Translating

Translate high-frequency signs/words and expressions in simple texts such as repeated lines in a story, noticing which ones are difficult to interpret

[Key concepts: similarity, difference, meaning; Key processes: matching, noticing, identifying, translating]

(ACLASFC152)

Elaborations

- participating in shared reading of texts such as the Auslan–English versions of 'The Wrong Book' and answering questions about unfamiliar signs and word/sign matches and mismatches in the text
- identifying and comparing key signs and words in Auslan and English versions of favourite stories, for example, 'The Three Little Pigs' and 'The Old Woman Who Swallowed a Fly', noticing how signs can represent concepts which might not have a direct match in English
- translating popular children's songs into Auslan, for example, 'Happy Birthday'
- playing matching-pair games with Auslan sign-image flashcards and English flashcards, for example, matching cards associated with weather or animals in both languages
- collecting and noting a list of gestures commonly used by hearing people when speaking English that have similar meaning when used in Auslan, for example, head nodding, shoulder shrugging, pointing to watch

Create bilingual versions of texts such as English captioned recordings of Auslan phrases

[Key concepts: meaning, representation; Key processes: creating]

(ACLASFC153)

- creating captions in English for short recorded signed phrases
- creating bilingual texts for the classroom or school community, for example, posters, library displays or digital newsletter items, discussing how to represent meaning in each language for different audiences
- developing a simple handshake dictionary
- creating cards for use by younger children that include pictures, labels and signs, such as a transport-themed card game

Identity	Elaborations
<p>Consider how their ways of communicating and responding to each other shape and reflect their sense of identity</p> <p>[Key concepts: identity, similarity, difference, community, membership, communication; Key processes: observing, identifying, creating, noticing, discussing, comparing]</p> <p>(ACLASFC154)</p> 	<ul style="list-style-type: none"> • using visual representations such as concept maps, posters or captioned slide presentations to identify groups that they identify with, such as friends, family, sporting, interest and community groups • creating a profile to capture their sense of self, for example through creating an avatar or montage, using key signs, fingerspelled letters or simple Auslan expressions in a digital file to identify significant characteristics, traits or experiences • comparing their own and each other's ways of communicating, identifying elements that reflect cultural differences or influences of other languages • identifying markers of identity that may be important across all cultures and communities, for example, family membership, environment, language background, age or gender

Reflecting	Elaborations
<p>Describe ways in which communicating and behaving when using Auslan are similar to or different from their use of their own language(s) and forms of cultural expression</p> <p>[Key concepts: language, culture, values, similarity, difference, communication; Key processes: noticing, comparing, describing, explaining, questioning, reflecting]</p> <p>(ACLASFC155)</p> 	<ul style="list-style-type: none"> • reflecting on similarities and differences between ways of communicating in Auslan and in their first language in different social situations, for example, when greeting/leave-taking; introducing people; and using body language, facial expression and eye contact • comparing their own and each other's reflections on the experience of learning and communicating in Auslan, and considering whether their attitudes or understandings have changed through this experience • reflecting on similarities and differences in communication that reflect culture, such as visual ways of being among deaf people and ways of sharing storytelling or jokes • reflecting on the need for sustained eye contact when using Auslan in order to understand a message and before teacher instructions can proceed • reflecting on differences in forms of address in signed and spoken languages, for example, not using a person's name when signing directly to them, unlike the common use of names in Australian English/other languages • identifying assumptions that they bring to the experience of learning Auslan and considering how these may change through the learning experience

Understanding

Systems of language	Elaborations
---------------------	--------------

Identify the movement and location of different signs and notice how they combine with handshape to form signs, and understand that Auslan can be videoed and transcribed to assist learning

[Key concepts: orientation, hand dominance, iconicity, non-manual features, recording language; Key processes: identifying, recognising, comparing]

(ACLASFU156)

- identifying the location of a sign on the body or in space
- noticing the five major locations of signs on the body or in space, and identifying signs associated with each, such as SEE (head/face), SAY (mouth/chin), WHY (chest), TALK (hand) and ONE (signing space)
- recognising that handshapes must be performed in a particular orientation
- identifying and demonstrating signs with a change in handshape, for example FIND or BEST
- identifying and demonstrating signs with a change in orientation, for example CAN-NOT or HOW
- understanding that NMFs can also be an element of a sign and can show emotional states such as a happy expression or grammatical information, for example, a frown to mark a negative
- identifying single, double and two-handed signs, and recognising which hand is dominant (the pen hand) and which is non-dominant (the paper hand) within two-handed signs
- comparing iconic signs that provide visual images of referents, such as DRINK, ELEPHANT with English words that map to the sound images of the referents, such as animal noises, or words for sounds such as *bang*
- learning to film themselves and analyse the video or to read simple glosses produced by the teacher, and understanding that the English word used is often not an exact match for the meaning of the sign

Understand how space is used in Auslan to show who is involved in an event through the meaningful location of nouns and verbs, the use of depicting signs and enacting

[Key concepts: signing space, numeral incorporation, verb modification; Key processes: recognising, discussing, comparing]

(ACLASFU157)

- recognising that non-body-anchored nouns can be located in space and identifying instances of this
 - discussing the functions of different pointing signs, such as pronouns, determiners and locatives
 - noticing that single-digit numbers can be separate lexical items or merged into other signs (numeral incorporation) such as those for ages (for example, 5-YEARS-OLD) or adverbs of time (for example, 3-WEEKS-AGO) or pronouns (WE3, WE4)
 - understanding that some verb forms in Auslan indicate who is involved in a verb by changing the direction of the movement or orientation of the handshape
 - noticing the relationship between the location of referents in real space and the direction of some indicating verbs in a text
 - identifying instances of DSs with appropriate support
 - comparing English adjectives with SASS DSs
-

Understand that clauses can be enriched through the use of adjectives and adverbs (when, where, how), often produced with non-manual features

[Key concepts: verb types, adverbs, clause structure, questions; Key processes: recognising, distinguishing, observing]

(ACLASFU158)

- exploring different semantic types of verbs in a text, for example by showing how:
 - *doing* (WALK, WRITE) and *saying* (TELL, CALL-OUT ANNOUNCE?) verbs in narrative texts give information about a characters' actions
 - *sensing* (SEE, THINK) or possessing (BELONG, OWN) verbs indicate what characters think, feel or own
 - *relating* verbs identify or describe a noun, for example, HAVE in PRO3 HAVE LONG-HAIR
- understanding how DSs and adverbs can give extra information about an activity
- noticing that some signs modify the meaning of verbs, such as READ **CAREFUL** and that these are called adverbs
- contributing examples of signs that tell
 - when a verb happens (**IN-2-WEEKS** PRO1 HOLIDAY or WANT LUNCH **NOW**)
 - where a verb happens (PRO3 RUN **FAR** or COME **HERE**)
 - how a verb happens (**FAST** or **SLOW** or PRO2 **QUICK** FINISH)
- understanding that, in terms of meaning, a basic clause represents: a happening or a state (verb), who or what is involved (noun or nouns) and the surrounding circumstances (adverb or adverbs)
- knowing that signing involves either telling with signs or showing with DSs and periods of CA
MAN WALK SLOW
DS(point):man-walks-slowly
CA:man-swinging-arms-nonchalantly

Understand how signers make different language choices in different types of texts and compare this with English versions of text types, and notice how texts build cohesion

[Key concepts: textual features, similarity, difference, cohesion; Key processes: recognising, discussing, comparing]

(ACLASFU159)

- recognising that texts are made up of one or more clauses, which have one or more signs in them and which together make meaning
- discussing and comparing the purposes of familiar texts such as class discussions or stories
- comparing a short text in Auslan with an equivalent English text, noticing similarities and differences in their structure and language features
- observing how texts build cohesion, for example by using different signs to refer to the same person

Language variation and change

Elaborations

Recognise that there is variation in Auslan use, for example in different locations or physical environments

[Key concepts: variation, adaptation; Key processes: identifying, recognising, exploring, considering]

(ACLASFU160)

- exploring similarities and differences in Auslan dialects through building webcam relationships with other schools or through identifying and collecting signs that differ in the northern (Qld and NSW) and southern (Vic., SA, WA and Tas.) dialects, such as DINNER or AFTERNOON
- recognising that variation also occurs in spoken languages and noticing some different words for the same thing in English, such as cossie/cozzie, togs or bathers
- identifying Auslan signs or informal home signs that might be different from signs used by other people
- considering adaptations to Auslan use when communicating in different physical environments, such as in video chats, across a large yard, or when one or both hands are occupied, for example, variations in vocabulary, size of signing space, clarity of signs, use of fingerspelling and NMFs
- recognising variation in adaptation of signing between different users of Auslan, for example, people who are deafblind use hand-over-hand signing and tactile fingerspelling

Language awareness

Elaborations

Develop awareness of the social and cultural nature and context of Auslan and other sign languages, of their different modes of expression and of the related issue of language vitality

[Key concepts: communication, language vitality, culture, accessibility; Key processes: identifying, describing, recognising]

(ACLASFU161)

- identifying different ways Deaf community members communicate with each other and with members of the wider hearing community, including face to face or via technology such as NRS or VRS, through social media, the use of English or the use of interpreters
- identifying how deaf people modify space to maximise visual attention, such as adjusting seating or removing visual obstacles
- exploring different expressions for gaining attention or signalling enjoyment, such as tapping, waving, stomping or using visual applause, and their suitability for visual language users
- recognising that Aboriginal and Torres Strait Islander peoples' use of signed languages is culturally determined and shaped by their beliefs and values
- understanding cultural values associated with the conferment of name signs to people, such as second language learners of Auslan who are joining the Deaf community
- exploring the vitality of Auslan and other spoken and signed languages, appreciating that a language with strong vitality is one used by many people in the home and other domains, across generations, to talk about most topics
- understanding how and why some deaf children face challenges with communication in hearing families or in social settings
- understanding that some languages used in Australia, such as English, have large numbers of users, while others, such as many spoken and signed Aboriginal and Torres Strait Islander languages, are endangered or in the process of being revived or reclaimed
- recognising the important role of deaf families and deaf schools in preserving and maintaining Auslan and cultural identity
- understanding that Aboriginal and Torres Strait Islander signed languages arise from specific needs, for example, certain cultural restrictions on speech, or the presence of deaf people
- exploring relationships between place, space and people, considering why some places and spaces make deaf people feel comfortable and promote a sense of cultural belonging and pride
- identifying behaviours, rights, roles and responsibilities in relation to the ownership and maintenance of Auslan, and recognising that this ownership rests with the Deaf community and is determined by traditional social groupings/families, places, history and stories

Role of language and culture

Elaborations

Explore connections between identity and cultural values and beliefs and the expression of these connections in Auslan
[Key concepts: language, culture, identity, symbol; Key processes: exploring, understanding, noticing, recognising, questioning, making connections]

(ACLASFU162)

- exploring culture as an essential part of human life, understanding that it is shared, passed on between generations and is closely connected to language and to identity
- understanding that culture is more than the visible aspects of people's lives, that it also includes invisible elements such as beliefs and values, how people think about themselves and others, how they relate to their social and physical environments, and how this understanding applies to themselves as users of their first language and as learners of Auslan
- recognising that in each culture there are general rules for what to say and do, when, where and with whom, and that these rules differ from culture to culture, for example, the Deaf culture places greater importance on eye contact than cultures that communicate through spoken languages
- recognising that language reflects values and beliefs, for example in expressions of personal identity or in the recognition of others (sameness and difference), for example by identifying deaf family members as part of introductions, and by relaying cultural information about background and context and shared knowledge when interacting with others

Years 3 and 4 Achievement Standard

By the end of Year 4, students participate in classroom routines and structured interactions with teachers and peers. They communicate about daily routines, interests and pastimes; recount personal experiences and classroom events; and describe people, experiences or activities using simple depicting signs, such as DS:run-around-oval THEN DS:sit-in-circle. They express preferences, follow directions and ask for clarification or help. They play games that involve making choices, exchanging information and negotiating turn-taking. They use non-manual features to indicate understanding, interest or lack of interest. They use culturally appropriate protocols, such as gaining attention by waving, tapping or pointing to alert third parties and maintain eye contact when communicating, for example PRO2 MEAN or ... RIGHT PRO1? They identify, summarise/paraphrase and retell key points of information in signed texts such as announcements, directions for a game or presentations by visitors, for example PRO1 FIRST YOUR-TURN. They recount in correct sequence the main points of an event or favourite elements of a signed story, using modified indicating verbs, such as POSS1 FAVOURITE PART PRO3 TAKE MONEY THEN RUN^{-that direction-}. They present routine class information, such as weather reports or daily schedules, using visual prompts and signed descriptions. They create their own simple imaginative texts and retell wordless animations using familiar signs, gestures, modelled language and visual supports. They translate high-frequency signs/words and expressions in simple texts. They reflect on their own cultural identity and ways of communicating in light of their experience of learning Auslan.

Students compare fingerspelling with written English, noticing that it can be used for whole words or for parts of words. They recognise that there are signs that have no single English word equivalent, and know that signs can be displaced in space for different purposes, such as to show locations or different participants in a verb. They know that signing involves telling, depicting or enacting. They recognise variation in how Auslan is used, for example by recognising regional dialects and differences in signing space. They identify different ways Deaf community members communicate with each other and with members of the wider hearing community, for example, face to face, via technology, social media and interpreters. They know that culture is closely related to language and to identity and involves both visible and invisible elements.

Years 5 and 6

The nature of the learners

Learners at this level are expanding their social networks, experiences and communication repertoire in both their first language and Auslan. They continue to need guidance and participate in structured, collaborative tasks that both recycle and extend language. They are gaining greater independence and becoming more conscious of their peers and social context. They are gaining awareness of the world around them and of nature of the Deaf community in Australia. They notice similarities and differences between Auslan and Deaf culture and their own language(s) and culture(s).

Auslan learning and use

Learners use well-known phrases in Auslan to participate in classroom routines, presentations and structured conversations with the teacher and peers. They focus on aspects of their personal worlds and are introduced to content related to Auslan, the Deaf community and other learning areas. Learners develop their capability in Auslan through scaffolded tasks and texts such as descriptions and stories. They are learning to apply their knowledge of key signs and textual features to predict the meaning of unfamiliar language. They use modelled language to create texts such as narratives. They use Auslan to paraphrase; form questions to request information; interview others; plan, rehearse and deliver short presentations; and to compare interests and activities. They extend their language use by expressing ideas through expanding and connecting clauses.

Contexts of interaction

Learners use Auslan to interact with the teacher and their classmates, and may use technology to communicate with deaf peers in other contexts. Tasks are typically structured, collaborative and at times competitive, such as group performances, class displays or games. Language development and use are incorporated into collaborative and interactive learning experiences and activities. Learners may notice the use of Auslan in the community, such as in the media.

Texts and resources

Learners engage with a growing range of signers and videoed signed texts. They also engage with resources prepared by their teacher, including games, performances, presentations and language exercises. They may have additional access to Auslan and Deaf culture through resources created for the Australian Deaf community, such as children's television programs, websites or video clips. In addition, they make use of texts from other signed languages that make extensive use of the 'visual vernacular'.

Features of Auslan use

Learners are expanding their knowledge of vocabulary and sentence construction. With support, they use constructed action to show participants in a narrative, modify indicating verbs for non-present referents with increasing accuracy across a text, and use more complex entity depicting signs. Learners are developing a metalanguage for describing aspects of Auslan and how it is structured, such as how signers use different means to refer to things for cohesion in a text. They are increasingly aware of the connection between language and cultural practices and compare such connections to their own language and culture.

Discussion, reflection and explanation ensure the continued development of learners' knowledge base and metalinguistic and intercultural capabilities. Understanding of the relationship between language, culture and identity is developed through guided investigation of how language features and expressions carry specific cultural meaning; through critical analysis of cultural stereotypes, attitudes and perspectives; and through exploration of issues related to personal and community identities. Students reflect on the relationship between language, culture and identity and how these affect communication and intercultural experience through the lens of their own bicultural experiences.

Level of support

Support provided by the teacher at this level includes explicit instruction, description, and comparison of Auslan and English; modelled language use and examples of texts; and feedback on and review of student work. Learning experiences incorporate implicit and explicit form-focused language learning activities and examples of texts and tasks. Learners need practice and guidance in using dictionaries, especially Signbank, and access to word charts, vocabulary lists and examples when translating and creating texts.

The role of English

Auslan is used for classroom routines and language learning tasks and may be used as the language of instruction for learning the content of other learning areas. The language of response varies according to task demands, with Auslan used primarily for communicating in structured and supported tasks and English for open-ended, comparative tasks that develop learners' understanding of language and culture. English may also be used to research cultural issues where the source text is not available in Auslan.

Years 5 and 6 Content Descriptions

Communicating

Socialising

Elaborations

Share ideas and feelings about people they know, their daily lives, social activities and the school community
[Key concepts: experience, interaction, interests, relationship;
Key processes: describing, discussing, responding, comparing, expressing feelings]

(ACLASFC163)

- describing experiences and how they made them feel, for example:
DEAF PERSON WILL VISIT SCHOOL PRO1 EXCITED MEET
I am excited to meet the deaf visitor.
POSS1 FRIEND CHANGE OTHER SCHOOL PRO1 SAD
I was sad when my friend moved away.

- discussing aspects of their school experience, using familiar lexicalised fingerspelled signs to talk about shared places or people they know, for example:
M-O-N M-R S-M-I-T-H GIVE_{me} BOOK THAT NEW
On Monday Mr Smith gave me a new book.

- comparing weekend or holiday routines, interests and activities, using signs associated with time, sequence and location, for example:
REGULAR SUMMER PRO1_{plural} GROUP-MOVE-TO BEACH STAY++ THREE WEEK
We go to the beach for three weeks in summer.
WEEKEND PRO1 GO-TO-AND-BACK++ CAMP
I go camping on weekends.

- discussing shared experiences of school events, using appropriate interactional strategies when communicating in pairs or in groups, for example, using NMFs and eye gaze to gain, hold or finish a turn, for example:
THEATRE GOOD, LONG_{really}
I liked the theatre performance but it was soo long.
SCHOOL SWIMMING RACE, GOOD BAD, PRO2 THINK WHAT?
What did you think about the swimming carnival?

- describing relationships between members of their families or between classmates, for example:
PRO3 POSS1 COUSIN WE2 GOOD FRIEND.
She's my cousin; we're good friends.

- comparing attributes or characteristics of classmates or classroom objects, for example:
S-A-M RUN FAST C-H-R-I-S WORSE FAST SPEED
Sam runs fast but Chris runs the fastest.
THAT BEST COMPUTER
That's the best computer.

Collaborate with peers to plan and conduct shared events or activities such as performances, presentations, demonstrations or transactions

[Key concepts: performance, presentation, Deaf culture; Key processes: planning, negotiating, organising]

(ACLASFC164)

- working collaboratively to plan a performance or presentation for a younger class, for example on aspects of Deaf culture or Auslan
 - expressing preferences in relation to roles and responsibilities in shared learning activities, using statements such as:
PRO1 HANDWRITING PRO1 DON'T-LIKE RATHER TYPING
I don't like handwriting; I prefer to type it.
PRO1 DON'T-WANT DRAW, PRO1 WANT TAKE-PHOTO++
I don't want to do the drawing; I'd rather take photos.

 - negotiating with a partner to prioritise or sequence tasks when planning a learning activity, using language such as:
PRO2 THINK BEST THIS FIRST, FINISH, NEXT
Do you think we should do this first and when that's done, next
THAT FIRST IMPORTANT THAT SECOND
That's more important than this.

 - organising activities such as excursions or talent shows, using expressions related to place, time and numbers, for example:
THAT THEATRE WHEN WHAT DAY?
What date is the show?
HOW-MANY PEOPLE WILL DS:many-move?
How many people will be there?

 - playing games that involve detailed information exchange, such as 'Guess Who?', asking for and supplying descriptions, for example:
POINT HAVE GLASSES?
Does yours have glasses?
DON'T-HAVE
No.
 - allocating responsibilities for the completion of shared tasks, such as following a recipe or building a model
 - carrying out simulated transactions in different contexts, for example, playing a 'restaurant' game, or a food shopping game
-

Communicate appropriately while involved in shared learning activities by asking and responding to questions, managing interactions, indicating understanding and monitoring learning
[Key concepts: agreement, clarification, protocol, reflection;
Key processes: responding, agreeing, monitoring]

(ACLASFC165)

- responding to signed class and school announcements such as assembly procedures

- showing agreement or disagreement or asking for clarification, for example:

PRO1 AGREE

I agree.

PRO1 AGREE-NOT

I don't agree ...

THAT RIGHT THAT?

Is that right?

...RIGHT PRO1?

... am I right?

 Auslan

- using discourse markers in conversation to indicate understanding, attention or consideration, for example:

SURPRISE

ooh (with appropriate intonation)

INCREDIBLE

No way!

WOW

Wow!

UM

um

 Auslan

- respecting protocols for interrupting conversations, for example by walking between signers, waiting for eye contact and pauses in signing and using language such as EXCUSE or SORRY INTERRUPT
- monitoring their own and each other's learning, for example by making comments such as:
SURPRISE KNOW-NOT PRO1
I didn't know that ...
THANKYOU PRO2 EXPLAIN CLEAR
Thank you – that was really clear.
 Auslan
- following appropriate protocols when interacting with interpreters, for example not standing between the interpreter and the deaf person
- using non-auditory ways of signalling enjoyment, support or encouragement in large group or audience activities, for example, by foot stomping at a deaf basketball game

Informing

Elaborations

Collect, classify and paraphrase information from a variety of Auslan texts used in school and community contexts
[Key concept: information, findings, concepts; Key processes: identifying, collecting, classifying, paraphrasing, responding, explaining, requesting, interviewing]

(ACLASFC166)

- identifying specific points of information in procedural or descriptive Auslan texts, responding to signed comprehension questions
- paraphrasing the content of selected Auslan texts such as community announcements and relaying the information to others
- using information collected from peers about home and school routines, presenting findings to the class using visual supports/graphic organisers
- viewing Auslan texts from other content areas, using depicting signs to explain concepts such as states of matter or climate variation
- forming and signing questions to request information from a deaf organisation or person needed to produce a digital text such as a brochure or program
- interviewing Deaf peers or other Auslan users and noting unfamiliar signs, recoding and classifying these in their personal sign dictionaries

Convey information in different formats to suit different audiences and contexts
[Key concepts: context, purpose, audience; Key processes: presenting, creating]

(ACLASFC167)

- assembling an information pack about their school to support newly arrived deaf students, including a signed glossary of key people and places and simple directions to navigate the school
- creating a rehearsed digital report/reflection in Auslan for a school website on the experience of interacting with Deaf visitors
- presenting information for Deaf visitors at a school open day about significant school or community events, such as festivals or sports carnivals
- presenting information using visual support to engage the interest of the wider school community in a selected Deaf organisation or community activity
- explaining a favourite game that can be played in Auslan or English, highlighting key Auslan terms and supporting information with pictures, gestures and demonstrations
- planning, rehearsing and delivering short presentations about their use of Auslan in different contexts, taking into account context, purpose and audience
- explaining a procedural text to the class, such as a recipe

Creating

Elaborations

Engage with a range of creative and imaginative texts, identifying and discussing ideas and characters and making connections with their own experiences

[Key concepts: narrative, theatre performance, emotional response, humour; Key processes: sequencing, comparing, shadowing, reflecting]

(ACLASFC168)

- viewing a signed narrative text and responding by drawing a storyboard that identifies and sequences key events
- viewing a theatre performance designed for a deaf audience and sharing their reactions to the experience of viewing a theatre performance designed for a deaf audience
- comparing their reactions to imaginative texts that evoke positive or negative emotional responses, making connections with experiences in their own lives that have produced similar feelings
- engaging with different examples of Deaf humour, such as Deaf jokes, and comparing them with examples of humour in spoken English or in silent films or mime
- shadowing signed elements of theatrical or cinematographic texts that use handshapes, such as the scene with hand-faces in the film *Labyrinth*
- tracking and reflecting on the experiences of deaf dancers and choreographers, for example as contestants in shows such as *So You Think You Can Dance*

Create or reinterpret simple imaginative texts that involve favourite characters or humorous situations, using a range of signs, gestures and supporting props to convey events, characters or settings

[Key concepts: constructed action, perspective, choreography; Key processes: adapting, performing, retelling, dancing]

(ACLASFC169)

- creating and performing an adaptation of a humorous story with two or more characters, using elements of constructed action such as eye gaze change, body shift and head orientation change
- retelling a story to compare characters' perspectives using referents
- working collaboratively to create a visual representation of a face, using the hands and bodies of at least two classmates
- using 'visual vernacular' to create a humorous skit for a younger group of Auslan learners
- creating the next scene, a new character or an alternative ending for a signed fable, short story or cartoon
- choreographing and performing music-less dance, focusing on matching timing, beat and rhythm
- creating and performing a story from the viewpoint of a single character or narrator

Translating

Elaborations

Translate familiar texts from Auslan to English and vice versa, noticing which words or phrases require interpretation or explanation

[Key concepts: equivalence, meaning, interpretation; Key processes: identifying, translating, shadowing, creating, comparing]

(ACLASFC170)

- finding and using phrases that have direct translations between Auslan and English, for example, *Goodnight*, *Happy birthday*
- shadowing a story in Auslan as a pre-interpreting skill, noticing which phrases and concepts need more unpacking
- demonstrating the use of a bilingual online dictionary (Signbank), for example by looking up various meanings of the word *run* and comparing variation in signs for the concept in different contexts, and using it to translate Auslan texts into English and vice versa
- using resources such as Signbank to identify words which might not have a direct sign equivalent, for example, *jewellery*, *pets* and other collective nouns
- translating segments from popular children's texts such as fairytales or short stories into Auslan, considering why some elements cannot be translated literally

Create their own bilingual texts and learning resources such as electronic displays, websites or digital newsletters

[Key concepts: bilingualism, meaning; Key process: composing, creating]

(ACLASFC171)

- composing bilingual texts for class or school assembly performances, events or displays, for example, National Week of Deaf People announcements
- constructing and co-maintaining a bilingual website with a Deaf school
- creating bilingual texts for younger children, such as an online Auslan–English dictionary of school-specific vocabulary

Identity

Elaborations

Demonstrate understanding of the nature of identity in relation to themselves and to members of the Deaf community

[Key concepts: identity, community, history; Key processes: documenting, creating, sharing, evaluating, comparing]

(ACLASFC172)

- describing key milestones or important influences in their lives, including people, events, experiences, community traditions or travel experiences, explaining how these have helped shape their sense of identity and their perspectives
- viewing a series of Auslan identity stories, such as those found in the Griffith University *Introduction to Deaf Studies Unit 1* set, comparing their own experiences to those described by deaf children and adults in the footage
- making and sharing 'hand identity charts' to illustrate similarities and differences in how students define themselves or may be defined by others, using sketches of signs or gloss in the fingers of the chart and views of others outside the handshake
- identifying Deaf community identities associated with significant places, such as Martha Overend Wilson and the sites of the former Queensland Adult Deaf and Dumb Mission, or Eugene Salas and the original South Australian Deaf Society/Mission building

Reflecting

Elaborations

Reflect on how language and cultural background influence perceptions of other languages and communities, and on their experience of learning and communicating in Auslan

[Key concepts: influence, perspective, perception, self-reflection; Key processes: comparing, sharing, monitoring, identifying, analysing, explaining, reflecting]

(ACLASFC173)

- examining misconceptions held by some hearing people about deaf people, Auslan and Deaf culture, such as the idea that all deaf people can hear with hearing aids, or that deaf people may not drive
- considering possible explanations for assumptions deaf people might make about hearing people or about spoken languages
- observing and documenting their development as learners of Auslan, for example, by recording learning experiences and reflections in blogs, learning logs or journals, considering whether their sense of identity changes when communicating in this language
- reflecting on similarities and differences between spoken language and signed language users, for example, behaviours when joining interactions, taking turns, using name signs, or passing between people who are communicating with each other
- identifying and comparing how various emotions and different attitudes, such as respect, shyness, exuberance or embarrassment, are expressed in and responded to by different languages and cultures
- exploring ideas about identity in journal writing, for example by documenting challenges and rewards relating to second language learning and any changes in relation to their sense of identity

Understanding

Systems of language

Identify and describe elements of sign production, including handshape and its orientation, movement, location and non-manual features, and explore the processes of annotating Auslan videos or reading and transcribing glossed texts
[Key concepts: body anchored, iconicity; Key processes: identifying, recognising, annotating, glossing]

(ACLASFU174)

Elaborations

- noticing that in a stretch of connected signing a sign will often be produced differently to the way it is shown in a dictionary
- identifying some NMFs in a signed text
- recognising that some signs can occur with a standard mouth gesture and that these are sometimes called multi-channel signs
- thinking of body-anchored signs, such as head or why, and signs that are not body anchored, such as HAVE or STOP, and recognising that non-body anchored signs can be located in space around the signer
- identifying some iconic signs and considering how they are iconic
- exploring with support software such as ELAN to annotate signed texts with some grammatical marking such as NMFs
- 'reading' and transcribing glossed texts, including indicating understanding that there are markings to show NMFs and spatial locations

Understand that signs can include different information, including a gestural overlay, identify types of depicting signs and how signers establish spatial locations and show constructed action

[Key concepts: gestural overlay, establishing a spatial location, function of constructed action; Key processes: recognising, distinguishing]

(ACLASFU175)

- recognising that Auslan has fully-lexical signs that are in the dictionary and have a standard handshape, movement and location, and partly-lexical signs that cannot be listed in a dictionary in all forms as they change their form each time they are signed, such as DSs
 - noticing that fully- and partly-lexical signs can include grammatical information not included in a 'citation' form, for example, the sign TELL_{-me} is not listed separately to TELL (towards neutral space) and GO-TO includes GO-TO_{-often}
 - identifying where a signer has established a location in space (for example, through points, non-body-anchored signs, fingerspelled words or verb movement changes)
 - recognising that signers must make explicit which referent is associated with a location
 - identifying examples of each type of DS in an Auslan text: entity DSs, handling DSs and SASS DSs
 - learning that the function of CA is to represent the words, thoughts or actions of a protagonist in a text, either themselves or another
 - knowing that in CA a signer can shift into the role of another, or themselves at a different time, through eye gaze change, body shift, head orientation change, and matching facial expressions
-

Develop understanding of the important role of non-manual features in adverbs and joining clauses, and know that spatial relationships in Auslan are typically expressed with depicting signs

[Key concepts: manner, locatives, topicalisation; Key processes: recognising, distinguishing]

(ACLASFU176)

- recognising that quantifiers such as FEW or THREE are also types of adjective signs
 - noticing that sometimes Auslan signers have information about how a verb happens through NMFs not separate signs (for example, WRITE_{-carelessly})
 - recognising that some adverbs modify adjectives, not verbs, for example VERY, and that these modifications to adjectives can also be expressed with NMFs, for example changes in mouth patterns and movement of signs can intensify adjectives, for example, RED_{-really}, PLEASE_{-really}, TALL_{-really}
 - distinguishing between the citation form of a sign and the adverbial NMF overlaid and what meaning each part carries, for example: MAN SPRINT (base form), MAN SPRINT_{-fast} (manner added)
 - recognising how conjunctions such as plus, if or but are used to join clauses and create cohesion
 - recognising that signers can give information about how a verb happens over time by changing the movement, for example, signing WATCH versus WATCH_{-for-a-long-time} or with lexical signs such as WATCH AGAIN++
 - recognising that typically signers use DSs to show spatial relationships, not separate signs such as ON or UNDER
 - recognising that some nouns are not signed overtly in a clause, for example in the clauses below, the noun (the swimmer) is given in the first clause but not repeated in the second
PRO2 SWIM DETERMINED SWIM, NOT WIN
You swam really hard but you didn't win.
-  Auslan
- noticing that clauses are elaborated and made more vivid by adding adjectives and adverbs and by enacting or using DSs, and that they can be joined by conjunctions to make longer sentences
 - noticing that parts of a sentence can be signed simultaneously in Auslan, making it hard to establish word order
 - recognising that the element of a sentence that a signer wants most focus on is sometimes signed first and that this process of topicalisation involves particular NMFs

Identify and use language features of different types of Auslan texts and understand that texts are made cohesive through language choices

[Key concepts: language features, cohesion, referent tracking; Key processes: identifying, analysing]

(ACLASFU177)

- identifying structures and characteristic features of particular types of text that suit the purpose of the text, for example, selecting language that expresses emotion in a narrative text compared to more factual language used for objective reporting in an information report
- analysing samples of particular types of text, noticing choices signers have made in the production of their text, for example the amount of CA they have used
- identifying the many ways signers can refer to the same referent in a text, for example by using DSs, points, list buoys, and how such strategies support understanding

Language variation and change	Elaborations
<p>Explore variation in terms of the impact of other languages on Auslan across contexts and over time</p> <p>[Key concepts: influence, language borrowing, style shifts; Key processes: noticing, recognising, explaining]</p> <p>(ACLASFU178)</p>	<ul style="list-style-type: none"> noticing different ways that English words are borrowed into Auslan, for example, the use of fully fingerspelled words, such as D-U-E, N-O-U-N, the fingerspelling of the first letter of corresponding English words, for example TOILET, FATHER, or abbreviations of English words, for example, state names: S-A, N-S-W, V-I-C, T-A-S, and organisation names: N-A-B-S, W-A-A-D, N-S-W-A-D, D-C-S-S-A creating lists of fingerspelled words which have become lexicalised, for example, #HOW, #BUT, #ABOUT or #FOR and looking at how this process has changed the form of words over time recognising that Auslan includes loan signs from Signed English, some of which were invented for Signed English (for example, TOY or DAD) and some that were from the southern dialect and incorporated into Signed English, for example, YELLOW looking at style shifts in domains where English is in closer contact with Auslan, such as the use of more English-like structures in formal and educational settings explaining the influence of other signed languages such as BSL, ISL and ASL on Auslan over different periods of time and discussing reasons for such influence
Language awareness	Elaborations

Explore the current status and profile of Auslan and of the Deaf community in contemporary Australian society, considering issues such as language transmission, usage and documentation

[Key concepts: diversity, representation, language transmission, documentation; Key processes: recognising, describing, understanding, discussing, investigating]

(ACLASFU179)

- describing the visibility and use of Auslan in the wider community, for example in television programs, on the news, at community events, sporting fixtures and in emergency announcements
- discussing the diversity of Auslan users in the Australian community, including people who are deaf, those who are hard of hearing and hearing people such as CODAs and interpreters
- investigating the signed languages used by deaf and hard of hearing members of Aboriginal and Torres Strait Islander communities
- exploring variation in Auslan fluency among classmates and members of the Deaf community, considering the relevance of factors such as where and when individual users learnt to sign and whether they are from a Deaf or hearing family
- mapping sign language use around the world using data from Ethnologue, for example by identifying and labelling countries with correct naming of the sign language used, such as France = LSF: Langue des Signes Française; Germany = DGS: Deutsche Gebärdensprache
- finding representations of signing deaf people in the media or in literary texts, and evaluating how they and the language are represented
- investigating the profile and distribution of members of the Deaf community, for example across states of Australia or by age or gender, using data from censuses and other sources to summarise and represent information in graph/visual forms, and to suggest possible explanations of patterns or statistics
- understanding the role and function of Auslan–English interpreters and Deaf interpreters and the access and opportunities they provide to language users
- recognising that many languages are well-documented, strong, healthy and widely used by many people across generations while others are less well-documented and robust
- recognising that some languages have no written form and have historically been passed on face to face/orally, which means that they are less well recorded or documented
- recognising language documentation as an important means of recording, maintaining, transmitting and revitalising a language
- understanding the nature of transmission of Auslan, for example, that in most cases Auslan is not passed on from parent to child but from peers, or is learnt by children from adults outside the family, and that some Deaf people learn Auslan later in early adulthood
- describing how Auslan has been transmitted across generations and how it has been recorded, investigating reasons for the 'oral' tradition language transmission
- using the UNESCO atlas to map the world's minority languages and those that are in critical endangerment and to document the vitality of signed languages

- exploring how different technologies are used by deaf people to support social networks and strengthen their community and language
- explaining the significance of stories linked to Deaf social history and the responsibility of the Deaf community to convey shared experiences that relate to Deaf history and significant sites, for example by sharing stories about school days in the past
- identifying examples of deaf people who have been recognised for different reasons in wider Australian society, for example, Alastair McEwin or Drisana Levitzke-Gray, and discussing how such recognition contributes to broader awareness of Auslan in Australia

Role of language and culture	Elaborations
<p>Reflect on how communities' ways of using languages are shaped by, reflect and strengthen cultural values and beliefs and how these may be differently interpreted by users of other languages</p> <p>[Key concepts: cultural expression and transmission, values, beliefs; Key processes: observing, making connections, discussing, investigating]</p> <p>(ACLASFU180)</p> 	<ul style="list-style-type: none"> • explaining the role of Auslan and Deaf culture in maintaining, reflecting and strengthening the Deaf community and its networks and significant places • understanding that knowledge about past and present Deaf people and cultural experience and values is embodied in and transmitted through Auslan, for example ways of producing the sign for SIGN reflect cultural values placed on fluency • identifying the cultural importance of elements of communication such as the use of signing space and proxemics by Auslan users, particularly in relation to a person passing between two signers, or to the positioning of communication partners • identifying cultural differences in the use of personal names in Auslan and their own background language, such as the fact that Auslan signers do not use a person's name sign when addressing them directly as do users of many spoken languages • recognising that different types of expressive and imaginative performance in Auslan carry cultural as well as linguistic information, for example, a film or theatrical performance that represents typical miscommunication experiences between deaf and hearing people • reflecting on the ways culture is interpreted by others, for example by identifying how stereotypes about deaf and hearing people influence perceptions • understanding that 'sound' is accessed differently in Deaf culture, that the meaning and importance of sound in deaf people's lives is not the same as in hearing people's experience

Years 5 and 6 Achievement Standard

By the end of Year 6, students discuss aspects of their daily lives, social activities and school experience and respond to each other's comments. They describe relationships and characteristics of people and objects and express feelings and preferences, for example, POSS1 FRIEND CHANGE OTHER SCHOOL PRO1 SAD. They negotiate with each other to plan, organise and complete learning tasks and activities, using statements such as PRO1 DON'T-WANT DRAW, PRO1 WANT TAKE-PHOTO, THANKYOU PRO2 EXPLAIN CLEAR, or THAT FIRST IMPORTANT THAT SECOND. They follow more complex instructions and directions involving several steps. They compare experiences, routines, interests and activities, using signs associated with time, sequence and location. They follow protocols when interacting with each other or with interpreters or visitors to the classroom, for example by interrupting conversations appropriately or providing context for a new participant joining a conversation. They paraphrase the content of selected signed texts, such as community announcements, and relay the information to others. They plan, rehearse and deliver short presentations, taking into account context, purpose and audience. They respond to creative and imaginative texts, for example by discussing ideas and characters, shadowing signed elements of theatrical or cinematographic texts that use handshapes, and by making connections with their own experiences. They create or reinterpret simple imaginative texts using elements of constructed action (CA), such as body shift, eye gaze and head orientation change. They modify non-manual features and lexical signs to indicate manner. They translate familiar texts from Auslan to English and vice versa, identifying which words or phrases require interpretation or explanation.

Students discriminate between body-anchored and non-body-anchored signs, and recognise how non-body-anchored signs can modify their locations meaningfully. They know that the function of CA is to represent the words, thoughts or actions of a protagonist in a text, either themselves or others, and that spatial relationships between objects are typically expressed with depicting signs in Auslan. They understand different ways that English words are borrowed into Auslan and identify connections between Auslan and other signed languages, for example, BSL, ISL and ASL. They recognise the diversity of Auslan users in the community, including people who are deaf, hard of hearing, and hearing people such as CODAs or interpreters. Students recognise how Auslan has been transmitted across generations and describe different ways it has been documented and recorded, for example, by glossing and the use of technology such as ELAN. Students reflect on the ways culture is differently interpreted by others, for example by identifying how stereotypes about deaf and hearing people influence perceptions.

Years 7 and 8

The nature of the learners

The transition to secondary schooling involves social and academic demands that coincide with a period of maturational and physical change. Learners are adjusting to a new school culture with sharper divisions between curriculum areas. There is a need for continuity through change in relation to their language learning. Students in this pathway are continuing to study Auslan, bringing with them a capability to communicate, with some assistance, about their immediate world and the Deaf community. They have experience in analysing the major features of the language system and in considering intercultural exchanges, including their role in these. However, learners at this level may find themselves in classes that include learners with a range of previous experience with Auslan and Deaf culture. A multilevel and differentiated approach to teaching and task design responds to this diversity of prior experience.

At this level, students bring a range of learning strategies to their language learning. They are increasingly aware of the world beyond their own and are engaging with broader issues of youth and society, land and environment, education and identity, while establishing a balance between increasing personal independence and social responsibilities. They are considering their future pathways and choices, including how Auslan might be part of these.

Auslan learning and use

Learners interact using Auslan in classroom routines and communicative tasks. They use Auslan to compare and contrast, sign instructions, problem-solve, make announcements, persuade, and recount experiences in increasing detail. They are able to express their feelings and emotions creatively in Auslan.

Contexts of interaction

The primary context for learning remains the Auslan class; however, there may be opportunities for interacting with deaf students from other schools and with other learners of Auslan, for example through technology and sister-school relationships. Learners may be exposed to Auslan signers from the Deaf community through visiting speakers, media and community events.

Texts and resources

Learners engage with a range of increasingly complex live and digital signed texts designed for learning Auslan in school. Authentic texts created for Deaf people, such as websites, provide extra opportunities to extend understanding of language and culture. Texts come from a range of domains or genres, such as community announcements, vlogs and stories, and serve a variety of purposes, such as informative, transactional, communicative, imaginative and expressive. The Deaf community is the most important resource for learning because it is the origin of most of the texts and communicative situations engaged with by learners.

Features of Auslan use

Learners are extending their grammatical knowledge, such as how language structures and features are used in texts. They are using more elaborate sentence structures, including conjoining clauses, and are increasingly making their texts cohesive by setting up and maintaining referents in signing space. Learners are exploring non-manual features (NMFs) and their relationship with clause types, and are beginning to use constructed action to represent multiple participants in a text. They are increasingly aware of connections between language and culture, comparing them to concepts in their own language and culture. They are learning to reflect on their own language and culture and on how identity impacts on intercultural experiences.

Level of support

Particular support is required at this stage of learning to manage the transition to secondary schooling and to encourage continued engagement with language learning. Opportunities to review and consolidate prior learning are balanced against provision of engaging and relevant new experiences and tasks that are more challenging. Learners require modelled language use and explicit instruction in grammatical knowledge, with comparison between English and Auslan. They need support in using dictionaries, particularly in determining base signs and choosing appropriate meanings for the context. Learners continue to access visual glossaries, charts and examples to support their receptive and productive language use. The teacher continues to provide implicit and explicit modelling and scaffolding in relation to meaningful language use in a range of contexts, and explicit instruction and explanation in relation to language structures, grammatical functions, vocabulary and abstract cultural concepts. Learners at this level are encouraged to self-monitor, for example, by keeping records of feedback and through peer support, and to self-review and adjust language in response to their experiences in different contexts.

The role of English

Auslan is used for classroom interaction, language learning tasks and experiences, and, with support, reflection on learning. Auslan may also be used for learning new content drawn from other learning areas. English is used for analysis, comparison and reflection in relation to abstract concepts and more substantive discussion. English may also be used to research cultural issues where a source text is not available in Auslan. Learners continue to develop a metalanguage for thinking and talking about language, culture, identity and about the experience of learning and using Auslan.

Years 7 and 8 Content Descriptions

Communicating	
Socialising	Elaborations

Interact appropriately with people in different contexts, sharing experiences, interests and opinions about current events or school and community experience

[Key concepts: protocol, turn-taking, interaction; Key processes: socialising, comparing, turn-taking, clarifying]

(ACLASFC181)

- using signs to agree or disagree on relevant topics, such as:

AGREE YES HOMEWORK SHOULD

Yes, I agree we should do homework.

PRO1 KNOW WHAT MEAN, BUT....

I know what you mean, but ...

PRO1 DOUBT

I'm not sure.

AGREE-NOT, PRO1 THINK...

I don't agree; I think ...

 Auslan

- participating in videoconferencing exchanges with deaf children or other Auslan students from another state to compare and contrast aspects of their school and learning experiences
 - contributing to online videoconferencing with other Auslan users to compare and contrast aspects of their school and learning experiences
 - using appropriate NMFs when turn-taking, for example:
HOLD
Hold that thought.
QUICK INTERRUPT
Can I just interrupt you quickly?
WAIT....COME
Can you just wait a moment ... Right, what did you want?
 Auslan
 - clarifying meaning, for example by using fingerspelling to explain unfamiliar vocabulary, as in, PRO2 MEAN [fingerspell word]?
 - using appropriate protocols to join or leave conversations, for example, waiting for eye gaze or for the signer to finish and not asking for a full recount
 - engaging with deaf visitors from different groups and backgrounds and creating a vlog about the visits
-

Engage in different processes of collaborative learning, including planning, problem-solving, task completion and evaluation

[Key concepts: design, communication, reflection; Key processes: collaborating, designing, creating, presenting, problem-solving, reflecting]

(ACLASFC182)

- working in pairs or small groups to design and create visual resources that promote Auslan as an important area of study
- brainstorming, planning and working together to advertise and present an intercultural event for their year-level peers
- working collaboratively to create instructional or procedural texts for younger learners
- preparing for the visit of a member of the Deaf community, discussing how to ensure effective communication between the visitor and deaf and hearing members of the class
- providing feedback on completed events or activities, exchanging reflections such as:
FIRST PRO1 DOUBT I-F WILL GO-WELL, HAVE-A-LOOK GO-ALONG GOOD
At the start, I wasn't sure it would work, but after a while I thought it went well.
PRO1 WRONG NEVER AGAIN DO SAME
I won't do that ever again.

- problem-solving around collaborative activities such as website design, science experiments or model-building, using wh- questions such as:
WHY FAIL WHY?
Why isn't it working?
WHO THINK CAN FIX?
Who thinks they can fix it?
FINISH, NEXT WHAT?
What do we do next after we finish this?

- giving directions for outdoor activities such as an obstacle course or bushwalk, including expressions such as:
HAVE DS:round-oval FIRST RUN DS:draw-line THEN STOP. NEXT CLIMB DS:climb-over DS:land-on-feet THEN CRAWL DS:crawl-under-flat-thing
There's a big oval. First you will run along one side of it. Then stop at the wall. Next you will climb over the wall then crawl under the net.

Participate in extended interactions by explaining and clarifying answers, responding to others' contributions, asking follow-up questions and observing protocols in and beyond the classroom

[Key concepts: interaction, signing space, discussion, context, environment, protocols; Key processes: responding, commenting, adjusting, contextualising]

(ACLASFC183)

- contributing to discussion and debate by expressing opinions, responding to others' perspectives and using reflective language, such as:
NEVER THOUGHT YEAH-RIGHT
Oh yeah, I hadn't thought of that before.

- responding to signed class and school announcements with more elaborated responses, for example:
YES I CAN COME-TO-YOU HELP BUT CAN-NOT THURS
Yes, I can help you with that, but not on Thursday.

- commenting on information provided by others to indicate or to clarify understanding, for example:
NOD INTERESTING
Mmm, interesting.
TRUE WHAT ABOUT...?
True, but what about ...?

- extending discussion or debate by asking follow-up questions, clarifying their own contributions or suggesting relevant comparisons
- organising standing or seated positions and 'signing space' when talking to one or more people, and adjusting the physical environment to be well-lit and without glare to enable effective communication
- adjusting styles of communication according to situation, for example, getting someone's attention for a non-urgent matter versus an emergency situation
- investigating appropriate ways to join or take leave of a group interacting in Auslan and following appropriate protocols in interpreting situations outside the classroom, for example in the playground
- sharing responsibility for providing information and context for a new participant joining a conversation

Informing

Elaborations

Collate and analyse information accessed through a variety of signed texts to present an overview or develop a position on issues or interests

[Key concepts: perspective, representation; Key processes: collating, analysing, researching, interviewing, evaluating, surveying]

(ACLASFC184)

- viewing signed texts such as media reports on activities such as deaf sports, and providing an overview of different perspectives
- researching signed texts such as magazine features, interviews or web posts to select information needed to prepare a signed presentation on a particular event or person
- interviewing a member of the Deaf community about a historical or cultural event and using information provided to create and present a signed review
- evaluating information obtained from signed media reports, posters, websites and brochures that involve different representations of deafness
- surveying friends and family members about views on learning Auslan, analysing findings in terms of variations in understanding and attitudes
- obtaining information about high-profile members of the international Deaf community to create profiles for an e-magazine

Present information on different events or experiences to inform, report, promote, instruct or invite action

[Key concepts: action, experience; Key processes: instructing, reporting, persuading, inviting]

(ACLASFC185)

- creating signed announcements to inform members of the school community about events such as a Deaf theatre performance or National Week of Deaf People
- reporting on their own and others' experiences of shared events, such as school camps, holidays or concerts
- developing a signed news report or public announcement to inform or alert an imagined audience of a recent or impending natural disaster
- providing instructions in an engaging or entertaining style to create interest in a group activity such as a maths game or signing choir
- creating digital clips or social media posts designed to persuade, inform or invite response on an issue of relevance to young people of their age

Creating

Elaborations

Interpret different types of texts that involve the expression of feelings or experiences and the representation of imagined people, places and scenarios, sharing and comparing their responses to different elements

[Key concepts: expression, manner, metaphorical iconicity;
Key processes: comparing, evaluating, describing, exploring, profiling]

(ACLASFC186)

- viewing and responding to sign poetry from around the world, for example by comparing differences and similarities in 'visual vernacular'
- recognising how a character's feelings and attitudes are expressed through NMFs and manner
- evaluating Deaf performances or art forms that use technology such as camera and lighting techniques to expressive effect, for example performances by Ian Sanborn
- describing and comparing responses to the use of colour and images by deaf artists such as Juan Fernández Navarrete or Nancy Rourke
- identifying and profiling Deaf artists who make use of music, for example members of the Deaf Performing Arts Network
- exploring how cultural values and the expression of identity are reflected in different forms of artistic expression, such as poetry performances by Walter Kadiki or John Wilson's 'Home'
- comparing visual elements of signed media texts with those of equivalent texts produced for a hearing audience, for example, the teen drama *Switched at Birth* with teen dramas from BSL Zone
- exploring the concept of metaphorical iconicity used in poems and narratives, for example by shadowing selected elements
- analysing how elements of theatre performance such as emotional nuance are communicated through interpreters in a live setting

Create and present entertaining individual or collaborative texts that reflect real or imagined people, places or experiences

[Key concepts: improvisation, diorama, role-play, theme; Key processes: creating, improvising, collaborating, re-creating, role-playing]

(ACLASFC187)

- creating a performance for a class or school talent show, such as a signed song, skit or humorous retelling of an anecdote
- participating in improvisation games, such as spontaneous responses to a stimulus, for example, *Sixty seconds to make the audience laugh, cry ...*
- working collaboratively to create a static scene or diorama using the hands and bodies of at least two signers
- playing with light and shadow as a means of highlighting handshapes and movement, for example in shadow puppet performances
- re-creating a theatre set from a two-dimensional image using signed space
- role-playing an imagined interview, incorporating elements of tension or emotion
- creating a handshake poem on a selected theme, such as friendship, home or fear

Translating

Elaborations

Translate and interpret less familiar short texts and compare their translations to those of their classmates, considering why there might be differences in interpretation and how language reflects elements of culture and experience

[Key concepts: equivalence, meaning, interpretation, culture, ethics; Key processes: translating, interpreting, comparing, paraphrasing, summarising]

(ACLASFC188)

- interpreting Auslan phrases and expressions that do not translate literally, identifying similar English expressions and considering possible consequences of lack of equivalence in terms of intercultural communication
- translating simple filmed texts in Auslan into written English captions
- sight translating short English texts such as news articles or short speeches into Auslan for review by their peers
- translating an Auslan version of a well-known text, such as a song or story, considering why some words or expressions require freer translation than others to achieve equivalence
- comparing their own translations of short texts from Auslan to English and vice versa with those of their classmates, noting any variations and discussing possible reasons for these
- interpreting very simple interactions between deaf students or guests and non-signers, such as a hearing teacher, librarian or canteen manager
- discussing the fact that some words and expressions cannot be translated and are used in their original form in other languages, and considering the impact of such word or sign borrowing on the style and effect of communication
- considering the bimodal nature of Auslan–English interpreting, and discussing the possibility for both consecutive and simultaneous interpreting of information in communicative exchanges

Create bilingual texts to use in the wider school community, identifying words/signs or expressions that carry specific cultural meaning in either language

[Key concepts: equivalence, bilingualism; Key processes: captioning, creating]

(ACLASFC189)

- capturing and presenting stories recorded from interviews in Auslan with members of the Deaf community, captioning the interviews in English
- captioning examples of classmates' work in Auslan, such as short stories or poems
- creating translations of song lyrics for performance in Auslan
- making a short documentary in Auslan about a topical issue, moving through the processes of drafting, translating, editing and captioning, trialling alternative captioning tools
- captioning and providing voice-over for student-generated filmed Auslan texts, such as fairytales created for a young deaf audience
- creating bilingual versions of short, simple texts such as instructions for a game or procedures for a recipe

Identity

Elaborations

Consider their own and each other's cultural experiences and ways of expressing identity and reflect on the role of Auslan in building and expressing identity for Deaf people

[Key concepts: identity, perspective, belonging, wellbeing;

Key processes: reflecting, comparing, describing, discussing, investigating, analysing]

(ACLASFC190)

- exploring how their own biography shapes their sense of identity and ways of communicating, for example by considering elements such as family origins, traditions, beliefs, practices, interests and experiences
- noticing and comparing how they use signs or expressions when communicating in English or Auslan and considering which feel closest to their sense of identity
- comparing and reflecting on how identity is expressed across cultures and languages, for example by considering the idea of 'belonging' as expressed in different languages and cultures
- discussing how their upbringing and personal experience impact on assumptions or attitudes that they bring to interactions with people who have different backgrounds or experiences, considering concepts such as communication, personality, family and community
- discussing the impact of language and culture on the shaping of identity and the sense of wellbeing
- considering connections and shared identity between local, regional and national communities of deaf people, for example by inviting a deaf guest to share their experiences of travel or international contact

Reflecting

Elaborations

Reflect on their intercultural interactions and experiences, for example by considering their responses when engaging with Auslan users or digital resources, and on how these responses reflect their own languages and cultures

[Key concepts: intercultural experience, ways of knowing and being, discrimination; Key processes: comparing, analysing, explaining, reflecting, exploring]

(ACLASFC191)

- reflecting on their interactions in Auslan and with Deaf culture, for example, through face-to-face or online interactions with other Auslan learners or deaf people, visits to Deaf community places and events or interactions with visitors to the school, analysing these experiences in terms of their previous or existing perceptions, understandings or attitudes
- analysing cultural assumptions they made prior to learning Auslan and considering if these have changed through the experience of learning the language and interacting with deaf people
- reflecting on the labels *deaf* and *hearing*, what these may mean to different people and their implications in terms of status, access, opportunity and privilege
- reflecting on the concepts of *insider* and *outsider* views of the Deaf community and on their own position as second language learners of Auslan
- reflecting and reporting on how learning Auslan provides general insights into the nature of language and culture and on how their assumptions about deaf people and ways of reading the world are changing as a result of intercultural language learning
- reflecting on general social attitudes and responses to differences in behaviours or communicative styles, such as those that characterise communication in Auslan
- reflecting on their identity as 'second language learners' and considering whether the experience of learning an additional language/culture impacts on their aspirations, career considerations or social-networking opportunities
- reflecting on how their own ways of communicating may be interpreted when interacting with deaf people, and on the need to modify elements of their behaviour, for example in relation to the use of eye contact, facial expression or body language

Understanding

Systems of language

Elaborations

Identify different types of non-manual features and characteristics of signs, including iconicity, and explore the use of software to transcribe and annotate signed texts

[Key concepts: iconicity, annotation, transcription; Key processes: identifying, classifying, glossing, annotating, transcribing]

(ACLASFU192)

- identifying, demonstrating and describing the various types of NMFs: movements of the eyebrows, eyes, nose, mouth, cheeks, shoulders and body, and describing their function
- understanding that signs can be iconic in a number of ways, such as representing a whole object or part of an object
- identifying signs with different levels of iconicity, for example, those that are fully transparent, translucent or arbitrary
- recognising that signed languages involve more iconicity because they are visual not auditory, with most referents having visual features
- identify and classify examples of spatial modifications of nouns and verbs in a video text using video annotation software, for example, ELAN
- 'reading' and transcribing glossed texts, including interpreting the markings that show how a sign is modified in space, NMFs, DSs and examples of CA

Develop knowledge of additional elements of the Auslan grammatical system, analysing indicating verbs, depicting signs and constructed action

[Key concepts: grammatical use of space, depicting signs; Key processes: understanding, distinguishing, analysing]

(ACLASFU193)

- noticing that meaning is created in Auslan from fully-lexical signs, partly-lexical signs and non-lexical CA and gesture
- recognising that signers can use locations for present referents, non-present referents, or abstract referents that do not exist in space
- recognising that nouns can be pluralised by locating them repeatedly regardless of their original location
- distinguishing between directional and locational indicating verbs
- recognising that handshape and movement represent different things in each type of DS, for example:
 - **entity DSs**: the handshape is an object or person, and the movement is the movement or location of that object or person
 - **handling DSs**: the handshape represents a person's hands touching or moving another object, and the movement shows how the hands move
 - **SASS DSs**: the handshape and movement outline the shape or size of something
- observing instances of CA in a text and discussing how it was marked

Understand and control additional elements of Auslan grammar, such as the use of non-manual features for negation or conditional forms, and understand how signers use constructed action and depicting signs in composite utterances

[Key concepts: clause types and their NMFs, composite utterances; Key processes: recognising, analysing]

(ACLASFU194)

- recognising the nature and function of word classes and understanding that the context of the sign is important and Auslan signs will not always have the same word class as an English word, for example, adjectives can act like verbs in Auslan
- recognising that signers may include linguistic and gestural elements in a clause, that is, signers can *tell*, *show* or do both simultaneously
- noticing, with support, when signers are using composite utterances, that is, those that have elements of CA, DSs, points and fully-lexical signs in the same utterance
- understanding the different functions of a range of NMFs, such as those used for questions, topicalisation, negation or conditional forms
- distinguishing between yes/no questions and wh-questions and statements and their corresponding NMFs
- recognising that clauses can be joined by conjunctions to make longer sentences and these conjunctions can be shown with separate signs, such as PLUS, or THEN or NMFs, for example by pausing between clauses
- recognising that clauses can be linked equally or unequally where one clause depends on another

Expand understanding of grammatical features and cohesive devices used in a range of personal, informative and imaginative texts designed to suit different audiences, contexts and purposes

[Key concepts: text purpose, choice, coherence; Key processes: identifying, applying, analysing]

(ACLASFU195)

- noticing that differing purposes in text creation result in differing types and amounts of signing, for example, the amount of fingerspelling used in a public lecture compared to in a private conversation
- identifying linguistic structures and features typically associated with texts such as casual conversations, for example the use of back-channels or hesitations
- applying knowledge of the choices a signer can make in texts, for example by comparing two signers' texts about the same topic and evaluating the different choices they have made in terms of enacting through DSs or CA
- analysing the effect of a signer's use of pausing in a description or information report
- noticing how signers construct cohesive and coherent texts through the use of text connectives such as BUT and G:WELL to create links between clauses

Language variation and change

Elaborations

Understand that Auslan has evolved and developed through different periods of influence and cultural and societal change
[Key concepts: change, evolution, contact, technology; Key processes: identifying, recognising, researching]

(ACLASFU196)

- researching how BSL from the 1800s evolved into Auslan, NZSL and modern BSL, for example by finding and classifying examples from Auslan, NZSL and BSL signbanks
- understanding that while the structure of individual signs can change over time in regular ways, there is little information about this process in signed languages due to lack of historic records of signing
- understanding that greater contact between signers internationally has led to increased borrowing between sign languages, for example, signs that refer to different nation states and cities around the globe, for example, the old Auslan sign for America versus the current sign, or the ASL vehicle handshape in DSs
- identifying changes to Auslan that reflect changes in social relationships and community attitudes, for example in relation to words/signs such as DEAF^DUMB, DISABILITY, HEARING^IMPAIRED/FS:HOH, DEAF^WORLD/DEAF^COMMUNITY, HUMAM^RIGHT
- interviewing older members of Deaf families or Deaf communities and reporting back to the class about any differences in signing they noticed, such as more use of fingerspelled words, less use of NMFs and depicting signs, or the use of different signs, such as FILM (old sign), TOILET (old sign)
- recognising that languages constantly expand to include new words, signs and expressions due to influences such as changing technologies and digital media, for example, COMPUTER, COMPUTER-MOUSE, INTERNET, FACEBOOK, WIFI, FS:PC, SELFIE

Language awareness

Elaborations

Understand historical and contemporary factors that impact on awareness, support and use of Auslan and its vitality in contemporary Australia, comparing it with that of other signed languages around the world

[Key concepts: influence, transmission evolution, endangerment; Key processes: researching, investigating, exploring, describing, analysing, comparing]

(ACLASFU197)

- considering the impact of international historical events such as the Milan Congress (1880) and the linguistic recognition and documentation of signed languages (1960s and 1970s) on the use of signed languages in education and deaf people's feelings of ownership and pride in their languages
- analysing the impact of migration and settlement of deaf people from the UK and other countries in Australia, on the development of Auslan
- investigating the geographical location, origins and history of deaf schools in Australia and the impact of these institutions on the transmission, use and status of Auslan
- considering the contemporary influences and pressures on Aboriginal and Torres Strait Islander signed languages and how these may affect their vitality
- describing the role religion has played in influencing Auslan in terms of usage and spread, for example, by religious orders, early Deaf Societies and Bible translation projects
- exploring the history and acceptance of signed languages and Deaf community and culture around the world, for example by creating a timeline or a research poster
- exploring multilingualism in the Deaf community, including the use of Auslan, English and other signed and spoken languages such as Irish-Australian sign language, and how and when users typically switch between languages and dialects
- investigating the use and impact of generic digital technology and specific forms of communication by Auslan users, for example, video chat, social media, SMS/texting, and NRS and VRS
- reflecting on the role of Auslan interpreters in raising awareness and understanding of Auslan in the wider community and in influencing the function and nature of Auslan, for example by the introduction of new signs for temporary use in certain contexts
- exploring the role of deafblind people in the Deaf community
- investigating historical patterns of employment of deaf people in certain trades and fields of work, and the impact of these traditional employment domains on Auslan development
- considering ways that Auslan is evolving due to influences such as globalisation and the capacity for new technology to store, record and share sign languages internationally
- comparing levels of endangerment of different sign languages, such as NZSL, village sign languages, ASL, Scandinavian, South American sign languages and Auslan, for example by using UNESCO data by reviewing the iSLanDS survey findings
- understanding the challenges faced by Auslan and other signed languages due to intergenerational disjunction in

language transmission

- investigating how new or specialised language associated with domains such as technology, engineering, cooking or fashion are used but not documented in the Deaf community, and how such language impacts on language vitality
- identifying contexts and circumstances that support increased usage and acceptance of newly coined Auslan terms, for example, a workplace with several deaf employees
- recognising reasons for the shared sense of identity of sign language users and the notion of reciprocity in the Deaf community
- researching the role of the World Federation of the Deaf in mapping and monitoring the vitality of sign languages around the world and in protecting sign language diversity
- analysing ways in which Deaf people design and adapt spaces in cultural ways ('Deaf space') in order to use a visual language, for example, by eliminating visual obstacles to signed communication; using circles or semicircles for meeting and learning spaces; and using open-plan areas, lighting and window placement to maximise visual access to information, with reference to Gallaudet University's Deaf space design principles

Role of language and culture	Elaborations
------------------------------	--------------

Reflect on how language use is influenced by communities' world views and sense of identity and on how language and culture influence each other

[Key concepts: culture, knowledge, value, transmission; Key processes: explaining, reflecting, exploring, analysing, comparing]

(ACLASFU198)

- exploring the nature of culture and how it is related to ways of thinking and using language, for example by comparing the cultural concept of Deaf identity with a medical model of deafness
- reflecting on ways that Auslan describes and reflects Deaf culture, comparing this to the relationship between their own hearing/background language and culture
- analysing how concepts related to cultural practices are expressed through language, for example, by identifying elements of naming systems such as the use of pointing, NMFs and name signs, as in the case of number name signs of older deaf people who attended the Victorian School for Deaf Children
- identifying and discussing core cultural concepts reflected in Auslan, such as the collective nature of the Deaf community, the importance of respect for elders and of reciprocity and responsibility, for example, how signing TAP-2h++ reflects the shared understanding of responsibility to share information and pass on knowledge, or greater use of the 'flat hand' rather than the 'point hand' and use of full titles in acknowledgements and forms of address when introducing an esteemed elder
- identifying culturally significant attitudes and beliefs conveyed through Auslan that relate to history, significant individuals, places or events, for example, frustration with the use of 'voice' in front of deaf signers can be traced to the historical oppression of signed languages
- comparing elements of communication in different contexts and exchanges that are culturally specific, such as back-channelling, the use of silence or eye contact, head nodding to indicate understanding rather than agreement, and the implications of such cultural variability in contexts such as in courts of law
- observing that concepts may be culture and language specific, for example, in relation to time and space, as in the spatial mapping for timelines in Auslan
- exploring ways in which production and affect related to the sign for COCHLEAR IMPLANT have evolved due to shifting values and perceptions within the Deaf community in relation to the implant, noting, for example, the transition from a negative affect to more neutral production of the sign

Years 7 and 8 Achievement Standard

By the end of Year 8, students use Auslan to interact and to exchange information, experiences, interests and opinions with teachers, peers and others. They initiate and maintain conversations and use strategies such as fingerspelling to replace unknown signs to support continued interaction, such as PRO2 MEAN [FINGERSPELL]? They engage in different processes of collaborative learning, including planning, negotiating, and problem-solving, using familiar and some spontaneous language, for example PRO1 AGREE-NOT, PRO1 THINK DIFFERENT. Students participate in class discussions, explaining and clarifying positions, asking follow-up questions, using non-manual features (NMFs) for topicalisation or negation. They use appropriate protocols to join or leave conversations, for example, waiting for eye gaze or for the signer to finish, not asking for a full recount when arriving mid-conversation, and providing context for a new participant joining a conversation. Students locate, interpret and analyse information from a variety of texts, such as signed announcements, interviews or media reports, using context and familiar language to work out unfamiliar meaning. They demonstrate understanding of different types of signed texts by paraphrasing, summarising and explaining main ideas, key themes or sequences of events. They interpret different types of creative and imaginative texts, such as Deaf performances or expressive art forms, describing and comparing their responses. They plan, draft and present informative and imaginative texts, linking and sequencing ideas using connectives, such as BUT, WHEN or WELL, and strategies such as repetition, stress and pausing for emphasis. They create bilingual texts to use in the wider school community, for example by captioning short stories, poems or interviews with members of the Deaf community. Students reflect on how their own ways of communicating may be interpreted when interacting with deaf people; and they modify elements of their behaviour such as eye contact, facial expression or body language as appropriate.

Students identify and describe the different types of NMFs, and understand their function and how they interact with clause type. They identify iconic signs and discuss how these match their referents, such as COMPUTER-MOUSE. They understand how handshape and movement represent different things in each type of depicting sign (DS). They identify and categorise instances of signers using spatial modifications to signs and know that signs can be iconic in a number of ways. They analyse clauses to see where signers create composite utterances with elements of constructed action (CA), DSs, points and fully-lexical signs in the same utterance. They recognise that Auslan is constantly evolving and changing, for example, by identifying changes to Auslan that reflect changes in social relationships, community attitudes and changing technology. They understand that the most unifying factor of the Deaf community is the use of Auslan. Students reflect on how all ways of language use are influenced by communities' world views and identities, for example by comparing the cultural concept of Deaf identity with the medical model of deafness.

Years 9 and 10

The nature of the learners

This stage of learning coincides with social, physical and cognitive changes associated with adolescence. Increased cognitive maturity enables learners to work more deductively with language and culture systems, to apply more intentional learning strategies and to reflect productively on their learning. Motivation and engagement with language learning and use are influenced by peer-group dynamics, personal interests and values, and issues related to self-concept. The role of language is central to this process and is reflected in the degree to which learners define themselves as members of language communities, how they position themselves in relation to peer groups, and choices they make in relation to linguistic and social practices. These processes are fluid and context-responsive and impact on learners' engagement with Auslan and English language learning. Learners at this level are increasingly aware of the world beyond their own and are engaging with youth, social and environmental issues. They are considering their future pathways and choices, including how Auslan could be part of these. They require guidance in their learning, but are increasingly autonomous and capable of independent reflection and analysis, including of their intercultural experience of learning Auslan.

Auslan learning and use

Learners engage with a range of texts in Auslan. They participate individually and in groups in tasks and learning experiences, such as explaining or justifying positions, elaborating opinions, and giving and receiving multistep instructions. They create signed narratives and summarise and critically examine viewed texts. They participate in presentations, conversations, narration and interviews, sometimes with preparation and sometimes spontaneously. Learners acquire skills in analysing and translating increasingly complex texts.

Contexts of interaction

Learners interact with teachers and peers and members of the Deaf community in real-life situations or via online technologies. They may also encounter Auslan in the wider community, such as in the media, at film festivals or community events, or via interactions with guest speakers.

Texts and resources

Learners use a wide range of texts designed for language learning, such as teacher-generated materials and online resources, and their learning is enriched by exposure to a range of authentic texts from the Deaf community, such as websites, films or stories.

Features of Auslan use

Learners extend their grammatical knowledge and metalanguage while beginning to explore more nuanced features of Auslan. They use strategies to initiate and sustain conversations, using more elaborate sentence structures such as embedding clauses. They can identify and describe some metaphorical iconicity. They can create more detailed narratives with appropriate use of non-manual features (NMFs) to express characters and perspectives, understanding and using both character and observer space. They consider connections between language and culture, and make comparisons with their own language and culture. They consider language variation, for example through exposure to other dialects in the BANZSL family.

Level of support

While learners are increasingly autonomous during communicative interactions, continued support such as provision of rich language input and modelled language is needed to consolidate and sustain language development. The teacher provides implicit and explicit modelling and scaffolding in relation to meaningful language use in a range of contexts, situations and learning experiences, and explicit instruction and explanation in relation to complex structures, grammatical functions and abstract concepts and vocabulary. Provision of opportunities to discuss, clarify, rehearse and apply their knowledge is critical in consolidating knowledge and skills and developing autonomy. Learners are encouraged to self-monitor, for example, by keeping records of feedback, through peer support and self-review. They are increasingly aware of and responsible for their own learning, working independently to address their needs, for example by accessing technologies to memorise, learn and expand their language repertoire. They continue to access Signbank and use graphic organisers, modelled texts, dictionaries and teacher feedback to interpret and create texts. They keep records of their learning, for example through creating video journals or folios, using these to record and reflect on their language learning and intercultural experiences.

The role of English

Learners and teachers use Auslan as the primary medium of interaction in language-oriented and an increasing amount of content-oriented learning experiences. English provides a basis for linguistic and cultural comparison. English is also the medium used for expressing experiences, abstract ideas and personal views at a level beyond learners' Auslan capabilities, such as justifying a position on a social issue or exploring linguistic and cultural practices. English may be used with Auslan to conduct research projects, such as investigating social issues or cultural practices, when source materials in Auslan are unavailable. It is also used in translating, and in bilingual communication. Learners are supported to reflect on the different roles English and Auslan play in their academic work and in their conceptual development.

Years 9 and 10 Content Descriptions

Communicating	
Socialising	Elaborations

Interact with peers at school and contacts in the wider community to build relationships, engage in debate and to discuss aspirations or social issues

[Key concepts: discussion, relationship, aspiration, convention; Key processes: discussing, explaining, justifying, elaborating, contextualising]

(ACLASFC199)

- explaining or justifying positions in discussion or debate, for example, by using space and NMFs to contrast views
- elaborating on opinions in relation to social, community or educational matters, for example, exchanging views on a newspaper article about eugenics and deaf people
- using researched information to contribute to formal group interactions, for example, panel discussions on issues such as the roles and responsibilities of interpreters
- creating hypothetical situations to contextualise a discussion or debate, for example:
PRETEND PRO2 DEAF....
Pretend that you're deaf ...
I-F PRO2 BOSS WILL CHANGE WHAT?
What would you change if you were boss?
- communicating via video calls or social media platforms using Auslan in different online contexts to build relationships and share views
- using strategies to initiate and support discussion, for example by providing the context of a conversation to a new participant:
PRO3 SAY...
She was saying that ...

- demonstrating awareness of social sensitivities or conventions, for example by using euphemistic signs or allusions, such as TOILET, BIRTH
- using complex sentence structures to discuss current affairs or to justify a position in relation to issues of interest to their group, for example, gender equity, conservation or social media

Engage in activities that involve interactions, transactions, negotiations and management of different opinions and social/cultural behaviours

[Key concepts: perspective, culture, diversity, identity, action, transaction; Key processes: making choices, negotiating, planning, promoting, transacting]

(ACLASFC200)

- managing shared learning experiences that involve differences in opinion or cultural perspectives
 - navigating multistep directions and decisions in learning activities that offer alternatives or choices, such as computer programming or theatre production
 - negotiating hypothetical scenarios involving members of the Deaf community to highlight issues associated with diversity, culture and identity, for example, experience in domains such as education or sport
 - planning and promoting cultural events such as Deaf festivals or the National Week of Deaf People
 - planning action on an issue affecting the Deaf community, such as captioning and funding support for Deaf organisations
 - organising real or simulated transactions that involve financial or service exchanges, for example, catering for a class celebration or ordering books/digital resources for the school library
-

Interact with peers and others in and out of the classroom through reflection, discussion and participation in shared experiences

[Key concepts: ideas, action, effect, discussion, culture; Key processes: making connections, reflecting, elaborating]

(ACLASFC201)

- making connections between ideas, actions and effects, using reflective language such as:
SOMETIMES POSSIBLE HAPPEN++ WHY I-F PRO2
PAST THINK-ABOUT WILL TRUE HAPPEN
Sometimes things happen because you think they will, so it comes true.
CAR CRASH BECAUSE TEXTING.
The car crashed because he was texting.

▶ Auslan

- extending their repertoire of sign vocabulary through independent use of social media and digital resources to support more extended discussion
- demonstrating culturally appropriate behaviours such as nominating themselves as interpreters in role-play interactions between deaf and hearing friends
- demonstrating culturally appropriate behaviours when engaging with unfamiliar members of the Deaf community, for example, waiting to be introduced to new people, knowing how to introduce themselves as L2 Auslan learners
- identifying and comparing learning strategies that support their Auslan learning experience

Informing

Investigate, synthesise and evaluate information from a range of perspectives and signed sources, identifying how culture and context affect how information is presented

[Key concepts: perspective, culture, context, debate; Key processes: investigating, synthesising, evaluating, summarising]

(ACLASFC202)

Elaborations

- summarising key ideas/information provided by a guest speaker and identifying how context and culture shape opinions and perspectives
- reviewing signed texts about a social or cultural issue of relevance to their peer group, and creating questions to prompt evaluative responses from their peers
- finding information from a variety of signed sources to inform class discussions on issues of current debate within the Deaf community, such as the medical versus cultural view of deafness
- researching and comparing signed information about significant movements associated with deaf rights across different times and contexts, such as the Milan Congress and Deaf President Now
- identifying excerpts of signed documentaries or signed interviews or speeches that demonstrate how culture and context affect the presentation of information
- critically analysing information contained in different signed texts produced by or about the Deaf community, identifying examples of bias and distinguishing between fact and opinion
- researching information related to topical events or issues that affect the Deaf community, for example the provision of captions across different media

Contribute to presentations, reports, reviews, discussions and debates that focus on selected social and cultural issues
[Key concepts: social and cultural issues, influence; Key processes: creating, persuading, explaining, contributing]

(ACLASFC203)

- working in groups to create multimedia texts that invite consideration of social or cultural questions, such as the medical versus cultural view of deafness
- creating persuasive texts such as vlogs or advertisements to convince others of the value and relevance of learning Auslan
- creating a video report of a significant event in Deaf history, such as the ratification of the Convention on the Rights of Persons with Disabilities to contribute to an e-book resource for other learners of Auslan
- providing appropriate explanations for a younger audience of concepts associated with other curriculum areas, such as global warming or social justice
- contributing to discussions that consider critically different perspectives on selected issues, for example, differences in views on Deaf education or the influence of social media on their lives
- creating and presenting explanations about simple biological or mechanical phenomena or processes, such as how the ear, hearing aids and cochlear implants work
- presenting a critical review of media representation, for example by analysing media profiles of respected/high-profile members of the Deaf community
- presenting a summary of information on a selected topic, for example, by interpreting graphs and statistics relating to the Deaf community, discussing findings and making predictions about future changes or patterns

Creating

Elaborations

Respond to different types of imaginative and creative texts that invite consideration of values, themes and ideas and involve different modes of expression

[Key concepts: Deaf experience, expression, cultural values, effect, emotion; Key processes: analysing, evaluating, profiling]

(ACLASFC204)

- responding to forms of Deaf art that challenge perceptions and stimulate discussion, such as the work of Christine Sun Kim or members of the Australian Theatre of the Deaf
- searching the internet for examples of work by Deaf dancers, musicians or performers of physical theatre that they find particularly effective or moving, for example, performances by Bernard Bragg, Evelyn Glennie or members of the Deaf Arts Network
- comparing responses to creative texts that present personal or controversial points of view in powerful ways, for example, Deaf slam poetry
- exploring the use of technology in Deaf art, film or performance, for example to help build mood or emotional expression
- responding to signed poems that use extended metaphor to communicate values and ideas or to express emotional experience, for example, 'Butterfly Hands' by Walter Kadiki
- reflecting on reactions of hearing audiences to deaf performances, for example by evaluating comments made by judges on reality/talent television shows
- discussing the complexity of live theatre performance interpretation and the use of deaf interpreters and consultants
- responding to animations created by or about deaf people and discussing the effectiveness of conveying all parameters of signing, for example, *The Long Knife*, or *Gallaudet: The Film* by Braam Jordaan

Creating a variety of imaginative and expressive texts that draw from elements of their own life experience or of their experience as Auslan learners

[Key concepts: improvisation, stimulus, performance, humour, tension, interpretation; Key processes: improvising, performing, role-playing, creating, interpreting]

(ACLASFC205)

- creating a piece of art such as a sculpture, collage or film clip that reflects their experience of moving between Deaf and hearing worlds
- creating a website to showcase performances that incorporate elements such as comedy, satire or drama
- creating a short film in Auslan using and explaining video techniques that are particularly appropriate for a Deaf audience
- creating a signed interpretation of a wordless animation
- selecting a signed narrative text that has an extended metaphor and reworking it to take the story in a different direction
- creating a signed poem that reflects elements of their own emotional response to particular personal experience

Translating

Elaborations

Consider the dynamic nature of translating and interpreting and the role of culture when transferring meaning from one language to another

[Key concepts: equivalence, representation, meaning, interpretation, ethics, culture; Key processes: translating, interpreting, comparing, explaining, analysing]

(ACLASFC206)

- experimenting with literal Auslan translations of popular English idioms, noticing when this creates confusion (for example, 'raining cats and dogs') and recognising the nature and function of cultural elements of communication and their impact on language use
- comparing different translations of online Auslan and English public announcements or government policy/information texts in terms of approaches to translation, for example, free versus literal translation
- using different resources, including online dictionaries and footage, to assist in translation, for example by comparing individual translations, back-translations and reviewing useful references
- viewing and discussing the quality of online Auslan translations, such as the *Catching Fire* series of safety videos
- recognising the need to sometimes recast language, and considering why one language may use more words/signs than another to communicate a particular meaning or concept, for example, Auslan uses spatial concepts or depicting signs to describe the scene of a car crash, which will take longer to explicate in a linear spoken language
- translating small chunks of unfamiliar English text such as a news update from an autocue or poster card into Auslan in consecutive mode
- providing annotated examples of translations of poems or other text types, identifying challenges involved in transferring meaning, expression, culture or mood
- translating songs, poems or short stories from English into Auslan, for example, 'I Am Australian'
- exploring the role and function of Deaf interpreters and differences between Deaf interpreters and Auslan–English interpreters
- researching aspects of available interpreting services in the area, for example, qualifications required for employment, ethical considerations, and issues of interpreting and translating in specialised contexts such as health, education, legal settings
- developing guidelines on culturally appropriate and ethical behaviour when interpreting and translating, for example explaining ways people should act in interpreting contexts, considering potential consequences of inaccurate interpreting
- role-playing interpreting in a range of contexts, for example, in a shop or at a sports match
- participating in an excursion to an interpreted theatre event, with prior knowledge of the text/story and attending to the interpretation for discussion later in class

Create glossaries and classifications in English to interpret cultural aspects of Auslan texts

[Key concepts: bilingualism, interpretation; Key processes: recording, creating, captioning]

(ACLASFC207)

- collecting and explaining to non-Auslan users expressions and culturally specific terms encountered in Auslan texts, for example, 'hearing', 'residential school'
- creating collaborative translations of Auslan texts in spoken English or captions of selected signed texts and vice versa
- collecting and recording various Auslan phrases and expressions used by native Deaf signers, attaching English captions with appropriate translations, for example, pah! = *finally*, talk = *communicate in speech or Auslan*, chat = *talk in Auslan*
- creating a bilingual virtual tour of the school for use on a school website
- developing a signed and captioned film presentation about the role of interpreters in school

Identity

Elaborations

Recognise the complex and multifaceted nature of identity and how exploration of cultural identity in relation to a different language can provide insights and different perspectives to a first culture and language

[Key concepts: identity, gender, culture, perspective, difference, representation; Key processes: analysing, reflecting, viewing, evaluating, comparing, describing, discussing, creating]

(ACLASFC208)

- using photographs or digital images to create stories using elements of identity such as gender, ethnicity, social justice, disability or difference
- reflecting on a range of filmed texts to identify examples of inclusive or exclusionary language that might impact on a person's sense of identity, for example, the representation of deaf teenagers in the TV program *Switched at Birth* or the documentaries *Welcome 2 My Deaf World* or *Deaf Teens: Hearing World*, comparing these representations to their own experiences as teenagers
- viewing and evaluating documentaries such as *Audism Unveiled* or commentaries by well-known members of the Deaf community on their sense of identity development in relation to growing up deaf, considering the impact of additional factors in individual stories, such as gender or race
- creating vlogs or filmed texts to explore aspects of Deaf/hearing identity and to encourage consideration of common views among hearing communities on Auslan and the Deaf community and to reflect on what it means to be deaf, hard of hearing or hearing
- viewing signed news and other media texts, such as episodes of *See Hear* or *SignPost*, to identify examples of discrimination, oppression or rejection experienced by deaf people, and considering how these may shape identity or affect societal perceptions of the Deaf community
- surveying deaf people about their perspectives on the significance of Deaf places that contribute to a shared sense of identity, for example, the Deaf Club, Deaf schools or sites of historic significance such as original Deaf Society/Mission buildings or other former meeting places
- making comparisons between different international Deaf communities in relation to perceptions/representations of Deaf identity and changing values of place and space, for example, the loss of Deaf clubs or closure of deaf schools, considering the implications of such changes on the development of Deaf identity
- analysing notions of 'Deaf gain', Deafhood and audism, and sharing their response to these concepts as second language learners of Auslan

Reflecting

Elaborations

Reflect on the experience of learning and using Auslan, considering how intercultural communication involves shared responsibility for making meaning

[Key concepts: intercultural communication, perspective, insight, self-reflection, making meaning, discrimination, audism; Key processes: comparing, analysing, explaining, reflecting]

(ACLASFC209)

- reflecting on how learning Auslan provides a distinctive and additional means of understanding the world in which they live
- reflecting on the relationship that exists between language, culture and issues of access, identity and audism, and considering issues of discrimination, inclusion and exclusion
- keeping a journal of their experiences (humorous, satisfying or challenging) associated with learning and using Auslan in different contexts, noting changes in their responses and reflections over time, and comparing insights gained into their own languages and cultures
- considering the layers of complexity and depth that characterise the Deaf community experience, for example in relation to implicit hierarchical structures such as deaf members of deaf families
- sharing and comparing cultural and intercultural experiences and capabilities in different languages including Auslan, and exchanging views on benefits associated with using more than one language, such as a larger repertoire of communication skills and strategies, additional insights and perspectives and opportunities for new experiences
- reflecting on the experience of communicating in a visual world and on challenges they have experienced in relying on visual cues
- considering how intercultural communication is a two-way process which involves shared responsibility for meaning-making and ensuring understanding

Understanding

Systems of language

Elaborations

Understand the perceptual and articulatory reasons for the structure of signs, consider limitations of glossing and explore how video annotation software can improve transcription

[Key concepts: iconicity, metaphor, annotation; Key processes: noticing, recognising, distinguishing, glossing, transcribing, annotating, analysing]

(ACLASFU210)

- noticing limitations on perception of signed languages, such as the more limited space for signed communication compared to space for mime
- exploring perceptual and articulatory reasons why some handshapes are more common than others
- understanding that the elements of a sign can be arbitrary (for example, the handshape or movement of the sign WHY) or meaningful, such as the movement and the handshape in the sign GIVE
- beginning to identify and describe metaphorical iconicity, for example, LOVE, AVOID/RESIST, and discussing how it relates to metaphors in English, for example the 'time as space' metaphor in both languages
- applying knowledge of iconicity in signed languages, for example how the path movement of a verb can be a metaphor for the timing of an action, for example PRO1 WAIT_{-for-a-long-time} PRO2, observing that English can do the same with changes to the length of phonemes, for example, / *screeeeeeaaaaamed!*
- evaluating video annotation software such as ELAN as a tool to assist in the transcription and analysis of signed languages
- glossing a text, including identifying which signs are used, and transcribing DSs and periods of CA

Understand and use signing space, including making distinctions between character and observer space for constructing different types of texts

[Key concepts: character and observer space, depicting signs, constructed action; Key processes: contrasting, analysing]

(ACLASFU211)

- recognising that signers can set up referents in the signing space as if they are part of that space (character space, for example, using a bC handshape (use of non-dominant hand) to indicate putting a glass on a table) or as if they are outside it (observer, for example, using 5claw in two locations to represent two houses)
 - appreciating the possible production of reciprocal forms of some indicating signs, such as LOOK, GIVE, INVITE
 - independently identifying instances of DSs and their type
 - analysing a video of a signed narrative and identifying where and how signers are using CA, for example by eye gaze change
-

Understand and describe complex grammatical structures combining depicting signs, constructed action and various clauses for a range of language functions, such as interaction, narration or description

[Key concepts: clause structure, clause conjunctions, reference; Key processes: applying, noticing]

(ACLASFU212)

- recognising signs that function as interjections or discourse markers
- understanding the difference between definite and indefinite reference and how Auslan shows this distinction
- noticing how to use modal verbs and NMFs to express possibility, obligation and ability (MIGHT, SHOULD)
- recognising that conditional forms have a main and dependent clause and associated NMFs
- identifying coordinated clauses showing causation and describing how it is shown, for example:
PRO3 STUDY_{-hard} BECAUSE WANT EXAM MARKS GOOD
- recognising how emphasis in sentences can be changed by reordering clauses or parts of clauses
- recognising that the presence of CA or DSs affects how a clause is structured

Explore the relationship between particular text types, audience, purpose and context and analyse language features used by signers to create cohesion and achieve the purpose of the text

[Key concepts: audience, choice, conventions, cohesion; Key process: analysing, identifying, explaining]

(ACLASFU213)

- analysing specific types of text by identifying characteristic language features
- analysing a videoed class debate to see how language is used to justify opinions and persuade others
- conducting an in-depth analysis of a selected sign text, taking into account audience, purpose and topic to explain language choices made by the signer
- noticing how grammatical choices can shade meaning, determine perspective and establish relationship, for example the effect of choosing to be more or less English-like
- expanding understanding of textual conventions, for example by explaining why signers choose alternatives to actor-verb-undergoer in a real text to topicalise an important point
- noticing how signers can compare or contrast ideas by locating things in the same or opposing sides of signing space
- analysing the ways in which Auslan uses NMFs to link clauses and achieve textual cohesion

Language variation and change

Elaborations

Investigate and analyse the nature of and community attitudes to variation in the use of Auslan

[Key concepts: standardisation, contact, evolution, flexibility, variability; Key processes: recognising, investigating, researching, analysing, considering]

(ACLASFU214)

- recognising that there is a greater degree of flexibility and variability in 'oral', face-to-face languages such as Auslan compared to spoken/written languages passed on from parents to children, for example, less standardisation and minimal 'frozen texts', and considering reasons for such differences
- researching different aspects of variation in the use of Auslan, considering influences such as geographical location, social groupings, history, educational experience, age of learning, family background and contact with Signed English or other languages
- debating the merits and disadvantages of creating a standard form of Auslan, for example the benefits of mutual comprehensibility versus the practical problems involved in who decides on the standard and how to get signers to comply
- considering the effect that expanding sign language interpreter services might have on standardising Auslan, especially in the areas of education and medicine.
- noticing ways people might adapt language according to situation of use, such as when signing to a large audience, the use of one hand or two, clarity of sign production, size of signing space, pace, NMFs, pauses and amount of fingerspelling
- considering how Auslan has been influenced by the use of Signed English in education settings (especially from the 1970s to 1990s) and cultural attitudes towards Signed English

Language awareness

Elaborations

Investigate and compare the nature and status of Auslan and other signed languages, considering issues such as language and education policies, language rights, representation and processes of language preservation and language building

[Key concepts: policy, rights, representation, status, expansion; Key processes: researching, comparing, investigating, analysing, explaining]

(ACLASFU215)

- identifying historical events, government policies and educational initiatives that have impacted on the status of Auslan and the identity of the Deaf community, such as ALLP, DDA, the mainstreaming of deaf students
- researching the nature of International Sign, including its relationship to national signed languages and its use by deaf people
- exploring how deaf people around the world build shared group identity, for example through gathering formally as national and international communities through activities such as Deaf film festivals, performing arts or sporting events such as Deaf Way, Australian Deaf Games, Deaflympics, and how these contribute to language building, language preservation and greater awareness of signed languages
- analysing subjective measures of language vitality, such as societal attitudes towards Auslan or the perceived strength of the language identity group, and identifying challenges facing Auslan in terms of societal attitudes, provision of resources, access, education systems and social networks
- analysing the status and use of Aboriginal and Torres Strait Islander signed languages and comparing these to Auslan
- appreciating the impact of the use of Auslan in settings such as education, health care and different workplace settings in terms of the evolution of the language and specialised terminology
- analysing representations of deaf people and sign language in the Australian media and wider community, making comparisons with representations of other languages and cultures
- exploring the role of the Deaf ecosystem in language and cultural maintenance
- investigating how Auslan and Deaf culture are promoted in the wider community, for example, through the influence of organisations such as Deaf Australia, of high-profile individuals such as activists or actors and of events such as NWDP Deaf Festival, Australian Deaf Games or Deaf art exhibitions
- considering how processes of language building and evolution may expand existing Auslan linguistic and cultural resources in the Australian community
- investigating programs and initiatives that maintain and strengthen Auslan use, such as school language programs; bilingual education and research programs; recording, archiving and documentation of the language; and the establishment of websites and databases
- appreciating the importance of documenting and promoting Auslan in raising community awareness of the richness and value of signed languages
- recognising that Auslan requires maintenance, development and documentation, considering historical and contemporary circumstances which have either contributed to or impeded these processes, for example the use of technology such as ELAN for capturing and

documenting the language

- considering domains where Auslan may grow in the future, and contributing to localised Auslan signbanks on specific topics, for example, creating a bank/dictionary of signs used by deaf students and interpreters in Year 9 Science
- researching the status and recognition of signed languages in other countries, for example, New Zealand, the USA, the UK, the Scandinavian nations, considering issues such as language rights, documentation and development efforts
- identifying the changing status of sites of significance in different international Deaf communities, for example, the loss of Deaf clubs or closure of deaf schools in some countries, comparing this to the Australian context, and reflecting on the implications of these changes over time for the Deaf community and for the status of Auslan
- recognising different philosophical and social views about deafness, considering the impact of varying attitudes on a deaf person's understanding of their rights and how they are represented and perceived in wider society
- explaining the influence of other signed languages such as BSL, ISL and ASL on Auslan over different periods of time and in different domains of language use, and discussing reasons for such influence
- looking at style shifts in domains where English is in closer contact with Auslan, such as the use of more English-like structures in educational settings
- discussing the concept of 'language health' and how it applies to Auslan, for example by designing a chart of relevant factors such as status (social, economic, historical), demography (number and distribution of users) and institutional support (media, government, education, religion, industry, culture)

Role of language and culture

Elaborations

Understand that Auslan and Deaf culture are interrelated, that they shape and are shaped by each other and that their relationship changes over time and across contexts

[Key concepts: knowledge, value, transmission; Key processes: reflecting, exploring, analysing, comparing]

(ACLASFU216)

- analysing language used in pathological and sociocultural models of deafness, and the impact that each model, the philosophy that frames it and the language used to express it may have in regard to services for deaf people
- appreciating the complexity of the relationship between language and culture, for example by discussing distinctions between Deaf cultures and other cultural minorities, such as the fact that most deaf people are born to hearing parents and typically access and experience Deaf culture through communicating with peers and other Auslan users in and out of school, in addition to their cultural experience in their families of origin
- recognising the cultural significance of symbols and language features used in Auslan, for example the use of *light* and *darkness* in stories, poetry and performance, as in stories featuring gaslight
- considering cultural explanations for conversational strategies used by Auslan signers to avoid conflict and to maintain privacy, such as changing signing space and style, using indirect language such as signing lower or under the table, or fingerspelling instead of signing overtly
- understanding that Auslan plays an important role in the expression and maintenance of Deaf culture, that each deaf person has the right to learn and use Auslan as part of their birthright, along with their membership of the Deaf community, and that they become custodians and owners of the language
- appreciating the cultural value and importance of festivals and events in the Deaf community, such as NWDP, as celebrations of language, history, culture and identity
- understanding that sign language literatures recount significant journeys and events associated with the beginnings of Deaf education and the development of Deaf communities, and that they embody history and values of Deaf culture, for example, the Gallaudet and Clerc meeting or US Civil War stories that validate and reference shared Deaf identity, culture, language and experience
- recognising that Auslan signs change over time due to shifting cultural values and experiences, for example, the modification of the sign for APPRENTICE to refer to TAFE, and shifting values around the sign DEAF^DEAF as the sign for DEAF (culturally Deaf reference for deaf-mute) and unsuccessful attempts to reframe this with an audiological focus

Years 9 and 10 Achievement Standard

By the end of Year 10, students use Auslan to build relationships and to initiate, sustain and extend interactions with teachers, peers and contacts in the wider community. They engage in debate and discuss aspirations and social issues, explaining and justifying positions and elaborating opinions using expressions such as NEVER THOUGHT YEAH-RIGHT. Students use strategies to support discussion, such as self-correction, rephrasing or elaborating if not understood. They use smooth and fluent fingerspelling. They use spontaneous language to participate in activities and learning experiences that involve collaborating, planning, organising, negotiating and taking action. They use modal verbs and non-manual features (NMFs) to express possibility, obligation and ability, such as PRO1 MAYBE SEE THAT MOVIE or PRETEND PRO2 DEAF.... Students use culturally appropriate norms, skills and protocols when engaging with and learning from Deaf people and the Deaf community, for example, waiting to be introduced to new people and knowing how to introduce themselves as second language Auslan learners. They analyse, synthesise and evaluate information from a range of signed sources, summarising key ideas and specified points of information. They predict the meaning of unfamiliar signs and expressions from context and their knowledge of depicting conventions. They compare responses to creative texts such as Deaf poetry, Deaf art and signed narratives. Students demonstrate understanding of Auslan and Deaf culture, for example by preparing and delivering presentations or signed narratives on social and cultural issues, community initiatives and lifestyles. They build cohesion and complexity in texts by using fully-lexical connectives such as IF, THEN and/or NMFs to link clauses. They use constructed action (CA) to show different points of view. Students demonstrate culturally appropriate and ethical behaviour when interpreting and translating texts and consider potential consequences of inaccurate interpreting. They describe how they feel and behave when communicating in a visual world, for example by discussing how the experience fits with their sense of self. They reflect on the role of Auslan in connecting and building Deaf identity.

Students recognise and explain different ways that signers represent signing space, such as character or observer space. They understand and use depicting signs and CA in complex ways to create composite utterances. They investigate variation in the use of Auslan, explaining influences such as geographical location, social groupings and history, educational experience, the age of learners, family background and degree of contact with Signed English or other languages. They make comparisons between the ecologies of Auslan and those of signed languages in other countries, taking account of issues such as languages policy and rights, advocacy, language reform and language vitality. They identify factors that help to maintain and strengthen the use of Auslan, such as intergenerational contact and bilingual school programs. Students know that Auslan plays an important role in the expression and maintenance of Deaf culture and in assuring the rights of every deaf person.

The Australian Curriculum Languages - Auslan Second Language Learner Pathway - Years 7–10 (Year 7 Entry) Sequence

Years 7 and 8

The nature of the learners

Learners are beginning their study of Auslan and typically have had little prior exposure to the language or to the Deaf community. Many will have learnt an additional language in primary school, and some have proficiency in different home languages, and consequently bring existing language learning strategies and intercultural awareness to the new experience of learning Auslan.

Skills in analysing, comparing and reflecting on language and culture in both English and Auslan are mutually supportive. The transition to secondary schooling involves social and academic demands that coincide with a period of maturational and physical change. Learners are adjusting to a new school culture with sharper divisions between curriculum areas. They may need encouragement to take risks in learning a new language at this stage of social development; and to consider how the experience impacts on the sense of 'norms' associated with their first language and culture.

Auslan learning and use

Learners are encouraged to watch and sign Auslan in a range of interactions with the teacher and with each other. They use the language for interactions and transactions, for practising language forms, for developing cultural knowledge and for intercultural exchange. Rich and varied language input characterises this first level of learning, supported by the use of gestures, vocal and facial expression and concrete materials. Learners respond with a mix of Auslan and conventional and unconventional gestures and fingerspelling, as they use all available resources to make meaning and to express themselves.

Learners in this band engage in a range of activities in Auslan and share ideas about the language. They use well-known phrases in Auslan to participate in classroom routines, presentations and structured conversations with their teacher and their peers.

They build vocabulary for thinking and talking about school and personal topics. Language used in routine activities is re-used and reinforced from lesson to lesson in different situations, making connections between what has been learnt and what is to be learnt. Learners follow instructions, watch stories and participate in creating short texts on topics relevant to their interests and enjoyment, such as family, friends, favourite activities or food. They recount experiences, interact with visitors, follow directions, negotiate roles in a group and retell important information.

As they adjust language use to suit different purposes, contexts and situations, learners notice how culture shapes language. They work collaboratively and independently. They focus on the different systems that structure language use, such as sign modification, clause and text structure, and vocabulary, and reflect on their experience as Auslan learners and users. They gradually build a vocabulary and grammatical base that allows them to compose and present different kinds of simple texts.

Contexts of interaction

The Auslan classroom and interactions with deaf peers or adults in their school or local environment are the primary contexts for language and culture experiences. Learners also have some access to the wider Deaf community and to various resources through virtual and digital technology. The familiarity and routine dimension of the classroom context provide scaffolding and opportunities for language practice and experimentation. Language development and use are incorporated into structured collaborative and interactive learning experiences, games and activities.

Texts and resources

Learners work with a range of published texts designed for language learning, such as videos or websites, as well as teacher-generated materials. Authentic texts from different sources provide opportunities for discussion and analysis of the relationship between communication and culture. Learners become familiar with ways of recording Auslan, through either film, photos of signs, line drawings of signs or simple symbols.

Features of Auslan use

Learners in Years 7 and 8 are able to produce all handshapes, movements and locations of single signs. They can independently produce simple positive and negative statements with some time marking, and use plain verbs, indicating verbs modified for present referents and simple and familiar depicting verbs. They describe familiar objects, animals or people using lexical adjectives and some SASS depicting signs. They depict the movement of people, animals and means of transport, using an appropriate classifier handshape in a depicting sign. They explore the expression of emotions through NMFs, and begin to use NMFs for grammatical purposes in modelled language. They use simple constructed action and handling depicting signs to show the characteristics and actions of an animal or a person. They learn that verbs can be modified spatially to express relationships with participants, and that space is used meaningfully in Auslan.

As learners learn to adjust their language to suit different purposes and situations, they begin to understand how culture shapes language use. They compare how they feel when they use different languages and how they view different languages and people who use them. This introduction to the meta dimension of intercultural learning develops the ability to 'decentre', to consider different perspectives and ways of being and to become aware of themselves as communicators and cultural participants.

Level of support

Learning at this level is supported by rich and varied language input and by the provision of experiences that are challenging but achievable. Support includes scaffolding, modelling and monitoring; frequent revision; and explicit instruction, description, and comparison of Auslan and English. Teachers model language use and examples of texts, and provide feedback and review student work to support the interactive process of learning. Learning experiences incorporate implicit and explicit form-focused language learning activities and examples of texts and tasks. Learners are given support and opportunities to practise using dictionaries, especially Signbank, and to access word charts, vocabulary lists and examples when translating and creating texts. Support is also provided through visual and tactile materials, such as pictures, objects and charts, and through the use of conventional gestures. Learners rely on modelled language and scaffolded tasks to create their own texts, for example, choosing signs to complete sentences or using pictures to sequence a story that has been told to them.

The role of English

Learners are encouraged to use Auslan whenever possible, with the teacher providing rich and supported language input. Auslan is used for classroom routines and language learning tasks and may be used as the language of instruction for learning content of other learning areas. The language of response varies according to task demands, with Auslan used primarily for communicating in structured and supported tasks.

English is used as a medium of instruction and for explanation and discussion, or in areas from the Understanding strand. This allows learners to talk about differences and similarities they notice between Auslan and their first language(s) and culture(s), to ask questions about language and culture, to consider how they feel when they see or use Auslan and how they view different languages and the people who speak them. This introduction to the meta dimension of intercultural learning develops the ability to consider different perspectives and ways of being. English may also be used to research cultural issues where the source text is not available in Auslan.

Years 7 and 8 Content Descriptions

Communicating

Socialising

Interact with peers and teachers to exchange information about self, family, friends and interests and to express feelings and preferences

[Key concepts: self, family, friends, interests, preferences, feelings; Key processes: interacting, describing, comparing, stating, explaining]

(ACLASFC217)

Elaborations

- exchanging greetings, wishes, thanks and apologies, adjusting language to suit the situation, for example:
HOW-ARE-YOU? SEE LATER, GOOD-LUCK, THANKS, SORRY INTERRUPT
- describing and comparing people and objects using SASS depicting signs, for example:
POSS1 MATH TEACHER TALL DS:long-wavy-hair
My maths teacher has long wavy hair.
SCHOOL UNIFORM HAVE DS:long-thin-tie
The school uniform has a long thin tie.
- comparing routines, interests and leisure activities, using, for example, adverbial phrases of time, frequency and place, such as:
REGULAR SUMMER PRO1-plural GROUP-MOVE-TO BEACH STAY++ THREE WEEK.
We go to the beach for three weeks in summer.
WEEKEND PRO1 GO-TO-AND-BACK++ CAMP
I go camping on weekends.

- stating likes, dislikes and preferences using associated NMFs, for example:
PRO1 LIKE WATERMELON. DON'T-LIKE ORANGE
I like watermelon; I don't like oranges.
ART MUSIC? RATHER ART
I prefer art to music.
- introducing themselves and their family members and explaining relationships using personal and possessive pronouns, for example:
HAVE ONE SISTER ONE BROTHER
I have a brother and a sister.
THAT BABY HER SISTER
That baby is her sister.
- asking and responding to questions about a familiar topic, such as a shared school experience, for example:
PRO2 LIKE AUSLAN?
Do you like Auslan?
PRO2, SUBJECT WHAT STUDY WHAT?
And you, what subjects do you study?
SCHOOL LIKE YOU?
Do you like school?

Collaborate with peers to plan and conduct shared events or activities such as presentations, demonstrations or transactions

[Key concepts: participation, collaboration, negotiation; Key processes: participating, organising, reviewing, transacting]

(ACLASFC218)

- participating in games and activities such as enacting scenarios involving being lost and asking for or giving directions
 - following and giving instructions in groups on topics such as how to use video chat, Signbank or Auslan dictionaries
 - working collaboratively on learning activities that involve organising, negotiating and prioritising tasks, for example, in devising an activity or game for the class
 - working collaboratively on tasks that involve assigning and reviewing roles and responsibilities, offering feedback, support and encouragement, for example:
PRO2 TYPE PRO1 WRITE
You type and I'll write.
GOOD TYPING_{-hard} WORK_{-hard}
Great typing up; looks like lots of work.
G:FLOP-HAND DOESN'T MATTER NOT WORRY
Oh, it doesn't matter, don't worry about it.
 - giving, accepting or declining invitations, including making excuses to avoid causing offence or embarrassment, such as:
SORRY PRO1 STUCK, BASKETBALL TRAINING
Sorry, I can't go because I have basketball training.
 - participating in hypothetical scenarios that involve transactions, for example, preparing for or participating in a Deaf World workshop
-

Communicate appropriately and clearly with the teaching team and peers using appropriate Auslan protocols for classroom interaction

[Key concepts: protocol, attention, instruction; Key processes: responding, gaining attention, back-channelling, agreeing/disagreeing]

(ACLASFC219)

- following classroom protocols specific to an Auslan context, such as:
 - responding to flashing lights and waving for class attention
 - tapping, pointing and waving for peer attention
 - maintaining eye gaze
 - back-channelling such as nodding
 - limiting the use of voice
 - maintaining a clear line of sight
- following and using classroom language such as instructions for class routines, for example:
PLAY GAME. PLEASE STAND UP
We're going to play a game; please stand up.
LOOK-AT_{me} PRO1
Eyes to the front.
PLEASE WITH-2++
Please find a partner.
- using language to facilitate clear communication, such as asking for help or permission, for example:
PLEASE HELP_{me}?
Can you help me, please?
G:HANDS-UP PLEASE PRO1 NEED TOILET
Can I go to the toilet please?
- showing agreement/disagreement, for example, respectful manner, for example:
AGREE YES or PRO1 AGREE
Yes, I agree.
PRO1 KNOW WHAT MEAN, BUT...
I know what you mean, but ...
DOUBT
I'm not sure.
AGREE-NOT
I don't agree ...
- indicating understanding, for example by nodding, or signing SURPRISE, or KNOW++
- apologising and thanking, for example:
THANK-YOU HELP_{me}
Thank you for helping me.
SORRY PRO1 FORGOT
I'm sorry; it was an accident.
- asking for repetition or clarification, for example:
PLEASE SLOW SIGN
Could you sign that slowly please?
PRO2 SAY BEFORE WHAT?
What did you just say, sorry?
- negotiating turn-taking, for example:
PRO1 FIRST YOUR-TURN
It's my turn first, then your turn.

Informing

Elaborations

Identify gist and some points of factual information from a range of signed texts about familiar topics and use the information in new ways

[Key concepts: information, data, summary, procedure; Key processes: gathering information, summarising, sequencing, identifying]

(ACLASFC220)

- gathering information from their peers in relation to their interests and preferences or home and school routines and summarising findings in formats such as tables or graphs
- observing informative signed texts such as weather reports or simple public announcements about events and celebrations, identifying key points of information to exchange with a partner in a barrier/information-gap game
- collecting information from signed texts about people, time or activities and using the information in new ways, for example, by creating a timeline, diary or timetable to show a sequence of activities
- viewing and following procedural signed texts such as cooking demonstrations or craft activities
- watching/viewing a signed text and identifying specific points of information such as locations, for example, by labelling key locations on a school map
- viewing and responding appropriately to simple class and school announcements and directions
- watching short Auslan texts about topics such as hobbies or sports, and recording key points of information using tables or graphic organisers
- paraphrasing content of selected community texts, such as public service or promotional announcements on the Deaf Emergency Info website

Present and explain factual information about a range of topics of interest

[Key concepts: routine, report, explanation, procedure; Key processes: describing, reporting, signing, instructing]

(ACLASFC221)

- describing in the correct sequence home and school routines such as weekend activities or their school timetable
 - reporting to the class about a shared school event, such as Deaf Sports Day or a school camp
 - creating signed texts to explain a hobby or interest, using visual supports such as photos or props
 - presenting descriptions of items of school equipment such as those used in woodwork, science or sports, and giving simple signed explanations of how they work
 - instructing the class in a procedural text such as a simple recipe or instruction guide, using list buoys
 - sharing selected points of information from their home or local community, such as family traditions or cultural events, conveying key points of information from visual infographics or diagrams
 - working in groups to create an informative video or display about their school
 - assembling an information pack about their school to support newly arrived deaf students, including a signed glossary of key people and places and simple directions to navigate the school
 - explaining a favourite game that can be played in Auslan or English, highlighting key Auslan terms and supporting information with pictures, gestures and demonstrations
-

Creating	Elaborations
<p>Engage with different types of creative texts, identifying and discussing ideas, characters, events and personal responses [Key concepts: imagination, play, character, performance, visual text, representation; Key processes: viewing, responding, participating, comparing, shadowing, mimicking]</p> <p>(ACLASFC222)</p> 	<ul style="list-style-type: none"> participating in Auslan games and activities using simple clauses in creative ways, for example, 'Sign Circle', or passing on a sign shape, for example a rectangle is signed as a door then by the next person as a jewellery box and the next person as a computer keyboard, and so on viewing creative Auslan stories, poems and theatre performances and identifying ideas, characters and events, for example, by accessing Auslan Storybooks, and work by the Australian Theatre of the Deaf viewing and responding to creative visual texts such as handshape art and art produced by and about Deaf people, Deaf culture or signed languages, for example, paintings by Nancy Rourke and animations by Braam Jordaan comparing different versions of imaginative signed texts and indicating which they prefer, for example, different Auslan versions of 'The Timber Joke', or fairytales viewing and comparing personal responses to representations of deaf people in different creative texts, performative or entertainment texts, for example, reality television shows with deaf contestants or participants responding to signed poems and 'visual vernacular' descriptions of a character's appearance by shadowing, mimicking and drawing, for example, work by Frédéric Vaghi responding to performances of Deaf poetry that evoke emotions such as sadness, fear or excitement, for example by indicating enjoyment or different personal feelings
<p>Express imaginative ideas and visual thinking through the use of familiar modelled signs, mime, gestures, drawing and visual supports, with a focus on emotions, appearance and actions [Key concepts: game, animation, creativity, emotion; Key processes: depicting, collaborating, creating, re-enacting, reinterpreting]</p> <p>(ACLASFC223)</p> 	<ul style="list-style-type: none"> participating in games and imaginative activities that involve representation of the appearance, characteristics and relationships between different people, animals or objects working collaboratively to create and present signed skits or poems to entertain younger learners re-enacting short stories or wordless animations that include two characters and their interactions through the use of constructed action reinterpreting creative texts for specific effect, for example by changing emotions or movements through the use of NMFs and manner using 'visual vernacular' to create and enact a short scenario about an imaginary character and a particular object, using SASS, entity and handling depicting signs and constructed action creating amusing sequences of signs using a fixed handshape, such as the index finger 'point': PRO2 THINK PRO1 SHY? <i>Do you think I'm shy?</i> 

Translating	Elaborations
<p>Translate and interpret short texts from Auslan to English and vice versa, noticing which concepts translate easily and which do not</p> <p>[Key concepts: equivalence, meaning, interpretation, translation; Key processes: translating, interpreting, identifying, comparing, paraphrasing, summarising]</p> <p>(ACLASFC224)</p> 	<ul style="list-style-type: none"> recognising that every language uses words or signs to make meaning identifying aspects of Auslan which are the same in English, such as the fingerspelled alphabet identifying and comparing key signs and words in Auslan and English versions of familiar texts such as short stories or fairytales on the Auslan Storybooks website, noticing how signs can convey rich, multilayered meaning which might not have a direct match in English shadowing a story in Auslan as a pre-interpreting skill, noticing which phrases and concepts need more unpacking demonstrating the use of Signbank, for example by using it to look up various meanings of the word 'run', comparing variations in signs for the concept in different contexts, and using it to translate Auslan into English and vice versa translating simple filmed texts in Auslan into written English captions sight translating short English texts such as news articles or short speeches into Auslan for review by their peers considering the bimodal nature of Auslan–English interpreting and discussing the possibility of consecutive and simultaneous interpreting of information in communicative exchanges
<p>Create bilingual texts and learning resources to use in the classroom</p> <p>[Key concepts: translation, meaning, transcription, bilingualism; Key processes: translating, captioning, recording, creating]</p> <p>(ACLASFC225)</p> 	<ul style="list-style-type: none"> creating English captions for short recorded phrases in Auslan creating digital glossaries of new sign vocabulary, which can be used to share their personal learning with family members recording and transcribing into English some simple Auslan 'identity stories' filmed with members of the Deaf community captioning examples of classmates' work in Auslan, for example, simple short stories creating translations of song lyrics for performance in Auslan translating short, simple written or spoken texts into Auslan, for example, instructions for a game or procedures such as recipes
Identity	Elaborations

Demonstrate understanding of the nature of identity in relation to themselves, the Deaf community and the wider hearing community

[Key concepts: identity, community, similarity, difference; Key processes: comparing, identifying, viewing, exploring, discussing, surveying, analysing]

(ACLASFC226)

- using visual representations such as concept maps, posters or captioned slide presentations to identify groups that they each identify with, for example, friends, family, sporting, interest and community groups, discussing how these group associations contribute to their sense of identity
- discussing how their upbringing and personal experience impact on assumptions or attitudes that they bring to interactions with people who have different backgrounds or experiences, considering concepts such as communication, personality, family and community
- noticing and comparing their own and each other's ways of communicating and interacting, identifying elements that reflect cultural differences or influences of other languages
- viewing a series of Auslan identity stories, such as those found in the Griffith University *Introduction to Deaf Studies Unit 1* set, comparing their experiences to those described by deaf children and adults in the footage
- investigating the identity of deafblind people and their connection to the Deaf community by inviting deafblind guests into the classroom to share their personal journeys
- exploring ideas about identity through journal writing, documenting challenges and rewards related to second language learning and identity change
- analysing ways in which Deaf people design and adapt spaces in cultural ways ('Deaf space'), for example, by eliminating visual obstacles to signed communication, using circles or semicircles for meeting and learning spaces, using open-plan areas, lighting and window placement to maximise visual access to information, for example, Gallaudet University's deaf space design principles
- surveying deaf people about their experiences and perspectives on the importance and significance of Deaf places that contribute to a shared sense of identity, for example, the Deaf Club, Deaf schools or sites of historic significance such as original Deaf Society/Mission buildings or other former meeting places
- identifying and researching Deaf community identities associated with significant historical places, such as William Thomson establishing the first deaf school in WA

Reflecting

Elaborations

Reflect on ways in which Auslan and associated communicative and cultural behaviours are similar to or different from their own language(s) and forms of cultural expression

[Key concepts: language, culture, similarity, difference, communication; Key processes: describing, discussing, examining, reflecting, noticing]

(ACLASFC227)

- describing how it feels to use Auslan to communicate, or to watch Auslan being used by others, for example by responding to prompts such as *What are the main differences you notice when observing conversations between hearing people and deaf people?*
- discussing changes or adaptations they have to make to their communicative style when using Auslan, for example waiting until they have a deaf person's visual attention before signing to them, and maintaining eye contact
- examining similarities and differences between ways of communicating in Auslan and in Australian English in different social situations, for example, in relation to ways of greeting/leave-taking, introducing people and using body language, facial expression and eye contact
- reflecting on the need for sustained eye contact when using Auslan in order to understand a message and before teacher instructions can proceed
- noticing differences in forms of address in signed and spoken languages, for example, not using a person's name when signing directly to them, unlike in Australian English
- examining general misconceptions held by hearing people about deaf people, Auslan and Deaf culture, for example, that all deaf people can hear with hearing aids, or that deaf people may not drive
- reflecting on and providing possible explanations for assumptions deaf people might have about hearing people or about spoken languages

Understanding

Systems of language

Elaborations

Identify and describe all elements of sign production, including handshape and its orientation, movement, location and non-manual features, and look at the link between signs and their referents in terms of iconicity

[Key concepts: handshape, orientation, movement, location, hand dominance, iconicity; Key processes: identifying, noticing, recognising, comparing, understanding]

(ACLASFU228)

- realising that meaning is communicated through the use of signs, pictures, written or spoken words or miming
 - identifying a sign's handshape and its orientation, for example, COCKATOO (hs:5, palm left) and SOCCER (hs:fist)
 - identifying and demonstrating signs with a change in handshape, for example FIND or BEST
 - identifying and demonstrating signs with a change in orientation, for example CAN-NOT or HOW
 - noticing the path movement of a particular sign and identifying signs associated with the major types of path movements, for example, THROUGH (forwards) or FULL (down to up)
 - noticing the five major locations of signs on the body or in space, and identifying signs associated with each, such as SEE (head/face), SAY (mouth/chin), WHY (chest), TALK (hand) and ONE (signing space)
 - thinking of body-anchored signs, such as HEAD or WHY, and signs that are not body anchored, such as HAVE or STOP, and recognising that non-body anchored signs can be located in space around the signer
 - understanding that NMFs can also be an element of a sign and can show emotional states such as a happy expression, or grammatical information, for example, a frown to mark a negative, and identifying examples of NMFs in a text
 - noticing that in a stretch of connected signing a sign will often be produced differently to the way it is shown in a dictionary
 - distinguishing between single, double and two-handed signs, and identifying which hand is dominant and which is non-dominant in two-handed signs
 - noticing that in signed languages meaning can be expressed through whole signs or through fingerspelling
 - comparing iconic signs that provide visual images of referents, such as DRINK, ELEPHANT with English words that map to the sound images of the referents, such as animal noises, or words for sounds such as *bang* or *woof woof*
 - identifying signs with different levels of iconicity, for example, those that are fully transparent, translucent or arbitrary
 - experimenting with different methods of capturing signed languages, such as: a class-invented script, drawing pictures, videoing, English glosses or ASL-phabet
-

Recognise and restrict signing to the standard signing space, and understand that pronouns, depicting signs and verbs can be located meaningfully in that space to show participants in a process

[Key concepts: signing space, pointing, verb modification to show who, depicting signs; Key processes: noticing, identifying, recognising, describing, comparing, distinguishing]

(ACLASFU229)

- describing the range of signing space in normal signed discourse
 - recognising that non-body-anchored nouns can be located in space and identifying instances of this
 - comparing and contrasting Auslan and English pronouns, in particular noticing that Auslan pronouns don't show gender but they can show location and a specific number of referents, for example, WE2 (inclusive) and WE3 (inclusive) or WE2-NOT-INCLUDING-YOU (exclusive)
 - discussing the functions of different pointing signs, such as pronouns, determiners, locatives
 - noticing that enacting a role or modifying the beginning and end locations of some verbs can show the referents involved, for example:
PRO1 ASK PRO3 versus PRO1 ASK_{-her}
PRO3 ASK_{-me} CA:I-was-shocked
-  Auslan
- identifying what sorts of things can be represented in a DS by a particular handshape, for example a distant person, pole or tree can be represented by a point handshape, and a cylinder can be traced by a C handshape
 - identifying examples of DSs in an Auslan text, and recognising that handshape and movement represent different things in each type of DS, for example:
 - *entity DSs*: the handshape is an object or person, and the movement is the movement or location of that object or person
 - *handling DSs*: the handshape represents a person's hands touching or moving another object, and the movement shows how the hands move
 - *SASS DSs*: the handshape and movement outline the shape or size of something

Recognise and use elements of clause structure, such as noun groups/phrases or verb groups/phrases and using conjunctions to join clauses

[Key concepts: sign class, noun and verb groups, conjunctions, clauses, sign order; Key processes: recognising, observing, distinguishing, understanding]

(ACLASFU230)

- categorising noun signs into those for people, animals, places or things
- learning that proper nouns can have a sign name or be fingerspelled
- recognising different nouns in clauses, including those that are shown with a pointing sign, such as GIRL READ versus PRO3 READ, or VISIT FRIEND versus VISIT PRO3
- knowing that adjectives describe nouns in different ways, such as how they look (BIG or RED), feel (SOFT or HOT), smell (SMELLY) or sound (LOUD)
- recognising that a noun group is a group of signs that relate to a person, place or thing that can include elements such as adjectives or numbers
- recognising that expanding a noun into a noun group enriches meaning
- identifying verb signs (SIT, EAT, FEEL, WONDER, HAVE) and recognising that they are central to a clause
- noticing there is no verb 'to be' in Auslan, which is a significant difference to English
- exploring different semantic types of verbs in a text, for example by showing how:
 - *doing* (WALK, WRITE) and *saying* (TELL, CALL-OUT, ANNOUNCE) verbs in narrative texts give information about a characters' actions
 - *sensing* (SEE, THINK) or possessing (THAT'S-TYPICAL-OF-THEM, OWN) verbs indicate what characters think, feel or own
- *relating* verbs identify or describe a noun (for example, HAVE in PRO3 HAVE LONG-HAIR)
- noticing that some signs modify the meaning of verbs, such as READ **CAREFUL** and that these are called adverbs
- contributing examples of signs that tell:
 - when a verb happens (**IN-2-WEEKS** PRO1 HOLIDAY or WANT LUNCH **NOW**)
 - where a verb happens (PRO3 RUN **FAR** or COME **HERE**)
 - how a verb happens (**FAST** or **SLOW** or PRO2 **QUICK** FINISH)
- noticing that sometimes Auslan signers have information about how a verb happens through NMFs not separate signs (for example, WRITE_{-carelessly})
- recognising that a verb group is a group of words built up around a verb that may include adverbs which modify the meaning of verbs and that adverbs and DSs can enrich a verb group
- understanding that a clause is one or more signs expressing a single idea and that a clause has at least one verb, but often one or more nouns as well, for example:
CALL_{-him}
I called him.

MAN THERE GO-TO POSS3 HOUSE

That man went to his house.

BIG MONSTER SCREAM

A big monster screamed.

 Auslan

- noticing that while word order in sentences is often important for meaning, there is flexibility in word order in Auslan and that because parts of a sentence can be signed simultaneously in Auslan, it is hard to establish word order
- distinguishing between yes/no questions, wh- questions and statements and their corresponding NMFs

Recognise similarities and differences in language features of different types of texts and in Auslan and English texts of a similar type, and notice how texts build cohesion

[Key concepts: text, textual features, referent tracking; Key processes: recognising, identifying, analysing]

(ACLASFU231)

- recognising that texts are made up of one or more clauses, which have one or more signs in them, which together make meaning
- comparing a short text in Auslan with an equivalent type of English text (for example, a recount in both languages) and noticing similarities and differences in structure and language features
- examining different examples of an Auslan text on the same topic, or telling the same story, and identifying different choices signers made in the production of the text, for example the amount of fingerspelling or CA they used
- analysing linguistic structures and features associated with more dynamic texts, such as back-channels and hesitations used in casual conversations
- identifying examples of signers pointing to an established location to refer to a non-present referent
- identifying how signers use space to make clear the actor or undergoer of a verb through a text, for example by pointing back to an established location to refer to a noun referent
- identifying the many ways signers can refer to the same referent in a text, for example by using DSs, points or list buoys, and how such strategies help maintain interest and support understanding

Language variation and change

Elaborations

Explore different dimensions of variation in the structure, development and use of Auslan, including how it has been influenced by English and other signed languages

[Key concepts: language variation, influence, word-borrowing, change; Key processes: exploring, identifying, classifying, describing]

(ACLASFU232)

- exploring similarities and differences in the two main Auslan dialects, the northern dialect, used in New South Wales, Queensland and the Australian Capital Territory, and the southern dialect, used in Victoria, South Australia, Western Australia, Tasmania and the Northern Territory, for example through building webcam relationships with other schools or by identifying and collecting signs that differ in the two forms
- researching how BSL from the 1800s evolved into Auslan, NZSL and modern BSL, for example by finding and classifying examples from Auslan, NZSL and BSL signbanks
- understanding that while the structure of individual signs can change over time in regular ways, there is little information about this process in signed languages due to lack of historical records of signing
- explaining the influence of other signed languages such as BSL, ISL and ASL on Auslan over different periods of time and in different domains of language use, and discussing why this is the case
- noticing different ways that English words are borrowed into Auslan, for example, the use of fully fingerspelled words, such as D-U-E, N-O-U-N, the fingerspelling of the first letter of corresponding English words, for example TOILET, FATHER, or abbreviations of English words, for example, state names: S-A, N-S-W, V-I-C, T-A-S, and organisation names: N-A-B-S, W-A-A-D, N-S-W-A-D, D-C-S-S-A, and lexicalised fingerspelling, such as HOW, BUT, ABOUT, FOR
- recognising that Auslan includes loan signs from Signed English, such as TOY or DAD, and understanding why some older deaf people are uncomfortable with these changes
- looking at style shifts in domains where English is in closer contact with Auslan, such as the use of more English-like structures in formal and educational settings
- considering adaptations to Auslan use when communicating in different physical environments, such as in video chats, across a large yard, or when one or both hands are occupied, for example, variations in vocabulary, size of signing space, clarity of signs, use of fingerspelling and NMFs
- noticing the variation in 'handedness' between signers in relation to both signs and to fingerspelling: right handers using their right hand as their dominant (main) hand; left handers doing the opposite

Language awareness

Elaborations

Develop awareness of the sociocultural context, nature and status of Auslan and of the Deaf community in multilingual Australia

[Key concepts: communication, accessibility, transmission;
Key processes: identifying, investigating, discussing, understanding]

(ACLASFU233)

- identifying the importance of place and space in the Deaf community, exploring why some places and spaces ensure that a visual language is more accessible to deaf people and promotes a sense of cultural belonging, for example by identifying factors that make a classroom 'Deaf friendly', such as U-shape seating, minimisation of window glare/reflection, good lighting and acoustics, flashing lights, suitable interpreter location
- identifying examples of deaf people's visual orientation towards the world, such as using visual applause or being astute in reading body language
- describing how and why deaf people use vibrating devices to alert them to alarms or information, or have flashing lights for the door, phone, alarm clock, baby cry alarm and other systems
- understanding cultural values associated with the conferring of name signs on those such as second language learners of Auslan who are joining the Deaf community
- explaining the role and function of Auslan–English interpreters and Deaf interpreters and the access and opportunities they provide
- identifying and describing physical markers of identity among deaf people, including the use of sign language and/or hearing devices such as hearing aids, cochlear implants and FM systems
- exploring variation in Auslan fluency among their classmates and members of the Deaf community, identifying the influence of variables such as where and when people learnt to sign and whether they are from a deaf or hearing family
- investigating how Auslan and Deaf culture are promoted in the wider community, for example through the influence of organisations such as Deaf Australia; the work of high-profile individuals such as activists or actors; or through events such as NWDP Deaf Festival, Australian Deaf Games or Deaf art exhibitions
- understanding the nature of the transmission of Auslan, for example how in most cases Auslan is not passed on from parent to child but often from child to child, or to children by adults outside the family, and knowing that some Deaf people learn Auslan as a late acquired language in early adulthood
- exploring the nature of multilingualism in the Deaf community, including the use of Auslan, English and other signed and spoken languages, considering how and when people typically switch between languages and dialects
- investigating the use of digital technology/communication by Auslan users, for example, social media, SMS/texting and NRS and VRS, discussing how these modes of communication impact on issues such as accessibility and communication between members of the Deaf community
- investigating communication methods used by deaf and hard of hearing members of Aboriginal and Torres Strait

Islander communities

- discussing behaviour associated with cultural practices, language and traditions, for example, by discussing the concept of reciprocity as a manifestation of how community members share responsibility for each other's wellbeing, or the value placed on the use of sign language for shared understanding and trust

Role of language and culture	Elaborations
------------------------------	--------------

Explore connections between language, identity and cultural practices, values and beliefs and the expression of these connections in Auslan

[Key concepts: language, culture, identity, difference, transmission; Key processes: recognising, appreciating, exploring, understanding, identifying]

(ACLASFU234)

- recognising that people from different places and backgrounds may use different languages and have ways of living and communicating that differ from their own
- appreciating that culture and cultural difference means that people may value different things or live differently, noticing observable examples of such difference, such as ways of greeting (bowing versus shaking hands) or conveying information (through words versus signs)
- exploring how deaf people live in ways that may be different from how hearing people live and that they are primarily visual, for example by responding to stimulus questions such as *How do deaf people ensure they can always see other people who are signing?*
- recognising the importance of facial expression, eye gaze and non-manual features in conveying information in a visual-gestural language and culture
- exploring the nature of culture as an essential part of human life, understanding that it is shared, passed on between generations and is closely connected to language and identity
- understanding that culture is more than the visible aspects of people's lives; that it also includes invisible elements such as beliefs and values, how people think about themselves and others, how they relate to their social and physical environments; and considering how this understanding applies to users of Auslan
- recognising that in each culture there are general rules for what to say and do, when, where and with whom, and that these rules differ from culture to culture, for example, the Deaf culture places greater importance on eye contact than cultures that communicate through spoken languages
- identifying the importance of signing space and proxemics in Auslan, particularly in relation to a person passing between two signers, or to the positioning of communication partners
- recognising that shared experiences shape cultural values in Auslan as in other cultures, for example the experience of deaf children being excluded from family and social discourse during dinner table conversations or social events gives rise to the value placed in the Deaf community on ensuring inclusivity and sharing information with each other
- recognising the importance of community and culture in relation to their own lives and communities and in relation to other language groups and their communities
- recognising the role of the Deaf community and its networks and significant places in maintaining, reflecting and strengthening Auslan and Deaf culture

Years 7 and 8 Achievement Standard

By the end of Year 8, students use Auslan to share information, experiences, interests, thoughts and feelings about their personal and immediate worlds. They use modelled constructions, ask for repetition or clarification, such as please slow sign, and use strategies such as fingerspelling to replace unknown signs to support continued interaction. They use lexical signs, gestures and affective non-manual features (NMFs) to indicate understanding, interest or lack of interest, for example, AGREE YES or PRO1 AGREE or PRO1 KNOW WHAT MEAN, BUT.... They ask and respond to familiar questions and directions and distinguish between statements and questions using grammatical NMFs. Students use familiar language to collaboratively plan and conduct shared events or activities, such as presentations, demonstrations or transactions, for example, PRO2 TYPE PRO1 WRITE. They describe people, animals and objects using lexical adjectives and familiar SASS depicting signs and appropriate classifier handshapes, for example, POSS1 MATH TEACHER TALL DS:long-wavy-hair or SCHOOL UNIFORM HAVE DS:long-thin-tie. They compare routines, interests and leisure activities, using signs for timing and frequency, simple depicting verbs for showing location, and appropriate sequencing. They use culturally appropriate protocols when communicating, such as maintaining eye contact, responding to and gaining attention by waving or tapping a shoulder or table, flashing lights, back-channelling and voice-off. Students locate specific information in a range of signed texts, such as weather reports, public announcements and presentations by visitors, using visual and contextual clues to help make meaning. They summarise and retell key points of information in correct sequence using list buoys. They plan, rehearse and deliver short presentations, taking into account context, purpose and audience and using familiar signs and visual supports, such as photos and props, and cohesive and sequencing devices. Students view and respond to short imaginative and expressive texts, such as short stories, poems and Deaf performances, for example by identifying and discussing ideas, characters and events. They create their own simple imaginative texts and retell wordless animations using familiar signs, gestures, modelled clause structures, high-frequency signs, modifying NMFs and lexical signs to indicate manner. They translate and interpret short texts using Signbank, and give examples of how languages do not always translate directly. They create bilingual texts and resources for the classroom, for example, glossaries and captions for their own and each other's short stories. They explain the importance of facial expression, eye gaze and other NMFs in a visual-gestural language and culture, and reflect on their own cultural identity and ways of communicating in light of their experience of learning Auslan.

Students know that Auslan is a legitimate language, different from mime and gestures used in spoken languages, and that eye contact is necessary for effective communication. They know that meaning is communicated visually through the use of signs, NMFs and gestures and can be expressed through whole signs or fingerspelling. They identify and describe the handshapes, movements and locations of signs. They distinguish between entity, handling or SASS depicting signs by looking at what the handshape and movement represent in each type and know that spatial relationships are typically expressed with entity DSs. They know that signs can be displaced in space for a range of purposes, such as to show locations or show the participants in a verb. They know that signing involves telling, depicting or enacting. They identify iconic signs and discuss how these match their referent, such as HOUSE, TREE, DRINK. They know that the function of constructed action is to represent the words, thoughts or actions of themselves or others. They use metalanguage to talk about Auslan, for example using terms such as **depicting signs, indicating verbs, non-manual features, handshapes, pointing signs** and **clauses**. Students recognise variation in the use of Auslan, such as regional dialects and differences in signing space. They understand different ways that English words are borrowed into Auslan and how these become lexicalised. They explore the influence on Auslan of other signed languages, such as BSL, ISL and ASL, as well as English over different periods of time and in different domains of language use, and consider reasons for these influences. They identify different ways that Deaf community members communicate with each other and with members of the wider hearing community, describing how different forms of digital communication such as social media, SMS/texting and NRS have improved accessibility for the Deaf community and contribute to the vitality of the language. Students recognise that Auslan has been transmitted across generations and describe ways it has been documented and recorded. They reflect on ways that culture is differently interpreted by others, for example by identifying how stereotypes about deaf and hearing people influence perceptions; and they understand that the most unifying factor of the Deaf community is the use of Auslan.

Years 9 and 10

The nature of the learners

Learners enter this band with prior experience of Auslan. They bring a range of existing capabilities, strategies and knowledge that can be applied to new learning. This stage of learning coincides with social, physical and cognitive changes associated with adolescence. Increased cognitive maturity enables learners to work more deductively with language and culture systems, to apply more intentional learning strategies and to reflect productively on their learning. Motivation and engagement with language learning and use are influenced by peer-group dynamics, personal interests and values, and issues related to self-concept. The role of language is central to this process and is reflected in the degree to which learners define themselves as members of language communities, how they position themselves in relation to peer groups, and choices they make in relation to linguistic and social practices. These processes are fluid and context responsive and impact on learners' engagement with both Auslan and English language learning. Learners at this level are increasingly aware of the world beyond their own and are engaging with youth, social and environmental issues. They are considering their future pathways and choices, including how Auslan could be part of these. They require continued guidance in learning Auslan, but are increasingly independent and capable of analysis and reflection, including in relation to Auslan and to intercultural experience.

Auslan learning and use

Learners use Auslan to compare and contrast, to sign instructions, problem-solve, make announcements, persuade, and recount experiences in increasing detail. They engage with a range of Auslan texts, and express feelings and emotions creatively in the language. They participate individually and in groups in tasks and learning experiences, explaining or justifying positions, elaborating opinions, and giving and receiving multistep instructions. They create their own signed narratives, and summarise and critically examine viewed texts.

Learners are extending their grammatical knowledge, such as understanding how language structures and features are used intentionally in texts. They use more elaborate sentence structures, including conjoining clauses, and increasingly build cohesion in their texts by setting up and maintaining referents in signing space. Learners explore metaphorical iconicity and begin to use constructed action to represent multiple characters in narratives. They are increasingly aware of connections between language and culture, comparing them to experiences in their own language(s) and culture(s). They are learning to reflect on their own language and culture and on how identity impacts on intercultural experience.

Contexts of interaction

Learners interact with teachers, peers and members of the Deaf community, in real life or via online technologies. They also encounter Auslan in the wider community, such as in the media, at film festivals or community events or via guest speakers.

Texts and resources

Learners engage with a range of increasingly complex live and digital signed texts designed for in-school learning of Auslan. They also work with different types of authentic texts created for deaf people, such as websites, which provide opportunities to extend understanding of language and culture. Texts come from a range of domains or genres, such as oral histories, community announcements, vlogs and stories; and they serve a variety of purposes, such as informative, transactional, communicative, imaginative and expressive. Learners also access texts from other signed languages that make extensive use of the 'visual vernacular'. The Deaf community is the most important resource for learning, as it is the origin of most of the texts and communicative situations engaged with by learners.

Features of Auslan use

Learners at this stage are increasingly aware of differences between Auslan and English. They are expanding their knowledge of vocabulary and sentence construction. With support, they use constructed action to show participants in a text, modify indicating verbs for non-present referents with increasing accuracy across a text, and use more complex entity depicting signs. They are learning to use NMFs to mark manner on verbs or to express negation. They use appropriate strategies to initiate and sustain conversations, and use more elaborate sentence structures, such as embedding clauses. Learners create richer texts, switching between viewer and diagrammatic space to show different perspectives of the same event. They also develop metalanguage for describing aspects of Auslan and how it is structured. They consider connections between language and culture and make comparisons with their own language(s) and culture(s). They consider language variation, for example by experiencing other dialects in the BANZSL family. They develop understanding of the nature of translation and interpretation, noticing the relationship between language, texts and culture. A balance is maintained between activities that focus on language forms and structures and those that involve communicative tasks, performances and experiences. Task characteristics and conditions are more complex and challenging; they involve collaborative as well as independent language planning and performance, and development and strategic use of language and cultural resources.

Level of support

While learners are increasingly less reliant on the teacher for support during communicative interactions, continued support, such as provision of rich language input and modelled language use, is needed to consolidate and sustain language development. The teacher provides implicit and explicit modelling and scaffolding in relation to meaningful language use in a range of contexts, situations and learning experiences, and explicit instruction and explanation in relation to complex structures, grammatical functions and abstract concepts and vocabulary. Provision of opportunities to discuss, clarify, rehearse and apply knowledge is critical in consolidating understanding and skills and in developing autonomy. Learners are encouraged to self-monitor, for example, by keeping records of feedback, through peer support and self-review. They are increasingly aware of and responsible for their own learning, working independently to address their needs, for example by accessing technologies to memorise, learn and expand their language repertoire. They continue to use Signbank, graphic organisers, modelled texts, dictionaries and teacher feedback to interpret and create texts, and may keep records of their learning through means such as a video journal or folio to reflect on their language learning and intercultural experience.

The role of English

Learners and teachers use Auslan as the primary medium of interaction in language-oriented and an increasing number of content-oriented learning experiences. English provides a basis for linguistic and cultural comparison. English is also the medium for expressing experiences, abstract ideas and personal views at a level beyond learners' level of Auslan, for example when justifying a position on a social issue or exploring linguistic and cultural practices. English may be used with Auslan to conduct research, for example when investigating a social issue or cultural practice if a source text in Auslan cannot be found. It is also used in translating and in communicating bilingually. Learners are supported to reflect on the different roles that English and Auslan play in their academic work and in their conceptual development.

Years 9 and 10 Content Descriptions

Communicating	
Socialising	Elaborations

Socialise and exchange views on selected issues using different communication strategies, language structures and techniques

[Key concepts: issues, debate, discussion, interaction; Key processes: explaining, debating, justifying, code-switching]

(ACLASFC235)

- explaining or justifying a position in relation to personal and social issues, such as the inclusion of deaf jury members, using simple clauses and more complex constructions, such as statements, if...then... or when constructions, for example:
IF DS:place-person DEAF TEACHER MEANS DEAF HEARING STUDENTS EQUAL_{-all}
If there were a deaf teacher in the class as well, then all the students would be equal.
 - debating issues such as whether schools should have a school uniform, using a range of conjunctions and complex clauses, for example:
SPORT, PRO1 THINK GOOD BECAUSE ENCOURAGE PEOPLE GO-OUT MEET-VARIOUS PEOPLE
I think sport is great because it encourages people to go out and meet others.
PRO1 THINK SCHOOL UNIFORM GOOD BECAUSE ALL STUDENT SAME_{-all} DOESN'T MATTER RICH POOR SAME_{-all}
I think school uniforms are good because they keep students equal, and it doesn't matter if they are rich or poor.
 - participating in conversations with their peers using strategies to sustain interactions, such as turn-taking and asking for repetition, clarification or confirmation, for example:
WHAT? PLEASE AGAIN
Could you repeat that, please?
STILL GO-AHEAD
Go ahead ...
RIGHT PRO2 SAY PRO1 FIX THAT?
So, you want me to fix that?
 - communicating with other Auslan users via digital media to exchange views or to express personal opinion on topics such as co-educational or single-sex schools
 - adjusting their language to socialise with different audiences, such as primary school Auslan users, using appropriate code-switching techniques
-

Engage in various collaborative tasks that involve making decisions, solving problems and evaluating progress
[Key concepts: responsibility, evaluation, discussion; Key processes: problem-solving, planning, evaluating, managing]

(ACLASFC236)

- participating in visits to a Deaf club or organisation and sharing responsibility for individual elements of a report that highlights key features of the experience
 - working with peers to solve problems, such as how to use video editing and/or captioning programs
 - working with a team to plan a fundraising event or a promotional display for Auslan at an open day/night and evaluating the experience to improve subsequent planning and organisation
 - assuming the role of a chairperson managing a small group discussion and conducting decision-making processes
 - contributing to the solving of hypothetical scenarios using conditionals, for example designing questions for a job interview such as:
PRETEND SOMEONE DS:one-person-approach-other
BLAST, PRO2 D-O WHAT?
Pretend someone approaches you and tells you off; what will you do?
I-F PRO2 BOSS PRO2 WILL CHANGE WHAT?
What would you change if you were boss?
-

Interact appropriately with the teaching team, peers and members of the Deaf community, adjusting language when necessary and demonstrating understanding of appropriate protocols in and out of the classroom

[Key concepts: protocol, behaviour, communication; Key processes: demonstrating, gaining attention, back-channelling, clarifying]

(ACLASFC237)

- demonstrating use of appropriate protocols within and beyond the classroom, such as gaining group attention through flashing lights, tapping, foot stomping and waving, and maintaining eye gaze, back-channelling and limiting the use of voice when interacting with unfamiliar Auslan users
- adjusting the physical environment, including people and objects, to enable communication in a well-lit environment without glare or obstructions
- demonstrating culturally appropriate behaviours when using or accessing an interpreter, such as not interrupting or blocking the line of sight
- using appropriate discourse markers and NMFs to facilitate clear communication, for example:
SURPRISE
Oooh (with appropriate intonation)
INCREDIBLE
No way!
WOW
Wow!
UM
um ...
HOLD...
Hang on a minute ...
- clarifying information, such as:
WHAT? PLEASE AGAIN
Could you repeat that, please?
RIGHT PRO2 SAY PRO1 FIX THAT?
So, you want me to fix that?
PLEASE SLOW SIGN
Could you sign that slowly, please?
PRO2 SAY BEFORE WHAT?
What did you just say, sorry?
- asking for elaboration of information by adding comments, for example:
RIGHT-YEAH INTERESTING BUT I WANT ADD COMMENT
Well, yes, that's interesting but I'd like to add something.
STILL GO-AHEAD
Go ahead ...

Informing

Elaborations

Engage with a range of signed texts to locate and evaluate information, infer or interpret meaning and to present key points in new forms

[Key concepts: information, data collection, issues; Key processes: interviewing, observing, rephrasing, summarising]

(ACLASFC238)

- interviewing an Auslan user, using prepared questions to find out about their experiences or opinions on selected topics, such as early language learning for deaf babies or their experience of education, selecting key elements of their commentary to produce a digital profile to share with the class
 - observing informative signed texts from the Deaf community and deaf-related organisations, such as emergency or advocacy texts, and rephrasing key points in a form suitable for a younger audience
 - collecting information from a variety of signed sources to inform class discussions on current affairs, for example the prevalent use of social media by young people, and access to this by deaf students
 - following more complex procedural signed texts, such as directions to follow in an unfamiliar environment, such as a school camp or excursion
 - watching and summarising information provided by a guest speaker and comparing their noted ideas and opinions with those of their peers
 - viewing texts such as interviews, news reports or vlogs and selecting points of information or details to use in their own texts or opinion pieces
 - viewing Auslan texts from other content areas, using depicting signs to explain key concepts, such as states of matter or climate variation
 - forming and signing questions to request information from a deaf organisation or person, in order to produce a digital information text such as a brochure or web page
 - obtaining information about high-profile members of the international Deaf community to create profiles for an e-magazine
-

Preparing and presenting information on different issues, events, people, procedures or experiences, using signed descriptions and visual prompts to inform, report, promote, explain or invite action

[Key concepts: biography, commentary, procedure, action;
Key processes: presenting, describing, explaining, researching, composing, inviting action]

(ACLASFC239)

- presenting a biographical report on a prominent deaf person, using visual prompts such as a slideshow to describe their life and achievements, incorporating some commentary and personal opinion
- contributing an item of information for a collaborative e-book to describe views on different aspects of Deaf culture, such as community and protocols associated with signing
- explaining to each other a selected procedure or practice, for example, a recipe, the rules of a sport or board game, or instructions on caring for animals
- researching, composing and presenting a persuasive speech designed to invite action or support on a selected issue, such as a Deaf political matter
- using visual props and signed explanation to describe a biological or mechanical process to the class, such as how the ear or a cochlear implant works
- developing a signed news report or public announcement to inform or alert an imagined audience of a recent or impending natural disaster
- creating signed announcements to inform members of the school community about events such as a Deaf theatre performance or National Week of Deaf People activities
- creating digital clips or social media posts designed to persuade, inform or invite response on an issue of relevance to young people of their age
- providing instructions in an engaging or entertaining style to create interest in a group activity, such as a maths game or signing choir

Creating

Elaborations

Respond to different types of creative texts that involve the expression of feelings or experiences, comparing their responses to different elements and making connections with their own experience

[Key concepts: Deaf experience, expression, cultural values, effect, emotion; Key processes: analysing, evaluating, profiling]

(ACLASFC240)

- viewing and responding to creative texts such as television programs, poems and theatre performances that are used to represent the Deaf experience, for example the television program *Switched at Birth*
- recognising how a character's feelings and attitudes are expressed through NMFs, and expressing their own feelings or attitudes in similar contexts or situations
- responding to different types of creative and imaginative texts, such as signed poetry, short stories or songs, identifying and discussing the artistic signed choices and making connections with their own experiences
- exploring how cultural values and the expression of identity are reflected in different forms of artistic expression, such as poems by Walter Kadiki or John Wilson
- evaluating Deaf performances or art forms that manipulate technology and the use of colour and light to create special effects, for example, in performances by Ian Sanborn
- analysing how elements of creative performance such as emotional nuance are communicated through interpreters in a live setting
- identifying and profiling deaf artists who make use of music, for example, members of the Deaf Performing Arts Network
- engaging with examples of Deaf humour, such as Deaf jokes, and comparing them with examples of humour in spoken English or in silent films or mime
- viewing and comparing expressions of Deaf experience through different visual art forms, such as painting, photography or sculpture, comparing with their own use of visual forms of expression of feelings and experience

Create and present entertaining individual or collaborative texts that reflect imagined people, places or experiences and draw from elements of their own life experience

[Key concepts: improvisation, stimulus, performance, humour, tension, interpretation; Key processes: improvising, performing, role-playing, creating, interpreting]

(ACLASFC241)

- participating in improvisation games that require spontaneous and imaginative responses to a stimulus such as *Sixty seconds to make the audience laugh or cry* ...
 - working collaboratively to create a performance such as a skit or humorous story for a class talent show
 - role-playing an imagined interview, incorporating elements of tension, humour or emotion
 - creating and presenting a handshape or signed poem on a selected theme, such as friendship or love
 - creating and presenting to their peers a signed interpretation of a wordless animation, comparing their different performances
 - creating a short film that incorporates camera techniques appropriate for a deaf audience
 - working collaboratively to create a static scene or diorama using the hands and bodies of at least two signers
 - creating the next scene, a new character or an alternative ending for a signed fable, short story or cartoon
-

Translating	Elaborations
<p>Translate and interpret different types of familiar texts and consider the effectiveness of examples of different translations, considering the role of culture when transferring meaning from one language to another</p> <p>[Key concepts: equivalence, translation, meaning, interpretation, ethics, culture; Key processes: translating, interpreting, comparing, researching, exploring, developing]</p> <p>(ACLASFC242)</p> 	<ul style="list-style-type: none"> • viewing and discussing online Auslan translations, such as the <i>Catching Fire</i> series of safety videos • experimenting with literal Auslan translations of popular English idioms, noticing when this creates confusion (for example, <i>raining cats and dogs</i>) and recognising the nature and function of cultural elements of communication and how these influence language use • comparing different translations of online Auslan and English public announcements and government policy/information texts in terms of approaches to translation, for example in relation to free versus literal • comparing their own translations of short texts from Auslan to English and vice versa with those of their classmates, noting variations and discussing possible reasons for these • recognising the need to sometimes recast language and considering why one language may use more words/signs than another to communicate a particular meaning, for example, when Auslan uses spatial concepts or depicting signs to describe an event such as the scene of a car crash, which will take longer to explicate in a linear spoken language • translating poems, short stories or songs such as 'I Am Australian' from English into Auslan • exploring the role and function of Deaf interpreters and differences between Deaf interpreters and Auslan–English interpreters • researching aspects of available interpreting services in their area, for example, qualifications required for employment, and issues of interpreting and translating in specialised contexts such as health, education or legal settings • developing guidelines on culturally appropriate and ethical behaviour when interpreting and translating, for example explaining ways people should act in interpreting contexts and considering potential consequences of inaccurate interpreting • interpreting very simple interactions or role-plays between deaf students or guests and non-signers, such as a hearing teacher, librarian or canteen manager • participating in an excursion to an interpreted theatre event, with prior knowledge of the text/story, attending to the interpretation for discussion later in class

Create, develop and resource bilingual texts for use in the wider school community

[Key concepts: bilingualism, translation, meaning, representation, information; Key processes: translating, composing, comparing, creating, developing]

(ACLASFC243)

- creating bilingual texts for the school community, for example, posters, library displays or digital newsletter items, discussing how to represent meaning in two languages for different audiences
- developing collaborative translations of selected signed texts into spoken English or caption form
- collecting and recording various Auslan phrases and expressions used by native Deaf signers, attaching English captions with appropriate translations, for example, PAH! = *finally*, TALK = *communicate in speech or Auslan*, CHAT = *talk in Auslan*
- creating Auslan clips with English captions for the school website of items of interest to the school community
- composing bilingual texts for class or school assembly performances, events or displays, for example, NWDP announcements

Identity

Elaborations

Recognise that the concept of identity is complex, dynamic and diverse, and consider how students learn more about their own identity through the exploration of other languages and cultures

[Key concepts: identity, perception, representation, difference; Key processes: investigating, comparing, evaluating, creating, analysing]

(ACLASFC244)

- reflecting on how identity is expressed across cultures and through languages, for example by considering the idea of 'belonging' as expressed in different languages
- investigating how particular policies and practices may affect the sense of identity of deaf people, for example, through the prohibition of the use of Auslan in schools in the past
- viewing excerpts of different footage in Auslan or other signed languages and identifying language or behaviour that appears to be either inclusive or exclusionary and could impact on identity development, for example, the representation of deaf teenagers in the TV program *Switched at Birth* or in documentaries such as *Welcome 2 My Deaf World* and *Deaf Teens: Hearing World*, making connections or comparisons with their own experiences as teenagers
- evaluating documentary footage of famous members of the Deaf community discussing identity and the experience of growing up deaf, comparing their commentaries with their own experience, paying attention to identified factors that can influence identity, such as gender or race
- creating vlogs or filmed texts designed to share their understanding or views about Deaf/hearing identity and to prompt the intended audience to reflect on their own views of Auslan and the Deaf community and of what it means to be 'hearing'
- viewing signed news and other media texts, such as episodes of *See Hear* or *SignPost*, and discussing examples of discrimination, oppression or rejection experienced by deaf people, reflecting on how these may shape or reflect mainstream society's perception of the Deaf community
- considering the concepts of 'Deaf gain', Deafhood and audism, and comparing their response to these concepts as second language learners of Auslan
- discussing the impact of language and culture on the shaping of identity and a sense of wellbeing
- considering connections and shared identity between local, regional and national communities of deaf people for example, by inviting a deaf guest to share their experiences of travel or international contact

Reflecting

Elaborations

Reflect on the experience of learning and using Auslan and how the experience is influenced by their own languages and cultures, and consider how intercultural communication involves shared responsibility for making meaning

[Key concepts: intercultural communication, perspective, making meaning, inclusion, exclusion, audism, insider, outsider; Key processes: analysing, explaining, reflecting, considering]

(ACLASFC245)

- reflecting on how learning Auslan provides a distinctive and additional means of understanding the world in which they live and the relationship that exists between language, culture and identity
- considering issues of access, identity and audism, and also issues of discrimination, inclusion and exclusion in respect to different language and cultural communities
- keeping a journal of experiences (humorous, satisfying or challenging) associated with learning and using Auslan in various contexts, noting changes in their personal responses and reflections over time, and comparing insights gained into their own languages and cultures
- analysing their own cultural assumptions prior to learning Auslan, and considering if these have changed through the learning experience
- reflecting on similarities and differences between spoken language and signed language users, for example when joining interactions, taking turns, using name signs or passing between people who are communicating with each other
- reflecting on the labels *deaf* and *hearing*, considering what these mean to different people and their implications in terms of status, access, opportunity and privilege
- exploring the concepts of insider and outsider views of the Deaf community and their own position in relation to these terms as second language learners of Auslan
- considering how intercultural communication is a two-way process which involves shared responsibility for making meaning and for ensuring understanding

Understanding

Systems of language	Elaborations
---------------------	--------------

Explore various types of non-manual features and the types of iconicity in signs, and gain confidence in using software to transcribe signs

[Key concepts: transcription, iconicity, metaphor; Key processes: identifying, recognising, distinguishing, describing, glossing]

(ACLASFU246)

- identifying, demonstrating and describing the various types of NMFs: movements of the eyebrows, eyes, nose, mouth, cheeks, shoulders and body
 - identifying and describing the function of various NMFs in a signed text
 - understanding that the elements of a sign can be arbitrary, for example, the handshape or movement of the sign WHY, or meaningful, such as the movement and the handshape in the sign GIVE
 - recognising that some signs can occur with a standard mouth gesture and that these are sometimes called multi-channel signs
 - understanding that signs can be iconic in a number of ways, such as representing a whole object or part of an object
 - beginning to identify and describe metaphorical iconicity, for example, LOVE, AVOID/RESIST, and discussing how it relates to metaphors in English, for example the 'time as space' metaphor in both languages
 - transcribing part of a text using either annotation software such as ELAN or glossing, and recording what signs were used, spatial locations and NMFs
-

Understand that signs can include different information including a gestural overlay, and identify how signers establish spatial locations, types of depicting signs and ways of showing constructed action

[Key concepts: spatial location, grammatical use of space, constructed action, depicting signs; Key processes: noticing, identifying, recognising, comparing, contrasting, distinguishing]

(ACLASFU247)

- recognising that Auslan has fully-lexical signs that are in the dictionary and have a standard handshape, movement and location, and partly-lexical signs that cannot be listed in a dictionary in all forms as gesture changes the form each time they are signed
 - noticing that meaning is created in Auslan from fully-lexical signs, partly-lexical signs, non-lexical signing and gesture and comparing with the range of ways English speakers create meaning, including spoken words, modifying intonation, and gesture
 - noticing that fully- and partly-lexical signs can include grammatical information not included in a 'citation' form, for example, the sign TELL_{me} is not listed separately to TELL (towards neutral space) and GO-TO includes GO-TO_{often}
 - noticing that single-digit numbers can be separate lexical items or merged into other signs (numeral incorporation) such as those for ages (for example, 5-YEARS-OLD) or adverbs of time (for example, 3-WEEKS-AGO) or pronouns (WE3, WE4)
 - identifying where and how a signer has established a location in space, for example through the use of points, non-body-anchored signs or fingerspelled words
 - recognising that signers must make explicit which referent is associated with a location, but do not need to continue to make this explicit throughout a text
 - recognising that signers can set up referents in the signing space close to them (viewer space, for example, using a bC handshape (use of non-dominant hand) to indicate putting a glass on a table) or distant (diagrammatic, for example, using 5claw in two locations to represent two houses)
 - recognising that in viewer space, signers can use locations for present referents, non-present referents, or abstract referents that do not exist in space
 - identifying instances of DSs and their type independently
 - comparing English adjectives with SASS DSs
 - learning that the function of CA is to represent the words, thoughts or actions of a protagonist in a text, either themselves or another
 - knowing that in CA a signer can shift into the role of another, or themselves at a different time, through eye gaze change, body shift, head orientation change, and matching facial expressions
-

Understand and control additional elements of Auslan grammar, such as the use of non-manual features for topicalisation, negation or conditional forms, and develop awareness of how signers use constructed action and depicting signs in composite utterances

[Key concepts: clause types, conjunctions, composite utterances; Key processes: recognising, observing, distinguishing, understanding]

(ACLASFU248)

- observing that some noun groups are not signed overtly, particularly if maintaining the same referent rather than introducing a new one
 - distinguishing between the citation form of a sign and the adverbial NMF overlaid and what meaning each part carries, for example: MAN SPRINT (base form), MAN SPRINT_{-fast} (manner added)
 - recognising that signers can give information about how a verb happens over time by changing the movement, for example, signing WATCH versus WATCH_{-for-a-long-time}, or with lexical signs such as WATCH AGAIN++
 - recognising that some adverbs modify adjectives, not verbs, for example VERY, and that these modifications to adjectives can also be expressed with NMFs, for example changes in mouth patterns and movement of signs can intensify adjectives, for example, RED_{-really}, PLEASED_{-really}, TALL_{-really}
 - recognising that typically signers use DSs to show spatial relationships, not separate signs such as ON or UNDER
 - recognising how conjunctions such as PLUS, IF or BUT are used to join clauses and create cohesion
 - recognising that clauses can also be joined through particular NMFs
 - noticing that clauses can be linked equally or unequally, where one clause depends on another
 - recognising that the element of a clause that a signer wants to focus on most in Auslan is sometimes moved to be signed first and that this process of topicalisation involves particular NMFs
 - noticing that clauses are elaborated and made more vivid by adding adjectives and adverbs and by enacting or using DSs
 - realising that in many clauses signers 'tell' with fully-lexical signs at the same time as 'show' with DS, periods of CA and other gestural elements
 - noticing when signers are using composite utterances, for example those that include elements of CA, DSs, points and lexical signs, and how that affects the structure of a clause
-

Explore the relationship between particular text types, audience, purpose and context and analyse language features used by signers to create cohesion and achieve the purpose of the text

[Key concepts: audience, purpose, coherence; Key processes: noticing, analysing]

(ACLASFU249)

- analysing a videoed class debate to see how language is used to justify opinions and to persuade others
- conducting an in-depth analysis of a selected sign text, taking into account audience, purpose and topic to explain language choices made by the signer
- expanding understanding of textual conventions, for example by explaining why signers choose alternatives to actor-verb-undergoer in a real text to topicalise the important point
- noticing how signers can compare or contrast ideas by locating things in the same or opposing sides of signing space
- noticing how signers construct cohesive and coherent texts through the use of text connectives such as lexical signs THEN or G:WELL or NMFs and pausing
- identifying all the ways a signer refers to the same referent throughout a text to create cohesion

Language variation and change

Elaborations

Understand that Auslan has evolved and developed through different periods of influence and cultural and societal change
[Key concepts: language variation, standardisation, change, language borrowing, adaptation; Key processes: researching, interviewing, comparing, identifying, analysing, discussing]

(ACLASFU250)

- recognising that there is a greater degree of flexibility and variability in 'oral', face-to-face languages such as Auslan compared to spoken/written languages passed on from parents to children, for example, less standardisation and minimal 'frozen texts', and considering reasons for such differences
- researching different aspects of variation in the use of Auslan, considering influences such as geographical location, social groupings, history, educational experience, age of learning, family background and contact with Signed English or other languages
- considering the effect that expanding sign language interpreter services might have on standardising Auslan, especially in the areas of education and medicine
- interviewing older members of Deaf families or Deaf communities and reporting back to the class about any differences in signing they noticed, such as more use of fingerspelled words, less use of NMFs and depicting signs, or the use of different signs, such as FILM (old sign), TOILET (old sign)
- recognising that languages constantly expand to include new words, signs and expressions due to influences such as changing technologies and digital media, for example, COMPUTER, COMPUTER-MOUSE, INTERNET, FACEBOOK, WIFI, SELFIE
- understanding that greater contact between signers internationally has led to increased borrowing between sign languages, for example, signs that refer to different nation states and cities around the globe (for example, the old Auslan sign for America versus the current sign), or the ASL vehicle handshape in DSs
- identifying changes to Auslan that reflect changes in social relationships and community attitudes, for example in relation to words/signs such as DEAF^DUMB, DISABILITY, HEARING^IMPAIRED/H-O-H, DEAF^WORLD/DEAF^COMMUNITY, HUMAN^RIGHT

Language awareness

Elaborations

Understand the range of factors that influence the profile, diversity and distribution of Auslan use in the wider Australian society, and consider the concept of Auslan vitality in comparison with other spoken and signed languages used around the world

[Key concepts: influence, diversity, language vitality, language documentation; Key processes: researching, investigating, exploring, describing, analysing]

(ACLASFU251)

- understanding that strong and healthy languages are those used by many people across generations in most domains to communicate about most topics
- mapping the distribution of Auslan users across Australian states and demographics, using data from censuses and other sources to present findings in graph/visual representation forms
- describing the role religion has played in influencing the usage and spread of Auslan, for example, through religious orders, early Deaf Societies and Bible translation projects
- considering the impact of historical international events such as the Milan Congress (1880) and the linguistic recognition and documentation of signed languages in the 1960s and 1970s on the use of signed languages in education, and on deaf people's feelings of ownership and pride in their languages
- analysing the impact of migration and the settlement of deaf people from the UK and other countries on the development of Auslan
- investigating the geographical location, origins and history of deaf schools in Australia and the impact of these institutions on the transmission, use and status of Auslan
- exploring how Auslan is used by deafblind people and their role in the Deaf community
- investigating historical patterns of employment of deaf people in certain trades and fields of employment, and the impact these traditional domains have on the development of Auslan
- reflecting on the role of Auslan interpreters in raising awareness and understanding of Auslan in the wider community, and considering ways in which they influence the function and nature of Auslan, for example by the introduction of neologisms
- identifying language documentation as an important way of recording, transmitting and maintaining the vitality of languages
- recognising that some languages have no written form and have historically been passed on face to face/orally, and so are less well recorded and documented
- understanding that some languages used in Australia, such as English, have large numbers of users, while others, such as many spoken and signed Aboriginal and Torres Strait Islander languages, are endangered or in the process of being revived or reclaimed
- recognising that languages may be perceived as 'weak' or 'strong' based on community values and the existence of documentation and literature in the language
- exploring the vitality of different languages by obtaining information from the UNESCO interactive online atlas and/or Ethnologue to compare numbers of speakers/signers of different languages
- considering ways that Auslan is evolving due to various influences, including the capacity for new technologies to

store, record and share sign languages internationally

- exploring the role of globalisation in terms of what technology offers signed languages in terms of maintaining their vitality, for example, the use of ELAN for capturing and documenting Auslan
- understanding the importance of advocating for Deaf rights to address existing gaps in services, for example in relation to issues such as the increased provision of Auslan interpreters, Deaf interpreters or captioning
- responding to Deaf elders' guidance on how cultural values, beliefs and traditions are connected through shared life experience, language and visual ways of being, and how they are demonstrated in community behaviour and interactions with the wider community
- comparing strategies used by deaf and hearing adults to negotiate physical environments, for example, different behaviours at a bank of lifts, and identifying how deaf people draw on additional perceptual resources in ways hearing people are unaware of
- exploring technologies such as videoconferencing apps used by deaf people to communicate visually, to support social networks, to strengthen a sense of individual or shared identity as sign language users and to promote language vitality
- considering likely contemporary influences or pressures on Aboriginal and Torres Strait Islander signed languages and the possible impact on their future
- understanding how and why some deaf children face challenges with communication in hearing families or in social settings
- recognising the important role of deaf families and deaf schools in preserving and maintaining Auslan and cultural identity
- identifying behaviours, rights, roles and responsibilities in relation to the ownership and maintenance of Auslan and how such ownership rests with the Deaf community and is determined by traditional social groupings/families, significant places, history and stories
- describing the visibility and use of Auslan in the wider community, for example in television programs, on the news, at community events, sporting fixtures and in emergency announcements
- discussing the diversity of Auslan users in the Australian community, including people who are deaf, those who are hard of hearing and hearing people such as CODAs and interpreters
- identifying examples of deaf people who have been recognised for different reasons in wider Australian society, for example, Alastair McEwin or Drisana Levitzke-Gray, and discussing how such recognition contributes to broader awareness of Auslan in Australia
- researching the status and recognition of signed languages in other countries, for example, New Zealand, the USA, the UK or the Scandinavian nations, considering issues such as language rights, language documentation and development efforts

- identifying the changing status of significant sites in different international Deaf communities, for example, the loss of Deaf clubs or the closure of deaf schools in some countries, comparing this to the Australian context and reflecting on how such changes impact over time on Deaf communities and on Auslan
- recognising different philosophical and social views about deafness, considering the impact of varying attitudes on a deaf person's understanding of their rights and how they are represented and perceived in wider society

Role of language and culture	Elaborations
------------------------------	--------------

Understand that Auslan and Deaf culture are interrelated, that they shape and are shaped by each other, that their relationship changes over time and across contexts, and that they may be differently interpreted by users of other languages

[Key concepts: knowledge, value, transmission, reciprocity, responsibility, stereotype; Key processes: appreciating, discussing, reflecting, exploring, analysing, understanding, identifying, recognising, considering]

(ACLASFU252)

- appreciating distinctions between Deaf cultures and other cultural minorities, such as the fact that most deaf people are born to hearing parents and acquire Deaf culture in addition to the culture of their families of origin from peers and other Auslan users in school or adults in the Deaf community
- exploring the nature and effect of culture, for example by comparing the cultural concept of Deaf identity with a medical model of deafness
- analysing and discussing core cultural concepts reflected in Auslan, such as the collective nature of the Deaf community, respect for elders, the importance of reciprocity and responsibility, for example, the signing TAP-2h++ reflects the responsibility to share information and pass on knowledge
- understanding that knowledge about past and present Deaf people and cultural values are embodied in and transmitted through Auslan, for example ways of producing the sign for SIGN embody cultural meaning regarding distinctions made and values placed on fluent or awkward signing
- identifying cultural differences between the use of personal names in Auslan and in their own background language, for example, Auslan signers not using a person's name sign when addressing them directly, in contrast to the practice in many spoken languages
- considering cultural explanations for conversational strategies used by Auslan signers to avoid conflict and to maintain privacy, such as changing signing space and style, using indirect language such as signing lower or under the table, or fingerspelling instead of signing overtly
- appreciating the cultural value and importance of festivals and events in the Deaf community, such as NWDP, as celebrations of language, history, culture and identity
- recognising that Auslan signs change over time due to shifting cultural values and changing experiences, for example, the modification of the sign for APPRENTICE to refer to TAFE, and shifting values around the sign DEAF^DEAF as the sign for DEAF (culturally Deaf reference for deaf-mute) and unsuccessful attempts to reframe this with an audiological focus
- reflecting on the ways that culture is interpreted by others, for example by identifying how stereotypes about deaf and hearing people influence perceptions
- understanding that 'sound' is accessed differently in Deaf culture, that the meaning and importance of sound in deaf people's lives is usually not the same as in hearing people's experience
- observing that concepts may be culture and language specific, for example in relation to time and space, as in the spatial mapping of timelines in Auslan

Years 9 and 10 Achievement Standard

By the end of Year 10, students interact with peers, teachers and others using Auslan to communicate about personal interests and broader issues relating to the Deaf community. They participate in class discussions, explaining and clarifying positions, asking follow-up questions, using non-manual features for topicalisation or negation and responding to each other's comments, for example IF DS:place-person DEAF TEACHER MEANS DEAF HEARING STUDENT EQUAL_{-all}. They initiate and sustain interactions; ask for repetition, clarification or confirmation; use more elaborate sentence structures, such as embedding clauses; and use discourse markers such as SURPRISE, INCREDIBLE, WOW or UM. They engage in different processes of collaborative learning, including planning, negotiating and problem-solving, using familiar and some spontaneous language. They follow protocols when interacting with each other or with interpreters or Deaf visitors to the classroom, for example by interrupting conversations appropriately, waiting for eye gaze or for the signer to finish, or by providing context for a new participant joining a conversation. Students locate, interpret and analyse information from a variety of signed texts, such as announcements, news reports and vlogs, using context and knowledge of depicting conventions to work out unfamiliar meaning. They demonstrate understanding by paraphrasing, summarising and explaining main ideas, key themes or sequences of events. They interpret different types of creative and imaginative texts, such as Deaf performances or different expressive art forms, describing and comparing their responses. They plan, draft and present informative and imaginative texts, linking and sequencing ideas using conjunctions such as BUT or IF... THEN... as well as joining clauses with NMFs to build cohesion and to extend clauses. With support, they use constructed action (CA) to portray characters in a narrative, modify indicating verbs for non-present referents with increasing accuracy across a text, for example PRO1 ASK_{-her} and use more complex entity depicting signs, for example DS(point):man-walks-slowly. They translate and interpret texts and create bilingual texts and resources to use in the wider school community, comparing different interpretations and making decisions in relation to dealing with instances of non-equivalence. Students explain culturally appropriate and ethical behaviour for interpreting and translating texts, and consider potential consequences of inaccurate interpreting. They reflect on how their own ways of communicating may be interpreted when interacting with deaf people, and modify elements of their behaviour such as the use of eye contact, facial expression or body language as appropriate.

Students identify and describe instances of CA in signed texts and explain how signers use CA and depicting signs in composite utterances. They identify and classify non-manual features in signed texts and describe their function. They know that signs can be iconic in a number of ways, and identify iconic signs that represent a whole object or part of an object. They distinguish between viewer and diagrammatic space, including whether viewer space refers to referents that are present or non-present. Students investigate and analyse the nature of variation in the use of Auslan, explaining influences such as geographical location, social groupings and history, educational experience, age of learners, family background and degree of contact with Signed English or other languages. They make comparisons between the ecologies of Auslan and signed languages in other countries, in relation to issues such as language policies and rights, advocacy, reform and language vitality. They identify factors that help to maintain and strengthen the use of Auslan, such as intergenerational contact and bilingual school programs. Students know that Auslan plays an important role in the expression and maintenance of Deaf culture and in assuring the rights of every deaf person.

Glossary

Accuracy

The production of structurally correct forms of the target language.

Active watching

Active watching or viewing, instead of active listening, is required in an Auslan class. Students concentrate visually on the reception and understanding of the signed message.

ALLP

Australian Language and Literacy Policy.

Annotation

A digital code, note or comment on a video file that identifies something about the language; for example, what signs are used or where there is a particular handshape.

Articulatory

Relating to the physical movements required to produce language.

ASL

American Sign Language. Although signed languages around the world share some similar properties, they are in fact quite different, particularly at the lexical level.

Aspect

How the action or event a verb describes happens over time, for example, it can be ongoing or completed.

Aspectual marking

Changes made to a verb to show aspect.

Audience

Intended readers, listeners or viewers.

Audism

The notion of superiority based on the ability to hear. Like other forms of oppression, such as racism or sexism, audism stigmatises deaf people and limits their potential. The term was first coined by Tom Humphries in 1977.

Authentic texts/materials

Texts or materials produced for 'real-life' purposes and contexts, as opposed to being created specifically for learning tasks or language practice.

Auxiliary verb

A verb that combines with another verb in a verb phrase to form tense, as in will, or mood, as in should or can.

Backchannel

Responses given by the receiver of a message in a conversation that serve a social function, such as showing attention or nodding without interrupting the signer or giver of the message.

BANZSL

The family of sign languages which encompass British, Australian and New Zealand Sign Languages.

Bilingualism

The ability to use two or more languages.

Biography

A detailed account of an individual's life; a text genre that lends itself to different modes of expression and construction. In the context of intercultural language learning, the concept of biography can be considered in relation to identity, to the formation of identity over time and to the understanding that language is involved in the shaping and expressing of identity.

Body-anchored signs

Signs that make contact with a location on the body or use the whole body and therefore cannot easily be moved around in space.

BSL

British Sign Language.

Buoys

A sign produced with the non-dominant hand held in place to represent something while the dominant hand continues to sign something else.

Character space

See *Frames of reference*.

Citation form

The basic form of a sign, without modifications, as found in a dictionary.

Clause

A basic chunk of propositional meaning, referring to a happening or a state. Information in Auslan clauses may be either “told” or “shown” (using CA or depicting signs) or a mix of both.

Cochlear implant

A small electronic device that can be surgically inserted into the inner ear to provide sound signals to the brain.

CODA

Child of Deaf Adults; the term that typically refers to hearing children of deaf parents, who often use a signed language as their first language in their family of origin.

Cohesion

The use of a range of language features to link parts of a signed text together, making it easy to follow and to understand referents in the text.

Cohesive devices

Features of language used to make texts cohesive, such as connectives, ellipses and the use of space in a text.

Communication

A mutual and reciprocal exchange of meaning.

Communicative competence

An acquired capability to understand and interact in context using the target language (TL). Defined by the use of appropriate phonological, lexical, grammatical, sociolinguistic and intercultural elements.

Comparative

A form of adjective used to compare one thing with another, such as tall versus more tall.

Comprehension

An active process of making/constructing/deciphering the meaning of language input through listening, reading, viewing, touching (as in braille or tactile signing) and through combinations of these modes. It involves elements of decoding, working out meaning, evaluating and imagining. The process draws upon the learner's existing knowledge and understanding, text-processing strategies and capabilities; for example, making inferences or applying knowledge of text types and social and cultural resources.

Conjunction

A type of word or sign that joins signs, phrases or clauses together such as but or or.

Connective

A means of linking a group of signs to whatever comes before, such as s-o or the gesture g:well.

Constructed action

Constructed action (CA), also called role-shift, is a discourse strategy used in signed languages when signers use their own face and body to represent actions, signs, thoughts or feelings of a referent in a text. The referent can be themselves at another time, a different character, or something thought of as an animate entity.

Conventionalised sign

A sign or sequence of signs that has developed and become established over time to have an agreed meaning; for example, lexicalised depicting signs such as meet or line-up.

Corpus

A collection of texts that have been annotated to be machine-readable and can be analysed; for example, Auslan, BSL and NGT corpora that have been collected and are available online.

Create

Develop and/or produce signed, spoken, written or multimodal texts in live, print or digital forms.

Cues

Sources of information used to facilitate comprehension of language that may be visual, grammatical, gestural or contextual.

DDA

Disability Discrimination Act.

Deaf community

A local, national or transnational network of people who share the language and culture of Deaf people and a history of common experiences. A primary unifying factor in Deaf communities is the use of sign language.

Deaf culture

The beliefs, values, traditions, history, social norms, literary traditions and art shared by deaf people who belong to the Deaf community. Culture is understood as a framework in which things come to be seen as having meaning. It involves the lens through which people:

- see, think, interpret the world and experience
- make assumptions about self and others
- understand and represent individual and community identity.

Culture involves understandings about 'norms' and expectations, which shape perspectives and attitudes. It can be defined as social practices, patterns of behaviour and organisational processes and perspectives associated with the values, beliefs and understandings shared by members of a community or cultural group. Language, culture and identity are closely interrelated and involved in the shaping and expression of each other. The intercultural orientation to language teaching and learning is informed by this understanding.

Deaf ecosystem

A network of businesses, services and connections owned or managed by deaf people in positions of influence and authority, who share this social or political capital with other deaf people in culturally appropriate ways, so contributing to the status and social connectedness of the larger Deaf community. Examples of such reciprocity and support include sponsorship, profile-raising, the sharing of skills, expertise and knowledge, status support and social entrepreneurship opportunities.

Deaf eyes

A reference by some scholars to the cultural lens through which the world may be viewed by a Deaf person. It can also refer to deaf people's ability to process simultaneous information through enhanced peripheral vision, as deaf people rely on a wider range of acute visual input rather than sound.

Deaf family

A family in which deaf people appear in two or more consecutive generations. Deaf families have a crucial role in Deaf communities as they carry linguistic and cultural knowledge and expertise between generations, and disseminate this knowledge among other deaf individuals within their community, most of whom rely on peer-to-peer transmission of sign language and Deaf culture.

Deaf gain

A term used to reframe the term 'deaf', from the traditional pathological perspective of 'hearing loss' often held by wider society to a view of deafness through the lens of bicultural diversity. Being deaf is seen as an individual and social gain and as a positive form of diversity that involves cognitive and sensory changes that have the potential to contribute to the greater good of humanity.

Deaf interpreter

A specialist who provides interpreting and translation services, often working between a signed language, a form of a spoken/written language, another signed language or other visual and tactile communication forms. As a deaf person, the Deaf Interpreter has a distinct set of formative linguistic, cultural and life experiences that enables more nuanced comprehension and interaction in interpreted events than is possible for most hearing sign language interpreters.

Deaf place

A site of historical or cultural significance in the Deaf community; usually connected with traditional meeting places of deaf people, such as schools or centres of regular social, religious or sporting gatherings. A Deaf place may continue to have cultural and historical significance for the community when no longer used for its original purpose or formally owned by deaf organisations. Deaf places are often sites where sign languages and Deaf culture are learned, as most deaf people do not learn them from deaf families at home.

Deaf space

A space in which deaf people feel comfortable interacting and using signed language. Deaf space can encompass established Deaf place(s) or spaces which have been customized to enhance visual access for deaf people, for example with good lighting, clear sightlines and architectural or design features which allow deaf people to navigate, communicate and elicit environmental and social information easily. Classrooms and workspaces can be modified to incorporate Deaf space design principles.

Deaf/deaf

When referring to deaf people who belong to a linguistic and cultural minority known as the Deaf community, the 'D' may be capitalised in reference to the individual, the group, or the culture in order to accord respect and deference, for example, the Deaf community. This is similar to referring to French people, members of the Macedonian community or Indonesian culture. When referring simply to audiological status or when cultural affiliation is not known, as in the case of a person with a hearing loss in general, the lower case 'd', as in 'deaf', is the more common usage.

Deafhood

The term coined by Dr. Paddy Ladd to describe the process by which deaf individuals become self-actualised; the journey they travel to develop their Deaf identity and to maximise their potential.

De-centre

A capacity to step outside familiar frames of reference, to consider alternative views, experiences and perspectives and to look critically and objectively at one's own linguistic and cultural behaviour.

Definite/indefinite reference

A referent may be marked as definite when it is clear from context which particular referent is being discussed. It is marked as indefinite if it is being mentioned for the first time or the signer does not mean any particular referent.

Depicting sign

Depicting sign (DS) is a partly lexical sign that is highly iconic and can be modified in a gradient way by a signer. Depicting signs can act as verbs or nouns depending on their use in context.

Entity depicting signs are those in which the handshape represents an object, and the object can move around or be located in space mirroring real-world movement and location.

Handling depicting signs are those where the handshape represents how a human hand holds or touches an object and the movement shows how something is moved around or located in space

Size and shape specifiers (SASS) depicting signs are depicting signs in which the handshape and movement are used to outline the size or shape of an object. The handshape is formed as if handling the actual entity being described (or a miniature of it) and the movement is a mirror of the hands, as if they are tracing the size and shape of the object.

Dialect

A variant of a language that is characteristic of a region or social group.

Digital texts

Audio, visual or multimodal texts produced through digital or electronic technology which may be interactive and include animations and/or hyperlinks. Examples of digital texts include DVDs, websites, online literature and presentations.

Directional indicating verbs

See *Indicating verbs*.

Discourse marker

Signs or gestures used to direct the flow of a signed text that indicate how something relates to something earlier or how a signer feels about what they are signing.

ELAN

A free software program that allows a user to document, analyse and annotate multimedia recordings of sign language, spoken language and gesture.

Elder

A person in the Deaf community afforded leadership or mentorship status by the community. Elders are typically deaf people who have been custodians of the Deaf community's traditions, language and cultural values and are widely considered role models and respected mentors by many members of the Deaf community. They include pioneers of advocacy, education and community development, and those who have contributed to the leadership, advancement and achievement of the Deaf community.

Enacting

Showing or constructing the action, thoughts or language of a referent using the whole body or part of the body. Enactments are context-dependent for meaning.

Entity depicting signs

See *Depicting signs*.

Etymology

The study of the origins of words or signs: that is, where they came from historically.

Eugenics

A social philosophy advocating improvement of the human population through genetic intervention, either by discouraging the reproduction of those with perceived less desirable traits, for example by sterilization, genetic selection, or in extreme cases by killing those with the trait, or by encouraging the reproduction of those with perceived desirable traits. At various times and places in history Deaf people have been subject to eugenic beliefs and practices.

Eye gaze

The direction in which a signer is looking, which can have conventional associated meanings in Auslan, such as marking a shift into character in Constructed Action.

Filler

A sign or gesture used in conversation to signal a pause, hesitation or unfinished contribution. For example, wriggling fingers with hands upheld.

Fingerspelling

The manual representation of the letters of the alphabet of a spoken-language. In Australia, New Zealand and the United Kingdom, a two-handed fingerspelling system is used to fingerspell English letters. In many other countries, a one-handed fingerspelling system is used.

Fluency

An ability to produce signed, spoken or written language with appropriate phrasing, rhythm and pace. It involves the smooth flow of language, lack of hesitation or undue pausing and characterises the largely accurate use and automatisisation of the target language.

FM systems

Systems that operate on a special radio frequency and allow the transmitter microphone used by a speaker, such as a classroom teacher, to channel sound directly to the hearing aid worn by a deaf person within range of the system. Reduction of background noise in the setting and channeling of the voice directly to the hearing aid enables the FM user to hear the speaker more clearly.

Formational elements of signs

The elements of the structure of signs; the physical way they are formed. (See *Parameters*).

Frozen texts

Texts of a static nature that are usually culturally embedded, such as the Australian national anthem.

Fully-lexical signs

Signs with a form that is fully specified, that is, the handshape, movement and location are conventional. Lexical signs make up a large proportion of the signs in a sign language dictionary.

Gesture

A way of communicating with the hands that uses largely unconventional forms (except for conventional gestures such as the thumbs up for *good*), and that represents more imagistic thought of a speaker or signer. In spoken languages, gestures co-occur with speech, and in signed languages they form gestural overlays.

Glossing

A form of annotating signed languages, as they have no written form in the traditional sense. The gloss conventions used in the Auslan curriculum for sign notations are based on Johnson and Schembri (2007) and include the following elements: The English gloss of a sign written in upper-case letters (most commonly associated or nearest translation of the sign in English); lexical matching (where one sign uses a number of English words to gloss its meaning, they are joined together, eg look-back); fingerspelling (shown by s-p-a-c-i-n-g); the use of 'g:' to signal gesture; the abbreviation of personal pronouns (pro1, pro2) and possessives (poss1, poss2); referral to pointing signs as pt; depicting signs (ds[handshape label]: description of what is depicted); indication of reduplication by the symbol '+'; and the use of a bar above a sign to show NMFs.

Grammar

The description of language as a system. In describing language, attention is paid to both structure (form) and meaning (function) at the level of the sign/word, the sentence and the text.

Handling DSs

See *Depicting signs*.

Handshape

The conventional form of the hand in a sign.

Horizontal language transmission

The term used to describe the process by which deaf children born into hearing families and whose parents do not know sign language learn the language. Typically children learn language through the process of vertical transmission, from the preceding, older, generation who share the language. This is less common for deaf children, who often acquire sign language from deaf peers, particularly those who come from deaf families.

Iconicity

The relationship between a sign and the thing it represents, such as the sign for BABY looking like a person rocking a baby in their arms.

Fully-transparent sign - A sign with a visual-relationship so clear that non-signers could guess the meaning, such as the sign for DRINK, where the handshape looks like a person holding a cup and drinking.

Translucent sign - A sign with some relationship between form and meaning but not obvious to a non-signer, such as the sign for FLOWER.

Arbitrary sign - A sign that has no relationship to the referent, such as the sign for THING.

Identity

A person's conception and expression of individuality or group affiliation, self-concept and self-representation. Identity is closely connected to both culture and language. Thinking and talking about the self is influenced by the cultural frames offered by different languages and cultural systems. Identity is not fixed. Language learners' experiences with different linguistic and cultural systems introduces them to alternative ways of considering the nature and the possibilities associated with identity and community affiliation.

Indicating verbs

A subset of verbs which can have their start or end location modified or be moved around in space to show who, what or where is involved in the verb.

directional indicating verbs can be moved meaningfully in space

locatable indicating verbs cannot change direction but can be meaningfully signed in a non-neutral location.

Intercultural capability

An ability to understand and to engage in relationship between language, culture and people from diverse backgrounds and experience. This involves understanding the dynamic and interdependent nature of both language and culture, that communicating and interacting in different languages involves interacting with values, beliefs and experiences as well as with signs, words and grammars. An intercultural capability involves being open to different perspectives, being flexible and curious, responsive and reflective; being able to de-centre, to look objectively at one's own cultural ways of thinking and behaving, and at how these affect attitudes to others, shade assumptions and shape behaviours. Characteristics of an intercultural capability include cognitive and communicative flexibility and an orientation and ability to act in ways that are inclusive and ethical in relation to diversity and difference.

Intercultural language teaching and learning

An orientation to language teaching and learning that informs current curriculum design; framed by the understanding that language and culture are dynamic, interconnected systems of meaning-making; that proficiency in an additional language involves cultural and intercultural as well as linguistic capabilities. The focus is on developing communicative proficiency and on moving between language–culture systems. It includes the reflexive and reciprocal dimension of attention to learners' own language(s) and cultural frame(s).

Interjection

A class of word or sign that occur on their own and express an emotion such as wow or surprise.

International sign

A pidgin form of communication used, for example, by deaf people at international gatherings when there is no shared sign language known by all participants. An organised system of signs, gestures and non-manual signals that consist of some conventional lexical items and a number of borrowed elements from several signed languages, including highly visually motivated forms of signs and gestures. International Sign is endorsed by the World Federation of the Deaf.

Interpret

In the context of school based language learning, interpret refers to two distinct processes:

- the act of translation from one language to another
 - the process of understanding and explaining; the ability to conceive significance and construct meaning, and to explain to self or others.
-

ISL

Irish Sign Language.

Language

A human cognitive and communicative capability which makes it possible to communicate, to create and comprehend meaning, to build and sustain relationships, to represent and shape knowledge, and to imagine, analyse, express and evaluate.

Language is described and employed:

- **as code** – comprising systems, rules, a fixed body of knowledge; for example, grammar and vocabulary, sound, sign, gesture and writing systems
- **as social practice** – used to do things, create relationships, interact with others, represent the world and the self; to organise social systems and practices in dynamic, variable, and changing ways
- **as cultural and intercultural practice** – means by which communities construct and express their experience, values, beliefs and aspiration
- **as cognitive process** – means by which ideas are shaped, knowledge is constructed, and analysis and reflection are structured.

Language building

Activities and tasks that contribute to building archives from data of authentic language samples to help protect a language and culture and to expand understanding of usage.

Language comprehension

A process of interpreting meaning from signed, spoken, written, tactile and multimodal representations of language.

Language functions

Varied ways in which language is used to achieve particular purposes; for example, to persuade, to entertain, to apologise, to argue or to compliment.

Language health and vitality

The extent of the demand and the use of a language in the community and projections for its future usage. A language that is spoken or signed by a larger number of users and is available in several domains of use in society is likely to be more healthy and to have greater vitality and survival prospects.

▶ Auslan

Language preservation and revitalization

The effort made to prevent languages from becoming endangered or unknown, for example, by increasing the number of users of the language, creating resources and documenting the language to preserve it.

▶ Auslan

Language systems

Elements that organise and represent how a language works, including the phonological, syntactic, semantic and pragmatic systems of signs and rules that underpin language use. These systems have to be internalised for effective communication and comprehension.

Language transmission

The way a language is passed on, for example through speech, writing and signing, from one generation to the next (vertical transmission) or from peer to peer (horizontal transmission).

Lexical signs

See *Fully-lexical signs*.

Lexicalisation

The process through which a non-lexical or partly-lexical sign becomes frequent enough to become a fully-lexical sign with a conventional meaning and form listed in a dictionary.

 Auslan

List buoy

A sign where the fingers on the non-dominant hand are used to represent the items in a list while the dominant hand signs something about those items.

 Auslan

Locational indicating verbs

See *Indicating verbs*.

Locatives

Words or phrases that tell a place or location.

Manner

A type of adverb that tells how something happens.

Metalinguage

Vocabulary used to discuss language conventions and use (for example, language used to talk about grammatical terms, such as *sentence*, *clause*, *conjunction*; or about the social and cultural nature of language, such as *reciprocating*, *register*).

Metaphor

The use of a conceptual idea to describe another idea, such as thinking of time in terms of space.

Metaphorical iconicity

The use of metaphor to allow iconic signs to represent abstract concepts; for example, the sign remember is iconic, in that it shows holding something in the head, but metaphorical because thoughts are not physical objects that can be held in the head.

Mouthing

The complete or partial articulation of a spoken word while signing, occurring without voice. This does not include mouth gestures, such as 'pah', which are not mouthings of English words.

Multi-channel signs

The small number of signs that often occur with a particular mouth movement. Although such mouth movement is often described as obligatory, recent research shows that they do not always occur with a mouth gesture or with the same mouth gesture each time.

Name sign

A sign used to uniquely identify a person, typically bestowed by a member of the Deaf community, and agreed upon by the individual.

Narrative

A story of events or experiences, real or imagined.

Native signers

Signers who have one or more deaf family members and have therefore had access to Auslan from birth, meeting expected milestones for the natural acquisition of language in infancy and early childhood.

Native-like signers

Fluent signers who have used Auslan as their primary language since their early school years, and/or demonstrate native-like levels of proficiency in the language.

Non-body-anchored signs

Signs that are made in neutral space and do not make contact with a location on the body. These signs can easily be moved around in space.

Non-lexical signs

Symbolic units of meaning that are created on the spot in a particular context, particularly in constructed action but also gesturing. These signs cannot be listed in a dictionary.

Non-manual features

Non-manual features (NMFs) are meaningful elements of a signed message involving any part of the body other than the hands.

Numeral incorporation

Changing the handshape of a sub-set of time signs to include a number, such as two-weeks-ago or in-two-years.

NWDP

National Week of Deaf People; a week of cultural celebrations and festivals organised by Deaf Australia, designed to raise awareness of the Deaf community and to celebrate Deaf pride, Auslan, and the life and culture of deaf people.

NZSL

New Zealand Sign Language.

Observer space:

See *Frames of reference*.

Oralism

A philosophy with an emphasis on teaching deaf children to communicate using speech; to depend on lip-reading and amplification devices rather than using sign language.

Orientation

The direction the palm or fingers of a handshape point in a given sign.

Ownership

The understanding that a natural sign language belongs primarily to the Deaf community from which it evolved. Historical oppression and marginalisation of Auslan users have created cultural and political sensitivities regarding the use, planning, teaching and research of signed languages. Deaf people, as custodians of Auslan, have primary authenticity in matters concerning their language and culture.

Parameters

The five physical features that describe how a single sign is produced: handshape, movement and location (main parameters), and orientation of handshape and non-manual features (minor parameters).

Partly-lexical signs

Signs with a form that is not fully specified that is, the handshape, movement and/or location can change, as in the case of pointing signs (direction or handshape can be modified), or depicting signs (movement and location are often created on the spot).

Path movements

Movement of the hands from one location in space to another while producing a sign.

Pathological model of deafness

The view that deafness is solely a pathology or medical deficit, to be ameliorated by medical or technological interventions and intensive habilitation of speech and audition. The pathological model discourages the use of signed languages and of educational or social settings which bring deaf people together.

People of the Eye

A term that references the highly visual nature of deaf people.

Perceptual systems

The visual and kinesthetic means by which signers receive/produce signs

Performance

The use of the language in real situations, putting language knowledge into practice. Performance involves accuracy, fluency and complexity.

Pragmatics

The study of how context affects communication, for example, in relation to the status of participants, the situation in which the communication is happening or the intention of the speaker.

Productive language use

One of the two elements of communication through language (see *Receptive language*), involving the ability to express, articulate and produce utterances or texts in the target language.

Prosody

Changes in facial expression and other NMFs, such as the duration of signs, eye-gaze, head and torso position, pausing with or without a hold of a sign, tension of hands and eye closure; used for many purposes, such as to mark clauses and their relationships, to accentuate or diminish emphasis and to regulate turn-taking.

Protocols

Principles and customs which guide behavior; systems of cultural and social rules specific to a linguistic and cultural community.

Proxemics

The use of space, posture and touch as elements of communication.

Question

A clause structured to elicit information. Questions can be categorised as either *closed* or *open* in terms of the information required to answer them:

- Closed questions require predictable answers; for example: What time is it? Do you like cats?
 - Open questions have unknown and unpredictable answers that invite and support more elaborated and extended contributions from learners; for example, What do you think about that?
 - Questions can be structured as either yes-no or wh- questions, which require different non-manual features
- Yes-no questions are closed questions for which the response can only be yes or no
- Wh- questions can be closed or open questions, but include the signs WHO, WHAT, WHERE, WHEN, WHY, HOW, HOW-MUCH, or HOW-MANY?

Recast

A strategy frequently used as an instructional technique, where the teacher repeats a student's incorrect construction back to the student in correct form; a naturalistic repair of the language learner's error, modelling the correct version in a manner that encourages continued communication.

Receptive language

One of the two components of communication through language (see *Productive language*): the 'receiving' aspect of language input, the gathering of information and making of meaning via viewing, listening and reading processes.

Reciprocity

An integrating element of intercultural communication that involves movement and relationship, interpreting and creating meaning, and understanding the process of doing so. It involves not only the exchange of words but also an exchange of understanding between the people involved. It comes into play when the learner 'self' encounters and interacts with the 'other' (the target language speaker or the target language itself as text or experience); when the existing language code and cultural frame encounters a different code and frame. This experience impacts on the learner's perspective and sense of identity and on their usual ways of communicating and exchanging language and values. Reciprocating involves conscious attention to the process: attention to the self (intraculturality) and to the likely impact of the self on the other person involved (interculturality). Things previously taken for granted are noticed in reference to new or different ways.

Key elements of reciprocating include conscious attention, comparison, reflection and analysis:

- recognition that both partners in an exchange are involved in the 'effort of meaning'
- willingness to work out what the other person means, the cultural and social context they are speaking from and the perspectives which frame what they are saying
- making necessary adjustments to their own and each other's input, orientation and stance that will help the exchange to be successful
- exchange of goods, services and knowledge in a culturally valued transaction within the Deaf community.

Referent

The person or thing being talked about with a sign or phrase

Register

A variety of language used for a particular purpose or in a particular situation, the variation being defined by use as well as user. For example, informal register or academic register.

SASS

See *Depicting signs*.

Scaffolding

Support provided to assist the learning process or to complete a learning task. Scaffolded language support involves using the target language at a level slightly beyond learners' current level of performance, and involves incremental increasing and decreasing of assistance. Task support provides assistance to perform just beyond what learners can currently do unassisted, to progress to being able to do the task independently. Scaffolding includes modelling and structuring input in ways that provide additional cues or interactive questioning to activate existing knowledge, probe existing conceptions or cue noticing and reflecting.

Shadowing

The simultaneous watching and copying/shadowing of a signed text.

Sign language acronyms

National and regional signed languages are commonly referred to in the form of acronyms, for example: DGS - Deutsche Gebärdensprache (German Sign Language); BSL - British Sign Language; LSF - Langue de Signes Française (French Sign Language). A full list of acronyms and languages is available on Ethnologue.

Sign language families

Small groups of sign languages that have a high rate of similarity in their lexicons due to historical origins or geographic relationships; for example, BANZSL.

Signbank

An online Auslan language resource, including a dictionary of signs organised according to the structure of Auslan, information on Auslan, links to Auslan classes, inbuilt search features to explore setting-specific signs such as medical or educational signs, and links to video clips and signed examples in Auslan.

Signed English

Australasian Signed English was an artificial system of producing each part of English on the hands; developed by a committee in the 1970s for the purposes of teaching deaf children. Signed English is not widely used in the Deaf community and is not actively taught in schools today; however, it has significantly influenced the lexicon of Auslan in some age groups and regions.

Signed languages

Visual-gestural languages which evolve naturally in Deaf communities, through which signers use conventional and mutually agreed-upon symbols (signs) to communicate with each other. Signed languages have their own grammar and lexicon. They are not based on the spoken language of the country or region where the community is located. Signed languages are not universal. They are real languages, with a complete set of linguistic structures; complex and highly nuanced, as sophisticated as natural spoken languages.

Signing space

The area around a signer in which signs are articulated and can be modified.

Sociocultural model of deafness

The view that deaf people form a linguistic and cultural minority group comparable to other linguistic minorities. This viewpoint does not see deafness as a medical deficit or pathological condition. Although it may encompass the use of assistive listening devices and a range of communication options, it places high value on the use of signed languages and Deaf community networks.

Spatial mapping

The use by signers of the space around themselves to locate referents in discourse; the process of allocating a referent to a location, in order to keep track of who, what or where is being discussed.

Spatial modification

Changing a sign to point towards referents present in the environment or towards locations in the space around the signer associated with absent referents.

Superlative

A type of adjective used when comparing more than two things and identifying one that has the most of a feature, such as small versus worst small or most small.

Teaching team

Two or more teachers or instructors who combine their skills, knowledge and experience to develop and implement lessons in the classroom. In the context of teaching Auslan, a combination of a deaf and a hearing teacher may be linguistically and culturally appropriate, should a suitably skilled deaf teacher of Auslan not be available to work on their own.

Text

An identified stretch of language used as a means for communication or as the focus of learning and investigation. Text forms and conventions have developed to support communication with a variety of audiences in different contexts for a range of purposes. Texts can be signed, written, spoken or multimodal and in print or digital/online forms. Multimodal texts combine language with other systems of communication, such as print text, visual images, soundtrack, signs and/or spoken word, as in film or computer presentation media.

Textual cohesion

See *Cohesion*.

Time marker

A sign that refers to when an event occurred.

Topicalisation

Moving a sign or group of signs to the beginning of a clause to make it more prominent. In Auslan this is usually accompanied by particular non-manual features.

Translation

A process of translating signs/words/text from one language into another, recognising that the process involves movement of meanings and attention to cultural context as well as the transposition of individual words.

Transliteration

Writing a letter, sign or word using the closest corresponding letter, sign or word from a different language or alphabet.

Visual vernacular

A highly visual form of performance often incorporated into story telling which uses features of mime, gesture, NMFs and specific cinematic techniques in the production of signs. Techniques include close and distant focus, dissolving of visual images and cutting between scenes, objects and characters, and time distortion in the three dimensional delivery of visually presented information.

Visual-gestural languages

Signed languages are described as visual-gestural because they are received through vision and signed with hands, compared to spoken languages which are described as auditory-oral languages, as they are received through hearing and spoken with the mouth. The term is not equating signed languages with gesture in general.

Vlog

A common term for a video blog. As Auslan is a visual language, signers may choose to post online in Auslan via video rather than posting in written English.

Voice-off

The common protocol in an Auslan class to not use voice, as use of spoken English while signing can interfere with the acquisition of quality Auslan. The directive usually given to students is 'voice-off'.

VRS

Video Relay Service: A video relay uses visual technology to allow deaf users of Auslan to communicate over the telephone with hearing people via a VRS interpreter.

The Australian Curriculum Languages - Chinese

Overview

Context statement

The place of the Chinese language and culture in Australia and the world

China's official language is Modern Standard Chinese, or Putonghua (the common or shared language) in Chinese. The language is also referred to as Hanyu, the spoken language of the Han people, or Zhongwen, the written language of China. In Taiwan it is more usually called Huayu (Hwayu), the spoken language of people of Chinese ethnicity. This term is also used in Singapore.

A number of dialects remain in active use. In addition, the character system has undergone significant evolution, standardisation and simplification over time. In recent times, the need to create Chinese language texts in digital format has resulted in an international effort to standardise character forms and attribute a Unicode to each form so that computer operating systems internationally can generate and reproduce Chinese texts in both simplified and traditional/full-form characters. It is not common for new characters to be created. In contemporary overseas Chinese media, texts are commonly in either simplified or traditional/full-form characters, reflecting the diverse histories and preferences of these communities.

Communities of Chinese speakers are characterised by linguistic, cultural and geographic diversity and can be found in almost every country of the world. Many of these communities have a long tradition, and they are particularly strong on the Pacific coast of Canada and the USA, and in South-East Asia, Australia and some European countries. The history of the Chinese community in Australia extends back to the mid-1800s, and patterns of migration in recent decades have seen rapid growth in Australia's Chinese population.

Current links between Australia and China are characterised by bilateral relationships in trade and investment, as well as educational exchanges, and research and development in science and technology. The movement of people and ideas, as well as economic, cultural and educational exchange, adds to the richness and complexity of this relationship.

The place of the Chinese language in Australian education

Chinese has been taught in Australian schools since the 1950s, and experienced rapid growth in the 1980s as China undertook a policy of open-door and economic reform. Chinese has always been taught as an additional language in Australia, but schools are now catering to increasingly varied cohorts of Chinese language learners, including overseas-born Chinese speakers. The population of Chinese teachers has also changed, with growing numbers of teachers from the People's Republic of China now teaching in Australian schools.

Chinese is recognised as an important language for young Australians to learn as Australia progresses towards a future of increased trade and engagement with Asia.

The nature of Chinese language learning

For the purposes of the Australian Curriculum: Languages, 'Chinese' refers to Modern Standard Chinese, Pinyin Romanisation and simplified characters. Given the ongoing use of both forms of Chinese characters (simplified and full form) in the media, in education and in environmental print (advertisements and shop signs), some knowledge or awareness of both systems is an advantage, for Chinese speakers and Chinese learners alike. Although both writing systems and the range of dialects should be recognised in any Chinese language curriculum, the priority in education is Modern Standard Chinese and simplified characters as the internationally recognised 'official form' of Chinese.

English and Chinese have very different grammatical and vocabulary systems. The Chinese spoken language is characterised by a high number of homophones — tone-syllables that are used to represent more than one morpheme — each of which has its own particular character. The range of syllables in Chinese, while limited in comparison to English, does include some sounds unfamiliar to English speakers. The task of learning Chinese can be best addressed by a clear separation between learning to interact orally, supported by print materials in Pinyin, and learning to read and write, supported by texts and resources in characters.

Chinese characters are logographs composed of a number of components organised into a particular sequence within a square, parts of which are likely to suggest the sound and meaning of the whole character. Each character is a morpheme-syllable — it represents a syllable of sound and a unit of meaning. There are 3500 frequently used characters which are learnt by children in primary school in China. These characters are composed of approximately 500 distinct components which are used with varying degrees of frequency, and in different locations and for different functions. Literacy development (in terms of learning to read and write, and especially to map known oral vocabulary onto the appropriate written forms) is a time-consuming and challenging task. Additional characteristics of Chinese writing are that texts in Chinese characters do not display word-level spacing and texts may be written vertically and read from right to left down the page.

The Chinese spoken language is composed of approximately 400 syllables which may be used with one of four tones to create a total of approximately 1200 tone-syllables. Different systems have been developed to reproduce the sounds of the Chinese language using the Roman alphabet to assist learners who are already familiar with the Roman alphabet. Today the Pinyin system has international recognition as the principal means of representing the sounds of Chinese in alphabetic form. This system assists students of many language backgrounds to learn the correct sounds of Putonghua, and is an efficient means of text input when creating texts in characters using digital media. It is important to note that Pinyin is not recognised as a valid alternative to written expression in characters, as its readability is limited.

The diversity of learners of Chinese

Three pathways have been developed for Chinese, to cater to the three main cohorts of learners of Chinese in Australian schools. The Second Language Learner Pathway caters for students learning Chinese as a second or additional language. The Background Language Learner Pathway has been developed for students who have exposure to Chinese language and culture, and who may engage in some active but predominantly receptive use of Chinese at home. The First Language Learner Pathway caters for students who have had their primary socialisation as well as initial literacy development and primary schooling in Chinese, and who use Chinese at home. Schools will make decisions about which pathway best serves their students' needs, and teachers will use the pathways to cater for all learners by making any appropriate adjustments to differentiate learning experiences for their students.

The Australian Curriculum Languages - Chinese Second Language Learner Pathway - Years F–10 Sequence

Foundation to Year 2

The nature of the learners

Children enter the early years of schooling with established oracy skills in one or more languages and varying degrees of early literacy capability. For young students, learning typically focuses on their immediate world of family, home, school, friends and neighbourhood. They are learning how to socialise with new people, share with others, and participate in structured routines and activities at school. Typically, they have little to no experience of Chinese language and culture.

Chinese language learning and use

The systems of writing and speaking in Chinese are distinct. The sights and sounds of Chinese are also quite distinct from English. Students therefore are immersed as much as possible in the sounds and spoken words of Chinese, the meaning of which is made clear through participation in active listening and action-related talk, gestures, dramatisation and games. Students are introduced to common characters associated with routines and their immediate experience, and draw on explicit models to communicate.

Contexts of interaction

Students socialise in structured situations and activities in the classroom and at school, with a focus on topics such as self, home, family, and daily routines. They begin to explore Chinese language and culture by participating in experiences such as celebrations; where relevant, they identify similarities and differences between Chinese culture and their own and other cultures.

Texts and resources

Students engage with a variety of texts and text modes, including picture and caption books, songs, cartoons and movies. They hear the different sounds of Chinese in stimulus material such as stories read aloud, multimedia resources and internet sites.

Features of Chinese language use

Learners are immersed in listening to, viewing and reading Chinese. They become aware of Chinese as an alternative code to English and that other languages exist within their own classroom, their country and overseas. They begin to recognise the importance of tone in Chinese speech and observe that the sounds of Chinese can be encoded in Pinyin using familiar letters. Students view characters through appropriate text types that may be glossed in Pinyin. They learn to recognise characters that represent familiar objects and ideas and convey significant cultural meanings.

Level of support

Visual displays, gesture, and specific and concrete contextual clues are continuously used to support understanding. Teachers model correct language use, which provides the main source of students' development in Chinese. Learners will experiment with various software and technologies as communication tools.

The role of English

English is used by teachers and learners as appropriate for clarification, reflection, questioning and explanation, to support learners to comprehend and acquire Chinese.

Foundation to Year 2 Content Descriptions

Communicating

Socialising

Elaborations

Participate in class routines, structured conversations and activities using teacher-modelled tones and rhythms

[Key concepts: self, family; Key processes: participating, imitating, listening]

(ACLCHC001)

- reproducing the sounds used in greetings, for example, 早, 你好, 王老师, 再见
- listening to and engaging with the rhythms and sound patterns in conversations with teachers and peers, mimicking and practising the tones
- responding to teacher talk and instructions, for example, 站起来 and 请坐
- participating in games through action, for example, Simon Says (老师说)
- using pictures and prompt cards to participate in conversations
- introducing classmates (for example, 我叫Anna。我五岁) and expressing gratitude, for example, 谢谢
- learning to use gesture in communication to help convey meaning, for example, using Chinese finger gestures to show numbers
- sharing personal information about oneself and family with peers, for example, 我有弟弟。我爱我的妈妈

Interact with simple written texts in familiar contexts to contribute to class discussions

[Key concepts: self, family; Key processes: reading, planning]

(ACLCHC002)

- collecting examples of common Chinese characters found in familiar settings such as signs and labels, for example, 八 (8), 面 ('noodles'), 春 ('spring')
- discussing the differences between the Roman alphabet and characters, for example, compare the sound and shape of each
- labelling images of family from a provided list of characters, for example, 妈妈, 爸爸, 哥哥, 妹妹
- recognising and copying high-frequency characters relating to family and number, and noticing the formation and spacing of characters
- recognising the differences in describing family members in Chinese and English, for example, 'brothers' can be 哥哥 or 弟弟 in Chinese
- labelling and illustrating a class photo wall of a shared event or visit

Informing

Elaborations

Locate information about family and familiar events from spoken and visual sources and convey this information in simple visual and oral texts

[Key concepts: self, family, information; Key processes: describing, conveying]

(ACLCHC003)

- using teacher scaffolding (for example, 'We are going to listen for the information about the boy's family members: what words might be used?') to predict content before listening to spoken texts
- matching information heard with pictures or other visual clues, such as identifying colours and fruit in game and real-life situations
- sequencing pictures to describe events, guided by the teacher
- responding to questions and retelling information obtained from listening to and viewing scaffolded models of texts, such as a video clip or an avatar of a Chinese student
- practising tone, actions and gestures that support meaning to share information
- expressing preferences, for example, 喜欢, 不喜欢

Locate and present information about familiar objects, people and personal interests using visual and contextual cues

[Key concepts: self, family, home, routines; Key processes: obtaining, processing]

(ACLCHC004)

- tracing, copying and practising using individual characters, such as the numbers 1–10 (一, 二, 三, 四, 五...)
- cutting and pasting characters from a provided set to make a mini book
- selecting characters to label pictures and make a greeting card or postcard

Creating

Elaborations

Respond to and create simple Chinese stories, songs and rhymes, reproducing rhythm and sound patterns to express feelings

[Key concept: imagination]

(ACLCHC005)

- viewing cartoons or segments of movies based on traditional Chinese stories, such as 《大闹天宫》
- performing songs and dances in groups, for example, 《朋友就是你》 and 《生日快乐》
- reciting poems and nursery rhymes

Create short imaginative written texts using images and copied characters

[Key concepts: morality; Key processes: illustrating, copying]

(ACLCHC006)

- creating storyboards for well-known Chinese stories such as Mulan or Pangu (盘古)
- captioning or labelling illustrations on storyboards, practising the strokes of high-frequency characters
- participating in the shared reading of books, making predictions about characters and events from the cover and illustrations
- listening to Chinese idiom stories and retelling these stories using illustrations

Translating

Elaborations

Identify equivalent or similar Chinese words or phrases for familiar objects or terms in English

[Key concepts: similarity, difference; Key processes: translating, connecting, interpreting]

(ACLCHC007)

- matching words and phrases spoken in Chinese to images, objects or words in English, such as classroom objects (书包, 笔), to develop vocabulary
- stating the English equivalent of common expressions in Chinese (for example, phrases such as 对不起, 没关系; 谢谢, 不谢) for the benefit of classmates
- explaining the meaning of Chinese words to classmates

Identify common Chinese characters and words in Pinyin using contextual cues

[Key concepts: self, family, home, routines; Key processes: interpreting, analysing, copying, tracing, shaping]

(ACLCHC008)

- experimenting with using high-frequency Chinese sounds to transcribe simple common words into Pinyin, such as 我 wǒ
- developing a class list of contextual cues such as images, text structure and other features that would help with understanding meaning
- typing known or given list of Pinyin words into an online dictionary to turn the Pinyin into characters to express good wishes, such as 'Happy birthday' (zhù nǐ shēng rì kuài lè 祝你生日快乐!)
- using flashcards to indicate likes and dislikes, for example, 喜欢 / 不喜欢

Reflecting

Notice aspects of Chinese language and culture that are 'new' or 'interesting', and observe how relationships influence language use and own identity

[Key concepts: self, family, home, routines; Key processes: observing, comparing]

(ACLCHC009)

Elaborations

- examining the meanings behind Chinese family names and other related vocabulary
- having a shared meal of 饺子, 春卷 etc. and appreciating cultural diversity in the school community
- responding to questions by sharing with students in Chinese sister school personal information related to identity, for example, name, family name, zodiac sign, family members
- comparing learning in English with learning in Chinese, for example, learning about syllables and components
- presenting a collage or poster which represents aspects of their identity, using text and images
- observing interactions to notice cultural aspects such as use of voice to show courtesy, how disagreement is expressed, or smiling so as not to offend while saying 'too expensive'
- expressing personal responses to aspects of culture encountered when viewing images, such as of classrooms, home environments or street scenes in diverse contexts, responding to teacher prompts (for example, What do you see ...? What do you notice ...? How do you celebrate ...?), and relating to own experience

Understanding

Systems of language

Elaborations

Reproduce the four tones and recognise how they can change the meaning of words (ACLCHU010)

- noticing the tonal nature of spoken Chinese and using gestures to enhance the differentiation of tones
- applying tones to diverse sounds in Chinese to express different meanings, and recognising differences between words with different tones, for example, 妈 mā and 马 mǎ
- practising the pronunciation of syllables that are unique to Chinese, such as 女 nǚ, 下 xià
- working with classmates and teachers to identify initials (b, p, m, d, t, g, k etc.) that are similar to English consonants (f, l, n, v)

Recognise Chinese characters as a form of writing and Pinyin as the spelled-out sounds of spoken Chinese (ACLCHU011)

- differentiating Chinese characters from other forms of written expression, for example, the Roman alphabet, visual images (drawing)
- recognising that each character has meaning, and exploring the connection between meaning and form, for example, pictographs such as 人 ('person'), 日 ('sun')
- examining which initials and finals can be guessed from English, for example, 'mama' as opposed to 'gege'
- copying or tracing characters with attention to stroke order and direction
- identifying syllables that make up Chinese words, such as 小/老/鼠 (xiǎo/lǎo/shǔ), and understanding that words such as 熊猫 (xióng māo) have two syllables, with each syllable having a meaning
- making connections between words sharing a common syllable/morpheme, for example, 小狗、小猫、小朋友
- building new words by combining familiar meanings such as 红+苹果

Understand that Chinese sentences have a particular word order (ACLCHU012)

- replacing words in modelled sentences to express a personal meaning, for example, replacing 弟弟 in 我有弟弟 with 妹妹 to say 我有妹妹
- stating the subject of a sentence, for example, 我爱妈妈 is about 'I', and 妈妈爱我 is about 'Mum'
- recognising that simple statements in Chinese tend to follow English word order, but that questions do not, for example, 'Do you have a cat?' versus 你有猫吗?
- recognising that sometimes the verb 'to be' is left out in Chinese sentences, for example, 我五岁 rather than 我是五岁

Engage with familiar text types to predict meaning (ACLCHU013)

- viewing samples of children's books, and identifying headings and images, appreciating their role in supporting understanding of texts
- comparing similar texts in Chinese and English (for example, a poster for a movie, such as 《功夫熊猫》) and identifying major elements of the Chinese text

Language variation and change

Elaborations

Recognise that Chinese is a major community language in Australia (ACLCHU014)

- exploring the range of languages spoken in Australia and identifying people in the local community or in the media who speak a different language, for example, 'My mum's friend is from China, and she speaks Chinese'
- discussing why there are different languages spoken by Australian families and by classmates
- knowing that Chinese is spoken not only in China but also in other areas of the world, including Australia

Identify the features of formal language used in familiar contexts, such as at school (ACLCHU015)

- using titles to address teachers in Chinese, such as 王老师 instead of Ms Wang
- responding to expressions commonly encountered in Chinese classrooms, such as 起立 and explore the cultural meanings behind these

The role of language and culture

Elaborations

Describe how people use different languages to communicate and participate in cultural experiences (ACLCHU016)

- identifying interesting facts, for example, finding out what are the biggest celebrations in China and Australia, and comparing these celebrations
- engaging with the traditions and customs, festivals, celebrations and food of Chinese communities, recognising the value of learning about another culture in learning a new language
- participating in a shared meal, a New Year celebration or a Chinese performance, commenting on the experience and listening to the sounds of Chinese
- comparing gestures and body language associated with language use in different cultures, for example hand gesturing for emphasis and encouragement or recognising taboos within Chinese communication, such as pointing directly at someone

Foundation to Year 2 Achievement Standard

By the end of Year 2, students use spoken and written Chinese to communicate with teachers and peers. They participate in structured and routine interactions, such as using 谢谢, 再见, 请, using learnt sounds, formulaic phrases, and verbal and non-verbal responses. They respond to and receive information, for example, 你好, 你好吗? They follow simple instructions, including 排队, 请坐, 不要说话.. They use the four tones of Chinese but not always with accuracy. Students respond to short predictable imaginative and informative texts, expressing simple likes and dislikes (喜欢, 不喜欢). They can match characters to the meanings and sounds of familiar words, including numbers (八...), colours (红...) and family members (爸爸, 妈妈). Students use strategies such as imitation and basic contextual cues for comprehension. They create simple informative and imaginative texts by selecting and practising learnt characters and familiar words and phrases to describe, list, label and caption.

Students recognise that Chinese is a major language in Australia. They identify its distinctive systems of writing and speaking. They recognise the tonal nature of Chinese and know that characters are formed by strokes. Students differentiate between the Pinyin and characters associated with familiar objects in their immediate environment. They recognise the use of tone marks in Pinyin. They are aware of the word order of simple sentences. They recognise the conventions for using Chinese to communicate with family, friends and teachers. They recognise the similarities and differences between Chinese and Australian contexts, language and culture. They can identify themselves as learners of languages.

Years 3 and 4

The nature of the learners

At this level children are developing awareness of their social world and memberships of various groups, including of the Chinese class. They benefit from varied, activity-based learning which builds on their interests and capabilities and makes connections with other areas of learning.

Chinese language learning and use

The systems of writing and speaking in Chinese are distinct. Because of the role of character learning and its impact on reading and writing, learners can accomplish a higher active use of spoken language than written language. As a result, engagement with Chinese language is primarily through speaking and listening. Learners practise using Chinese through participating in action-related talk, and completing tasks while relying on teacher modelling, prompts and repetition. Students respond non-verbally to spoken Chinese in the classroom, and their understanding of Chinese is dependent on context, and on teacher intonation, gestures and facial expressions. They repeat speech and sounds from frequent and consistent teacher modelling and produce texts using familiar words or phrases.

Contexts of interaction

Likely contexts of interaction focus on everyday educational experiences and students' personal, family and social environments. These familiar contexts are represented in the classroom in structured and scaffolded situations.

Texts and resources

Key text types and contexts include short predictable texts, photo biographies, correspondence, and structured and scaffolded situations. Students engage with a variety of Chinese language texts, including short audiovisual texts, plays, fables, rhymes, songs and dance, extending their use and comprehension of Chinese language and culture. Students also produce simple oral and written texts. They are exposed to a wide range of Chinese voices and settings through the use of multimedia texts, simulations and performances.

Features of Chinese language use

Students discover the distinctive features of the spoken language and begin to use Pinyin and tone marks to practise syllables and tones they encounter in new words. They recognise that letters in Pinyin and English produce different sounds using different spelling conventions. Printed texts used in the classroom are mainly presented in Pinyin but may be glossed with characters. Students use Pinyin to write, knowing that characters represent the real form of writing in Chinese. They use a variety of communication modes, including oral communication in English and Chinese as well as mime and gesture.

Level of support

Chinese language use is scaffolded and prompted by the teacher, and teacher modelling of correct language use is the main source of oral and written language acquisition.

The role of English

English is used where it supports comprehension of and participation in Chinese interactions, and when discussing issues of comparison and contrast between languages and cultures.

Years 3 and 4 Content Descriptions

Communicating

Socialising

Interact with teachers and peers in social and class activities, exchanging ideas and opinions, using correct tones
[Key concepts: friendship, play, relationships; Key processes: participating, noticing, recognising, listening]

(ACLCHC017)

Elaborations

- giving personal information, facts and opinions in response to questions about people and aspects of daily life such as pets (我的狗很可爱), interests, routines and activities
- expressing opinions and commenting on personal experience using familiar expressions (for example, 很棒。太好了。我不喜欢...), and turn-taking (该你了) in class games
- contributing to class activities by asking for (我可以...吗?) and giving permission (可以), apologising and excusing (对不起), raising hand and using phrases such as 老师, 我不懂 to request assistance in learning activities
- initiating conversations in familiar social contexts by greeting participants and introducing themselves (for example, 你好, 我叫James, 我八岁, 我住在悉尼), displaying appropriate social manners to enhance communication
- giving information in response to questions such as 你的弟弟几岁?, and responding to turn-taking signals such as 该你了 or pauses
- following the teacher's instructions to participate in learning activities, for example, 我们听 Sam 说一说
- reporting group activity results to each other and the teacher, for example, Michael 喜欢打篮球, Sophie 喜欢游泳

Exchange simple correspondence with teachers and peers to contribute suggestions and arrange activities
[Key concepts: family, friendship, exchange; Key processes: participating, noticing, recognising, responding, listening]

(ACLCHC018)

- exchanging simple correspondence such as notes, postcards and text messages
- using ICT to adapt or create drawings to support written communication in cards, posters and visual displays
- adapting teacher-modelled language and using word lists to correspond with others, for example, creating cards to express good wishes and season's greetings to friends and family members (生日快乐, 母亲节快乐)

Informing

Elaborations

Obtain and process information about significant people, places and events from spoken and visual sources, and convey this information using learnt phrases and key words

[Key concepts: significance, self, family, neighbourhood, environment; Key processes: participating, noticing, recognising, responding, listening]

(ACLCHC019)

- identifying commonly used terms for daily activities such as 你几点睡觉? to contribute in an online discussion with sister-school friends
- describing people, places and things using actions and gestures, for example, to create a video clip to describe the school
- planning and presenting short reports about holidays, special events and places using photos, illustrations, captions, diagrams
- listening to short spoken texts containing some unfamiliar language, identifying key information, for example, name and phone number of speaker in a voicemail message, or the names, year level and age of Chinese children in a short interview

Locate factual information from sources and report this information to a known audience using learnt characters

[Key concepts: information, topic; Key processes: obtaining, processing, interpreting]

(ACLCHC020)

- identifying key words in familiar text types (for example, a floor plan, map or calendar) by recognising textual features (for example, bigger font for the name of the capital city on a map) and using other visual clues
- identifying and locating familiar characters or words in texts, and discussing the purpose and meaning of a text, for example, food packaging, a restaurant menu
- creating posters using learnt characters to inform others, for example, about a special event or a favourite person

Creating

Respond to and create simple imaginative texts using voice, rhythm, and appropriate gesture and action

[Key concept: imagination; Key processes: feeling, participating, noticing, recognising, responding, listening]

(ACLCHC021)

Elaborations

- performing plays in groups, using puppets and props, with allocated roles (such as 《十二生肖的故事》, 《饥饿的毛毛虫》), and using gestures and other movements to enhance the impact of performance, for example, using facial expressions to demonstrate emotions during a play
- viewing performances such as a song and dance show for children and identifying features of language, for example, rhyming in 小燕子, 穿花衣, 年年春天来这里
- creating own representations of familiar songs (小星星), poems and stories with a focus on varying voice, rhythm, gesture and action
- reading excerpts of 童谣 and comparing Chinese-specific expression with English version, such as 小猫怎么叫, 喵喵. 小狗怎么叫, 汪汪汪. 小鸡怎么叫, 叽叽叽. 小鸭怎么叫, 嘎嘎嘎. 小羊怎么叫, 咩咩咩
- singing familiar songs from both cultures, such as 《小星星》, 《说哈罗》, 《猜拳歌》 or 《狼与小孩》, to memorise words and sounds and for enjoyment
- expressing own feelings, likes and dislikes in response to Chinese stories, songs and poems, and asking for classmates' feelings

Create short written imaginative texts using simple characters and short sentences

[Key concepts: characters, events, plot; Key processes: participating, noticing, recognising, responding, listening]

(ACLCHC022)

- comparing the themes and content of nursery rhymes (童谣) (such as 小蜜蜂, 嗡嗡嗡, 飞到东, 飞到西; 小白兔, 白又白, 两只耳朵竖起来; 小燕子, 穿花衣, 年年春天来这里), for example, noting the frequent appearance of particular animals in 童谣 and recognising how this relates to traditional agricultural life
- creating a storyboard to describe characters and key events in planning a story
- creating plot diagrams using characters provided by teacher to annotate diagram
- using pictographs such as 马, 田, 山 to create cartoons to illustrate a story
- designing play props and costumes appropriate to the context and setting of a story read or listened to in class, and identifying traditional Chinese clothes and accessories

Translating

Translate the meanings of important everyday words using contextual cues

[Key concepts: context, celebration; Key processes: participating, recognising, responding, listening]

(ACLCHC023)

Elaborations

- explaining words and phrases to peers or the teacher, using gestures and actions to help convey meaning, such as facial expressions to express dislike or disappointment, agreement or enthusiasm
- explaining meanings of colloquial phrases used on specific occasions (for example, 恭喜发财 to give New Year wishes), and discussing how such wishes are expressed in English
- choosing words to translate information into Chinese, recognising different meanings for the same word, for example 哥哥 can be used to refer to an older male friend as well as older brother

Find English equivalents of common expressions in Chinese and vice versa

[Key concept: equivalence; Key processes: translating, explaining]

(ACLCHC024)

- reading bilingual signs, comparing Chinese words to their English equivalent, and recognising how key characters in expressions contribute to the overall meaning, such as 上 in 好好学习, 天天向上
- identifying meanings of Chinese words and phrases that do not translate directly (word for word), for example, 属、岁、马马虎虎

Reflecting

Reflect on how aspects of personal identity are expressed in Australian and Chinese contexts

[Key concepts: self, belonging; Key process: reflecting]

(ACLCHC025)

Elaborations

- preparing a self-introduction and discussing the concept of 'self'/我, exploring questions such as 'What makes me special in my family? In my class? In my school?', for example, 我叫 Tina, 我是妹妹. 我上三年级, 我的老师是王老师
- prioritising information when talking about self, for example, 我叫Kate before 我八岁
- sharing information about one's zodiac animal sign in Chinese and discussing in English the cultural significance of such information, for example, 我属龙

Understanding

Systems of language	Elaborations
<p>Recognise the tone-syllable nature of spoken language, and compare Chinese and English sounds (ACLCHU026)</p> <p>  </p>	<ul style="list-style-type: none">explaining the use of Pinyin as a learning tool to reflect the sound of Chinese spoken language, and recognising sounds associated with individual letters and syllables, differentiating, for example, qī , piě, rán and qù from English sounds for such letters and syllableslistening to and viewing simple conversational exchanges, recognising tone-syllables and experiencing the differences between Chinese and English intonationrecognising when and why some tones are not expressed in some contexts, for example, repetition of syllables in ‘Mama’, neutral tone on second syllablelistening to and reading out loud a nursery rhyme with strong Chinese prosodic features such as 《小老鼠, 上灯台》engaging in activities to raise tonal awareness, such as competing with classmates to read a tongue twister (妈妈骂马) and using hand gestures to help pronounce different tones
<p>Reproduce key Chinese characters from familiar contexts using stroke types and sequences, and component forms and their arrangement (ACLCHU027)</p> <p> </p>	<ul style="list-style-type: none">engaging with a range of basic characters and components and exploring their individual meanings, for example, 大 , 小 , 足 , 手exploring the process of character construction, including counting the number of strokes, describing the shape of strokes, differentiating between similar strokes, and following general rules of stroke ordermaking connections between basic characters and related component forms (for example, radicals like 手 and 扌 ; 人 and 亻), and recognising the number and arrangement of components in a compound character, for example, that 众 has three components and 打 has two components, that 亻 (standing person) is on the left-hand sideexploring the concept of ‘word’ in Chinese and knowing that each character is a meaningful unit (morpheme) that is used to make up ‘words’ such as 白菜 (white + vegetable), 好朋友 (good + friend + friend), 男生 (male + student)making connections between key morphemes in familiar words, for example, fruit group 水果、苹果、果汁; vehicle group 汽车、火车、车子

Use nouns, adjectives and simple sentences to record observations (ACLCHU028)

- exploring basic sentence structure in Chinese, consisting of subject–verb–object, and learning to analyse sentences in both Chinese and English, for example, ‘What’s the subject in the sentence “My mum drives a car”?’ How about in the Chinese sentence 我看书? Do sentences work the same way in Chinese and English?’
- recognising grammatical features and how their use differs in Chinese and English, for example, the lack of articles in Chinese; that adjectives can be used as verbs; limited use of the verb ‘to be’ (是)
- following patterns of word order and sentence structure and using negation when creating sentences to express own meanings, for example, replacing the subject pronoun in 我喜欢绿色 to create the sentence 我妈妈不喜欢绿色

Identify similarities and differences in the organisation of simple familiar texts (ACLCHU029)

- reading familiar text types in both Chinese and English (for example, menus, calendars, songs and TV cartoons), and explaining how the content and features of the text suit its purpose, for example, the menu has pictures of dishes to help the customer understand what kind of food it is
- recognising Chinese texts (for example, Chinese film posters and newspapers), and discussing how the textual features are organised, including the headings, images and fonts, and the cultural significance of such texts
- applying knowledge of text features to help locate key information, such as identifying details relating to name, age and nationality across diverse examples of social media profiles and print information forms
- discussing a range of predictable texts with teachers and peers to perceive common components (radicals) in complex characters such as ‘woman’ (女) and ‘water’ (氵)

Language variation and change

Elaborations

Recognise that Chinese is spoken by communities in many countries (ACLCHU030)

- investigating the use of Chinese in Australian communities and in countries and regions where diverse forms of Chinese are widely used, for example, China, Hong Kong, Taiwan, Singapore, Malaysia, Vietnam, USA
- interviewing people in their community who speak Chinese, such as 妈妈的朋友, and finding out how the person learnt and used Chinese in their home country and in Australia, for example, ‘How did you learn to speak and write Chinese? Do you speak Chinese every day in Australia?’
- recognising characters used in specific cultural events (for example, 福 in various forms of New Year decoration, such as paper cut-outs, folk art, couplets), and identifying how the form might change, for example, asking why 福 is sometimes presented upside down

Identify the likely contexts and features of informal and formal conversations involving known participants of different ages, genders and social positions (ACLCHU031)

- comparing conversations between peers/friends with conversations between teachers/authorities, for example, 你/您; 坐吧! /请坐!
- viewing and listening to the opening of conversations in a range of situations, and finding key words participants use, noticing how these chunks of language can change depending on the situation
- finding examples of the openings of informal and formal conversations in Chinese films, soap operas and children's cartoons, and practising using these openings in conversation with teachers and friends

The role of language and culture

Identify how terms are used to indicate relationships and express aspects of culture that may be different from their own (ACLCHU032)

Elaborations

- participating in exchanging good wishes in celebrations such as 龙年快乐, and comparing cultural practices of celebration from around the world
- exploring the use of language and symbolic images during cultural events, and describing the cultural meaning represented, for example, looking at the use of the colour red during Chinese New Year and in good wishes of 红红火火 and asking why red is so widely used during celebrations in China; What is the cultural connotation of 红?
- discussing possible reasons why Chinese family names are placed before given names, and exploring the cultural meaning of various Chinese names, for example, 静, 明, 勇
- exploring the more complicated Chinese kinship relationships, and learning to address family members with a title rather than by their given names, for example, drawing a family tree and labelling each member with their Chinese title

Years 3 and 4 Achievement Standard

By the end of Year 4, students use spoken and written Chinese in simple personal interactions with familiar participants about self, family, people, places, routine, school life, and their own interests and preferences, for example, 你叫什么名字？你上几年级？你有狗吗？你喜欢什么运动？ They use appropriate pronunciation, tone, gesture and movement and some formulaic expressions. They use modelled questions to develop responses, for example, 你的哥哥几岁？他是谁？你住在哪里？这是什么？ They respond to and create simple informative and imaginative texts for familiar audiences (for example, 狼与小孩) by selecting learnt words and characters. Sentences are short and follow the basic subject–verb–object structure with occasional use of adjective predicates, for example, 这是红色的苹果.. Learners use familiar words in Pinyin, or presented in characters in texts. Numbers are used in relation to age and family members, and to quantify objects with measure words such as 一个男生, 两个姐姐, 三只狗.

Students explain why Chinese is a globally important language. They understand that Pinyin provides access to the sounds of the spoken language. They identify features of the Chinese writing system, including the range of strokes and their sequences in character writing, and explain how component knowledge can assist in learning characters. They are aware that each character is a meaningful unit (morpheme) that is used to make up words. They recognise familiar word order in Chinese sentences. They notice similarities and differences between the patterns of the Chinese language and those of English and other familiar languages. They recognise that languages change with time and due to influences such as globalisation and technology. Students recognise that diversity of context and participants influence how meaning is communicated, and apply this knowledge to their own communication. They notice how cultural differences may affect understanding between people.

Years 5 and 6

The nature of the learners

At this level students are expanding their social networks, experiences and communication repertoire in both their first language and Chinese. They continue to need guidance and participate in structured, collaborative tasks that both recycle and extend language. Students are gaining greater independence and becoming more conscious of their peers and social context. They are gaining awareness of the world around them. Learners are noticing similarities and differences between Chinese language and culture and their own.

Chinese language learning and use

The systems of writing and speaking in Chinese are distinct. Because of the role of character learning and its impact on reading and writing, learners can accomplish a higher active use of spoken language than written language. As a result, engagement with Chinese language is primarily through speaking and listening. With teacher support, students begin to use Chinese to communicate their own ideas and participate in collaborative decision making. Learners engage in exploration of patterns and features of the language, talking about and making connections between known languages and cultures and comparing different ways of communicating in familiar contexts.

Contexts of interaction

Likely contexts for interaction are related to students' personal, family and local environments, and their everyday educational experiences. They communicate with peers, teachers, known adults, and with other students in their class. The settings for interaction move to a more public context and include more participants. Students begin to move from socialising in the here and now to planning and organising future events.

Texts and resources

Text types include print and online news and media, blogs, advertisements, catalogues, popular music and drama. Texts presented in characters are generally glossed in Pinyin. Students write in characters to correspond with others in letters, and use Pinyin input systems to generate a variety of texts in digital format.

Features of Chinese language use

Engagement with oral language includes active listening; observing interactions between speakers in everyday contexts; and using the spoken language in songs, rhymes, stories read aloud, and games. Learners ask and answer questions, describe people and objects, and recount events. They speak with attention to the sounds and tones of words, using formulaic language and applying their knowledge of familiar language structures in new contexts. Students map character forms onto their familiar oral vocabulary, and recognise and name characters in context. They record and learn new vocabulary by using word lists in Pinyin, and use Pinyin to prepare drafts of spoken texts.

Level of support

Chinese language use continues to be scaffolded and prompted by the teacher. Teachers' modelling of correct Chinese language use is the primary source of learners' increasing Chinese oral and written language acquisition.

The role of English

The use of English is necessary for discussion, reflection and explanation, and for the continued development of learners' knowledge base and intercultural capability.

Years 5 and 6 Content Descriptions

Communicating

Socialising

Initiate interactions with peers and known adults to plan and organise social activities

[Key concepts: community, leisure, nature, recreation; Key processes: planning, organising, transacting]

(ACLCHC033)

Elaborations

- experimenting with language choices to convey emotions and attitudes such as excitement and interest when events or ideas are suggested, including making arrangements, welcoming, congratulating, complimenting and praising
- exchanging information and opinions in class discussion, responding to questions such as 你喜欢运动吗?, and expressing agreement and disagreement with others' opinions (for example, 对, 我也很喜欢运动); making sure that other participants are included in interaction, for example, 我去过法国, 你呢?
- participating in role-plays relating to shopping scenarios, and specifying quantity or type of item when selecting from options, for example, 三斤苹果, 一包糖
- completing transactions by confirming prices (for example, 多少钱? 五块八) and exchanging money, recognising Chinese currency
- preparing performances celebrating important events in the Chinese calendar to present at school assemblies to raise community understanding of aspects of Chinese culture, such as a taiji performance, a lion dance, or a Spring Festival song such as 《恭喜恭喜》
- assisting in organising and hosting visitors from a sister school or guest speakers to raise school community awareness of the importance of learning Chinese
- seeking permission from the teacher or peers to participate in activities or to be excused, for example, 我可以去喝水吗?
- responding to the teacher's questions with actions or answers (for example, answering the question 懂了吗?), and requesting or borrowing items from others using appropriate language such as 我想看看你的书, 好吗?

Exchange correspondence and create simple written material to plan future activities and events and contribute ideas
[Key concepts: friendship, community, recreation; Key processes: collaborating, exchanging]

(ACLCHC034)

- preparing and creating photo-stories with captions to present personal information and aspects of personal experience (such as friends and classmates, extracurricular activities, daily routine, and holiday experiences) for new classmates or for class blog
- creating short texts such as emails, letters and text messages to interact with others, for example, to invite, congratulate or thank someone
- producing short texts such as descriptions of a place, or the rules of behaviour for different events, situations or activities
- participating in shared blogs, exchanging information with students from sister school, for example, 你好, 我叫Ann, 我是澳大利亚的学生
- using emoticons such as >_<||| in digital communication to enhance meaning conveyed
- using digital media to produce a publicity flier for an upcoming cultural or sporting event such as 汉语比赛

Informing

Obtain and process specific information from multiple spoken sources, selecting and sequencing appropriate content for specific audiences

[Key concepts: public, private; Key processes: comparing, collaborating, recording, identifying, describing]

(ACLCHC035)

Elaborations

- identifying specific information related to places, for example, listening to a weather forecast, recognising the names of familiar cities (such as 北京, 上海), and recording the weather conditions and the temperature
- using textual clues such as 听一听小明的一天 to predict possible content when listening to spoken texts, and preparing to hear key information such as time and activities
- listening to and viewing a range of informative texts to identify key points, for example, answering questions from classmates about the procedure and main ingredients for cooking a Chinese dish from a cooking show
- presenting a short talk using information gathered from multiple sources, for example, investigating 南京的天气 by interviewing the teacher and listening to a podcast of a weather forecast
- supporting presentations with pictures, charts or graphs as appropriate, for example, using bar charts to show data on 澳大利亚的语言

Locate key points in written informative texts, summarising the points to report to known audiences

[Key concept: information; Key processes: reading, viewing, summarising, analysing]

(ACLCHC036)

- locating key information in texts such as timetables, calendars, brochures or advertisements, using clues such as organisation of content, for example, 星期一, 星期二 etc. listed on the top row of a timetable
- reading familiar texts, such as shopping catalogues, understanding key phrases such as 八折, and working out the final price of an item
- recognising markers of time (for example, 第二天) in a sequence of events to monitor information flow and assist with reading for overall meaning
- creating a poster to convey information to Chinese peers (for example, about a local city or popular tourist site) with pictures, maps, data, words and sentences
- selecting from word lists to create informative texts such as signs, slogans and notices, using electronic tools such as a digital dictionary to extend own expression

Creating

Engage with characters and points of view in short imaginative texts, express personal opinions and create simple spoken imaginative texts

[Key concepts: character, viewpoint; Key processes: connecting, expressing, responding]

(ACLCHC037)

Elaborations

- singing popular songs, exploring the intended meaning of lyrics and the use of stylistic devices such as 比喻 (我爱你, 我爱你, 就像老鼠爱大米) or 重复 (我是女生, 漂亮的女生, 我是女生, 爱哭的女生)
- retelling stories read by the teacher in Chinese and sequencing actions (using 然后), or explaining the cause of an action (using 因为)
- expressing personal opinions on TV programs or music videos, for example, 我很喜欢中国的 rap
- participating in performances such as 诗朗诵 and applying specific prosodic features such as 'tone flow' (抑扬顿挫) to enhance the effect
- creating short plays or skits and taking on roles in imagined scenarios such as a shopping trip, fashion show, or visiting or hosting a Chinese friend
- reading short stories in groups, and summarising the story and conveying the emotions and opinions of characters using, for example, 最、非常、太
- reading aloud phrases such as 哎呀! 天哪! that are used to highlight the characters reactions to situations or the actions of others.

Create written imaginative texts, describing characters and sequencing events, using scaffolded models of texts, learnt characters or word lists for support

[Key concepts: character, narrative, sequence; Key processes: connecting, expressing, responding]

(ACLCHC038)

- experimenting with storytelling techniques by following provided models of narrative texts, for example rewriting 她有七色花, 红色, 蓝色, 白色... and replacing 花 with 气球 and writing 她有七色气球, 红色, 蓝色, 白色
- using digital media to create an imaginative story to share with peers and Chinese-speaking contacts, using both language and images to achieve particular effects, for example, using 重复 (很大很大的球; 走啊走啊走啊)
- plotting a storyline, considering: Who is the main character? How can I make this character interesting to readers? How can I sequence my story to grab the reader's attention?
- collaborating to create alternative endings to well-known stories using learnt sequences and word lists for support

Translating

Interpret and translate simple texts used for everyday purposes, identifying actions, words and phrases that do not readily translate into English

[Key concept: equivalence; Key processes: interpreting, translating]

(ACLCHC039)

Elaborations

- identifying how best to interpret key words when translating English texts into Chinese, for example, the use of 是 after first-, second- and third-person pronouns; numbers with measure words; possessives with 的; plurals
- viewing spoken interactions in Chinese between peers or in texts (for example, viewing a segment of a movie), and interpreting the meaning of the dialogue as well as comparing and discussing culturally determined manners or behaviour displayed in the interaction
- differentiating between word-by-word meaning and intended meaning when translating from Chinese into English, for example, the word-by-word translation of 我喜欢一个人看书 is 'I like one person to read', but it means 'I like to read alone'
- comparing own translation of short texts (such as brand names, signs, slogans and billboard advertisements) to others', and evaluating the effectiveness of own translation
- recognising the role that gesture plays in oral interaction, including emblematic (hand) gestures, gesturing for emphasis and encouragement, and taboos within Chinese communication, such as pointing directly at someone
- identifying Chinese symbols in print and digital texts (for example, the longevity symbol), and developing ways to convey the culturally attached value when expressing the meaning of these symbols in English

Create own bilingual texts such as signs, displays and posters
[Key concepts: equivalence, idiom; Key processes: translating, identifying, discussing]

(ACLCHC040)

- producing bilingual posters to promote a healthy lifestyle, such as 健康食品
- designing bilingual signs (characters/Pinyin/English) to post on key buildings and rooms around the school that convey short messages such as descriptions of the place or the rules in that place
- developing strategies for using bilingual (Chinese–English and English–Chinese) dictionaries in both print and digital forms to assist with translation

Reflecting

Describe aspects of own identity and reflect on differences between Chinese and English language and culture, identifying how this knowledge can help their intercultural exchanges

[Key concepts: similarity, difference, culture; Key processes: comparing, contrasting]

(ACLCHC041)

Elaborations

- using appropriate forms of address in interactions, including nicknames for friends, greetings such as 嘿、哈罗、吃了吗、校长好, and courtesy phrases when agreeing, thanking, apologising, refusing, declining and leave-taking, for example, 谢谢, 不客气, 对不起, 没关系
- presenting short spoken texts to peers and to Chinese-speaking people in other contexts via digital media, sharing culture-specific aspects of own identity (for example, 我是希腊人, 我周末学希腊语 or football club membership) and discussing their significance
- defining own identity by describing relationships with others, for example, friendship groups (我的朋友是 Lisa 和 George, 我们都很聪明), ethnic group (我是德裔澳大利亚人)
- engaging with Chinese speakers through organised school activities (such as through a video-conference with students at a Chinese school, or welcoming visitors to own school), observing moments when difficulties are experienced in communication and reflecting on the cause of the difficulty
- sharing with peers personal experiences of interacting with Chinese speakers, for example, 'I was really nervous and forgot how to say...'
- observing interactions between Chinese speakers, and discussing the context and language use (for example, a family eating out in a restaurant, noticing the environment, seating arrangements, and how dishes are ordered and presented) and comparing to their own experience

Understanding

Systems of language

Elaborations

Discriminate between similar or related syllables and words by listening with attention to intonation, stress and phrasing (ACLCHU042)

- recognising familiar language spoken by different voices
- recognising and discriminating between homonyms in Chinese (for example, shì — 是 and 室), relying on contextual cues to assist understanding, and differentiating syllables with different tones, for example, shì (是) and shí (十)
- connecting the sound of spoken Chinese with the spelling and tone marks of Pinyin, for example, reading out words written in Pinyin with attention to Chinese pronunciation and tone; using Pinyin to record the sound of words or sentences encountered

Identify how character structure, position, and component sequences relate the form of a character to its particular sound and meaning (ACLCHU043)

- decoding characters by analysing their structure and the number of components, and recognising familiar components
- applying their knowledge of characters to learn to read and write new characters, and developing strategies for learning, for example, making connections between characters with a common component (你、他、们)
- identifying different meanings of key morphemes used in different contexts, for example, 天, 日, 二/两, 你好 versus 好玩

Form sentences to express details such as the time, place and manner of an action and to sequence ideas (ACLCHU044)

- developing knowledge of metalinguistic terminology, discussing, for example: What is the plural form? How do we know it's plural when reading in English? Can we tell when we read a Chinese word?
 - recognising that in Chinese, verbs convey tense without verb conjugation, for example, explaining why 有 can mean 'have', 'had' and 'will have'
 - comparing the use of tenses in English and Chinese, for example, how future tense is often expressed through time phrases in Chinese (我明天去北京, 下个星期去上海)
 - identifying the use of adverbial phrases, and extending understanding of sentence structure using subject–time–place–manner–verb–object, for example, 我星期一上学。我在墨尔本上学。我走路上学
 - examining the clauses of a sentence in Chinese and noticing how they are linked coherently, for example, 他叫王晓明, (他) 是我的朋友 (i.e. no subject/pronoun)
 - applying processes of discourse development, including joining (也、和), contrasting (但是) and sequencing (就) information
 - using alternative language to clarify intended meaning, for example, saying 我不胖不瘦 when they don't know the phrase 中等身材
-

Notice how the features of text organisation vary according to audience and purpose (ACLCHU045)

- describing the major features of familiar text types in Chinese, and experimenting with analysing Chinese texts, for example, recognising the 'problem' and the 'resolution' in a narrative
- identifying the purpose and intended audience and context (for example, digital, online or face to face) of a range of familiar texts
- exploring features and conventions of Chinese text, including lack of word spacing or use of punctuation, and variability in text direction, and comparing texts in traditional characters with texts in simplified characters
- understanding the use of Chinese-specific punctuation, such as double quotation marks to signal a quote

Language variation and change

Elaborations

Understand that Chinese is characterised by diversity in spoken and written forms (ACLCHU046)

- knowing that Putonghua is the standard spoken language used in China and the main Chinese language taught in other areas of the world
- understanding that there are simplified and traditional Chinese characters, and exploring examples of both forms to identify differences, for example, 门 and 門
- exploring how the Chinese language has changed in response to modern life, such as the inclusion of English terms in everyday language; recognising 'borrowed words' / 借词 in Chinese from English (for example, 咖啡, 澳大利亚), and in English from Chinese (for example, tofu), and discussing how and why these types of words are introduced
- noticing the use of English words or phrases in Chinese interactions (for example, 拜拜, or a few words of English in a Chinese pop song), and discussing the reason for the 'code-switching'
- examining the role of myths, legends and 成语 in contemporary language use (for example, reading texts containing 成语, such as 井底之蛙, 画龙点睛 within 成语故事) and discussing their intended meaning, and the cultural importance of employing classical language in contemporary contexts

Examine how language is used to clarify roles and relationships between participants in interactions (ACLCHU047)

- comparing values and beliefs across cultures and identifying how Australian cultural values such as mateship are expressed through language
- exploring the nature of the concept of 'family' in Chinese culture and how this influences relationships between individuals, for example, addressing adults as 叔叔 or 阿姨

The role of language and culture

Elaborations

Explore the ways in which everyday language use reflects culture-specific ideas, such as the influence of age, gender and social position on language choices (ACLCHU048)

- exploring cultural values conveyed in expressions relating to celebrations, for example, by asking: 'In the colloquial phrase 合家团圆, what is 团圆? Why wish people 团圆? Does this have the same meaning in Australian culture? What's the relationship between the language use and the Chinese values in this phrase?'
- applying appropriate choices of pronouns and labels when referring to others in interactions, for example 您/你; 小张/张晓琴

Years 5 and 6 Achievement Standard

By the end of Year 6, students use spoken and written Chinese to initiate and maintain interactions. They describe and give information about themselves and their preferences, their environment, experiences and interests, for example, 我很喜欢唱歌。我的学校很漂亮。我觉得澳大利亚是很好的国家。 They use simple questions (for example, 请问...？你是哪国人？你会说汉语吗？) and seek clarification, for example, ... 对吗？ They access information from a range of print and digital resources (for example, 课文, 菜单, 宣传单, 图样, 地图, 课程表, 日历, 行程表, 天气预报) and summarise key points in order to inform others and organise activities, for example, 我们这个星期六去打球, 好吗？ They engage with a range of imaginative texts. They use intonation and stress to engage audiences and participants. They translate everyday expressions (for example, 好久不见 or 不谢) and use context to assist with interpretation. They produce short informative and imaginative texts. Sentences include details of time (for example, 八点, 十二月二日, 星期五), place (for example, 在澳大利亚, 在墨尔本, 在家) and participants, for example, 我的朋友, 小明的哥哥. They use prepositions and possessive clauses, including 的. They use a range of verbs, including verbs of identification and existence (是), and some modal verbs (喜欢、会) to express interest or ability; they negate with 不 or 没. They use simple connectives such as 和 and conjunctions to connect ideas.

Students explain the nature of tone-syllables, for example the role of tones in meaning making. They recognise the features of the Chinese writing system and apply their knowledge of the formation of characters in their own writing. They use Pinyin to transcribe spoken language. They identify how the relationships of participants and context affect interactions. They identify the features of familiar text types in Chinese and use these features to assist in interpreting meaning. They recognise that variations exist within the Chinese spoken and written language, and identify examples of this, particularly within their own community. They recognise and describe features of Chinese culture reflected in communication practices, and apply this knowledge to their own interactions with Chinese people.

Years 7 and 8

The nature of the learners

These years represent a transition to secondary school and students in this pathway are continuing to study Chinese bringing with them a capability to communicate, with some assistance, about their immediate world and China.

Chinese language learning and use

The systems of writing and speaking in Chinese are distinct. Because of the role of character learning and its impact on reading and writing, learners can accomplish a higher active use of spoken language than written language. As a result, engagement with Chinese language is primarily through speaking and listening. Students use Chinese for self-expression, to access new information and to share their knowledge and experiences with others. Pinyin remains an important tool for learning the sound of new words, associating sounds with characters, and creating digital texts in characters.

Contexts of interaction

Students actively use Chinese in a range of everyday contexts for purposes such as socialising with peers, transacting and getting things done, sharing information and engaging in performance with a range of known participants, including native speakers and peers.

Texts and resources

Students explore a range of written texts, developing strategies to interpret meaning where not all characters are known. They read, respond to and create digital texts, including blogs, biographies and opinion pieces, using a variety of technologies and software.

Features of Chinese language use

Chinese is the language of instruction and interaction, and is used in more elaborate ways as students extend their knowledge of the grammatical system and its use through spoken and written communication. Students experiment with language, exploring how cultural meanings are expressed. They analyse how messages are conveyed across languages, and apply their skills in mediating between Chinese and English in different contexts and situations. Classroom discussions focus on exploring and extending their range of contexts and audiences as they develop their personal communication skills.

Level of support

Students are supported to develop increasing autonomy as language learners and users, to self-monitor, and to adjust language in response to their experience in diverse contexts.

The role of English

English is used as appropriate to allow for explanation and discussion on issues associated with analysis of language, reflection on experiences, and comparisons across languages and cultures.

Years 7 and 8 Content Descriptions

Communicating

Socialising

Elaborations

Initiate and sustain interactions with peers and familiar adults to plan and arrange activities or social events in the context of the school or local community, and vary spoken language in response to the needs and demands of other participants
[Key concepts: event, celebration, experience; Key processes: transacting, negotiating, suggesting, requesting, explaining]

(ACLCHC049)

- participating in conversations about personal experiences, expressing opinions about what is common to these experiences, for example, 我们的老师教我们很多东西。我们都很喜欢他
- comparing feelings about music, TV programs or sports, and asking questions to seek ideas, request repetition, clarify meaning (for example, 你喜欢看电视, 不是吗?) and enhance mutual understanding, for example, A: 我不太喜欢听流行音乐, 我更喜欢摇滚乐, 因为摇滚乐很有意思。B: 古典音乐怎么样? 古典音乐也不错
- negotiating with peers in relation to school policies and procedures, by affirming, accepting, clarifying, suggesting and recommending, for example, 小明, 明天去动物园要穿校服吗?
- visiting Chinese-owned stores in the local area and specifying number or nature of items required; requesting, negotiating and accepting prices; and completing transactions, for example, 我们什么时候去...?, 我们去哪儿买?, 我们要买什么?
- participating in class role-plays of shopping scenarios, including expressing opinions about quality of goods (for example, 这条红色的裤子真好看), making comparisons with the same product or service from other retailers or service providers (for example, 他要一百块, 你要一百三十块), and expressing satisfaction or dissatisfaction with price, for example, 太贵了
- negotiating with classmates to determine an appropriate gift for an overseas visitor, acknowledging ideas and opinions of others and expressing agreement (for example, 好的) or disagreement, and offering alternatives, for example, 我觉得巧克力不好, 考拉拼图怎么样?

Correspond with peers and other familiar participants to plan activities, and compare opinions on and attitudes towards different cultures
[Key concepts: relationship, experience, community; Key processes: sharing perspectives, exchanging, corresponding]

(ACLCHC050)

- exchanging personal information via social networking sites, for example, 你是哪国人? 你喜欢学习汉语吗?
- sharing information about life in different cultural contexts, expressing ideas and opinions, for example, 中国人喜欢吃米饭, 澳大利亚人喜欢吃面包, 你呢?
- sharing opinions about school or family life, including 我的学校, 我的老师, 我的好朋友, 我的一家人, and linking ideas to explain and support a position or view, for example, 我的姐姐喜欢音乐, 也很喜欢体育; 我除了踢足球以外, 还打板球。我觉得运动很有意思

Informing

Elaborations

Analyse and summarise relevant information obtained from a range of spoken sources and convey this information to known audiences through a range of texts

[Key concepts: fact/fiction, representation, perspective, choice; Key processes: summarising, identifying, comparing, sequencing]

(ACLCHC051)

- documenting specific details of events, customs and lifestyles presented in multimodal sources such as video clips and face-to-face interviews in order to summarise the information, for example, 中国人很喜欢喝茶, 澳大利亚人喜欢喝咖啡
- listening to and viewing celebrity interviews, news reports and documentaries to identify key information such as names of people and places, time and date, attitude and opinions, for example, 秦始皇, 西安, 北京, 星期三, ...很可怕, 我很喜欢她, 她是一个很棒的演员
- listening to and viewing factual spoken texts and paying attention to voice, gesture and language choice to identify the strength of opinion or degree of emotion expressed, for example, recognising strong dislike expressed in 我一点儿也不喜欢 compared to 我不喜欢
- interviewing teachers or other familiar adults about their experiences (for example, 他小时候每天都骑自行车) and presenting this information to the class, quoting the source of information [有人说; 她告诉我; 根据这个节目介绍]

Locate, classify and organise relevant information, including analysing data in simple diagrams, tables and graphs, and represent this information for known audiences

[Key concepts: lifestyle, change, trends, place; Key processes: summarising, comparing, contrasting]

(ACLCHC052)

- comparing travel brochures to identify places of interest, public transport information and activities
- recognising the word/phrase boundaries in 我们学校/有/二百八十七个学生 and applying knowledge of Chinese information-sequencing rules, for example, using the knowledge that Chinese speakers organise information from most general to most specific in order to locate details in a Chinese address
- identifying the common organising categories in tables or graphs, for example, deducing that 国籍 means 'nationality' by determining the meanings of 中国, 澳大利亚 etc. in a table column

Creating

Elaborations

Engage with imaginative texts, observing how characters, emotions and attitudes are portrayed, express opinions about these aspects of an imagined experience and apply this knowledge in their own performances and texts

[Key concept: emotion; Key processes: expressing, responding, performing]

(ACLCHC053)

- identifying how features of performance, including the use of posture, movement, voice, images and sound, are used to convey different emotions and attitudes, for example, 她跑得很快; 音乐听起来很轻快; 森林里很暗; 我很害怕
- writing a short dialogue about an emotion and performing it in groups
- expressing and justifying their music preferences, for example 我喜欢这首歌, 因为歌词很美
- producing short performances, for example, a skit about celebrating Spring Festival, a simple lyric for a song about school life, or a rap about being a student of Chinese
- noticing how emotion is expressed in song, film or poems and discussing its impact on listeners and viewers
- reflecting on the language, beliefs and values of characters in traditional and modern literature and Chinese popular culture, and comparing different students' responses to the same story, event, character or place, for example, viewing excerpts from contemporary films and discussing personal responses to and the sociocultural context of the film

Create written imaginative texts to describe experiences involving imagined people and places

[Key concepts: imagination, creativity, emotion, love, hate; Key processes: expressing, responding]

(ACLCHC054)

- collaboratively creating stories with imagined characters and settings, capturing the characters' experiences in different cultures, for example, 《James在上海》
- writing a creative account of an imagined experience with Chinese visitors in the local community, such as hosting a Chinese student or taking a tour group to a local sporting event
- writing a recount of an adventure, for example, 《xxx历险记》
- using descriptive language to set the scene and capture the reader's imagination, for example, describing the sound of traffic and the smell of breakfast stalls on a busy morning in a Chinese town
- exploring how alternative words can be used to convey varying attitudes and degrees of emotion towards people, places and events, for example, 我真高兴。你快乐吗? 他很幸福!

Translating

Elaborations

Translate texts for different audiences varying the language to explain key points for these different audiences

[Key concepts: equivalence, meaning; Key processes: translating, experimenting, comparing]

(ACLCHC055)

- identifying the challenges of translating some concepts (for example, 'descendant of dragon', 龙的传人), and developing strategies to overcome these challenges, for example: What is lost in translation? Why can't we just translate word for word? Why does context matter?
- translating short phrases or texts, noting culture-specific words and phrases and discussing alternatives, equivalence or non-equivalence
- discussing reasons for producing different versions of texts for different audiences
- describing the impact of subtle differences in language use and the way meanings are implied rather than explicitly stated, for example, the use of 吧 to indirectly reject or refuse others in 我能来看看你吗? --- 不太好 吧?
- avoiding literal (word-for-word) translations when trying to convey the intended meaning, for example, mediating a response to a compliment such as 你的衣服真漂亮。--- 哪有啊?
- reading bilingual signs in places such as restaurants, shops, pools, schools, hospitals and construction sites (for example, 出口 — 'exit', 入口 — 'entrance'), determining the effectiveness of the English translations and analysing possible reasons for such interpretations
- comparing word choices for warnings across languages, and discussing ways language is used to convey rules, expectations and permission, for example, comparing 闲人免进 to 'Staff Only'
- exploring a range of dictionaries, including online translation tools, and considering how these tools help or hinder in Chinese learning

Create short bilingual texts on topics of personal interest and on key content from other learning areas and provide subtitles or commentary to assist meaning

[Key concepts: bilingualism, identity; Key processes: translating, interpreting]

(ACLCHC056)

- translating special terms from their favourite subjects into Chinese, for example, 加、减、乘、除
- producing bilingual instructions for classmates, explaining how to perform a particular activity relating to their favourite game or subject
- preparing a voiceover text in Chinese for a video presentation about the Chinese language program or the school environment and adjusting anything that is unclear before voice recording

Reflecting

Elaborations

Reflect on the cultural significance of how different groups and members of groups name themselves and are represented by others

[Key concepts: identity, group, name; Key processes: describing, considering, reflecting, developing]

(ACLCHC057)

- comparing Chinese and western cultural symbols, for example, the symbol of the dragon, 龙 across western and Chinese cultures
- sharing information about their own membership of diverse groups and exploring how this is expressed in Chinese, for example, 每年春节小明的妈妈都会包饺子。安娜的妈妈每年圣诞节都烤火鸡
- exploring the role of language in the formation and expression of identity, for example: Why does my classmate go to Chinese school on Saturday? Why do I speak Chinese to my teacher but feel strange speaking it to my classmates?
- analysing expressions of identity encountered in Chinese texts and interactions, and comparing these with their own assumptions about Chinese people and with their own expressions of identity, for example, 龙的传人 (descendant of dragon)
- identifying the differences of meaning of multiple terms use to convey a similar concept, for example, comparing representations of foreigners in 外国人有一些不同的习俗 to 老外都很奇怪
- reflecting on their own cultural values and norms, comparing them to those of Chinese speakers, and asking, for example: Which of my own values are non-negotiable, and which Chinese values do I feel I should validate and support?

Understanding

Systems of language

Examine differences in sounds and tones, and patterns of sound flow in speech (ACLCHU058)

Elaborations

- discriminating between sounds heard in oral discourse, including the range of vowel and consonant combinations, for example, 'qin' versus 'qing' and 'chi' versus 'ci'
- examining the diverse meanings of words that share similar sounds (for example, the many meanings of the sound 'shi'), and learning how to differentiate between 同音词 and 近音词 in different contexts, for example, 买东西/卖东西
- comparing examples of regional variations in pronunciation, for example, the Beijing use of 儿 and the southern pronunciation of 'shi' and 'si'
- listening to interactions between unfamiliar voices at diverse speeds or levels of clarity to develop auditory and comprehension skills

Interpret texts by inferring meaning from common character components or position of components, and analyse how reliable this method is in translating (ACLCHU059)

- estimating the probable sound and meaning of characters based on understanding of familiar radicals and phonetic sides when reading unfamiliar texts, for example, 鸡鸭鹅莺; 但担旦胆
- analysing characters containing a common component or side, for example, explaining the features of position, phonetic function and range of sounds in the characters 请清情晴精睛猜
- describing characters to classmates by naming their components or sides in sequence, for example, 亻 ('standing man') on the left, 言 ('words') on the right = 信
- exploring the use of diverse character-morphemes to express similar ideas (for example, identifying multiple characters for 'food' — 饭、菜、食、餐), and organising and classifying words containing these characters to understand their context of use, for example, 早饭、中国菜、食物、餐厅
- recognising the two-syllable preference in Chinese nouns, and applying this understanding when reading for meaning in words with suffixes such as 学校、学生、学习
- exploring the nature of common idioms (成语) and inferring their meanings based on the meanings of individual morphemes and contexts of use, for example, 年年有余、人山人海

Identify and apply features of Chinese grammar and sentence structure to organise and sequence ideas in oral and written texts (ACLCHU060)

- comparing ways in which tense is expressed in Chinese, for example, 了 to indicate completion; 完 to indicate the achievement of a desired result; 想 to indicate intention; verb negation (没有) to indicate incomplete past; and 正在 to indicate action in progress
- exploring the use of diverse time expressions and ways to sequence events in time, for example, 先...然后; 一...就...; ...了, 就...; 才; 第一; 然后
- comparing the functions of prepositions, and discussing the importance of context when determining their meaning in texts, for example, 跟; 对; 给
- exploring and applying the use of conjunctions to sequence and connect ideas when constructing texts, for example, 不但...而且...; 虽然...但是...
- using different ways to negate ideas depending on degree of formality or emphasis, for example, 我不是...; 我哪儿有...?; 我没有办法...; 我不能...; 不行; 别; 不准

Analyse how authors adjust features of different text types for different purposes and audiences (ACLCHU061)

- comparing diverse genres with similar topics (for example, 生日会的安排 and 我的生日日记), recognising the differences in purpose, focus of information and language choice
- analysing and explaining the organisation and development of ideas or an argument in a range of genres, including textual features such as paragraphing

Language variation and change

Elaborations

Investigate the extent and dynamic nature of Chinese language use locally and globally (ACLCHU062)

- exploring the ways in which Chinese language use is fostered among local communities and the use of Chinese in local media such as community radio, TV, newspapers and magazines
- exploring the use of 普通话 as a lingua franca in Chinese-speaking communities, and identifying terms used in different regions to express a similar idea, for example, 普通话 versus 国语; 达人 vs 高手
- viewing words in 繁体字 in familiar contexts and applying their understanding of the simplification process to determine the possible meanings and the 简体字 equivalent, for example, 个-個; 说-說; 边-邊
- discussing the use of 繁体字 and 简体字 in Chinese-speaking communities today, including the revival of 繁体字 and the spread of 简体字 in diverse communities
- examining how globalisation is impacting on Chinese values and language use, for example, how responses to praise are shifting to reflect a western concept of gratitude (谢谢) rather than the modesty of the past (哪里哪里)
- reading texts consisting of 名人名言 (such as 孔子说: 有朋自远方来, 不亦乐乎), and discussing the cultural meaning of the quote and how it is relevant to contemporary language use

Explain how the Chinese language adapts to social and technological changes (ACLCHU063)

- enquiring into the use of internet language, including numerical representations of words (for example, 55555 = 呜呜他在哭) as a means of private communication among youth
- exploring the use of mobile phones and the internet to replace old ways of communication, for example, texting or emailing New Year greetings instead of going to 拜年 in person
- comparing features of correspondence and the circumstances in which some forms of correspondence are preferred, for example, why 贺节短信 is popular as a way to save time and money
- exploring the ways in which new words and phrases are incorporated into everyday communication in Chinese, for example, how English expressions of emotion (去happy吧) are used in chat forums and text messaging, and how Pinyin abbreviations are used to replace characters (L P = 老婆)
- examining how the adaptation of words reflects and encourages cultural change, for example, gender equality is reflected in the use of 妳 to address females and 他们 to include both men and women

The role of language and culture

Elaborations

Compare and reflect on how cultural contexts influence the way language is used within and across communities (ACLCHU064)

- identifying the things they take for granted in communication (for example, a shared understanding of gesture, body language and nuances), and reflecting on how these aspects may be interpreted differently by others
- discussing how language use varies between communities, and reflecting on how communication is shaped by a community's geographical location, languages and cultures, for example, 计算机 / 电脑, 哪儿 / 哪里
- reflecting on how particular words of cultural significance may be interpreted differently by others, for example, 'mate' in Australian context and 兄弟 in Chinese context
- inferring the relationship of participants in a spoken interaction by observing word choices and gestures, for example, 老张 / 张校长/张小明, and asking: What titles and terms of address are used for individuals in Chinese? How do these titles compare to English practices?

Years 7 and 8 Achievement Standard

By the end of Year 8, students use spoken and written Chinese to sustain interactions in a range of social and personal contexts. They exchange ideas and opinions, for example, 你要去看电影吗? ;我们可以六月份一起去. They summarise the main points of information about known content from a range of spoken and print sources (for example, 电视节目, podcast, 电话留言, 广告, 老师推荐的网站, 书籍, 图书馆目录, 游记), and convey the relevant information in a range of texts. Students respond to and create simple imaginative and informative texts. Sentences generally contain two or more ideas connected by cohesive devices (for example, 不但...而且...; 因为... 所以...), as well as time expressions (for example, 先...再...), and tense markers such as 了、完 to sequence events and ideas. Students make comparisons (for example, 比; 跟...一样), and provide explanations or reasons for opinions or decisions, using phrases that order and link their ideas. They use reported speech to refer to the ideas of others, for example, 他们认为. They speak with attention to pronunciation, tone and phrasing, using intonation and pitch to add emotion or emphasis to their message. They demonstrate intercultural understanding by varying their language use for different audiences and purposes.

Students describe the distinctive spoken and written language systems of Chinese using metalanguage. They know that character components can contribute to both sound and meaning of words and they understand how they can be combined to make different words, for example, 中国, 城, 中国城. They identify features of text types such as letters, emails, descriptions and narratives. Students identify how information is structured in Chinese texts, and understand the importance of cultural and contextual cues to correct interpretation of meaning. They explain how features of Chinese culture impact on communication practices, and reflect on their own interactions with Chinese-speaking people.

Years 9 and 10

The nature of the learners

At this level, students bring prior knowledge of Chinese language and culture, and a range of language learning strategies to their learning. They are increasingly aware of the world beyond their own and are engaging with youth, social and environmental issues. They are considering their future pathways and choices, including how Indonesian could be part of these.

Chinese language learning and use

Students use Chinese for self-expression, to obtain information and present a point of view to others, identifying subtle differences in word use and manipulating language for different purposes and audiences. Pinyin remains an important tool for learning the sound of new words, associating sounds with characters, and creating digital texts in characters.

Contexts of interaction

The likely contexts for interaction are extended to encompass the exchange of information and opinions on topics that will assist students to develop a deeper appreciation of cultural practices and traditions in diverse Chinese-speaking communities'. Learners interact with a broader range of Chinese speakers, using the spoken language to participate in discussions and other interactions.

Texts and resources

Text types include short informative texts from various websites, opinion pieces from personal blogs, and online chat forums conducted in Chinese with users in diverse locations. Students access information and explore texts written in Chinese, developing strategies to interpret meanings where not all characters are known.

Features of Chinese language use

Learners engage in cross-cultural communication and reflect on their own experiences in Chinese. Classmates work collaboratively to exchange information and ideas relating to contemporary issues or events and to share their life experiences. They use creative and expressive language in narratives to express their imagination.

Level of support

Learners are supported to develop autonomy as language learners and users, to self-monitor, and to adjust language in response to their experience in increasingly diverse contexts. They access characters and vocabulary from a range of print and digital resources and online and print dictionaries.

The role of English

Chinese is the language of instruction and interaction. Some discussion and reflection are necessarily carried out in English, but learners at this level are beginning to express

Years 9 and 10 Content Descriptions

Communicating

Socialising

Elaborations

Exchange and elaborate on suggestions and opinions in spoken interactions related to planning and negotiating activities and events, adjusting spoken language for familiar and unfamiliar participants, purposes and contexts
[Key concepts: celebrity, leisure and recreation, built and natural environment; Key processes: planning, negotiating, deciding]

(ACLCHC065)

- participating in discussions and expressing personal opinions on issues relevant to contemporary youth (such as 教育, 环境, 科技, 文化), displaying levels of politeness or assertiveness as appropriate to context, for example, 我希望 versus 我要; 你最好 / 你应该 versus 你一定要
- inviting others to voice opinions and eliciting alternative positions by asking questions such as 你怎么看? 你觉得呢? 你同意吗?, and responding to verbal and non-verbal cues (including silence) from participants
- acknowledging others' ideas, views and opinions when expressing agreement or disagreement (for example, 好的、我同意), and challenging others' opinions using rhetorical questions or concessionary or emphatic phrases, for example, 你说的有道理, 可是...; 你怎么可以说...?; 你说的不对
- commenting on transaction experiences and acknowledging the work of others, for example, 谢谢你的帮助, 但是如果你...就更好了
- planning group events such as an excursion to Chinatown and persuading others to get involved and contribute in different ways, for example, 我们去中国城可以吃到中国的小吃, 你不是很喜欢吃早茶的吗? 你来决定我们去哪个饭店吧

Sustain and extend written exchanges about places, future plans, and contemporary social issues and activities
[Key concepts: relationships, values, beliefs, attitudes, future, work; Key processes: analysing, evaluating]

(ACLCHC066)

- introducing a topic or issue for discussion with others (for example, the importance of China to Australia's economy, the growth of Chinese tourism in Australia, or ways to promote a better understanding of China in Australian schools), and leading the discussion in a manner likely to elicit ideas related to possible scenarios or outcomes
- referring to information stated, or requesting or providing further details in order to clarify or confirm the ideas or views of others, for example, 你说澳洲人对中国的印象是...
- discussing issues, suggesting alternative solutions and making decisions using levels of formality and respect appropriate to audience and purpose, for example, 我觉得这样做更适合; ...可以吗?
- following online media conventions and experimenting with terms such as 楼主 to refer to participants of the shared digital space

Informing

Elaborations

Analyse, compare and present perspectives on topics of interest, identifying the different ways emotions, intentions and ideas are expressed

[Key concepts: celebrity, leisure and recreation, place, education, youth, space; Key processes: comparing, contrasting, negotiating, deciding, persuading]

(ACLCHC067)

- discussing differences in the way events are reported in different media sources, such as local and national Chinese TV news programs
 - collating and analysing data on life in Chinese communities (such as positive and negative experiences of adjustment to life in Australia, impressions of Australian education system, and perspectives on the Australian national character) by interviewing Chinese speakers and utilising a range of graphic organisers to collate and compare ideas from diverse sources and perspectives
 - presenting or supporting a personal position or view by reconstructing information from diverse sources, summarising key points, and using quotes or supporting information, acknowledging diverse perspectives and sources of information and the views of others by using reported speech, and using forms of presentation appropriate to the subject matter, for example, using charts or images to support text
 - gathering information on an issue from different sources and reporting on it to others, using tools such as tables, graphic organisers and charts, and discussing whether the information is similar or different in different sources and why
 - extracting details and main ideas from texts, making judgments about their relevance and discussing contrasting points of view, for example, selecting the main events from an article, identifying core data from interviews, identifying gist and main point/s of a spoken interaction, or analysing different interpretations of meaning in a conversation
 - comparing different perspectives on the same event or on a topical issue such as intergenerational relationships, the environment, or food choices
 - making presentations on aspects of cultural practices and lifestyles in Chinese communities, providing a balanced perspective and avoiding stereotyping, for example, 很多中国人...; 据报道, 百分之三十的人口...
 - creating and displaying posters to raise peers' awareness and help promote the messages of charity organisations conducting work in China
 - sharing own interest in people, places and events in the Chinese world by reading about places and historical figures (such as 秦始皇, 毛泽东) and writing articles for the school newsletter to inform others, recommending further reading and websites (Chinese and English)
-

Collate and present different perspectives on a range of issues from different sources

[Key concepts: ideograph, issues, career, future; Key processes: extracting, collating, identifying]

(ACLCHC068)

- exploring websites designed for non-Chinese audiences, identifying relevant information on research topics such as 中式饮食, 娱乐活动, and comparing sources, differentiating between fact and opinion, and identifying information which is not credible or which is too value-laden
- reading and sharing key information from diverse authors, making connections between the author's opinion and attitudes towards particular topics (such as 中国的独生子女) and their background and experiences
- sharing ideas on sources of information and explaining ways to utilise these sources, with examples or data to support their opinions
- preparing visual displays of data or information gathered from personal research to share with Chinese-speaking peers on features of lifestyle or experiences of Australian young people, for example, educational opportunities, outdoor and sporting activities across the seasons, or a typical weekend for an Aussie teenager

Creating

Engage with a range of performance-based imaginative texts, and respond by discussing attitudes portrayed, expressing opinions, explaining themes, discussing characters, and considering language use and cultural meanings, and apply this knowledge to create imaginative texts

[Key concepts: imagination, creativity, emotion, love, hate; Key processes: expressing, responding]

(ACLCHC069)

Elaborations

- viewing episodes of popular TV programs, such as sitcoms from mainland China, Taiwan and other regions, sharing opinions on characters and plot (for example, 我不懂他们为什么吵架。他真的很烦人, 我特别不喜欢他), and relating the situations and contexts in the TV program to similar events in their own life, for example, 如果我是她...; 我觉得他最好...
- listening to popular Chinese songs, comparing themes and content to those of songs popular in Australia, and discussing how popular culture reflects social issues, for example, 家庭的关系 (family relationships)
- creating own dramatic performances to entertain others, with a focus on accuracy of tone and rhythm appropriate to choices in language and gestures
- creating plays with plots that reflect personal opinions on topics of interest (for example, 旅行, 未来), using props to support storytelling, and experimenting with language, image and sound to convey complex ideas and enhance audience appreciation
- presenting own version of a familiar story or event, for example, collaborating to create a voiceover for a segment from a familiar TV show or commenting a youth sporting event
- reading narratives (for example, personal histories and extracts from teenage fiction) and writing a journal to share personal reflections on the ways of life and experiences portrayed and expressed, providing reasons for their opinions, for example, 这个故事非常...比如说... 你一定要看这本书!

Create written imaginative texts that express aspects of Chinese culture for different audiences and identify how some concepts can be readily translated between Chinese and English and some do not

[Key concepts: values, tradition; Key processes: creating, expressing, reading, writing]

(ACLCHC070)

- creating first person narratives in which they describe experiences and emotions in imagined scenarios and places, for example, 假如我是巨星
- producing cartoon scripts to express traditional Chinese values, for example, 孔融让梨

Translating

Translate a range of Chinese texts and identify how some concepts can be readily translated between Chinese and English and some do not

[Key concepts: semantics, syntax; Key processes: translating, interpreting]

(ACLCHC071)

Elaborations

- identifying core values implicit in interactions in Chinese and explaining these to English speakers, for example, describing the language of celebration, including the origins, significance and meanings of commonly used expressions such as 福如东海、年年有余
- describing interactions, showing consideration of 面子, and discussing the differences in the significance of 面子 when the interaction occurs interculturally
- interpreting key ideas conveyed in Chinese texts, discussing how to maintain the sentiment and intention of authors when retelling or summarising these in English, and understanding why this is important in translation
- reading everyday Chinese texts encountered in shop brochures, product packaging and advertising; identifying challenges involved in conveying meaning in English; and explaining word choices and textual features employed to enhance meaning

Create bilingual texts, identifying similarities between Chinese and English syntax and vocabulary, and explaining how these similarities can be used when transferring culture- or context-specific ideas from Chinese into English

[Key concepts: similarities, cultural positioning, sensitivity; Key processes: translating, captioning]

(ACLCHC072)

- producing bilingual displays about Chinese language, culture or contemporary society to share learning and knowledge with the whole school community, for example, a poster display on Chinese characters, on earthquake-prone areas such as Sichuan, on youth cultures in China, or on the Chinese community in Australia
- creating own texts in Chinese and exploring how word choices impact on the subtlety or accuracy of intended meaning
- considering ways of exemplifying ideas to ensure effective mediation of ideas or information as opposed to word for word translation, for example, 谢谢您！— 不谢！ ('Thank you!' — 'You're welcome!')
- using alternative ways of expressing meanings when communicating complex ideas, for example, 一个孩子 for 独生子女
- using print and online dictionaries to expand their own linguistic repertoire and convey subtle meanings when creating own texts, understanding the risks of word-for-word translation

Reflecting

Elaborations

Compare the experiences of young Australians with those of young people in Chinese-speaking communities, reflecting on how these diverse experiences affect individuals' identity, attitudes and beliefs

[Key concepts: behaviour, youth, lifestyle, social distance; Key processes: comparing, contrasting, reflecting]

(ACLCHC073)

- constructing texts and participating in interactions with young Chinese which involve sharing aspects of their own identities as young Australians, for example, 中国的年轻人喜欢什么运动? 澳洲人喜欢游泳、打板球和打橄榄球
- comparing own experiences and opinions with those of Chinese youth encountered in diverse texts and contexts, for example, exploring how young people feel about school: What is universal? What is culturally specific? What is environmental? Why do we do things a particular way? 大部分澳大利亚的学生功课压力没有那么重; 很多中国学生在食堂吃饭
- viewing texts related to the experiences of young Chinese speakers (for example, 偶像剧), and discussing aspects of their life, world or values conveyed, asking, for example: What assumptions or generalisations are made? How does this impact on our perception of Chinese youth? Does this reflect the reality of Chinese youth?
- exploring diversity within Chinese identity and becoming more aware of this when interacting with Chinese speakers, for example, understanding that calling Chinese speakers 中国人 does not reflect the diversity of Chinese speakers' identities
- engaging in interaction with Chinese speakers and reflecting on how their own language choices are perceived by Chinese speakers, for example: Is my communication culturally appropriate? Should I adjust language and gesture to help convey meaning more appropriately and effectively?

Understanding

Systems of language

Explain differences in intonation, rhythm and sounds when listening to speakers of different ages, genders and social positions (ACLCHU074)

Elaborations

- exploring changes in neutral tone and identifying patterns to aid their own pronunciation and flow of expression, for example, the use of neutral tone for the second syllable when it repeats or does not contribute to the meaning of the first syllable (妈妈、孩子)
- experimenting with tone changes and reflecting on the impact on fluency when speaking, for example: Can I speak more quickly? Do my words sound less forced and more natural?
- exploring the role of emphasis, stress and rhythm in expressing subtle meanings in interactions

Relate prior knowledge of character form and function to infer information about the sound and meaning of unfamiliar characters (ACLCHU075)

- identifying familiar components and characters in different fonts and handwriting, including calligraphy and cursive forms of handwriting
- describing orthographic features of new characters encountered, including the structure, sequence and relationship of components, and explaining connections evident between form, sound and meaning
- recognising that characters may have multiple sounds (i.e. 多音字) and multiple meanings
- identifying the meanings of abbreviations, and analysing examples of abbreviations alongside their original forms to identify the ways in which abbreviations are formed in Chinese
- examining and explaining the relationships between characters and word meanings when encountering new vocabulary
- recognising commonly seen prefixes and suffixes (including 老, 子, 儿) and identifying the functions of the words

Analyse and examine how effective authors control sentence structure and use language to engage their audience (ACLCHU076)

- comparing the use of words that rely on interpretation of context to convey the intended meaning (such as 让、给), for example, listening to and reading several extracts from texts which use the same word in a different way
 - expressing conditions (for example, 如果...就); expressing cause and effect (for example, 为了...); and expressing the condition, quality or result of an action, for example, 坐得下、说得对、做完、买到
 - justifying opinions and building logical arguments by expressing additional information and providing reasons (for example, using 不但...而且...; 除了...以外; 另外), and introducing contrasting views to others using elements such as cohesive devices, for example, 不是...而是...; 不过; 虽然...但是...
 - exploring the ways in which language can be manipulated to make ideas more objective, for example, removal of personal pronouns and opinions
 - examining the use of noun phrases in Chinese and experimenting with omitting nouns (zero subjects) in their own communication
 - experimenting with the use of 成语 and famous sayings to substantiate ideas in Chinese
 - experimenting with 的 as a subject modifier to express ideas that would contain relative clauses in English, for example, 我昨天买的书不太贵
-

Compare the purposes, text structures and language features of traditional and contemporary texts (ACLCHU077)

- exploring the use of repetition to add emphasis and strengthen ideas, for example, 不同的国家有不同的文化
- viewing different types of texts on similar topics and recognising differences in discourse of oral and written texts, especially language used, such as 昨天街上人很多。昨天街上人山人海
- analysing features of text structure (for example, layout, expression and tone) and rhetorical devices (for example, metaphor and exaggeration) used to convey a persuasive argument or position

Language variation and change

Elaborations

Explain the dynamic nature of the Chinese language and how changes over time are influenced by local and global contexts and cultures (ACLCHU078)

- recognising traditional characters encountered in the local Chinese community and making note of the simplified character version
- exploring examples of types of simplifications and ways of associating traditional characters with known simplified forms, for example, whole simplifications (为-為), part substitutions (汉-漢) and half simplifications (说-說)
- exploring the role of code-switching by Chinese speakers, including the use of acronyms and English words, and how Chinese authorities are trying to limit the use of these terms in the media

Explain how language defines people's roles as outsiders or insiders in groups and cultures (ACLCHU079)

- experimenting with internet language to communicate with peers in a class blog and recognising the value of technology in exploring and constructing own texts
- considering how they can be more inclusive in their own language use, for example: What questions can I ask to understand others better? What words are best to be avoided? How can I express my opinion without causing offence?
- examining the use of inclusive language and how ideas are framed, for example, the impact of positive versus negative framing on how meaning is interpreted across languages and cultures, such as 足下留情, 小草常青 versus 'Keep off the grass'
- exploring the contexts and implications of terms used to identify others, for example, 老外、华侨、华裔、大陆人、华人、中国人、少数民族

The role of language and culture

Elaborations

Analyse the ways in which language choices reflect cultural practices and values and how language is used to express familiarity and distance between participants in interactions (ACLCHU080)

- exploring how known languages influence their own communicative preferences, such as reflecting the values of one culture when communicating in another, for example, differences in the use and frequency of 'thank you' and 谢谢
- making connections between their first language and how it influences communication in additional languages, for example: Why do Chinese speak English in certain ways? What features of my first language influence how I speak Chinese? How does this affect mediation of ideas between languages?
- interacting with people of different ages and positions, varying language and level of formality according to relative status, for example, using appropriate ways to accept or decline requests, compliments or suggestions (你能不能帮我一点忙? ---- 对不起, 我没有空; 您找谁? - 你爸爸在家吗?)
- examining how concepts such as humour and humility are conveyed in Chinese, and discussing how these may be perceived by non-native Chinese speakers
- reflecting on taboos in language use and how these can impact on communication across cultures, for example: Is it okay to ask someone's age in China? Why do numbers and colours matter? What are we superstitious about in Australia? What hand gestures are acceptable with Chinese speakers? What can I joke about?
- defining familiarity and distance as they relate to language use

Years 9 and 10 Achievement Standard

By the end of Year 10, students use spoken and written Chinese to sustain extended interactions with familiar and unfamiliar participants in a range of contexts (for example, interacting with Chinese-speaking students online; using Chinese to ask about items in a local Chinese grocery). Students use pinyin to transcribe spoken texts and use characters to create written texts. They identify key ideas and compare information from multiple sources (such as 新闻, 访谈, podcast, 纪录片) to develop and substantiate their own position on topics of personal interest or issues of broader significance. They exchange ideas and opinions, for example, 为什么学中文很重要? ; 澳大利亚的语言; 好用的手机app, 我不太同意你的说法, 因为...你觉得呢? ; 虽然你说得有道理, 但是... 所以我觉得... They speak with attention to pronunciation and tone. Students respond to and create a range of short informative and imaginative texts for a variety of audiences and purposes, for example, 什么是最健康的食物? 如果我...的话. They use a range of sentence structures and grammatical features to develop cohesion and coherence in these texts, including prepositional phrases to describe participants (for example, 我和 / 跟妈妈去买东西), and adverbs to express time, tense and frequency of events, for example, 总是, 还没有. They use conjunctions (for example, 虽然如此..., 尽管这样...但是...) and apply a range of stylistic devices such as rhetorical questions, quotes and 成语. They translate texts and produce bilingual texts, recognising that not all concepts can be readily translated Chinese and English. They engage with a range of imaginative texts, for example, 娱乐节目-小品, 合唱, 音乐录影, 流行歌曲比赛, 电视片, 电影.

Students recognise how writers and speakers, including themselves, make deliberate choices when using language features and text structures. They recognise that language is dynamic and is influenced by time, place, setting, participants and contexts. When interacting with a range of texts they identify how audience and purpose shape their own and others' language choices and interpretation of these texts. They explain how features of Chinese culture and language shape their own and others' communication practices. Students reflect on how their own cultural experience impacts on interactions with Chinese speakers.

The Australian Curriculum Languages - Chinese Second Language Learner Pathway - Years 7–10 (Year 7 Entry) Sequence

Years 7 and 8

The nature of the learners

Students are beginning their study of Chinese and typically have had little prior exposure to the language and associated cultures. Many will have learnt an additional language in primary school, some have proficiency in different home languages and bring existing language learning strategies and intercultural awareness to the new experience of learning Chinese. Students' textual knowledge developed through English literacy learning supports their ability to access similar text types in Chinese. Skills in analysing, comparing and reflecting on language and culture in both languages are mutually supportive. Students may need encouragement to take risks in learning a new language at this stage of social development and to consider issues of how the experience impacts on their sense of 'norms' associated with their first language and culture.

Chinese language learning and use

The systems of spoken and written language in Chinese are distinct. They are also quite distinct from the English language system. Because of the role of character learning and its impact on reading and writing, learners' spoken language use is more advanced than their written language use; therefore, students will be immersed in the sights and sounds of Chinese. They develop oral language through active listening, observing interactions between native speakers, and using the spoken language for purposes such as socialising, transacting and getting things done, sharing information and engaging in imaginative performance. They are likely to understand more words than they can say or write. They use Pinyin as a resource to support learning, prepare drafts of oral and written texts, and learn new oral vocabulary.

Contexts of interaction

Likely contexts for interaction are familiar classroom routines and structured and scaffolded settings. Students engage with resources and materials, and interact and exchange information and ideas with the teacher and peers.

Texts and resources

Students listen to, read, view and interact with a variety of short modified informative, imaginative and persuasive Chinese texts, including texts that are valued within Chinese culture and community. Texts written in characters may include a Pinyin glossary or character/vocabulary lists as appropriate.

Features of Chinese language use

Learning is conceptual and reflective as students develop their ability to share ideas about language and culture systems and develop their skills in mediating between languages and cultures. Learning and use focus on active exploration of the Chinese language system, which students draw upon to communicate their own ideas and engage in collaborative decision making and action.

Level of support

Correct language use is continuously modelled by the teacher. Students also utilise a range of resources, including online support materials, as well as dictionaries, character lists and glossaries.

The role of English

English is used when appropriate to allow for explanation and discussion and to reflect on students' experiences in Chinese, comparing their everyday communication and experiences to those observed in Chinese language communities.

Years 7 and 8 Content Descriptions

Communicating

Socialising

Exchange feelings, ideas and opinions, establish and maintain friendships and participate in group action
[Key concepts: naming, friendship, politeness, family; Key processes: interacting, exchanging, describing]

(ACLCHC081)

Elaborations

- exchanging greetings with peers and familiar adults, choosing appropriate greetings to suit age or position (for example, 您好, 老师 好) or time of day (for example, 你早, 晚安), and using appropriate tone and intonation
- sharing personal ideas and opinions on experiences such as home life and routine, school and education, diet and food, travel and leisure, climate and weather, expressing opinions and preferences and stating reasons to elaborate the message, for example, 我不太喜欢..., 我觉得...因为
- engaging in class discussion by responding to questions such as 你喜欢运动吗?, expressing agreement and disagreement with others' opinions (for example, 对, 我也很喜欢运动), and making sure that other participants are included in the interaction, for example, 我去过法国, 你呢?
- using set phrases to greet, thank, apologise and ask permission from peers and teacher, for example, 我可以上厕所吗? ; 谢谢; 对不起
- comparing own experiences to the lives of young Chinese people, for example, 我觉得 7:30 上学太早。我不坐地铁上学, 我坐公共汽车上学

Correspond and collaborate with peers, relating aspects of their daily experiences and arranging sporting and leisure activities

[Key concepts: time, etiquette, place, collaboration; Key processes: exchanging, corresponding]

(ACLCHC082)

- participating in posting on a shared blog and exchanging personal information (for example, name, age, nationality, school and year level) with students from sister schools, for example, 你好, 我叫Ann, 我是澳大利亚的学生
- responding to correspondence (such as emails, letters or postcards) by answering questions, clarifying meaning (for example, 你说你想来澳大利亚, 是吗?), seeking further information (for example, 你想一月份来吗?) and addressing requests, for example, 澳大利亚一月是夏天, 很热
- using supporting images in own writing, for example, using emoticons such as >_<||| to enhance meaning in digital communication
- using digital media to produce a bilingual publicity flier for an upcoming cultural or sporting event (for example, 汉语角), to promote Chinese learning among school community members

Informing

Elaborations

Locate and share with known audiences factual information about people, places and events from a range of oral texts
[Key concepts: time, place, number, audience, purpose; Key processes: summarising, synthesising]

(ACLCHC083)

- listening to or viewing public information texts such as weather forecasts and announcements, and identifying specific information and key words, for example, 点, 度, 米, 公里, 元/块
- viewing audiovisual texts such as a cooking program and answering questions from classmates about the key steps and main ingredients, for example, ‘蚂蚁上树’没有蚂蚁。树是粉丝, 蚂蚁是猪肉
- obtaining the gist or specific information in spoken texts by focusing on familiar, predictable items in a flow of words, as well as features of voice, gesture and word choice, for example recognising the emotion and degree of enthusiasm or dislike expressed (for example, 我一点儿也不喜欢... compared to 我不喜欢...)
- representing gathered information by restating key phrases and explaining reasons for actions and feelings, for example, 她很高兴, 因为...
- preparing short presentations of data collected from various sources, including texts in English on familiar people, places and events (for example, 澳大利亚的总理, 澳洲旅游景点, 我是澳大利亚人), and creating supporting visual images such as a timeline

Locate factual information about life in other communities and about aspects of Australian life, including data from graphs and tables, and convey this information to known audiences
[Key concepts: fact, time, place, number, valued knowledge; Key processes: informing, obtaining, processing, stating]

(ACLCHC084)

- locating and identifying key information in written texts such as timetables, calendars, brochures and advertisements, recognising familiar features of texts and organisation of content, and the word/phrase boundaries in sentences such as 我们学校/有/二百八十七/个/学生/
- identifying the categories used to organise graphs and tables by considering common themes across examples listed, for example, deducing that the heading 国籍 means ‘nationality’ by determining the meanings of 中国, 澳大利亚 in a table column
- reading familiar text types such as shopping brochures, understanding particular phrases such as 八折, and working out the final price, with the support of online dictionaries and word lists
- recognising markers of time (for example, 第二天) in a sequence of events to monitor information flow and assist reading for overall meaning
- presenting information in alternative formats to suit different purposes and the needs of the reader, for example, creating graphs or tables to categorise information when contrasting 澳大利亚和中国的地理

Creating

Elaborations

Express opinions about imagined characters and events seen and heard in contemporary media and performances, and create own portrayals of characters using gesture, action, stress, and modelled phrases

[Key concepts: experience, emotion, character; Key processes: performing, expressing, responding]

(ACLCHC085)

- watching segments of texts in Chinese, such as popular music videos from various sources of media, and expressing personal opinions, for example, 我觉得...很有意思
- performing Chinese songs and experimenting with rhythm, voice, emotion and gesture to convey the intended sentiment and meaning of songs and rhymes and enhance performance
- comparing stories and characters in both Chinese and Australian popular media, and exploring themes and topics that interest young people from different cultural backgrounds, such as 澳大利亚的年轻人也很喜欢看动作片。成龙很有名
- creating short plays or skits and taking on roles in imagined scenarios such as visiting or hosting a Chinese friend, a shopping experience or a fashion show
- assuming the role of a young Chinese person in the performance of a play about, for example, celebrating Chinese New Year
- creating and performing a rap about learning Chinese, experimenting with voice, gesture and action to convey different emotions and attitudes, including use of word stress to alter the way meaning is expressed and interpreted, for example, exploring the implications of expressing 不要 with varying degrees of volume and emphasis

Respond to simple narratives and create short texts about imagined characters and events

[Key concepts: experience, imagination; Key processes: recounting, responding]

(ACLCHC086)

- creating digital stories by producing labels for pictures, photos and cartoons in combination with sound, voice and music to convey a sequence of events in imagined contexts
- reading jokes or cartoons in Chinese and discussing how humour is conveyed through words and the presentation of ideas, comparing this to humour in English and discussing whether 'entertainment' means the same thing in different languages and cultures
- reading short texts such as comics and cartoons, and matching labels and speech to the characters to convey ideas and emotions, for example, using euphemistic phrases to capture the emotions and reactions of characters (真的吗? 真倒霉! 哎呀!)
- plotting a storyline, considering: Who is the main character? How can I make this character interesting to readers? How can I sequence my story to grab the reader's attention?

Translating

Elaborations

Translate simple texts from Chinese to English and vice versa, identifying words and phrases in Chinese that do not readily translate into English, using contextual cues, action and gesture to assist translation

[Key concept: politeness symbols; Key processes: translating, interpreting]

(ACLCHC087)

- translating English texts into Chinese, focusing on overall meaning, and identifying how best to interpret key words, for example, the use of 是 after first-, second- and third-person pronouns; numbers with measure words; possessives with 的; plurals
- identifying Chinese symbols in print and digital texts (for example, the longevity symbol), and developing ways to include the culturally attached value when expressing the meaning of these symbols in English
- learning how to look up unfamiliar characters and words in bilingual dictionaries, and experimenting with different online dictionaries and translation tools to investigate how specific meanings are rendered into English
- translating public texts in Chinese (for example, signs in shops and restaurants) into English and explaining their possible meaning and purpose, for example, translating the sign 休息中 on an unlit shop window to mean 'closed' instead of its literal translation, 'resting'
- using etiquette phrases within appropriate contexts and discussing whether the translation of 对不起 is the same across contexts, for example comparing its meaning in 对不起, 让一让 and 对不起, 我错了

Interpret common colloquial phrases and culturally specific practices from Chinese contexts into Australian contexts and vice versa, identifying contextual restraints and considering alternatives

[Key concepts: equivalence, representation; Key process: translating]

(ACLCHC088)

- watching interactions in Chinese between peers or in texts (for example, viewing a segment of a movie), and interpreting the meaning of the dialogue as well as comparing culturally determined manners or behaviour
- interpreting key ideas from Chinese to English with explanation of the context and the use of fixed phrases, for example, discussing what Chinese parents would say to their child when dropping them off at school as the Chinese version of 'Have a good day' (听老师的话, 不要调皮); what is the English version of 加油; and why people say 加油 at a Chinese sports event
- explaining key cultural concepts and practices to English speakers through translation, for example: Do we translate 春节 as 'Spring Festival' or 'Chinese New Year'? Why is 端午节 called 'dragon boat festival' in English? Does this translation capture the essence of this celebration? What is lost in translation? What are similar examples in English?
- considering how aspects of life in Australia that are culturally determined or reflect culture-specific behaviours may be rendered in Chinese, such as Anzac Day, Australia Day, the Ashes cricket

Reflecting

Elaborations

Reflect on personal experiences and observations of using and learning Chinese language in familiar contexts, and use these reflections to improve communication

[Key concepts: respect, context; Key processes: reflecting, observing]

(ACLCHC089)

- discussing appropriate language choices across cultures, for example, when meeting people for the first time or interacting with older people (such as a parent's friend); how presentation of the residential address in Chinese and English reflects certain values in the different cultures
- reflecting on their own English language use in response to their observations of Chinese speakers, for example, the words they use (slang, complex terminology), how they speak (tone, accent), and how they vary their language in different contexts and with different people
- engaging with Chinese speakers through organised school activities (such as Skyping students at a Chinese school or welcoming visitors to own school), recording moments when difficulty is experienced in communication and reflecting on the cause of this difficulty
- reflecting on aspects of their own identity, including what their membership of diverse groups says about who they are and what they consider important, for example, 我是澳大利亚人和日本人; 我是老大; 我参加学校的足球队
- noticing how relationships with others — for example, friendship groups (我的朋友是 Lisa 和 George, 我们都很聪明), ethnic group (我是华裔澳大利亚人) — influence language choices and preferences for learning content
- selecting information to share with a particular audience (for example, students from a sister school in China), asking: Why do I think this information is important to represent who I am? Why do I think my audience would find this information interesting and relevant?
- comparing expressions of identity encountered in Chinese texts and interactions with their own sense of identity, for example, 他是美籍华人
- observing interactions between Chinese speakers, and discussing the context and language use (for example, a family eating out in a restaurant, noticing seating arrangements, the background environment and how dishes are ordered and presented) and how this compares to their own experience
- discussing how language and gesture are used to communicate in English and how these features would be understood when interacting with Chinese people; identifying how their communication styles may need to be altered when conveying ideas in Chinese

Understanding

Systems of language

Elaborations

Recognise the tone-syllable nature of the spoken language, discriminate use of tones, rhythm, and sound flow in interactions, and use Pinyin to support learning the spoken language (ACLCHU090)

- exploring key features of Chinese phonology, examining the range of sounds and recognising how spoken syllables and tones are represented in Pinyin, by spelling words in Pinyin, or reading aloud words and sentences in Pinyin with attention to pronunciation, tone and phrasing
- differentiating between sounds and tones when listening to or producing spoken Chinese, for example, distinguishing between 我买 / 我卖东西, or between 庄 (zhuang) and 专 (zhuan)
- recognising and discriminating between homonyms in Chinese (for example, shì — 是 and 室), relying on context to assist understanding, and differentiating syllables with different tones, for example, shì (是) and shí (十)

Identify how character structure, position and component sequences relate the form of a character to its particular sound and meaning (ACLCHU091)

- learning the number, nature and sequence of strokes; exploring the range of stroke types used in characters; learning to write with a focus on stroke direction and order, and on balance and proportion within the square
- comparing writing across languages, recognising differences in stroke sequences and word formation (letter strings versus character squares), word spacing, punctuation and text direction
- learning the origins and features of components encountered in characters, and analysing the formation of characters, including recognising the frequency and positioning of common components (for example, 人、女、日、月) and their function or relationship to a compound character, for example, 人 in 他、认、从
- decoding characters by analysing their structure and the number of components, and recognising familiar components
- applying their knowledge of characters to learn to read and write new characters, and developing strategies for learning, for example, making connections between characters with a common component (你、他、们)
- identifying contextual meanings of key morphemes in diverse contexts, for example, 天、日、二/两, 你好 versus 好玩
- identifying the relationships between the meaning of individual morphemes in words and exploring how these morphemes apply in a wider range of word contexts
- explaining the use of common suffixes (子、里、面) and key morphemes (电、家、物、机)
- understanding how new concepts are interpreted in Chinese by analysing the nature of technology-related terms expressed in Chinese, for example, 电脑、短信、博客

Identify and use the characteristics of Chinese word order and explain the use of Chinese-specific grammatical features (ACLCHU092)

- analysing the variety of verb types found in Chinese — for example, adjectival verbs (高、大) and modal verbs (会、可以) — and the placement and use of adverbs, for example, 都 to indicate inclusion; 就 to indicate sequence
- identifying the placement of time and place phrases; the use of conjunctions (for example, 和 to add information; 还是/或者 to offer or indicate choices); and the role of measure words, for example, 个、只
- exploring the clauses of a sentence in Chinese and noticing how they are linked coherently, for example, 他叫王晓明, (他) 是我的朋友 (zero subject/pronoun)
- explaining the concept of 'tense' across languages, for example, asking: What tense is used in English to share ideas about a future activity? Can you exemplify how future tense is used in English? How is future tense expressed in Chinese? (我明天去北京, 下个星期去上海)
- applying processes of discourse development by joining, contrasting and sequencing using 也、和、但是、就, and exploring the use of cohesive devices and ways of extending, sequencing and elaborating ideas, for example, through the use of connectives, conjunctions and subject pronouns

Identify the characteristics of familiar text types, noting particular textual features distinctive to Chinese (ACLCHU093)

- exploring features and conventions of Chinese texts, including lack of word spacing and punctuation, and variability in text direction, and comparing texts in traditional characters with texts in simplified characters
- describing the major features of familiar text types in Chinese (for example, narratives), and experimenting with analysing Chinese texts, for example, recognising the 'problem' and the 'resolution' in a narrative
- comparing textual features and language used in different types of written communication within and across languages, for example: How does the formatting of a letter and an email differ in English? Why are there such differences? How does the formatting of a letter in English compare to Chinese formatting?
- discussing how the organisation of information reflects concepts of hierarchy and authority, for example, the placement of the date in personal correspondence; how the address is organised on a letter (小区名, 楼号, 楼, for example, 龙江小区蓝天园15栋2单元504室)
- comparing textual and linguistic features in diverse forms of written Chinese texts, such as letters, emails and text messages, and exploring the use of visual symbols such as emoticons in digital correspondence
- experimenting with features of text presentation in Chinese, for example, text direction, word spacing, punctuation, and overall paragraph format when using squared paper

Language variation and change

Elaborations

Recognise diversity in Chinese language use within different communities and regions, such as dialects, and local languages and character systems (ACLCHU094)

- exploring ways Chinese language use is fostered among local communities and the use of Chinese in local media such as community radio, TV, newspapers and magazines
- identifying examples of Chinese language used in commercial shop signs, advertisements, food and product packaging, and public notices in local areas, and exploring diversity in Chinese character texts by viewing texts containing diverse styles and fonts, including calligraphy scripts, handwriting and digital fonts
- exploring the range and distinctiveness of different dialects in Chinese-speaking communities, including those dialects regularly used in the local community
- knowing that China's minority nationalities have their own languages and exploring the issues in language maintenance in such contexts

Identify traditional phrases and contemporary terms in everyday language use and the role of technology in changing the way people communicate (ACLCHU095)

- discussing contexts where 繁体字 and 简体字 are used in Chinese-speaking communities today and exploring the use of these scripts as an expression of local identity, for example, in Hong Kong and Taiwan, or in local temples, signs and newspapers
- understanding the nature of and reasons for the simplification process by analysing and comparing characters in both systems (简体字 and 繁体字), for example, 门-門; 国-國; 这-這
- appreciating the role of myths, legends and 成语 in contemporary language use, for example, reading texts containing 成语, such as 井底之蛙, 画龙点睛 within 成语故事, and discussing their intended meaning, and the cultural importance of classical language employed in contemporary contexts
- discussing how languages influence each other, for example, how foreign concepts are represented in Chinese; interpreting the meanings of transliterations such as 可口可乐, translations such as 热狗, and hybrid forms such as 因特网
- noticing the use of English phrases and sentences in Chinese interactions (for example, 拜拜, or a few lines of English in a Chinese pop song), and discussing the reason for the 'code-switching'

The role of language and culture

Elaborations

Discuss how language choices reflect cultural practices, including clarifying roles and relationships between participants in interactions (ACLCHU096)

- discussing cultural values reflected in language use (for example, in relation to celebrations) and how they influence interactions, for example, by asking: In the colloquial phrase 合家团圆, what is 团圆? Why wish people 团圆? Does this have the same meaning in Australian culture? What's the relationship between the language use and the Chinese values in this phrase?
- identifying aspects taken for granted in communication (for example, a shared understanding of gesture, body movement and word meanings), and comparing ways people interact across cultures, asking, for example: How do Chinese people use gesture? Which non-verbal cues are shared with English speakers? Do they mean the same thing in both cultures? How does not understanding these differences impact on how we perceive each other?
- exploring the nature of the concept of 'family' in Chinese culture and how this influences relationships between individuals, for example, addressing adults as 叔叔 or 阿姨
- experimenting with multiple ways of expressing similar meanings in Chinese (for example, 你叫什么? 你叫什么名字? 你几岁? 你多大?) and discussing the differences in the context of use
- discussing how different roles and relationships are reflected in or impacted by word choices, for example, whether/when it is appropriate to ask someone's age, when to say 你几岁? or 你多大了? or when to use 你属什么?
- considering the different ways of addressing people in authority (李老师; 王校长) and how this reflects the importance of respect and hierarchy in Chinese culture

Years 7 and 8 Achievement Standard

By the end of Year 8, students use spoken and written Chinese to interact in a range of familiar contexts. They respond to instructions, questions and directions. They use known phrases to exchange personal information (for example, 我叫...; 我的爸爸是澳大利亚人), seek clarification (for example, 对不起, 我听不懂, 你说什么?), and transact and make arrangements, for example, 你要来我家吗? They use the question particle 吗 and familiar question words (什么, 谁, 哪儿, 几). Students approximate tone, intonation and rhythm but meaning remains clear. They use gesture and some formulaic expressions to support oral interaction. They employ learnt vocabulary to express personal insights and compare experiences on topics of personal interest and significance. They connect ideas using basic cohesive devices (for example, 和, 可是, 所以), express opinions using 喜欢 and 觉得, and give reasons using 因为. In writing, students organise their ideas using time expressions and phrases which mark sequence, for example, 第一, 第二... They apply 不 and 没有 in familiar phrases. They respond to and create simple informative and imaginative texts for known audiences and purposes. They use a range of verbs, including verbs of identification and existence such as 是, and a range of action verbs to describe interests and events, for example, 踢足球, 打乒乓球, 听音乐. They access and organise information from a range of spoken, audiovisual and printed texts. Students use simple sentences and paragraphs, and produce simple descriptions using intensifiers such as 很, 非常, 最. They reflect on their interactions when using and learning languages.

Students are aware of the key features of the Chinese writing system and its differences to the English writing system. They recognise the function of tone-syllables and Pinyin. They explain the word order of Chinese sentences and the layout and construction of simple familiar Chinese texts in comparison to their English equivalents. They recognise and describe diversity within the Chinese spoken and written language, and consider the influence of culture on everyday communication, for example, concepts such as respect, politeness and the importance of family. They are aware that literal translation between languages is not always possible, and that aspects of interpretation and translation are affected by context, culture, and intercultural experience.

Years 9 and 10

The nature of the learners

Students have prior experience of learning Chinese and bring a range of capabilities, strategies and knowledge that can be applied to new learning. They are expanding the range and nature of their learning experiences and of the contexts in which they communicate with others. They have a growing awareness of the wider world, including the diversity of languages, cultures and forms of intercultural communication. They are considering future pathways and prospects, including how Chinese may feature in these.

Chinese language learning and use

The systems of writing and speaking in Chinese are distinct. Learners analyse how messages are conveyed across languages and apply their skills in mediating between languages and cultures. Classroom discussions focus on exploring and extending learners' understanding of contexts and audiences to enhance their personal communication skills. Students access information and explore texts written in Chinese, developing strategies to interpret meanings where not all characters are known.

Contexts of interaction

Students interact with a range of known and unknown participants locally and globally, engaging in discussions about issues of personal interest (for example, relationships at home and school) and developing their ability to speak with confidence, experimenting with flow emphasis and stress to enhance their message.

Texts and resources

Students explore a range of text types, including informative digital media texts, opinion pieces and news, narrative fiction and non-fiction, short videos, TV programs and music. They learn to interpret, create, evaluate and perform different types of texts, such as procedural, persuasive and narrative, across a range of domains.

Features of Chinese language use

Students reflect on their understanding of and responses to their experiences when communicating across cultures. They construct blogs to post online, correspond with others by text message and email, and compose short texts on a range of issues for different audiences and purposes. They use creative, expressive and persuasive language in advertisements and posters relating to contemporary issues or events. They work collaboratively to exchange information and ideas and to share their life experiences with other Chinese speakers around the world.

Level of support

Students continue to develop their communication skills with increasing autonomy while drawing on diverse forms of scaffolding and models, including word lists, digital dictionaries, and teacher advice and support as required.

The role of English

Some explanations and reflection are necessarily carried out in English but learners at this level are able to express some complex concepts and reactions in Chinese.

Years 9 and 10 Content Descriptions

Communicating

Socialising

Elaborations

Interact and socialise with known and unknown participants in familiar contexts to plan and arrange events, and exchange feelings, opinions and preferences

[Key concepts: leisure, neighbourhood, education, time, space; Key processes: planning, arranging, negotiating]

(ACLCHC097)

- introducing self, peers, friends and familiar adults in conversation (for example, 这位是王校长; 这是小王; 这是王一飞) and responding to such introductions, for example, 你好, 小王, 我是...
- stating opinions on school and family life, familiar people, experiences and significant personal events (for example, 我最喜欢圣诞节), and indicating preferences with reasons, for example, 我想去看...电影, 因为听说这个电影很好看
- discussing topics of interest, such as music, TV programs or sports; and asking questions to seek information and opinions, request repetition, clarify meaning (for example, 你说你的生日是明天, 是吗?) and enhance mutual understanding, for example, 我不太喜欢听流行音乐, 我更喜欢摇滚乐, 因为摇滚乐很有力
- expressing apology, appreciation or gratitude in diverse ways, and comparing practices across contexts, for example, considering which term to use in various situations and depending on the relationship between participants (谢谢; 辛苦你了; 麻烦你了; 真对不起; 非常感谢)
- initiating activities among peers, such as 汉语角 to promote Chinese learning in school, and arranging a time and location for this activity, for example, 我们可以星期二练习说汉语。我们可以在教室, 或者在电脑室

Correspond with peers and teacher, exchanging ideas, negotiating decisions and inviting others to participate in collective action

[Key concepts: travel, environments, community; Key processes: corresponding, exchanging, deciding]

(ACLCHC098)

- corresponding with others via social networking sites, exchanging personal information and requesting information, for example, 你是哪国人? 你喜欢学习汉语吗?
- sharing information about life in diverse environments, expressing ideas with elaborated details to enhance meaning and engage readers, for example, 今天太冷了, 只有零下五度, 还下雪, 只能在家呆着
- sharing opinions about school or family life, including 我的学校, 我的老师, 我的好朋友, 我的一家人, and linking ideas to explain and support a particular position or view, for example, 我的姐姐不但喜欢音乐, 而且也很喜欢体育, 我除了踢足球以外, 还打板球。我觉得运动很有意思
- reading promotional material on topics such as healthy eating, and creating similar texts in Chinese to convey the meaning to Chinese readers, for example, 每天吃五份蔬菜, 两份水果
- identifying unacceptable behaviours at school and devising a set of posters or signs in Chinese to remind people of school expectations, for example, 爱护花草, 请安静, 可回收物/不可回收物, 关闭手机

Informing

Elaborations

Locate and compare perspectives on people, places and lifestyles in different communities, from a range of spoken information texts, and convey this information to others
[Key concepts: representation, time, leisure; Key processes: processing, informing, stating]

(ACLCHC099)

- documenting specific details of events, customs and lifestyles obtained from diverse sources (for example, video clips and face-to-face interviews), and summarising the information in order to form a balanced view to share with others
- listening to and viewing texts (for example, celebrity interviews, news reports and documentaries on tourist hot spots) and obtaining gist by focusing on familiar, anticipated items in a flow of words, such as names of people and places, time and date, attitude and opinions
- using dictionaries and other support materials to identify key words, for example, identifying the likely meaning of 七夕 when they hear 农历七月七日是七夕
- interviewing teachers or other familiar adults about their experiences (for example, 他小时候每天都骑自行车) and presenting this information to the class, quoting the source of information, for example, 有人说; 她告诉我
- producing multimodal presentations to deliver information about aspects of leisure activities, education or community life (for example, 澳大利亚的运动), and expressing opinions and perspectives, using data and examples to support ideas, for example, 我觉得这个电影很没意思, 因为...而且... 所以...
- presenting information to others with awareness of audience and context, for example, making appropriate language choices when presenting to adults as compared with presenting to peers

Locate and organise information on topics of interest from a range of written sources to develop a position, and convey this position to a familiar audience in a range of texts
[Key concepts: representation, time, leisure, community; Key processes: selecting, organising]

(ACLCHC100)

- reading tourist brochures and websites detailing lifestyles in diverse locations in the Sinophone world, identifying features of local lifestyles that reflect modernity or tradition, and evaluating the information for relevance, appropriateness and significance
- developing an information kit, supported by visuals, about their local city or region to provide to Chinese visitors via a local tourism website, including details on history, climate, environment, and cultural activities
- composing short texts to report on topics of interest (for example, 中国的茶-澳洲咖啡), providing a range of alternative views on the subject, for example, 有人说... 也有人说... 他们都不知道... 所以...

Creating

Elaborations

Respond to imaginative texts by stating how themes such as relationships, image and acceptance are portrayed, and create own performances to express ideas on personal experiences of these themes

[Key concepts: experience, emotion, beauty, character; Key processes: viewing, listening, responding, creating]

(ACLCHC101)

- sharing opinions on language used in contemporary media for young people, including music videos and TV series, for example, 我很喜欢学这首歌, 它的歌词很美
- explaining meaning of scripts and lyrics, and recognising how feelings/emotions are expressed in 'subtle' ways through the use of stylistic devices or symbolism, for example, 月亮代表我的心
- comparing how the theme of love is represented across different imaginative texts in both Chinese and English, and discussing personal responses, for example, 我觉得这个故事很像...。我不喜欢...因为他..., 如果他像...一样, 那么...
- identifying how media convey a sense of 'right' and purpose in the lives of young people and expressing own opinion (for example, 我觉得他是好人, 因为他帮助老人) and reactions to the situations and contexts represented, for example, 如果我是她; 我觉得他最好...
- portraying a scene from a familiar narrative (for example, creating a skit or short play recounting an event from a well-known novel) and considering how the main characters represent their experiences and express their emotions through their interactions
- creating a Chinese voiceover for a scene from an English language sitcom, experimenting with ways in which language, image, behaviour and humour are used to enhance meaning and entertainment
- collaborating to create short performances, for example, a skit about celebrating Spring Festival, a simple lyric for a song about school life, or a rap about being a student of Chinese
- collaborating to develop an imaginative promotional video to post on a website to sell an innovative product or service, such as a Chinese-speaking toy panda or a peer tutoring service

Respond to and create or adapt simple narratives that describe experiences and characters from folk tales or popular fiction

[Key concepts: experience, adventure, journeys, fantasy, description; Key processes: responding, describing, adapting]

(ACLCHC102)

- composing a creative account of an imagined experience with Chinese visitors to the local community, for example, hosting a Chinese student or taking a tour group to a local sporting event
- creating narratives that hold the attention of readers (for example, beginning a story with 你知道吗?), experimenting with 正叙, 倒叙, 插叙 to sequence events and using descriptive language to set the scene
- collaboratively creating short plays describing the experiences of imagined characters in different cultures, for example, 《James在上海》
- exploring how alternative words can be used to convey varying degrees of emotion and attitude towards people, places and events, for example, 我真高兴。你快乐吗? 他很幸福!
- taking on a role in a story and retelling the story from one character's perspective, describing their feelings and emotions, for example, 我真高兴! 太棒了! 哎哟, 吓死我了!

Translating	Elaborations
<p>Translate simple modified Chinese texts and familiar interactions in different contexts, identifying alternative ways to interpret meaning</p> <p>[Key concepts: respect, directness and indirectness, representation; Key processes: translating, interpreting]</p> <p>(ACLCHC103)</p> 	<ul style="list-style-type: none"> translating intended meaning of an interaction by avoiding literal (word-for-word) translations (for example, mediating a response to a compliment such as 你的衣服真漂亮。--- 哪里哪里！) and recognising that meaning may be implied rather than stated explicitly, for example, the use of 吧 to indirectly reject or refuse others in 我能来看看你吗？--- 不太好吧？ comparing word choices for public signs across languages, and discussing ways language is used to convey rules, expectations and permission, for example, comparing 闲人免进 to 'Staff Only' considering the uses of different measure words in Chinese (for example, 小勺 and 茶匙; 斤 and 克) when comparing several Chinese translations of the same recipe
<p>Mediate descriptions of Chinese and Australian life, identifying what experiences and ideas are not readily translated between cultures</p> <p>[Key concepts: equivalence, assumption; Key processes: translating, interpreting]</p> <p>(ACLCHC104)</p> 	<ul style="list-style-type: none"> analysing Chinese texts alongside their English translations to identify the challenges of translating culture, and developing strategies to overcome these challenges, by asking: What is lost in translation? Why can't we just translate word for word? Why does context matter? reading bilingual signs in places such as restaurants, shops, pools, schools, hospitals and construction sites, and determining the effectiveness of the English translations and possible reasons for such interpretations exploring ways to interpret and explain key concepts and cultural practices identified in Chinese interactions, such as 面子, and experimenting with how to give 面子 in interactions with others translating information about life in Australia to Chinese readers overseas, considering the audience's cultural experiences in order to determine what concepts they would find difficult to understand, exploring ways to elaborate on ideas to ensure clarity of meaning, and focusing on nuances of word formation and context, for example, 澳洲肥牛 ('bushwalking') preparing a voiceover text for a video presentation on the Chinese language program or the school environment, discussing possible interpretations of the text from the viewers' perspective and adjusting anything that is unclear before voice recording considering the different terms used in the Chinese-speaking world to represent 'Chinese person' (中国人, 华人, 华侨, 华裔)
Reflecting	Elaborations

Reflect on the reactions and experiences of participants (including their own) in interactions and observe how languages is adapted to communicate effectively in unfamiliar contexts

[Key concepts: face, disagreement, approval; Key process: reflecting]

(ACLCHC105)

- sharing information about their membership of diverse groups and exploring how this is expressed in Chinese, for example, 我和他是同学, 我们都在这个学校学习。我的姐姐是澳大利亚国家队的运动员
- interacting with Chinese-speaking peers to share aspects of their own identities as young Australians, for example, considering: What aspects of my life and identity would Chinese youth find interesting? How do I want to be perceived or understood?
- identifying how different opinions and perspectives are expressed and how this may be perceived by others, for example, comparing representations of foreigners in 外国人有一些不同的习俗 with 老外都很奇怪
- interacting with teachers and peers and reflecting on how to respond, for example, what to do when they don't comprehend words used or meanings expressed by other participants
- identifying and responding to intended and unintended meanings conveyed in interactions, for example, noticing contradictions between what is being said and the posture, movement, gesture and expression of participants, and asking: How do I interpret participants' real meaning? Are they just being polite or are their words genuine?
- reflecting on their own language choices in interactions with Chinese speakers and how these may have been perceived, for example: Was my communication culturally appropriate? Did I adjust my language and body language to help convey my meaning more appropriately and effectively? How can I seem interested when I am not?
- reflecting on how one's own cultural values and norms may relate to those of Chinese speakers, for example: What are the values held by Chinese speakers? Which of my own values are non-negotiable? What Chinese values do I feel I should validate and support?
- examining the use of inclusive language and how ideas are framed, for example, the impact of positive versus negative framing on how meaning is interpreted across languages and cultures, such as 足下留情, 小草常青 versus 'Keep off the grass'
- considering the role of voice, pitch and pace to encourage involvement of others in interactions and experimenting with modality to empower themselves and others, for example, 你可以 versus 你一定要; 我可能 versus 我会
- exploring the contexts and implications of terms used to identify others, for example, 老外、华侨、华裔、大陆人、华人、中国人、少数民族

Understanding

Systems of language

Elaborations

Discern differences in patterns of sound and tone in extended Chinese speech when listening to speakers of different age, gender, and regional background (ACLCHU106)

- listening to interactions between unfamiliar voices at different speeds or levels of clarity to develop auditory and comprehension skills, and discriminating between sounds heard in oral discourse, including the range of vowel and consonant combinations, for example, 'qin' versus 'qing' and 'chi' versus 'qi'
- examining the diverse meanings of words that share similar sounds, for example, the many meanings of the sound 'shi' and how to differentiate between 同音词 and 近音词 in different contexts (同意 and 统一)
- comparing examples of regional variation in pronunciation (for example, the Beijing use of 儿 and the southern pronunciation of 'shi' and 'si'), and noticing and describing differences in accent and tone when listening to Chinese speakers from diverse regions

Relate prior knowledge of character form and function to infer information about sound and meaning of unfamiliar characters (ACLCHU107)

- analysing sequences of characters containing a common component or side to determine the features of form, function and predictability within the group, for example, explaining the features of position, phonetic function and range of sounds in the characters 请 清 情 晴 精 睛 猜
- using understanding of familiar radicals and phonetic sides to estimate the sound and meaning of characters when reading aloud
- describing characters to others by naming their components or sides in sequence, for example, 'standing man' (亻) on the left, 'words' (言) on the right = 信
- discussing the use of 繁体字 and 简体字 in Chinese-speaking communities today, including the revival of 繁体字 and the spread of 简体字 in diverse communities
- recognising traditional characters encountered in their local Chinese communities and noting their simplified character version
- exploring examples of types of simplifications and ways of associating traditional characters with known simplified forms, for example, whole simplifications (为-為), part substitutions (汉-漢) and half simplifications (说-說)
- exploring the use of diverse character-morphemes to express similar ideas, for example, identifying multiple characters for 'food' (饭、菜、食、餐) and organising and classifying words containing these characters to understand their context of use
- recognising the two-syllable preference in Chinese nouns and applying this understanding when reading texts

Analyse functions of grammatical rules and use language appropriate to different forms of oral and written communication (ACLCHU108)

- comparing ways in which tense is expressed, for example, 了 to indicate completion; 完 to indicate the achievement of a desired result; 想 to indicate intention; the use of verb negation 没有 to indicate negative past; 正在 to indicate action in progress
- exploring the uses of diverse time expressions and ways to sequence events in time, for example, 先...然后...; 一...就...; 了...就...; 才; 第一; 然后
- comparing the functions of prepositions and discussing the importance of context when determining their meanings in texts, for example, 跟; 对; 给
- developing ideas using nuanced structures, for example, using different ways to negate depending on degree of formality or emphasis (我不是...; 我哪儿有...? ; 我没有办法...; 我不能...; 不行; 别; 不准)
- exploring and applying ways of sequencing and connecting ideas through the use of conjunctions, for example, 不但...而且...; 虽然...但是...

Compare the purposes, text structures and language features of traditional and contemporary Chinese texts (ACLCHU109)

- analysing and explaining the organisation and development of ideas or an argument in a range of genres, including textual features such as paragraphing
- applying understanding of genre to determine the purpose and intended message of a text, for example, the use of markers 第一步 and 第二步 in a recipe for fried rice
- recognising the purposes of texts and analysing features of format and language used, for example, in a diary, letter or advertisement
- comparing features of narrative, recount, report and procedural texts to identify ways in which information is structured and sequenced for particular purposes

Language variation and change

Elaborations

Explore the development of Chinese as an international language and as a lingua franca in Chinese communities (ACLCHU110)

- exploring the use of 普通话 as a lingua franca in Chinese-speaking communities and identifying terms used in different regions to express a similar idea, for example, 普通话 versus 国语; 达人 versus 高手
- investigating the dialects spoken in local Chinese communities and understanding why character subtitles are typically added to Chinese films and television shows
- exploring the role of code-switching in the language use of bilingual speakers (for example, acronyms and words which have not been translated from their original English) and how Chinese authorities are trying to change this and limit the use of these terms in everyday media

Explore the role of tradition in contemporary language use and how languages change over time (ACLCHU111)

- exploring the use of classical language such as 成语 and how this refines the style of writing when comparing 口语 and 书面语, for example, 她很漂亮 and 她貌美如花
- reading texts consisting of 名人名言 (for example, 孔子说...), and discussing the cultural meaning of the quote and how it is relevant to contemporary language use, including why it is still quoted widely in modern writing, for example, 三人行必有吾师
- exploring the nature of common idioms (成语), identifying their meanings and recognising how they can be used to add a sense of style to everyday communication, for example, 年年有余、人山人海
- examining how globalisation is impacting on Chinese values and language use, for example, how responses to praise are shifting to reflect a western concept of gratitude (谢谢) rather than the modesty of the past (哪里哪里)
- exploring the ways in which English words and phrases are incorporated into everyday communication in Chinese in digital media, for example, English expressions of emotion used in chat forums and text messaging (去 happy 吧), and Pinyin abbreviations replacing characters (L P = 老婆)
- investigating the use of internet language, including numerical representations of words (55555 = 呜呜他在哭) as a means of private communication among youth
- examining how the adaptation of words reflects and encourages change, for example, gender equality is reflected in the use of 妳 to acknowledge females and 他 to include both men and women

The role of language and culture

Reflect on how language and culture both shape and reflect each other (ACLCHU112)

Elaborations

- reflecting on the values of one culture when communicating in another, for example, differences in the use and frequency of 'thank you' and 谢谢
- exploring how cultural concepts of family and the importance of one's sense of connection to others influence use of language
- analysing the impact on language use of context and relationships between participants, for example, discussing how concepts such as face (面子) and connections (关系) are reflected in interactions between Chinese speakers
- identifying choices made in interactions in Chinese with people from different generations, for example, changes in greetings (吃饭了没有、拜拜、嗨) and forms of address (同志、小姐、师傅) over time

Years 9 and 10 Achievement Standard

By the end of Year 10, students use spoken and written Chinese to initiate and sustain interactions in familiar and unfamiliar contexts. They exchange information, ideas and opinions and enquire into the experiences and opinions of others, using question words such as 为什么, 怎么, 怎么样 to elicit more information. They summarise and collate information from different sources and perspectives to compare how ideas and concepts are expressed and organised in Chinese texts and contexts. Students observe how texts are created for different purposes and audiences. They respond to narratives, identifying language features that do not translate easily between cultures, mediating these ideas and expressing insights in Chinese while adjusting language use for different audiences. They justify their opinions with reasons and specific examples (比如), using tone and rhythm emphatically. Students respond to and create a range of informative and imaginative texts for different purposes and audiences, including Chinese audiences, and describe adjustments they have made in their language use for these different audiences. They use prepositions of time and place, and prepositions to show relationships with other people, for example, 给, 跟, 对. They make comparisons using 比, and describe people in terms of appearance, personality and behaviours, and places in terms of scenery. They use a range of cohesive devices (for example, 不但...而且; 除了...以外; 如果...就) with the support of models and cues. In writing, they organise their ideas according to themes or sequence events using specific time words, temporal markers such as 的时候, 以前 and connectives, for example, 先...然后. They also indicate changes in tense with tense markers such as 了, 过, and use verbs to express modality (for example, 可以, 要, 会, 应该) or intention, for example, 希望, 想, 打算.

Students discern differences in patterns of sound (for example, 'qing', 'qin') and tone in extended speech for different contexts and audiences. They apply knowledge of character components and morphemes to assist their understanding of new characters and words encountered. They analyse grammatical rules, use language appropriate to the form of communication, and compare textual features. Students recognise the key features of grammar and sentence structure that are distinctive to Chinese, such as measure words, and varied uses of verbs (是, 有 and attributive 的), and apply them in new contexts. They are aware of particular issues relating to translating between Chinese and English and recognise that certain concepts cannot be translated readily from Chinese to English and vice versa. They are aware that language use varies according to context, purpose and mode. Students explain how culture and language shape their own and others' communication practices, and reflect on how their own cultural experience impacts on interactions with Chinese speakers.

The Australian Curriculum Languages - Chinese Background Language Learner Pathway - Years F–10 Sequence

Foundation to Year 2

The nature of the learners

Students will have some exposure to Chinese language and culture in the context of their family and community life. They are likely to have high oracy skills but low literacy skills in Chinese. In the school environment they begin to understand how they use more than one language in their daily lives.

Chinese language learning and use

For background language learners the focus is on making connections between their oracy and literacy. Students use Chinese for most class activities and group responses, participating in active listening and action-related talk, games and play. They will be immersed in the sounds and sights of Chinese. They read short texts, share ideas about daily life and adapt the language they know to different contexts. Classroom interactions are mediated by teacher questioning and interactive talk in Chinese.

Contexts of interaction

Students are exposed to Chinese in the classroom and in their home and local community environments. Classroom experiences are likely to be structured compared to other contexts. Students communicate with peers, teachers and known adults. They begin to engage with Chinese culture through participating in community- and school-based celebrations, song and dance. Contexts are focused mostly on the here and now.

Texts and resources

Background language learners are exposed to a range of texts, including traditional oral texts, picture books, stories, rhyming verse, songs, poetry, multimodal texts and dramatic performances. Learners engage with Chinese language and culture through participating in celebrations.

Features of Chinese language use

Students recognise tones as an important element of Chinese speech and learn how the sounds of Chinese can be encoded in Pinyin, using Roman letters that often convey different sounds than students are accustomed to in English. Students view samples of characters as captions to images and as text in storybooks often defined in Pinyin. They learn to recognise basic character forms that represent familiar objects and ideas and convey significant cultural meanings.

Level of support

Chinese language use is scaffolded, prompted and modelled by the teacher.

The role of English

English is used where appropriate to allow for explanation, reflection and substantive discussion.

Foundation to Year 2 Content Descriptions

Communicating

Socialising

Elaborations

Initiate interactions, make requests and establish relationships with teachers and peers

[Key concepts: belonging, home, family, friendship; Key processes: requesting, greeting, thanking, introducing]

(ACLCHC113)

- introducing oneself to initiate conversation for example, 我叫 Johnny, 我的中文名字叫小强, 你叫什么?, interacting with teachers and classmates, sharing ideas about familiar topics such as family (for example, 我有一个姐姐, 一个弟弟) and daily life, for example, 我妈妈会做饺子
- responding to questions about and describing features of their own world (for example, 我的学校不大) and seeking more information by asking questions such as 你是 Emily 的妹妹吗?
- using pictures and prompt cards to participate in conversations
- introducing classmates (for example, 我叫 Anna 。我五岁) and expressing gratitude, for example, 谢谢

Collaborate with others in group activities and contribute to learning activities

[Key concepts: self, family, home; Key processes: interpreting, locating]

(ACLCHC114)

- making suggestions when working together and allocating jobs for members of group, for example, 我们一起唱吧; 我们唱, 你跳舞
- following the teacher's instructions and responding to questions with reasons (for example, 我不高兴, 因为我累了), using language appropriate to class context (for example, 老师, 我写完了) and making requests in an appropriate manner, for example, 老师, 我可以喝水吗?
- including others and recognising participants in group work, for example, Lisa 是我的好朋友; 我们组有...
- making cards for special cultural events such as Chinese New Year or personal events such as birthdays, copying short good wishes from modelled text, for example, 生日快乐
- recognising and copying characters relating to various events described in books, and noticing the formation of characters and spacing
- collecting examples of common Chinese characters found in familiar settings such as signs and labels, for example, 八 (8), 面 (noodles), 春 (spring)
- creating drawings to support written communication in cards, posters and visual displays

Informing

Locate information about people and objects from a range of sources, and sequence events

[Key concepts: same, different; Key processes: identifying, sharing]

(ACLCHC115)

Elaborations

- sharing information with the class on topics of interest (for example, 我的宠物), providing information and answering peers' questions, for example, 我的猫很小, 有棕色和白色的毛
- identifying details about people and events heard in media texts, including children's educational TV programs

Convey simple information to peers using illustrations and gestures to support meaning, and respond to questions from others

[Key concepts: family, home, routines; Key processes: greeting, thanking, imitating]

(ACLCHC116)

- presenting their learning by creating pictures and labelling them to elaborate concepts, for example, 春天; 中秋节
- presenting and expanding on details of the topic, and answering peers' questions, for example, 我的猫很小, 有棕色和白色的毛
- presenting their knowledge of places in China and Australia, such as places they have visited or where they have relatives, supported with photographs, for example, 我的奶奶住在北京
- sharing their knowledge of the world through and responding to questions from others, for example, 中国有什么动物? 澳大利亚呢? / 中国大还是澳大利亚大? / 你抱过考拉吗?
- creating posters on a cultural topic such as 'Chinese food' and selecting images and texts from magazines, newspapers and brochures to illustrate key ideas with character words such as 好吃
- identifying familiar words and concepts drawn from recent learning in other subject areas, for example, 数学 (形状) 和 科学 (自然现象)
- making connections between their knowledge of the world and their Chinese learning to infer meaning of words, for example, to guess the meaning of 尾巴 in 猫有长长的尾巴, 人没有尾巴

Creating

Participate in and respond to performances and shared reading of children's stories, songs and rhymes with a focus on rhythm, gesture and stress

[Key concept: imagination; Key processes: participating, responding]

(ACLCHC117)

Elaborations

- performing songs and rhymes, noticing rhythmic features such as 押韵 and experimenting with stress and gestures to help convey meaning
- interpreting language, facial expressions and other visual clues to inform own response to characters and stories presented in animations or songs
- singing 儿歌 and 童谣 and discussing the traditional ideas and morals they convey
- creating short plays based on extracts from familiar stories such as 《饥饿的毛毛虫》, using puppets and props

Create own representations of imagined people or events using illustrations and actions

[Key concept: imagination; Key processes: sharing, experimenting, reading, viewing]

(ACLCHC118)

- expressing opinions about characters or retelling the storyline after viewing or listening to stories, for example, 我觉得...真讨厌!
- selecting words from lists to produce captions for images related to familiar narratives heard or viewed in Chinese
- copying from models to convey meanings for a sequence of images, such as creating sequential captions for photos, pictures and paintings
- using characters and images to convey ideas in imaginative texts, for example, using pictographs such as 马, 田, 山 to illustrate an imagined event
- experimenting with storytelling by rewriting a segment of a modelled narrative text by replacing characters, actions or descriptions of objects

Translating	Elaborations
<p>Explain the English meanings of Chinese words and simple phrases heard or seen in everyday social contexts [Key concept: belonging; Key processes: translating, moving between]</p> <p>(ACLCHC119)</p> 	<ul style="list-style-type: none"> discussing Chinese words or expressions that appear to have no equivalent in English, for example, 不要客气, 快吃吧 stating the English equivalent of common Chinese expressions, for example, 对不起, 没关系; 谢谢, 不谢 discussing meanings of colloquial phrases used on specific occasions (for example, 恭喜发财 to give New Year wishes), and exploring how such sentiments are expressed in English
<p>Create simple bilingual vocabulary lists identifying and comparing vowel and consonant sounds in Chinese and English [Key concepts: bilingualism, vocabulary; Key processes: translating, interpreting]</p> <p>(ACLCHC120)</p> 	<ul style="list-style-type: none"> sharing knowledge of Chinese with others, explaining features that differ from English, for example, how periods of the day are defined and word order for date and time comparing ways of communicating and interacting in Chinese and English by identifying similarities and differences in features such as gestures, greetings, titles
Reflecting	Elaborations
<p>Reflect on aspects of their Chinese identity and personal relationships with others [Key concepts: belonging, place; Key processes: reflecting, observing, noticing]</p> <p>(ACLCHC121)</p> 	<ul style="list-style-type: none"> discussing the importance to their own identity of speaking Chinese to connect with older relatives, and the wider Chinese-speaking community, for example, 我会说中文, 我可以用中文跟上海的爷爷打电话 sharing information about their family background, such as country of origin, languages and dialects spoken, and current locations of extended family, for example, 我爸爸是从中国来的。他会说普通话和上海话 sharing own likes and dislikes and discussing features that reflect their cultural identities, such as preferences relating to sport and leisure activities, food, and TV programs, for example, 我喜欢吃中国菜, 也喜欢吃汉堡包 discussing the role of Chinese language and culture in their own lives, such as participation in cultural events, food preferences, or overseas travel
Understanding	
Systems of language	Elaborations
<p>Recognise the four tones and their function in Chinese, and compare consonant and vowel sounds in Chinese and English (ACLCHU122)</p> 	<ul style="list-style-type: none"> participating in activities aimed at raising awareness of pronouncing and differentiating between tones and syllables in Chinese and noting differences in own spoken language, for example comparing a recording of own spoken Chinese with other students in the class practising the 'flow' of a sentence in Chinese, using gesture to help demonstrate tone and stress performing or reciting texts with strong rhythmic features such as nursery rhymes or tongue twisters, for example, 《猴子穿新衣》

Recognise that characters are the written representation of spoken Chinese and the morphological nature of Chinese words (ACLCHU123)

- discussing the range of strokes and the construction of characters, and applying this understanding to differentiate between similar character forms, such as 日 (sun) and 目 (eye)
- copying characters with attention to the location, direction and order of strokes
- learning the sound and meaning of commonly seen basic characters (独体字) and components (部件), such as 木 (tree) and 人 (person), and making connections between basic characters and their bound forms (非成字), such as 水 and 氵
- identifying components and their various forms in different locations within characters, for example, 人、从、合; 心、情、思
- learning that Chinese words are made up of two or more characters, with each character contributing meaning to the word, for example, 大人 (literally 'big person') means 'adult'
- recognising key morphemes in word groups, for example, 白天、白雪、小白兔
- identifying meanings of each syllable such as in xuéshēng, xuéxiào of Chinese words encountered

Recognise parts of speech and understand basic rules of word order in simple sentences (ACLCHU124)

- learning about meta-terms for word types, for example, exploring what is considered a verb in English and in Chinese (for example, adjectival verbs in Chinese)
- categorising words into word types common across languages, for example, 家人 as noun, 四 as number
- understanding that as for English there are basic rules of word order in Chinese (subject-verb-object)

Recognise features of various familiar text types in Chinese (ACLCHU125)

- developing awareness of bilingual texts (for example, picture books, multimedia texts, song and dance DVDs) through immersion in text-rich environments, and noticing features of punctuation and text organisation across languages (for example, spacing between words)
- comparing familiar texts in Chinese and English and discussing features in common, for example, storybook covers normally consist of book title, image, author's name and illustrator's name

Language variation and change

Elaborations

Recognise diversity in expressions and gestures used in everyday social interaction across cultures (ACLCHU126)

- observe and participate in interactions with a range of participants, and discuss how different people use language in different ways, for example, a range of ways of greeting and farewelling
- understanding that gestures can enhance communication but might be interpreted differently by different people
- learning about etiquette in everyday social contexts, such as how to address adults, for example, 王阿姨好
- comparing language use among family members (for example, with parents and siblings), and recognising different languages (e.g. Putonghua, a dialect or English) used for different participants, for example, 我跟爸爸妈妈说中文, 跟哥哥说英文

Recognise Chinese as a major community language in Australia and around the world, and understand that language use varies according to cultural background (ACLCHU127)

- understanding that Chinese is used beyond their immediate and extended family
- identifying countries and regions in the world where Chinese is used as a major language
- recognising diversity within Chinese language, including significant regional languages spoken by family or others, such as Cantonese or Shanghainese

Role of language and culture

Elaborations

Recognise differences and similarities in communication across cultures, such as greetings, names and gestures (ACLCHU128)

- viewing and listening to Chinese and Australian cartoons and identifying similarities and differences
- examining pictures of different marketplaces and noticing differences between food markets and grocery stores in China and Australia
- observing what is the same and what is different in their classroom interactions and classroom interactions in China
- discussing communicative practices across cultures and identifying culture-specific practices (for example 拜年) in Chinese culture, including noting culture-specific phrases used in either Chinese or English
- recognising various ways in which familiar concepts are expressed in different cultures, such as greetings
- using non-verbal communication, such as gestures and facial expressions, for example, showing numbers 1–10 with fingers
- recognising ways in which people express their culture in music, dance, traditional stories, food, games and celebrations
- recognising visible expressions of identity such as flags, maps, traditional dress, and landmarks
- exploring cultural symbols and practices through stories, songs, dances, games and crafts

Foundation to Year 2 Achievement Standard

By the end of Year 2, students use spoken Chinese to initiate interactions in a range of familiar contexts. They obtain and convey information and experiences relating to their personal world in simple exchanges. They use learned vocabulary, sounds, characters and culturally specific actions and gestures to convey meaning. They exchange greetings, introduce themselves and each other, and express thanks and apologies, for example, 我的中文名字叫小强, 你叫什么? They interact with and create simple predictable imaginative and informative texts such as 我的狗很大, 它的尾巴很长, using familiar characters and sounds. They use images, actions and gesture to show that they understand the meaning of words when speaking, listening, reading, viewing and writing.

Students identify the four Chinese tones and their function. They know that there is a metalanguage to describe the distinct writing and speech systems in Chinese. They compare English and Chinese consonant and vowel sounds. They copy and trace characters and identify key components in familiar characters. They identify how their Chinese identity influences some of their language choices when interacting with familiar adults and peers.

Years 3 and 4

The nature of the learners

Learners explore how they use more than one language in their daily lives, and use Chinese in relation to their personal world, countries where Chinese is spoken and the world of imagination.

Chinese language learning and use

Students engage with Chinese language through speaking, listening, reading, viewing and writing. They understand more words than they can say or write, and use this knowledge to attempt to say and spell unfamiliar words. Learners use Chinese to participate in action-related talk and to complete tasks. The focus of these activities is still on connecting their background oracy with their literacy.

Contexts of interaction

At this level, students are likely to focus on both formal and informal exchanges in familiar situations with familiar audiences, such as in a range of face-to-face and online/virtual environments where they are able to identify a range of responses. Likely contexts for interaction are situated within everyday educational experiences as well as students' personal, family and social environments. In these contexts they have opportunities to notice that there are similarities and differences in the ways people communicate both within and across cultural groups.

Texts and resources

Students are exposed to a wide range of voices and settings where Chinese is used, including some extended passages in written and oral form. Students are exposed to culturally valued texts, including traditional oral texts, fables, stories, songs and picture books. They encounter various types of print and digital texts, simple chapter books, rhyming verse, poetry, nonfiction, film, multimodal texts and dramatic performances.

Features of Chinese language use

Oral language use draws on topics and concepts encountered in other learning areas, building students' capacity to describe and explore these in Chinese. Students use Chinese to share everyday experiences with each other. They develop literacy skills by beginning to read fables and legends and write stories and recounts. Pinyin is used as a tool to develop students' pronunciation and to assist their understanding of the nature of the spoken language. Students begin to develop orthographic and morphological awareness by exploring the relationship between characters and morphemes.

Level of support

The teacher explores and enhances students' understanding of the similarities and differences between Chinese and English and supports their development of Chinese literacy and oracy. Vocabulary lists and model texts support literacy development.

The role of English

English is used for discussion, reflection and explanation to assist the continued development of learners' knowledge base and intercultural capability.

Years 3 and 4 Content Descriptions

Communicating

Socialising

Elaborations

Interact and socialise with peers and teachers to exchange thoughts and feelings about home routines, leisure activities and community events

[Key concepts: recreation, routine, place; Key processes: discussing, sharing, transacting]

(ACLCHC129)

- participating in conversations about home and leisure activities, expressing opinions and comparing experiences relating to hobbies, interests and routines, for example, 你喜欢做什么？, 我喜欢游泳。; 你几点放学？, 我三点放学, 比较早
- discussing topics beyond the immediate home context, including subjects from other learning areas, for example, 乘法口诀, 名人 and 地理
- asking questions to seek permission from the teacher, for example, 我可以上厕所吗？ / 老师, 我们明天有没有汉语课？ / 老师, 我可以用铅笔写字吗？
- repeating the teacher's instructions to help clarify and maintain class activities, for example, 老师说我们先看这个DVD, 再做题
- initiating and maintaining communication by taking turns (for example, making suggestions such as 我们要不要一起去 or 我们一起去吧) and responding to the suggestions of others in an appropriate manner, such as 好的, or through gesture
- creating short texts such as emails, letters and text messages to interact with others, for example, to invite, congratulate or thank someone
- producing short texts such as descriptions of a place or feature or the rules of behaviour for different events, situations or activities
- participating in shared blogs, exchanging information with students from sister school, for example, 你好, 我叫 Ann, 我是澳大利亚的学生
- using emoticons such as >_<||| in digital communication to enhance meaning

Collaborate in and make decisions about group activities and learning experiences in familiar contexts

[Key concept: collaboration, public life ; Key processes: interpreting, exchanging]

(ACLCHC130)

- participating in group activities and role-plays involving scenarios such as buying food or goods or ordering a meal, and making requests in an appropriate way, for example, 请来...;我想买...; 你有...吗？
- negotiating details in a transaction, such as stating preferred size, quantity or price, and concluding the transaction with the exchange of currency
- offering their opinions to help others in transactions, for example, 我喜欢红色的/我最喜欢那个
- taking collective action to plan and present a cultural item, such as celebrating a festive occasion by performing a song or dance for members of school community
- discussing cultural items to present for a school event, for example, performing a song, cooking Chinese food or making craft (剪纸, 做灯笼)
- using digital media to produce a publicity flier for an upcoming cultural or sporting event such as 汉语比赛
- responding to scaffolding questions about the scientific world in Chinese, for example, answering questions such as 你喜欢下雨吗？; 现在下大雨了, 我们怎么办？; 为什么有人害怕下雨呢？ when learning about rain

Informing	Elaborations
<p>Gather and organise factual information from familiar sources about countries and places</p> <p>[Key concepts: information, fact; Key processes: obtaining, processing]</p> <p>(ACLCHC131)</p> 	<ul style="list-style-type: none"> interviewing familiar people, such as parents, teachers, peers and community members, and appreciating their significance as sources of information about Chinese language and culture, identifying possible sources of information beyond the classroom, for example, 我可以问我的妈妈, 因为她去过新加坡 gathering information by surveying family and friends about languages spoken, country of origin, or participation in cultural events and leisure activities, and displaying information on frequency charts collating key information to share with others, such as summarising and sharing one aspect of a topic to contribute to a group response, for example, experiences of participating in organised activities involving aspects of Chinese culture (龙舟比赛; 剪窗花) making connections between images and charts and the content of texts, and identifying key words to locate information, for example, in the chapter titles of a book identifying key structural words to assist in understanding information, for example, in a procedural text
<p>Convey key points of information to familiar audiences</p> <p>[Key concepts: information, significance; Key process: obtaining]</p> <p>(ACLCHC132)</p> 	<ul style="list-style-type: none"> giving a short presentation to convey information gathered from multiple sources, such as investigating 南京的天气 by interviewing the teacher and listening to a podcast of a weather forecast supporting presentations using pictures, charts and graphs appropriate to the task, such as using bar charts to show data on 学校学生语言背景统计表 / 班上同学使用交通工具统计表 reporting information from texts to explain aspects of lifestyle or culture in different communities, for example, TV guide, brochures, advertisements or timetables containing text and images making posters to celebrate a special event such as 端午节, explaining the origins and stories of the festival with others outlining steps in a procedure, using sequential markers such as 第一, 第二, 第三, for example, sequencing pictures in the correct order to demonstrate how to make dumplings presenting a visual display with supporting text on a topic of personal interest, for example, 我的家, 我的宠物, 姥姥的家乡, 过春节
Creating	Elaborations

Respond to simple fables and legends through discussion of characters and events
[Key concepts: morality; Key processes: creating, responding]

(ACLCHC133)

- engaging with entertainment designed for young children such as TV programs, songs, plays, and games in digital media, and evaluating such forms of entertainment, for example, 我喜欢这首歌,因为它的歌词很美
- discussing depiction and features of characters in various forms of entertainment, such as differences between characters and how these differences are demonstrated, for example, in the cartoon 《喜羊羊和灰太狼》
- reading aloud or reciting traditional texts such as poems and rhymes (for example 《咏鹅》、《静夜思》、《四和十》), paying attention to pronunciation, prosody and emotion and explaining key ideas in Chinese
- participating in shared reading and identifying how familiar words are used to express meanings in new contexts, for example, 盘古的眼睛变成太阳, 头发变成星星, 血液变成江河湖海
- presenting stories to peers, paying attention to storytelling techniques such as 停顿; 语气语调; 抑扬顿挫

Create short personal narratives and performances of poetry, song, dance or drama which reflect the culture and traditions of the Chinese community
[Key concepts: imagination, point of view; Key processes: responding, expressing]

(ACLCHC134)

- creating performances in response to legends and other forms of culturally significant literature such as 《盘古开天辟地》, or segments of 《西游记》
- creating simple narratives of the day in the life of a person, animal or fictional character (for example, 《小狗汪汪的一天》), sequencing events and using supporting images
- using digital media to create an imaginative story to share with peers and Chinese-speaking contacts, using both language and images to achieve particular effects, for example, using 重复 (很大很大的球; 走啊走啊走啊)
- plotting a storyline, considering: Who is the main character? How can I make this character interesting to readers? How can I sequence my story to grab the reader's attention?
- considering alternative endings to well-known stories, using learnt sequences and teacher guidance

Translating

Elaborations

Identify common spoken Chinese expressions and discuss examples of actions, words and phrases that do not readily translate into English

[Key concepts: equivalence, idiom; Key processes: translating, identifying, discussing]

(ACLCHC135)

- differentiating between word-by-word meaning and intended meaning when translating from Chinese into English, for example, the word-by-word translation of 我喜欢一个人看书 is 'I like one person to read', but it means 'I like to read alone'
- designing bilingual signs (characters/Pinyin/English) to post on key buildings and rooms around the school that convey short messages such as descriptions of the place or the rules in that place
- recognising the role that gesture plays in oral interaction, including emblematic (hand) gestures, gesturing for emphasis and inclusivity, and taboos within Chinese communication, such as pointing directly at someone
- identifying Chinese symbols in print and digital texts (for example, the longevity symbol), and developing ways to convey the culturally attached value when expressing the meaning of these symbols in English
- comparing own translation of short texts (such as brand names, signs, slogans and billboard advertisements) to others', and evaluating the effectiveness of own translation
- developing strategies for using bilingual (Chinese–English and English–Chinese) dictionaries in both print and digital forms to assist with translation
- explaining in English features of gestures used in Chinese, for example, hand gestures for numbers
- comparing versions of a common text across languages and identifying issues in conveying meaning, for example, how to render 小心轻放 into English

Translate simple English texts into Chinese and vice versa, using strategies for building vocabulary and interpreting intended meaning of words in English and Chinese

[Key concepts: morphology, bilingualism; Key processes: identifying, translating, interpreting]

(ACLCHC136)

- considering alternative ways of interpreting ideas, such as giving examples, looking for synonyms (近义词), and elaborating on details
- creating bilingual texts to share with others, for example, adding English to a Chinese New Year poster or couplet, adding Chinese headings to an Australian tourism promotion brochure, adding Chinese to a class weekly timetable

Reflecting

Elaborations

Reflect on their reactions and responses to others when participating in learning and cultural experiences in Chinese and Australian contexts

[Key concepts: identity, place; Key processes: responding, identifying]

(ACLCHC137)

- identifying levels of politeness, respect and formality in diverse contexts, for example, when seeking assistance, when engaging with people of different ages or authority
- deciding how best to address and refer to others (for example, addressing an older stranger as 姐姐 or 阿姨 in Chinese) and considering how that person would be addressed in English
- identifying ways in which their Chinese identity is reflected in their daily life and interests, for example, belonging to a sports or hobby group or attending community school
- considering their linguistic and cultural skills as Chinese and as Australians and how these contribute to their overall sense of identity
- comparing Chinese and Australian lifestyles such as festivals and celebrations, food staples, preferences and cooking styles, and discussing own engagement with these
- noticing differences in cultural practices and the protocol for certain events, such as 我去表哥家要先叫人, 大姨好, 大姨夫好; 如果他們要留我吃飯, 我要先問媽媽可不可以; 如果阿姨叫我多吃一點, 我不能吃太多, 最好得客氣客氣
- participating in cultural events (for example, watching a China–Australia soccer match, performing a Chinese song to the school community, or celebrating Anzac Day) and reflecting on own reactions

Understanding

Systems of language

Recognise the tonal features of Chinese in own speech, and understand when and why some tones are not expressed in some contexts and how syllables are decoded from and encoded into Pinyin (ACLCHU138)

Elaborations

- differentiating between the four tones when speaking, and knowing how to pronounce the 'neutral tone'
- understanding the aesthetic features of reading out loud 朗誦 and reciting 背誦, focusing on phrasing, stress and intonation of Chinese spoken language

Identify the form, composition and spacing within characters, relating components and their positions to their meaning and sound (ACLCHU139)

- developing fine motor skills appropriate to Chinese writing conventions (方块字), and learning about Chinese writing conventions, including direction of text and punctuation
- applying rules of stroke direction and stroke order when writing characters, paying attention to details such as length of a stroke to discriminate similar forms, for example, 土 and 士
- developing skills in identifying the structure and components of a compound character, for example, 学 has two components and they are of top-and-bottom structure
- categorising characters with common components (such as 花、草、菜), and making connections between meanings and sounds of components and meanings and sounds of characters, for example, 目 (eye) in 看 (to look at)
- recognising the use of traditional and simplified characters in the local community (for example, 《大洋时报》 uses traditional characters), exploring texts in both forms of characters and analysing differences in orthography, for example, 门 and 門
- identifying personal connections with one or both forms of characters, for example, 我妈妈教我写简体字, 因为妈妈是从北京来的
- inferring meaning of unfamiliar words from known morphemes, for example, 学生、学校、小学
- understanding that a character might have multiple meanings, for example, that 冷 means 'cold' in 冷水 and 'quiet' in 冷清

Develop ways to structure sentences in Chinese to elaborate own ideas (ACLCHU140)

- elaborating ideas in sentences, including details such as time, place and manner, for example, 星期一我从上海坐飞机到北京
 - learning meta-terms to describe grammar rules in Chinese, for example, the placement of 主语 (subject), 动词 (verb), 名词 (noun) in sentences
 - recognising that there are multiple ways to structure a sentence, such as 我吃了早饭后去学校 and 吃了早饭后我去学校
-

Recognise similarities and differences in the structure of spoken and written texts that have the same purpose (ACLCHU141)

- recognising features of various genres, including narratives and explanatory texts, identifying which genres are most suitable for different purposes, for example, 记叙文记叙一个事情, 比如说《我最喜欢的假期》
- identifying differences and similarities in language choices and text structure across spoken and written texts, for example, comparing an announcement with a public notice
- comparing and differentiating forms of texts based on purpose and audience, for example, asking: What's the difference between a letter and an email? What might be the reasons for such differences?
- applying cohesive devices in producing imaginative texts, correspondence and informative texts, for example, beginning a story with 很久很久以前

Language variation and change

Elaborations

Recognise how the context of interactions influences language choices (ACLCHU142)

- addressing others appropriately, for example, using 王老师 with teacher, 张叔叔 with young adult males, nicknames with close relatives (欢欢表妹)
- differentiating language use based on different functions, for example, making commands (过来!) or making requests (你可以过来一下吗?)
- discussing differences in language use at home and at school, for example, comparing how to ask for permission to use a computer (老师, 我可以用电脑吗? and 我就是要用电脑!)

Explore diversity in dialects and in contexts in which Chinese is used in Australian communities (ACLCHU143)

- identifying locations of major dialect groups in China, discussing environmental and historical reasons for the existence of dialects, and appreciating the value of a common language
- making personal connections with particular dialects of Chinese, asking peers which dialects are spoken in their families, and inviting others to say a few words in their own dialect, for example, 我爷爷说广东话
- investigating diversity in spoken Chinese and identifying differences in phonology across dialects, for example, exploring greetings in dialects such as Cantonese, Hakka and Shanghaiese, and comparing the pronunciation of words
- accessing local Chinese media such as radio stations, satellite TV stations, and newspapers, and viewing Chinese programs in mainstream media (such as Chinese news programs or websites) to enhance their appreciation of Chinese language use in local media and explore the extent of their comprehension of Chinese used in diverse contexts
- discussing reasons why Chinese is used in communities within Australia, and making personal connections to these reasons, for example, 我父母是从香港来的, 他们说广东话

Role of language and culture	Elaborations
<p>Explore how the Chinese language represents cultural meanings in specific ways (ACLCU144)</p> <p>     </p>	<ul style="list-style-type: none"> identifying culturally specific terms and phrases, for example, 'mate' in Australian English and 吃了吗 in Chinese, and sharing insights into why particular cultures value certain colloquial language associating the literal and cultural meanings of words and expressions such as 红红火火 discussing the contextual and cultural meanings of words that cannot be directly translated into another language, for example, translating 手足 as 'brothers' reading Chinese idioms (成语故事; for example, 《指鹿为马》、《狐假虎威》、《买椟还珠》、《拔苗助长》), and discussing their meanings; exploring the relevance and significance of these idioms to contemporary life and how these phrases are used in daily communication, such as 生日快乐 for birthdays, 大吉大利 for New Year and 团团圆圆 for Mid-Autumn Festival

Years 3 and 4 Achievement Standard

By the end of Year 4, students use spoken and written Chinese to initiate interactions and to participate in short exchanges, for example, 你晚饭吃什么？,我学汉语和英语,站起来, 大家听老师说. They organise and convey factual information and share experiences in formal and informal situations, making appropriate choices of characters, words and pronunciation. They use demonstratives such as 这、那、那些 with measure words and verbs to indicate agreement (对, 好的) and preferences (要、想、喜欢). They respond to and create short imaginative, informative and persuasive texts for familiar audiences and identified purposes. Students select from known speech patterns to meet routine, procedural and informal conversational needs.

Students know that Pinyin represents spoken language, and map Pinyin against their own speech. They distinguish between the contexts in which tones are expressed and those in which they are not. They identify features of the Chinese writing system, including the range of strokes and their sequences in character writing; and the relationship between components and sound and meaning. Students identify ways of structuring ideas in sentences, including the role of correct sequencing of time and place. They describe features of Chinese language and culture, and compare how ideas are conveyed across languages and cultures.

Years 5 and 6

The nature of the learners

Students use their bilingual and bicultural capabilities and understandings within the world of their own experience and imagination and draw on some topics from other learning areas. They are extending their knowledge of language structure and of texts.

Chinese language learning and use

Students are immersed in Chinese across speaking, listening, reading, writing and viewing; where practicable, activities may include those designed collaboratively with teachers in other learning areas to provide opportunities for translating or interpreting. Students speak and write in Chinese to express their own interests. They begin to appreciate how their own language use compares to modern standard forms in terms of pronunciation, tone and rhythm. They consciously use aspects of grammar in their language learning and employ a range of implicit and explicit models in response to teacher prompting. They consider audience, purpose, and appropriate language choices in their cultural and communicative practices.

Contexts of interaction

Students actively communicate in Chinese in classroom, school, home and community environments. They begin to interact with other language users via the online environment and other digital forums.

Texts and resources

Students engage with visual media, music, cartoons, stories, games and documentaries. They use multimedia for researching, exploration and collaboration. They create a range of short imaginative, informative and persuasive texts.

Features of Chinese language use

Students learn to analyse new characters encountered in texts, with a focus on mapping these character forms to their known spoken language. Students make comparisons between societies, social structures and belief systems and explore how these are conveyed through language. They discover and discuss diversity in cultural identity and experience. Students explore the Chinese past through texts such as fables and classical stories. Written language use includes reading and comparing Chinese and English children's literature.

Level of support

Correct Chinese language use continues to be modelled by the teacher to support students' oracy and literacy development. Texts often have Pinyin glossaries or include vocabulary lists to support learning.

The role of English

English is used to compare languages and explore complex ideas related to language, culture, learning and concepts from other learning areas.

Years 5 and 6 Content Descriptions

Communicating

Socialising

Elaborations

Interact and socialise with peers and known adults, exchanging ideas and opinions about personal experiences and social activities

[Key concepts: place, identity, community; Key processes: negotiating, transacting, arranging]

(ACLCHC145)

- engaging others in conversation and inviting responses on issues relevant to their lives, such as traditional and modern lifestyles and values, and language learning by asking questions such as 你知道澳大利亚的国宝是什么吗？你觉得什么最好玩？
- participating in class and school debates, acknowledging others' opinions and presenting own with examples and personal experiences, for example, 虽然你说得很有道理, 但是如果我们再想一想, 如果你也经历过... 那么你会同意...
- using social media to maintain contact with classmates and record events in everyday life, by keeping a weekly or daily journal or blog, recording highlights of school or home life or leisure activities (for example, 今天我的足球队又输了, 真没劲!), or a holiday experience, for example, 袋鼠岛游记
- describing and elaborating on details of experiences in correspondence, for example, 这次暑假过得很愉快, 我们全家去了巴厘岛。在那儿, 我们天天在海边, 有时候冲浪, 有时候散步
- composing text messages, emails, letters using appropriate formats and employing appropriate terms to address recipient, for example, 敬爱的王老师 (for a formal letter), 嘿, 小王, 最近好吗 (for a casual letter or message)
- responding appropriately to invitations, including by accepting and declining, for example, 谢谢你的邀请, 祝你生日快乐。但是我星期日要...对不起, 不能参加你的聚会。希望你玩得高兴

Take action, resolve issues, make shared decisions and organise shared experiences

[Key concepts: place, identity; Key processes: interpreting, negotiating, selecting]

(ACLCHC146)

- collaborating to decide on a menu for a class lunch and negotiating items, prices and delivery with a local restaurant, for example, 大家都喜欢吃春卷, 那么每个人一个春卷, 我们需要二十五个
- locating suppliers of Chinese learning materials through websites and other sources, for example, 你这本书是在哪儿买的? 我们班要买一套图书, 中国城的那家中文书店怎么样? to select a class set of readers
- listening to or viewing community media such as local Chinese radio or television, and participating in advertised activities, for example, a singing competition or locally organised events
- researching and arranging a visit by an expert (such as a calligrapher or a taiji master) to visit class and share knowledge to promote Chinese learning in school community
- captioning bilingual posters to promote community events (such as Chinese New Year celebrations, lion dance performances, visiting performers) and school activities, such as cultural days, assembly items or grandparents' day
- creating posters and fliers to promote cultural events to the local Chinese community, such as 悉尼艺术节, XXX 音乐剧
- producing a paragraph in the school newsletter to promote an upcoming event

Informing

Elaborations

Locate and compare factual information from different sources about different communities and lifestyles

[Key concept: lifestyle; Key processes: informing, selecting]

(ACLCHC147)

- viewing TV programs, documentaries or interviews with young people such as 《智慧树》, discussing the participants' experiences and comparing with own life experiences
- investigating aspects of life of Chinese communities overseas, for example, web-chatting with relatives overseas to find out more about own family origins, history or circumstances
- identifying and selecting visual sources (for example, 优酷, and comparing and contrasting different perspectives on issues, such as how children in different locations in China describe their school experience
- following an instructional video in order to complete an action collaboratively, for example, watching 如何画中国画, or preparing for a cultural celebration by following video procedures on how to 包粽子 for 端午节
- representing information in a new format, for example, watching a TV cooking show then converting each step into a written recipe with essential information including ingredients and quantities, and amount of time required
- selecting appropriate resources to research a topic of interest such as a major place, person or event in Chinese history, and identifying key information to share with others
- researching a topic by analysing what information is needed, employing Chinese search engines to access a range of sources of information online, and choosing the most suitable sources, for example, 这个网站看上去像正规网站吗? 这个网站是官网吗?

Plan and present key points of information to familiar audiences

[Key concept: social action; Key processes: presenting, conveying]

(ACLCHC148)

- developing informed opinions to share with others, giving examples (for example, 澳大利亚人说很多语言, 比如英语, 汉语, 法语等等) and comparing information, for example, 中国人口比澳大利亚的多(我觉得我们应该帮爸爸妈妈做家务)
- working in teams to prepare and present an oral presentation, supported by digital media, related to own school or community or on topics of interest, for example, endangered animals, popular singers in Asia
- preparing and creating a video clip to share with peers overseas introducing aspects of local culture, including interesting places, history, famous people, and lifestyle, for example, 墨尔本的电车
- producing a digital display containing text and images to present a personal perspective on life in Australian schools to share with peers overseas
- creating poster displays using graphics, photographs and illustrations to document and convey ideas related to topics of interest, for example, their country of origin, family tree or favourite sports team
- collaborating with others to prepare a report for a school or community newsletter about Chinese language learning experiences or activities at day school and community school

Creating	Elaborations
<p>Respond to popular stories and characters from Chinese folklore, sharing opinions on aspects of the storyline, characters and themes</p> <p>[Key concepts: significance, tradition; Key processes: comparing, responding, creating]</p> <p>(ACLCHC149)</p> 	<ul style="list-style-type: none"> exploring various forms of Chinese popular culture in audio or visual media, including 流行歌曲、电影、电视剧、娱乐新闻, appreciating stylistic devices used in popular song lyrics, such as 重复, and comparing them to English songs comparing popular performance across cultures and generations, evaluating performances with attention to the aesthetic values and the influence of Western and Asian popular culture, and comparing the content and language, for example, 我妈妈最喜欢的中文歌是...这首歌唱的是...我最喜欢的中文歌是... 内容和我妈妈喜欢的歌不一样 recognising the influence of traditional culture on modern popular entertainment, for example, considering the use of traditional instruments in popular songs, the composition of modern songs from well-known traditional poems such as 《水调歌头·中秋》, and the representation of traditional symbolic meanings such as 孝顺 (filial piety), 礼让 (out of courtesy or thoughtfulness) in modern performances reading children's literature, including fables and traditional stories; exploring values and morality tales such as the concept of 寓意 in 动画片, 小人书; and comparing values and morals conveyed through texts across cultures, such as 凿壁偷光, 塞翁失马 (你能找到英语中类似的说法吗? 你觉得澳大利亚人理解这个故事的寓意吗?) reading extracts from culturally significant children's literature, discussing their personal responses to the characters and storyline, and writing a journal to relate the story to personal experience or express empathy for characters involved
<p>Create short narratives to express the experiences, thoughts and emotions of individuals in imagined contexts</p> <p>[Key concepts: character, emotion; Key processes: comparing, responding, creating]</p> <p>(ACLCHC150)</p> 	<ul style="list-style-type: none"> recounting an imagined encounter with a famous person, or reproducing a scenario where cultural misunderstandings create a humorous outcome collaborating to create dramatic performances to retell classic Chinese stories, such as 《负荆请罪》, or famous stories in other cultures, such as 《丑小鸭》 creating narratives to describe imagined experiences, for example, a trip to China, including a visit with a homestay family or an adventure on the Great Wall, or the experiences of a Chinese student visiting Australia creating stories in various literary styles (for example, 记叙文、散文、诗歌), experimenting with descriptive language to convey the intensity of characters' emotions, and events, using written styles of language, for example 我看到好多漂亮的花, 有粉红的, 雪白的, 真是太美了
Translating	Elaborations

Identify and account for the potential loss of subtle meanings from character components and individual characters in compounds when translating into English

[Key concept: meaning; Key processes: translating, interpreting, negotiating meaning]

(ACLCHC151)

- reading Chinese texts such as advertisements and signs that include the translation of some words or phrases, and engaging in class discussion about the merits of translations and alternative ways of representing the meanings expressed in the texts
- reading children's stories in bilingual form and reflecting on ideas expressed in Chinese and English which may not be readily translated and discussing possible reasons for this
- observing interactions between speakers of Chinese and attempting to describe the interaction in English, discussing personal interpretations of the meanings conveyed and the cultural messages implicit in the interaction, for example, watching an interaction between a teacher and students in China and contrasting with their own experience in Australia
- explaining culture-specific concepts such as humility (谦虚) to people from different cultural backgrounds, including examples of when and how 谦虚 should be shown and how it is understood by participants of the communication, for example, when accepting/rejecting appraisal

Create simple bilingual texts for different audiences, explaining features of the different versions and the impact of context

[Key concepts: audience, context; Key processes: identifying, translating, interpreting, negotiating meaning]

(ACLCHC152)

- acting as interpreter for visitors from diverse backgrounds and communicating their message to speakers of other languages, applying strategies such as clarifying, rephrasing and explaining when mediating cultural concepts
- using a range of resources to assist in creating a Chinese translation of a text, exploring the functions of print and digital translation tools and discussing their strengths and weaknesses

Reflecting

Elaborations

Reflect on the benefits of learning Chinese and English in both Chinese and English interactions

[Key concepts: place, biculturalism, identity; Key processes: observing, explaining, reflecting]

(ACLCHC153)

- noticing and reflecting on how interacting in Chinese feels different to interacting in English, and identifying ways of communicating or behaving that appear culturally specific
- discussing language choices expected or required in diverse contexts across languages, for example, apologising, congratulating, expressing thanks, declining, rejecting, complaining
- engaging with Chinese peers in diverse contexts, identifying situations in which misunderstanding or miscommunication occurs and exploring strategies to overcome these
- recognising signals within an interaction that require adjustment of language choices

Understanding

Systems of language

Elaborations

Recognise the use of tone, intonation and stress of words to express emotion, opinion and attitude (ACLCHU154)

- reading aloud printed information with attention to pronunciation and tone
- recognising syllable changes in speech, including change of tonal value and tone sandhi, such as 不要

Recognise the contextual meanings of individual syllables or characters to assist comprehension and vocabulary development, and explain the form and function of components in individual characters, for example, 心, 想, 情, 闷 (ACLCHU155)

- inferring the meaning of unfamiliar characters by identifying familiar semantic and phonetic components of compound characters, and using contextual clues to map the form of characters to sound and meaning
 - using digital tools to write a specific character, and finding out its pronunciation by using online dictionaries
 - writing characters with correct structure and proportion when writing with and without 田字格, and discussing issues with remembering and reproducing individual components in characters, for example, discriminating between characters such as 冒、昌...
 - exploring a range of fonts in digital form and personal styles of writing, and appreciating the aesthetic value of calligraphy, including 硬笔书法
-

Understand and use basic structures and features of Chinese grammar to enhance meaning and clarity of expression (ACLCHU156)

- recognising grammatical functions of common suffixes and prefixes to assist comprehension in reading, for example, recognising that 子, 者, 家 are noun suffixes (for example, 家 in 书法家、数学家)
- discriminating between the contextual meanings of characters with multiple meanings, such as 家 in 家人 and in 画家
- recognising words that reflect particular cultural understandings, for example, 天气 means 'weather' but literally translates as 'sky's energy'
- explaining the function of words and structures in language encountered, for example, 了 in the sentence 我早上看见了两只猫 indicates the completion of an action in the past
- exploring and beginning to build more complex messages, such as using forms of cohesion, and finding ways to generalise or nominalise ideas, for example, 因为... 所以 ..., 虽然... 可是..., 不但... 而且..., 总而言之/总的来说
- recognising the different focus and purpose of alternative sentences, for example, 他把杯子狠狠地扔在地上 and 杯子被狠狠地扔在地上
- understanding that there are different applications of grammatical rules in spoken and written language, for example, in ordering food (for example, comparing the structure of the following expressions: 来点儿什么菜?; 您吃点儿什么?; 你想吃/要吃什么?; 你想吃海鲜炒饭吗?; 海鲜炒饭要吃吗?)
- differentiating use of grammar based on context, for example, using sentences with more formal structures in report writing
- recognising terms and expressions used in formal written styles, for example, 首先, 其次, 最后 rather than 先...后来...后来...

Recognise and apply conventions of personal texts and compare textual features of different texts (ACLCHU157)

- exploring metaphorical and literal meaning in texts, for example, 远远的街灯亮了, 像是闪着无数的明星
- analysing rhetorical devices in texts, including 比喻、夸张、排比; identifying culturally specific features such as 日月如梭, 难于上青天; and experimenting with rhetorical devices in own speech and writing

Language variation and change

Elaborations

Differentiate key features and apply rules for expressing meanings in spoken and written modes in diverse contexts (ACLCHU158)

- identifying variability in language used in a variety of contexts, for example, at the supermarket, at the doctor's surgery, or when visiting a friend or relative
- recognising language reflecting different levels of formality, such as 爷爷 and 祖父, and using language to reflect formality appropriate to context, for example, I and 非常疲惫
- using words and expressions reflecting their interlocutor's seniority and authority, for example, 您老敬请?
- analysing language use to identify degree of intimacy or distance between participants, for example, 咱俩、我们、我和您
- differentiating oral and written styles of language, for example, 我要吃好吃的。中国有很多美食

Explore the impact of English on everyday communication in Chinese and the impact of Chinese on English (ACLCHU159)

- exploring language 'borrowing', such as English words 'borrowed' from Chinese (for example, 'yum cha' and 'kung fu') and the impact of English on Chinese language use today, for example, 考拉、汉堡包
- analysing the impact of languages on one another such as 他写着作业 (他在写作业。) and 白了 which sounds like 'bye'
- exploring the impact of English on Chinese language use, such as recognising transliteration in Chinese, for example, 可口可乐

Role of language and culture

Elaborations

Explore particular cultural meanings conveyed in everyday interactions across languages (ACLCHU160)

- exploring origins of 成语 and 歇后语 encountered in texts such as 朝三暮四, 姜太公钓鱼, and using fixed phrases to share or convey a cultural idea in own writing, for example, 塞翁失马, 笨鸟先飞
- exploring how the languages that people know can impact on the way they communicate in other languages, for example, the use and frequency of 'thank you' and 谢谢 is a sign of westernisation, whereas in Chinese it is not used as often as overuse indicates distance between participants in interactions
- exploring how cultural concepts of family and the importance of one's sense of connection to others influence use of language, for example, in the greeting 阿姨好! ('Hello, Auntie!'), where 'auntie' may be a colleague of their mother's and a total stranger to the child

Years 5 and 6 Achievement Standard

By the end of Year 6, students use spoken and written Chinese to maintain interactions with familiar and unfamiliar people across a growing range of situations (for example, 你星期几去汉语学校？,你说...对吗？); to convey information, opinions and experiences (for example, 我喜欢踢澳式足球, 你呢？); and to access a range of print and digital media resources, such as 童书, 报纸, 画册, 科学书, 传单, 广告, 教材, 地图. They write characters, paying attention to shape, and stroke order and proportion. They transcribe spoken words and sentences in Pinyin and select simplified characters to match the sounds they hear. They use stress, tone and intonation to express emotion and opinion. They respond to and create a range of short informative, persuasive and imaginative texts for diverse audiences and purposes. They relate their own experiences to those presented in texts, for example, 《如果我是...》. They create sentences that include prepositions (给、跟、对) and possessives and attributive clauses with particle 的. They use a range of verbs, and use verb complements to describe the direction, result or potential of an action. They use conjunctions (for example, 可是、或者、因为、除了) to connect ideas and elaborate on or clarify opinions and actions. They explain how their developing bilingual ability supports their identities as users of Chinese and English.

Students explain the nature of Pinyin and apply it to their own speech. They categorise characters into groups based on meaning, appearance, pronunciation or function and apply this information to new characters. They compare the word order of Chinese sentences with that of English, and identify how their knowledge of English impacts on the way they express ideas in Chinese. They describe how the features of Chinese and English texts are used to convey meaning.

Years 7 and 8

The nature of the learners

Students maintain their sense of belonging to both their home and their outside culture. They can alter their conduct to fit different contexts within the world of teenage experience.

Chinese language learning and use

Classroom interaction is primarily conducted in Chinese. Students extend their knowledge of language structures and text organisation through reading and viewing authentic material and discussing how to apply new learning to their own communication. They are immersed in Chinese language, exploring issues related to youth culture, environmental conservation, family structure and welfare, and the features of diverse Chinese personal and social environments.

Contexts of interaction

Students use Chinese at school and home, and through increased engagement with members of their local communities. The online environment is used to connect students with other Chinese language users globally.

Texts and resources

Students engage with a variety of text types and modes, including visual and digital media, music, TV series, documentaries, and bilingual versions of classic and contemporary literature and their film adaptations.

Features of Chinese language use

Students extend their writing skills to include more persuasive language and more formal genres, such as articles and reports. They participate in presentations on topics related to the history and geography of Chinese-speaking communities, and initiate discussion through enquiry. Students begin to compare their own pronunciation to modern standard spoken Chinese. They also explore the influence of English on their own communication in Chinese, in pronunciation and linguistic structures, and the role of code-switching in their daily language use. Students develop their skills in analysing characters and recognising word and clause boundaries in extended text.

Level of support

Correct Chinese language use continues to be modelled by the teacher to support students' oracy and literacy development. Glossaries, vocabulary lists, dictionaries and translation tools are used to support comprehension.

The role of English

English is used when required for comparison or to explore complex ideas related to language, culture and concepts from other learning areas.

Years 7 and 8 Content Descriptions

Communicating

Socialising

Elaborations

Interact and socialise with familiar groups and individuals, exchanging personal information such as sporting achievements, favourite pastimes, and sharing perspectives on aspects of contemporary life such as popular music, [Key concept: perspective; Key processes: transacting, connecting]

(ACLCHC161)

- contributing to class discussions to share opinions on topics such as homework and study habits, parental expectations and generational differences; elaborating on own perspectives, clarifying ideas and opinions (for example, 奥运会 我既为澳大利亚加油 也为中国加油, 因为这两个国家对我来说都很重要), and summarising various perspectives in interaction, for example, 大家的意思是... or 也就是说...
- initiating conversations to share aspects of personal world such as a recent overseas holiday, future plans, achievements in life, for example, 你知道我今年冬天去了哪儿吗? 说起来真好玩
- acknowledging others' ideas and indicating agreement or disagreement in non-judgmental ways (for example, 我们也没办法, 不得不...); using language to persuade or influence others, for example, listing possible consequences (要不然; 如果... 的话; 那么 ...)
- eliciting others' opinions; exploring others' perspectives and the influences on their perspectives; asking questions and inviting elaboration (for example, 你为什么说...?); and responding to others' opinions by providing a different perspective, for example, 你说你喜欢滑雪, 我也很喜欢滑雪。因为滑雪不仅有趣, 它也是很好的运动, 可以锻炼身体; 你还可以和家人一起滑雪, 所以它也是很好的家庭活动
- sharing experiences relating to school (for example, camps, excursions, class activities) and leisure (for example, sporting competitions, television programs, family holidays) with participants of online communities of Chinese speakers, such as educational blogs
- responding to enquiries from others through correspondence and online communities, and describing lifestyle of Australian young people with attention to what makes Australia unique, for example, 澳大利亚有..., 人们生活...
- engaging with educational social media to document own experiences and achievements by posting a weekly journal or blog for others to read, for example, 本周XX俱乐部足球赛
- using mobile technologies to maintain contact, share thoughts and experiences, and plan activities with Chinese classmates

Participate in planning joint projects and events that would benefit the local community, justifying choices and making decisions

[Key concepts: community, benefit; Key process: interpreting, negotiating, collaborating]

(ACLCHC162)

- collaborating with others to organise a community event, taking initiative in negotiating roles
- participating in projects to benefit other learners and speakers of Chinese, for example, developing readers or multimedia learning tools for young Chinese children in the community; establishing a peer mentoring program to support learners of Chinese in local primary schools
- making purchasing decisions by comparing prices of items from a range of suppliers, as well as features such as country of origin, quality, reliability, warranty and safety
- requesting financial advice as part of responsible decision making when purchasing goods and services, for example, 我们可以花多少钱？这个一下就占了一大半，还是买便宜一些的那个吧
- creating posters to promote activities among young people in Chinese communities within and beyond the school, for example, a language and culture club, sporting team
- using social media to access a wider audience and promote intercultural understanding and awareness of the lifestyles and achievements of young Chinese Australians
- promoting healthy living among Chinese peers by creating posters educating youth on the benefits of healthy eating and exercise, as well as the importance of success at school

Informing

Collate and analyse information from a range of sources to develop a position on an issue

[Key concepts: bias, perspective; Key processes: collating, analysing]

(ACLCHC163)

Elaborations

- accessing information from a range of sources, such as familiar adults, TV advertisements or documentaries, to inform self and others on topical issues
- comparing information presented in various sources (for example assessing information about China in tourism videos from China and Australia), and sharing information about the differences of focus and possible reasons for these differences
- preparing and organising a learning activity such as 小老师课堂 to engage peers, and contributing to discussions to share information drawn from a range of sources, such as documentaries and personal sources, for example, 昨天让大家采访一下家人，来帮助我们谈谈中国的方言。你们都采访了谁？
- accessing a range of sources, such as online debates in public forums, and identifying factors that potentially create bias, for example, generational differences, cultural factors, individual personalities (有人认为愚公很傻，尤其是生活在现代的人)

Plan and convey key points of information and opinions based on information drawn from a range of sources

[Key concept: multiculturalism; Key processes: collaborating, comparing, evaluating]

(ACLCHC164)

- engaging with different representations of ideas, comparing perspectives and developing an informed position on issues relevant to their life, for example, 在中国有人说移民澳洲好, 因为生活轻松; 也有人说移民澳洲不好, 因为没有熟悉的家人朋友。我觉得... 因为...
- discussing perspectives and comparing experiences and opinions relating to issues such as 独生子女政策, noting how some people focus on positive effects on society while others focus on their own personal experiences of being a 独生子女
- collaborating to produce multimedia displays to share with readers overseas to provide a local insight into issues such as international students in Australia
- collating information from personal research and writing reports on issues relevant to young people across cultures, for example, pressure to follow fashions and trends, bullying in schools, and inspirational people

Creating

Elaborations

Express opinions about how popular imaginative texts, including poems and 故事, reveal important cultural values

[Key concepts: values, beliefs, attitudes; Key processes: comparing, contrasting]

(ACLCHC165)

- describing how emotions, attitudes or intentions of a performer, author or character are conveyed through language, and analysing how emotions (for example, happiness, sadness, homesickness) are expressed in popular songs or TV programs
- viewing popular TV programs designed for Chinese youth, sharing individual responses or reactions to forms of Chinese entertainment, and comparing features of performance across cultures
- understanding how music, imagery and stereotypical representations of people, places and practices are used in contemporary youth media to influence audience responses
- exploring regional and generational influences on popular culture of the Sinophone world (such as 港台流行歌曲; 港片), and identifying different concepts of 'beauty' in different eras, for example, 60年代流行..., 70年代流行...
- comparing features of performance in different media (such as radio, television and online videos), and discussing how entertainment is changing with technology
- producing creative texts in response to literary texts such as 《某某后传》, reflecting the literary styles and methods identified in such texts
- reading a range of imaginative texts from other cultures, keeping a reading journal (读书笔记) to record understanding and own responses, and participating in class discussions about texts such as 《小王子》 and 《安徒生童话选》
- discussing themes and meanings of traditional texts, including classical poems (for example, 《静夜思》, 《春晓》, 《咏鹅》) and stories, fables and legends (for example, 《孔融让梨》, 《井底之蛙》, 《铁杵磨针》)

Create narratives that express the everyday experiences of young people, experimenting with dialogue
[Key concepts: imagination, attitude, beliefs; Key processes: analysing, creating]

(ACLCHC166)

- collaborating to prepare and present short dramatic or humorous performances that reflect situations or experiences drawn from their own Chinese cultural environment, such as generational and cultural differences encountered at home
- creating songs or jingles to promote products, services or events in imaginative ways
- creating written and multimodal narrative accounts of the life experiences of major historical figures or characters from literature, for example, 诸葛亮, 孔子和他的学生
- developing skills in drafting and editing own writing, collaborating with others to enhance stylistic and creative features of own written expression

Translating

Translate short texts for different audiences, identifying what is lost in translation and considering alternative ways to explain key points

[Key concepts: concept, public, personal; Key processes: comparing, translating]

(ACLCHC167)

Elaborations

- identifying the challenges of translating some concepts (for example, 龙的传人: 'descendant of dragon'), and developing strategies to overcome these; asking, for example: What is lost in translation? Why can't we just translate word for word? Why does context matter?
- translating short phrases or texts, noting culture-specific words and phrases, and discussing alternatives, equivalence or non-equivalence
- discussing reasons for creating different translations for different audiences
- comparing alternative ways of translating to identify 'normality' in one's linguistic and cultural context, for example, using the term 软饮料 instead of 无酒精饮料 assumes the reader/audience has a degree of connection to English to understand meaning of 软
- considering ways to convey culture-specific terms (for example, 中药和食疗, 上火, 大补) in English

Create bilingual texts relating to other learning areas and topics of interest, considering the influence of different roles, relationships, settings and situations when interpreting both Chinese and English

[Key concepts: audience, context, bilingualism; Key processes: identifying, translating, interpreting]

(ACLCHC168)

- observing others involved in interpreting meaning in bilingual contexts and identifying challenges and potential issues in mediation
- using Chinese dictionaries to enhance understanding of subtle differences in how and when words are used, and applying this knowledge to interpreting meanings in texts and interactions

Reflecting

Elaborations

Reflect on own intercultural experiences, and contrast ways in which people of different generations, genders and linguistic backgrounds use language and respond to different experiences

[Key concepts: change, continuity; Key processes: reflecting, shaping]

(ACLCHC169)

- recognising own tendency to generalise or stereotype during interactions (for example, 地域歧视), being sensitive to the possibility of causing offence to others in interaction, and considering questions to ask about the other person's cultural background, for example, 你父母是大陆人吗?, 你父母的老家在中国什么地方?
- participating in cultural events, and reflecting on cultural similarities and differences, and on how cultural practices change in a different context, for example, 我们家不过中秋节, 因为大家都觉得不太重要。母亲节那天我们全家去爷爷奶奶家一起吃饭
- being aware of how own ideas may be perceived by others based on language choice, including code-switching, for example, 我妈妈不喜欢我说汉语时夹着英语, 但是我和朋友经常这样说, 她也经常这样说。有的时候姥姥听不懂, 我就会想想全部用汉语该怎么说

Understanding

Systems of language

Identify changes in tone that occur when words or tones are combined, recognise atonality in rapid connected speech, and use this knowledge to aid in interpreting meaning (ACLCHU170)

Elaborations

- comparing ways they pronounce and use spoken Chinese with peers and other Chinese speakers, and determining the influences on their own language use, such as TV, parents, dialects spoken
- developing tone discrimination and identifying subtle differences in pronunciation, including variations in regional accents, for example, distinguishing between 'qing' and 'qin', 'lou' and 'rou', 'liang' and 'lang', 'shi' and 'si', and 'lan' and 'nan' when listening to interactions between speakers in diverse contexts

Use character and component knowledge to infer sound and meaning of new characters encountered in texts, and examine component form and function to associate the correct sound and meaning with individual characters (ACLCHU171)

- using knowledge of components to select a character from options when inputting Chinese in a digital text
- categorising words containing a common morpheme to better understand the relationship between morphemes and specific word meanings, for example, using Chinese dictionaries to explore the range of words created from common character morphemes such as 情 (情感、情趣、情形) and 性 (性能、性别、性格)
- discriminating between the functions of morphemes with related meanings, for example, 餐, 饭; 做, 作
- exploring influences on word formation, for example, the school subject 'Language' is called 语文 in China not 汉语 or 中文

Recognise ways of organising and expressing ideas in Chinese (ACLCHU172)

- using connectives (连接词) and sequencing expressions (for example, 首先。。。其次。。。) to enhance flow and clarity of ideas
- organising information in different ways, discussing the logical flow of the information and whether it suits the audience's needs, for example, comparing 目前陆地上的煤, 石油等资源 由于长期开采, 已经越来越少。and 由于长期开采陆地上的资源, 比如煤和石油, 目前已经越来越少

Identify structure and organisation of different texts, including expositions, procedural texts and recounts, and use these in their own speech and writing (ACLCHU173)

- analysing and explaining the organisation and development of ideas or an argument in a range of genres, including textual features such as paragraphing
- comparing the ways in which similar ideas and concepts are presented in different genres, discussing the impact of genre choice on text structure and language use (for example, in imaginative and evaluative texts), and determining how language choices achieve the desired effect
- exploring the traditional structure of persuasive texts in Chinese, such as 总起-分述-总结, and discussing its effectiveness
- reading samples of formal texts, such as news articles, official letters and informative reports, and identifying how the language use compares to their own everyday speech

Language variation and change

Elaborations

Understand how language is used to reflect different roles, relationships, settings and values and modify language use in diverse contexts (ACLCHU174)

- observing interactions and identifying examples of how language is adapted as the roles and positions of participants are established, for example, moving to more formal language once a participant is identified as a person of authority
- reading texts such as 《人民日报》, and identifying words and phrases used to establish authority, objectivity and the purpose of interaction
- noticing and describing differences in accent and dialect when listening to Chinese speakers from diverse regions
- exploring the use of 普通话 as a lingua franca in Chinese-speaking communities, and identifying terms used in different regions to express a similar idea, for example, 普通话 versus 方言 versus 方言
- interpreting the relationships of participants in a spoken interaction by observing word choices and gestures, for example examining what titles are used for individuals in Chinese (for example, 老张 / 张校长/张小明)
- comparing 褒义词, 贬义词 and 中性词 and the contexts they are used in, for example, the differences between 聪明 and 滑头

Explore the significance of tradition in 名人名言 and 经典, and contemporary influences on language use (ACLCHU175)

- reading traditional-form texts on familiar topics and inferring meanings of key characters
- comprehending texts in traditional characters encountered in everyday contexts by drawing a connection with the character's simplified version, for example, 囍 used at a tourist site

Role of language and culture

Elaborations

Explain how communicative practices are influenced by engagement with different languages and cultures (ACLCHU176)

- exploring uses and meanings of word categories (such as colours, celebrations, animals) across languages and cultures, for example, the assumption in Australia that a cake with candles must be a birthday cake; the use of colours to reflect mood
- analyse culture-specific values in Chinese (such as face, harmony, group identity), and explore how these are applied in own language use, for example expressing modesty and respect through the expression 多多指教
- identifying words used with specific assumptions, for example, gender (英俊 is used to describe males), significance (会见 versus 见面), formality (光临 versus 来到)

Years 7 and 8 Achievement Standard

By the end of Year 8, students use spoken and written Chinese to maintain exchanges, to analyse and evaluate information, and to share opinions (for example, 电视节目, 纪录片, 教育片, 微电影, 报纸, 杂志, 网站, 博客, 少年百科) and experiences, for example, 我们为什么要保护熊猫? 中国和澳大利亚的一些差异, 我最喜欢的假期. They select and discern tone patterns and atonality. Students respond to and create a range of texts (for example, 流行歌曲演唱; 电视剧配音), for different audiences and purposes. They create sentences that contain two or more ideas connected by cohesive devices (for example, 不但...而且...) and use a range of time phrases (for example, 先...然后; 以前; 吃了饭, 就) to sequence events and ideas. Students make comparisons (for example, 比; 跟...一样), and elaborate on and explain their opinions or actions using conjunctions, for example, 所以、要不然. They use stylistic devices (including 比喻, 排比, 反问), and use 成语 to influence and persuade others. They move between English and Chinese to interpret and translate for different audiences.

Students explain how changes in tone and tone combination impact on meaning. They describe culturally specific gestures and actions. They identify diversity within the Chinese spoken and written language and explain the differences in writing systems across languages. Students connect the distinctive features of Chinese grammar with the development of complex ideas, and explain how the structure of texts influences audience response. They explain how features of Chinese culture impact on communication practices and influence their own interactions with others across languages.

Years 9 and 10

The nature of the learners

Students integrate elements of both their Chinese and Australian cultures into their understanding of the ways people behave and use language. They explore the nature of their dual identities and bilingual capabilities. They look at identity as a concept and at the nature of diversity in the sense of what it means to be Chinese.

Chinese language learning and use

Students are immersed in Chinese language, exploring and discussing topics related to their developing identity as Chinese-speaking Australians. They access information relating to popular culture and topical issues, learning to recognise diverse representations and perspectives, and exploring context and the values and beliefs of authors.

Contexts of interaction

Contexts for interaction extend beyond the classroom to include students' active engagement with the local community, exploring the use of Chinese in business, social and educational activities, and interacting with different generations of Chinese speakers. These contexts provide students with the opportunity to explore the modifications necessary to deepen their understanding of social distance.

Texts and resources

Students engage with a variety of text types and modes, including visual and digital media, music, TV series, classical Chinese stories, documentaries, and bilingual versions of classic and contemporary literature and their film adaptations.

Features of Chinese language use

Students elaborate their message, nominalise, and add complexity to the expression of their ideas. They apply their understanding of appropriate register in a widening range of interactions, and experiment with increasing sophistication in writing, through the use of idiom and references to classical literature. They learn to appreciate the forms and historical value of classical Chinese literature, and to appreciate how language changes over time.

Level of support

Correct Chinese language use continues to be modelled by the teacher to support students' oracy and literacy development. Glossaries, vocabulary lists, dictionaries and digital translation tools are used to support comprehension of an increasingly diverse and complex range of texts and interactions.

The role of English

Classroom interaction occurs primarily in Chinese. English is used when required for comparison or to explore complex ideas related to language, culture and concepts from other learning areas.

Years 9 and 10 Content Descriptions

Communicating

Socialising

Elaborations

Interact and socialise with a range of participants, recognising alternative positions, ideas and perspectives relating to experience and lifestyle

[Key concepts: diversity, perspective; Key processes: discussing, deciding, taking action]

(ACLCHC177)

- exploring concepts related to topical and contemporary issues, including ethnicity and identity, popular culture, technology, social justice, environment, education and future pathways, through interaction with peers and other Chinese speakers, for example, 我听说现在中国的年轻人很喜欢看韩剧, 是这样吗? 你也喜欢看韩剧吗?
- inviting others to contribute to discussions and provide feedback on own ideas (for example, 你不觉得...吗? 难道...?), and asking questions, acknowledging strengths in others' arguments and providing evidence to contradict, challenge or rebut alternative views
- collaborating to reach agreement by asserting, restating, conceding or negotiating in an appropriate manner (for example, 就算是...; 尽管如此...), recapping the main ideas discussed, suggesting a suitable compromise or solution, and explaining the reasons behind the final suggestion
- discussing how to utilise resources and opportunities outside of the classroom to develop Chinese proficiency, for example, Chinese community school, using Chinese more often with family members and friends, or watching Chinese television
- listening to guest speakers such as ambassadors for Asian literacy or other inspirational young people who are engaged with Chinese language learning, and discussing their experiences and achievements

Negotiate actions and contribute ideas, opinions and suggestions in interactions related to shared tasks and problem-solving, managing different views

[Key concepts: expectations, values, beliefs, attitudes; Key processes: evaluating, exchanging, interpreting, negotiating]

(ACLCHC178)

- participate in online discussions and other exchanges to raise awareness of topical issues, for example, 作文大赛《谈谈健康饮食》
- using social media to communicate with peers in a range of locations in order to inform them about social initiatives in Australia, such as 清扫澳洲日, 地球一小时, and inviting contributions of others to initiate similar events in their regions
- volunteering their time in a project that supports other members of the local community (for example, organising a concert to perform at an aged-care facility; providing tutoring in English for older members of the Chinese-speaking community), discussing experiences and persuading peers and others to contribute
- collaborating to make decisions about fashion, purchases, visual appeal, celebrity endorsement and product reliability to determine value for money in relation to own purchases and shopping habits (for example, 虽然这件衣服是名牌, 但是质量不太好)
- investigating services provided to the local community, including social welfare and support services, and considering ways to assist such organisations in promoting and delivering their services
- designing a campaign to promote and persuade people to join a community organisation, for example, creating slogans such as 加入澳洲华人青年会, 你会认识更多的朋友!

Informing	Elaborations
<p>Investigate different interpretations of contemporary and historical events and people [Key concept: perspective; Key processes: evaluating, researching]</p> <p>(ACLCHC179)</p>	<ul style="list-style-type: none"> viewing reports on news and current affairs programs to develop an overview of events, and discussing responses of individuals and groups to issues and events such as environmental pollution, rapid urbanisation or a threat to public health or safety gathering information from a range of sources on a contemporary or historical Chinese figure to evaluate that person's impact on Chinese society past or present, for example, Mao Zedong, Deng Xiaoping, Jiang Jieshi or Confucius accessing articles, history books, and newspapers to gain knowledge of the causes and potential outcomes of events and issues in contemporary societies comparing different interpretations of historical and political events to develop an informed perspective identifying the implied values that influence a writer's representation of a particular issue, for example, reporting on how the issue of 空巢老人 in China is influenced by the Chinese values of 'family being together' and 'filial piety'
<p>Develop and present a position on topical events and people by referring to a range of sources, and connect this position to the perspectives of others [Key concept: perspective; Key processes: processing, informing]</p> <p>(ACLCHC181)</p> 	<ul style="list-style-type: none"> substantiating their position with examples from texts, quotes or statistical data and by using 成语 or 谚语, for example, 养不教, 父之过, 父母当然要对孩子的教育负责 presenting opinions using strategies suited to audience/readers' expectations, such as 欲扬先抑 (to criticise before praising) evaluating the credibility of sources by analysing accuracy of evidence, references to other sources, and appropriate use of formal language designing a research plan for learning tasks, such as 《人口增长》, and listing sources of information, data needed, questions to be asked and stating reasons for own decision making
Creating	Elaborations
<p>Interpret representations of people and events encountered in contemporary and traditional Chinese performance [Key concepts: entertainment, representation; Key processes: interpreting, adapting]</p> <p>(ACLCHC182)</p> 	<ul style="list-style-type: none"> explaining concepts such as 侠, 孝, 义 portrayed in 小说 with examples of experiences in imagined scenarios, such as 中国人很重视孝. 孝就是对父母好, 如果父母生病了, 你要照顾他们 analysing common features of entertainment across different forms of media, for example, describing what makes an engaging plot; examining the types of characters that appeal to certain audiences identifying and comparing major themes (for example, concepts of love, success and beauty) portrayed in youth media across different languages and cultures comparing how concepts of humour, happiness and tragedy are conveyed in music, art and drama across languages and cultures

Create imaginative texts, drawing on and adapting representations of people and events encountered in traditional and contemporary Chinese literature, drama or song

[Key concepts: classical, contemporary, literature; Key processes: evaluating, expressing]

(ACLCHC183)

- assuming the persona of a character from a film or story, and reflecting on their experiences; writing letters to characters expressing their support
- identifying ways in which authors and directors arouse empathy in readers and viewers
- collaborating with peers to create own dramatic or humorous representations of people and events encountered in traditional and contemporary Chinese literature, drama or song
- planning with peers to perform plays based on 儿童剧 or 情景剧 for younger year levels
- creating plays in response to classical literature, such as 《草船借箭》, considering how the character's personality can be reflected in dialogue
- creating written and multimodal narratives, poems and reflective journals about people, places and communities in the Chinese-speaking world

Translating

Participate in reading Chinese literature in original and in translation, and explain assumptions or implied meanings which inform how ideas have been translated from Chinese into English

[Key concept: equivalence; Key processes: comparing, transferring, explaining]

(ACLCHC184)

Elaborations

- identifying superfluous or language-specific information that impedes rather than supports understanding when moving between languages, for example, 雷锋其人其事, 在中国几乎人人知道
- using suitable equivalents or providing new culturally appropriate examples to explain concepts or ideas specific to another language or culture, for example, explaining English terms 'chilling' or 'hanging' in Chinese; expressing 百年树人 as 'Rome wasn't built in a day'
- noticing deliberate word choices (such as 人民、大众、居民、人们、老百姓) suited to a particular purpose or style
- identifying the use of sarcasm (for example, 哟, 今天这么早来学校, 太阳打西边出来了) and how it is transferred across languages
- experimenting with 'word play', for example, 谐音秃子打伞---无法无天(无发无天), and discussing how this might be transferred into English

Create and adapt bilingual texts for different settings and audiences, identifying the contextual and cultural challenges

[Key concepts: audience, context, social distance, bilingualism; Key processes: identifying, translating, interpreting]

(ACLCHC185)

- experimenting with different options, rephrasing until the most suitable meaning is conveyed, for example, translating 同学 as 'classmate' then changing it to 'student' or 'peer' as appropriate in the context (这是我的同学。和 同学们好)
- analysing information presented in context and being aware that what is not said also matters (言外之意), for example, 该来的人来了, implying that those who turned up earlier are 不该来的人
- developing a deep understanding of the subtle meanings and uses of new words/phrases encountered, by comparing the ways in which words, grammar and idioms are explained in different reference sources, for example, how a 成语 is explained in English, compared to in a Chinese dictionary 成语字典 and on a 成语故事 website

Reflecting	Elaborations
<p>Reflect on how conventions of speech and particular Chinese cultural concepts can influence communication style when using both Chinese and English</p> <p>[Key concepts: face, public, private; Key processes: adjusting, analysing]</p> <p>(ACLCHC186)</p> 	<ul style="list-style-type: none"> differentiating language when engaging with participants from different cultural backgrounds, for example, opening a speech in Chinese with 中国有一句俗语... when in English they would open a speech with a joke describing appropriate ways to engage with others in different contexts, for example, 'I socialise with my friends who speak Chinese in ... ways, but I socialise with my friends who speak English in ... ways'
Understanding	
Systems of language	Elaborations
<p>Explain the role that features of prosody such as intonation and stress play in interactions in various contexts</p> <p>(ACLCHU187)</p> 	<ul style="list-style-type: none"> identifying ways in which rhythm, pace and voice projection impact on interpretation and effectiveness of messages conveyed experimenting with rhythm, intonation and stress when reading aloud, reciting texts or expressing emotion to others discussing differences in pronunciation of words and flow of speech by different Chinese speakers, for example, identifying features of 'native-like' speech in second language learners
<p>Infer possible sounds and meanings of unfamiliar characters encountered in a range of contexts by identifying and explaining the role of semantic and phonetic sides</p> <p>(ACLCHU188)</p> 	<ul style="list-style-type: none"> inferring the meaning of unfamiliar words containing a familiar character morpheme inferring the meaning of terminology in other subjects based on analysis of characters such as 螺旋桨 applying understanding of word formation to identify the word best suited to the required context and use by comparing translations for words in a bilingual dictionary appreciating that the precise meanings of character morphemes are determined by context, for example, 一封 信 and 相信; 企图 and 地图
<p>Understand and apply complex grammatical structures and features to achieve particular effects, and explore grammatical features of classical Chinese (ACLCHU189)</p> 	<ul style="list-style-type: none"> comparing how ideas are ordered and substantiated across genres and languages, for example, in Chinese essay-writing the author's position is generally stated at the end, whereas in Australian academic writing it is stated at the beginning describing the purpose and features of genres that are uniquely important in Chinese literature, and exploring their origin in classic literature, such as 小品文, 散文

Analyse and compose different types of texts for different purposes, using appropriate linguistic, textual and cultural elements (ACLCHU190)

- comparing how statistical data such as census information or surveys is collated and referred to in Chinese and English texts, including consideration of the levels of in-text referencing required across both languages
- analysing linguistic, stylistic and textual features of a range of samples of the same genre to compare the choices made by authors and the impact of those choices, for example, comparing 这位老人已经七十多岁了, 他每天要一上一下地打扫一千八百多级石阶, 该是多么辛苦啊! and 这位老人年纪大了, 要打扫很多石阶, 这些石阶大概有一千八百多级, 非常辛苦
- analysing the layout of magazines and online texts and the deliberate choices of image, font and words to enhance understanding of key ideas and author positioning
- examining the language of newspapers, identifying commonly encountered linguistic terms and considering the concise ways in which world events are reported in Chinese media
- using models of literary styles to create texts and present them in multiple ways, for example, producing an article with 排比 to enhance emotional impact, and reading it aloud to peers, using volume, stress and facial expression to reflect emotions

Language variation and change

Elaborations

Explain how gender, social class and age affect language use in formal and informal contexts (ACLCHU191)

- exploring different levels of formality involving a range of settings and participants
- viewing a variety of blogs and comparing language use in order to hypothesise about the age and gender of the authors
- comparing informal interactions such as live interviews with studio discussions about an issue on news and current affairs programs
- considering the impact of using formal language in establishing one's authority or to display knowledge on a topic
- reading extracts of 古典小说, such as 《水浒传》, and noticing how language use differs from contemporary speech, for example, 史进道: 小人大胆, 敢问官人高姓大名? 那人道: 洒家是经略府提辖, 姓鲁, 讳个达字。敢问阿哥, 你姓什么?
- converting informal spoken language into formal register to suit particular purposes, and experimenting with terms such as 明文规定 and 众所周知

Explore ways to use traditional characters to enhance their own communication (ACLCHU192)

- listing and quoting famous sayings from traditional literature, such as famous lines from poems, to relate to readers who have similar reading experiences
- identifying examples of 成语 in Chinese students' writing, discussing the effect of this and examining errors made, such as in the sentence 我要休息一下, 要不然有个三长两短就不好了

Role of language and culture

Elaborations

Explain how languages shape the communicative practices of individuals and groups, and identify ways to enhance understanding across cultures (ACLCHU193)

- reflecting on how attitudes or values they consider normal in one language may not feel or be viewed in the same way when discussed in a different language, for example humility is a value often conveyed in Chinese but not in English
- exploring what assumptions are inherent in one language and examining how they might talk differently about the same things in a different language
- exploring how concepts such as modesty, individual responsibility and respect for authority influence communication styles, and how they may be interpreted by English speakers as lack of confidence, engagement or initiative

Years 9 and 10 Achievement Standard

By the end of Year 10, students sustain extended exchanges with others (for example, 那个, 你知道的, 就是, 还有) and use Chinese to participate in shared activities, for example, 我为什么学汉语, 澳大利亚的多元文化, 年轻人的兴趣, 网络的好与坏, 你难道不觉得...如果...就...吗? 你的意思是说...,如果是这样的话... They apply knowledge of rhythm, pitch, intonation, and voice projection, and move between traditional and simplified characters as appropriate to role, audience and purpose.

Students respond to and create imaginative, persuasive and informative texts such as 自发采访, 本地电视节目, 访谈节目 and 偶像剧, 娱乐节目, 电影片断, 音乐录影, in a range of generic formats, making choices with regard to audience and purpose, for example, 澳大利亚土著人的艺术, 我看移民热, 现代女性的地位, 报刊杂志, 百科全书, 百度等搜索引擎. They use Chinese to maintain social relationships with and interact with a diverse range of people across a variety of situations and contexts, using common colloquial expressions. They construct sentences using a range of structures to incorporate information and ideas, including relative and attributive clauses, conditionality and indefinite pronouns. Students compare information and ideas, explain or justify perspectives, and relate events using conjunctions. They apply a range of stylistic devices to engage and influence audiences, for example, 夸张, 幽默.

Students explain how the traditional and simplified forms of the Chinese writing system convey meaning, and how ideographic cues can be used to extend meaning. They analyse the key features of Chinese grammar and sentence structure, and compare language use across a range of contexts and modes. They explain how features of culture impact on communication practices across languages, and apply this knowledge to their own interactions with others.

The Australian Curriculum Languages - Chinese Background Language Learner Pathway - Years 7–10 (Year 7 Entry) Sequence

Years 7 and 8

The nature of the learners

Students understand the ways in which they use more than one language in their daily lives. They understand the differences between the Chinese and English oral and written language systems and begin to extend their knowledge of language structures and texts.

Chinese language learning and use

Students are immersed in Chinese and begin to explore social issues, including environmental sustainability and family structure. Students explore the world of Chinese language with a focus on extending their contexts and purposes of use and refining their skills in using language that is appropriate to purpose and audience.

Contexts of interaction

Students interact using Chinese in the classroom and wider school environment, and with family and the local community, exploring the place of Chinese-speaking communities and the relevance of the experiences of past communities to the modern world.

Texts and resources

Students engage with language through visual media, poetry, drama, music, TV series and documentaries. They correspond with others by text message and email and through class-based social networking sites.

Features of Chinese language use

Written language use includes learning to read extracts from both Chinese and English literature to compare features of individual works. Students read nonfiction texts that are often glossed in Pinyin or supported with vocabulary lists. They learn to analyse new characters encountered in texts with a focus on mapping these character forms to their known spoken language. Oral language use includes participating in discussions and presentations on topics of interest and on life experiences in different contexts and cultures. Students participate in activities that focus on pronunciation, tone and rhythm, and learn to appreciate how their own language use compares to modern standard forms.

Level of support

Correct Chinese language use is modelled by the teacher to support students' Chinese oracy and literacy development. Vocabulary lists and model texts support literacy development.

The role of English

Classroom interaction is predominantly conducted in Chinese, with English being used to compare languages and explore complex ideas related to language, culture, learning and concepts from other learning areas.

Years 7 and 8 Content Descriptions

Communicating

Socialising

Elaborations

Interact with peers and familiar adults, exchanging opinions and feelings and establishing friendships

[Key concepts: context, choice; Key processes: responding, transacting, exchanging]

(ACLCHC194)

- exchanging greetings with peers and familiar adults, choosing the appropriate greeting to suit age or position (for example, 您好, 老师好) or time of day, for example, 你早, 晚安
- responding to invitations to participate in personal celebrations, including accepting and declining in appropriate ways, for example, 谢谢你的邀请, 祝你生日快乐。但是我星期日要...对不起, 不能参加你的聚会。希望你玩得高兴
- sharing personal ideas and opinions on experiences such as home life and routine, school and education, diet and food, travel and leisure, climate and weather, expressing opinions and preferences, and stating reasons to elaborate the message, for example, 我不太喜欢...、我觉得...因为
- exchanging information and opinions in class dialogue, responding to questions (for example, 你喜欢运动吗?), expressing agreement or disagreement with others' opinions (for example, 对, 我也很喜欢运动。) and ensuring that other participants are included in interaction, for example, 我去过法国, 你呢?
- comparing own experiences to the lives of young people in other Chinese-speaking communities, for example, 我觉得 7:30 上学太早。我不坐地铁上学, 我坐公共汽车上学
- using set phrases to greet, thank, apologise, and ask permission from peers and teacher, for example, 我可以上厕所吗? ; 谢谢; 对不起
- following teacher's instructions such as 站起来 or 我们看书 and restating teacher's instructions to peers when needed (for example, 老师说我们...再...); responding to teacher's questions with actions or answers, for example, 懂了吗?
- responding to teacher's praise (for example, 非常好, 太棒了) or suggestions, for example, 明天做, 今天休息
- participating in a shared blog and exchanging personal information such as name, age, school, year level and nationality with readers from a sister school, for example, 你好, 我叫 Ann, 我是澳大利亚的学生
- responding to correspondence, such as letters from pen pals, including by answering questions, clarifying meaning (for example, 你说你想来澳大利亚, 是吗?), seeking further information (for example, 你想一月来吗?) and addressing requests, for example, 澳大利亚一月是夏天, 很热
- maintaining contact with classmates and recording events in everyday life by keeping a weekly or daily online journal or blog, recording highlights of school or home life and leisure activity (for example, 今天我的足球队又输了, 真没劲!) or a holiday experience, for example, 袋鼠岛游记
- composing messages in an appropriate format for text messages, emails and letters, and using appropriate terms of address, for example, 敬爱的王老师 (for a formal letter) or 嘿, 小王, 最近好吗 (for a casual letter or message)

Participate in planning individual and group action to contribute to school and local community, making choices from available options

[Key concepts: leisure, education, relationships; Key processes: transacting, exchanging]

(ACLCHC195)

- participating in conversations in imagined scenarios involving purchasing items, asking questions about availability and range of goods (for example, 你有没有红色的? / 你有什么颜色的?) and specifying quantity or type of item when selecting from options, for example, 三斤苹果, 一包糖, 我要买这件
- negotiating with peers on colour, size, quantity and other aspects of goods and services, and making decisions based on collective opinions, for example, 我喜欢那个... 你喜欢... 所以, 我们应该...
- completing transactions by confirming price (for example, 多少钱? 五块吧) and exchanging money, recognising Chinese currency
- creating posters or fliers to promote cultural events to the local Chinese community and the community at large, such as 悉尼艺术节, XXX音乐剧
- producing Chinese language versions of school promotional materials to assist the Chinese community to engage with school activities, for example, a school fete, principal's tour, sister school visit

Informing

Elaborations

Locate and organise key points of information from a range of familiar sources

[Key concept: information; Key processes: collating, analysing]

(ACLCHC196)

- applying knowledge of the world and their own experience to assist understanding of the meaning of texts, such as by discussing topics studied in other learning areas and exploring related Chinese texts, for example, understanding 黄山归来不看岳 by connecting knowledge or experience of visiting 黄山
 - making connections between images and charts and the content of texts, and identifying key words to locate information, for example, in the chapter headings of a book
 - listing possible resources before undertaking a research project and giving reasons for why these resources might be useful
 - listening for structural cues such as signposting, and considering images, music and voice to enhance understanding of key ideas conveyed, for example, identify changes in tone of voice and pacing to indicate potential danger or a sense of **urgency**
 - experimenting with different note-taking strategies when listening, for example, noting key words in Pinyin and recording numbers using Arabic numerals
 - listening to or viewing public information texts such as weather forecasts and announcements and identifying specific information and key words, for example, 点, 度, 米, 公里, 元/块
 - viewing texts such as a cooking program and answering questions from classmates on key procedures and main ingredients, for example, 蚂蚁上树没有蚂蚁。树是粉丝, 蚂蚁是猪肉
 - obtaining the gist or specific information when listening to a flow of words by focusing on familiar, predictable items, and identifying aspects of voice, gesture or language choice that convey varying degrees of enthusiasm or dislike, for example, 我一点儿也不喜欢... compared to 我不喜欢...
 - collating information and ideas to present to others using various tools and charts and with consideration of the relevance, organisation and sequencing of information, for example, considering: What is the best way to introduce the topic? What do they want the audience to remember? What is the main message being communicated?
 - representing information to others by restating key phrases and explaining reasons for actions and feelings, for example, 她很高兴, 因为...
-

Represent factual information related to other learning areas and on topics of interest in a range of texts and formats for different audiences

[Key concepts: information, data, significance, legacy; Key processes: locating, analysing]

(ACLCHC197)

- preparing and creating a video clip to share with peers overseas introducing aspects of local culture, including interesting places, history, famous people, and lifestyle, for example, 墨尔本的电车
- creating posters (for example, about a local city or popular site) to convey information to Chinese peers, using pictures, maps and data to support text
- presenting information in alternative formats to suit the purpose and the needs of the reader, for example, creating graphs or tables to categorise information when contrasting 澳大利亚和中国的地理
- selecting words from word lists to create informative texts such as signs, slogans and notices, and using electronic tools such as a digital dictionary to extend own expression
- obtaining and representing information from texts that include both text and visual images to explain aspects of lifestyle or culture in different communities, for example, TV guide, brochures, advertisements or timetables
- presenting information on topics of interest related to the natural world, human history and endeavour, geography, or the built environment, using visual supports such as tables, charts, calendars and maps
- analysing what information is needed to research a topic, employing Chinese search engines to access diverse sources of information online and choosing the most suitable sources, for example, 这个网站看上去像正规网站吗? 这个网站是官网吗?

Creating

Elaborations

Interact with and express opinions on a range of imaginative texts

[Key concepts: imagination, attitude, beliefs; Key processes: analysing, creating]

(ACLCHC198)

- viewing segments of texts such as popular music videos in Chinese from various sources of media, such as Pop Asia on SBS, and expressing personal opinions, for example, 我觉得...很有意思
 - comparing stories and characters in Chinese and Australian popular media and identifying the themes and topics that interest young people from different cultural backgrounds, for example, 澳大利亚的年轻人也很喜欢看动作片
 - reading short texts such as comics and cartoons, and identifying words, phrases and expressions the author has used to capture characters' emotions and reactions, for example, euphemistic phrases such as 真的吗? 真倒霉! 哎呀!
 - reading extracts from culturally significant Chinese children's literature, discussing their personal responses to the characters and storyline, and relating the story to personal experience or expressing empathy for characters
 - reading jokes or cartoons in Chinese, discussing how humour is conveyed through words and the presentation of ideas, and comparing with humour in English, discussing whether 'entertainment' means the same thing in different languages and cultures
 - reading children's literature, including fables and traditional stories, exploring values and morals such as the concept of 寓意 in 动画片, 小人书, and comparing values and morals conveyed through texts across cultures, for example, 凿壁偷光, 塞翁失马 (你能找到英语中类似的说法吗? 你觉得这个故事的寓意在澳大利亚有意义吗?)
-

Adapt events and characters from popular Chinese narratives for particular audiences and to create specific effects

[Key concepts: sequence, story; Key processes: adapting, creating]

(ACLCHC199)

- creating songs or jingles to promote products, services or events in imaginative ways
- performing Chinese songs, experimenting with rhythm, voice, emotion and gesture to convey the songs' intended sentiment and meaning and to enhance entertainment
- exploring personal response to people, places, events and experiences within texts (for example, creating a diary entry from the perspective of a character encountered in a traditional story), and reflecting on language choices made
- creating short narratives to capture the experiences, thoughts and emotions of characters in imagined contexts
- creating digital stories by producing labels for pictures, photographs and cartoons, and presenting them in combination with sound, voice and music to convey a sequence of events
- plotting a storyline in Chinese, considering: Who is the main character? How can I make this character interesting to readers? How can I sequence my story to grab the reader's attention?
- creating narratives to describe imagined experiences in diverse contexts, based on sample topics and texts, for example, imagining a visit to China and recounting a visit to a homestay family or an adventure on the Great Wall, or describing experiences when a Chinese student comes to stay in Australia
- creating stories in various literary styles (for example, 记叙文、散文、诗歌), experimenting with descriptive language to capture the intensity of characters' emotions and to create tension, for example, 我看到好多漂亮的花, 有粉红的, 雪白的, 真是太美了

Translating

Elaborations

Translate short texts and identify words and phrases in Chinese that do not readily translate into English
[Key concept: equivalence; Key processes: comparing, translating]

(ACLCHC200)

- reading bilingual texts such as advertisements and signs, and exploring the effectiveness of and reasons for particular translations
- reading children's stories in bilingual form and identifying which ideas in Chinese and English may or may not translate directly
- observing interactions between speakers of Chinese and describing the interaction in English, including features of prosody as well as language
- observing an interaction between a teacher and students in China and contrasting the patterns of interaction displayed with their own experience in Australia
- explaining culture-specific concepts such as humility (谦虚) to people from different cultural backgrounds, providing examples of when and how 谦虚 should be shown and how it is understood by participants in an interaction, for example, when accepting/denying praise
- identifying times when it is useful to employ words or phrases not normally used in English, for example, applying Chinese speech patterns when speaking about family members in English to a Chinese person, such as saying 'my brother's son' instead of 'my nephew'
- identifying cultural differences in how meanings are conveyed by comparing texts in Chinese and English, for example, public announcements, TV advertisements, information brochures, public notices and signs

Create simple bilingual texts for different audiences, considering the influence of different roles, relationships, settings and situations

[Key concepts: audience, context, bilingualism; Key processes: translating, interpreting]

(ACLCHC201)

- acting as interpreter for visitors of diverse backgrounds and communicating their message to speakers of other languages, applying strategies such as clarifying, rephrasing and explaining when mediating cultural concepts
- using a range of resources to assist in creating a Chinese translation of an English language text, exploring the functions of print and digital translation tools and discussing their strengths and weaknesses
- appreciating the role of code-switching as a tool for mediating language and culture, and applying it in their own communication

Reflecting

Elaborations

Reflect on personal responses and reactions during interactions in Chinese such as talking with a Chinese adult or interacting online with Chinese peers

[Key concepts: reflection, place; Key processes: reflecting, observing, noticing]

(ACLCHC202)

- engaging with Chinese speakers through organised school activities, for example, communicating with students at a Chinese school via Skype or welcoming visitors to own school), recording moments when difficulty is experienced in communication, reflecting on the cause of the difficulty, and noticing how next interaction improves
- observing interactions between Chinese speakers and noticing the difference word choices and use of gesture among participants
- identifying language use in different contexts, such as a family eating out in a restaurant (for example, noticing the seating arrangement, the background environment and how dishes are ordered and presented) and discuss how this compares to one's own experience
- comparing how language and gesture are used to communicate in English and how these features would be understood when interacting with Chinese people; identifying how their communication style may need to be altered when conveying ideas in Chinese
- improving language choices across cultures, such as when meeting people for the first time (for example, when being introduced to a parent's friend);
- comparing how the residential address in Chinese and English reflects certain values in the different cultures
- recognising their own tendency to generalise or stereotype during interactions (for example, 地域歧), and considering questions to ask about the other person's cultural background, being sensitive to the possibility of causing offence
- participating in cultural events and reflecting on how cultural practices change in a different context, for example, 我们家不过中秋节, 因为大家都觉得不太重要。母亲节有时候我们全家回去爷爷奶奶家一起吃饭
- being aware of how own ideas may be perceived by others based on language choice, for example, 我妈妈不喜欢我说汉语中间夹英语, 但是我和朋友经常这样说, 她也经常这样说。有的时候姥姥听不懂, 我就会想想全用汉语怎么说

Understanding

Systems of language

Elaborations

Explain the phonological and tonal features of Chinese, including variations in tone, stress and phrasing in diverse settings (ACLCHU203)

- recognising the value of Pinyin romanisation to assist in distinguishing and analysing differences in spoken Chinese, to generate digital texts and to develop understanding of sound–symbol correspondences in characters
- identifying subtle differences in pronunciation in spoken Chinese, including variations in regional accents, especially in speakers of other dialects, for example, distinguishing between ‘qing’ and ‘qin’, ‘lou’ and ‘rou’, ‘liang’ and ‘lang’, ‘shi’ and ‘si’, ‘lan’ and ‘nan’
- developing tone discrimination and exploring the impact of tone choice, including tone sandhi, on the meanings expressed in speech, for example, ‘mǎi’ and ‘mài’, ‘bùqǔ’ and ‘búqǔ’

Identify features of individual characters and the form and function of components in individual characters and in related characters (for example, 心, 想, 情, 闷), and learn to relate components (部件) and sides (偏旁) to the meaning and sound of characters (ACLCHU204)

- recognising subtle differences and the implications for sound and meaning when discriminating between characters of similar appearance, for example, 我 and 找
 - analysing the nature of components, and their arrangement and function in a range of characters, for example, fire (火/灬) and heart (心/忄) components
 - analysing common simple and compound characters and identifying the possible placement of specific radicals and components in a compound character, for example, the placement of 扌 on the left-hand side
 - recognising clues inherent in characters when attempting to map specific sounds and meanings onto correct character forms, for example, exploring the reliability of semantic and phonetic functions of components and sides regularly encountered in characters containing common elements such as 请、精、猜; 认、忍、任; 忍、想、思
 - categorising words containing a common morpheme to better understand the relationship between morphemes and specific word meanings, for example, using dictionaries to explore the range of words created from a common character morpheme such as 情 and 性
 - discriminating between the functions of morphemes with related meanings, for example, 餐-饭; 玩-做; 做-作
-

Explore features of the Chinese grammatical system (ACLCHU205)

- developing a metalanguage to talk about and compare features of grammar across languages
- comparing the impact of sequencing choices (for example, 我不能按时交作业因为我感冒了 versus 我感冒了所以不能按时交作业) when explaining or justifying an action
- exploring the multiple uses of frequently encountered features of Chinese syntax such as particles 的 and 了
- exploring uses of cohesive devices such as 可是; 因为... 所以...; 如果...就... to sequence and order ideas and events (for example, ...的时候、以后、以前; 先...然后...; 完), to compare ideas (for example, 跟...一样/不同; 比), and as simple connectives, for example, 不但...而且...; 虽然...但是...
- organising information in diverse ways and discussing the logical flow of the information, considering whether it meets the audience's expectations, for example, comparing 目前陆地上的煤、石油等资源 由于长期开采, 已经越来越少。and 由于长期开采陆地上的资源, 比如煤和石油, 目前已经越来越少
- comparing metaphorical and literal meaning in texts, for example, 远远的街灯明了, 像是闪着无数的明星
- analysing rhetorical devices in texts (for example, 比喻、夸张、排比), identifying culturally specific features such as 日月如梭, 难于上青天, and experimenting with rhetorical devices in own texts

Identify how information and ideas are organised in a range of genres, and compare the textual features of narratives in Chinese and English to determine features which are distinctive to Chinese (ACLCHU206)

- comparing the expression of ideas in diverse traditional and contemporary literary texts, for example, exploring the different ways in which the story of 孙悟空 is told in a cartoon, story or TV show
- recognising and applying features of diverse text types, for example, comparing features of narrative, recount, report and procedure
- comparing the ways in which similar ideas and concepts are presented in diverse genres, discussing the impact of genre choice on text structure and language use (for example, in persuasive and evaluative texts) and examining how language choices achieve the desired effect
- exploring the traditional structure of persuasive texts in Chinese (for example, 总起-分述-总结) and discussing its effectiveness
- reading samples of formal texts such as news articles, official letters and informative reports, and identifying how language use compares to their own everyday speech
- analysing and explaining the organisation and development of ideas or an argument in a range of genres, including textual features such as paragraphing

Language variation and change

Elaborations

Differentiate features and apply rules for expressing meanings in spoken and written modes in different contexts (ACLCHU207)

- exploring how the rules of word order can be altered in informal interactions, for example, noticing that the time can be placed at the end of sentences in speech but not in writing
- matching the use of 成语 and 俗语 to appropriate contexts, for example, 夕阳西下 is normally used in written language while 猪八戒照镜子——里外不是人 tends to be used in spoken contexts
- analysing how language is used differently in public texts across different Chinese-speaking regions, for example, the use of traditional versus simplified character forms in overseas Chinese newspapers; word choices and ways of reporting on controversial issues
- identifying variability in language used in different contexts, for example, interacting in the supermarket, at the doctor's surgery, or when visiting a friend or relative
- recognising language choices that reflect varying levels of formality as appropriate to context, and applying this to their own interactions (for example, 爷爷 and 祖父, 累死了 and 非常疲惫)

Explore the role of language in passing on cultural values and beliefs to younger generations and identify changes in language use over time (ACLCHU208)

- exploring the extensive and ongoing role of idiom (for example, 成语 and 谚语) in contemporary texts and everyday speech
- recognising the influences of other languages and cultures on the Chinese language (for example, and the use of code-switching), and exploring how language choice (such as communicating in regional Chinese, English, standard Chinese or youth slang) indicates membership of a group and can exclude others from the interaction
- identifying situations in language can be used to position themselves or others as an insider or outsider, for example, the use of 老外 in Australia to refer to non-Chinese; the choice between 咱们 and 我们 to include or exclude participants
- experimenting with voice projection, pitch and rhythm when trying to assert own view or idea without disempowering or dismissing others, for example, to appear authoritative when speaking on an issue or topic, or to reprimand, advise or motivate others

Role of language and culture

Elaborations

Discuss ways in which language choices indicate aspects of social position (such as class, gender and ethnicity) and inhibit or encourage others' involvement or sense of belonging (ACLCHU209)

- exploring how known languages influence their communicative preferences, such as how the values of one culture may be reflected when communicating in another, for example, differences in the use and frequency of 'thank you' and 谢谢 which is simply a sign of gratitude in English, whereas in Chinese overuse of this indicates distance between participants in interactions
- exploring how cultural concepts of family and the importance of one's sense of connection to others influence use of Chinese
- exploring the origins of 成语 and 歇后语 encountered in texts such as 朝三暮四, 姜太公钓鱼, and using set phrases to share or convey a cultural idea in own writing, for example, 塞翁失马, 笨鸟先飞

Years 7 and 8 Achievement Standard

By the end of Year 8, students use spoken and written Chinese to sustain interactions in their personal and social worlds (for example, 你叫什么名字？你多大了？你住在哪个城市？, 不对, 我是说... and 老师, 我可以用电脑吗？), making appropriate language choices for different roles, relationships and situations, for example, 你的那个, 那个 assignment 做完了吗？ They access and analyse information (for example, 排版结构, 表格, 图标) from a range of sources which include familiar characters and use this information for a range of purposes. Students interpret, translate and create a range of spoken, written and multimodal Chinese texts for imaginative, informative and persuasive purposes and for different audiences. Sentences generally contain two or more ideas connected by cohesive devices (for example, 如果...就...), and use a range of time phrases (for example, 然后;就) to sequence events and ideas. Students make comparisons (比;跟...一), and provide reasons to explain their opinions or actions, using conjunctions (因为、所以、因此).

Students explain the diversity in speaking and writing systems across languages, including regional variations within Chinese, and how these differences impact on their own understanding and communicative practices. They identify familiar characters in their simplified and traditional forms, and explain the differences between standard Chinese and dialects that may be spoken in their family. Their written literacy is still developing and they produce longer and more complex texts through the use of digital resources than in handwriting. They describe how the distinctive features of Chinese grammar and texts can be used to achieve particular effects and purposes. They explain how ideas are mediated across languages and cultures in their local communities. They express their own understandings of the Chinese cultural values that influence their own communicative practices.

Years 9 and 10

The nature of the learners

Students extend their knowledge of language structures and text organisation through reading and viewing authentic material and discussing how to apply new learning to their own communication. They explore the nature of their dual identities and bilingual capabilities.

Chinese language learning and use

Students are immersed in Chinese language, exploring issues related to youth culture and topics of educational and social relevance. They begin to make connections and comparisons with the experiences of other young Chinese speakers and with those of other cultural groups in Australia. They also consider their own place in Australia and the nature of the relationship between Australia and the Chinese-speaking world.

Contexts of interaction

Contexts for interaction extend beyond the school and home environments to include increased engagement with students' local communities, in particular with older generations.

Texts and resources

Students engage with a variety of texts, including dictionaries and online translation tools, local print and digital media, and abridged bilingual versions of classic and contemporary literature and their film and TV adaptations.

Features of Chinese language use

Students participate in discussions, debates and presentations on local and global issues and initiate inquiry into topics of interest. They extend their writing skills to include more informative and objective language and write in more formal genres, such as articles and reports. They develop their skills in analysing characters and recognising word and clause boundaries in extended text. Students explore the influence of English on their own communication in Chinese, both in pronunciation and in linguistic structures, and the role of code-switching in their daily language use. They share ideas about how they can contribute to Australian society through maintaining their bilingualism and through establishing a more stable identity where they are interculturally and intraculturally aware.

Level of support

Correct Chinese language use continues to be modelled by the teacher to support students' Chinese oracy and literacy development. Glossaries, vocabulary lists, dictionaries and online translation tools are used to support comprehension.

The role of English

Classroom interaction occurs in Chinese. English is used when required for comparison or to explore complex ideas related to language, culture and concepts from other learning areas.

Years 9 and 10 Content Descriptions

Communicating

Socialising

Elaborations

Interact with peers and others in familiar and unfamiliar contexts to exchange alternative ideas and perspectives, and to express preferences and opinions

[Key concepts: ritual, relationships, generations, values, identity, ancestry; Key processes: negotiating, participating]

(ACLCHC210)

- stating opinions on school life, family life, familiar people, experiences and significant personal events (for example, 我最喜欢圣诞节), and indicating preferences with reasons such as 我想去看...电影, 因为听说这个电影很好看
- engaging in oral and digital discussions on topics of personal interest such as music, TV programs or sports, asking questions to seek ideas, request repetition and clarify meaning (for example, 你说你的生日是明天, 是吗?) to enhance mutual understanding, for example, 我不太喜欢听流行音乐, 我更喜欢摇滚乐, 因为摇滚乐很有力
- using different ways of expressing apology, appreciation or gratitude, and comparing practices across contexts, considering which term to use in various situations and according to the relationship between participants, for example, 谢谢; 辛苦你了; 麻烦你了; 真对不起; 非常感谢
- notifying teacher of work due in other subject areas, for example, 我有很多数学作业; 我星期一有科学测验
- expressing opinions on lesson activities and learning tools, for example, 我觉得很好玩儿; 我觉得很有用; 我喜欢用网络词典
- requesting assistance or seeking advice on a feature of language (for example, mobile phone。中文怎么说, 怎么写(面)这个字呢?), and exploring concepts related to topical and contemporary issues (such as ethnicity and identity, social justice, environment, education and future pathways, technology, and popular culture) through interaction with peers and other Chinese speakers, for example, 我听说现在中国的年轻人很喜欢看韩剧, 是这样吗? 你也喜欢看韩剧吗?
- inviting others to contribute to discussions and provide feedback on own ideas (for example, 你不觉得...吗? 难道...?), and asking questions, acknowledging strengths in others' arguments and providing evidence to contradict, challenge or rebut alternative views
- substantiating their position with examples, quotes or statistical data and using 成语 or 谚语, for example, 养不教, 父之过父母当然要对孩子的教育负责
- collaborating to reach agreement by asserting, restating, conceding or negotiating in an appropriate manner (for example, 就算是说...; 尽管如此...), and recapping the main ideas discussed, suggesting a suitable compromise or solution and explaining the reasons behind the final suggestion
- responding to inquiries in correspondence from overseas peers and via social media by describing the lifestyle of Australian young people, with particular attention to unique aspects of Australian culture, for example, 澳大利亚有..., 人们生活...
- engaging with educational social media to document own experiences and achievements by posting a weekly journal or blog for others to read, for example, 本周XX俱乐部足球赛
- experimenting with ways of expressing ideas in more formal contexts, such as using objective rather than subjective language to recount events, for example, 袋鼠

很多 compared with 我看到了很多袋鼠

Participate in planning and presenting a social or cultural event, negotiating options and solving problems

[Key concepts: community, emotion, multiplicity, power Key concepts: participating, negotiating]

(ACLCHC211)

- designing a campaign to promote a community organisation and persuade people to join, for example, creating slogans such as 加入澳洲华人青年会, 你会认识更多的朋友!
- asking open questions, inviting others to elaborate their ideas and restating to confirm understanding, for example, 请说一下您为什么决定...? 为了保护环境, 你一般做什么? 你已经说过...; 你说的是..., 对不对?
- considering how the use of a polite tone and respectful language when making a complaint may empower both speaker and listener to achieve a positive outcome, and how advice may be given in a non-judgmental way, for example, 你最好/我觉得你应该/我知道...对你很重要, 可是... rather than 你一定要/如果你..., 就.../你太...
- negotiating to achieve desired goals by asserting, conceding, and expressing obligation (for example, 必须、一定要) or absence of choice (for example, 没办法、不得不) in an appropriate manner
- participating in organised visits to Chinese-owned stores in the local area; specifying the quantity or nature of items required; requesting, negotiating and accepting prices; and completing transaction
- participating in shopping scenarios with classmates, expressing opinions about qualities of goods (for example, 这个红色的裤子真好看), making comparisons with other retailers or service providers (for example, 他要一百块, 你要一百三十块) and expressing satisfaction or dissatisfaction with price, for example, 太贵了
- negotiating with classmates to determine an appropriate gift for an overseas visitor, acknowledging others' ideas and opinions, and offering alternatives, for example, 这件大衣太大了, 我不要, 我看一看那件吧
- acknowledging the ideas and opinions of others and expressing agreement (for example, 好的、我同意), disagreement (for example, 对, 可是), excitement (for example, 太好了) or disappointment (for example, 真可惜) when interacting with others

Informing

Elaborations

Summarise and compare factual information about people, places and lifestyles drawn from a range of sources, including multimodal sources

[Key concepts: information, values, judgment, bias; Key processes: selecting, comparing]

(ACLCHC212)

- viewing reports on news and current affairs programs to develop an overview of events and discuss the responses of individuals and groups to issues and events such as a threat to public health or safety, environmental pollution, or rapid urbanisation
 - listening to and viewing texts such as celebrity interviews, news reports and documentaries on tourist hot spots, and obtaining the gist by focusing on familiar, anticipated items in a flow of words, for example, names of people and places, time and date, attitude and opinions
 - listening to and viewing interactions and noting the different opinions and ideas of different participants, focusing on key words and non-verbal cues to identify feelings
 - using dictionaries and other resources to interpret key words, for example, identifying the likely meaning of 七夕 in the sentence 农历七月七日 is 七夕
 - identifying important ideas and interpreting implied meanings in texts, recognising possible bias when judging the value of information
 - using listening strategies appropriate to a range of purposes, including listening for specific information, listening for key ideas, listening for overall understanding, or listening in order to repeat information to others
 - presenting opinions using strategies suited to the audience or reader's expectations, such as 欲扬先抑 (to criticise before praising)
-

Develop and present a position on an issue based on information drawn from different perspectives and sources and provide advice and guidance

[Key concepts: information, advice, media,; Key processes: classifying, evaluating, advising, guiding]

(ACLCHC213)

- identifying the positions of different speakers and exploring the explicit and implicit values and reasons that may have led to the development of their own perspectives, for example, why a Western speaker of Chinese may look at an issue differently to a native Chinese speaker; the different perspectives of a city resident versus a rural resident
- developing an information kit about the local city or region to provide to Chinese visitors via a local tourism website, including details on history, climate, environment and cultural activities supported by visuals
- creating short texts to inform others on topics of interest (such as 中国的茶-澳洲咖啡), and providing an objective perspective by discussing alternative views, for example, 有人说...也有人说...他们都不知道...所以...
- accessing a range of sources of discussion (such as online debates in public forums and TV talk shows) and identifying factors that potentially cause bias on an issue, such as era, generational differences, cultural factors and individual personalities, for example, 有人认为愚公很傻, 尤其是生活在现代的人
- presenting a balanced view on a contemporary issue, referring to evidence to support ideas and elaborating on own perspective
- engaging with different representations of ideas, comparing perspectives and developing an informed position on issues relevant to their own lives, for example, 在中国有人说移民澳洲好, 因为生活轻松; 也有人说移民澳洲不好, 因为没有熟悉的家人朋友。我觉得...因为...
- presenting information on an issue such as 独生子女政策 by discussing perspectives and comparing experiences and opinions, noting how some people focus on positive effects on society and others focus on personal experiences of being a 独生子女
- collaborating to produce multimedia displays to share with readers overseas to provide a local insight into issues such as the experience of international students in Australia, and highlighting the features that might be most relevant to overseas readers
- collating information from personal research and writing reports on issues relevant to youth across cultures, such as pressure to follow fashions and trends, bullying, and inspirational people

Creating

Elaborations

Explore and express opinions on themes and emotions revealed in modified texts from classical and contemporary Chinese literature

[Key concepts: classical, contemporary, literature; Key processes: evaluating, expressing]

(ACLCHC214)

- responding to literary texts such as 《某某后传》 through own creative text production, employing the literary styles and methods identified in such texts
 - keeping a journal to reflect on emotions and experiences of individuals encountered in texts
 - identifying and comparing the language used to explore major themes such as love, success and beauty in youth media across different languages and cultures
 - participating in class discussion on messages conveyed in traditional and contemporary texts and comparing how concepts of humour, happiness and tragedy are conveyed in music, art and drama across languages and cultures
 - understanding the values inherent in the use of music, imagery and stereotypical representations of people, places and practices in diverse forms of youth entertainment
 - identifying and discussing generational and cultural differences portrayed in contemporary media
 - examining songs that have remained popular for generations or have become anthems for particular groups of people, and discussing why these songs have achieved such success
 - reading a range of imaginative texts from other cultures, keeping a reading journal (读书笔记) to record own responses, and participating in class discussions about texts such as 《小王子》 and 《安徒生童话选》
-

Create narratives to describe experiences involving imagined people and places

[Key concepts: fact and fiction, challenge, morality, human experience; Key processes: adapting, creating, imagining]

(ACLCHC215)

- collaborating with peers to perform a script from 儿童剧 or 情景剧 for younger year levels to engage them with the imaginative world
- creating a script in response to a story from classical literature, such as 《草船借箭》, and considering how to convey the characters' personality through language
- creating own dramatic or humorous representations of people and events encountered in traditional or contemporary Chinese literature, drama or song
- writing a creative account of an imagined experience involving Chinese visitors to the local community, such as hosting a Chinese student or taking a tour group to a local sporting event
- creating a Chinese voice-over for a scene from an English language sitcom and experimenting with ways in which language, images, action and humour are used to enhance appreciation of the message
- collaborating to create performances in which they assume an imaginary role, for example, a skit about celebrating Spring Festival, a simple lyric about school life, or a rap about being a student of Chinese
- creating narratives that hold the attention of readers, for example, beginning a story with 你知道吗? and experimenting with 正叙, 倒叙, 插叙 to sequence events
- collaboratively creating short plays describing the experiences of imagined characters in different cultures, for example, 《James在上海》
- using descriptive language to set the scene and capture the reader's imagination, for example, describing the sound of traffic and the smell of breakfast stalls on a busy morning in a Chinese town
- exploring how alternative words can be used to convey a range of attitudes and varying degrees of emotion towards people, places and events, for example, 我真高兴。你快乐吗? 他很幸福!
- comparing portrayals of a range of social groups in media, for example, how urban and rural communities and residents are portrayed in both traditional and contemporary texts
- creating own narrative accounts of the life experiences of major historical figures or characters from literature, for example, 诸葛亮, 孔子和他的学生
- engaging and entertaining the audience through the use of devices such as humour, irony and metaphor, and embellishing ideas (for example, 猜猜我昨天干了什么? as opposed to 昨天我), and building up to a climatic ending

Translating

Elaborations

Translate a range of simple Chinese texts and identify how some concepts can be mediated readily between Chinese and English and some cannot

[Key concept: equivalence; Key processes: comparing, translating, explaining]

(ACLCHC216)

- exploring ways to interpret and explain key concepts and cultural practices identified in Chinese interactions (for example, 面子) and experimenting with how to give 面子 in interaction with others
- considering the uses of different measurement words in Chinese (for example, 小勺 and 茶匙; 斤 and 克) when comparing Chinese translations of English recipes
- comparing alternative translations to identify concepts of 'normality' in their own linguistic and cultural context, for example, using the term 软饮料 (instead of 无酒精饮料) assumes the reader/audience has some understanding of English to understand meaning of 软
- comparing 褒义词, 贬义词 and 中性词 and the contexts they are used in, for example, the differences between 聪明 and 滑头
- identifying words used with specific assumptions, for example, gender (英俊 is used to describe males), significance (会见 versus 见面), formality (光临 versus 来到)
- considering ways to convey culture-specific terms in English (for example, 中药 and 食疗, 上火, 大补)

Create texts in Chinese and English, explaining the linguistic and cultural challenges of achieving equivalence of meaning

[Key concepts: audience, context, social distance, bilingualism; Key processes: identifying, translating, interpreting]

(ACLCHC217)

- viewing documentaries on historical events and figures and determining appropriate English equivalents for key terms with multiple meanings, for example, translating 运动 as '(political) movement' rather than its more familiar meaning, 'sport'
- reading bilingual signs from a range of places, such as restaurants, shops, pools, schools, hospitals and construction sites, and evaluating the effectiveness of the English translations, and possible reasons for such interpretations
- comparing word choices for signs across languages and discussing ways language is used to convey rules, expectations and permission, for example, comparing 闲人免进 to 'Staff Only'
- observing others involved in interpreting meanings in bilingual contexts and identifying challenges and potential issues in mediation
- expanding their own linguistic repertoire by exploring available choices to translate unfamiliar ideas when moving between languages, and reflecting on their own choices and preferences
- experimenting with translations of extended texts, using a range of print and digital dictionaries and translation tools

Reflecting

Elaborations

Reflect on how conventions of speech and particular Chinese cultural concepts can influence communication style when using both English and Chinese

[Key concepts: face, public, private; Key processes: adjusting, analysing]

(ACLCHC218)

- identifying diverse ways their Chinese identity is played out in local communities (for example, through membership of community organisations and interest groups) and relating experiences in which their Chinese identity is central to their self-expression
- exploring the ways their Chinese identity influences the different roles they play in life (for example, as a student at secondary school and in Chinese school, and as a son or daughter, an older or younger sibling, a friend, or a member of a sports team) and reflecting on times when linguistic and cultural aspects of their identity are questioned and challenged
- reflecting on own cultural values and evaluating how these intersect with mainstream values when interacting in both Chinese and Australian contexts
- recognising the language choices they make that influence how their identities as individuals and as Chinese-speaking Australians are perceived by others, for example, feeling more Chinese with Chinese people, and less Chinese when on their own or with people from a different cultural background
- varying their language use when engaging with participants from different cultural backgrounds, for example, opening a speech in Chinese with 中国有一句俗语... when in English they would open a speech with some humour

Understanding

Systems of language	Elaborations
Compare features of speech of speakers from diverse regions to standard Chinese including pronunciation and prosody (for example, intonation and stress) (ACLCHU219)	<ul style="list-style-type: none"> • developing tone discrimination and identifying subtle differences in pronunciation, including variations in regional accents, for example, distinguishing between 'qing' and 'qin', 'lou' and 'rou', 'liang' and 'lang', 'shi' and 'si', and 'lan' and 'nan' when listening to interactions between speakers in diverse contexts • comparing their pronunciation and word choices when speaking in Chinese to peers and other Chinese speakers • experimenting with rhythm, pace, tone, stress and other paralinguistic cues, and developing strategies to address aspects of their own spoken Chinese that may impede effective communication with others

Explore and apply the principles of character form and function, including knowledge of semantic and phonetic radicals, to predict associate sound and meaning of new characters encountered in texts (ACLCHU220)

- using character and component knowledge to infer potential sound and meaning of new characters encountered in texts
- examining component form and function to predict sound of unfamiliar characters when reading aloud
- inferring the meaning of terminology from other subject areas based on analysis of characters such as 螺旋桨
- using knowledge of components to select a character from options when inputting Chinese into a digital text
- explaining how morphology works to identify and convey subtle and precise meanings in communication
- inferring the meaning of unfamiliar words containing a familiar character morpheme
- applying understanding of word formation when comparing translations in a bilingual dictionary to identify the word most appropriate to the required context and use
- appreciating that the precise meanings of character morphemes are determined by context, for example, 一封 信 and 相信; 企图 and 地图

Organise and express complex ideas in Chinese, for example, analysing and comparing active and passive sentence constructions (ACLCHU221)

- organising information in a range of ways, and discussing the logical flow of the information and whether it suits the audience's reading expectations, for example, comparing 目前陆地上的煤、石油等资源 由于长期开采, 已经越来越少 and 由于长期开采陆地上的资源, 比如煤和石油, 目前已经越来越少
- analysing the subtle differences between expressions with similar meanings conveyed using, for example, 除了...也 and 除了...都 and 虽然 and 尽管
- exploring the particular functions of key grammatical forms and their correct context of use, for example, distinguishing between the uses of 的、得、地 and 可以、能、会
- employing more complex syntactical features to enhance their own meanings, building on current knowledge, for example, making comparisons, expressing sequence, expressing cause and effect
- using particular discourse features to extend and elaborate their own message, for example, 除此之外、尽管这样、同样

Analyse textual features of formal genres and apply these in their own speech and writing (ACLCHU222)

- analysing features of texts in formal domains, for example, comparing aspects of formal and personal letters such as salutations or level of politeness; examining features of articles such as the use of headings, placement of author name, organisation into introduction, body and conclusion
- comparing how statistical data (such as census information or surveys) are collated and referred to in Chinese and English texts, including consideration of the levels of in-text referencing required across both languages
- analysing linguistic, stylistic and textual features of diverse samples of the same genre to compare the choices made by authors and the impact of these choices, for example, comparing 这位老人已经七十多岁了, 他每天要一上一下地打扫一千八百多级石阶, 该是多么辛苦啊! and 这位老人年纪大了, 要打扫很多石阶, 这些石阶大概有一千八百多级, 非常辛苦
- analysing stylistic/literary devices used in knowledge-based texts, for example, technical terms and concise formulaic expressions used in newspaper articles
- appreciating and applying the use of literary devices, for example, direct and indirect historical and cultural references; features of intertextuality such as classical allusions (歇后语)
- analysing the layout of magazines and online texts to identify how images, fonts and words have been chosen to enhance understanding of key ideas and author positioning
- examining the language of newspapers, identifying commonly encountered linguistic terms and considering the concise ways in which world events are reported in Chinese media

Language variation and change

Elaborations

Recognise how gender, social class and age impact on language use in formal and informal contexts (ACLCHU223)

- observing interactions between speakers and identifying examples of how language is adapted as the roles and positions of participants are established, for example, moving to more formal language once one participant is identified as a person of authority
- reading texts such as 《人民日报》, and identifying words and phrases that are used to convey authority or objectivity, such as how to name students with different achievements (for example, 尖子生, 中间生, 临界生 优秀学生, 普通学生, 落后的有潜力学生) in a report on school education
- discussing the transferability of expressions and words across different settings, for example, following the debate on the use of internet language in education and in the media (for example, the use of 网络语言 in student's 写作)
- comparing the same meaning conveyed in speech and writing, (for example, in speech (你不可以进去) and on a sign (闲人免进)) and discussing why the language may vary, including aspects such as interactivity and authority

Explore the significance of tradition in 名人名言 and 经典 and examine contemporary influences on language use (ACLCHU224)

- reading texts in traditional characters on familiar topics and inferring meaning of key characters
- predicting the meaning of texts in traditional characters encountered in everyday contexts by relating the character's simplified version, for example, 匾 in a tourist site
- discussing the influences on their own Chinese language use (for example, from TV, family or Chinese school) and how their language use compares to that of their parents and other Chinese speakers
- analysing how new words and concepts are developed and incorporated into daily use, for example, in contemporary media such as TV dramas, music and film
- exploring samples of classical texts such as 《论语》 and recognising the impact of classical Chinese on contemporary written language, for example, the use of 岂, 于
- listing famous quotes from traditional literature, such as famous lines from poems, and using these in their own writing
- identifying examples of 成语 in writing by students of Chinese, discussing the effect of this usage and then identifying any errors made, such as in the sentence 我要休息一下, 要不然有个三长两短就不好了

Role of language and culture

Elaborations

Explain how languages shape the communicative practices of individuals and groups and identify ways to enhance understanding across cultures (ACLCHU225)

- considering ways in which being a bilingual speaker of Chinese and English could impact on and enhance their future life and career
- examining how language is used to marginalise groups in society, such as how labels are used to simplify identification of groups and influence how such groups are perceived by others, for example, 蚁族、80后/90后
- considering their own perceptions of the Chinese-speaking world and identifying the influences on their perceptions, for example, trips to China when younger; stories from grandparents
- exploring how concepts such as modesty, individual responsibility and respect for authority influence communication styles, and how they may be interpreted by English speakers as lack of confidence, engagement or initiative
- exploring what assumptions are inherent in one language and how the same cultural assumptions may not exist in another language, for example, analysing how the terms for 'getting married' differ for women (嫁出去) and men (娶妻) and the gender-neutral 结婚

Years 9 and 10 Achievement Standard

By the end of Year 10, students use spoken and written Chinese to initiate and sustain extended interactions with others in their social world and in the Chinese-speaking community, for example, 我的学校生活, 澳大利亚的运动, 我最喜欢的春节活动. They ask questions (for example, 你真的认为...吗? 请想一想...) and adapt language use for a range of contexts and roles. They identify and evaluate key points of information from different spoken, written and multimodal authentic sources and use this information to develop a position and to inform and convince others. They move between Chinese and English to create simple bilingual texts. Students interpret, interact with and create a range of texts for imaginative, informative and persuasive purposes and for different audiences. Sentences include a range of structures, including formal expressions to connect ideas, for example, 除此之外, 尽管这样, 因此, 无论...都... They also use relative and attributive clauses, conditionality and indefinite pronouns. Students compare information and ideas, and explain or justify opinions, for example, 有人说... 还有人认为... 所以... 而且... 因此... They apply knowledge of metaphor and 成语 in their own writing.

Students map characters against familiar sounds and apply their knowledge of character form and function to predict the meaning and sound of unfamiliar characters. They independently use digital resources to communicate with others, and utilise online and print dictionaries to assist in reading Chinese texts. They explain how the purpose and use of stylistic devices, textual features and language features change across contexts, genres and traditions. Students explain the cultural assumptions that influence participants' responses and identify ways in which understanding could be enhanced in communication. They reflect on the roles both Chinese and Australian cultures play in their own communicative practices and use these reflections to improve their Chinese language use.

The Australian Curriculum Languages - Chinese First Language Learner Pathway - Years 7–10 (Year 7 Entry) Sequence

Years 7 and 8

The nature of the learners

Students whose first language is Chinese learn about being Chinese in Australia and begin to develop their bilingual and bicultural identities as they learn to live and interact with the Australian community.

Chinese language learning and use

Students are immersed in Chinese, with the teacher using Chinese for instruction, explanation and interaction. Learners speak and write in Chinese to express their own interests and describe and discuss their life experiences in diverse contexts. To develop oracy and literacy, learners build metalinguistic awareness across both Chinese and English, identifying similarities and differences in language systems and framing. Given the high value placed on recital in Chinese culture, students are likely to have begun to develop this skill, and it should be further developed as part of their progress towards becoming high-level users of Chinese in a range of contexts. Students consciously apply a working knowledge of Chinese language systems to their language use in order to understand why they make certain choices in interactions and to access a wider range of written texts.

Contexts of interaction

Students use language in a range of contexts across family, school, community and social situations. They actively participate in the wider Chinese community, both locally and globally. They learn to adjust their communication for audience and purpose.

Texts and resources

Students access Chinese texts written in both simplified and traditional characters to obtain information on a range of subjects which support their learning in other areas. They engage with contemporary culture through film, music, and youth magazines, and use online and digital resources. They engage with traditional and contemporary Chinese language literature to enhance their appreciation of literary styles. They read texts in both simplified and traditional characters, comparing forms and identifying how key components are altered or transferred, and use this understanding to make informed predictions of meaning when they read new characters in the form that is less familiar to them.

Features of Chinese language use

Students use Chinese to write and speak with imagination to engage or persuade peers, justifying their perspectives by drawing on ideas or experiences of others. They apply linguistic expressions encountered in contemporary and traditional literature to develop their own ability to write in more expressive and creative ways while increasing accuracy in their use of simplified and traditional characters.

Level of support

First language learners often have limited experience of Pinyin but may use other romanisation systems. First language learners transcribe Pinyin and character texts from the sounds that they hear, with the support of Pinyin tables and component lists as required.

The role of English

Students make comparisons between Chinese and English as they develop their literacy and oracy skills in both languages.

Years 7 and 8 Content Descriptions

Communicating

Socialising	Elaborations
<p>Interact with peers and exchange opinions and preferences about new social and cultural experiences, adjusting tone, vocabulary and phrasing to influence others</p> <p>[Key concepts: community, environment, culture shock; Key processes: comparing, exchanging]</p> <p>(ACLCHC226)</p> 	<ul style="list-style-type: none"> • sharing experiences and discussing how their own cultural practices are maintained or adapted in their new environment, for example, 来到澳洲以后, 我开始对土著人的艺术感兴趣了 • identifying and challenging stereotypes about Chinese and Australian cultures • discussing the concept of friendship across cultures, and describing own sources of social support within the local community, for example, 我现在在一个羽毛球俱乐部打球, 认识了不少朋友, 挺开心的 • using appropriate strategies to maintain communication, such as explaining concepts and ideas when other participants are not familiar with the topic of conversation, for example, 我很喜欢吃榴莲, 榴莲就是那种有点臭, 身上长很多刺的水果 • listening to a conversation about a new song, dance style or pop-culture phenomenon, and identifying the points being made, explaining the tone and manner of communication
<p>Collaborate with peers to plan and organise multicultural projects and events that would benefit their school and local community</p> <p>[Key concepts: multiculturalism, community; Key processes: planning, socialising]</p> <p>(ACLCHC227)</p> 	<ul style="list-style-type: none"> • investigating Chinese cultural activities available for young people (for example, lion dance troupe, folk dance troupe), and discussing with peers details of the nature of the activity and the level of commitment involved • indicating agreement and disagreement in polite ways and expressing gratitude for time and services provided, for example, 太麻烦你了; 这次多亏了你的帮助; 这个不是太合适吧, 我还想再看看, 谢谢! • planning or participating in events which share popular aspects of Australian ways of life related to music, popular culture, climate, landscape and recreational activities, to members of their local Chinese-speaking community • introducing others to diversity within Chinese language and culture (such as diversity in language use and cultural practices across greater China, differences between urban and rural life, and regional cuisines) by participating in school cultural events or creating texts to inform others, for example, creating a poster for second language learners of Chinese • collaborating with others to organise a cultural day to support appreciation of linguistic and cultural diversity within the school community, using social media to plan the event and to encourage others to participate
Informing	Elaborations

Interpret the stated and implied meanings in authentic informative texts, and use evidence to support or challenge different perspectives

[Key concept: perspective; Key processes: challenging, interpreting, informing]

(ACLCHC228)

- comparing a range of ideas on topics such as different generations' perspectives on the importance of traditional festivals, the lifestyles of rural and urban communities, and the traditions and values of 少数民族
- discussing and explaining own response to perspectives presented, for example, 有人说...还有人说...我认为他们站在不同的角度当然看问题不完全一样。我觉得... 因为...

Use and analyse a range of sources written in simplified and traditional script to identify relevant information, and use this information to create purposeful public information texts

[Key concepts: relevance, public life; Key processes: analysing, conveying]

(ACLCHC229)

- accessing diverse sources such as blogs and social media, newspaper articles and educational texts, and discussing the relevance and credibility of information conveyed, for example, comparing information presented in blogs with newspaper articles
- recognising multiple perspectives on an issue and identifying the factors that may influence a particular perspective (for example, nationality, religion, gender, ethnicity) to determine the perspective or credibility of sources
- evaluating how different authors use language to achieve a particular effect, considering how values and personal views are implied in word choices, for example, 屡败屡战 (emphasis on the determination to overcome a failure) versus 屡战屡败 (emphasis on the fact of many instances of failure)
- accessing information related to understanding their own experiences as Chinese students in Australia by searching both Australian and overseas digital media, such as 百度百科, 雅虎等网站 to develop advice and supports for new students arriving at their school
- accessing and organising information on educational and social topics, using techniques such as paraphrasing, summarising and quoting, and expressing own perspective on the information obtained, for example, 有些人认为..., 另一些人则认为..., 综上所述...

Creating

Elaborations

Compare how contemporary Chinese media and literature represent the notion of 'being Chinese' or 'being other', and use this knowledge to present a point of view for an identified audience

[Key concepts: culture, identity, representations; Key processes: comparing, expressing, responding]

(ACLCHC230)

- comparing 'being foreign' in China and 'being Chinese' in Australia, for example, viewing or reading 汉语桥 performances, songs, films and fiction and discussing how Chinese-speaking foreigners are 'celebrated' in Chinese media
- exploring representations of the overseas Chinese experience, both locally and globally, and the development of local Chinese identity in Australia through reading texts such as *The Sojourners* in Chinese translation (Zhang Wei, 2009)
- investigating contributions made by Chinese individuals and groups in contemporary Australian culture and discussing the cultural values that are conveyed through these contributions, for example, the work of artists Ah Xian and Guan Wei, and author Sang Ye
- exploring their own connections and responses to overseas Chinese literature, for example, the ideas and values reflected in 海外华人的文学作品 such as the song 《故乡的云》

Plan, rehearse and deliver presentations of classical Chinese literature and famous speeches and discuss how cultural values can be transferred

[Key concepts: 古文, entertainment values; Key processes: planning, rehearsing, delivering, transferring]

(ACLCHC231)

- discussing the impact of Chinese traditional entertainment on contemporary Chinese culture, for example, 相声
- analysing classical poems and the values they convey, and relating them to culturally significant events, for example, Chinese New Year in 宋代诗人王安石《元日》
- comparing the Gettysburg Address with a speech of equal significance in Chinese and discussing why these speeches are important and what language features are used to convey messages

Use particular language features such as dialogue and imagery in short stories, literary essays and plays to create own imaginative representations of experience

[Key concepts: journey, reality and fantasy, interconnectedness; Key processes: expressing, experimenting, analysing]

(ACLCHC232)

- creating texts depicting the experiences of Chinese people in Australia, for example, writing a narrative reflecting a Chinese person's adjustment to a new life in Australia based on an interview conducted with an older member of the local Chinese community
- using examples or quotations from traditional literature in their own writing, such as 三人行，必有我师焉 from 《论语·述而》。
- presenting the experiences of people in different eras, such as women in ancient China, through drama, poetry and literature
- writing a story of an imagined scenario or an exciting adventure to entertain younger students at school

Translating

Elaborations

Identify challenges in and techniques for mediating between Chinese and English

[Key concepts: equivalence, paralinguistic cues; Key processes: responding, translating, mediating]

(ACLCHC233)

- discussing cultural connotations of words that express emotions, such as 幸福 versus 'happy'; 怎么回事? versus 'What's wrong?'
- defining equivalence and finding examples of concepts in Chinese and English which are unable to retain the original meaning when translated into the other language
- translating terminology from other learning areas from English into Chinese and vice versa, for example, science, mathematics and social science concepts and terms
- viewing extracts of Chinese films with their English subtitles, identifying alternative English translations and hypothesising reasons for choices made by professional translators
- exploring English translations of Chinese colloquial language and vice versa, and discussing the complexities of capturing the meaning and sentiment conveyed by the original

Create bilingual information texts for speakers of Chinese and English in Australia, recognising 'code-switching' and how specific vocabulary and terminology from other learning areas can be translated in different settings, such as for an expert or beginner audience

[Key concepts: equivalence, audience, context, bilingualism; Key processes: identifying, translating, interpreting]

(ACLCHC234)

- comparing multiple ways of translating English terms and phrases into Chinese, and discussing the effectiveness and focus of these translations, for example, 苹果手机 or 爱疯
- considering others' responses in interactions and clarifying whether their own message has been understood as they intended, for example, 大家对这个问题的还有什么疑议吗? 不知大家还有什么意见和建议?
- producing own bilingual texts, for example, explaining aspects of Chinese culture to English-speaking audiences or interpreting concepts learnt in other learning areas to help Chinese-speaking peers understand course content
- providing further explanation of concepts that are not immediately clear to second language learners of Chinese, for example, contrasting the concept of 'culture' in English with Chinese 文化 (which also includes the meaning of 'literacy') and starting to understand other 文化 in comparative terms

Reflecting

Elaborations

Reflect on adjustments they and others make in their everyday language use, and connect these adjustments to aspects of experience, culture and roles in Australian society [Key concepts: bilingualism, identity, community, belonging, culture shock; Key processes: reflecting, adjusting, analysing]

(ACLCHC235)

- reflecting on how meanings of certain words are understood in different ways, for example, the different implications of using the term 他的店很肮脏
- exploring multiple aspects of the concept of 'identity' by contrasting 'individuality' (个体) with 'collective identity' (集体)
- identifying how their knowledge of Chinese and English opens up opportunities to expand their own world views
- discussing experiences of 'returning to home country' (回国) and how they feel about the lifestyle and practices of their old home
- reflecting on how their sense of being Chinese is influenced by their experience of living in Australia, for example, by maintaining a journal or blog
- identifying features of communication in Chinese that are interpreted differently when applied in English communication, for example, examining how adjusting from a tonal language to English sometimes results in miscommunication of emotion or a perception of being abrupt
- examining and reflecting on interactions that did not achieve their desired goal, and identifying strategies to enhance the effectiveness of their communication with others
- reflecting on the challenges of addressing cultural assumptions and stereotyping when discussing aspects of life in Australia, for example, 有的澳大利亚人说到中国人就会说中国人怎么怎么样..., 难道一个中国人做的事情就代表了所有的中国人么?

Understanding

Systems of language

Discuss features of Chinese phonology and compare their own pronunciation with that of other speakers of Chinese (ACLCHU236)

Elaborations

- comparing the features of spoken English and the features of Chinese phonology
- identifying features of spoken Chinese by comparing their own speech to the pronunciation and speech patterns displayed in examples of Modern Standard Chinese, such as in news broadcasts
- explaining the use of the neutral tone and non-tonal suffixes such as 儿
- preparing a mock lesson for non-Chinese-speaking friends about Chinese phonology

Identify and explain the differences between traditional and simplified characters, inferring meaning and sound of unfamiliar characters from knowledge of components and positions (ACLCHU237)

- analysing relationships between characters and meanings in phrases representing auspicious meanings such as 年年有鱼 一年年有余; 年糕 一年年高升; 枣栗子 一早立子; 8 一发.
- applying understanding of orthographic principles to correct mistakes in own character writing

Apply understanding of word morphology and vocabulary choices to interpret and convey meaning (ACLCHU238)

- examining the relationship between characters in a word, identifying subtle differences in meaning to enhance their own communication, and determining the appropriate context for related words such as 帮助 and 帮忙
- differentiating 近义词 based on the meanings of each morpheme (for example, in 走进 and 走近) and applying in own writing
- analysing how words containing a common morpheme are related, for example, how 乘 is used in 乘车 ('take a ride'), 乘机 ('take a chance') and 乘法 ('multiplication')

Compare how grammatical features such as tense and passive voice are constructed in English and Chinese, and identify distinctive features of Chinese grammar, for example, in tense marking (了、过), possession, plurality (ACLCHU239)

- enhancing their understanding of how information is organised to achieve particular communicative purposes, for example, 是...的 and 被 structure
- experimenting with the use of different sentence patterns when composing own messages, for example, 让步句 and 转折句

Compare writing styles between Chinese authors to identify and explore the purposes and features of text structure and organisation of ideas (ACLCHU240)

- exploring diverse examples of writing and identifying features of particular styles such as 辞藻华丽, 平实质朴, 口语化
- discussing own preferences for writing styles of particular popular authors
- experimenting with different ways of sequencing and organising ideas for different audiences and purposes
- exploring text structure and format in classical literature, for example, 五言 and 七言 in poetry; the absence of a subject in 李白《静夜思》
- comparing the organisation and substantiation of ideas in essays in classical and modern literature, for example, comparing 周敦颐《爱莲说》 and 余光中《莲恋莲》

Language variation and change

Elaborations

Explore assumptions and challenges for language use in new environments, identifying and comparing ways in which sensitive topics are introduced and discussed across languages, for example, comparing the Chinese custom of asking direct questions about age, income and other personal matters with the contexts in which these questions are asked in English (ACLCHU241)

- recognising clichés, examining cases of 'breaking' a cliché and the impact it might have, such as 脑筋建转弯 questions
- identifying how language use can be varied for different participants in different contexts, for example, the use of slang and abbreviations between teenagers
- using classical terms and expressions including 成语、歇后语、俗语 appropriate to context, such as using 亭亭玉立 to describe young girls
- discussing 'taboo' terms across languages, and using terms suitable for the context, such as different words for 死 ('to die'), for example, 驾崩 (皇帝)、仙逝 (长辈)、去世 (一般人)、香消玉殒 (女性)

Analyse features of classical literature in their original and contemporary forms, and apply features of 文言文 and 古文 in their own language use, identifying rules of intonation in classical poems and the impact of these rules on modern poetry (ACLCHU242)

- exploring symbolism in classical literature and in modern pop culture, such as the connotations of key terms such as 凤凰
- discussing the revival of the study of traditional texts (国学) and the reasons for such interest in the past
- considering the role technology plays in their own lives and how it impacts on the ways they communicate with others and use language to convey ideas
- identifying examples of internet language and discussing how these shape or impact their own language use, for example, 囧、槩、焚
- comparing 'internet novel' (网络小说) with contemporary 小说 and identifying the impact of the internet in popularising and increasing access to Chinese literature

Identify the features of persuasive language and analyse its use in advertising (ACLCHU243)

- discussing the impact of word choices, including 连接词, and stylistic devices (for example 排比, 拟人, 比喻) on the effectiveness of television and print advertising campaigns
- considering the role of English in the world of Chinese advertising and how English words and expressions are embedded into Chinese speech to market products to Chinese speakers, within China and globally.

The role of language and culture

Elaborations

Analyse the use of language across genders and generations, within and across language communities (ACLCHU244)

- collecting a range of famous colloquial sayings from many different cultures and comparing their use
- explaining how culture impacts on their own communication, for example: Did they take offence that the host didn't offer food at the party? Why might some Chinese find that offensive?
- knowing that communicative practices might be perceived differently in different cultures, for example, in accepting a compliment in Chinese, saying 谢谢 might make one look 自大
- considering the role of English in the world, for example, examining the popularity of Chinese and English in second language programs and why individuals and nations believe proficiency in these two languages is important

Years 7 and 8 Achievement Standard

By the end of Year 8, students sustain oral and written interactions with known audiences, making appropriate adjustments to language use for different audiences, contexts and purposes. They access and analyse a range of authentic spoken, written and multimodal sources to support and present ideas and opinions. Students respond to and create spoken, written and multimodal imaginative texts in a range of genres. They translate informative texts from Chinese into English and vice versa for particular audiences. Students reflect on adjustments they make to language use for different audiences.

Students apply knowledge of grammatical and text structures and vocabulary choices to communicate effectively. They identify the main ideas conveyed in texts related to other learning areas or presented in age-appropriate imaginative texts or media. They locate texts within a cultural context, and compare the values and practices encountered in classical Chinese texts with those encountered in their local communities. They identify ways that texts reflect the cultural background and values of the author and how they can be interpreted differently.

Years 9 and 10

The nature of the learners

Students continue to develop their bilingual and bicultural identities. They explore how their identities are changing through their lived experience in Australia, identifying points of difference between their own values and those around them. They engage with the possibilities that being bilingual offers them now and in the future, and reflect on their potential as mediators of language and culture in local and global communities.

Chinese language learning and use

Students are immersed in Chinese. They present, debate and discuss issues, exploring their responses, positioning themselves in relation to events, and recognising and accepting others' diverse perspectives. They read texts in both simplified and traditional characters, comparing forms and identifying how key components are altered or transferred, and use this understanding to make informed predictions of meaning when they read new characters in the form that is less familiar to them.

Contexts of interaction

Students use language in a range of contexts across family, school, community and social situations to further develop their skills in communicating with range of audiences and contexts. They actively mediate between languages and cultures within their school and local communities.

Texts and resources

Students read, view and listen to a range of print, digital and online text types and resources, including newspaper reports, news websites, magazines, teen fiction, films and documentaries.

Features of Chinese language use

Students learn how to write objectively in simplified and traditional characters and substantiate their ideas and perspectives in appropriate ways. They learn to transcribe complex spoken texts and develop skills in listening to diverse speakers of Chinese who vary in rhythm and pitch. Students experiment with western genre conventions in their Chinese speech and writing and with ways of expressing and developing their 'Chinese voice' effectively for diverse audiences.

Level of support

Students develop their understanding of Pinyin. They use Pinyin and characters to transcribe the sounds that they hear in a range of contexts, for example transcribing song lyrics and noting details from spoken texts.

The role of English

Chinese is the language of classroom instruction and interaction. Students make comparisons between Chinese and English language and culture as their sophistication in both languages grows.

Years 9 and 10 Content Descriptions

Communicating

Socialising

Elaborations

Influence and engage others, debating ideas and opinions, selecting language, tone, culturally expected stylised gestures, pitch and pace for different audiences

[Key concepts: perspective, conflict, difference; Key processes: persuading, influencing]

(ACLCHC245)

- applying strategies to engage in conversations with people of diverse linguistic and cultural backgrounds, for example, using alternative terms to 吹牛、聊天 and initiating topics of mutual interest
- monitoring the effectiveness of own communication skills when sharing ideas and interests with others, for example, when changing topics and taking turns in a conversation (听说..., 刚才我们说什么来着?)
- using emphatic and assertive language to defend a position, point out errors in others' assumptions or strengthen own argument when negotiating with others, for example, 我想这种观点是站不住脚的/这种说法是没有根据的, 是无稽之谈

Plan and negotiate actions to contribute to their local and global community, and suggest alternatives when planning and negotiating

[Key concepts: politeness, proactivity/initiative; Key processes: planning, contributing, negotiating]

(ACLCHC246)

- displaying respect for others' ideas in interactions, agreeing to disagree, or negotiating to achieve agreement, for example, 要么这样吧...; 你看怎么样...; 你说的很有道理, 但是...
- discussing multiple perspectives on topics such as 独生子女政策, 言论自由, 贫富差距, 经济发展与环境保护, and raising awareness among peers and members of school community to enhance mutual understanding of others' perspectives
- comparing different learning environments and approaches to learning, for example, reflecting on prior learning experiences and suggesting the advantages and disadvantages of different educational systems (中国的教育是应试教育, 注重死记硬背, 澳洲的教育是后发式教育, 培养的是学生的独立思考能力)
- discussing issues encountered in their daily life when communicating across cultures, such as specific 'cultural barriers' and misunderstandings in communication, for example, 家长应不应该尊重孩子的个人隐私?
- understanding the history of their local Chinese community and the multicultural nature of Australian society, for example, interviewing older migrants about their experiences as Chinese Australians (老一代的华人在餐饮、木工、香蕉种植等方面为澳洲做出了贡献, 新一代的华人更多的是在金融、法律、医生等行业发)
- identifying areas of need within the local community and collaborating with others to provide support, for example, visiting aged-care facilities or helping to organise a cultural event to enhance understanding of Chinese culture within their own school and local communities (我们上个周末去华人养老院做义工, 接触了很多很有意思的老人)

Informing

Elaborations

Identify and analyse the effects of how information is organised in authentic texts, and apply this knowledge to create purposeful texts that persuade and inform

[Key concepts: local, global, diversity, information; Key processes: transcribing, analysing, informing, persuading]

(ACLCHC247)

- examining the ways in which information is presented across diverse Chinese-speaking communities, for example, viewing news reports of world events from Beijing, Taiwan and Singapore
- evaluating how information is presented in diverse forms of media across cultures, for example, comparing the impact of live news reports involving interviews with witnesses, and newspaper articles on the same event
- applying understanding of news articles and other formal text types to create own response to contemporary issues in Chinese-speaking communities

Evaluate the utility and reliability of sources when accessing information, and use this knowledge to present a point of view for different audiences

[Key concepts: bias, authorship; Key processes: conveying, evaluating]

(ACLCHC248)

- identifying bias in texts, examining the values that influence bias, and discussing how bias differs from opinion and perspective, for example, 什么是偏见？偏见有哪些表现？应该怎样纠正偏见？
- reading news articles and historical accounts of world events such as natural disasters, Olympic games, celebrations or commemorations of historical significance (such as Anzac Day), and exploring how the author's personal values and experiences influence their reporting on such events
- recognising key ideas and reading between the lines, for example, identifying irony and sarcasm in texts (你可真是个气管炎(妻管严))
- presenting and discussing own position on issues such as attitudes towards recycling, education in rural communities, and impact of social media on young people
- debating the pros and cons (for example, 这样做的好处是：...这样做的弊端是：...) and presenting a balanced and reasoned argument, for example, 综合各方面的意见，我们认为...；根据大家的意见，我们想提出以下建议...
- applying effective strategies in a debate, including the art of rebuttal and developing a team line

Creating

Recognise and explain differing viewpoints on the world, cultures, individuals and issues as represented in major forms of literature such as 散文, 小品, 小说, and use this knowledge to create analytical and imaginative responses for identified audiences

[Key concepts: difference, culture, viewpoint; Key processes: recognising, representing]

(ACLCHC249)

Elaborations

- identifying various representations of multiculturalism in contemporary media and exploring the origins and nature of stereotypes commonly encountered
- exploring cross-cultural influences in contemporary media, for example, examining the impact of Korean culture on Chinese entertainment in diverse contexts (Hong Kong, Taiwan, mainland China)
- responding to films with a Chinese theme produced in other communities, for example, writing a personal response to a foreign film portraying Chinese-speaking communities

Compare performance features of major forms of classical literature, such as in 诗, 词, making thematic and intertextual connections

[Key concepts: culture, values; Key processes: connecting, performing, responding]

(ACLCHC250)

- comparing how concepts such as love, bravery and friendship are expressed in Chinese and English poetry, for example, comparing 陆游的《钗头凤》 and Elizabeth Barrett Browning's 'How Do I Love Thee?'; comparing poems of national unity (after war) and Banjo Paterson's 'We're All Australians Now'
- comparing representations of particular concepts or experiences in different media, such as in novels and films, for example, 莫言小说《红高粱家族》 and 张艺谋电影《红高粱》
- exploring how different forms of entertainment are used to express or reflect contemporary issues, for example, analysing 春晚小品 and how the topics are related to the 'hot' events of the year
- collaborating to create a drama or comedy to depict their lives and the lives of other Chinese migrants in a new cultural environment

Create imaginative texts experimenting with genre, textual features and stylistic devices

[Key concepts: ancestry, culture, love, fear, inner world; Key processes: creating, expressing, experimenting]

(ACLCHC251)

- comparing literature across languages and cultures and recognising features of entertainment, for example, identifying how magic and danger are used in Harry Potter and 《西游记》
- discussing the features of range of genres, such as memoirs, poems and moral tales, for example, comparing 小诗 and 散文 to identify how different genres express similar ideas
- creating own imaginative texts, using literary devices to achieve particular purposes, for example, foreshadowing events and building up to the climax in a story, and experimenting with 暗喻, 反复 and other 修辞手法

Translating

Interpret culture-specific concepts

[Key concepts: humour, equivalence, cultural assumptions, wordplay; Key processes: interpreting, translating, mediating]

(ACLCHC252)

Elaborations

- comparing idioms and colloquialisms across languages and identifying the challenges in mediating the cultural values embedded in such sayings, for example, 胸有成竹 versus 'have a well-thought-out plan'; 山穷水尽 versus 'at the end of one's rope'; 入乡随俗 versus 'when in Rome'; 绕圈子 versus 'beating about the bush'
- mediating Chinese jokes or I to English speakers and vice versa
- reflecting on the beliefs, generalisations and stereotypes held by other Australians about Chinese cultural practices or values, for example, 中国人只工作不享受 / 他们都很聪明 / 很难和中国人一起工作 / 中国菜都很好吃
- introducing people, places, events and ideas of cultural and historical significance to Chinese people, for example, explaining to Australian audiences the historical and contemporary significance of 孔子 (Confucius) and his idea of 仁 (humanity)

Create bilingual texts for a range of audiences, contexts and purposes

[Key concepts: audience, context, social distance; Key processes: identifying, translating, interpreting]

(ACLCHC253)

- acting as translator between Chinese and English speakers during school events, and reflecting on the linguistic and cultural issues encountered, for example, when sister-school teachers and students visit
- translating texts for a range of audiences and contexts, identifying adjustments to language choices made according to social position of audience and context
- comparing bilingual editions of novels and discussing how authors and translators maintain the effect of stylistic devices across languages, for example, the use of metaphor

Reflecting

Reflect on the language choices they make when expressing their points of view to others and connect these choices to their identities in Chinese and Australian communities

[Key concepts: individual identity and collective identity, community, dynamism; Key process: reflecting]

(ACLCHC254)

Elaborations

- discussing available choices in how they present their own identity to others and identifying times when they choose to express one aspect of their identity over another
- reflecting on how their language choices, including the use of English, Chinese, a dialect or accent, are indications of their sense of identity within a particular context
- considering the differences in their own sense of identity in Australia and when they 'return home' (回国) in terms of changes in social contexts and in their relationships with other participants in interactions
- describing examples of when changes in identity are more evident, such as when they are compared to friends 'back home'
- identifying meanings implied in facial expressions, gestures, interjections and exclamations, for example, 哎 can be used to express surprise or dissatisfaction
- reflecting on how one's own world view is conveyed through language choices, for example, 'naming' China 华夏、九州、神州大地、中原 which reflects their understanding of their history, geography, ethnicity and place in the world

Understanding

Systems of language

Elaborations

Compare features of prosody across languages and explore how they contribute to expression of meaning (ACLCHU255)

- comparing how prosody is used to enhance the aesthetic features/uses of language in different texts such as poems and essays when read aloud
- evaluating the effectiveness of prosody in diverse contexts, for example, analysing the relationship between use of voice and character types in movies and television dramas, such as how the matriarch or patriarch of the family in Chinese dramas often has a stern and intimidating voice
- using prosody with effect when communicating with others, such as in formal presentations and debates, and in imaginative or dramatic performances, for example, 众所周知／显而易见／总而言之

Identify and explain how Chinese orthography enables access to technical and unusual vocabulary, including specialised abstract nouns, and a wider range of texts, using orthographic knowledge to identify characters related to topics studied in other learning areas, such as chemical elements (periodic table) and mathematical terms (ACLCHU256)

- experimenting with the use of abstract nouns such as 物种、深春、微风 to create procedural texts
- developing skills to comprehend simplified or traditional Chinese characters in print media and online texts
- discriminating correct forms and sounds of 多音字 (polyphonic characters) such as 行 (háng 同行 and xíng 行进), and appreciating multiple forms of 通假字 such as 反 - 返; 说 - 悦

Compare the nature of word formation, including subtle forms of adjectives such as 特有的 and 明朗, in the development of new words in Chinese and English, and evaluate their effectiveness in conveying new concepts (ACLCHU257)

- comparing the expression of new concepts across languages and analysing the representation of new ideas in contemporary media, such as 云电视、
- comparing the functions of semantically related morphemes and discussing why one is preferred over others in the development of new words, for example, ways of expressing 'green': 碧、翠、绿、青、(翠绿、碧绿、青翠、苍翠) and new words such as: 雪碧, 绿化

Analyse and experiment with the use and effect of figurative and evaluative expressions, colloquial forms, and other language features in texts (ACLCHU258)

- identifying the appropriate context for using colloquial forms such as 多姿多彩; 恰恰相反; 来得快去得快; higher-order verbs such as 弥漫; using 而 for 顺接; and adverbials, for example, 便是, 恰恰相反
- experimenting with linguistic devices to enhance expression of emotions, for example, rhetorical questions, for example, 脸上的快乐, 别人看得到。心里的痛苦又有谁能感到?
- analysing the use of figurative language in literature, for example, 老舍《骆驼祥子》中虎妞的一段话:“呕! 不出臭汗去, 心里痒痒。你个贱骨头! 我给你炒下的菜, 你不回来吃, 绕世界胡塞去舒服? 你别把我招翻了, 我爸爸是光棍出身, 我什么事都做的出来! 明天你敢出去, 我就上吊给你看, 我说得出来, 就行得出来!”
- exploring examples of literary language and how grammatical features differ from everyday speech, for example, 鲁迅的小说和议论文
- manipulating styles of language in communication to achieve certain effects, such as writing a journal with 语气词 such as 嘿 and 吧 to make it more like a dialogue with the reader

Discuss key stylistic features of different text types, including classical literature (ACLCHU259)

- identifying stylistic features of formal text types, for example, 作业报告 ;倡议书;竞选演说
- comparing the way an argument is developed in different languages, for example, in English the writer's position is stated upfront whereas in Chinese it is generally left until the conclusion
- analysing how to position oneself when writing for different purposes, for example, in persuasive and evaluative writing (说服: 独生子女政策给中国的发展带来了许多好处; 议论: 独生子女政策对中国的发展利弊参半)
- exploring how to incorporate statistical data, quotations and research-based evidence in academic texts, for example, 据统计, 计划生育政策实行以来, 中国的人口少生了三亿
- identifying features of classical writing such as 虚词 particles 之、乎、者、也, and word reductions such as 若 (犹如, 好像) 父 (父亲, 爸爸)
- exploring writing techniques in classical Chinese, such as the four steps in composing an essay (起承转合)
- using terms derived from classical literature in their own writing, for example, 世有伯乐, 然后有千里马; 千里马常有, 而伯乐不常有。(韩愈:《杂说(四)》)
- determining the relevance and value of 成语 and 歇后语 in developing their own writing

Language variation and change

Explain how changes in context impact on how language is adapted to convey meaning within and across languages (ACLCHU260)

Elaborations

- exploring how living in the Australian context impacts on how they present their ideas in Chinese, for example, considering how essays written in Chinese in Australia often follow the accepted organisation and formatting of essays in the Australian education system rather than the Chinese education system
- analysing what is valued across cultures and discussing the impact of this on how meanings are conveyed in Chinese and English, for example, quoting 孔子 or using 成语 is evidence of a higher level of literacy in Chinese, but quoting modern-day experts or using technical vocabulary is considered to be reflective of a higher education level in many English-speaking communities
- understanding the historical traditions behind the differences between oral and written language in Chinese (文言 and 白话)
- reflecting on their own different ways of communicating and how they adjust language, gesture and content to suit different contexts, cultures and languages, for example, considering topics that are acceptable in one culture but taboo in another
- identifying differences in pronunciation and/or tone across different Chinese-speaking environments, for example, 和 is pronounced 'hé' in mainland China but can be pronounced as 'hàn' in Taiwan

Research the phenomenon of language change in Chinese-speaking communities and monitor language use in a range of contemporary contexts (ACLCHU261)

- comparing the language of previous generations to their own language use and discussing the nature of the differences between them
- exploring how language change reflects the values of the time, or how language use can be seen as emblematic of an era, for example, the use of respectful terms such as 老革命 and 硬骨头 in China in the 1960s
- examining new words added to Chinese dictionaries or introduced to social media and considering the reasons behind their development
- considering the impact of digital communication on language use, for example, that LOL in English now means 'laugh out loud' not 'lots of love', and that weibo has a 140-character word limit

Analyse the language of different media and examine the ways in which media use language to persuade and influence others (ACLCHU262)

- evaluating the impact of word choices (for example, 百衣百顺 for steam iron; 自然最健康, 绿色好心情 for instant noodles) and discussing features of advertising language (广告词), for example, 简洁, 对仗, 谐音, and how it relates to the brand and product
- viewing samples of 公益广告 for charity and non-profit organisations, and analysing the different ways in which imagery, voice and language use are combined, and the effect of these stylistic choices, for example, 好感型, 优质型 and 励志型

The role of language and culture

Elaborations

Analyse and discuss the ways in which language is used to position authors, readers and participants in texts (ACLCHU263)

- identifying choices in words and phrasing that influence a reader's response to texts, such as language to persuade readers to endorse the writer's views, for example, 难道不是每一个有良知的人都会认同的吗?
- examining ways in which authors use characterisation to incite sympathy or antagonism towards characters in literary texts, for example, directly describing a character's personality compared to indirectly portraying the character's personality through their actions or through the reactions of others

Years 9 and 10 Achievement Standard

By the end of Year 10, students sustain extended interactions with diverse individuals and groups, selecting spoken and written language for precision and for effect on participants. Students collate and evaluate a range of spoken, written and multimodal sources to convey different perspectives to different audiences. They select and organise ideas, adapting language, style, register and textual features to mediate these ideas for a range of audiences who speak Chinese or English or both. They respond to authentic texts and create a range of persuasive, informative and imaginative texts. Students apply features of prosody in their own speech. They apply understanding of character components and morphemes to their own writing. They reflect on their own experiences of interacting across diverse linguistic and cultural contexts, and move readily between languages and cultures.

Students demonstrate metalinguistic awareness across Chinese and English and identify similarities and differences in the structure and framing of both languages. They make and justify choices on how they present themselves and their ideas to audiences who speak either language. They analyse how language features and devices are used to achieve different purposes. Students explain how language and languages vary with time and according to situation and context. They identify evidence showing how texts reflect the cultural background and values of the author and different perspectives.

The Australian Curriculum Languages - Framework for Aboriginal Languages and Torres Strait Islander Languages

Framework for Aboriginal Languages and Torres Strait Islander Languages

Overview

Rationale

Nganki - ka Kardu thipmam - wa! I Murrinh warda ngatha. The nganthin ngumpanngerren. I ku ngakumarl, da ngarra ngugumingki wurran. The da matha nganthin ngala i da bere matha wangu ngumamath ngumpan ngarra magulkul nganki.

We are black people. We speak our language. We have our totems and Dreamings. This is what we know and will hold always in our hearts.

It is who we are.

Deminhimpuk Francella Bunduck, Murrinpatha teacher, OLSH Thamurrurr College, Wadeye, ACARA consultation forum, Darwin, July 2013

The overall rationale for learning Aboriginal languages and Torres Strait Islander languages in Australian schools is that they are the original languages of this country. Through learning them, all students gain access to knowledge and understanding of Australia that can only come from an Aboriginal or Torres Strait Islander perspective. The languages by their nature embed this perspective. Learning to use these unique languages can play an important part in the development of a strong sense of identity, pride and self-esteem for all Australian students.

Each Aboriginal and Torres Strait Islander language is unique to the Country/Place on which it arose. It gives voice to the landscapes, thoughts and ways of seeing and interpreting the world. When the language of the land is spoken, it brings together all of the elements of the landscape and its people. It encompasses the relationships of these people with one another and with the landscape, past, present and future. The learning of an Aboriginal or Torres Strait Islander language incorporates the realities of its people and facilitates students' deep engagement with knowledge, ways of being and ways of knowing. It develops in students an understanding of historical, current and ongoing connection to Country/Place and culture.

Aboriginal languages and Torres Strait Islander languages are fundamental to the identity of Aboriginal and Torres Strait Islander peoples and this is recognised throughout the Framework. It is also the right of Aboriginal and Torres Strait Islander peoples to have access to education in and about their own languages, as enshrined in the United Nations Declaration on the Rights of Indigenous Peoples (resolution 61/295, adopted 13 September 2007, www.un.org/esa/socdev/unpfii/documents/DRIPS_en.pdf). Education systems can play a vital role in facilitating access to language learning and supporting community language revival and maintenance.

To me, teaching Kurna means sinking my toes into this sacred soil and embracing who I am. It means being so proud of my language and culture that I want to share it with whoever wants to listen, learn and be a part of my journey.

Ngathaitya, ngathu Kurna Warra nguthu-atpama, ngai tidna kuinyunta yartangka ngatpanthi. Naku'athu, yailty'athu ngana ngai tiyati. Ngai kararrinthe ngaityu warraku, ngaityu tapa purrunaku kuma. Ngai padlurninthe ngaityu warra pirrki-apititya ngapidluku, ngana padlurninthe yuringkarnititya, tirkatitya, kumangka ngathaityangka padnititya.

Taylor Power, Kurna language teacher, Gilles Street Primary School, with Kurna translation assistance from Rob Amery, Head of Linguistics, University of Adelaide

Learning Aboriginal languages and Torres Strait Islander languages meets the needs and rights of young people to learn their own languages and recognises the significance of these languages in the language ecology of Australia. For Aboriginal and Torres Strait Islander students, learning their own language is crucial to their overall learning and achievements. It enables them to develop a wider recognition and understanding of their language, culture, Country and Place, land, water, sea and sky, and this contributes to their wellbeing. For all students, learning Aboriginal languages and Torres Strait Islander languages provides a distinctive means of understanding the Country/Place in which they live, including the relationship between land, the environment and people. The ongoing and necessary revival, maintenance and development of these languages also contribute to reconciliation.

Language is my connection to my Ancestral Dreaming and country. Teaching Gumbaynggirr in schools benefits the whole community. It breaks down barriers, leads to a better understanding of Aboriginal people, and brings Aboriginal and non-Aboriginal people together. This kind of sharing is our cultural way.

Michael Jarrett, Gumbaynggirr language learner, teacher, and active language user

Aboriginal languages and Torres Strait Islander languages are complex and diverse. Engaging with the study of an Aboriginal or Torres Strait Islander language will develop communication skills in the language studied and will also contribute to the intellectual enrichment of students. For non-Indigenous students, the study of an Aboriginal language or Torres Strait Islander language will provide intellectual challenge and development while also giving them insight into and understanding of Indigenous Australian cultures and knowledge. In some cases it will provide these students with the opportunity to communicate with Indigenous Australians in their own language. In other cases, in addition to communication skills, it will give insight into language change and language revival within its historical context.

The government report 'Our Land Our Languages: Language Learning in Indigenous Communities' (House of Representatives Standing Committee on Aboriginal and Torres Strait Islander Affairs, Commonwealth of Australia, September 2012), found that there is an ongoing and close relationship between the work of communities to maintain and revive their languages and that of schools as vehicles for language instruction. The study 'Indigenous Languages Programs in Australian Schools: A Way Forward' (Purdie et al., 2008,) found that over 16 000 Indigenous students and 13 000 non-Indigenous students located in 260 Australian schools were involved in Aboriginal and Torres Strait Islander languages programs.

The opportunity to learn an Aboriginal language and/or a Torres Strait Islander language is becoming available in an increasing number of Australian schools, and an aim of this Framework is to make that option available for all students. In this way, all students will have the opportunity to benefit from the social and intellectual development that results from this learning.

Students at our school see the inclusion of a Kurna language program as an empowering and authenticating approach to Reconciliation. Aboriginal learners of Kurna develop pride in their culture and gain deeper insights into their own being by learning how to speak Kurna and think in Kurna. They greatly appreciate the effort undertaken by the whole school community to integrate into the curriculum and school ethos the language and culture of the land on which they live and learn. By the same token, our school community regards it as a privilege to be able to engage with Kurna traditions. Our Welcomes to Country were originally performed by just the Aboriginal Year 12s, but now our Year 9s are rising to the challenge and to be able to do so with the blessing of their Elders is a real boost to their sense of self, cultural pride and identity.

Rob Shepherd, Principal, Le Fevre High School

Aims

The Australian Curriculum: Framework for Aboriginal Languages and Torres Strait Islander Languages aims to develop the knowledge, understanding and skills necessary to ensure that students:

- communicate in the language

- understand language, culture, and learning and their relationship, and thereby develop an intercultural capability in communication
- understand themselves as communicators
- understand the process of language building as a means to extend the potential of the language (in vocabulary, expression and discourse) and to develop knowledge of linguistic techniques (such as, collecting, describing and recording language), including processes of language revival.

These four aims are interrelated and provide the basis for the two organising strands: Communicating and Understanding.

Aboriginal Languages belong to the Country and the Aboriginal people of that Country. It is important for Aboriginal people to learn Aboriginal Languages for our identity; being proud of being Aboriginal people. Language is connected to Aboriginal spirit and our Country. The language and Country is our spirit.

Mary Noonan, Rockhampton Downs, Wogiyala Community, ACARA consultation forum, Alice Springs, June 2013

What is the Framework?

The Framework for Aboriginal Languages and Torres Strait Islander Languages (the Framework) is the first national curriculum document Foundation to Year 10 to provide a way forward for all schools in Australia to support the teaching and learning of the languages indigenous to this country. The Framework has been developed from the many individual responses to the experience of teaching Aboriginal languages and Torres Strait Islander languages created by the education systems of each state and territory, and it draws particularly on the landmark ***Australian Indigenous Languages Framework*** (Senior Secondary Assessment Board of South Australia, 1996).

I believe that learning Wirangu is vital for students to understand their identity. Learning their language helps them connect with their land through being able to identify parts of the land, sea and nature. It provides opportunities for students to work with Elders and experts to teach not only the language, but how and where to use it. This strengthens school communities and empowers students to continue the language, pass it down and gives them a sense of belonging.

Wade Branford, Principal, Koonibba Aboriginal School

The prime purpose of the Framework is to guide the development of teaching and learning curricula for particular Aboriginal and Torres Strait Islander languages. By providing a national framework it is intended that future educational development in Australia's Indigenous languages will result in curriculum development and school programs that are nationally commensurate in terms of teaching, learning and assessing. Also, the provision of a framework in preference to language-specific curriculum documents will allow for greater flexibility in developing programs for any Aboriginal language or Torres Strait Islander language.

Language curriculum provides an important place for Aboriginal knowledges, dreaming stories, belief systems, and material culture. It is also a pathway for young people on their journey to becoming leaders and future Elders. Language allows us to weave the past into the future, one sentence at a time.

Jodi Edwards, Dharawal language and culture revitaliser

Aboriginal languages and Torres Strait Islander languages are unique and distinct within the languages learning area in the Australian Curriculum. There are at least 250 distinct Aboriginal languages and Torres Strait Islander languages, many having several dialects. Each language has an intimate connection with 'Country' or 'Place', which is how Aboriginal and Torres Strait Islander people refer to areas of land, water, sea and sky to which they belong. Each Aboriginal or Torres Strait Islander person inherits language as part of his or her birthright, along with membership of a particular group and attachment to Country/Place. In this way, people become owners and custodians of areas of land, water, sea, and of language. A crucial part of a person's identity, therefore, is sourced through language and Country or Place. All this has important implications for the framing of appropriate principles and protocols for the provision of school-based programs in Aboriginal languages and Torres Strait Islander languages. It also emphasises the need for ongoing consultation with relevant language communities in developing school programs.

KAURNA

Ngaityu warra ngathaitya ngai. Ngaityu warra yaintya yarta-ana tarraitpayinhi. Warraitya tampinhi yaintya yarta tampi-apinhi.

My language is more than just a way to converse with me. It is my identity and the doorway to understanding my culture as a whole. Understanding my language helps me to understand the place around me and connects me to this country.

Vincent 'Jack' Buckskin, Cultural Mentor, Tauondi College and Kurna language leader

Since 1788, most of the traditional languages have ceased to be languages of everyday communication because many Aboriginal and Torres Strait Islander peoples were forced to stop speaking their languages as a result of government policies aimed at assimilating communities into the non-Indigenous population. However, communities across Australia are now working actively towards getting the languages back into everyday use, and schools can play a key role in helping communities achieve this aim. Where languages are used for everyday communication by whole communities across all generations, schools can provide opportunities to maintain and strengthen these languages.

Through helping to re-awaken Aboriginal languages and Torres Strait Islander languages, students develop understanding of linguistic techniques and practices that apply to language revival and grow in their understanding of Australia's history and their own capacity to effect positive social change.

It is well demonstrated that Aboriginal and Torres Strait Islander students are strongly motivated to study their own and other Aboriginal languages and Torres Strait Islander languages, and that enthusiasm for their language studies often increases their engagement at school more generally.

The benefits of Aboriginal languages taught in schools can be astronomical. For example there is one school our town with students from numerous different ethnic backgrounds. By teaching Wiradjuri, the first culture of this country, the whole school community (including students, teachers, parents) also becomes respectful of all cultures, so much that we boast zero racism. Through learning to respect and trust our local Aboriginal culture, they become open to other cultures as well.

Geoff Anderson, Parkes Wiradjuri Language Group

This Framework potentially caters for all Aboriginal languages and Torres Strait Islander languages, irrespective of the ecology of each language, whether it be a language of everyday communication used by a community, a language at any point in the continuum of revival or one of the many creole languages that have evolved through the history of language contact in Australia. At present there are two major creole languages: Kriol and Torres Strait Creole.

To cater for differences between the ecologies of the languages and the communities who are owners and custodians of the languages, and to cater for students who come from a variety of learner backgrounds, the Framework has three pathways:

- First Language Learner Pathway (L1)
- Second Language Learner Pathway (L2)

- Language Revival Learner Pathway (LR).

The pathway approach recognises that the two key variables are ‘the learner’ and ‘the nature of the language’.

The Framework is designed to be flexible. When developing language-specific curricula and programs, aspects of the content and achievement standards from across the pathways can be selected, adapted and modified in ways that best suit the particular language and its context and learners.

Just as the languages have changed over time, and most rapidly since 1788, so have Aboriginal and Torres Strait Islander communities. The Framework takes into account that the study of Aboriginal languages and Torres Strait Islander languages is as much about what it is to be an Aboriginal or Torres Strait Islander person today as it is about ancient traditions and social, cultural and linguistic continuity with the past.

Ngoeymun yadayl ngoeymun muruygungu ngapa koeyma maykuykuya mulupa gethawoeyamoeydhin. Ngoeymun moeginakoezin ngoeymun muruygaw yadayl guythwayamoeyngu. Ngoeymun ya, na ngoeymun igililinga. Ngoeymun ya ngoeymun pawaw muydhoedhazinga.

Ngoeymun moeginakoezil na ngoeymun yangu ngulaygasimoeyn, thana ngoeymun pawal a igililmayl mina ridhapa gasamoeyn. Thana na ngoeymun yangu koerawayg, thana ngoeymun pawal a igililinga mamu mina gasamoeyginga a thoelathoeyayinga.

Thonar ina thanamulpa lak ngoeymun muruygaw yangu ngurpay ayman, thana setha ngoeymun yadaylga moerali koey moebaygal matha igililmayl; na bal ngoeymun muruygaw yadayl matha karngemipu mura goeygiya pawpa bangal.

Our languages were handed down through many generations from our first ancestors. Our children have lost our ancestors’ languages. Our language is our way of life. Our language is the centre piece of our culture.

When our children get to know our languages, they get to strongly understand our culture and our way of life. If they don’t know our languages, they don’t get to fully grasp and understand our culture and our way of life.

Dana Ober, Torres Strait Linguist

Guiding principles

Appropriate consultations with relevant Aboriginal or Torres Strait Islander communities are always central to the development of language-specific curricula and the provision of language learning programs in schools. The following guiding principles and protocols are integral to the development and provision of language curricula and programs at all stages of development, implementation and evaluation.

Principles

Each Aboriginal language or Torres Strait Islander language is recognised as belonging to a group of people who are its owners or custodians. This means that permission and consent must be sought from the owners when developing language-specific curricula and planning language programs, including visits, excursions to the Country/Place and use of cultural material as part of the teaching and learning program.

Sufficient time and resources should be allowed for thorough and ongoing consultation processes in accordance with local contexts and situations. Often there will be more than one Aboriginal or Torres Strait Islander language represented in the local setting, so a decision needs to be reached as to which language or languages will be developed and taught and who is appropriate to teach and learn the language(s). The ultimate authority regarding the choice of language rests with the local Aboriginal and/or Torres Strait Islander community.

Protocols

A comprehensive survey of the local language situation should be conducted before a language-specific curriculum is developed or a language program is commenced. The development of a language-specific curriculum that is not the language of the land also requires consultation with both the local community and the community of the language.

The curriculum development team at either school or systems level needs to identify the appropriate persons in the local Aboriginal and/or Torres Strait Islander community to consult. These would typically be local Elders, traditional owners, individuals with historical links to the language, and relevant local community organisations. Issues to be considered might include:

- whether the proposed language is the language of the land on which it will be learnt
- the proportion of students in the proposed program identifying directly with the language
- the availability of appropriate human resources for developing and teaching the language
- the level of documentation and resources available for the language, including issues of copyright and Indigenous cultural and intellectual property.

Allowance should be made for the possibility that a different language to that preferred by the curriculum development team or the school may eventually be requested and/or chosen by the local community, or that there may be no agreement within the local community as to choice of language. In cases where there is no agreement, the curriculum development or learning program would not proceed.

Schools and state and territory education systems and authorities should consult all local community organisations that have interests and responsibilities in local language, school programs or community governance. These organisations will include local language centres, health centres, land councils, native title bodies, professional associations, representative bodies, networks of schools, local Aboriginal education consultative groups or equivalent, groups of educators and any other relevant key stakeholders.

Schools should also ensure that language and cultural materials produced by their language programs are kept in safe-keeping places with appropriate deposit and access processes in place. In these ways schools will be supporting communities to build and keep safe a range of resources for their language programs.

NGARRINDJERI

Ngarrindjeri ngulamaldar ngratun palai-ambi, kar yunti-warrun rawulinyeri thunggari wunyi kar tambi-warrun kaltjar.

Ngarrindjeri students learning for the future, bringing together past language and keeping culture alive.

Anita Wano-Sumner, Aboriginal Secondary Education Transition Officer, Victor Harbor High School

Structure

Pathways

To cater for differences between the ecologies of languages and the communities who are owners and custodians of those languages, and to cater for students who come from a variety of learner backgrounds, the Framework has three pathways:

- First Language Learner Pathway (L1)
- Second Language Learner Pathway (L2)
- Language Revival Learner Pathway (LR).

This approach recognises that the two key variables are ‘the learner’ and ‘the nature of the language’.

The Framework is designed to be flexible in use for developing language-specific curricula and programs. Aspects of the content and achievement standards from the various learner pathways can be selected, adapted and modified in ways that best suit a particular language, to ensure that the curriculum and subsequent programs are appropriately pitched and to recognise the nature of the language, the nature of the learners and the context of learning.

First Language Learner Pathway (L1)

Languages studied in the First Language Learner Pathway (L1) are typically used in spoken form as the language of everyday communication by whole communities across all generations.

Typically, but not exclusively, L1 programs will occur on Country/Place and will have constant involvement from a variety of speakers from the community. A key expectation in the L1 pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

Learners are typically Aboriginal or Torres Strait Islander children who have learnt the language from their families as a first language and continue to use it naturally at home and play. Students may have varying skills in other languages, including varieties of English.

The First Language Learner Pathway provides students with an opportunity to study a first language at school. For these students, having the opportunity to learn their own language at school supports their cognitive development and signals recognition of the value and status of their language and ways of using and understanding language. Learning and using one's own language at school also meets a widely held community aim to strengthen students' identity and their connection between their families, community and Country/Place.

YANKUNYTJATJARA

Wai, ngayulu pukuḷ mula waaka nyangatja ikuntananyi nganampa wangka wiṛu, nganampa Wapar puḷka tjuṛa munu Anḡanguku ara tjuṛa.

Wangka nganampa puḷka mula kutjuliku.

Palya alatjika.

Hello, I am very pleased to see this work is recognising our beautiful language, our Ancestral stories and our Aboriginal ways.

Our languages are very important for everyone.

Thank you very much

Karina Lester, Mobile Language Team, University of Adelaide

Students develop language skills to expand the domains of use in the language. This includes developing skills in registers and genres not normally encountered in their family and home community; in effect, this may involve the students in the creative development of new registers/genres, vocabulary and expressions in the language. As well as continuing to develop, extend and strengthen oracy, a key feature of the First Language Learner pathway is the development of written literacy.

The curriculum content and achievement standards in the First Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a first language. The curriculum content and achievement standards will need to be adapted when developing language-specific curricula, and will need to be modified if the program occurs off-Country.

Second Language Learner Pathway (L2)

Languages studied in the Second Language Learner Pathway (L2) are typically languages used in spoken form as the language of everyday communication by whole communities across all generations.

The second language learner pathway has been written on the assumption that learning will occur off-Country, involving students who are typically not from the language community and having little or no experience of the language and culture. They are introduced to learning the language at school as an additional, new language.

The language chosen for curriculum development should have a sizeable set of resources in a variety of media, such as local documentaries, bilingual narrative and descriptive texts, and educational materials in print and digital form. Learning is enriched and authenticated by interaction with visiting Elders and community speakers, and where possible visits to Country/Place. Information and communications technologies provide additional resources to support a range of language and culture experiences.

The Second Language Learning Pathway provides students with an opportunity to study a language that is structurally very different from English and one from a culture quite distant from the English-speaking mainstream. This develops a deeper appreciation of the nature and diversity of languages and cultures, and supports the acquisition of knowledge and skills necessary to learn and understand an Aboriginal or Torres Strait Islander language and its cultural context.

For students who are from the language community but who did not grow up speaking the language, it is an opportunity to reaffirm their cultural identity through learning the language of their community.

The curriculum content and achievement standards in the Second Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a second language. The content descriptions, content elaborations and achievement standards for the Second Language Learner Pathway will need to be adapted for use with the particular language being taught and will need to be modified if the program occurs on-Country or if the learners are from the language community.

Language Revival Learner Pathway (LR)

The Language Revival Learner Pathway (LR) provides opportunities for students to study Aboriginal or Torres Strait Islander languages that are being revived by their owners or custodians and are in various stages of revitalisation, renewal and reclamation.

LR covers a much broader range of language types and ecologies than either L1 or L2, and the vast majority of Aboriginal languages and Torres Strait Islander Languages are included in the LR category.

Schools teaching the Language Revival Learner Pathway (LR) will most likely be located broadly within the geographical region of the language and culture, sometimes in towns and cities and other times in rural and remote regions. Classes will likely include students who relate closely to the language and culture as well as students with varying degrees of affiliation with the language and culture, including some with no connections to the language and culture. A key expectation in the LR pathway is that students have opportunities to interact with Elders and particular places on Country/Place.

Proper Language revival process needs that cultural knowledge, the cultural context and the underpinning knowledge, to make it make sense. There's no point in talking about that tree, unless you really understand what that tree means. So yes, we're doing Language revival, but that underpinning knowledge is really important to that Language revival.

Doris Paton, Victorian Aboriginal Corporation for Languages – Gunnai Language teacher

The Language Revival Learner Pathway draws on the Australian Indigenous Languages Framework (AILF) and takes into account key variables such as: how much is known about and documented for the language; the extent to which languages are used or remembered, ranging from languages no longer spoken (owners often use the term 'sleeping') to those spoken fluently by members of the older generations; and the extent to which languages have been reintroduced into the community of owners and custodians.

These variables give rise to the following broad categories of language revival:

- **Language Revitalisation:** where there are fluent L1 speakers (typically members of the older generation) but intergenerational transmission of the language has been interrupted. In this case, younger generations may understand some of the language and may use some words and phrases but they do not speak it as their first language. Examples of revitalisation languages include: Walmajarri in the Kimberley, Yindjibarndi in the Pilbara, Meriam in the Torres Strait, Dyirbal in north-eastern Queensland, Wubuy (Nunggubuyu) in Arnhem Land, and Adnyamathanha (Yura Ngawarla) in the Flinders Ranges. .
- **Language Renewal:** where there are a number of adult speakers who use the language to varying degrees in the community, but not 'right through', and where other language resources are drawn upon. Examples of languages being renewed include: Noongar in south-west Western Australia, Gumbaynggirr on the north coast of New South Wales, Ngarrindjeri on the Lower Murray Lakes in South Australia, Djabugay in the Atherton Tablelands in northern Queensland and Yugambeh in southern Queensland. .
- **Language Reclamation:** where language revival by necessity relies primarily on historical documentation of the language in the absence of active community knowledge of it. Examples of reclamation languages include: Kurna from Adelaide, Narungga from the Yorke Peninsula, Dharuk or Eora (Iyora) from Sydney, Yuwibara from central Queensland, Wemba-Wemba and Woiwurrung from Victoria, and Awabakal from the Newcastle area in New South Wales.

Reviving our languages connects us to our country, to our Old People, to our stories, and our belonging to each other and our ways of knowing. Reviving our language is our connection and understanding of who we are, it isn't a revival for now, it is our future generations to come.

Doris Paton, Victorian Aboriginal Corporation for Languages – Gunnai Language teacher

A number of factors and variables need to be considered when developing a language revival curriculum:

What is known and documented about the language

Many languages may only be known from wordlists, which are typically of widely varying quality. Some may have sketchy grammars; others may have recorded texts from which some grammar may be extracted; some, which have slipped from everyday use, may have audio and film resources. In the case of poorly documented languages where speakers no longer exist and sound or film resources were never made there will be many gaps to fill. Source materials will need to be interpreted through comparison with each other and with closely related languages, if indeed documentation of such languages exists.

Where there are still speakers of the revival language, fewer gaps will need to be filled and fewer assumptions will need to be made, because the remaining speakers will be the arbiters of what is correct or not. It is not unusual in such cases to have widely differing opinions about what is right, which may simply reflect underlying dialect differences or language change. Where a language is only known from written, historical records, there will be more need for interpretation and the application of historical and comparative linguistics in rebuilding the language, with the understanding that the revived language will most likely never match precisely the original language in structure, vocabulary and usage.

The extent to which languages are used or remembered

Revival languages also differ in relation to the extent to which they have been re-introduced into the community of owners and custodians, for example:

- the range of functions for which the language is now used (for example, private conversations, written communication, digital messaging, social media)
- the extent of its use in the public domain (for example, public speeches, Welcomes to Country, Acknowledgements of Country, naming various public entities and institutions)
- its use in educational programs (for example, at school or post-school level, in community schools, involvement of non-Indigenous as well as Indigenous people)
- the degree of development of contemporary resources (for example, alphabet books, dictionaries, grammars, learner's guides, readers, animations, radio shows, television shows, websites with online language lessons, phone apps).

Some languages have only just begun their journey of revival, while others have advanced to a point where initial generations of new first language speakers are beginning to emerge as parents use the revived languages with their children.

For languages with limited documentation, English or another community language might be used in a complementary fashion in school programs, for example, to fill in for missing words or expressions. Alternatively, language owners and the general community may decide to sidestep these gaps altogether and entirely avoid the use of English or other languages for these purposes.

Implications for developing language specific curricula and language programs

The curriculum content and achievement standards in the Language Revival Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt within this pathway.

The Language Revival Learner Pathway is pitched approximately at middle-of-the-range revival languages; that is, those that no longer have fluent first language speakers but have sufficient resources, including a grammar and dictionary, to enable a comprehensive, cumulative, rigorous and meaningful teaching program to be developed. Where there are major gaps in knowledge or documentation relating to a language, consideration needs to be given to how far the curriculum content and achievement standards can be realised and sustained for long-term, cumulative learning. An Aboriginal and/or Torres Strait Islander cultural studies program may be a better option under circumstances of severe constraint.

Many teaching and learning programs will use the LR pathway for languages that have few, if any, speakers and associated language community. It is conceivable that over time a language functioning well in revival mode could develop a sufficiently substantial speech community across all generation levels for it to be taught in either the L1 or L2 pathway. Until a revival language achieves this critical mass, however, the recommended learning pathway is LR.

The willingness and interest that comes from the kids to learn my language fuels my motivation. I've had a couple of students from other classes approach me and ask to teach their class Kurna too, because their siblings go home speaking the language and teach it to their families.

The children absolutely love it when I speak only in Kurna – when it sounds natural and fluent. You can see the amazement on their faces. They want to be able to speak like me, and so conversing smoothly in Kurna has become our main focus. It is so empowering.

Ngai Kurna Warra wangkama, wakwakurna purtinthi. Parna Kurna Warra numa nakunthi, warra marltawiltarnima. Parna murki nakunthi! Parna padlurninthe ngairli wangkatitya. Kurna Warrarluta taingiwiltha ngaini yungkunthi.

Taylor Power, Kurna language teacher, Gilles Street Primary School, with Kurna translation assistance from Rob Amery, Head of Linguistics, University of Adelaide

The content descriptions, content elaborations and achievement standards for the Language Revival Learner Pathway will need to be adapted when developing a language-specific curriculum.

Language-specific curriculum development for languages that are being revived, still have first language speakers, are regaining fluent speakers, or have substantial resources, could consider some aspects of the content and achievement standards from the First Language Learner or Second Language Learner Pathways. The L2 pathway could be used as a basis for curriculum development. In these instances, content descriptions, elaborations and achievement standards would need to be adapted and modified to ensure that the curriculum is appropriately pitched and to reflect the nature of the language, the nature of the learners, and the context of learning.

The following table provides a summary of the three learner pathways.

Table 1: Summary of the three learner pathways

First Language Learner Pathway	<ul style="list-style-type: none"> • Language spoken right through — full linguistic code • Substantial range of speakers across all generations • Language used as the language of community • Learners typically Aboriginal or Torres Strait Islander children who have learnt the language as a first language • Curriculum written on the assumption that L1 programs will occur on-Country/Place
Second Language Learner Pathway	<ul style="list-style-type: none"> • Language spoken right through — full linguistic code, • Substantial range of speakers across all generations • Curriculum written on the assumption that L2 programs will occur off-Country/Place and learners are typically not from the target language community
Language Revival Learner Pathway	<ul style="list-style-type: none"> • Languages being revived by their owners and in various stages of revitalisation, renewal and reclamation • Learners who relate closely to the language and culture as well as learners with varying degrees of connection to the language and culture and some with no connections • Curriculum written on the assumption that LR programs will typically occur broadly within the geographical region of the language and culture • Curriculum pitched approximately at middle-of-the-range revival languages

NGARRINDJERI

Ngul! Nginti elun piltenggi, platjingga po:ri. Ngumawi thunggaril piltenggiru-warrun. Kili-um yunti-warrun ngumawi ru:wangk wunyi kaltjar. Tarnaulo kulyulainkun ngang-el-inti wunyi yarnd-el-inti.

Remember! You are a strong, proud Ngarrindjeri child. Your language makes you even stronger. It connects you to your country and culture. So never be ashamed of who you are and where you come from.

Phyllis Williams, Ngarrindjeri language teacher and Elder and Mary-Anne Gale, support linguist.

Sequences of learning

The Framework for Aboriginal Languages and Torres Strait Islander Languages is written in the bands Foundation – Year 2, Years 3–6 and Years 7–10. In the absence of pedagogical evidence across the country for all these languages, these broad bands of learning provide maximum local flexibility in curriculum development.

Strands, sub-strands and threads

The content of the Framework for Aboriginal Languages and Torres Strait Islander Languages is organised through two interrelated strands that realise the four aims. The two strands are:

- **Communicating:** using language for communicative purposes in interpreting, creating and exchanging meaning
- **Understanding:** analysing language and culture as resources for interpreting and creating meaning.

The strands reflect three important aspects of language learning:

- communication

- analysis of aspects of language and culture
- reflection that involves, for example,
 - reflection on the experience of communicating
 - reflection on comparative dimensions of the different languages used by students (for example, the first language in relation to the second language and self in relation to others).

A set of sub-strands has been identified within each strand, which reflects dimensions of language use and the related content to be taught and learned. The strands and sub-strands do not operate in isolation, but are integrated in relation to language use for different purposes in different contexts. The relative contribution of each sub-strand differs for described languages, pathways and bands of learning.

The following table provides a brief description of each of the strands and sub-strands.

Table 2: Relationship between strands and sub-strands

Strand	Sub-strand	Description
Communicating: <i>Using language for communicative purposes in interpreting, creating and exchanging meaning.</i>	1.1 Socialising	Interacting orally and in writing to exchange ideas, opinions, experiences, thoughts and feelings; participating in planning, negotiating, deciding and taking action.
	1.2 Informing	Obtaining, processing, interpreting and conveying information through a range of oral, written and multimodal texts; developing and applying knowledge.
	1.3 Creating	Engaging with real and imagined experience by participating in, responding to and creating a range of texts, such as stories, songs, dances and paintings and visual designs.
	1.4 Translating	Moving between languages and cultures orally and in writing, recognising different interpretations and explaining these to others.
	1.5 Identity	Exploring and expressing their sense of identity as individuals and as members of particular speech communities and cultures.
	1.6 Reflecting	Participating in intercultural exchange, questioning reactions and assumptions; considering how interaction shapes communication and identity.

Strand	Sub-strand	Description
Understanding: <i>Analysing and understanding language and culture as resources for interpreting and shaping meaning in intercultural exchange.</i>	2.1 Systems of language	Understanding the language system, including sound, writing, grammar and text.
	2.2 Language variation and change	Understanding how languages vary in use (register, style, standard and non-standard varieties) and change over time and place.
	2.3 Language awareness	Analysing and understanding the general nature and function of language and culture, focusing on areas such as the changing relationship of languages and cultures over time, and the ability of new media and technologies to shape communication.
	2.4 The role of language and culture	Analysing and understanding the role of language and culture in the exchange of meaning.
	2.5 Role of language building	Analysing and understanding language building as a means to extend the potential of the language in the areas of vocabulary, expression and discourse, and developing knowledge of linguistic techniques such as collecting, describing and recording language.

The sub-strands are further differentiated according to a set of ‘threads’ that support the internal organisation of content in each sub-strand. These ‘threads’ are designed to capture: (1) range and variety in the scope of learning; and (2) a means of expressing progression of content across the learning sequences.

The following table provides a brief description of each of the strands and sub-strands.

Table 3: Summary of threads across the three learner pathways

Strand	Sub-strand	Thread		
		L1	L2	LR
Communicating	1.1 Socialising	Socialising/interacting	Socialising/interacting	Socialising/interacting
		Taking action/collaborating	Taking action/collaborating	Taking action/collaborating

				Techniques of language building

Concepts, processes and text -types

Concepts

Concepts are the big ideas that students work with. The choice of the word 'concept' rather than 'topic' is deliberate: it marks a shift from description to conceptualisation. The curriculum invites students not only to describe facts or features of phenomena, situations and events but also to consider how facts and features relate to concepts or principles. For example, a description of a house can lead to a consideration of the concept of 'home' or 'space/place'; a description of a landmark or waterway can lead to a consideration of the Aboriginal or Torres Strait Islander concept of 'Country/Place' or 'Kinship'. This shift is necessary because concepts lend themselves more fruitfully to intercultural comparison and they engage students in personal reflection and more substantive learning.

Language revival is listening to the land, language revival is understanding knowledge and language revival is our connection to ways of knowing. It is for the future generation to come.

Doris Paton, Victorian Aboriginal Corporation for Languages – Gunnai Language teacher

The key concepts for Aboriginal languages and Torres Strait islander languages and knowledge include:

- Country/Place: links to land, water, sea, sky
- Identity: individual, social, cultural
- Relationships: family and kinship, skin, totem, moiety, sections
- History/Story/Journey
- Community life: past and present
- Ecology: management of natural resources, land-care
- Natural environment: seasons and cycles, topographical features of the region, land-forms, plants and animals, category systems, fire, water, night sky and stars, meteorological phenomena, tides and the moon, bush tucker
- Built environment: artefacts, tools, shelters/houses and urban environments
- Artistic expression: story-telling, music and dance, visual design
- Health and well-being: physical, spiritual, mental; cultural safety, body parts, age, change and growth (social, emotional)
- Language as system: sound, grammar, orthography, conventions in speaking, writing and signing, ways of communicating
- Register, variation and structure: age-, gender-, and relationship-appropriate language use; regional variation; loans and cognates; creoles and young people's talk; structural relatedness
- Language ecology: language diversity, growth, endangerment
- Language and cultural revival: language building, reconstruction, maintenance and development, advocacy
- Cultural protocols: values, respect, reciprocity.

Language revival gives knowledge, it strengthens our ways of knowing, and connects our future generations to ways of thinking.

Doris Paton, Victorian Aboriginal Corporation for Languages – Gunnai Language teacher

Processes

Processes include skills (for example, listening, speaking, reading, viewing, signing, writing, performing, classifying, noticing), as well as higher-order thinking processes (such as, conceptualising, interpreting, reasoning, analysing, explaining, comparing, reflecting) and the processes of collecting, describing and recording language.

Text-types

Text-types include oral, written, visual and multimodal texts. Country/Place, sea and sky are also considered by Communities to be texts. The selection of texts is important because they define and reflect past and present, and linguistic and cultural identity, helping to make the people and experiences of a particular culture distinctive. They also provide opportunities for intercultural dialogue.

Curricula developed from the Framework for particular Aboriginal or Torres Strait Islander languages may draw upon a variety of historical and contemporary types of text. Individual language teaching programs will benefit from incorporating a diversity of support and enrichment materials and experiences, community knowledge and individual expertise, all of which serve as texts.

Oral texts provide the rich experience and engagement characteristic of live performance, and may range from the relatively free forms of informal story-telling and yarning to the more canonically fixed forms of song and associated dance and ceremony. The performance of oral texts encourages interactive learning at all stages and for all orientations of language learning; they are the forms of expression in which Aboriginal and Torres Strait Islander cultures excel and which are intrinsic to their communicative structures and styles.

Visual texts are also key texts to guide learning of Aboriginal and Torres Strait Islander languages. These may include ephemeral works, such as ground paintings, tracks left by ceremonial dancers, body painting as well as visual design in more permanent forms worked onto stone, wood, canvas or sporting guernseys. These texts are often collaborative in origin, identifying specific knowledge of Country/Place, linking groups of people and transmitting knowledge to community, and, increasingly, to wider Australian and international audiences. Ground paintings, for example, are traditional expressions of the interactions between humans, History, ancestors, and the environment.

Some Aboriginal and Torres Strait Islander languages are known virtually only through written texts, usually in the form of archival material dating from previous generations when the language was more widely known and used. Present-day owners of these languages may choose to research the texts to retrieve what can be known about them. By so doing they seek to bring them back to a life and culture in which performance once more assumes its central role, and in which everyday forms of the spoken language can be adapted for contemporary life. For these programs in revival languages, historical texts form a crucial starting point for developing new language forms and uses, even though available written texts may vary greatly in detail and accuracy.

Archival material for revival languages, however, may be skewed by the interests, intentions and biases of original recorders and writers; for example, a language may have a substantial grammar recorded for it but large areas of missing lexicon, because it was not of interest to the original recorders. On the other hand, early literacy work with first-language speaker communities may have spawned a flourishing vernacular literacy rich in socialising and informing styles, for example, letter-writing, but little material describing the language structure.

Some languages may be spoken fluently only by the older generation, who therefore become the referenced authors of new texts that reflect changing social and educational conditions and needs, and where the purpose is to re-engage younger generations in acquiring their language, thus ensuring its survival. The role of Elders in these situations is fundamental.

Revival pathways developed for different languages will therefore potentially have access to a wide variety of texts on which programs can be based: some fixed in the archives and some living and ever-changing; some comprehensively descriptive of the internal structure and resources of the language but needing to be enlivened with conversational detail; and some voluble but masking underlying structures needed to generate new language for young learners.

Multimodal and digital media texts have assisted greatly in the transmission of Indigenous knowledge and taxonomies and in the artistic expression of contemporary personal and cultural identity, with a responsiveness often approaching the living nature of traditional oral transmission. There are interactive maps and seasonal calendars describing Country, digital animations depicting Story and Journey, and hyperlinked texts integrating several text-types, all available on personal digital devices small enough to travel with the learner. By engaging in these enhanced texts, learners develop a set of multiple literacies that support not only the learning and transmission of Australia's precious linguistic heritage but the acquisition of techniques and attitudes to learning that boost learners' achievements across the whole curriculum.

Language learning and literacy development

Languages play a crucial role in the educational experience of students and in the curriculum as a whole. Given the diversity of students in Australian schools, it is important to recognise that a range of languages is used either as part of the formal curriculum or as part of learners' socialisation and experience in and out of school.

Learners bring to school their experience of their first language(s), the one(s) they use for initial socialisation in family or community. For the majority, this is English. For many others, it can be a range of different languages. Learners also encounter the language or languages of instruction at school. For most learners in Australian schools, this is English. For many students, this language of instruction is not the same as their first language. These students may learn through **English as an additional language or dialect (EALD)** programs.

In contemporary understandings of language acquisition and learning, importance is placed on the role of the languages through which individual learners socialise and learn. All learners have their own repertoires of linguistic and cultural experience and capabilities. These are variously developed by both the experience of schooling and broader social community experience. These repertoires are an integral part of each learner's identity, of what they bring to the experience of learning an additional language as part of their school curriculum.

While the curriculum for languages primarily addresses the processes involved in learning languages, this learning cannot be separated from the development of learners' more general educational experience and communicative repertoires. A relational and holistic approach to languages education and to learning and using multiple languages ensures that learners develop their overall language capabilities and knowledge, which impacts on their overall conceptual and communicative development.

In various kinds of bilingual programs, students are afforded an opportunity to learn through the medium of English and another language (learners' first or additional language). These programs are of particular value in ensuring that learners continue to develop capabilities in at least two languages that are of value and relevance to them, in terms of conceptual development, communicative capabilities and identity formation.

Aboriginal and Torres Strait Islander communities recognise the importance of literacy for their children. They support literacy education programs that are founded on the principle of establishing literacy in their children's first language, the Aboriginal and Torres Strait Islander languages used in their communities. Literacy in English is regarded as concomitant on first establishing students' literacy in this first language. Although many bilingual programs in Aboriginal and Torres Strait Islander languages are designed to help students' transition into learning in English, their fundamental value is in the development of bilingual literacy. Strengthening the bilingual literacy of Aboriginal and Torres Strait Islander students contributes significantly to improving overall academic achievement and success.

Using the Framework

The Framework is general in its structure and approach because it needs to be applicable to all Aboriginal languages and Torres Strait Islander languages in Australia, across the full range of language ecologies. As a consequence, curriculum content and achievement standards are pitched at a higher level of generality than in language-specific curricula in order to cater for the full range of Aboriginal or Torres Strait Islander languages that may potentially be learnt within a particular pathway.

The next stage of Australian Curriculum development for Aboriginal languages and Torres Strait Islander languages may lead to the development of some language-specific exemplars of content and achievement standards to be included in the Framework in order to support and guide the process of developing specific content and achievement standards for specific languages.

Developing language-specific curricula for particular Aboriginal languages and Torres Strait Islander languages

It is intended that the Framework be used by state and territory education jurisdictions, schools and communities to develop language-specific curricula and programs. Any language-specific curriculum development must be undertaken with appropriate consultation with language owners or custodians and members of the relevant Aboriginal or Torres Strait Islander communities, as outlined in the Principles and Protocols section of this Framework. Consideration must be given to the availability of appropriate human resources to develop the curriculum and to the level of documentation and resources available for the particular language.

The curriculum development team will include members of the Aboriginal or Torres Strait Islander community whose language is the focus, as well as curriculum specialists, language experts and language-teaching practitioners, as necessary.

Determining the appropriate pathway

In selecting the pathway that will be used as a base for development of language-specific curricula, consideration should be given to the nature of the language, the nature of the learners, and the context of learning, for example:

- the ecology of the language and the nature of the speech community
- the profile of learners and the degree of affiliation with the language
- the likelihood of the program occurring on or off Country/Place.

The Framework is designed to be flexible in use. When developing language-specific curricula and programs the curriculum development team can select, adapt and modify aspects of the content and achievement standards from across the pathways in ways that best suit the particular language, its context and its learners. For example, language-specific curriculum development for languages that are being revived, still have first language speakers, are regaining fluent speakers, or have substantial resources, could potentially adapt and modify some aspects of the content and achievement standards from the LR, L2 and L1 pathways.

Sequences of learning

The Framework for Aboriginal Languages and Torres Strait Islander Languages is written as a Foundation – Year 10 learning sequence and presumes continuous learning of the same language across the bands Foundation – Year 2, Years 3–6, and Years 7–10.

The content and achievement standards will require modification if the language-specific curriculum is to be written for different entry points, for example, developing a curriculum for a Year 7 entry point.

Context Statement

A context statement will be developed for each specific language to describe the distinctiveness and nature of that language, including its use in the community, the place of the language in Australian education, the nature of learning the language, and the diversity of students who will be learning the language.

Content and Achievement Standards

In developing a language-specific curriculum, the generalised content and achievement standards within a particular pathway may need to be adapted and modified to reflect the nature of the language, the nature of the learners, and the context of learning. This includes adapting band descriptions, content descriptions, content elaborations, and achievement standards.

Language-specific examples such as concepts, key words and phrases should be included in the content and achievement standards. The use of language-specific examples provides teachers with a point of reference when developing programs and provides indications of pitch and expected levels of performance in language use and understanding.

Content elaborations develop aspects of each content description: illustrations, descriptions or examples to indicate opportunities for learning. They are intended as complementary support material. They are neither prescriptive nor comprehensive. The elaborations included for each pathway of the Framework allow for the various ecologies of languages, the various contexts of learning, and the diversity of learners within a particular pathway. This is particularly the case for the LR pathway.

Language-specific curriculum developers should select, adapt and modify elaborations in ways that best suit the particular language and its context and learners, or should create particular content elaborations to accompany the content descriptions for the specific language.

Developing teaching and learning programs

The Australian Curriculum: Languages has been developed for language-as-subject programs (where a language is studied as a subject as part of the school curriculum). Schools and jurisdictions will allocate a larger number of hours in implementing content-based programs (where the content from another learning area is taught in the target language) and bilingual programs.

I feel that there's a genuine respect and appreciation from the school community for the language and what I'm doing. They make me feel like they're lucky to have me. Their encouragement and determination to help me and help keep Kurna thriving amazes me. I feel like we share the same passion. And that's so comforting to me.

Taylor Power, Kurna language teacher, Gilles Street Primary School

The Australian Curriculum: Framework for Aboriginal Languages and Torres Strait Islander Languages is designed to achieve four aims that are realised through two interrelated strands: communicating and understanding. In developing teaching and learning programs, the two strands are integrated to ensure holistic learning and to attend to active language use and the development of related knowledge, understandings and reflective capabilities.

The set of strands and sub-strands capture a range of dimensions of language use. As such, they are designed to capture the scope; that is, the range and variety of content to be experienced and learned by students. Teachers will need to design teaching and learning programs by drawing on the content descriptions from a number of sub-strands, and integrate these to create meaningful learning experiences for their particular learners. The emphases across the strands and sub-strands may vary for different languages, bands and pathways, and for different program contexts. Since the content descriptions indicate the nature and scope of the learning over several-year spans, teachers will need to make decisions about what aspects of the content descriptions will be taught in what year of their program. Year by year, programs can then be used to inform the development of short-term programs (that is, one term/several weeks).

Taken together, band descriptions, content descriptions, content elaborations, and achievement standards provide an overall sense of 'level' of, or expectations about, language teaching and learning at a given moment in time and over time. They give a sense of the level of complexity at which student learning can be pitched, and in relation to assessment they provide a reference point for making judgments about students' progress in learning. Teachers will make decisions about pedagogies that best meet the learning needs of their particular students and that best reflect the context of their particular program.

Scope and Sequence

Sequence of Achievement - First Language Learner Pathway (L1)

Sequence of Achievement - Language Revival Learner Pathway (LR)

Sequence of Achievement - Second Language Learner Pathway (L2)

Glossary (Word)

Glossary (PDF)

Context statement

Languages studied in the First Language Learner Pathway (L1) are typically used in spoken form as the language of everyday communication by whole communities across all generations.

Typically, but not exclusively, L1 programs will occur on Country/Place and will have constant involvement from a variety of speakers from the community. A key expectation in the L1 pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

Learners are typically Aboriginal or Torres Strait Islander children who have learnt the language from their families as a first language and continue to use it naturally at home and play. Students may have varying skills in other languages, including varieties of English.

The First Language Learner Pathway provides students with an opportunity to study a first language at school. For these students, having the opportunity to learn their own language at school supports their cognitive development and signals recognition of the value and status of their language and ways of using and understanding language. Learning and using one's own language at school also meets a widely held community aim to strengthen students' sense of identity and their connection between families, community and Country/Place.

Students develop language skills to expand the domains of use in the language. This includes developing skills in registers and genres not normally encountered in their family and home community; in effect, this may involve the students in the creative development of new registers/genres, vocabulary and expressions in the language. As well as continuing to develop, extend and strengthen oracy, a key feature of the First Language Learner pathway is the development of written literacy.

The curriculum content and achievement standards in the First Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a first language. The curriculum content and achievement standards will need to be adapted when developing language-specific curricula, and will need to be modified if the program occurs off-Country.

Summary of Key Features of the First language learner pathway:

First Language Learner Pathway	<p>Spoken right through (full linguistic code)</p> <p>Substantial range of speakers across all generations</p> <p>Used as the language of community</p> <p>Learners are typically Aboriginal or Torres Strait Islander children who have learnt the language as a first language</p> <p>Curriculum written on the assumption that L1 programs will occur on Country/Place</p>
---------------------------------------	---

Context statement

The Language Revival Learner Pathway (LR) provides opportunities for students to study Aboriginal or Torres Strait Islander languages that are being revived by their owners or custodians and are in various stages of revitalisation, renewal and reclamation.

The LR category covers a much broader range of language types and ecologies than either L1 or L2, and the vast majority of Aboriginal languages and Torres Strait Islander languages are included in the LR category.

Schools teaching the Language Revival Learner Pathway (LR) will most likely be located broadly within the region of the target language and culture, sometimes in towns and cities, and other times in rural and remote regions. Classes will likely include students who relate closely to the language and culture, as well as students with varying degrees of affiliation with the language and culture, including some who have no connections to either the language or the culture. A key expectation in the LR pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

The Language Revival Learner Pathway draws on the Australian Indigenous Languages Framework (AILF) and takes into account key variables such as: how much is known and documented of the language; the extent to which it is used or remembered, ranging from no longer being spoken (owners often use the term 'sleeping') to being spoken fluently by members of the older generations; and the extent to which it has been reintroduced into the community of owners and custodians.

These variables give rise to the following broad categories of language revival:

- **Language Revitalisation:** where there are fluent L1 speakers (typically members of the older generation) but where intergenerational transmission of the language has been interrupted. Younger generations may understand some of the language and may use some words and phrases, but do not speak it as their first language. Examples of revitalisation languages include Walmajarri in the Kimberley, Yindjibarndi in the Pilbara, Meriam in the Torres Strait, Dyirbal in north-eastern Queensland, Wubuy (Nunggubuyu) in Arnhem Land, and Adnyamathanha (Yura Ngawarla) in the Flinders Ranges. .
- **Language Renewal:** where there are a number of adult speakers who use the language to varying degrees in the community, but not 'right through', and where there are other language resources to draw upon. Examples of languages being renewed include Noongar in south-west Western Australia, Gumbaynggirr on the north coast of New South Wales, Ngarrindjeri on the Lower Murray Lakes in South Australia, Djabugay in the Atherton Tablelands in northern Queensland, and Yugambeh in southern Queensland.
- **Language Reclamation:** where language revival, by necessity, relies primarily on historical documentation of the language in the absence of active community knowledge of it. Examples of reclamation languages include Kaurana from Adelaide, Narungga from the Yorke Peninsula, Dharuk or Eora (Iyora) from Sydney, Yuwibara from central Queensland, Wemba-Wemba and Woiwurrung from Victoria, and Awabakal from the Newcastle area in New South Wales,

A number of factors and variables will need to be considered when developing a language revival curriculum, including:

What is known and documented about the language:

Many languages may only be known from wordlists, which are typically of widely varying quality. Some may have sketchy grammars. Others may have recorded texts from which some grammar may be extracted. Others, which have slipped from everyday use, may have audio and film resources. In the case of poorly documented languages, where speakers no longer exist and sound or film resources were never made, there will be many gaps to fill. Source materials will need to be interpreted through comparison with each other and with closely related languages, if documentation of these languages exists.

Where there are still speakers of the revival language, fewer gaps will need to be filled and fewer assumptions will need to be made. The remaining speakers of the language will be the arbiters of what is correct or not. In such cases, it is not unusual to have widely differing opinions about what is right, which may simply reflect underlying dialect differences or processes of language change. Where a language is only known from written, historical records, there will be more need for interpretation and the support of historical and comparative linguistics in rebuilding the language, with the understanding that the revived language will most likely never precisely match the original language in structure, vocabulary or usage.

The extent to which the language is used or remembered

Revival languages also differ in the extent to which they have been re-introduced into the community of owners and custodians, for example:

- the range of functions for which the language is now used (for example, private conversations, written communication, digital messaging, social media)
- the extent of its use in the public domain (for example, public speeches, Welcomes to Country, Acknowledgements of Country, naming of public entities and institutions)
- its use in educational programs (for example, at school or post-school level, in community schools, involving both Indigenous and non-Indigenous people)
- the degree of development of contemporary resources (for example, alphabet books, dictionaries, grammars, learner's guides, readers, animations, radio shows, television shows, websites with online language lessons, phone apps).

Some languages have only just begun their journey of revival, while others have advanced to a point where initial generations of new first language speakers are emerging, as parents use the revived languages with their children.

For languages with limited documentation, English or another community language might be used in school programs in a complementary fashion, for example, to fill in for missing words or expressions. Alternatively, language owners and the community in general may decide to sidestep these gaps altogether, avoiding the use of English or other languages entirely.

Implications for developing language specific curricula and language programs

The curriculum content and achievement standards in the Language Revival Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt within this pathway.

The Language Revival Learner Pathway is pitched approximately at middle-of-the-range revival languages; that is, those languages which no longer have fluent first language speakers but have sufficient resources, including a grammar and dictionary, to enable a comprehensive, cumulative, rigorous and meaningful teaching program to be developed. Where there are major gaps in knowledge or documentation relating to a particular language consideration needs to be given as to how far the curriculum content and achievement standards can be realised and sustained for long-term, cumulative learning. An Aboriginal and/or Torres Strait Islander cultural studies program may be the better option under circumstances of severe constraint.

Many programs will use the LR pathway for languages that have few, if any, speakers or associated language community. It is conceivable, however, that over time a language functioning well in revival mode could develop a sufficiently substantial speech community across all generations for it to be taught and learned in either the L1 or L2 pathway. Until a revival language achieves this critical mass, however, the recommended language learning pathway remains LR.

The content descriptions, content elaborations and achievement standards for the Language Revival Learner Pathway will need to be adapted when developing language-specific curricula.

Language-specific curriculum development for languages that are being revived, still have first languages speakers, are regaining fluent speakers, or have substantial resources, could consider incorporating some aspects of the content and achievement standards from the First Language Learner or Second Language Learner pathways; or using the L2 pathway as a base for curriculum development. In these instances content descriptions, elaborations and achievement standards will need to be adapted and modified to ensure that the curriculum is appropriately pitched and reflective of the nature of the language, the nature of the learners and the context of learning.

Summary of Key Features of the Language Revival Learner Pathway

Language Revival Learner Pathway	<p>Languages being revived by their owners and in various stages of revitalisation, renewal and reclamation</p> <p>Language learners who relate closely to the language and culture, as well as learners with varying degrees of connection to the language and culture and some with no connections</p> <p>Curriculum written on the assumption that LR programs will typically occur broadly within the geographical region of the language and culture</p> <p>Curriculum pitched approximately at middle-of-the-range revival languages</p>
---	--

Context statement

Languages studied in the Second Language Learner Pathway (L2) are typically languages used in spoken form as the language of everyday communication by whole communities across all generations.

The second language learner pathway has been written on the assumption that learning will occur off-Country, involving students who are typically not from the language community and have little or no experience of the language and culture. They are introduced to learning the language at school as an additional, new language.

The language chosen for curriculum development should have a sizeable set of resources in a variety of media, such as local documentaries, bilingual narrative and descriptive texts, and educational materials in print and digital form. Learning is enriched and authenticated by interaction with visiting Elders and community speakers, and where possible visits to Country/Place. Information and communications technologies provide additional resources to support a range of language and culture experiences.

The Second Language Learning Pathway provides students with an opportunity to study a language that is structurally very different from English, and from a culture quite distant from the English-speaking mainstream. Such study develops a deeper appreciation of the nature and diversity of languages and cultures, and requires the acquisition of knowledge and skills necessary to learn and understand an Aboriginal or Torres Strait Islander language and its cultural context.

For students who are from the language community but who did not grow up speaking the language, this pathway provides an opportunity to reaffirm their cultural identity through learning the language of their community.

The curriculum content and achievement standards in the Second Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a second language. The content descriptions, content elaborations and achievement standards will need to be adapted for use with the particular language being taught; it will need to be modified if the program occurs on-Country or if the learners are from the language community.

Summary of Key Features of the Second language learner pathway

Second Language Learner Pathway	<p>Spoken right through (full linguistic code)</p> <p>Substantial range of speakers across all generations</p> <p>Curriculum written on the assumption that L2 programs will occur off-Country/Place and learners are typically not from the language community</p>
---------------------------------	---

The Australian Curriculum Languages - Framework for Aboriginal Languages and Torres Strait Islander Languages First Language Learner Pathway (L1) - Years F–10 Sequence

Framework for Aboriginal Languages and Torres Strait Islander Languages

Foundation to Year 2

The nature of the learner, the pathway and particular language

Languages studied in the First Language Learner Pathway (L1) are typically used in spoken form as the language of everyday communication by whole communities across all generations.

Typically, but not exclusively, L1 programs will occur on Country/Place and will have constant involvement from a variety of speakers from the community. A key expectation in the L1 pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

Learners are typically Aboriginal or Torres Strait Islander children who have learnt the language from their families as a first language and continue to use it naturally at home and play. Students may have varying skills in other languages, including varieties of English.

The curriculum content and achievement standards in the First Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a first language. The curriculum content and achievement standards will need to be adapted when developing language-specific curricula, and will need to be modified for programs occurring off-Country.

Students enter the early years of schooling with well-established skills in spoken forms of the language along with a growing knowledge of local community and culture. In addition they may have varying skills in other languages, including varieties of English. School is often the first place these children encounter written language as a systematic means of communication.

Language learning and use

As well as continuing to develop oracy, a key feature of the First Language Learner Pathway is the development of literacy and extending language use in additional domains, particularly relating to the school context. Children build a vocabulary for thinking and talking about school topics, routines and processes, and expand their knowledge and understanding by exploring Country/Place with Elders and community members and by engaging with stories and other texts in the language.

Children learn about the concepts of kin, social groupings and how these are connected to the natural environment. They learn about their own songs, stories, dances and designs and their own place in the kinship system.

From Foundation to Year 2 children are learning how to interact with people in new contexts, share with others, and participate in more structured routines and activities. They learn about school, teacher and community expectations in terms of 'right' behaviour and 'right' ways of talking.

The curriculum builds on children's interests and sense of enjoyment and curiosity, with an emphasis on active and experiential learning and confidence building. Creative play provides opportunities for using the language for purposeful interaction in some less familiar contexts. Imaginative activities, games, music and songs, movement and familiar routines provide essential scaffolding and relevant contexts for language development.

Students are supported to use the language for different language functions and in different domains, such as asking and responding to questions on a range of topics, expressing feelings, following instructions, working together for a common purpose, and taking turns in games and simple shared learning experiences.

They learn to recognise how the sounds of the language and its intonation are encoded in writing. They begin to understand how the language works, comparing and contrasting it with other known languages and learning how it fits into the diversity of regional and national languages.

The transition from spoken to written language is scaffolded through shared exploration of simple texts and language features. Children progress from supported comprehension and use of a small number of high-frequency and personally significant sight words to more elaborated texts that take account of context, purpose and audience. They use grammatical, cultural and contextual cues to comprehend texts and engage in communicative interactions. They progress from writing by tracing and copying, to independently forming legible letters. Writing skills progress from the ability to label images and copy high-frequency words to co-construct simple texts using familiar vocabulary, language features and structures. Children begin to develop familiarity with different types of texts in different genres.

Contexts of interaction

Across Foundation to Year 2, learning occurs largely through interaction with peers and the teaching team, with access to Elders and other speakers living in the same community for additional enrichment and authentication of the learning experience. Interacting with Country/Place to explore the environment with Elders and other community members is essential to learning at all stages, but particularly in the early years, when learning is grounded in the familiar, and understanding of the role of language as lived experience is important.

Texts and resources

Country/Place and the community are the most important resources for learning and are the origin of most of the texts and communicative situations offered to learners.

Children engage with a variety of spoken, visual, written and digital texts. They listen and respond to teacher talk, share ideas, and join in with song, dance, story, rap, as well as with various forms of play, performance, conversational exchanges and activities mediated by language. Printed and digital texts include stories, shared Big Books, wall charts and teacher-generated materials such as games, flashcards and items from the community and local environment. They engage with visual texts such as designs on body, bark and sand, and etchings and carvings on wood and rock.

Level of support

Learning is supported through the provision of experiences that are challenging but achievable with appropriate scaffolding and support. This involves modelling, monitoring and moderating by the teacher; provision of multiple and varied sources of input; opportunities for revisiting, recycling and reviewing; and continuous cueing, feedback, response and encouragement. Use of recount, experiencing and retelling in oral and written formats assists in establishing early literacy.

The role of languages

The language of study is the principal medium of instruction in First Language Learner Pathway classrooms, while other known languages play a complementary role, such as for translating and creating bilingual/multilingual texts.

Foundation to Year 2 Content Descriptions

Communicating	
Socialising	Elaborations

Interact with peers, the teaching team and visiting Elders/community members to share information, thoughts and feelings about family, friends, community, activities, events and experiences

[Key concepts: family, community, friendship, personal world, experience, responsibility, safety; Key processes: interacting, sharing, describing, recounting]

(ACLFWC001)

- interacting with peers, the teaching team and visiting Elders and community members, using appropriate ways of talking, including terms of respect and forms of address, and using sign language as appropriate
- sharing and describing recent events, favourite pastimes and personal experiences, for example, a sporting event, a fishing or hunting trip, a trip to a waterhole, calling in on family or visiting a neighbouring community
- collaboratively recounting experiences they have shared together, for example, trips to the bush or town, school events, sports days, meeting special guests
- engaging in class and small group discussions, listening to others and exchanging ideas on topics such as healthy eating, safe behaviours, who to ask for help, responsibilities at home, school and in the community
- talking in appropriate ways about feelings, thoughts, wants and emotions, for example, looking at pictures of people and discussing how they might be feeling or what might have happened to them; talking about what makes them happy, embarrassed, ashamed, angry or afraid and discussing possible strategies or responses when they experience such feelings
- identifying trusted people in their community who can help them stay safe and healthy, and rehearsing ways of asking for help in a range of different scenarios

Participate in shared tasks and activities that involve following instructions, making things and cooperating with peers

[Key concepts: family, cooperation, play; Key processes: participating, active listening, following instructions, making, turn-taking]

(ACLFWC002)

- listening to, remembering and following instructions from an Elder/community member, for example, how to make traditional tools or prepare traditional foods
- collaborating with others in art and craft activities, for example, gathering and using traditional materials such as ochre, nuts, twigs, bark, seeds, shells, feathers; decorating musical instruments/artefacts; making bush toys
- participating in traditional and contemporary games, tasks and activities that involve turn-taking, guessing, matching and choosing objects, bush tucker collecting, sand story telling
- working collaboratively with peers and the teaching team, for example, to adapt and perform action songs, make a class Big Book, design posters with a health or behavioural message, create a display, create and perform an item for school assembly
- practising personal skills such as active listening and showing self-discipline and respect for others in interactive group situations
- using appropriate phrases and expressions for turn-taking in games and activities
- grouping and sorting bush food such as meat, food grubs, artefacts, leaves and tools into appropriate cultural categories
- giving directions, for example, to guide others to locations or through an obstacle course

Participate in conversations and interactions that involve behaviours such as active listening, showing interest, asking questions and contributing ideas, information

[Key concepts: routine, consideration, contribution, appropriateness; Key processes: active listening, participating, responding, following instructions]

(ACLFWC003)

- participating in routine classroom exchanges, such as responding to the class roll, asking and answering questions, making requests and expressing opinions in appropriate ways
- encouraging and praising others using appropriate language and interaction behaviours
- negotiating and following class rules and demonstrating understanding of class/school/teacher/community expectations in relation to respectful relationships, right behaviour, and right ways of talking in class and at school
- negotiating with class members and members of the teaching team, using respectful language for agreeing or disagreeing and considering how others might respond before expressing their views
- building vocabulary and language forms for thinking and talking about school topics and routines
- participating in and contributing to class discussions using appropriate strategies for turn-taking
- using ways of talking and listening that are appropriate to particular activities, for example, sitting and listening to a story, paying attention to what the teacher is doing, joining in interactions such as singing or playing
- learning and using appropriate language and actions to communicate their feelings in different situations

Informing

Elaborations

Locate/ discover/identify key information about Country/Place and community by exploring Country/Place and listening to stories from Elders and community members

[Key concepts: Country/Place, natural environment, Indigenous knowledge, the past, community life, health and well-being; Key processes: listening, reading, mapping, reading Country/Place, exploring, observing, recording, describing, classifying]

(ACLFWC004)

- listening and responding to Elders and community members telling stories about aspects of the past, for example, bush toys and children's games, hunting, fishing and gathering food, how food was prepared and cooked, implements used, animals that were eaten, ways of travelling from place to place, kinds of dwellings, how water was found
- describing and recording different weather and seasons of their Country/Place in a picture diary or a series of paintings, annotating them with changes that occur throughout a year, including the seasonal behaviour of animals and what plants grow in particular seasons
- learning to read Country/Place with Elders' guidance, for example, by looking for tell-tale signs such as animal tracks and fruit fall, migratory birds, turtle tracks, animal behaviour, fresh diggings around a lair
- recognising and drawing and labelling different animal tracks
- investigating/exploring Country/Place with Elders/community members or park rangers, for example, by identifying different trees, plants, animals and insects, making leaf and bark rubbings, observing how different bush foods grow and are used, observing different animal behaviour, such as hiding by camouflaging, taking photos or drawing and writing captions and comments to make a class book
- observing and describing different plants, for example, parts of the plant, plant size and shape of leaves and seeds, where/how they grow
- observing and describing animals/living creatures, how they move, where they live (for example, in burrows and nests), what they eat, naming body parts, how they reproduce
- classifying animals, plants and natural objects from the environment, using appropriate cultural categories, for example, edible/non-edible, meat/non meat, salt water/fresh water, day/night animals, wood/rock, rough/smooth, hard/soft, things that live in trees, in water, plants that grow together/alone
- identifying, naming, and labelling key places and topographical features such as creeks, springs, rocky outcrops, water sources, estuaries, reefs, desert landforms, using some location and directional terms such as *up, down, near, north, south, east, west*
- describing the direction and location of familiar places (near and far, above and below, beside and opposite)
- identifying and labelling some important places in the built environment, for example, dwellings, settlements, community store, health clinic, art centre, ranger station, school, places to play, roads and tracks, describing and explaining their purpose and role and who works there
- naming and discussing key ceremonies and social and cultural events, the times of year at which they occur and associated activities in the community
- viewing local photos, videos, books, IndigiTUBE, to find information about cultural practices such as musical

instruments used, performance paraphernalia

- recording how frequently/ for what purposes they visit particular places, representing information on a graph or table with teacher guidance
- identifying, talking about and describing artefacts, describing how they are used, how they are made and maintained, what materials they are made from
- labelling, drawing and matching inside and outside body parts
- learning and using vocabulary and expressions related to healthy living and eating, personal hygiene and fitness

Give factual information about family, friends, Country/Place and community using simple statements and descriptions, captioned drawings and photos

[Key concepts: daily routines and activities, events, Country/Place, community life ; Key processes: labelling, captioning, describing, contributing, recounting]

(ACLFWC005)

- representing aspects of their daily routines using different modes of expression, for example, by writing captions, descriptions or attaching word bubbles to drawings
- creating a pictorial story to describe activities and routines they do at home, at school, in the community
- contributing to a shared recount, such as a class photo story to report on an event, for example, a hunting trip, a school visit, an excursion or school or community celebration
- creating posters to convey important messages, for example, in relation to health and well-being, caring for Country/Place

Creating

Elaborations

Participate in shared listening to, viewing and reading of texts, identifying and describing favourite elements, main characters and key events and responding through singing, dancing, drawing, movement and action

[Key concepts: storytelling, response; Key processes: responding, performing, sharing, expressing; Key text types: songs, raps, dances, traditional and contemporary stories, paintings and visual design, video clips (IndigiTUBE)]

(ACLFWC006)

- participating in shared reading of traditional and contemporary stories and responding, for example, by sequencing and captioning pictures, drawing events in sequence, retelling and re-enacting with props or actions
- predicting the content/meaning of narrative texts such as picture books, including titles, covers and illustrations, and giving reasons for their predictions
- illustrating and describing main characters and key events in stories, songs and performances
- discussing their favourite characters or events in familiar stories, songs, performances, making simple evaluative statements and comparing each other's responses to the texts
- identifying key animals, birds and other characters in stories, songs, performances and dances, recognising and describing particular patterns of movement and discussing the significance of particular dance elements
- listening to Elders/community members telling stories from the local area, and responding by retelling parts of the story, for example, in the sand, in dot paintings, or through performance
- listening to Elders/community members tell stories, identifying which stories belong to which natural features in the region/Country/Place and the significance of particular animals and natural species
- identifying, naming and describing significant sites, landforms and other features of Country/Place through which a travelling story passes
- identifying and discussing key messages expressed in stories, song, dance and visual design
- reading contemporary texts and recreating elements in new imaginative ways, using oral language, visual design, dance, digital technologies and performance

Create and present shared stories, songs and performances using familiar words and expressions that allow for exploration and enjoyment of language

[Key concepts: story, performance; Key processes: creating, narrating, retelling, singing, dancing, drawing, performing, shake-a-leg; Key text types: songs, raps, dances, stories, paintings and visual design, performance]

(ACLFWC007)

- making a shared Big Book or digital text based on an event, experience or selected characters or elements of favourite texts, using drawing, labelling, captioning and describing
 - creating own stories by sequencing a series of pictures and adding captions or commentary, or by creating a storyboard with labels
 - re-enacting or retelling simple stories, episodes or interactions with props, actions and gestures
 - creating new versions of contemporary songs and raps, substituting words and phrases such as animal names, places, geographical features, changing settings and adding characters, incorporating non-verbal forms of support such as clapping, gestures and facial expressions
 - creating new dance sequences, paintings and visual designs to tell a story, incorporating elements of traditional design
-

Translating	Elaborations
<p>Translate words and expressions used in everyday contexts and situations, from the language into other known languages and vice versa</p> <p>[Key concepts: similarity, difference, gesture, sign language; Key processes: noticing, translating, explaining]</p> <p>(ACLFWC008)</p> 	<ul style="list-style-type: none"> translating common words, expressions and gestures used in everyday contexts and situations from the language into other known languages and vice versa, using classroom resources such as word banks, wall charts, visual dictionaries, word lists and pictures playing matching-pair games using words and phrases used in everyday conversations in the language and in other languages showing others how different signs and hand talk are used if applicable and explaining basic signs for things from the natural environment, for example, water, animals explaining symbols and their meanings to others recognising that every language has its own words, sounds and gestures that it uses to make meaning
<p>Create simple print, oral, digital bilingual/multilingual texts, such as songs, wall charts, labels for the classroom, class rules, timetables</p> <p>[Key concepts: meaning, code, bilingualism; Key processes: creating, matching, captioning, sequencing]</p> <p>(ACLFWC009)</p> 	<ul style="list-style-type: none"> creating bilingual/multilingual word lists, wall charts, picture dictionaries, using vocabulary encountered in texts such as school signs and notices, songs and storybooks creating simple bilingual texts, for example, school/classroom signs, school/classroom rules, timetables, charts, labels for objects used in the classroom and in the community creating sets of matching bilingual word cards creating and performing short bilingual/multilingual chants, songs, raps that move between the language and other known languages performing simple presentations for the school community that involve elements from both the language and other known languages, such as a contribution to an assembly or a performance for the wider community writing bilingual/multilingual captions for a photographic display about a class event or experience, such as sports day, caring for the school environment, reading night
Identity	Elaborations

Learn about and understand the concepts of kin, social groupings and relationships, and how these are connected to the natural environment

[Key concepts: identity, relationship, kinship, family terms;

Key processes: identifying, categorising, representing, explaining, creating]

(ACLFWC010)

- creating poster/kinship chart/tree depicting own family and labelling with appropriate kinship terms for immediate and extended family members
- using sign language for kinship terms and immediate families (if appropriate)
- identifying self as belonging to part of a family and/or social group, such as a footy group, representing relationships through drawing pictures, adding captions to photos or creating digital presentations
- identifying skin names of self and immediate family members
- recognising their own clans and other sub-groupings and the symbolic representation of these, for example, totems and personal relationships with plant/ animal species and Country/Place
- talking about family names, given name/s, skin names and moiety as appropriate, for example, maternal versus paternal grandparents, presence or absence of birth order names, and other ways of referring to people
- categorising names of students in the class into clans, moieties and other sub-groupings, and where appropriate their affiliations with the natural environment, for example, salt versus fresh water, north versus south wind
- learning from Elders appropriate ways of interacting with others and behaving according to kin and other social groupings
- identifying elements of their behaviours or relationships that mark their individual or community identity
- inviting grandparents from different family groups to come and talk about family
- identifying relationships and connections between themselves and other students in the group, considering the nature of groups and sub-groups within the school and larger community
- creating family history/life stories, identifying values and practices that keep families strong, such as working together

Identify with Country/Place and understand connections between Country/Place and individuals and groups

[Key concepts: Country/Place, kinship, social groups, identity, connections; Key processes: identifying, naming]

(ACLFWC011)

- identifying which Country/Place belongs to their mother's side and which to their father's side
 - identifying and naming features of Country/Place that belong to their own family and kinship groups, using drawings, photos or presentations to explain to others
 - using appropriate language and behaviour when approaching particular sites of significance and other elements of Country/Place, for example, whispering, silences, making one's approach known
 - acknowledging that their first language is a birthright which establishes their identity with respect to their Country/Place and its traditions
-

Identify their own songs, stories, dances and designs and their links to kinship systems

[Key concepts: identity, kinship, History, story; Key processes: identifying, describing, talking about]

(ACLFWC012)

- identifying, listening to and talking about stories, songs and dances from their own traditional Country/Place and sub-groupings
- describing body markings, designs and paintings relevant to their own identity
- talking about how people are linked to song, story, dance and design through kinship systems
- describing how story links plants, animals, people and protocols for visiting country

Reflecting

Notice how using the language and other known languages, including English, involve some different ways of communicating and behaving

[Key concepts: language, culture, context, similarity, difference, respect; Key processes: noticing, describing, comparing, responding]

(ACLFWC013)

Elaborations

- noticing which languages they use in which contexts, for example, at home, when playing with friends, when talking with grandparents, at school when talking to teachers, at the community store, during visits to specific places on Country/Place
- describing how it feels to use the language in the classroom compared to using it at home or in the community
- developing language for talking about language and culture, for example, using terms such as 'difference', 'Country', 'behaviour', 'two ways', and considering questions such as 'Why is ... like this?' and 'Why do people....?'
- considering how they communicate with different friends and family members who speak different languages

Understanding

Systems of language

Elaborations

Use and recognise the sounds, intonation and rhythms in the spoken language and learn how sounds and words relate to written language

[Key concepts: sound system, writing system, sound–symbol correspondence, conventions; Key processes: listening, recognising, reading aloud]

(ACLFWU014)

- recognising the sounds and syllables of familiar spoken words
 - learning with the visual support of writing how speech sounds join to form syllables, morphemes and complete words and phrases
 - learning that the writing system represent sounds and meanings, associating individual sounds or a range of sounds with particular letters and combinations of letters
 - recognising the letters of the alphabet and knowing that there are lower and upper-case letters and that letters are arranged from left to right
 - noticing that different languages may share similar speech sounds
 - using knowledge of sound–symbol correspondences to isolate and read syllables, morphemes and familiar words
 - recognising high-frequency sight words and morphemes
 - recognising special alphabetic conventions, for example, digraphs representing a single sound, diacritics that alter the regular value of a letter
 - using morphemes and syllabification to break up simple words and using visual memory to write more complex or less familiar words
 - checking for inclusion of relevant punctuation, including capital letters for sentence beginnings, full stops, question marks and exclamation marks
 - learning that written text in the language has conventions relating to words, spaces between words, layout on the page
 - using known words in writing and spelling new or less familiar words using developing visual and morphemic knowledge
 - reading texts aloud showing knowledge of sound–symbol relationships
-

Understand and use a developing vocabulary including topical and classificatory language, recognising the function of different word types in the language

[Key concepts: word function, word order, patterns, rules; Key processes: identifying, recognising, noticing patterns, observing]

(ACLFWU015)

- understand and use vocabulary relating to familiar and unfamiliar topics, including synonyms and older words that might not currently be used so often
- understanding that words have different functions, for example, words for things, words for actions
- identifying common word classes, for example, *noun*, *verb*, using available terminology from the language as appropriate
- recognising that sentences are key units for expressing ideas
- recognising common prefixes and suffixes in the language and how they change a word's function
- learning new words for everyday contexts and for a growing number of school and community contexts
- recognising that the language may have words in common with nearby languages
- observing some words in the language that are not found in English and vice versa

Recognise there are many ways of communicating messages in Aboriginal and Torres Strait Islander languages

[Key concepts: communication, narrative; Key processes: recognising, identifying, comparing]

(ACLFWU016)

- understanding that there are different ways of telling a story, such as Elders yarning, through song, dance and music and associated visual design and spectacle, and through painting (body, bark, rock, sand)
- recognising that communication also occurs through sign language
- understanding that texts have a purpose, for example, traditional stories, including hunting and travelling stories, paintings, songs and dances
- understanding Country/Place as a text
- identifying some features of narratives, for example, they are usually about journeys across Country/Place, involving landforms, people, animals and plants
- recognising that writing, like speech, is rule-bound and involves following the conventions of different types of text
- noticing how texts such as storybooks are sequenced and organised, for example, by identifying the main title and connections between pictures and written text
- understanding that texts can take many forms; that they can be very short, for example, a sign, or quite long, for example, a story, song or multimodal presentation
- recognising that written texts are made up of words, groups of words and illustrations or images that together make meaning

Language variation and change

Elaborations

Recognise that different words and language forms are used to address and communicate with people according to relationship and situation

[Key concepts: kinship, context; Key processes: noticing, recognising, comparing]

(ACLFWU017)

- noticing that different forms of address and kinship terms are used depending on the relationship between participants
- recognising that the way a person is related to another affects how he or she speaks and behaves with that person, as in the case of mother-in-law talk or avoidance relationships, such as poison cousins
- recognising that ways of speaking vary according to context and situation, for example, language used when interacting with peers during playground games is different to that used with the teaching team in school
- recognising that language used in particular interactions can vary between cultural contexts, for example, the different use of kin categories in the language
- learning to use a different tone and style of language with different people
- recognising that there may be different languages spoken in the community which can be distinguished by listening carefully

Recognise that languages borrow words from each other

[Key concepts: relatedness, word-borrowing; Key processes: identifying, recognising, comparing]

(ACLFWU018)

- recognising words in the language that are borrowed from English
- recognising that some words in the language have come from other Indigenous languages
- noticing that some words used in Australian English have come from Aboriginal or Torres Strait Islander languages, for example, 'billabong', 'dingo', 'kangaroo'

Language awareness

Elaborations

Recognise that their language is part of broader regional and national language diversity

[Key concepts: linguistic diversity, language shift; Key processes: identifying, recognising]

(ACLFWU019)

- identifying regions, places and communities where the language is spoken
- mapping the different languages spoken in the class to create a language map or wall chart
- identifying immediate neighbours and the languages they speak, recognising shared vocabulary across groups of neighbouring languages
- recognising that there are many different Aboriginal and Torres Strait Islander languages in Australia, for example, by viewing Language maps of the region, the state and the whole of Australia
- recognising the ecological regions of the Aboriginal and Torres Strait Islander languages, for example, desert, coastal, rain forest, sub-alpine, riverine and seas
- recognising that some Indigenous languages in Australia are strong, while others are endangered or in the process of being revived or reclaimed

Understand that language belongs to communities, and that language learning requires respectful and appropriate behaviour

[Key concepts: ownership, belonging, respect; Key processes: demonstrating, applying]

(ACLFWU020)

- understanding that each Aboriginal language or Torres Strait Islander language is recognised as belonging to a group of people who are the language owners or custodians
- demonstrating and applying respectful and appropriate behaviours, including appropriate language forms, in the presence of visiting Elders/community members

Role of language and culture

Notice that people use language in ways that reflect their culture, such as where and how they live and what is important to them

[Key concepts: Country/Place, Language, Culture, symbol; Key processes: noticing, recognising, questioning, making connections]

(ACLFWU021)

Elaborations

- exploring culture as an essential part of human life, understanding that it is shared and passed on between generations; that it includes observables such as ways of cooking and ways of greeting, symbols such as flags and colours, and unobservable elements such as beliefs and values, ways people think about themselves and others and relationship with the environment
- recognising that beliefs and behaviours are woven into languages and cannot be separated from them
- noticing how respect for Elders and Country/Place is built into the language
- recognising significant symbols and features in the language and culture, for example, in song, visual design, dance moves
- recognising that languages encapsulate values held about land and Country/Place, for example, caring for Country/Place
- noticing how gestures and body language differ between cultures, for example, in relation to the use or avoidance of eye contact
- noticing similarities and differences in language that relate to culture, such as the names of foods and animals particular to the climate and environment, and in cultural practices, such as the sharing involved in extended families, special times, story-telling and yarning
- noticing that using the language and using English involve different ways of communicating, and considering what this reveals about cultural values or traditions

Role of language building

Elaborations

Recognise how Aboriginal and Torres Strait Islander languages are transmitted from generation to generation
[Key concepts: oral transmission, language maintenance and development; Key processes: noticing, recognising, considering, valuing]

(ACLFWU022)

- recognising that Aboriginal and Torres Strait Islander languages have been maintained through an oral rather than a written tradition
- recognising that Aboriginal and Torres Strait Islander languages have been maintained and passed down through generations by means of storytelling, performances, songs and viewing Country/Place as text
- recognising that language speakers are the most important primary source of language knowledge
- considering why learning an Aboriginal and/or Torres Strait Islander language at school is important in maintaining and strengthening language use

Framework for Aboriginal Languages and Torres Strait Islander Languages

Foundation to Year 2 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages First Language Learner Pathway are generalised in order to cater for the range of languages that may be learnt as an L1 in the school context. The achievement standards will need to be adapted for use for specific Aboriginal and Torres Strait Islander languages.

By the end of Year 2, students interact with the teaching team, Elders, community members and each other to share information about family, friends, community activities and events. They use appropriate ways of talking, including terms of respect, forms of address and sign language. They participate in routine classroom exchanges and collaborative activities, such as pair, group and class discussions, asking and responding to questions and taking turns. They make relevant suggestions during class writing activities when the teacher is acting as a scribe. They identify key information about Country/Place under the guidance of Elders and community members and demonstrate this understanding by describing habitats, plants, animals and seasonal changes, by classifying plants, animals and natural objects into categories, and by naming and describing key social and cultural events. They respond to texts such as stories, songlines, dance and visual art through singing, dancing, drawing, action and movement, demonstrating understanding by identifying and describing characters, sequencing events, and retelling parts of the story. Students use familiar words and expressions to create and present shared stories, songs and performances, drawing on their own experiences and knowledge and providing details about characters or events. They make short presentations consisting of a few connected sentences on familiar and learned topics. They read aloud short shared texts with familiar vocabulary, high-frequency sight words and supportive images. They use knowledge of sounds and letters, high-frequency words, sentence boundary punctuation and directionality to help them make meaning when reading. Students use family terms and skin names for immediate family members as appropriate and demonstrate appropriate ways of interacting and behaving according to kinship structures and social groupings. They demonstrate understanding of connections between Country/Place and individuals and groups by identifying and naming features of Country/Place that belong to their own family and kinship groups. They identify their own links/cultural affiliations, for example, to stories, totems, dances and designs.

Students link most sounds of the language to written symbols and conventions. They use knowledge of sound–symbol relationships to read and recognise high-frequency words and use simple metalanguage to describe basic elements of language forms and structures. They recognise that messages in Aboriginal and Torres Strait Islander languages can be communicated in a number of ways, such as Elders' story-telling or through song, dance, visual design and signing. Students know that different words and language forms are used to address and communicate with people according to relationship and situation. They recognise that there are many different languages spoken in their class, community and region. They describe how the language has been passed down from one generation to the next, and recognise that language use reflects where and how they live and what is important to them.

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 3 to 6

The nature of the learner, the pathway and particular language

Languages studied in the First Language Learner Pathway (L1) are typically used in spoken form as the language of everyday communication by whole communities across all generations.

Typically, but not exclusively, L1 programs will occur on Country/Place and will have constant involvement from a variety of speakers from the community. A key expectation in the L1 pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

Learners are typically Aboriginal or Torres Strait Islander children who have learnt the language from their families as a first language and continue to use it naturally at home and play. Students may have varying skills in other languages, including varieties of English.

The curriculum content and achievement standards in the First Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a first language. The curriculum content and achievement standards will need to be adapted when developing language-specific curricula, and will need to be modified for programs occurring off-Country.

Learners at this level are expanding their social networks, experiences and communicative repertoire in the language. They benefit from varied, activity-based learning that builds on their interests and capabilities and makes connections with other areas of learning. The curriculum ensures that learning experiences and activities are flexible enough to cater for learner variables while being appropriate for learners' general cognitive and social levels.

Language learning and use

Students interact with peers, the teaching team, Elders and community members in a variety of learning experiences and activities. They continue to build vocabulary that relates to a wider range of domains, such as curriculum areas that involve some specialised language use.

Students engage in a range of listening activities and build oral proficiency through responding to rich language input and opportunities to engage in meaningful communicative activities. They follow instructions, exchange information and express ideas and feelings related to their immediate environment and personal worlds. They participate in shared tasks, performance and play.

Students' development of written literacy progresses from supported comprehension and use of high-frequency and personally significant sight words to more elaborated simple texts which take account of context, purpose and audience. The development of reading skills and textual knowledge is supported through interaction with a range of spoken, written, visual and multimodal texts, including sign language as appropriate.

At upper primary level, learners use the language for a widening range of purposes: collaborating, creating, performing and responding to resources and experiences. They have greater control of vocabulary and grammatical resources and use an increasingly sophisticated range of non-verbal strategies to support communication. Shared learning activities develop social, cognitive and language skills and provide a context for purposeful language experience and experimentation.

Oracy development includes listening to a range of varied language input from different sources and building more elaborated conversational and interactional skills. These include initiating and sustaining conversations, reflecting on and responding to others' contributions, making appropriate responses and adjustments, and engaging in debate and discussion. Individual and group oral presentation and performance skills are developed through researching and organising information, structuring and resourcing presentation of content, and selecting appropriate language to engage a particular audience.

At this level, there is focused attention on language structures and systems. Learners draw on more established grammatical and lexical resources to compose and comprehend more complex language. With support they build increasing cohesion and complexity into their writing in terms of both content and expression. They use ICT to support their learning in more independent and intentional ways and make comparisons between the language they are learning and other languages they speak or are learning, including English.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team. Additional enrichment and authentication of learning experience is provided through interactions with Elders and other speakers living in the community. Interacting with Country/Place and exploring the environment with Elders and other community members is essential to learning at all stages. Students may also have access to community facilities and functions, such as the health clinic, art centre, coast patrol, local interpretative centre, and the office of the park ranger or land council.

Elders and community members may teach about cultural elements of language and communication, such as gender-differentiated roles, working separately with male and female students when appropriate.

Students may have some access to speakers of the language or related languages in other communities and regions through digital technologies.

Texts and resources

Country/Place and the community are the most important resources for learning the language. They are the origin of most of the texts and communicative situations students engage with.

Learners interact with a growing range of spoken, visual, written and digital texts, including photographs, maps, oral histories, community texts such as posters from health clinics, community notices, land-care programs, songs, raps, dances, stories, painting and visual design, music, video clips and films.

Level of support

While learners work more independently at this level, ongoing support is incorporated into task activity and the process of learning is supported by systematic feedback and review. Form-focused activities build student's grammatical knowledge and support the development of accuracy and control in written language. Opportunities to use this knowledge in meaningful activities build communicative skills, confidence and fluency. Tasks are carefully scaffolded: teachers provide models and examples; introduce language, concepts and resources needed to manage and complete learning activities; make time for experimentation, drafting and redrafting; and provide support for self-monitoring and reflection. Discussion supports learning and develops children's conceptual frame for talking about systems of language and culture.

While learners are becoming more autonomous and independent at the upper primary years, ongoing support is still needed, including explicit instruction, structured modelling and scaffolding, and provision of appropriate stimulus materials and timely feedback. Learning experiences incorporate implicit form-focused language learning activities and examples of texts and tasks.

The role of languages

The language of study is the principal medium of instruction in First Language Learner Pathway classrooms. Other known languages play a complementary role, for example, used when translating, creating bilingual/multilingual texts or comparing and contrasting writing systems, language structures and language features and use.

Years 3 to 6 Content Descriptions

Communicating

Socialising	Elaborations
-------------	--------------

Interact with others, sharing and comparing experiences, personal perspectives and points of view on topics related to immediate environment and personal world

[Key concepts, family, community, relationships, interaction protocols, experience, health and well-being, personal and cultural safety; Key processes: sharing, participating, recounting, discussing]

(ACLFWC023)

- using appropriate ways of talking and interacting in different social situations or with different social groups, including talking to people from different areas/Countries/Places or to people in positions of authority, senior people
 - recounting and sharing stories of personal experiences, journeys or discoveries, for example, hunting, tracking, navigating, road trips, trips to town, football matches, significant milestones, social and cultural activities and celebrations
 - participating in class, group and paired discussions about shared experiences and topics of interest, learning how to listen to others, to compare experiences, contribute ideas and provide feedback, noticing and talking about how the same event can be presented from different perspectives
 - sharing and explaining personal opinions and attitudes about school, entertainment, sporting and leisure activities
 - identifying and discussing behaviours, practices, facilities and events that contribute to their own physical and spiritual health and well-being and that of the class, school and community, for example, identifying how important people in their life influence them to act or behave in healthy, safe and culturally appropriate ways
 - discussing and evaluating protective behaviours to stay safe in different situations, including near water or roads, in the bush or when a person or situation makes them feel uncomfortable or unsafe
 - identifying and discussing traditional ways of preventing sickness and staying healthy
 - discussing shared values that they see as being important to family, school and community, for example, reciprocating, respect, care for the land/sea/water and community
 - persuading others in the class to consider a particular point of view or action
 - engaging in conversations and discussions with guest speakers, using culturally appropriate interaction protocols such as active listening behaviours, asking questions and offering opinions and ideas
 - sharing and explaining opinions about issues of shared interest, for example, parental, school and community expectations, peer pressure and intergenerational perspectives, identifying possible points of agreement or tension
 - engaging in online discussions with other young language learners to exchange information about cultural practices, experiences and shared interests, for example, leisure activities, community life, music and sport
 - recognising listener and speaker roles and the role of assumed and shared knowledge in everyday communication
-

Plan and participate in collaborative activities and events, negotiating and performing different roles and responsibilities that are appropriate to local cultural traditions

[Key concepts: collaboration, experience, shared decision making; Key processes: making arrangements, designing, making, planning, suggesting, negotiating]

(ACLFWC024)

- participating with Elders/community members in local cultural traditions and activities, such as, tracking, hunting, gathering and preparing food, looking for schools of fish, searching for honey ants, digging soakages, using hand signs as appropriate
 - following instructions from Elders, for example, cooking bush tucker, making different traditional tools, weaving baskets, collecting beans or shells to make necklaces, making bush shampoo, recording, remembering and explaining the processes to younger students
 - collecting resources used for cultural practices in the bush under supervision of Elders, for example, oil, greases, ochre, feathers
 - planning and negotiating roles for a class event, such as a cook-up, class display or performance, making a short video or presenting a school-assembly item, planning and conducting an interview with a special class guest
 - working together on collaborative tasks that involve negotiation and shared decision-making about content and design, for example, designing posters or menus for special events, designing a class garden, creating picture books for 'buddy' classes
 - working together to design posters or web pages to promote a school or community event
 - conducting, recording and presenting observations and findings of collaborative science experiments, for example, monitoring the movement of cane toads
 - working with visual, print and digital modes of expression to create texts such as invitations to/programs for a class performance or event, for example, a reading night
 - collaborating to design an item such as a language flag, artefact or logo that incorporates elements of importance to the language community
-

Participate in classroom interactions that involve some changes to ways of communicating at school and the development of learning related language and interaction patterns

[Key concepts: interaction patterns, cooperation, domains of language use, agreement/disagreement, reflection; Key processes: working together, contributing, enquiring, building language, monitoring, clarifying, acknowledging, explaining]

(ACLFWC025)

- discussing differences between ways that they are expected to listen and speak in class and ways they do so in home and community
- identifying particular domains of language use, words and expressions used at school which may be unfamiliar, such as terms related to particular content areas or interactions between teachers and students
- taking on different roles in group and pair work, for example, being leader, recorder, time monitor, or reporting back to the larger group or providing feedback to others about their roles
- using sign language for interactions in the classroom as appropriate
- formulating different types of questions to ask a class visitor, such as open and closed questions and *when*, *why* and *how* questions
- building the language of classroom interaction, for example, by asking relevant questions, prompting and checking individual and group understanding, using descriptive and expressive language when recounting experiences
- developing language that supports planning of learning tasks and activities, organising resources, monitoring and recording learning experiences, such as clarifying and explaining, giving opinions, justifying, reporting results of group discussions
- acknowledging others' ideas and opinions and indicating agreement or disagreement in non-judgemental ways
- developing language to evaluate and reflect on their own learning, for example, describing how they feel when they are learning a new skill, strategies they use to persevere until they are successful, identifying ways they use their strengths to help themselves and others

Informing

Elaborations

Gather, organise and compare information from a range of sources relating to Country/Place, community and past and present ways of living

[Key concepts: past and present, natural environment, caring for Country/Place, social and cultural events, health and well-being; Key processes: enquiring, investigating, comparing, describing, tracking, mapping, measuring, charting, explaining, analysing]

(ACLFWC026)

- listening to stories of the past from Elders and community members, for example, accounts of where they grew up, what they did, their way of life, where they visited, how they communicated, practices such as the use of smoke in healing and purification, funeral practices, what values were important, how knowledge was transmitted; making comparisons with their own experience and contemporary life and discussing how daily lives have changed
- comparing traditional and contemporary roles in the community, for example, those of store keeper, nurse, teacher, park ranger, traditional healer and people responsible for Law, song and dance
- examining and analysing a range of sources, such as photographs, maps and oral histories, to collect information about people, places and events in their community's past and present to develop an annotated timeline or other visual representation of significant changes to community life, for example, contact history, modifications to water supply, establishment of the community store, clinic and school, introduction of currency, changing community and school policies with respect to language learning
- comparing photographs that reflect changes from the past to the present in a specific environment or location, identifying elements of both change and continuity
- creating charts, pictorial stories, maps, digital and oral presentations to represent and to explain elements of past times
- describing the seasons, identifying and recording indicators of seasonal and weather changes, for example, behaviour of animals, reptiles, birds, insects, plants; changes in wind direction, charting different forms of plants during the seasons, such as flowering, fruiting, shedding of bark, night sky and star formations; developing their own (class) seasonal calendar
- measuring daily meteorological data, for example, temperature, humidity build up, rainfall, wind direction, sun intensity, times of tides, and constructing charts, column and picture graphs to record gathered information
- investigating and describing how seasons and weather and availability of natural water sources affect people's lives and practices
- researching information about practices that care for Country/Place, for example, waterhole management and protection, fire management, species management
- observing and reading signs of Country/Place, such as the presence of bees, changing colours of bark, different tracks, tides, seaweed dumps, burnt ground, regeneration of vegetation, special (warning) calls of birds, ripening of fruit, changes in the night sky
- using appropriate cultural categories to classify different types of plants and parts of plants and their uses, for example, what different parts of plants are used for, which parts/plants are poisonous, presenting findings in chart, poster, table, graphic or digital form

- undertaking plant and animal surveys, for example, by recording details of plants that grow at school, in the community, on the side of the road, in the bush, of animals found in communities, on the roads, in the uplands, and of their habitats
- observing and presenting information through photos, captions and commentary on how different bush foods grow in different ways, for example, underground, on a vine or on a bush
- investigating with Elders some common bush medicines, talking about how they are used for different purposes, recording details through photos, pictures, diagrams, captions, descriptions and commentary
- making and recording observations of how living things such as insects, frogs or plants develop through their life cycles, recognising the effect on these cycles of different environmental factors
- mapping Country/Place in various forms, for example, on paper, in sand or mud, labelling key topographical features and infrastructure, key community facilities, indicating distances and describing Country/Place from a birds-eye view
- creating a calendar of key social and cultural events and activities in the community, for example, important celebrations, football matches, dog vaccinations, cattle mustering, annual school dances
- visiting the arts centre and learning how to make and decorate artefacts and make paint
- investigating the languages used and roles played by people in different community contexts, such as the store manager, administrator, arts coordinator, health worker, ranger, traditional healer, tour guide, mechanic, interpreter, Law person, cattle ringer
- surveying peers and community members on various topics, for example, favourite television programs, football teams, sports or bands, after school activities/time spent in those activities, languages spoken; presenting results in chart, graph or digital format
- conducting face-to-face or online interviews or surveys with peers, family members or community contacts to compare accounts of similar experiences
- naming and explaining inside and outside body parts, for example, stomach, blood, bone
- reading/viewing/ listening and obtaining information from community texts such as posters from health clinics, school magazines or community notices
- comparing and surveying healthy ways of eating, identifying what is available from the community store and which healthy foods they like to eat
- extracting key points from a range of spoken, written or digital texts such as posters, charts or brochures on topics such as health, well-being and cultural safety, and discussing key messages
- keeping a diary of food consumption over a week,

classifying types of food consumed, analysing how much bush food is in their daily diet

- visiting the health clinic to gather information about services the clinic provides and general health issues

Convey information on specific topics using formats such as oral or digital presentations, displays, diagrams, timelines, narratives, descriptions and procedures

[Key concepts: Country/Place, community life, identities; Key processes: creating, editing, presenting, profiling, sequencing]

(ACLFWC027)

- collecting information about each other's likes, dislikes or interests to create a class profile, chart or database, using checklists, surveys or question cues
- creating a class book or digital display about topics they have been studying in their language classes and/or other curriculum areas
- writing narratives about their community's past and present based on researched facts, characters and events
- creating and editing a presentation that includes text, images and sounds to record and explain aspects of life in their school, community, region
- constructing a multimedia profile of their school and community
- recounting an event, an experience or a journey, for example, a hunting trip, providing details such as how they travelled, who was with them, what animals they tracked and sighted, who cooked the animal
- writing procedural texts, for example, to explain how to prepare and cook bush tucker, how to make tools, how to decorate artefacts, how to play a favourite computer game, sport or playground game
- creating profiles to present to the class of significant people, for example, favourite sports personalities, music groups, celebrities, community leader/negotiator/spokesperson
- introducing a guest speaker or visitor to the class, providing information on their background, purpose of visit, achievements
- collaboratively planning, rehearsing and delivering short presentations, providing key details in chronological sequence
- creating texts such as flyers, posters or posts on the school website to advertise an upcoming event
- describing milestones or significant events in their lives that have shaped their identity, for example, by creating timelines or visual representations

Creating

Elaborations

Listen to, read and view a variety of texts, describing and discussing key elements, ideas, characters, events and messages, making connections with own life and experiences
[Key concepts: visual design, representation, journey; Key processes: participating, describing, predicting, recalling, responding, listening, shared/guided reading; Key text types: songs, raps, dances, traditional and contemporary stories, paintings and visual design, video clips]

(ACLFWC028)

- participating in and responding to shared and guided reading of traditional and contemporary texts, for example, by retelling or re-enacting the story to others in spoken, written, or multimodal form, by creating a timeline of events or a profile of a favourite character
- creating digital profiles of characters they enjoy in texts, providing physical and character descriptions and examples of their ways of communicating and behaving
- conveying understanding of plot and sequence in texts, for example, by re-creating a sequence using a storyboard, labelling key events or creating a timeline with supporting commentary
- describing and discussing characters, main ideas, events and settings of different texts and exploring how language is used to present these features in different ways
- participating in shared and guided reading of texts, making predictions about the development or flow of ideas, using contextual and visual cues and responding to questions about characters, ideas and events, sharing and comparing reactions and responses
- listening to Elders/community speakers telling stories and singing songs, interpreting signs and gestures, talking about key messages and using correct protocols to ask clarifying questions; understanding the significance and role of storytelling and singing in traditional and contemporary times
- making connections between their own lives and experiences (as members of families and communities) and the events represented in traditional stories
- recognising that there are different ways of telling a story, for example, through dance and paintings, and discussing the uniqueness of symbols, colours, stories and feelings represented and reflected in dances and paintings from different regions of Country/Place
- interpreting and explaining artistic traditions and visual design, for example, paintings, etchings, rock art, etching or dance, interpreting messages conveyed through these forms
- discussing key messages, social values and traditional Histories expressed in stories, songs and dance in oral, print and digital formats
- responding to a creative contemporary text by manipulating the original to create a new version, for example, re-sequencing events, adding a new element, changing location or character, or creating an alternative ending
- understanding and discussing the importance of story and informal yarning and their role in transmitting language, culture and traditional knowledge
- retelling stories to feature different places, species or social groups
- composing a review of a song, story, cartoon, IndigiTUBE clip or television program, providing positive and negative critique, using modelled language and textual features

- participating in shared reading experiences, self-correcting when the reading does not make sense, using pictures, context, meaning, phonics and grammatical knowledge to help comprehension

Create, present and perform expressive and imaginative texts that involve different modes of presentation, such as stories, dance, skits or video clips, based on a stimulus concept, theme or resource

[Key concepts: imagination, entertainment; Key processes: imagining, creating, experimenting, performing, storytelling; Key text types: raps, songs, dances, performances, digital texts, video clips, skits, paintings and visual design]

(ACLFWC029)

- creating and performing imaginative texts such as stories, songs, raps and skits based on a stimulus concept, theme or resource, and incorporating elements of humour to entertain others
- experimenting with different ways of telling stories, using a range of different texts and modes of presentation, for example, oral texts, photo stories, e-books, dance, visual design or digital texts, incorporating cultural elements, symbols and conventions as appropriate
- creating imaginary characters, places or animals and presenting them through performance, digital display or visual representation
- creating and presenting real or imaginative texts, incorporating humorous and expressive language to entertain younger audiences, for example, audio Big Books, puppet plays, cartoons, short video clips or voki animations, selecting language and images that enrich the visual or listening experience
- telling the story of a real or imagined journey involving a variety of characters, places and events
- reading a storyboard and retelling the information in their own words
- composing dialogues between real/imagined characters in challenging or amusing situations, using expressions and behaviours that convey emotion or humour
- creating a video clip to launch a real or imagined product designed to appeal to their peer group

Translating

Elaborations

Translate short texts from the language into other known languages and vice versa, including the register of sign language, noticing words or expressions that are not easy to translate and identifying elements which require explanation rather than literal translation

[Key concepts: equivalence, meaning, culture-specific concepts; Key processes: identifying, translating, transcribing, predicting, deducing, selecting, comparing, explaining]

(ACLFWC030)

- translating a range of familiar texts, for example, information from the health clinic, songs, reports, recounts, using visual and print dictionaries, word lists and pictures
 - transcribing short, simple spoken texts, such as instructions or procedures, for example, making a coolamon or fishtrap, digging for honey ants, identifying words and phrases that have more than one literal meaning
 - showing others how different signs and hand talk are used and explaining their meaning and symbolism
 - explaining visual design and performances to others, including the use of symbolism
 - translating texts such as songs and stories, identifying culture-specific concepts and expressions that do not easily translate into English, for example, language related to artefacts, landforms, traditional foods, kinship terms of address, name substitutes
 - identifying and explaining concepts, practices and expressions in the language which do not easily translate into English, and vice versa for example, the number system, time, terms for colour, daily and seasonal cycles, kinship terms, environmental sounds and elements such as noises made by different birds
 - translating and matching words to describe family and relationships in the language and English, finding examples of words that have no English equivalents
 - identifying and working out the meaning of unfamiliar English words and expressions used in other curriculum areas, including technical language, and discussing how they would explain their meaning in the language, for example, paper, bunsen burners, safe houses, GPS, photocopying, clicking and dragging
 - identifying and discussing contexts in their community where translators and interpreters are required
 - demonstrating and explaining to others elements of non-verbal communication in the language that require interpretation, such as hand talk, sign language, facial expressions, eye contact, lip pointing
-

Create bilingual/multilingual texts for the classroom and the school community, such as records of excursions and shared learning experiences, songs, photo stories, posters, brochures, maps

[Key concepts: bilingualism, expression; Key processes: creating, performing, describing, code-mixing]

(ACLFWC031)

- creating bilingual/multilingual signs, posters, notices and labels to be displayed in the classroom and around the school
- creating a bilingual/multilingual brochure about their community for a visitor, including a map of key features, protocols, cultural information
- creating bilingual/multilingual texts such as cartoons, songs, photostories, reflecting on how different meanings are communicated in different languages for different audiences
- creating bilingual/multilingual texts to promote school or community events, such as, invitations, brochures, digital presentations, posters, maps, newsletter items
- creating bilingual/multilingual resources for 'buddy classes', for example, stories, animations, games
- creating bilingual/multilingual captions and commentaries for a school display, for example, an art display

Identity	Elaborations
----------	--------------

Describe kinship relations as a system and explain its role in determining social behaviour

[Key concepts: identity, relationship, kinship, family terms, social groupings/sub-groupings, story, behaviour, ways of talking; Key processes: investigating, explaining, describing, categorising]

(ACLFWC032)

- working with Elders to map community-wide links between families according to traditional kinship systems, for example, skin, clan, moieties, other social groupings
- explaining how moieties, skin groups or other social groupings form patterns through the generations
- investigating and explaining appropriate behaviours for different relationships, such as friends, boyfriends/girlfriends, right skin marriage partners and in-laws
- identifying and categorising personal and family names, for example, names affiliated with the land, sea/water or sky, names belonging to a moiety or other social groupings
- investigating and discussing the meanings of personal and family names and of other ways of referring to people
- designing visual representations, such as concept maps, posters, slide presentations with captions, to identify and explain group memberships, for example, friendship, family, sporting, interest and community groups, discussing what such memberships mean to their sense of identity
- using appropriate behaviours and ways of talking in specific kinship relationships, for example, using avoidance language, name substitution, respecting name/word taboos, averting gaze
- talking about ways their community expresses elements of identity, for example, behaviours associated with sporting teams, coastal versus inland communities, community events
- considering the role identity plays in contributing to individual, peer group and community health and well-being
- identifying markers of identity that may be important across other cultures, for example, elements of language or behaviours associated with family, community, location, age or gender

Interact with Country/Place, for example, by discussing roles within the family, ownership, custodial and totemic affiliations, and links between History, social groups and natural species

[Key concepts: Country/Place, identity, significance, family, Dreaming/History, totemic affiliation, role connections; Key processes: identifying, naming, describing]

(ACLFWC033)

- identifying and naming traditional Country/Place of parents and grandparents
- naming and describing features of Country/Place that belong to different family and kinship groups
- recognising that certain places have special significance to certain social groups and represent special bonds between people, place and story
- learning from Elders about their own developing roles and responsibilities with respect to caring for Country/Place
- identifying the traditional owners and managers of tracts of Country/Place and their roles in respect to Country/Place

Describe and explain behaviour, rights and responsibilities in relation to the kinship ownership of songs, stories, dances and designs

[Key concepts: identity, rights, responsibilities, ownership, behaviour; Key processes: describing, explaining, discussing]

(ACLFWC034)

- identifying and explaining how art forms, such as body paintings, designs, paintings, funeral poles, songs and dances, identify people and places
- explaining how different family members have different responsibilities in the performance of ceremonies, traditional performances and other social and cultural events
- explaining how ceremonial body designs, songs, dances and paintings are determined by family, skin, other sub-groups and story
- identifying and explaining the significance of stories that belong to particular social groups and of natural features, including animals and natural species
- understanding that ownership of songs, stories, dances and designs is determined by traditional kinship and other social groupings, place, History and story
- listening to Elders' traditional stories, making links between people, stories, songs of Country/Place and the social importance of connections to History

Reflecting

Elaborations

Notice and describe similarities and differences in ways of using language and interacting with people when communicating in the language and in other known languages, including English

[Key concepts: language, culture, values, similarity and difference, communication, emotion; Key processes: noticing, comparing, describing, reflecting]

(ACLFWC035)

- recognising cultural differences in ways of showing attitudes or expressing feelings when using the language, English or other known languages, for example, ways of showing respect, being polite, thanking or showing sympathy
- describing how they communicate differently in the language, English or other known languages when interacting with different people, for example, with Elders, friends, parents, teachers, administrators, health professionals
- comparing how they refer in the language and in English to other people, such as younger relatives, authority figures, in-laws
- noticing how respect is shown to Elders in the community, for example, through the use of terms of address and expressions of deference, and comparing this to terms and expressions used in other languages and cultures
- reflecting on the range of gestures and other forms of non-verbal behaviour used when communicating in the language or other languages
- reflecting on situations where they switch between the language, English and other known languages, discussing why they do this, for example, when talking about different issues or topics, such as sport, food, music or social media
- reflecting on the experience of being bilingual/multilingual, identifying benefits of knowing more than one language and considering whether moving between languages affects their sense of identity or 'belonging'
- comparing observations about how interacting in the language feels different to interacting in English, identifying different ways of socialising or communicating that seem to be culture-specific

Understanding

Systems of language

Elaborations

Compare and use the patterns of speech sounds, intonation and rhythm in the language and learn the written forms of these and associated conventions

[Key concepts: sound system, writing system, intonation, rhythm, sound–symbol correspondence, punctuation, conventions, alphabetic order; Key processes: listening, recognising, comparing, reading aloud, transcribing]

(ACLFWU036)

- linking written morphemes, words and phrases with the spoken forms of the language
 - linking written devices/techniques to spoken differentiation between statements, questions, requests, exclamations, as well as to beginnings, pauses and ends
 - understanding how to use sound–symbol relationships and knowledge of spelling rules, compound words, prefixes, suffixes, morphemes and sound changes
 - recognising that there are constraints in the ways speech sounds may be ordered to form words, for example, sounds allowed at the beginnings and ends of words, what consonants may cluster together
 - making one-to-one correspondences between speech sounds, morphemes, words, phrases and sentences and their representations in written texts
 - using knowledge of sound–symbol correspondences to read syllables and familiar words, phrases, sentences and extended texts out loud
 - identifying words from the language that have been borrowed by English, noting any difference in pronunciation that occurs as English words
 - paying attention to consistency in spelling, checking spelling using dictionaries and other standard sources
 - identifying different uses of commas in texts, including to separate clauses and items in a list
 - recognising and using alphabetic ordering as a storing and sorting device
 - noticing the role of parts of the mouth, nose and throat in the production of speech sounds
 - recognising the difference between vowels and consonants and the role of vowels in syllables
 - transcribing elements of spoken language using their knowledge of the language and its writing system
 - identifying words in the language they think would be difficult for a non-speaker to transcribe
-

Understand and describe the word formation processes in the language, including the use of prefixes and suffixes

[Key concepts: word formation, word class, grammatical person and number, negation, metalanguage; Key processes: noticing, comparing, applying, understanding, modifying meaning]

(ACLFWU037)

- increasing and developing vocabulary across domains of language use, including synonyms and different forms, giving examples of the common word classes in the language and in other known languages including English, such as examples of nouns, pronouns, verbs, adjectives, adverbs
 - describing how word classes are treated differently in the language and in other known languages, including English, for example, the use of:
 - number in nouns and pronouns (singular, dual, plural)
 - tense and mood in verbs (affixation and separate words)
 - case in nouns and adjectives and case agreement
 - order of words in sentences
 - discussing the formation of words, for example, the addition or change of a suffix or prefix to convey different meanings
 - recognising that languages from the same region may have words in common and identifying patterns in such sets of shared words
 - understanding that languages have systematic structures and are rule-bound
 - understanding that rules vary between languages, for example, in relation to word-formation, word order at phrase and sentence level
 - making comparisons and identifying patterns in and between languages, for example, free and fixed word order, tense in verbs, use of affixes versus prepositions
 - noticing similarities between particular vocabulary sets in languages from the same region, such as words for body parts
 - developing metalanguage for talking about language, for example, *noun phrases*, *word order*, *suffixes*, *prefixes*, *tense*, *transitivity*
 - identifying in which areas of vocabulary the language has many more words than English, and vice versa, explaining possible reasons for this
 - demonstrating main topical areas of vocabulary, for example, groupings of natural species, cardinal directions, kinship system, and contrast these with English vocabulary groupings
-

Understand that texts such as stories, paintings, songs and dances have a distinct purpose and particular language features, and understand and apply text conventions

[Key concepts: purpose, language features; Key processes: recognising, identifying, distinguishing, applying, linking]

(ACLFWU038)

- distinguishing the purpose of a text and its features, for example, narratives are usually about journeys across Country/Place and convey explanations of features of Country/Place, mud-maps are for conveying basic directions
- investigating the purpose and use of sign language, for example, for hunting, for recently bereaved, for communicating at a distance, for restricting who can understand the message
- applying emerging knowledge of text conventions using classroom models, for example, determining points in written versions of oral texts at which commas, full stops and paragraph breaks might be used; accommodating in written texts the repetition and parallelism that characterise oral texts
- recognising language features typically associated with familiar texts, for example, the use of imperatives in games, instructions and procedures, and the use of past tense in traditional narratives and recounts
- linking ideas using appropriate grammatical forms, for example, connectives, serialisation, embedding
- sequencing content according to text structure
- recognising the role played by different elements in texts to contribute to meaning-making, for example, the layout, title, illustration and use of punctuation in a picture book or the use of speech bubbles in a cartoon
- noticing differences between spoken and written texts, for example, by comparing a written story with a spoken version of the same story
- becoming familiar with the conventions of a range of text types, for example, narratives and instructions

Language variation and change

Elaborations

Understand that speakers vary language forms and styles according to kin relationship and context

[Key concepts: kinship, respect, register, silence, taboo; Key processes: observing, examining, explaining, investigating, noticing, recognising]

(ACLFWU039)

- observing how language is used to establish, maintain and reflect kin-based relationships
- recognising and using specific ways of communicating messages that are linked with relationships, for example, indicating respect within families and extended kinship groups by avoiding direct eye contact, using indirect references and the use of silences and gestures
- investigating word taboo and reasons for its existence
- observing that verbal interactions can be more or less formal to suit the relationship between speakers, for example, relaxed, joking styles used with some kin compared to respectful, restrained language used with others
- noticing differences in the ways speakers communicate with different people, for example, with young children, with unfamiliar adults or with Elders
- reflecting on how they communicate with their own family and friends and with people less close to them, noticing differences in their language use and communicative behaviour
- recognising that older people in the community use some different words to talk about familiar things
- explaining differences in the ways language is used in different situations, for example, talking to their siblings, participating in cultural performances, talking in a big group

Recognise that languages change over time

[Key concepts: language shift, language loss, borrowing and relatedness; Key processes: identifying, recognising]

(ACLFWU040)

- identifying and discussing words in the language that have been borrowed from other languages to describe new concepts, for example, words for new things such as, technological innovations
- understanding that language and culture together continually change as a result of contact with other languages and cultures

Language awareness

Elaborations

Explore the language situation of their community and the diversity of language situations in Australia

[Key concepts: change, sign; Key processes: recognising, discussing, investigating]

(ACLFWU041)

- identifying immediate neighbours and the languages they speak, noting differences and similarities with their own language, shared vocabulary and regional variations in language structure and use
- investigating the distribution of speakers of the language across Australia, and the use of the language in the media, for example, in TV programs, films, IndigiTUBE
- understanding the current situation and status of the language and how strong it is across generations
- recognising how the language has been transmitted across generations and how it has been recorded, discussing reasons for different spellings of words within the language
- recognising that Aboriginal and Torres Strait Islander languages are in various states of maintenance, development and revival, and investigating the historical reasons for such variation
- investigating language revival programs, for example, processes and protocols involved, success stories and challenges, and considering what these efforts mean to the communities
- understanding that the language is among the small number of Aboriginal and Torres Strait Islander languages still spoken across all generations
- exploring how physical and biological environments affect linguistic ecology
- recognising that some words are shared across several Aboriginal and Torres Strait Islander languages, understanding why there might be differences in spelling

Understand that the use of stories and names in Aboriginal and Torres Strait Islander languages is culturally determined

[Key concepts: cultural safety; Key processes: recognising, observing, discussing]

(ACLFWU042)

- understanding that there are open and closed versions of stories and ceremonies
- observing and discussing protocols surrounding the retelling and sharing of stories
- understanding that specific people as custodians of songs, stories and dances have the right to share these
- understanding that certain people have the authority to give strangers access to certain areas of Country/Place

Role of language and culture

Elaborations

Reflect on how a community's ways of using language are shaped by values and beliefs

[Key concepts: Country/Place, cultural expression, transmission, value, belief, spirituality; Key processes: observing, making connections, discussing, investigating]

(ACLFWU043)

- showing awareness that languages carry cultural ideas and values, for example, through culture-specific words, styles of addressing people, use of silence, speech prohibitions, respect, land-language associations, and non-verbal communicative behaviours
- identifying terms of address or expressions that reflect community values and traditions, for example, at ceremonies, during sorry business, when visiting other Countries, or when visiting significant sites on Country/Place
- recognising/noticing how family and community values and behaviours, such as familiarity, mutual obligation, reciprocity, deference or respect and caring for Country/Place are conveyed in the language
- recognising that the language has various social, spiritual and cultural functions in their community
- recognising that in each culture there are general rules about what to say and do, when, where, with whom, and that these rules differ from culture to culture
- comparing elements of communication, such as the role of silence or eye contact, in different cultural contexts and exchanges
- understanding that people 'read' intercultural experiences in different ways depending on their own cultural perspectives, recognising the validity of different perspectives and questioning notions of 'right' or 'wrong' ideas
- investigating how their community expresses its relationship with the natural environment through language, for example, with seasons, stars, reef, rivers, waterholes, plants and animals
- understanding that Aboriginal languages and Torres Strait Islander languages are storehouses of cultural, environmental and social knowledge
- recognising that song and song language play a central role as keeping-places of knowledge
- understanding that the language has a rich oral literature, which recounts the important journeys and events associated with totemic ancestors/important Elders, and understanding that these stories also map the land and the values of the culture
- understanding and discussing the importance of story and the role of storytelling in transmitting language and culture
- discussing the fact that concepts may be culture-specific, for example, referencing how relationships are structured, how time and quantity are expressed, how elements such as land, sea/water and sky are viewed, spatial awareness
- identifying how the language categorises things differently from English, for example, in relation to generic and specific words for plants and animals, such as 'tree' or 'kangaroo' and, considering reasons for such differences

Role of language building	Elaborations
<p>Understand ways the language and culture can be maintained and strengthened in changing contexts</p> <p>[Key concepts: language maintenance and development ; Key processes: discussing, exploring, considering, investigating, language building]</p> <p>(ACLFWU044)</p> 	<ul style="list-style-type: none"> • exploring ways that language and culture have been maintained and strengthened in their community, for example, by using the language in families and school language programs, story-telling, writing, recording, archiving material, media services, songs and music, visual design • recognising the existence of materials such as audiotapes and visual and historical documents available through community organisations and in local, state and national archives, libraries, literature production centres, language centres and bilingual schools • exploring some of the complexities and challenges involved in keeping oral traditions strong and understanding the role they can play in this process • documenting and storing texts they have created themselves in appropriate safe-keeping places

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 3 to 6 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages First Language Learner Pathway are generalised in order to cater for the range of languages that may be learnt as an L1 in the school context. The achievement standards will need to be adapted for use for specific Aboriginal and Torres Strait Islander languages.

By the end of Year 6, students use spoken and written language to share and compare experiences, personal perspectives and points of view on topics related to their immediate environment and personal, cultural and social worlds. They use appropriate ways of talking when interacting in different social situations and with different social groups, and apply principles and protocols of cultural safety when engaging with cultural property. Students participate in class discussion, asking questions to clarify content and to offer opinions and ideas and taking into account other perspectives. They locate, classify and compare information from a range of sources relating to Country/Place, community, culture, environment and past and present ways of living. They interact with Country/Place under the guidance of Elders and older family members, making and recording observations in different formats, reading signs, classifying natural objects according to Indigenous cultural categories and mapping key topographical features. They respond to stories, songs, dances and artistic expression by describing how events, characters and settings are depicted through sound, image and performance, by interpreting messages conveyed through these forms and by sharing opinions, responses and reactions. They understand that ownership of songs, stories, dances and designs is determined by traditional kinship and other social groupings, as well as by place, History and story. Students create, with the support of models, a variety of spoken, written and multimodal texts for different purposes and audiences. They use descriptive and expressive language to write narratives and expressive and imaginative texts, and to recount experiences. They use specialised language to present information on specific topics, for example by presenting research-based factual reports. They use procedural language, for example to explain how to prepare and cook food, how to make tools, decorate artefacts or play a game. They apply their grammatical and vocabulary knowledge and their understanding of spelling and punctuation conventions in a range of sentence and text types. They translate familiar texts, identifying and explaining culture-specific concepts and expressions. They create bilingual/multilingual texts for the school community on a range of topics. They explain the family basis of the kin and skin systems and their role in determining social behaviour. They elaborate their own positions and identities within these systems, explaining their roles and responsibilities with respect to caring for family, land/sea/water. They explain links between ceremonies, people, stories and ancestral areas of Country/Place. They identify places which have special significance to particular sub-groups in the community and which represent special bonds between people, place and story.

Students know that the language has its own rules for pronunciation, spelling and grammar and they apply this knowledge to predict the sound, spelling and meaning of new words and to create their own texts. They read aloud with developing fluency and intonation. Students use metalanguage to explain language features and elements, using appropriate grammatical terms and making comparisons with English and other known languages. They explain how language use is adjusted to suit different contexts, situations and relationships, for example, registers of deference and respect, avoidance language, speaking to the side, indirect references, generational differences and the use of silence. They provide examples of how languages change over time by identifying words borrowed from English and other languages, including words that are similar to or borrowed from neighbouring Indigenous languages. Students understand that Aboriginal and Torres Strait Islander languages are in various states of maintenance, development and revival and can explain some historical reasons for this. They recognise the importance of maintaining and strengthening Aboriginal and Torres Strait Islander languages for their community and for the broader Australian community and describe ways that language and culture have been maintained and strengthened in their community. They reflect on their own ways of communicating, discussing how these might be interpreted by others.

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 7 to 10

The nature of the learner, the pathway and particular language

Languages studied in the First Language Learner Pathway (L1) are typically used in spoken form as the language of everyday communication by whole communities across all generations.

Typically, but not exclusively, L1 programs will occur on Country/Place and will have constant involvement from a variety of speakers from the community. A key expectation in the L1 pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

Learners are typically Aboriginal or Torres Strait Islander children who have learnt the language from their families as a first language and continue to use it naturally at home and in social situations. Students may have varying skills in other languages, including varieties of English.

The curriculum content and achievement standards in the First Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a first language. They will need to be adapted when developing language-specific curricula, and will need to be modified for programs occurring off-Country.

At this level, students bring a range of learning strategies to their language learning. They are increasingly aware of the world beyond their own and are engaging with broader issues of youth and society, land and environment, education and identity, while establishing a balance between increasing personal independence and social responsibilities. They are considering their future pathways and choices, including how their own language could be part of these.

Language learning and use

Learners work collaboratively and independently, exploring different modes and genres of communication, with particular reference to their current social, cultural and communicative interests. They pool language knowledge and resources to plan, problem-solve, monitor and reflect. They create and present more complex and varied texts, for example, shared stories, songs/raps, blogs, reports and journal entries, and plan, draft and present imaginative and informative texts. They use vocabulary and grammar with increasing accuracy and complexity, drafting and editing written work to improve structure and to clarify meaning.

Learners continue to expand their vocabulary to domains beyond their personal experience and interests. They use a range of grammatical structures and language features to convey more complex ideas and experiences. They use descriptive and expressive language to create particular effects and to engage interest. They make connections between texts and cultural contexts, identifying how cultural values and perspectives are embedded in language and how language choices influence how people, issues and circumstances are represented. They are increasingly aware of the nature of the relationship between languages and cultures, noticing how family, community values and behaviours, such as familiarity, mutual obligation, reciprocity, respect, caring for Country/Place, are conveyed in the language.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team, while additional enrichment and authentication of the learning experience is provided through access to Elders and other speakers living in the community. Interacting with Country/Place to explore the environment and learn about Country/Place with Elders and other community members is essential to the learning of students at all stages.

Elders and community members may teach about gender-differentiated roles as encapsulated in language, working separately with male and female students as appropriate.

Students may also have some access to speakers in other regions through digital technologies and may have opportunities to participate in school excursions or camps.

Texts and resources

Country/Place and the community are the most important resources for learning. They are the origin of most of the texts and communicative situations that learners engage with.

Learners interact with a broad range of spoken, visual, written and digital texts, such as photographs, maps, oral histories, community texts such as posters from health clinics, community notices, songs, raps, dances, stories, painting and visual design, music, video clips and films.

They may also have access to community facilities and functions, such as the health clinic, art centre, coast patrol, local interpretative centre, community interpreters, and the office of the park ranger or land council.

Level of support

While learners at this level are less reliant on teacher support during interactions, continued provision of rich language input and modelled language are needed to consolidate and sustain their learning of the language in its extended spoken and written forms. The teacher provides both implicit and explicit modelling and scaffolding in relation to meaningful language use in a range of contexts, and explicit instruction and explanation in relation to language structures, grammatical functions, vocabulary and abstract cultural concepts. Opportunities for learners to discuss, clarify, rehearse and apply their knowledge are critical in consolidating language capabilities and in developing autonomy. Learners are encouraged to self-monitor, for example, by keeping records of feedback and through peer support, and to self-review and adjust language in response to their experiences in different contexts.

The role of languages

The language of study is the medium of instruction in First Language Learner Pathway classrooms. Other known languages play a complementary role, for example, when translating and creating bilingual/multilingual texts, and when comparing and contrasting writing systems, language structures, and language features and usage.

Years 7 to 10 Content Descriptions

Communicating	
Socialising	Elaborations

Discuss topics of interest to immediate and wider community, explaining, comparing, summarising and justifying points of view and responding to different perspectives.

[Key concepts: ways of talking, community issues, social, environmental, educational issues, aspiration, perspective;

Key processes: comparing, explaining, discussing, summarising, justifying]

(ACLFWC045)

- discussing their ways of interacting in a range of contexts and situations that involve different ways of talking, for example, using deferential speech styles with respected kin or authority figures and in relationships involving status, and more informal styles with friends and close family members
 - comparing personal reflections on shared experiences, such as visiting a metropolitan centre, a school excursion or a camp, noticing differences in their responses and perspectives
 - discussing community news items and events, such as local sport or celebrations, comings and goings of individuals and families, actions of community leaders, new infrastructure or extreme weather events, identifying facts from opinions and gossip and rumours from real events
 - discussing future learning and career pathways, comparing their aspirations and discussing and evaluating options
 - drawing on personal and community knowledge to participate in debates and discussions on social, environmental or educational issues that impact on their region/community, for example, effects of mining, farming, grazing or commercial fishing or tourism on community life, problems related to feral animals, endangered animals, introduced species, water quality, adequate infrastructure, public amenities, and health care, explaining and justifying points of view, and using strategies such as 'story' to make a point
 - canvassing differing opinions and perspectives on particular issues, for example, the challenge to traditional authority and transmission of knowledge posed by the technologies of literacy, the use of social media, the role of land councils in looking after Country/Place compared with traditional land and sea/water management practices, summarising arguments for or against particular points of view
 - critically analysing and discussing coverage in a range of news media of issues relating to Aboriginal and Torres Strait Islander communities
 - identifying and evaluating policies, actions and events that they believe contribute to the well-being of their community and other Aboriginal or Torres Strait Islander communities, explaining and discussing their findings
-

Plan, participate in and evaluate events and activities that involve taking shared action, negotiating and problem-solving and that draw upon personal and community knowledge
[Key concepts: event, managing different perspectives; Key processes: organising, persuading, deciding, negotiating]

(ACLFWC046)

- discussing plans for community initiatives, taking account of different participants' roles and relationships, and deciding on appropriate and effective ways of communicating with the people involved
 - designing a campaign or developing a persuasive audio-visual text to promote awareness and invite action on an educational, community, social, environmental or health issue, such as the importance of learning the language at school or the benefits of being bilingual/multilingual
 - negotiating and planning a familiar and routine event, such as an excursion, celebration or social media forum
 - negotiating arrangements and solving problems that arise during collaborative learning tasks, weighing up alternatives, negotiating and managing different opinions and perspectives and reaching shared decisions
 - participating in a simulated job interview as either the employer or prospective employee
 - working with Elders to make their own hunting and gathering tools, for example, fishing nets, spears, digging sticks, baskets, and explaining special ways of cooking, cutting and sharing traditional foods, performing hunting activities in ways that are appropriate to local cultural traditions, including the use of signs and gestures
 - considering options and reaching shared decisions when planning performances or presentations to showcase their language and cultural Law learning
 - collaboratively planning and presenting a short documentary, for example, on an aspect of community life, a community, an environmental or ethical issue, a good news story or a community or school achievement
-

Engage in inclusive and respectful discussion that involves commentary, analysis and reflection on shared experience, such as that of learning and using the language in the school setting

[Key concepts: reflection, encouragement, literacy, learning strategies, respect; Key processes: discussing, analysing, reflecting, justifying]

(ACLFWC047)

- reflecting on their experiences of giving oral presentations and considering ways to improve their delivery
- developing language to support and extend discussion and debate, for example, by inviting opinions or further elaboration, clarifying or justifying their own statements, responding to others' perspectives and using reflective language
- providing encouragement or critical feedback to others in constructive ways
- reflecting on the usefulness of particular learning tasks, discussing their comparative language and literacy development in the language and in English, and documenting their use of their language in school, for example, through recorded notes in a reflective journal
- identifying and comparing learning strategies that have supported the study of their language in the school context, for example, learning vocabulary and language structures associated with different domains of language use
- discussing the advantages of being literate in the language and being bi-literate or multi-literate
- developing the language of reflection

Informing

Elaborations

Investigate, analyse and synthesise information obtained from a range of sources on topics and issues related to their Country/Place and community

[Key concepts: change, social and environmental issues, community initiatives/ projects, health and well-being; Key processes: researching, investigating, interviewing, comparing, summarising]

(ACLFWC048)

- researching social and community issues from the past, evaluating and summarising information on selected issues, comparing them to issues that impact on present times and presenting findings, for example, writing a report, giving a presentation
- investigating how practices have changed over time, for example, those associated with trading, how things such as ochre, sea shells and pituri were traded traditionally; travelling outside one's country to trade; transitions from nomadic life to community settlements; changing land and sea management practices, such as the use of fire or waste disposal
- interviewing key individuals and listening to local history stories about, for example, the coming of the Europeans, land rights, stolen generations, summarising findings in note form
- explaining how language and culture help to promote sustainable care of the environment
- investigating and explaining land and sea management practices for different times of the year, for example, burning time, waterhole maintenance, sea grass watch, turtle tagging, comparing these practices to western practices
- investigating reasons for recent changes in elements of local ecologies
- identifying, explaining, and evaluating practices adopted to support the protection and reintroduction of endangered species
- developing a photographic record/portfolio of different animal and plant species with commentary/annotations to explain different parts and features, documenting and explaining the influence of seasonal changes and different uses
- seeking information from Elders to assist in classifying living things according to Indigenous taxonomy systems, comparing these systems with those used in western approaches to the study of living systems
- reflecting upon different ways that Indigenous and non-Indigenous people view land ownership and management, and on how such differences are reflected and realised in daily and seasonal practices, for example, firestick farming vs mechanised ploughing
- working with rangers to record the GPS locations of places
- giving a presentation of Country/Place by describing places and explaining how to get to various locations using directional and locational terms
- reading and viewing local media reports and interviewing community members to gather information about current or proposed community initiatives and projects, evaluating pros and cons and likely impacts on community and environment; for example, new roads through to mine sites, community internet access, the construction of a swimming pool, new buildings, arts productions that involve marketing and royalties

- researching social or environmental matters such as Indigenous Protected Areas, feral or endangered animals, using commentaries and information generated through community or media debates to construct and justify a personal position
 - gathering and presenting information about the nature of community roles and responsibilities, for example, by describing who has the rights for getting food from different places
 - researching and presenting biographies of significant identities from their community in oral, written or digital form
 - identifying, describing and evaluating various Aboriginal and Torres Strait Islander organisations that provide services to their community
 - describing and explaining a range of practices relating to food gathering, such as the division and distribution of food from a hunting trip, for example, the awarding and use of different cuts of meat, special ways of cooking, cutting and sharing traditional food
 - investigating community store options in relation to nutritional value, value for money, impact on health and sustainability, making comparisons with traditional options for sourcing food
 - researching, recording and reporting on traditional ways of preventing sickness and staying healthy, including finding and preparing bush medicines under the supervision of Elders
 - describing how bush medicines and traditional healing practices can be used in conjunction with medicines from other cultures, such as Western medicine and different natural therapies
 - researching and presenting findings on different aspects of a selected business operating in the community, for example, enterprises related to arts, bush medicine, bush food, tourism, transportation, animal husbandry
 - researching and evaluating community health programs, outlining what they see to be associated benefits and challenges, and making suggestions/recommendations for possible improvements or modifications
 - collecting and presenting evaluations of various programs, initiatives and policies that contribute to the health and well-being of community, and analysing the significance of environmental factors, identity issues and connection with land/sea, water culture and language in relation to such initiatives
-

Convey information about events, experiences or topics of shared interest, using different modes of presentation to suit different audiences and contexts

[Key concepts: audience, Country/Place, community life; Key processes: describing, explaining, creating, annotating, reviewing, persuading, reporting, presenting, referencing]

(ACLFWC049)

- writing a review/report or create a mock commentary of an event such as a football match, school camp, school dance or music festival, using expressive and specialised language
 - creating a short documentary to present information and stories, for example, about their school, their community, Country/Place and social and cultural events
 - planning, drafting and publishing informative and persuasive texts, selecting appropriate language, visual and audio features to convey information and ideas, raise issues, report events and advance opinions
 - designing websites, posters or presentations that include visual representations and supporting commentary
 - reporting on their own or others' experiences of events using formats such as personal recounts, blogs or digital/oral presentations
 - interviewing and writing a biography of a significant individual or group from their region, for example, a sportsperson, community leader/negotiator/spokesperson, musician, artist
 - creating texts such as blog posts, contributions to school newsletters or letters to local media on social and environmental issues, using persuasive and emotive language to gain support from others in the community
 - producing fact sheets or informative videos about a current issue, an historical event, an aspect of their Country/Place
 - compiling a portfolio of texts in a range of modes/styles/genres related to a particular concept, purpose or audience, for example, a class anthology of stories from the community, a collection of procedural texts, histories of the region, profiles of community identities, using supporting evidence, and quotes and appropriate referencing conventions,
 - planning, rehearsing and giving presentations, selecting and sequencing appropriate content and incorporating multimodal elements to either promote a particular point of view or to reflect diversity of viewpoints
 - writing an article for a local newspaper or a letter to the editor or local council in relation to a community issue, using examples, stories and quotations to explain and substantiate a particular viewpoint
 - creating an interactive presentation for younger children or for the community that highlights the benefits of maintaining and strengthening their own/home/first language
 - creating spoken, written or multimodal texts, such as identity maps, timelines, digital presentations or family trees with captions and commentaries that describe key milestones and significant life influences, such as people, events, educational experiences, community affiliations, travel experiences, visits away from Country/Place, shifting place of residence, and considering how these shape identity
-

Creating	Elaborations
<p>Interpret and respond to a range of texts, sharing and comparing personal views and reactions, describing, explaining and comparing aspects of artistic expression and how these relate to land, people, plants, animals and social and ecological relationships</p> <p>[Key concepts: representation, imagination; Key processes: interpreting, explaining, describing, discussing; Key text types: songs, raps, dances, traditional and contemporary stories, paintings and visual design, video clips, films]</p> <p>(ACLFWC050)</p> 	<ul style="list-style-type: none"> • explaining concepts such as social responsibility or knowledge of History portrayed through characters in traditional texts, discussing the relevance of such concepts and their portrayal in contemporary life • listening and responding to stories from Elders explaining how the actions of ancestral beings created the landscape of their Country/Place • interpreting and responding to texts such as songs, stories, films or video clips by recording key vocabulary and expressions, identifying and explaining main ideas, themes and sequences of events, and sharing personal views and reactions with others • interpreting and comparing representations of values, people and events in a range of traditional and contemporary texts in a range of environmental, social and ecological contexts • discussing how key messages and beliefs are communicated through stories and through performing arts and visual design, for example, comparing the role and representation of animals, people and landscapes through different texts and media • describing and explaining aspects of artistic expression, for example, traditional and contemporary paintings, design, dance, the different roles of social groups in relation to traditional song and dance, the use of favoured materials and processes in the making of artefacts or the construction of headdresses • listening to, viewing and sharing personal responses to popular contemporary music, interpreting and analysing lyrics and dialectical variations, comparing key messages, themes and styles of performance and considering how they incorporate commentary on social issues • viewing films, identifying and describing the ways they portray Country/Place through elements such as language features, images, soundtrack • discussing, debating, evaluating or reviewing a film or contemporary performance, justifying and comparing their individual opinions • listening to and viewing television programs, IndigiTUBE clips, contemporary songs, or raps, identifying elements that suggest either shifts in social or cultural attitudes from those reflected in traditional texts or evidence of continuing values and belief systems • telling the story of a painting rock art or etching in their own words, comparing their interpretations of the visual design, including the use of symbols and colours • providing a live commentary of a dance performance, interpreting movements, commenting on the significance of body art and adornments and interpreting key messages of the performance

Create a range of spoken, written and multimodal texts involving real/imagined contexts and characters

[Key concepts: imagination, journey; Key processes: creating, collaborating, performing, composing; Key text types: raps, songs, dances, performances, stories, cartoons, advertisements, digital texts, video clips, skits, paintings and visual designs]

(ACLFWC051)

- collaborating with peers to create their own dramatic or humorous representations of people, situations or events encountered in their own lives
- using aspects of texts in imaginative recreations, for example by re-situating a character from a contemporary text in a new situation
- creating a rap or skit, including in digital formats, to perform to their peers that provides commentary on a local social, environmental or community issue that is important to them
- creating and performing sketches that involve characterisation, context and dramatic tension, for example, interviewing a celebrity or sports star, or appearing on a television show
- composing, performing or presenting songs, jingles or advertisements to create new interest in existing or imagined situations, services or products
- creating own art work (visual and performing) to convey a message, using selected arts elements, visual design and conventions as appropriate
- taking on the role of a character from a contemporary story and responding to questions in-role, or interviewing a character from a contemporary story
- creating and presenting a radio segment for a community radio station, for example, an imaginary broadcast of a footy match, an interview with a sports star or celebrity, a community news or events flash
- composing expressive texts such as protest statements, personal letters or persuasive speeches that require careful use of emotive or powerful language, noticing how they select language or imagery and the basis for this selection
- creating a short visual text of an aspect of Country/Place, accompanied by a sound track containing music and sound effects from the region
- developing storylines, characters and settings that explore themes or concepts that are relevant to their own social worlds

Translating

Elaborations

Transcribe, translate and interpret texts from the language into other languages of the region and into English and vice versa, considering and explaining factors that influenced the translation from one language and discussing issues related to translating and interpreting

[Key concept: equivalence, representation, meaning, interpretation, ethics; Key processes: translating, interpreting, transcribing, comparing, explaining, analysing]

(ACLFWC052)

- translating and interpreting short texts from the language into other known languages including English and vice versa, comparing their translations of particular sentences or phrases with those of their classmates, noting variations and considering why these occur
 - translating and interpreting a range of texts, for example, narratives, stories, song lyrics, dialogues, posters, stories from the past, considering how to explain elements that involve cultural knowledge or understanding
 - discussing the nature of translation with reference to strategies such as decoding literal meaning (word-for-word), reading for meaning (sense-for-sense) and cultural reading (between the lines), and strategies such as back-translation
 - analysing published bilingual texts such as children's stories, health charts or song lyrics, and commenting on how well the translations have captured original meaning
 - critically evaluating the effectiveness and accuracy of subtitles for films, video clips or documentaries, finding examples of meaning 'lost in translation'
 - researching interpreting services in their area, for example, identifying services provided, the role of interpreters, qualifications required, ethical dimensions, and issues around interpreting and translating in specialised contexts, for example, in health, education or tourism
 - understanding and applying culturally appropriate and ethical behaviour when interpreting and translating, for example, explaining ways people should act in interpreting contexts and considering potential consequences of inaccurate interpreting
 - role-playing interpreting in a range of contexts, for example, healthcare, education, training programs, social services, administrative, Indigenous communications and media
 - researching the types of texts which are transcribed within the school and wider community, discussing reasons for this
 - transcribing a range of text types, for example, life histories, stories, information and procedures, explaining and following accepted procedures and protocols
-

Produce short bilingual/multilingual texts such as digital stories, comics, animations, blogs and contributions to community newsletters

[Key concepts: bilingualism, expression, interpretation; Key processes: creating, performing, designing, interpreting, annotating]

(ACLFWC053)

- creating bilingual/multilingual texts for the wider community, for example, creating subtitles, captions or commentaries for texts such as brochures, life histories, slide shows or video clips that inform the wider Australian community of significant aspects of their culture, community and personal identities
- interviewing community members about their life stories and experiences to create bilingual texts that incorporate photos, maps and timelines, stories and songs
- performing a role-play, skit, song or dance for a visiting student audience, using their language for the performance and English for supporting explanations and commentary
- creating a bilingual/multilingual display, for example, a photographic display to showcase shared events and experiences, such as a trip to other communities or to the city
- creating a bilingual information pack in print and/or digital form about their school and local region for a visiting school
- producing bilingual/multilingual fact sheets or informative videos about a current issue, historical event, aspect of their Country/Place
- creating a bilingual/multilingual video clip, for example, to express the importance of maintaining and developing their own language for themselves and for the community
- creating glossaries and annotations in English that provide explanations for cultural and contextual references in songs, stories and dance

Identity

Elaborations

Investigate, explain and discuss the relationship between kinship, Law, land, sea/water and sky

[Key concepts: identity, relationship, kinship, Law, connection, interrelatedness, rights, obligations; Key processes: exploring, discussing, investigating, describing, reflecting]

(ACLFWC054)

- exploring the concepts of connection and interrelatedness and discussing associated rights and responsibilities
- discussing kinship as it applies to adulthood and the resultant changes in practices, rights and obligations at this stage of life, for example, changes in ways of referring to people
- describing kinship connections they have with the surrounding region and communities
- understanding and discussing kinship as a system, and explaining its importance in maintaining and regulating social relationships
- investigating and discussing how social groups form patterns across generations and determine relationships and behaviours, such as those associated with marriage, for example, classificatory in-laws, ceremonial peers
- investigating how particular policies and practices affect the sense of individual and collective identity of Aboriginal and Torres Strait Islander peoples, for example, in relation to experiences such as language loss, separation from Country/Place/family/community, stolen generations
- reflecting on how Indigenous Australians from different nations express their group identity, for example, through practices and symbols such as flags, Welcomes to Country, Indigenous rounds in sporting leagues
- reflecting on how their biography, including family origins, traditions, beliefs, practices, interests and experiences, shape their sense of identity and ways of communicating
- discussing the link between identity and connections to land/sea/water, culture and language and the health and well-being of individuals and community

Describe and discuss the relationship between people, community and Country/Place, and how individuals and groups demonstrate connections to areas of land and sea/water and their rights and obligations with respect to those areas

[Key concepts: Country/Place, land, water, sea, sky; rights and obligations, responsibility; Key processes: discussing, reflecting]

(ACLFWC055)

- discussing with Elders how patterns of ownership and management of land, water, sea and sky and associated stories determine rights and responsibilities with respect to those elements
- reflecting on how the language links the local, regional and national identity of its speakers with the land, water, sea and sky
- talking about how family relationships are linked to looking after Country/Place

Investigate and discuss how connections between Law, story, ceremony, visual design, people and Country/Place are demonstrated and manifested in individual and community behaviour

[Key concepts: identity, Law, behaviour, story, ceremony, guidance; Key processes: investigating, explaining, discussing]

(ACLFWC056)

- investigating and explaining the connections between rules, Law and kin systems, and how these can be demonstrated through visual design and performing arts
- discussing Law for behaviour associated with cultural practices and traditions, for example, birth, naming and funeral ceremonies
- learning from Elders different roles and responsibilities associated with ceremonies that are determined by kinship and social groupings
- listening to and receiving guidance from Elders on how ceremony, place and Law and are connected through kinship, story and cosmology and how they are demonstrated in community behaviour
- discussing how stories and songs often link neighbouring Aboriginal and Torres Strait Islander groups and nations

Reflecting

Elaborations

Reflect on the relationship between language, culture and identity, and how this shapes and reflects ways of communicating and thinking

[Key concepts: intercultural experience, perspective, insight, self-reflection; Key processes: comparing, analysing, discussing, explaining, reflecting]

(ACLFWC057)

- finding examples of interactions which are more appropriate in their own language than in English or vice versa, for example, using their first language to talk about community activities, family relationships, social and cultural activities, using English to talk about school work, excursions to other regions, towns, and considering why this is the case
- monitoring and analysing their use of their own language(s) and English in different domains of language use, for example, by keeping a record of when they use each language for different functions or in different contexts
- identifying and reflecting on instances when using both their own language and English in the same interaction makes for easier communication, and sharing their reflections with others
- discussing the different things they need to consider, change and accommodate when interacting with speakers of different language backgrounds, for example, watching for signals of misunderstanding, being mindful of different perspectives and traditions
- comparing how their relationships with people of different generations, gender and language backgrounds influence their ways of communicating
- reflecting on intercultural learning at school and intercultural experience in and out of school
- reflecting on the experience of using the language in the school context, for example, by identifying elements of experience that provide new challenges, such as having to adopt the full form of language as opposed to young people's talk or regional varieties at home
- discussing the concept of shared responsibility as it applies to intercultural communication, considering how effective interaction and exchange involves elements of noticing, analysing, reflecting, responding and adjusting
- identifying 'repair and recovery' strategies that can be used to respond to miscommunication between speakers from different languages and cultural backgrounds, for example, self-correction, apology, asking for repetition and clarification, rephrasing
- sharing and comparing cultural and intercultural experiences, and exchanging views on the benefits of speaking more than one language, such as having a larger vocabulary to draw on, additional insights and perspectives and opportunities for new/different experiences
- identifying and comparing how emotions or attitudes such as respect, shyness, exuberance or embarrassment are shown/displayed across different languages and cultures

Understanding

Systems of language

Elaborations

Understand and explain sound patterns in the spoken language, representing these patterns with an expanding repertoire of written symbols and conventions
[Key concepts: sound system, writing system, intonation, rhythm, punctuation, conventions; Key processes: listening, recognising, analysing, comparing, reading aloud, transcribing]

(ACLFWU058)

- reading aloud extended text to show flow of ideas
 - understanding the conventions adopted when citing others in language written for wide readership, and different ways of referencing these
 - editing their own texts for word-choice, spelling, grammar and punctuation
 - recognising how quotation marks may be used to mark parts of text as having special status, for example, quoted (direct) speech, and experimenting with the use of this device in own writing
 - comparing speech-sound constraints in different languages, for example, sets of vowel and consonant phonemes, allowable combinations of sounds, rules for word stress
 - describing the articulatory basis of speech sounds in their language(s)
 - developing a metalanguage to describe and talk about sounds and phonology, for example, *place and manner of articulation*, *intonation*, and *word and sentence stress*
 - understanding the major place of articulation categories in Aboriginal and Torres Strait Islander languages, for example, peripheral, laminal, apical, and their realisation across different languages and regions in Australia
 - recognising phonological affinity in related languages that use differing spelling systems
 - using their expanding knowledge of alphabetic conventions to transcribe speech sounds, syllables and words from a wide range of languages
 - comparing published phonology charts for a variety of different languages, noting the associated writing systems
 - transcribing complete texts of spoken language, using a range of alphabetic and punctuation conventions, supported by their grammatical and vocabulary knowledge of the language
 - comparing and explaining the internal consistency of spelling systems for Aboriginal and Torres Strait Islander languages and English
-

Develop and use (meta)language to analyse a range of grammatical structures in their language(s) and English
[Key concepts: system, grammatical case, affixation, transitivity, particles, metalanguage; Key processes: explaining, discussing, making comparisons and connections]

(ACLFWU059)

- explaining the full range of case marking in their language(s), such as the sharing of several case functions by single markers, the use of different markers for the same function
- discussing the use of case and gender in English pronouns, comparing with their language
- identifying and explaining how verbs are derived from nouns
- explaining how references to people, places, things and events may be varied and modified by using extra words, or particles, or by using affixes, for example, expressions for 'having', 'for want of', 'similar to', 'like', and the various forms of negation
- analysing and explaining the delineation of time, manner, attitude and place in their language(s), for example, temporal expressions such as 'beforehand', 'afterwards', 'too late', 'originally', and attitudinal elements such as 'ought to', 'I wish', and terms expressing endearment or disavowal
- explaining issues of agreement with transitive and intransitive verbs, including devices such as embedding and serialisation
- discuss the differing treatment of transitivity in the language(s) and in English
- making comparisons and connections within and across languages, for example, case systems used within different languages in Australia and elsewhere, the use of tense markers in verbs
- demonstrating the main topical areas of the vocabulary, for example, groupings of natural species, cardinal directions, kinship systems, and contrasting these with English
- discussing relationships between their language and languages of the region, for example, common words and structures
- discussing some contrasts between their own language and English in relation to grammar, discourse structure and figurative use of language

Investigate the ways people communicate using spoken, written and visual modes and analyse the form and structures of a range of texts, including their use, role and relationship to other social processes

[Key concepts: text, relationship; Key processes: analysing, investigating, linking and sequencing]

(ACLFWU060)

- analysing a range of texts, their role, use and relationship to other social processes, for example, in respect to declaring identity, acknowledging traditional belief systems, acknowledging ancestors, passing on knowledge and information, mapping resources on Country/Place and managing natural phenomena such as weather
- discussing ways songs function to fix language and meaning in ways similar to literature in other cultures
- investigating the use of sign language in their community and its relation to spoken language
- applying principles of text organisation when developing both oral and written texts to develop or present ideas, noticing differences in characteristic features of oral and written discourse
- linking and sequencing ideas to form a cohesive text, using appropriate grammatical forms and language features, for example, serialisation, connectives, embedding, headings and paragraphs
- experimenting with language appropriate to particular text types, such as descriptive language in documentaries, reflective language in diary and journal entries and persuasive language in advertisements

Language variation and change

Elaborations

Analyse variations in language use that reflect different social and cultural contexts, purposes and relationships

[Key concepts: respect, silence, kinship, body language, code-switching; Key processes: examining, explaining, analysing]

(ACLFWU061)

- explaining how elements of communication, such as gestures, facial expressions, choice of language and use of silence, vary according to context, situation and kin relationships, for example, eye contact, pointing with lips
- analysing the constraints that guide language use, for example by identifying and explaining why words become taboo, for example, the use of *Kumunjayi* and other word substitution as part of sorry business
- recognising that there are specific ways of communicating that are associated with particular relationships and situations, for example, ways of behaving during sorry business, public events or meetings, topics only suitable for young fellas and girls, use of hand signs and body language, such as speaking to the side, using indirect references, silences, gestures or eye contact
- distinguishing different registers of language, for example, language of ceremony, mother-in-law language, talk used when communicating with older people
- analysing intergenerational differences in language use, for example, young people's language when talking about popular culture, the strong 'right through' language of the older generation
- explaining variations in language use that reflect different levels of formality, authority and status, for example, ways of talking to Elders at formal community events compared to everyday interactions
- understanding connections between land, language and culture which are expressed by shifting/switching between languages and varieties of language, for example, differences between parents' clan languages

Understand that languages and cultures change continuously due to contact with one another and in response to new needs and ideas, popular culture, media and new technologies

[Key concepts: contact, change; Key processes: exploring, observing, reflecting]

(ACLFWU062)

- exploring forms, usage and history of contact languages in their broader region, including creoles, pidgins and Aboriginal Englishes
- observing changes to language that reflect changing lifestyles, cultural trends and emerging needs, for example, youth language, new technologies, language associated with music, media and technology
- reflecting on changes in their own use of their language over time, noticing how and when new ways are adopted or existing ways adapted

Language awareness

Elaborations

Investigate and compare the ecologies of Aboriginal and Torres Strait Islander languages with indigenous languages in other countries, and consider issues such as languages policy, language rights, language loss, advocacy, reform and multilingualism

[Key concepts: environment, boundaries, policy, revival; Key processes: researching, investigating, exploring, considering]

(ACLFWU063)

- investigating the geographical location of the language and the number of its speakers historically and in contemporary times
- considering what might be future challenges facing their language in the context of its current linguistic ecology
- exploring the use of English, Aboriginal English and creoles in their community
- researching the impact of historical events, government policies, legislation and judicial processes, such as stolen generations, mission schools and advocacy on Aboriginal and Torres Strait Islander languages
- identifying social and government policies and practices linked to particular geographical regions that have impacted positively on language acquisition, for example, the performing of Welcome to Country and the Acknowledgement of Country at events, on television programs and in films, efforts to raise the profile of Aboriginal and Torres Strait Islander languages in the wider Australian community
- investigating the situation of indigenous languages in other countries, for example, New Zealand, Hawaii, North America, Japan, Latin America, considering issues such as language rights, language endangerment and revival and reclamation efforts, drawing comparisons with the situation of Aboriginal languages and Torres Strait Islander languages in Australia
- understanding how the process of language-building expands existing linguistic and cultural resources in the Australian community
- investigating and comparing the ecologies of Aboriginal and Torres Strait Islander languages with those of Indigenous languages in other countries, considering issues such as languages policy, language rights, language loss, advocacy and reform and multilingualism

Understand and apply cultural norms, skills and protocols associated with learning, using and researching Aboriginal and Torres Strait Islander languages

[Key concepts: ownership, protocols, ethical behaviour; Key processes: acknowledging, investigating, applying]

(ACLFWU064)

- acknowledging the cultural and intellectual property rights and copyright of the sources of their language work
- understanding that permission and consent of the owners of languages must be sought by others when visiting their Country/Place
- accessing, eliciting, recording and storing information appropriately according to cultural norms/mores

Role of language and culture

Elaborations

Reflect on how ways of using language are shaped by communities' ways of thinking, behaving and viewing the world, and the role of language in passing on knowledge
 [Key concepts: Indigenous knowledge, values transmission;
 Key processes: reflecting, exploring, analysing, comparing]

(ACLFWU065)

- explaining the role of language in relation to culture and identity, and in passing on knowledge, such as sustainable care of the environment, rules for living, ways of behaving, spiritual and cultural functions and History
- reflecting on the way their culture divides the natural and cultural world and comparing these to other systems such as other indigenous systems and western systems
- analysing concepts related to cultural values in their language, for example, naming systems, kinship terms, nicknames, substitute words and pronoun systems, comparing to practices in other languages and cultures
- exploring how language is important in maintaining traditional culture and society in relation to Aboriginal and Torres Strait Islander peoples and to all Australians
- analysing and discussing core cultural concepts reflected in Aboriginal and Torres Strait Islander languages, such as respect, avoidance, reciprocity, obligation, responsibility
- understanding that culturally significant attitudes and beliefs conveyed through language are related to the past, and to land, flora and fauna and ceremonies
- considering how they use conversational strategies to avoid disrespect, such as using indirect language
- drawing on their own experiences of using their own language(s) and English in different contexts to consider how language can be either empowering or disempowering and inclusive or exclusive
- identifying and comparing how emotions or attitudes such as respect, shyness, happiness or embarrassment are expressed across different languages and cultures
- recognising that there are multiple views on and partial explanations for events and issues
- reflecting on the ways culture is interpreted by others, for example, by identifying how stereotypes influence ways of thinking

Role of language building

Elaborations

Investigate programs, initiatives and techniques that keep Aboriginal and Torres Strait Islander languages strong
[Key concepts: language maintenance and development; Key processes: discussing, exploring, investigating, evaluating, language building, language engineering]

(ACLFWU066)

- analysing the domains of language use where language building has occurred, considering why this is the case and investigating some of the techniques used, for example, language engineering, adapting sounds, coining new words
- understanding the importance of intergenerational collaboration and transmission in keeping languages strong and discussing some of the associated challenges
- investigating programs and initiatives that serve to maintain and strengthen language use, for example, school languages programs, bilingual education, research programs, recording and archiving of material, websites, databases, documentaries, language nests and Master-Apprentice programs
- exploring the role and importance of advocacy in supporting the maintenance and development of language and culture
- identifying keeping places for language texts, for example, in the community or national archives
- understanding the importance of strong and viable Aboriginal and Torres Strait Islander languages for Indigenous and non-Indigenous Australians alike
- considering domains where their language may grow in the future
- understanding their role as contemporary documenters and users of the language, for example, by interviewing Elders and transcribing stories, reminiscences, advice, ways of doing things, rules for living

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 7 to 10 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages First Language Learner Pathway are generalised in order to cater for the range of Aboriginal languages and Torres Strait Islander languages that may be learned as an L1 in the school context. The achievement standards will need to be adapted for use for specific Aboriginal and Torres Strait Islander languages.

By the end of Year 10, students use written and spoken language to communicate with the teaching team, peers, Elders, community members and others in a range of settings and for a range of purposes. They use language to access and discuss information on a broad range of social, environmental, educational, cultural and community issues. They summarise and justify points of view, and respond appropriately to the opinions and perspectives of others using reflective language. They use strategies to initiate, sustain and extend discussion by inviting opinions, elaborating responses, clarifying and justifying statements with supporting evidence. When interacting in different social situations and with different social groups, students use appropriate ways of talking, for example, using appropriate speech styles with respected kin or authority figures and in situations involving seniority and status, and more informal styles with friends and close family members. They use respectful language to negotiate, problem-solve and to manage different opinions and perspectives and to reach shared decisions in collaborative tasks. Students investigate, analyse and evaluate information from a range of sources and perspectives on topics and issues related to their Country/Place and community; they present their findings using different modes of presentation to suit different audiences and contexts. They employ effective presentation strategies, including degrees of directness and length of utterance appropriate to the situation, and an appropriate restatement in accordance with spoken norms or developing written styles. They summarise main ideas and include varying amounts of supporting detail. They apply appropriate cultural norms and protocols when learning, using, recording and researching Aboriginal languages and Torres Strait Islander languages, and when engaging with cultural property. Students respond to stories, songs, dances and forms of artistic expression by describing main ideas, key themes and sequences of events and explaining how these relate to land and water, sky and weather, plants and animals, and social and ecological relationships. Students create a range of informative, persuasive, and procedural texts, as well as texts based on real and imagined experiences, in written, spoken and multimodal forms, such as reviews, reports, stories songs, conversations, brochures, blogs, and procedures for traditional activities. They use appropriate vocabulary and grammatical forms to link and sequence ideas to form meaningful texts, for example, serialisation, connectives, embedding; and apply typological conventions such as headings, paragraphs, fonts, formatting. Students apply culturally appropriate protocols and ethical behaviour to create, transcribe, translate and interpret texts, providing alternative expressions when equivalence is not possible and explaining elements such as language choice and variation due to dialect or register. They analyse and compare translations and interpretations of texts, explaining factors that may have influenced the translation/interpretation. They understand their role as contemporary documenters and users of the language, for example, by interviewing Elders and transcribing stories and placing them in safe-keeping places. Students explain how the kinship system maintains and regulates social relationships, and provide examples of how connections between Law, Lore, story, ceremony, visual design, people, and Country/Place are reflected in individual and community behaviour. They describe how individuals and groups affirm connections to areas of land and water and to individual places. They explain the rights and obligations associated with these connections and how these contribute to individual and social identity and a patterning of community roles. Students identify the relationship between language, culture and identity, describing how personal and community identity are expressed through cultural expression and language use. They reflect on their own ways of communicating, discussing how these might be interpreted by others.

Students use metalanguage to describe isolated speech sounds and the phonology of languages as a whole, and to analyse a range of grammatical structures in the language. They edit their own work and use appropriate conventions to cite others and to reference external information. They explain variations in language use that reflect social and cultural contexts, purposes and relationships, different registers of use (for example, mother-in-law language), intergenerational differences, and constraints that guide social interactions, such as word avoidance and substitution. They provide examples of how languages and cultures change continuously due to contact with one another and in response to new needs and ideas, popular culture, media and new technologies. Students make comparisons between the ecologies of Aboriginal and Torres Strait Islander languages and indigenous languages in other countries, in areas such as language policy, language rights, language loss, advocacy and reform, language revival and multilingualism. Students identify factors that serve to maintain and strengthen language use such as intergenerational collaboration and transmission, programs and initiatives in school and community, and explain associated challenges. They demonstrate their role as contemporary documenters of the language, for example, by interviewing Elders and transcribing stories, reminiscences, advice, ways of doing things, rules for living, and by placing documents in safe keeping places.

The Australian Curriculum Languages - Framework for Aboriginal Languages and Torres Strait Islander Languages Language Revival Learner Pathway (LR) - Years F–10 Sequence

Framework for Aboriginal Languages and Torres Strait Islander Languages

Foundation to Year 2

The nature of the learner, the pathway and particular language

The Language Revival Learner Pathway (LR) provides opportunities for students to study Aboriginal or Torres Strait Islander languages being revived by their owners or custodians and which are in various stages of revitalisation, renewal and reclamation.

LR covers a much broader range of language types and ecologies than either L1 or L2, and the vast majority of Aboriginal languages and Torres Strait Islander Languages are included in the LR category.

Schools offering the Language Revival Learner Pathway (LR) will most likely be located broadly within the geographical region of the language and culture, sometimes in towns and cities, other times in rural and remote regions. Classes will likely include students who relate closely to the language and culture, as well as students with varying degrees of affiliation with the language and culture, and some students who have no connections with either the language or culture. A key expectation in the LR pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

The Language Revival Learner Pathway draws on the Australian Indigenous Languages Framework (AILF) and takes into account key variables such as: how much is known about and documented for the language; the extent to which it is languages used or remembered, ranging from languages no longer spoken (owners often use the term 'sleeping') to those spoken fluently by members of the older generations; and the extent to which it has been reintroduced into the community of owners and custodians.

These variables give rise to the following broad categories of language revival:

- **Language Revitalisation** : where there are fluent L1 speakers (typically members of the older generation) but where the intergenerational transmission of the language has been interrupted. Younger generations may understand some of the language and may use some words and phrases but do not speak it as their first language. Examples of revitalisation languages include Walmajarri in the Kimberley, Yindjibarndi in the Pilbara, Meriam in the Torres Strait, Dyirbal in north-eastern Queensland, Wubuy (Nunggubuyu) in Arnhem Land, and Adnyamathanha (Yura Ngawarla) in the Flinders Ranges.
- **Language Renewal** : where there are a number of adult speakers who use the language to varying degrees in the community, but not 'right through', and where there are other language resources to draw upon. Examples of languages being renewed include Noongar in south-west Western Australia, Gumbaynggirr on the north coast of New South Wales, Ngarrindjeri on the Lower Murray Lakes in South Australia, Djabugay in the Atherton Tablelands in northern Queensland, and Yugambeh in southern Queensland.
- **Language Reclamation** : where language revival, by necessity, relies primarily on historical documentation of the language in the absence of active community knowledge of it. Examples of reclamation languages include Kurna from Adelaide, Narungga from the Yorke Peninsula, Dharuk or Eora (Iyora) from Sydney, Yuwibara from central Queensland, Wemba-Wemba and Woiwurrung from Victoria, and Awabakal from the Newcastle area in New South Wales.

A number of factors and variables will need to be considered when planning for a language revival curriculum or program, and further information on these is presented in the context statement for this pathway and in the section Using the Framework.

Children enter the early years of schooling with established communication skills in one or more languages and varying degrees of acquisition of early literacy. Learning typically focuses on learners' immediate world of family, home, school, friends and local environment. They are learning how to socialise with new people, share with others, and participate in structured routines and activities at school.

Language learning and use

The language is learnt in parallel with English language and literacy. Learning in the two areas progresses at very different levels, but each supports and enriches the other.

As the program is likely to be on Country/Place, links can be made to local places of significance, local families, and local histories.

The language is used as much as possible in classroom interactions, routines and activities, supported by the use of visual and concrete materials, gestures and body language. At this stage, there is a focus on play and imaginative activities, games, music, movement and familiar routines, which provide scaffolding and context for language development.

Oral language is developed through listening to the sounds, shapes and patterns of the language, through activities such as rhymes, songs, clapping and action games, and through imitating and repeating sounds in aural texts and as modelled by the teaching team, visiting Elders and community speakers.

Learners experiment with simple formulaic expressions, single-idea phrases and with one- or two-word responses to prompts and cues. As they progress to using language for interactions such as greetings, asking for help, talking about self, friends and family, or asking and answering questions, they notice that language behaves differently in different situations. Creative play provides opportunities for exploring these differences and for using language for purposeful interaction.

Students learn about Country/Place and community by interacting with Elders and community members, by exploring Country/Place, and by engaging with stories, songs and other texts such as videos, maps, and pictures. They learn about the concepts of kin and social groupings.

Students learn to use appropriate respect terms and to demonstrate respectful and appropriate behaviour when interacting with Elders, community speakers and community texts. Learners for whom the language is their heritage language develop a stronger sense of their own group and individual identity through the study of the language and culture.

Students learn to recognise letters that represent the sounds of the language. They write by tracing and copying, forming letters legibly. They learn to read and write words and sentences independently, using modelled language, for example, matching pictures with single words, labels and captions. The use of repetition and recycling in instruction helps children to identify high-frequency words and simple phrases and to recognise the purpose and intention of simple texts.

Students begin to understand how the language works, and compare it with English and other known languages. They understand its place in the context of broader regional and national language diversity. They learn about their role in developing resources for the language, for example by working with the community language team to create new games and songs in language, understanding how such efforts support the language to grow.

Contexts of interaction

Across Foundation to Year 2, learning occurs largely through interaction with peers and the teaching team, supplemented by some access to Elders and others affiliated with the language for additional enrichment and authentication of the learning experience. Interacting with Country/Place and exploring the environment with Elders and other community members is essential to language learning at all stages, but is particularly important during this early establishment phase, when learning is grounded in the familiar and understanding of language as lived experience is so important.

Texts and resources

Country/Place and its associated community are the most important resources for learning. They are the origin of most of the texts children engage with.

Texts include a variety of spoken, visual, written and digital resources, which are short, clearly structured, and supported by visuals and paralinguistic elements such as tone of voice, facial expression, body gesture. They include repetition and recycling of structures and vocabulary. Children listen and respond to teacher talk, share ideas and join in with songs, stories and different forms of play, performance, conversations and other language-mediated activities. Print and digital texts include word lists, place names, stories, shared Big Books, songs, photos, videos, environmental maps and wall charts. Teacher-generated materials include games and items from the community and local environment. Some texts involve English or another community language in a complementary role, filling in for items or expressions that have not yet been reconstituted in the language. Other texts will be bilingual, with no mixing of languages.

Level of support

Learning is supported via the provision of experiences that are challenging but achievable with appropriate scaffolding and support. This involves modelling, monitoring and moderating by the teacher; provision of multiple and varied sources of input; opportunities for revisiting, recycling and reviewing learned language; and continuous cueing, feedback, response and encouragement.

The role of languages

Learners are encouraged to use the language whenever possible in class interactions and daily routines with the teaching team, Elders and community members. Maximal use of the language will increase learners' language proficiency and enhance the language revival process.

English and other known languages are used for explanation and discussion, allowing learners to talk about differences and similarities they notice between the language and their first language(s) and culture(s), to ask questions about language and culture, to consider how they feel when they hear or use the language, and to talk about how they view different languages and the people who speak them. This introduction to the 'meta' dimension of intercultural learning develops the ability to consider different perspectives and ways of being as mediated by language.

For revival languages that are at the 'beginning' end of the revival spectrum, English or another community language might be used in a complementary fashion, for example, to fill in for missing words or expressions. Alternatively, language owners and the community in general may decide to side-step these gaps altogether, thus avoiding the need to use other languages for these purposes.

Foundation to Year 2 Content Descriptions

Communicating

Socialising

Interact with each other, the teaching team and visiting Elders/community members, using language and gestures to greet and talk about self and family
[Key concepts: self, family and relationships; Key processes: interacting, sharing]

(ACLFWC130)

Elaborations

- participating in everyday exchanges, such as greeting and leave taking
- interacting with the teaching team and visiting Elders/community speakers, using appropriate protocols such as respect terms, behaviour and forms of address
- introducing and describing self, family, friends, favourite objects and pets, using familiar and modelled language, supported by visual props such as drawings, photos
- listening to questions (such as *what*, *who*, *where*) about self, family, friends and immediate environment and responding with words and actions, including gesture

Participate in guided group activities, such as games, songs and simple tasks, using movement and gestures to support understanding and to convey meaning

[Key concepts: cooperation, play; Key processes: turn-taking, matching, choosing, cooperating, following instructions]

(ACLFWC131)

- participating in games, tasks and activities that involve turn taking, guessing, matching and choosing objects using modelled questions and responses
- participating in action games and songs by matching actions to words
- following instructions by moving around or locating objects in the classroom
- accompanying Elders to gather traditional materials, such as nuts, twigs, bark, seeds, shells for use in craft related language activities
- working collaboratively on a class performance or activity
- working collaboratively to adapt and perform action songs, for example, by changing lyrics, substituting words and phrases based on modelled patterns, rehearsing and performing songs with appropriate gestures and actions
- grouping and sorting natural objects from Country/Place, for example, leaves, stones, shells according to culturally appropriate categories

Interact in classroom routines and respond to teacher instructions

[Key concepts: routine, instruction; Key processes: participating, responding, following instructions]

(ACLFWC132)

- participating in routine exchanges, such as, asking and answering questions, responding to the class roll, describing the weather, requesting classroom objects, participating in school and class creeds/affirmations
- responding to and using routine classroom language, for example, 'sit down', 'stand up', 'listen!' 'look this way', 'tidy up'
- following instructions in language related to transition activities, for example, 'form a circle', 'get into groups of three', 'put on your hat', 'line up'
- responding to requests and instructions in verbal and non-verbal ways, such as movement, gesture and action, for example, in class and outdoors, in games and songs, or on visits and excursions

Informing

Elaborations

Discover key information about Country/Place by exploring Country/Place and listening to stories from Elders and community members

[Key concepts: natural and built environment, community life, Indigenous knowledge; Key processes: listening, observing, identifying, sorting, matching, labelling]

(ACLFWC133)

- discovering places in the local area that have Indigenous names, such as streets, suburbs, parks, rivers, public institutions
- visiting Country/Place to identify and name key topographical features, for example, creeks, springs, rocky outcrops, estuaries, reefs, desert landforms, taking photos and labelling them to create a class book
- listening to Elders/community members sharing knowledge about Country/Place, identifying and recording key words and vocabulary
- identifying, naming and labelling salient features of the built environment, for example, dwellings, public buildings, school, places to play, ports and roads
- recording the weather and seasons of the Country/Place throughout the year in a picture diary or through a series of captioned paintings, including the seasonal behaviour of animals and what plants grow in particular seasons
- naming, labelling and sorting into culturally appropriate categories elements from the environment such as bush foods, animals, plants and natural objects, classifying in terms of distinctions such as, edible/non-edible, meat/non meat, salt water/fresh water, day/night animals, rough/smooth, hard/ soft,
- learning to read Country/Place with Elders' guidance by looking for signs such as animal tracks and fruit fall, migratory birds, turtle tracks, animal behaviour, fresh diggings around a lair, appearance of whales
- locating specific words and familiar phrases in texts such as charts, lists, photos, maps, and using the information to complete guided oral and written tasks
- naming, labelling, drawing and matching outside body parts
- learning and using vocabulary and expressions related to healthy living and eating

Give factual information using simple statements, gestures and captions

[Key concepts: Country/Place, community life; Key processes: labelling, describing, presenting, recounting]

(ACLFWC134)

- using some location terms to talk about the Country/Place for example, *up, down, near, far* and using topographical words such as *swamp, soakage, reef*
 - presenting information about elements associated with Country/Place, for example, animals, plants, food, artefacts, using modelled sentences, matching captions to pictures and filling-in-gaps activities
 - contributing to a shared recount about an event such as sports day, an excursion, a class visit from an Elder, a visiting performance group from the Country/Place, a community celebration, for example, by making a Big Book, creating a display, digital presentation or class photo story
 - labelling aspects of daily routines, selecting captions or attaching word bubbles and sharing information with others
 - developing a pictorial story to describe activities and routines at home, at school, in the community
-

Creating	Elaborations
<p>Participate in shared listening to, viewing and reading of texts and respond through singing, miming, play-acting, drawing, action and movement</p> <p>[Key concepts: storytelling, response; Key processes: responding, performing, sharing, expressing; Key text types: songs, dances, stories, paintings and visual design, video clips (IndigiTUBE)]</p> <p>(ACLFWC135)</p> 	<ul style="list-style-type: none"> performing songs or stories that include repeated phrases, rhythms and non-verbal forms of expression, such as clapping, gestures, facial expressions and dance participating in shared reading of stories, responding through mime captioned drawings, dance, play-acting and other forms of expression visiting important sites on Country/Place and listening to Elders/community members tell stories, and responding by drawing, labelling, re-enacting with puppets, props or actions identifying key animals, birds and other characters in stories, songs, performances and dances listening to Elders/community members tell stories and identifying which stories belong to which natural features in their region/Country/Place, including animals and natural species and recognising their significance identifying and naming significant places, landscapes and topographical features on Country/Place through which travelling stories/storylines pass identifying key messages expressed in stories, song, dance and visual art, for example, rules for living predicting the content/meaning of narrative texts such as picture books, including titles, covers and illustrations, and giving reasons for their predictions responding to simple questions about characters and events in imaginative and expressive texts such as stories, songs, dances
<p>Create and present shared stories, songs and performances, using familiar words and patterns and support materials</p> <p>[Key concepts: story, performance; Key processes: retelling, singing, re-enacting, dancing, drawing, performing; Key text types: songs, dances, stories, paintings and visual design, performances]</p> <p>(ACLFWC136)</p> 	<ul style="list-style-type: none"> making a shared Big Book based on an event, experience or performance, labelling, captioning and drawing key elements creating own stories by sequencing a series of pictures with captions or by creating a storyboard with labels, using modelled language and repetitive phrases re-enacting or retelling simple stories, episodes or interactions, using puppets, props, actions or gestures and modelled language creating digital texts based around familiar contexts and characters using images and captions creating their own songs/raps, or new versions of contemporary songs/raps by substituting words and phrases such as animal names, places, geographical features, adding elements such as characters or places, incorporating non-verbal supporting elements such as clapping, gestures and facial expressions creating dances, paintings and visual designs appropriate to the Country/Place
Translating	Elaborations

Translate frequently used words and phrases, using visual cues and resources such as word lists

[Key concepts: similarity, difference, meaning; Key processes: translating, noticing, identifying, explaining]

(ACLFWC137)

- using classroom resources such as word banks/lists, wall charts, visual dictionaries, and pictures to translate the meaning of single words and common expressions
- playing matching-pair games using everyday words and expressions from the language and from English
- translating and explaining in English the meaning of words, phrases and gestures used in everyday contexts and situations
- noticing elements of the language that are the same in English, such as the alphabet and some sounds
- explaining symbols and their iconographies

Create simple oral, print or multimodal bilingual texts for the classroom environment, such as captions, signs, labels and wall charts

[Key concepts: meaning, bilingualism; Key processes: labelling, captioning, displaying, matching]

(ACLFWC138)

- creating bilingual picture word lists, dictionaries, and class reference books of words and their meanings
- creating bilingual texts for the school community, such as signs or notices
- performing presentations for the school community that involve elements from the language and from English, such as a contribution to an assembly or a performance for Grandparents' Day
- creating bilingual resources for classroom learning activities, such as sets of word cards for matching games
- writing captions for a photographic display to show parents/others about a class event or experience, such as sports day or caring for the environment activities

Identity

Describe aspects of self, such as family, school/class and language/s spoken, considering how these contribute to their sense of identity

[Key concepts: identity, self, family, belonging; Key processes: describing, explaining, identifying]

(ACLFWC139)

Elaborations

- describing self and their family, for example, by drawing pictures of immediate family members or creating a family tree and labelling it with appropriate kinship terms
- identifying self in relation to different groups, such as family, class or peer group, and representing these relationships through drawing captioned pictures, photos or digital presentations (Aboriginal and Torres Strait Islander students may be able to depict their totems/moieties and other affiliations)
- exploring the idea of collective identity through symbols and practices such as Aboriginal and Torres Strait Islander flags, items of dress, use of colours and patterns
- noticing and comparing their own choices and use of words or expressions from different languages when communicating in English
- recognising the relationship between language, place and family in the formation of identity in Aboriginal and Torres Strait Islander communities

Reflecting

Elaborations

Notice how using different languages involves some different ways of communicating and behaving

[Key concepts: language, culture, similarity, difference, respect; Key processes: noticing, comparing, responding]

(ACLFWC140)

- capturing and sharing their impressions when singing songs, dancing, reading stories or playing games in the language, for example, by responding to teacher prompts in language or English, such as, *What do you hear? What do you see? What do you notice about...? Why do you think that? How is this similar/different to...?*
- noticing similarities and differences between the language and English/other known languages in relation to cultural elements, such as the names of foods and animals particular to the climate and environment; and in cultural practices, such as sharing in extended families, special times, story-telling, yarning
- considering how they communicate with different friends and family members who have different language backgrounds
- describing how it feels to use the language in the classroom and with visiting Elders and community members

Understanding

Systems of language

Learn the different sounds of the language and link these to written symbols and conventions

[Key concepts; pronunciation, intonation, writing; Key processes: imitating, noticing, distinguishing, reading aloud]

(ACLFWU141)

Elaborations

- noticing and distinguishing sounds of the language and matching these with written symbols
- recognising when the language is being spoken and distinguishing sounds of the language from English sounds and other known languages
- experimenting with sound patterns in song, noticing how words and expressions can be separated into syllables to fit different tunes and rhythms
- reading texts aloud to strengthen their familiarity with sound–symbol relationships, experiment with rhyme and alliteration and with written representations of these features
- recognising and imitating intonation patterns associated with statements and questions, and understanding how these are distinguished in writing
- learning that writing systems represent sounds and meanings, and becoming familiar with how the alphabet associates individual sounds/ a range of sounds with particular letters/ combinations of letters
- noticing the shared alphabetic base of the language, English and other languages, with some differences
- learning the conventions associated with the written form of the language, such as spaces between words, direction of writing and page layout, and comparing these with written forms of English and other known languages
- associating written forms of morphemes, words and phrases with spoken forms of the language

Recognise the function of different word types and understand basic elements of language structures

[Key concepts: word function, word order, patterns, rules; Key processes: identifying, recognising, noticing]

(ACLFWU142)

- understanding that words in the language have different functions, for example, words for things, words for actions, and that these functions are also found in other languages, such as English
- identifying people, places, things and events using:
 - nouns, for example, family, kinship, plants/ animals, items in immediate natural and built environments
 - pronouns, for example, personal, interrogative, kinship, demonstrative
 - verbs for simple actions, states and processes
 - terms to qualify, quantify, classify or compare things, for example, size, colour, number
 - adverbs, for example, of location, time and manner
 - simple forms of negation
- becoming aware of how word order may differ from English, for example, noun + qualifier vs qualifier + noun, 'child happy' vs 'happy child'
- recognising the use of common affixes on nouns, for example, the man's dog", to the river", in the sea"
- learning the use of common affixes on verbs, for example, to indicate tense or mood
- understanding and using metalanguage to describe word types, for example, *noun*, *pronoun*, *verb*
- understanding that some parts of the language may have fallen into disuse and not be known today
- noticing that new words can be formed from within the language itself, rather than borrowed from other languages
- noticing that compared to English some words may be left out (ellipsis), or must be included or repeated in phrases and sentences, for example, "(it) went", "big (dog) ate (it)"

Recognise there are many ways of communicating messages in Aboriginal and Torres Strait Islander languages

[Key concepts: communication, narrative; Key processes: recognising, identifying]

(ACLFWU143)

- understanding that there are different ways of telling a story, such as Elders yarning, through song, dance, music and associated visual design and spectacle, and through painting (body, bark, rock, sand)
 - understanding that texts have a purpose, for example, greetings, Welcome to Country/Acknowledgement of Country/Place, traditional stories, paintings, songs and dances that convey community-wide messages
 - identifying some features of stories, for example, the fact that they are often about journeys across Country/Place, involving landforms, animals and plants
 - noticing how texts such as storybooks are sequenced and organised, for example, by identifying the main title and the connections between pictures and text
 - recognising that communication can also occur through sign language
-

Identify elements of the kinship system and its links to place and natural species

[Key concepts: kinship and totemic relationships, place, ceremonial expression; Key processes: identifying, recognising]

(ACLFWU144)

- using kinship charts to identify kinship terms for immediate family, comparing with terms used in own family
- recognising that Aboriginal and Torres Strait Islander peoples have their own personal relationships with animal species and natural phenomena
- recognising that Aboriginal and Torres Strait Islander peoples have a personal relationship with language and place
- identifying skin names, moieties and other groupings where appropriate
- identifying which stories belong to which natural features, including animals, plants, topographical features and recognising their significance

Language variation and change

Elaborations

Recognise that different words and language forms are used to address and communicate with people according to relationship and context

[Key concepts: kinship, context; Key processes: noticing, recognising]

(ACLFWU145)

- noticing that different forms of address and kinship terms are used depending on the relationship between participants
- recognising that the way someone is related to others affects how he or she speaks to them
- recognising that ways of speaking vary according to context and situation, for example, language used when interacting with peers during playground games is different to that used with the teaching team and with visiting Elders/community members
- recognising that language used in particular interactions can vary between cultural contexts, for example, the use of titles in English compared to kin categories in the language

Notice that languages borrow words from each other

[Key concepts: relatedness, borrowing; Key processes: identifying, recognising, comparing]

(ACLFWU146)

- noticing Aboriginal or Torres Strait Islander words and phrases used in everyday Australian life, for example, *koala*, *euro*, *billabong*, *dingo*
- recognising that some words in the language have come from other languages
- recognising words in English that have been borrowed from other languages

Language awareness

Elaborations

Recognise that the language is part of the broader regional and national language diversity

[Key concepts: linguistic diversity, relationship; Key processes: identifying, recognising]

(ACLFWU147)

- identifying/recognising Indigenous languages in the environment, for example, street names, names of parks
- recognising that there are many different Aboriginal and Torres Strait Islander languages in Australia, for example, by viewing Language maps of their region, their state and the whole of Australia
- identifying neighbouring Indigenous languages of their region
- recognising that linguistic diversity in contemporary Australia includes Indigenous as well as non-Indigenous languages, and that Australia has many languages, for example, by identifying languages used by different classmates by creating a class profile or language map
- recognising that some Indigenous languages in Australia are strong, while others are endangered or in the process of being revived or reclaimed
- recognising shared vocabulary across groups of Aboriginal or Torres Strait Islander languages, for example, words such as 'hand', 'water', 'crow'

Understand that language belongs to communities, and that language learning requires the application of respectful and appropriate behaviour

[Key concepts: ownership, custodianship, belonging, respect; Key processes: demonstrating, applying]

(ACLFWU148)

- understanding that each Aboriginal language or Torres Strait Islander language is recognised as belonging to a group of people who are the language owners or custodians
- demonstrating and applying respectful and appropriate behaviours, including appropriate language forms, in the presence of visiting Elders/community members and during visits to important sites
- understanding the purpose of Welcomes to Country/Acknowledgements of Country, and talking about their experiences of participating in Welcomes and Acknowledgements, for example, at school, sporting events, festivities

Role of language and culture

Elaborations

Notice that people use language in ways that reflect their culture, such as where and how they live and what is important to them

[Key concepts: Country/Place, language, culture, symbol; Key processes: noticing, recognising, questioning, making connections]

(ACLFWU149)

- exploring culture as an essential part of human life, understanding that it is shared and passed on between generations; that it includes observable elements, such as ways of cooking or greeting, symbols such as flags and colours, as well as things that are not observable, such as beliefs and values, people's ways of thinking about themselves and others and relating to their environment
- recognising that in each culture there are general rules of what to say and do, when, where and with whom, and that these rules differ from culture to culture
- recognising that beliefs and behaviours are woven into and expressed through languages, and cannot be separated from them
- noticing how respect for Elders and Country/Place is built into the language
- recognising significant cultural symbols and features in the language, for example, in song, visual design, dance moves
- recognising that languages encapsulate values held about lands, waters and sky, for example, in expressions and concepts such as Caring for Country

Role of language building

Elaborations

Recognise that learning Aboriginal and Torres Strait Islander languages can provide language revival benefits to communities

[Key concept: language ownership, language revival; Key processes: identifying, engaging]

(ACLFWU150)

- understanding that language is communally owned and therefore owners must be consulted regarding any use of it, including learning it in school
- identifying and engaging with local identities/personalities/people who are involved in language revival efforts
- considering why learning an Aboriginal and/or Torres Strait Islander language is important in Australia

Build the resources of the language by creating, performing and recording new texts, and by creating new contexts for its use

[Key concepts: language ownership, language revival; Key processes: noticing, building resources]

(ACLFWU151)

- using the language in performances at school and wider public community events
- building language resources, for example, by creating posters and/or language/cultural displays, and by working with the community language team to create new games and songs in the language
- noticing that new words can be formed from within the language itself, rather than through borrowing words from other languages

Framework for Aboriginal Languages and Torres Strait Islander Languages

Foundation to Year 2 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages LR pathway are generalised in order to cater for the wide range of languages which may be learnt as an LR within the school context. The achievement standards will need to be adapted for use for specific Aboriginal and Torres Strait Islander Languages.

The Achievement Standards in the Language Revival Learner Pathway will be shaped by the current progress of language revival for a particular language, and by the amount of vocabulary and variety of language structures available for teaching and learning.

By the end of Year 2, students interact with the teaching team, Elders and community members to talk about themselves and family, using familiar modelled language and gestures. They use appropriate protocols when interacting with Elders and community speakers, such as appropriate forms of address, terms of respect and behaviour. They use movement, gestures and modelled questions and responses to participate in guided group activities, for example, collaborating to adapt and perform action songs. They interact in familiar classroom exchanges, using routine classroom language, movement, gesture and action, for example when requesting objects, responding to simple questions, following instructions. They identify key information about Country/Place, under the guidance of Elders and community members. They use simple statements, gestures and written captions to demonstrate their understanding of Country/Place, for example, by naming bush foods, animals, plants and natural objects, and by classifying and labelling these into culturally appropriate categories. They identify places in the local area which have names in the language. They respond to texts such as stories, songs, dance and visual art through singing, miming, play-acting, drawing, action and movement. They demonstrate their understanding by identifying key animals, birds and other characters or by retelling/describing elements of images, performances or stories. Students use familiar words, patterns and support materials to create and present shared stories, songs and performances. They translate and explain the meaning of symbols, words, simple phrases and gestures used in everyday contexts and situations. They create simple bilingual texts for the classroom environment. They identify markers of their own identity, such as family, school/class membership and language/s spoken, and compare these to the importance of Place, family and relationships in Aboriginal and Torres Strait Islander communities. Students identify similarities and differences in the ways people communicate and behave in different languages and cultures

Students are familiar with most sounds in the target language and can link these to written symbols and writing conventions. They use metalanguage to describe basic structures of the language, recognising that some elements may have fallen into disuse and be unknown today. They understand that messages in Aboriginal and Torres Strait Islander languages can be communicated in a number of ways, such as Elders' story-telling, or through song, dance and visual design. Students identify elements of the kinship system when appropriate, and recognise that Aboriginal and Torres Strait Islander peoples have their own personal relationships with Place, natural species and phenomena. They identify which stories belong to which natural features, including animals and plants. They know that different words are used to address and communicate with different people, depending on relationship and situation. They identify words in the language that have been borrowed from other languages. They recognise that many different languages are spoken at their school, in their local community, and in other parts of Australia. They identify how language use reflects where and how they live and what is important to them. Students identify the importance of learning Aboriginal and Torres Strait Islander languages, including the benefits to communities of language revival. They recognise that new words can be formed from within the language itself and work with the community language team to build resources for the language, such as new games and songs.

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 3 to 6

The nature of the learner, the pathway and particular language

The Language Revival Learner Pathway (LR) provides opportunities for students to study Aboriginal or Torres Strait Islander languages being revived by their owners or custodians and which are in various stages of revitalisation, renewal and reclamation.

LR covers a much broader range of language types and ecologies than either L1 or L2, and the vast majority of Aboriginal languages and Torres Strait Islander Languages are included in the LR category.

Schools teaching the Language Revival Learner Pathway (LR) will most likely be located broadly within the geographical region of the language and culture, sometimes in towns and cities, at other times in rural and remote regions. Classes will likely include students who relate closely to the language and culture, students with varying degrees of affiliation with the language and culture, and students who have no connections to either the language or culture. A key expectation in the LR pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

The Language Revival Learner Pathway draws on the Australian Indigenous Languages Framework (AILF) and takes into account key variables such as: how much is known about and documented for the language; the extent to which it is used or remembered, ranging from no longer being spoken (owners often use the term 'sleeping') to being spoken fluently by members of the older generations; and the extent to which the language has been reintroduced into the community of owners and custodians.

These variables give rise to the following broad categories of language revival:

- **Language Revitalisation:** where there are fluent L1 speakers (typically members of the older generation) but the intergenerational transmission of the language has been interrupted. Younger generations may understand some of the language and may use some words and phrases but do not speak it as their first language. Examples of revitalisation languages include Walmajarri in the Kimberley, Yindjibarndi in the Pilbara, Meriam in the Torres Strait, Dyirbal in north-eastern Queensland, Wubuy (Nunggubuyu) in Arnhem Land, and Adnyamathanha (Yura Ngawarla) in the Flinders Ranges.
- **Language Renewal:** where there are a number of adult speakers who use the language to varying degrees in the community, but not 'right through', and where other language resources are drawn upon. Examples of languages being renewed include Noongar in south-west Western Australia, Gumbaynggirr on the north coast of New South Wales, Ngarrindjeri on the Lower Murray Lakes in South Australia, Djabugay in the Atherton Tablelands in northern Queensland, and Yugambeh in southern Queensland.
- **Language Reclamation:** where language revival, by necessity, relies primarily on historical documentation of the language in the absence of active community knowledge of it. Examples of reclamation languages include Kurna from Adelaide, Narungga from the Yorke Peninsula, Dharuk or Eora (Iyora) from Sydney, Yuwibara from central Queensland, Wemba-Wemba and Woiwurrung from Victoria, and Awabakal from the Newcastle area in New South Wales.

A number of factors and variables will need to be considered when planning for a language revival curriculum or program, and further information on these is presented in the context statement for this pathway and in the section Using the Framework.

At this level children are developing awareness of their social worlds and of their membership of various groups. They are widening their social networks, experiences, and communicative repertoires, and gaining greater awareness of the world around them. They benefit from varied activity-based learning that builds on their interests and capabilities and makes connections with other learning areas.

Language learning and use

Learners interact with peers, the teaching team, Elders and community members in a variety of learning experiences and activities, using as much language as possible and incorporating sign language as appropriate. Learners use formulaic phrases to participate in classroom routines, presentations and structured conversations. They respond to teacher-generated questions about texts, participate in games, and follow instructions and procedures.

They focus on aspects of their personal worlds and are introduced to content related to the Country/Place and language community.

The development of oral proficiency relies on rich language input. Learners engage in a lot of listening, developing active-listening and comprehension skills by using contextual, grammatical, phonic and non-verbal cues. They extend their oral fluency by focusing on sentence-level intonation and stress, including elements of sign language as appropriate.

Learners participate in shared and guided reading and learn to apply their knowledge of key words and textual features to predict the meaning of unfamiliar language. They use modelled language to create new texts. They require opportunities to extend their language use, for example, by connecting sentences and expanding vocabulary, to the extent made possible by the resources available in the revival language.

Learners are expanding their knowledge of vocabulary and sentence construction. They develop metalanguage for describing additional aspects of the target language and exploring how it works.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team, with additional enrichment and authentication of the learning experience provided through access to Elders and other speakers living in the same community. Interacting with Country/Place to explore the environment and learn about Country/Place with Elders and other community members is essential to learning the language. Students may also have access to community centres, such as interpretative museums or art and language centres.

Texts and resources

Country/Place and the community are the most important resources for learning and are the origin of most of the texts children engage with.

Learners interact with a growing range of spoken, visual, written and digital texts that use as much language as possible. These include historical documents, photographs, maps, songs, raps, performance, stories, local environmental and social programs, painting and visual design. Additional teacher-generated materials include games and items from the community and local environment. Some texts will include the use of English or another community language in a complementary role, for example by filling in for items or expressions that have not yet been reconstituted in the language. Other texts will be bilingual, without mixing languages.

Level of support

The primary source of support for learners is the teaching team, who provide instruction, explanation, examples, modelled language use, repetition, reinforcement, and feedback on student work. Tasks and activities are carefully scaffolded and resourced, with sufficient time allowed for experimentation, drafting and redrafting. Learners are provided with opportunities for practice and with guidance in using dictionaries, word charts, vocabulary lists and historical documents.

The role of languages

Learners are encouraged to use the language whenever and to the extent possible in class interactions and daily routines with the teaching team, Elders and community members. Maximal use of the language will increase learners' development of language proficiency and enhance the process of language revival.

English and other known languages are used for explanation and discussion, allowing learners to talk about differences and similarities they notice between the language and their first language(s) and culture(s), to ask questions about language and culture, to consider how they feel when they hear or use the language, and to talk about how they view different languages and the people who speak them. This introduction to the 'meta' dimension of intercultural learning develops the ability to consider different perspectives and ways of being as mediated by language.

For those revival languages that are at the 'beginning' end of the revival spectrum, English or another community language might be used in a complementary fashion, for example, to fill in for missing words or expressions. Alternatively, language owners and the community in general may decide to side-step these gaps altogether, thus avoiding the need to use other languages.

Years 3 to 6 Content Descriptions

Communicating

Socialising

Interact with peers, the teaching team and visiting Elders/community members about aspects of personal worlds, such as experiences at school, home, everyday routines, interests and activities
[Key concepts: relationship, kinship, family, experience; Key Processes: describing, sharing, responding, recounting]

(ACLFWC152)

Elaborations

- describing self in relation to daily routines, family and friends, pastimes and aspects of school and home life
- sharing and reflecting on learning experiences, such as visits, meetings, school and community activities with class members, using gestures, illustrations and graphics to support commentary
- recounting specific events or experiences, using familiar and modelled language
- asking and responding to questions to identify/describe features of people, plants, animals and items in the environment, for example, by referring to colour, size, number, location
- talking about aspects of their personal worlds, such as interests and leisure activities
- describing other people, such as family members, friends and teachers, for example, by identifying their kin relationship
- showing interest in and respect for others, for example, by expressing praise or encouragement
- expressing personal experiences and future plans, using modelled sentence patterns

Participate in guided tasks that involve following instructions, making things, cooperating with peers, planning for and conducting shared events, activities or school performances

[Key concepts: collaboration, planning, performance; Key processes: compiling, planning, rehearsing, making]

(ACLFWC153)

- participating in excursions with Elders and community members to experience story places or keeping places, listening to associated stories
 - visiting community centres, art centres or language centres and recording the experiences, for example, by developing a digital presentation or photo-story
 - working with Elders/community members to develop a short 'Welcome to Country/Place' and/or 'Acknowledgment of Country/Place' to use at formal school functions or community events
 - working together on collaborative tasks, such as designing posters, menus or invitations for special events, designing class bush tucker or a garden, creating picture books for buddy classes
 - interacting with Elders/community speakers, following instructions, for example when making an artefact, creating an art work or preparing bush tucker, using hand signs as appropriate
 - participating in and sharing responses to local cultural events and celebrations
 - participating in national celebrations and significant events, for example, NAIDOC Week, Reconciliation Week, Harmony Day, labelling and captioning photos for a class display and sharing responses through class discussion
 - creating a skit, performance or action game to introduce a buddy class to aspects of the language and associated culture, for example, individual words, gestures or expressions associated with common exchanges such as introductions, items and artefacts
 - engaging in shared tasks which involve planning and collaborating, for example, preparing, rehearsing and conducting public presentations and performances, such as an item for a school assembly or a digital presentation about a significant event
 - giving directions, for example, to guide others to specific locations
-

Participate in everyday classroom activities and routines, such as responding to questions and requests, asking permission, requesting help

[Key concepts: routine, interaction; Key processes: responding, contributing, enquiring]

(ACLFWC154)

- using rehearsed phrases and sentences to initiate and respond to language used in familiar classroom routines and exchanges, such as requesting a drink, asking permission to leave the classroom, borrowing equipment using rehearsed phrases and sentences
- recognising and rehearsing interjections or fillers used in everyday conversations
- asking simple questions and responding with simple statements, for example, asking for help, providing repetition or clarification
- enquiring about and describing the location of classroom items and materials
- preparing and displaying a set of agreed classroom procedures
- participating in class activities that involve vocabulary, actions, signed expression or board/digital games

Informing

Elaborations

Gather, record and classify information from a range of sources from Country/Place, historical documents and contemporary resources

[Key concepts: community life, leisure, environment, Indigenous knowledge, health, well-being; Key processes: identifying researching, compiling, presenting, tabulating, categorising, giving directions]

(ACLFWC155)

- finding out the origins of Indigenous names, for example, of streets, city parks, rivers, public institutions, social programs in their area
 - labelling, ordering and classifying natural objects from the environment according to Indigenous taxonomies
 - obtaining information from a variety of sources about the natural environment, for example, by listening to visiting Elder/community members, reading, viewing, consulting historical resources and photos, and presenting findings in chart, poster, table, graphic or digital form
 - reading, viewing or listening to simple texts such as posters, signs, historical documents, word lists, answering questions by selecting from options and filling in gaps
 - viewing a demonstration, for example, of cooking bush tucker, cooking in an earth oven, and recording key words/phrases related to processes associated with the collection and preparation of food
 - surveying peers and community members on different topics, for example, favourite television programs, video games, foods, football teams, sports or bands, after school activities/time spent in those activities, languages spoken; and presenting results in chart, graph or digital formats
 - labelling, drawing and matching inside and outside body parts
 - observing and reading signs of Country/Place with the guidance of Elders/community speakers, for example, the presence of bees, dragonflies, changing colours of bark, different tracks, tides, seaweed dumps, regeneration of vegetation, special (warning) calls of birds, turtle mating, ripening of fruit, changes in the night sky; and recording these details through photos, pictures, diagrams, captions, simple descriptions and commentaries
 - classifying different types of plants/parts of plants and their uses, for example, what different parts are used for or which are poisonous, presenting findings in chart, poster, table, graphic or digital form
 - mapping Country/Place in various forms, for example, on paper, in sand or mud, labelling key topographical features and infrastructure and making simple statements about their locations in relation to other places, for example, *east, west, near, far, other side of...*
 - investigating and discussing where appropriate the meaning of personal and family names of Aboriginal and Torres Strait Islander origin
 - surveying and comparing healthy ways of eating, for example, by identifying what is available from the school canteen and listing which healthy foods they like to eat, recording and presenting results in chart, graph or digital format or by giving an oral presentation
-

Convey information on specific topics using formats such as oral or digital presentations, displays, diagrams

[Key concepts: Country/Place, community life; Key processes: creating, presenting, profiling]

(ACLFWC156)

- talking about Country/Place, using a range of location and direction terms
- presenting information about events and activities in Country/Place through spoken, print and digital forms
- creating a profile of a prominent community figure, for example, a sports personality, community leader/negotiator/spokesperson, a musician or artist
- organising and presenting information relating to language and culture, for example different expressions of storying, art or dance, using simple sentence structures, familiar vocabulary and concrete materials
- creating a video clip that incorporates captions and commentary to demonstrate procedures for activities such as preparing and cooking bush tucker, making tools, decorating artefacts, playing a favourite computer game, sport or playground game
- creating texts such as flyers, posters or posts on the school website to advertise an upcoming event

Creating

Elaborations

Listen to, read and view different real and imaginative texts, identifying and making simple statements about key elements, characters and events, and interpreting cultural expressions and behaviours

[Key concepts: visual design, representation, journey; Key processes: participating, describing, predicting, recalling, responding, listening, shared/guided reading; Key text types: songs, dances, stories, paintings and visual design, video clips]

(ACLFWC157)

- recalling, illustrating and describing main characters and events in stories, songs and performances, for example, by selecting descriptive modelled statements as captions to their pictures or responding to questions, such as, *Who? Where? How long? What?*
- participating in shared and guided reading/listening/viewing of real and imaginative texts, for example by making predictions about the development or flow of ideas, using contextual and visual cues, responding to questions and comparing responses to different characters, ideas and events
- conveying understanding of plot and sequence in texts, for example, by re-creating a sequence using a storyboard, labelling key events or creating a timeline
- mapping sites, landforms and other features of Country/Place through which a travelling story/storyline passes
- listening to Elders/community members tell stories on Country/Place, interpreting hand signs and gestures, retelling parts of the story, for example, in sand, through painting or by performing, using a combination of words/phrases, illustrations, movements and visual props
- listening to Elders/community members telling stories from their local area, and responding by retelling parts of the story
- interacting/engaging with artistic expression/techniques appropriate to Country/Place, such as paintings, drawings, etchings, sculptures and dance, interpreting messages conveyed through these different forms
- discussing key messages expressed in stories, songs and dance, such as social values and rules for living, comparing them to messages conveyed by stories in other cultures and languages
- responding to a specific creative text by adapting the original to create a new version, for example, by re-sequencing events, adding new elements, changing time, location or character, or creating an alternative ending
- understanding and discussing the importance of story/storytelling in transmitting and maintaining language and culture

Create and present real and imaginative texts suitable for a particular audience, using familiar expressions and modelled language

[Key concepts: imagination, entertainment, audience; Key processes: imagining, creating, experimenting, performing, storytelling; Key text types: raps, songs, dramatic performances, digital texts, video clips, skits, paintings and visual design]

(ACLFWC158)

- creating and performing their own stories, songs and skits, incorporating non-verbal elements to enhance audience comprehension and entertainment, for example, gesture, facial and vocal expression
- experimenting with different ways of telling stories, using a range of different texts, for example, oral texts, photo stories, e-books, dance, visual design, drawings on soft and hard surfaces
- creating, performing and presenting imaginative texts such as skits, songs and raps, using digital techniques
- creating real or imaginary characters, places or animals and presenting them through performance, digital display or visual representation
- incorporating onomatopoeic sounds into written/performed texts to enrich the texts and to entertain readers/the audience
- creating imaginative texts to entertain younger audiences, for example, audio Big Books, puppet plays, performances for the school or community, cartoons, video clips, vokis or animation, selecting language and images that enrich the visual or listening experience
- creating shared art work (visual or performative) to tell a story, using symbols and expressive techniques appropriate to Country/Place

Translating

Translate simple texts from the language to English and vice versa, identifying elements which require interpretation rather than translation and involve cultural references

[Key concepts: equivalence, meaning, translation; Key processes: translating, predicting, selecting, comparing]

(ACLFWC159)

Elaborations

- using visual or print dictionaries, word lists and pictures to translate simple familiar texts such as labels, signs, captions, charts, posters, applying knowledge of grammatical rules and context, for example, by locating word stems or by removing affixes
- translating texts, identifying culture-specific concepts and expressions that do not easily translate into English, for example, language related to artefacts, place names, landforms, kinship relations
- explaining to others culture-specific words that do not easily translate, such as language associated with artefacts, implements and kinship terms of address
- identifying words and phrases that have more than one literal meaning
- explaining the meaning of art works and performances to others, including the use of symbolism

Create bilingual texts for the classroom and the school community, such as songs, picture dictionaries, captions for images and displays, photo stories

[Key concepts: bilingualism, expression; Key processes: performing, describing, code-mixing, captioning]

(ACLFWC160)

- creating bilingual wall charts or picture dictionaries with captions and simple descriptions in English to explain language words and related cultural ideas
- performing bilingual versions of familiar songs, for example by alternating lines/verses between the two languages
- creating bilingual texts such as posters and songs, and discussing how to represent meaning in different languages for different audiences
- creating bilingual texts such as brochures, posters or invitations to inform others about upcoming events

Identity

Elaborations

Explore their own sense of identity, including elements such as family, friends, interests, membership of groups, and consider markers of identity that may be important across all cultures

[Key concepts: identity (individual and group), kinship, community, membership; Key processes: creating, representing, discussing, comparing]

(ACLFWC161)

- creating a class wall chart or family tree, labelling with appropriate kinship terms (Aboriginal and Torres Strait Islander students may be able to source information about their totems/moieties and other affiliations from home, family and community sources)
- investigating and discussing, as culturally appropriate, the meaning of personal, family and other names and their significance as markers of identity
- working with Elders to map community-wide links between families according to known kin links
- designing visual representations, such as concept maps, posters or captioned slide presentations, of their group memberships, for example, friendship, family, sporting, interest and community groups, moieties, and discussing what such membership means to their sense of identity
- creating a profile to capture their sense of personal identity, for example, through an avatar or montage, using key words and expressions and commenting on the significance of particular events, influences or interactions
- considering how their individual upbringing and experiences impact on their assumptions/attitudes when participating in intercultural interactions, for example, in relation to notions of leisure/free time or family and community responsibilities
- talking about ways local Aboriginal and Torres Strait Islander communities express elements of their shared identity, for example, through behaviours associated with sporting teams, distinctions between coastal versus inland communities, through community events and profiling of identities from their community
- noticing and comparing their use of words or expressions from different languages when communicating in English and discussing how this relates to their sense of identity
- monitoring their development as learners of the language, for example, by recording learning experiences, reflections in blogs, learning logs or journals
- identifying markers of identity that may be important across all cultures, for example, family, community, location, language, age, gender
- exploring the concept of collective identity by designing an item, such as a language flag or artefact, that incorporates elements of importance to the language/community

Reflecting

Elaborations

Notice and describe ways in which the language and associated communicative behaviours are similar or different to other known languages and cultures

[Key concepts: language, culture, values, similarity, difference, communication; Key processes: noticing, comparing, describing, explaining, questioning, reflecting]

(ACLFWC162)

- noticing how respect is shown to Elders in the community, through practices such as terms of address and expressions of deference, and comparing to practices associated with other languages and cultures
- noticing aspects of communication and cultural expression characterised or reflected in language stories, songs, visual design, dance or audio/visual media such as IndigiTUBE, and reflecting on/comparing their individual responses to these elements
- comparing their own and each other's reflections on the experience of participating in and learning the language, and considering whether their attitudes or understandings have in some respects changed through the experience
- comparing observations about how interactions in the language feel different to interactions in English and other known languages, identifying different ways of socialising or communicating that seem to be culture-specific

Understanding

Systems of language

Elaborations

Distinguish and produce the speech sounds of the language, understanding how these are represented in writing

[Key concepts: punctuation, upper and lower case letters, diacritics, intonation, spelling; Key processes: identifying, discriminating, noticing, listening, reading]

(ACLFWU163)

- identifying meaningful sounds, syllables and morphemes in words and phrases
 - confirming sound–symbol correspondences in the language by reading syllables, morphemes and words for meaning
 - using conventions of the written language, for example, punctuation, capitalisation, diacritics, digraphs, to support links with the spoken language
 - identifying morphemes, words and phrases in speech and matching these with their written forms
 - paying attention to consistency in the spelling of the language, with direct reference to the sound system of the language
 - noticing variations in pronunciation of the same word by different speakers and discussing whether this can be reflected in the spelling of the word
 - recognising that in some cases the original sound/parts of the sound of some words in the language may be unknown, considering possible reasons for this
 - understanding that other languages may suggest historical pronunciations for the language
 - learning that very similar languages may have different spelling systems, and how this may mask similarities of their sound systems
 - recognising which speech sounds are not typical for the language, and which sounds are very common, identifying where these can occur in words
 - using knowledge of sound–symbol correspondences to read familiar and new words out aloud from their written forms
 - noticing the various roles of the speech organs in the production of sounds in the language, and comparing these with English and other known languages
-

Expand vocabulary in the language through word-formation processes and recognise and use simple language structures [Key concepts: word formation, word class, grammatical person and number, negation, metalanguage; Key processes: noticing, comparing, applying, understanding, modifying meaning]

(ACLFWU164)

- exploring known word formation processes, for example, changing a word with the addition or change of a suffix or prefix to convey different meanings
- constructing expressions that refer to people, places, things and events using:
 - nouns and adjectives in phrases, for example, compound nouns, reduplications and nominalisations, adjectives without an associated noun
 - sentences without verbs, for example, 'This (is) my bag'
 - pronouns, for example, personal, kinship, demonstrative and interrogative in all persons and numbers
 - determiners and quantifiers, for example, 'some', 'every', 'other', 'few', 'much', 'all', and words for groups
 - marking to indicate possession and other types of association, for example, 'Let's go for water'
 - transitive and intransitive verbs
 - verbs of stance used in existential expressions, for example, 'There is a creek lying near the road'
 - verbs to talk about actions, processes, thoughts and feelings
 - moods of verbs, including statements, questions, imperatives, commands, intention, purpose, likelihood, reported speech
 - negation
- expressing time, manner, attitude and place according to available language resources, such as:
 - tenses, including past, present and future/non-past
 - temporal expressions, for example, day–night cycle, lunar and seasonal cycles, 'before', 'after', 'soon', 'recent', 'long ago', expressions for cosmological time
 - expressions of frequency, for example, 'often', 'always', 'once', 'briefly'
 - attitudinal particles, for example, 'maybe', 'it is said', 'what do you say?', 'would you mind?', 'you see'
 - locational cases, for example, 'in', 'an', 'at', 'near', 'besides', 'to', 'towards', 'from'
 - adverbs of manner, location and time, for example, 'again', 'more', 'in turn', 'too late', 'as well'
 - structuring and linking clauses, for example, using coordination, subordination, embedding
- understanding that rules vary between languages, for example, in relation to word-formation, word order at phrase and sentence level
- making comparisons and identifying patterns in and between languages, for example, free and fixed word order, tenses in verbs, use of affixes versus prepositions
- noticing similarities between particular vocabulary sets in

languages from the same region, such as words for body parts, kinship terms

- developing metalanguage for talking about language, for example, *noun phrases*, *suffixes*, *prefixes*, *tense*, *transitivity*, using resources from both the language and English

Understand that texts such as stories, paintings, songs and dances have distinct purposes and particular language features

[Key concepts: text, features, purpose; Key processes: recognising, identifying, distinguishing, applying, linking]

(ACLFWU165)

- distinguishing the purpose and characteristic features of different types of texts, for example, stories are usually about journeys across Country and convey explanations about why features of Country exist and are important
- understanding that for many Aboriginal and Torres Strait Islander languages conventions of written text are in the process of being developed
- recognising language features typically associated with familiar texts, for example, the use of imperatives in games, instructions and procedures, and the use of past and habitual tenses in stories
- linking ideas using appropriate grammatical forms and processes, for example, connectives, serialisation, embedding
- recognising the role played by different elements in texts to contribute to meaning-making, for example, the layout, title, illustration and use of punctuation in a picture book or the use of speech bubbles in a cartoon
- investigating the purpose and use of sign language in various Aboriginal and Torres Strait Islander languages, for example, for hunting, for recent bereavement, for communicating at a distance, for restricting who can understand the message

Recognise how kin relationships link people, Place and story

[Key concepts: kinship system, ways of talking, human relationships, interrelatedness; Key processes: recognising, interpreting, discussing]

(ACLFWU166)

- interpreting kinship charts to identify kin terms for wider family groupings, and comparing these with terminology used in other languages and cultures, for example, for maternal versus paternal grandparents, the presence or absence of birth order names
- discussing links between people, stories and Country/Place and the social importance of connections to History
- recognising that certain places have historical and contemporary significance to the community, representing special bonds between people, Place and story
- understanding that songs, stories and other forms of artistic expression can be recreated/traced and contextualised in contemporary circumstances

Language variation and change

Elaborations

Understand that speakers vary language forms according to kin relationship and context of situation

[Key concepts: kinship, respect, register, silence, taboo; Key processes: observing, examining, explaining, investigating; noticing, recognising]

(ACLFWU167)

- observing how language is used to establish, maintain and reflect kin-based relationships
- noticing word taboo in Aboriginal languages and Torres Strait Islander languages
- observing that expressions can be made more or less formal or casual to suit the relationship between speakers
- reflecting on how they communicate with their own family and friends and with people less close to them, noticing differences in language use and communicative behaviour

Recognise that languages change over time

[Key concepts: regional languages, language shift, language loss, borrowing, relatedness; Key processes: identifying, recognising, comparing]

(ACLFWU168)

- identifying words that are the same as or similar to neighbouring languages
- understanding ways in which languages influence one another, for example, language shifts, shared writing systems, loan words
- discussing loan words that have been incorporated from other languages to describe new concepts, for example, words for new things, including technological innovations
- understanding that language and culture together continually change as a result of contact with other languages and cultures

Language awareness

Elaborations

Explore the language situation of language communities and the diversity of language contexts in Australia

[Key concepts: change, sign, context; Key processes: recognising, discussing, investigating]

(ACLFWU169)

- investigating the nature and state of health of Aboriginal and Torres Strait Islander languages across Australia and in their region
- recognising that many Aboriginal and Torres Strait Islander people are multilingual, and discussing reasons for this
- learning about the current language situation in the language: its state of health, the nature of the speech community and generational differences, and discussing reasons for these characteristics
- recognising that Aboriginal and Torres Strait Islander languages are in various states of maintenance, development and revival, and investigating the diversity of historical causes for this
- recognising how Aboriginal and Torres Strait Islander languages have been transmitted and recorded across generations
- exploring how physical and biological environments affect linguistic ecology
- recognising shared vocabulary across Aboriginal and Torres Strait Islander languages, and understanding why there might be variations in spelling
- recognising dialectal differences and similarities within languages
- investigating ways in which Aboriginal and Torres Strait Islander languages are used in the local region and in the wider Australian community, for example, in the media, in art galleries, festivals, on public transport

Understand that the use of stories and names in Aboriginal and Torres Strait Islander languages is culturally determined

[Key concepts: ownership, custodianship, cultural safety; Key processes: recognising, observing, discussing]

(ACLFWU170)

- observing and discussing protocols surrounding the retelling and sharing of stories
- recognising and using principles and protocols of cultural safety when engaging with cultural material/property, such as names of things, peoples and places, visual and aural recordings, art work
- understanding how and when Welcomes and Acknowledgements are required and who is entitled to deliver them

Role of language and culture

Elaborations

Explore connections between identity and cultural values and beliefs and the expression of these connections in Aboriginal and Torres Strait Islander languages

[Key concepts: Country/Place, cultural expression and transmission, values, beliefs, spirituality; Key processes: observing, making connections, discussing, investigating]

(ACLFWU171)

- understanding the role of Aboriginal and Torres Strait Islander languages and cultures in caring for Country/Place and the environment
- investigating how Aboriginal and Torres Strait Islander peoples express their relationship with the natural environment through language, for example, words/expressions associated with seasons, stars, winds, reefs, rivers, waterholes, plants and animals
- gaining understanding through discussions with Elders of the importance and significance of Welcome to Country/Place
- understanding that Aboriginal languages and Torres Strait Islander languages are keeping places for cultural, environmental and social knowledge
- recognising that song and song language play a central role as keeping places of knowledge
- understanding that Aboriginal languages and Torres Strait Islander languages have a rich oral literature, which recounts epic journeys and events associated with totemic ancestors/cultural heroes, and that these stories map the land and embody values and mores of Aboriginal and Torres Strait Islander cultures
- understanding and discussing the importance of story and the role of story-telling in transmitting language and culture
- recognising ways in which cultural values are expressed in language, for example, through forms of address, speech prohibitions and styles, language of respect, land–language associations and non-verbal communicative behaviours
- observing that concepts may be culture-specific, for example, expressing spatial awareness, how relationships are structured, how time and quantity are expressed, how land, water, sea and sky are viewed
- recognising that Aboriginal languages and Torres Strait Islander languages have various social, spiritual and cultural functions within communities

Role of language building

Elaborations

Identify available resources and protocols to be followed when building language

[Key concept: language revival, language building, language resources, keeping places, protocols; Key processes: identifying, locating, discussing]

(ACLFWU172)

- identifying and locating available language resources suitable for language building, for example, living speakers and rememberers, visual, aural and written documents, archival material
- identifying the existence and location of keeping places for texts and resources as language is rebuilt, for example, in the community, national archives, purpose-built interpretative centres
- understanding that there are protocols to be followed when building language, such as consulting and involving language owners who may want to determine how the language expands into new domains of use
- discussing potential limits and constraints of school language programs in relation to building language
- learning about language building efforts in their community and the role of particular groups in this process, for example, by visiting the local language centre, history museum or by inviting people involved in the process to talk to the class
- identifying language revival programs in other regions and reporting on processes used and resources developed
- finding examples of language revival in the categories of language revitalisation, language renewal and language reclamation, and consider what these examples contribute to the processes of language building
- understanding how language revival serves to enrich Australia's linguistic and cultural resources

Understand how the language has been recorded in the past, and how this affects language building processes

[Key concepts: language revival, language resources, linguistic techniques, documentation, keeping places, protocols; Key processes: identifying, discussing, language building]

(ACLFWU173)

- understanding how the language was recorded in the past, by whom and for what purposes
- understanding the techniques of how the language was recorded in the past, what this means to the language and how it has affected current representation of the language
- understanding reasons for different spellings of words within the language, for example, how sounds may have been misheard, meanings been misunderstood and other unintentional errors introduced in the documentation process of the language
- understanding how language resources such as living speakers, recorded texts and archival information are used in the language building process
- identifying gaps in the vocabulary of the language, considering what responses may be necessary
- helping to build a community of learners–speakers who use the language, for example, by teaching younger members of the school community and/or classes in local primary schools

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 3 to 6 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages LR pathway are generalised in order to cater for the wide range of languages which may be learnt as an LR within the school context. The achievement standards will need to be adapted for use for specific Aboriginal and Torres Strait Islander languages.

The Achievement Standards in the Language Revival Learner Pathway will be shaped by the current progress of language revival for a particular language and the amount of vocabulary and variety of language structures available for teaching and learning.

By the end of Year 6, students use familiar language and modelled sentence patterns to share information about aspects of their personal worlds, such as their family and friends, interests, everyday routines and activities. They interact appropriately with Elders and community speakers and apply principles and protocols of cultural safety when interacting with Country/Place and engaging with cultural material such as artefacts, works of art, texts and performances. Students ask and respond to simple questions, request help, repetition or clarification, and respond to questions and requests using rehearsed phrases and sentences. Whenever possible they use the language to interact and collaborate in games and other activities, including the use of hand signs as appropriate. They interact with Country/Place to gather information and knowledge and demonstrate their understanding of Country/Place, for example, by explaining the origins and meanings of Aboriginal and Torres Strait Islander names of streets, parks, public institutions and social programs. They label, order and classify natural objects, animals and plants, by making simple statements about key features. They identify features of landforms, infrastructure and built environment, identifying places which have special significance to community. Students listen to, read and view a range of resources in the language, such as historical documents, stories, photos, images and art works, and demonstrate understanding of content by locating, recording and interpreting key words and phrases, and locating key points of information. They present information they have obtained that relates to language, culture, environment and community personalities, using short sentence structures, familiar vocabulary, photos and concrete materials. They demonstrate understanding of stories, songs, visual design and performance, for example by mapping sites, landforms and features through which a travelling story or songline passes, or by selecting and writing simple modelled statements to describe main characters and events. They create their own texts and works of art to tell a story, incorporating illustrations and visual props, significant symbols and techniques appropriate to Country/Place.

Students use simple, formulaic language to retell excerpts from stories and to create new songs and stories, understanding their role in helping to build a community of learner-speakers who use the language. They apply their knowledge of grammar and vocabulary to translate short texts, such as word lists, labels, songs and historical texts, explaining culture-specific concepts and expressions that do not translate easily into English. They create bilingual texts for the classroom and school community that explain words and associated cultural ideas. Students identify markers of identity across cultures, and recognise the importance of language, Country/Place and culture to the identity of Aboriginal and Torres Strait Islander peoples. They reflect on their own cultural identity in light of their experience of learning the language, considering how their ideas and ways of communicating are influenced by their own cultural backgrounds.

Students know that the language has its own pronunciation, spelling and grammar. They apply this knowledge to predict the sound, spelling and meaning of new words. They use metalanguage for language explanation, for making comparisons with English forms and other known languages, for reflecting on the experience of learning the language and culture, and for explaining the purpose and techniques of language building. They describe different ways of communicating in Aboriginal and Torres Strait Islander languages, for example, through story, song, sign language and artistic expression. Students know that language use varies according to age, relationships and situation, and they identify and explain kin terms in particular Aboriginal or Torres Strait Islander languages where it is appropriate. They provide examples of how languages change over time. They recognise that Aboriginal and Torres Strait Islander languages are in various states of maintenance, development and revival and can give some historical reasons for this. They explain the current situation of the language they are learning, including details about what is known about it, its current usage, generational differences and revival plans. They explain the importance of maintaining, strengthening and reviving Aboriginal and Torres Strait Islander languages for specific communities and for the broader Australian community. They demonstrate their understanding of the link between language, culture, Country and Place by working with the community language groups to develop a short 'Welcome to Country/Place' and/or 'Acknowledgement of Country/Place' to present at formal school functions or community events. Students describe language building efforts in their community. They explain protocols for language building, such as consulting and involving language owners. They identify contemporary and historical language materials that may assist communities with language building efforts and the challenges involved in using these. They understand their own role in helping to build a community of language-learner speakers and in the development of new language resources. They explain how the language was recorded in the past, by whom and for what purpose, and can give reasons for some different spellings of words within the language. Students know that the language is primarily oral and explain the importance of story and story-telling in transmitting language and culture. They recognise that ownership of songs, stories, dances and designs is determined by traditional kinship and other social groupings, place, History and Journey. They know that language in its various forms carries Indigenous knowledge in the context of Country/Place.

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 7 to 10

The nature of the learner, the pathway and particular language

The Language Revival Learner Pathway (LR) provides opportunities for students to study Aboriginal or Torres Strait Islander languages being revived by their owners or custodians and which are in various stages of revitalisation, renewal and reclamation.

LR covers a much broader range of language types and ecologies than either L1 or L2, and the vast majority of Aboriginal languages and Torres Strait Islander languages are included in the LR category.

Schools teaching the Language Revival Learner Pathway (LR) will most likely be located broadly within the geographical region of the language and culture, sometimes in towns and cities and other times in rural and remote regions. Classes will likely include students who relate closely to the language and culture, students with varying degrees of affiliation with the language and culture, and students who have no connections to the language and culture. A key expectation in the LR pathway is that of students having opportunities to interact with Elders and particular places on Country/Place.

The Language Revival Learner Pathway draws on the Australian Indigenous Languages Framework (AILF) and takes into account key variables such as: how much is known about and documented for the language; the extent to which it is used or remembered, ranging from no longer being spoken (owners often use the term 'sleeping') to being spoken fluently by members of the older generations; and the extent to which it has been reintroduced into the community of owners and custodians.

These variables give rise to the following broad categories of language revival:

- **Language Revitalisation:** where there are fluent L1 speakers (typically members of the older generation) but where the intergenerational transmission of the language has been interrupted. Younger generations may understand some of the language and may use some words and phrases, but do not speak it as their first language. Examples of revitalisation languages include Walmajarri in the Kimberley, Yindjibarndi in the Pilbara, Meriam in the Torres Strait, Dyirbal in north-eastern Queensland, Wubuy (Nunggubuyu) in Arnhem Land, and Adnyamathanha (Yura Ngawarla) in the Flinders Ranges.
- **Language Renewal:** where there are a number of adult speakers who use the language to varying degrees in the community, but not 'right through', and where other language resources are drawn upon. Examples of renewal languages include Noongar in south-west Western Australia, Gumbaynggirr on the north coast of New South Wales, Ngarrindjeri on the Lower Murray Lakes in South Australia, Djabugay in the Atherton Tablelands in northern Queensland, and Yugambeh in southern Queensland.
- **Language Reclamation:** where language revival, by necessity, relies primarily on historical documentation of the language in the absence of active community knowledge of it. Examples of reclamation languages include Kaurna from Adelaide, Narungga from the Yorke Peninsula, Dharuk or Eora (Iyora) from Sydney, Yuwibara from central Queensland, Wemba-Wemba and Woiwurrung from Victoria, and Awabakal from the Newcastle area in New South Wales.

A number of factors and variables will need to be considered when planning for a language revival curriculum or program, and further information on these is presented in the context statement for this pathway and in the section Using the Framework.

At this level, students bring to their learning a range of language learning strategies. They are increasingly aware of the world beyond their own, and are engaging with the broader issues of youth and society, land and environment, education and identity, while establishing a balance between increasing personal independence and social responsibilities. They are considering their future pathways and choices, including how the language they are learning could be part of these.

Language learning and use

Learners interact using the language whenever possible in classroom routines and communicative tasks with peers, the teaching team, Elders and community members. They give presentations and participate in conversations, with some preparation and support, such as the use of cue cards. They acquire skills in accessing and analysing historical documents and recordings.

Learners extend the range and quality of their writing through drawing on increased vocabulary and grammar knowledge, to the extent that this is possible in the revived language; and by drafting and editing their own work and that of their peers. They use models to create a range of texts, including descriptions, recounts and reflections.

Students learn about the techniques used to build language, such as analysing historical sources, interviewing/recording existing speakers, and they discuss the contemporary orthographic and grammatical choices of the community.

Students act as contemporary documenters of the language, for example, by listening and transcribing spoken texts, and preserving language resources developed at school for future access and use.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team, while additional enrichment and authentication of the learning experience is provided through access to Elders and other speakers living in the same community. Interacting with Country/Place to explore the environment and learn about Country/Place with Elders and other community members is essential to their continued learning. Students may also have access to community centres, such as interpretative museums or art and language centres. They may have opportunities to work with local Aboriginal and Torres Strait Islander communities in language-related projects, contributing to the development and maintenance of local language records and resources through structured and research-based projects.

Texts and resources

Country/Place and the community are the most important resources for learning and are the origin of most of the texts learners work with.

Learners engage with and help to shape a range of spoken, visual, written and digital texts that use as much language as possible. These include historical documents, photographs, maps, songs, raps, performance, stories, local environmental and social programs, painting and visual design, as well as teacher-generated materials such as games and items from the community and local environment. Some texts will incorporate English or another community language in a complementary role, filling in for items or expressions that have not yet been reconstituted in the language; other texts will be bilingual, with no mixing of languages.

Level of support

Learners are increasingly aware of and responsible for their own learning. They continue to access support resources such as word lists, modelled texts, dictionaries, grammars, and they seek teacher feedback to support their receptive and productive language use.

They require explicit instruction in the grammatical system of the language, which includes comparison with English and other known languages and opportunities to discuss, practise and apply their knowledge. They keep records of their learning, for example, through journals, folios or a blogs. They use these resources to reflect on their language learning and intercultural experiences.

The role of languages

The language is used whenever and to the extent possible in the revived language for classroom interaction, language learning tasks and experiences. Maximal use of the language increases learners' language proficiency and enhances language revival.

English and other known languages provide a basis for linguistic and cultural comparison and for a developing metalinguistic understanding of intercultural learning that supports the ability for consider different perspectives and ways of being mediated by language.

For revival languages that are at the 'beginning' end of the revival spectrum, English or another community language might be used in a complementary fashion, for example, to fill in for missing words or expressions. Alternatively, language owners and the community in general may decide to side-step these gaps altogether, thus avoiding the need to use other languages.

Years 7 to 10 Content Descriptions

Communicating

Socialising

Engage with peers, the teaching team and visiting Elders/community members to exchange information about interests, experiences, plans and aspirations
[Key concepts: experience, aspiration; Key processes: recounting, exchanging, connecting]

(ACLFWC174)

Elaborations

- expressing personal experiences, plans, goals and aspirations
- asking and responding to open-ended questions, for example, *why*, *how*, *when*, using modelled sentence patterns
- engaging in face-to-face or online discussions with peers about shared interests and experiences, such as sport, food, study, music or fashion
- recounting experiences, such as holidays, special events, milestones, sports events or celebrations
- sharing and comparing information about daily routines and responsibilities
- sustaining and extending conversations by seeking additional information
- exchanging information about family, friends, teachers, school subjects, entertainment and leisure activities

Engage in activities that involve collaboration, planning, organising, promoting and taking action
[Key concepts: event, experience; Key processes: planning, organising, negotiating]

(ACLFWC175)

- participating in planning and making arrangements, using language related to place and activity, for example, organising class events, such as holding a lunch, party or performance
- creating displays, presentations or performances for family, friends or the school community to showcase progress in learning and using the language
- giving and following instructions, using hand signs as appropriate, for example, explaining how to cook bush tucker or to make artefacts
- planning and participating in learning experiences that combine linguistic and cultural elements, such as an excursion to an art exhibition or performance, sharing responses and reactions
- designing posters, displays and digital presentations to draw attention to issues relevant to the Country/Place, such as reinstating names of places and features, protection of significant trees and landmarks, endangered wildlife, erosion, urban development, the importance of learning the language of Country/Place at school
- promoting events in the local community, such as festivals, sporting, music and cultural events that support/promote well-being and community development
- promoting Reconciliation in community by showcasing local language learning and language revival activities

Interact in class activities that involve making suggestions, seeking clarification, praising or complimenting one another
[Key concepts: opinion, clarification, interaction; Key processes: requesting, negotiating, expressing, comparing, deciding, explaining]

(ACLFWC176)

- making suggestions or providing clarification
- using respectful language for agreeing or disagreeing
- asking for clarification, for example, asking how to spell a word, say or write something, or asking for the meaning of a word or expression
- giving help, responding to instructions, offering suggestions
- asking and responding to closed and open-ended questions, for example, in relation to class assignments or due dates
- apologising, praising, complimenting and encouraging one another

Informing

Elaborations

Investigate and summarise factual information obtained from a range of sources on a variety of topics and issues related to the Country/Place

[Key concepts: Indigenous knowledge, social and environmental issues, lifestyles - past and present community initiatives and projects; ; Key processes: summarising, synthesising, referencing]

(ACLFWC177)

- investigating the origins of Aboriginal/Torres Strait Islander names in their local area, regional area and state and territory, recording meanings where known, and identifying different source languages
 - interviewing an Elder/community member to gain an historical perspective about their use of particular words and language constructions, observing correct respect protocols and presenting findings in formats such as digital presentations, posters, wall charts or oral summaries
 - researching and creating a profile of a prominent member of the language community, for example, an artist, sportsperson or leader
 - developing a photographic record/portfolio of different animal and plant species found in Country/Place, with commentary/annotations
 - seeking information from Elders to assist in classifying living things according to culturally appropriate categories, comparing these classification systems with those used in western approaches to the study of living systems
 - identifying and describing the role of various Aboriginal and Torres Strait Islander organisations that provide services to their community
 - researching different aspects of a selected Indigenous business operating in the community, for example, an enterprise associated with arts, bush medicine, bush food, tourism, transportation or animal husbandry, and presenting findings in digital formats or oral presentation mode
 - analysing a range of historical documents recorded in the language, classifying content according to categories such as date, text genre (wordlist, letter), topic (Indigenous knowledge, environment, traditions, fishing/navigation, rules), purpose of the text and intention of the writer (to inform, prescribe, describe, assert authority); and presenting findings in chart or table form or by giving a presentation
 - interviewing local community members about their experiences of living on the land, their relationship with language and culture and their recollections from the past, recording and presenting key findings
 - researching Aboriginal and Torres Strait Islander words used in English, using resources such as the Australian National Dictionary, and identifying and explaining words that come from the local language
-

Convey information about Country/Place events, experiences or topics of shared interest, using different modes of presentation

[Key concepts: audience, Country/Place, community life; Key processes: describing, explaining, creating, annotating]

(ACLFWC178)

- creating a booklet/pamphlet/guide/brochure for the local community that explains the origins of local place names and features their meaning and significance, providing explanations in language and English as appropriate
- creating a video clip or a photographic or journal record of activities such as an excursion, performance or sporting event to share with other language learners
- creating and editing a presentation that includes text, images and sounds to record and explain aspects of the Country/Place
- creating a short documentary to present information and features/stories, for example, about the Country/Place and associated social and cultural events, including, for example, interviews with and quotes from prominent identities
- compiling a portfolio of texts about Country/Place, for example, a class anthology of stories and songs from the community, procedural texts, histories of the region, profiles of community identities
- creating an interactive presentation for younger children that highlights the benefits of maintaining and strengthening the language of the Country/Place

Creating

Interpret and respond to texts by sharing personal reactions, comparing themes, describing and explaining aspects of artistic expression and how these relate to land, sky, sea, water, people, plants, animals and social and ecological relationships

[Key concepts: representation, imagination; Key processes: interpreting, explaining, describing, discussing; Key text types: songs, dances, stories, paintings and visual design, video clips, films]

(ACLFWC179)

Elaborations

- listening to Elders/community speakers tell stories on Country/Place, interpreting signs and gestures and using correct protocols to ask clarifying questions and to find out about the cultural role of storytelling
- interpreting and responding to texts such as songs, stories, films or video clips by recording key vocabulary and expressions, identifying and explaining main ideas, themes and sequences of events, for example, by sharing personal reactions with others
- discussing how key messages and beliefs are communicated through stories and visual and creative arts, for example, comparing the role and representation of animals, people and landscapes in different expressive forms
- discussing and explaining how land, sky, sea, people, plants, animals and social and ecological relationships are expressed through the arts
- investigating traditional and contemporary arts, including paintings, weavings, artefacts, and identifying how they relate to or express elements of Country/Place and people
- listening to, viewing and comparing personal responses to popular music, identifying key messages, themes and performance styles, and considering how they incorporate social commentary
- discussing how stories and songs often link neighbouring Aboriginal and Torres Strait Islander groups and nations
- retelling stories belonging to Country/Place

Create a range of spoken, written and multimodal texts to entertain others, involving real or imagined contexts and characters

[Key concepts: imagination, journey; Key processes: creating, collaborating, performing, composing; Key text types : raps, songs, performances, stories, cartoons, advertisements, digital texts, video clips, skits, paintings, visual designs]

(ACLFWC180)

- creating a rap or skit to entertain others, including digital or performative elements,
- creating own visual and performative art work, using symbols and techniques appropriate to Country/Place to convey a message or emotion
- taking on the role of a character from a story and responding to questions in-role
- creating and performing real or imagined experiences, using expressive language, gestures and supporting materials to create dramatic effect
- creating animations, short plays or stories to present in class or to share with a wider virtual audience
- composing simple songs, sporting chants, jingles, posters or advertisements for real or imagined situations or products
- telling the story of a real or imagined journey, involving a variety of characters, places and events
- collaborating with community to tell stories

Translating

Translate and interpret texts from the language to English and vice versa, comparing their versions and considering how to explain elements that involve cultural knowledge or understanding

[Key concepts: equivalence, representation, meaning, interpretation, idiom; Key processes: comparing, explaining, interpreting]

(ACLFWC181)

Elaborations

- translating and interpreting texts from the language to English and vice versa, comparing own interpretations with those of others and discussing what differs and why
- translating and interpreting texts such as narratives, song lyrics, dialogues or posters, considering how to explain elements that involve cultural knowledge or understanding, and using resources such as dictionaries and grammars
- using and explaining words and expressions that do not easily translate into English and considering choices made when conveying equivalent meaning in English
- identifying and explaining concepts, practices and expressions in the language which do not easily translate into English, for example, the number system, terms for colour, language associated with time, daily and seasonal cycles, kinship terms
- understanding and applying culturally appropriate and ethical behaviour when interpreting and translating

Create bilingual texts for the wider community collaboration with others

[Key concepts: interpretation, expression, bilingualism; Key processes: designing, explaining, classifying, glossing, annotating, composing]

(ACLFWC182)

- creating shared bilingual learning resources, such as print or digital word banks or glossaries of expressions used in everyday interactions in the language and in English
- creating bilingual learning resources for younger learners, for example, children's stories and games
- performing a role-play or skit for a specified audience, using the language for the performance and English for supporting explanations and commentary
- creating bilingual texts, using subtitles and captions, to inform the school community about aspects of the language and culture
- creating a bilingual display, for example, a video-clip or photographic display to showcase events and shared experiences, such as a bush trip
- creating bilingual digital texts such as song lyrics or dialogues which allow display in the language, in English or in both

Identity

Elaborations

Consider and discuss their own and each other's ways of communicating and expressing identity, reflecting on how the language links the local, regional and national identity of its speakers with the land

[Key concepts: identity, perspective, biography; Key processes: sharing, comparing, considering, reflecting, analysing]

(ACLFWC183)

- considering how their own biography, including elements such as family origins, traditions, beliefs, practices, interests and experiences, shapes their sense of identity and ways of communicating
- describing kinship connections with the surrounding Country/Place or connections of an Elder or guest speaker
- creating spoken, written or multimodal texts, such as identity maps, timelines, digital presentations or family trees with captions, to mark key milestones and significant influences in their lives, for example, key people, events, educational experiences, community affiliations, traditions or travel experiences, considering how these shape identity
- comparing and reflecting on how identity is expressed across languages and cultures, for example, by considering the idea of 'belonging' as expressed in different languages
- discussing the role that language and culture play in the identity and well-being of Aboriginal and Torres Strait Islander peoples
- investigating how particular policies and practices affect the sense of identity of Aboriginal and Torres Strait Islander peoples, for example, the effect of language loss, separation from Country/Place/family/community
- reflecting on how Aboriginal and Torres Strait Islander Peoples from different nations express their group identity, for example, through practices and symbols such as flags, Welcomes to Country, Indigenous rounds in sporting leagues
- reflecting on how their own biography, including family origins, traditions, beliefs, practices, interests and experiences, shapes their sense of identity and ways of communicating
- discussing the link between identity and connections to land/water/sea/sky, culture and language and the health and well-being of individuals and community
- reflecting on how the language links the local, regional and national identity of its speakers with the land, water, sea and sky

Reflecting

Elaborations

Participate in intercultural interactions and consider own reactions when engaging with Elders and community members and resources

[Key concepts: intercultural experience, perspective, insight, self-reflection, ways of knowing and being, reconciliation, discrimination; Key processes: comparing, analysing, explaining, reflecting, choosing]

(ACLFWC184)

- reflecting and reporting on how learning the language provides insights into the relationship between language and culture in general, and how their own assumptions about ways of knowing and being may change through the experience
- reflecting on how learning the language provides a distinctive means of understanding the Country/Place, including the relationship between land, the environment and people, and issues of discrimination and reconciliation
- keeping a journal of memorable experiences (humorous, satisfying or challenging) associated with learning and using the language in various contexts, noting personal responses and reflections over time and insights gained
- identifying and comparing how emotions or attitudes such as respect, shyness, exuberance or embarrassment are shown, displayed and expressed across different languages and cultures

Understanding

Systems of language

Understand and explain the sound patterns in spoken language and use developing phonemic awareness to represent these patterns in written form

[Key concepts: metalanguage, patterns, phonetic articulation, syllable; Key processes: reading, investigating, comparing]

(ACLFWU185)

Elaborations

- reading aloud for meaning to demonstrate comprehension of sound–symbol correspondences
- developing metalanguage to describe and talk about sounds and phonology, for example, *place and manner of articulation, uncertain or missing sounds*
- investigating sound patterns, for example, consonant and vowel sequences, and word-level patterns, for example, allowable word-final sounds, allowable consonant clusters, word stress
- understanding the major categories of place of articulation in Aboriginal and Torres Strait Islander languages, for example, peripheral, laminal, apical, and their realisation across different languages and regions in Australia
- establishing similarities in the sound systems of related languages otherwise masked by differing spelling systems
- using their knowledge of alphabetic conventions for Aboriginal and Torres Strait Islander languages to transcribe spoken texts from a range of languages, for example, those related to the target language or those from neighbouring regions
- comparing and explaining the relative consistency of Aboriginal and Torres Strait Islander languages and English in spelling words
- understanding the phonemic basis of alphabetic spelling systems and the fact that different sounds can be covered within a single phoneme or letter
- exploring different writing systems that are based on different principles, for example, syllabic or ideographic

Expand vocabulary and understand and use a range of vocabulary sets and grammatical structures that are available in the language

[Key concepts: system, grammatical case, transitivity; Key processes: explaining, discussing]

(ACLFWU186)

- understanding case and case marking on nouns, pronouns and adjectives
 - explaining how verbs can be derived from nouns and vice versa, comparing with similar processes in English and other known languages
 - composing and varying messages according to the available resources of the language, such as:
 - suffixes, including 'having', 'for want of', 'similar to', 'like'
 - verbless sentences, for example, equative, descriptive, possessive
 - verb categories, including intransitive, transitive, causative, inchoative, reflexive–reciprocal
 - verb aspect, including continuous, transitory, perfective, imperfective
 - verb-stem morphology, including compound verbs, reduplicated verbs, habitual/characteristic, derivation (nouns into verbs)
 - expressing time, manner, attitude and place, according to the available language resources, such as:
 - elaborations of past tense
 - temporal expressions, for example, 'beforehand', 'afterwards', 'too late', 'originally'
 - expressions of frequency, immediacy and duration, for example, 'persistently', 'at once', 'a few times', 'for a while'
 - attitudinal words, particles and interjections, for example, terms expressing endearment, embarrassment, shame or pity
 - locational cases as used in locative phrases, and extensions of these, for example, expressing origin or causation
 - structuring and linking clauses, focusing on issues of agreement with transitive and intransitive verbs, using verb-linking devices, for example, serialisation and embedding
 - discussing lexical and grammatical relationships between the language and other languages of the region, for example, common words and structures
 - discussing grammatical and lexical contrasts between the language and English/ other known languages, for example, the figurative use of language, vocabulary associated with specialised domains
-

Discuss the purpose and roles of various spoken, written and visual texts in the language

[Key concepts: text, relationship, intention; Key processes: analysing, investigating, linking and sequencing]

(ACLFWU187)

- understanding the purpose and role of different types of text in the language, for example, declaring identity, acknowledging parts of traditional belief systems, acknowledging ancestors, passing on knowledge and information, mapping resources on Country and managing natural phenomena such as weather
- understanding that Country/Place can be interpreted as text by the community
- discussing ways that songs function to capture language and meaning in ways similar to literature in other cultures
- linking and sequencing ideas to form cohesive texts, using appropriate grammatical forms and elements, for example, serialisation, connectives, embedding, headings and paragraphing

Investigate how the kinship system functions to integrate personal and community histories and relationships

[Key concepts: interconnectedness, human relationships, ownership, rights and responsibilities; Key processes: describing, explaining, investigating, exploring]

(ACLFWU188)

- understanding and discussing kinship as a system, and explaining its importance in maintaining and regulating social relationships in Aboriginal and Torres Strait Islander communities
- investigating how the language community addresses gaps in knowledge about the kinship system
- exploring how language is involved in the patterning of ownership and management of land and associated stories
- understanding that different roles and responsibilities in community and public life can be determined by kinship and traditional social groupings
- explaining how art forms, songs and dances identify people and places

Language variation and change

Elaborations

Discuss variations in language use that reflect different social and cultural contexts, purposes and relationships

[Key concepts: respect, silence, kinship; Key processes: examining, explaining, analysing]

(ACLFWU189)

- understanding how elements of communication in Aboriginal languages and Torres Strait Islander languages, such as gestures, facial expressions, choice of language and use of silence, vary according to context, situation and kin relationships, for example, eye contact, pointing with lips
- analysing and discussing intergenerational differences in language use, for example, young people's language compared to the language of older generations
- explaining variations in language use that reflect different levels of formality, authority and status, for example, expressions used with respected kin, ways of asking questions of different people

Describe and reflect on how languages change over time and influence one another

[Key concepts: contact, change; Key processes: exploring, observing, reflecting]

(ACLFWU190)

- exploring form, usage, history and impact of contact languages, including creoles, pidgins and Aboriginal Englishes
- investigating and describing how the language has changed over time
- observing changes to language that reflect changing lifestyles, cultural trends and emerging needs, for example, youth language, the language of new technologies, the impact of music, media and technology on communication
- reflecting on changes in their own use of their first language(s) over time, noticing how and when new ways are adopted or existing ways adapted
- exploring changes in language over time, for example, by reviewing old films from state archives or early television shows that include Aboriginal and Torres Strait Islander actors

Language awareness

Elaborations

Investigate and compare the ecology of Aboriginal and Torres Strait Islander languages to Indigenous languages in other countries, and consider issues such as language policy, language rights, language loss, advocacy, reform and multilingualism

[Key concepts: environment, boundaries, policy, revival; Key processes: researching, investigating, exploring, considering]

(ACLFWU191)

- investigating the social, cultural and linguistic effects of language change and/or language loss in the region
- understanding terms used in the discussion of language revival, for example, *revitalisation*, *reclamation*, *renewal*
- investigating the geographical extent of use of the language in earlier times
- considering the future prospects of the language in the context of its current linguistic ecology
- exploring Indigenous multilingualism in various communities, including regional varieties, Aboriginal Englishes and creoles
- researching the impact on Aboriginal and Torres Strait Islander languages in general, and on the target language in particular, of historical events, government policies, legislation and judicial processes, such as stolen generations, mission schools and advocacy
- identifying social and government policies and practices that have impacted positively on language acquisition, for example, the performing of Welcome to Country and the Acknowledgement of Country at events, on television programs, in films, and efforts to raise the profile of Aboriginal and Torres Strait Islander languages in the wider Australian community and in particular geographical regions
- investigating the situation of indigenous languages in other countries, for example, New Zealand, Hawaii, North America, Japan, Latin America, considering issues such as language rights, language endangerment, revival and reclamation, drawing comparisons with the situation of Aboriginal languages and Torres Strait Islander languages in Australia
- researching current media debates in relation to Aboriginal language and Torres Strait Islander languages
- comparing word lists of languages and dialects of the region, to understand similarities and differences and identify potential opportunities for reconstruction

Understand and apply cultural norms, skills and protocols associated with learning, using and researching Aboriginal and Torres Strait Islander languages

[Key concepts: ownership, custodianship, ethical behaviour, intellectual property; Key processes: acknowledging, investigating, applying]

(ACLFWU192)

- using culturally appropriate protocols when engaging with and learning from Aboriginal and Torres Strait Islander peoples and communities
- acknowledging cultural and intellectual property rights and copyright over language work, including song holders, story keepers, language informers, composers and choreographers

Role of language and culture

Elaborations

Reflect on how ways of using language are shaped by communities' ways of thinking, behaving and viewing the world, and the role of language in passing on knowledge

[Key concepts: Indigenous knowledge, value transmission;
Key processes: reflecting, exploring, analysing, comparing]

(ACLFWU193)

- explaining the role of Aboriginal and Torres Strait Islander languages and cultures in passing on knowledge such as sustainable care of the environment, rules for living, ways of behaving, spiritual and cultural functions and History
- reflecting on Indigenous taxonomies and the ways they divide the natural and cultural world and comparing these to other systems of classification
- analysing concepts related to cultural values in Aboriginal and Torres Strait Islander languages, including naming systems, for example, the use of kinship terms, nicknames, substitute words and pronoun systems, comparing to ways of referencing relationships in their own language(s) and culture(s)
- exploring how aspects of traditional culture and society have been preserved through language, and discussing the importance of maintaining Australian Aboriginal and Torres Strait Islander languages, for their speakers and for all Australians
- analysing and discussing core cultural concepts reflected in Aboriginal languages and Torres Strait Islander languages, such as *respect*, *avoidance*, *reciprocity*, *obligation*, *responsibility*
- understanding that culturally significant attitudes and beliefs conveyed through Aboriginal and Torres Strait Islander languages are related to the past, to land, plants and animals and to celebrations
- identifying and comparing how emotions or attitudes, such as respect, affection or embarrassment, are shown/displayed across different languages and cultures
- comparing elements of communication such as the role of silence or use/avoidance of eye contact in different cultural contexts and exchanges
- recognising that there are multiple views on and partial explanations for events and issues
- reflecting on the ways culture is interpreted by others, for example, by identifying how stereotypes influence perceptions of other groups or individuals
- understanding that each Aboriginal or Torres Strait Islander person inherits language as part of their birthright, along with membership of a particular group and attachment to Country or Place, and that they become custodians and owners of land, water or sea and of language

Role of language building

Elaborations

Explore language building processes and protocols in communities

[Key concepts: language revival, protocols, lexical and grammatical resources, advocacy; Key processes: identifying, investigating, discussing]

(ACLFWU194)

- investigating language revival efforts in their own community and neighbouring regions, for example, who and what is involved, successes, challenges and protocols, and what these efforts mean to local communities
 - understanding what lexical and grammatical resources and processes are available to build language, for example, linguistic resources and analogies from neighbouring languages, speakers, archival material
 - investigating/understanding protocols for filling gaps and extending semantic domains in the language, including protocols for borrowing from other languages, for creating words by analogy and drawing from within the resources of the language, and discussing associated ethical issues
 - investigating/researching the protocols for receiving, transferring and publishing linguistic resources
 - understanding the importance of intergenerational collaboration in reviving languages, and discussing some of the associated challenges
 - discussing the importance of reviving languages for the individual, the language community and the wider Australian society
 - identifying potential avenues/domains for expansion of the language and gaps to be filled, with the support of community language teams and Elders
 - appreciating the role of languages advocacy, education and research in building languages
 - understanding how the process of language-building expands existing linguistic and cultural resources in the Australian community
-

Investigate and explain techniques used to build language, considering challenges involved and understanding their role as contemporary documenters of language

[Key concepts: language revival, language building, authenticity, linguistic techniques; Key processes: identifying, analysing, discussing]

(ACLFWU195)

- identifying and discussing the main areas of the language that could be served by language building
- analysing the authenticity of historical sources used in language building and discuss the strengths and limitations of these
- investigating different approaches that have historically been used to record language and what this means for language revival, for example, different spellings, different domains of use, lexical biases
- understanding challenges in developing new words and structures for the language, and how these words might be developed within the existing resources of the language or by analogy from related languages
- discussing techniques used to build language, such as analysing historical sources, interviewing/recording existing speakers
- understanding the orthographic and grammatical choices of the contemporary community
- considering domains of use where the language may grow in the future
- trying out ways of making new words under the guidance of an Aboriginal or Torres Strait Islander languages specialist or of an Elder where appropriate
- working with local Aboriginal and Torres Strait Islander communities in language-related projects, and contributing to local language records and resources through structured and research-based projects
- understanding their role as contemporary documenters of the language, for example, listening and transcribing spoken texts, preserving language resources developed at school
- developing a variety of resources for younger and future students of the language
- investigating programs and initiatives that serve to maintain and strengthen language use, for example, school languages programs, bilingual education, research programs, recording and archiving material, websites, databases and documentaries
- exploring the importance of advocacy in supporting the maintenance and development of language and culture

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 7 to 10 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages LR pathway are generalised in order to cater for the wide range of languages which may be learnt as an LR within the school context. They will need to be adapted for use for specific Aboriginal and Torres Strait Islander languages. They will be shaped by the current progress of language revival for a particular language and the amount of vocabulary and variety of language structures available for teaching and learning.

By the end of Year 10, students use the language to initiate, sustain and extend interactions, and to exchange information about interests, experiences and aspirations. They use spontaneous language wherever possible to participate in activities that involve taking action, collaborating, planning, organising and negotiating. They use culturally appropriate norms and skills, and respect protocols when engaging with and learning from visiting Elders and community members. When interacting in the classroom, they make suggestions, seek clarification, praise or compliment each other. Students use language where possible to locate, analyse and summarise factual information from a range of sources such as historical documents, Elders and community members. They demonstrate their understanding of Country/Place, for example, by explaining the origin, meaning and significance of local place names and features, or by presenting texts and stories about the Country/Place and associated social and cultural events, using language as much as possible and different modes of presentation. Students view, listen to, and share personal responses to a range of texts, such as songs, stories, films and other modes of artistic expression, and demonstrate understanding by identifying and explaining main ideas, key themes and sequences of events. They explain how artistic expression relates to land, water, sea, sky, people, animals, plants and social and ecological relationships. They use expressive language, gestures, and supporting materials to create a range of spoken, written and multimodal texts, for example, art work to convey messages using symbols and techniques appropriate to Country/Place, or narrations of real or imagined journeys involving a variety of characters, places and events. Students apply culturally appropriate and ethical behaviour and lexical and grammatical resources to interpret and translate texts to and from the language; and they explain culture-specific concepts, practices and expressions that do not easily translate. They co-create bilingual texts to inform the wider community about aspects of the language and culture. They reflect on how their own biography shapes their sense of identity and ways of communicating, and discuss the role that language and culture play in the identity and well-being of Aboriginal and Torres Strait Islander peoples. They explain how particular policies and practices have impacted on Aboriginal and Torres Strait Islander peoples' sense of identity, for example, through language loss and separation from Country/Place, family and community.

Students explain and use the sound system of the language, and a range of available vocabulary sets and grammatical structures when speaking and writing. They use metalanguage to explain sound and writing systems and grammatical structures in the language. They analyse the purpose and role of a range of spoken, written and visual texts, for example, declaring identity, acknowledging ancestors and traditional belief systems, and passing on knowledge and information. Students explain the importance of the kinship system in regulating relationships and behaviour in Aboriginal and Torres Strait Islander communities. They explain how and why language use is adjusted to suit different social and cultural contexts, purposes and relationships, for example, expressions used with respected kin. They explain how languages change over time and influence one another, for example, by describing the history and impact of contact languages, including creoles, pidgins and Aboriginal Englishes. Students make comparisons between the ecologies of Aboriginal and Torres Strait Islander languages and indigenous languages in other countries, in areas such as language policy and rights, language loss, advocacy and reform, and language revival. They identify the role of language in passing on knowledge, and explain how communities' ways of thinking, behaving and shaping worldviews influence how language is used. They investigate language revival efforts in their own community and neighbouring regions, and identify resources and processes that are available to build language, for example, lexical and grammatical resources. Students explain protocols for filling language gaps and extending semantic domains, including those required for borrowing from other languages, creating words by analogy and drawing from within existing resources of the language. They explain various techniques that can be used to build language, such as analysing historical sources or interviewing existing speakers, and identify associated challenges. Students reflect on their role as contemporary documenters of language, and recognise the importance of intergenerational collaboration in reviving and maintaining languages.

The Australian Curriculum Languages - Framework for Aboriginal Languages and Torres Strait Islander Languages Second Language Learner Pathway (L2) - Years F–10 Sequence

Framework for Aboriginal Languages and Torres Strait Islander Languages

Foundation to Year 2

The nature of the learner, the pathway and particular language

Languages studied in the Second Language Learner Pathway (L2) are typically languages used in spoken form as the language of everyday communication by whole communities across all generations.

The second language learner pathway has been written on the assumption that learning will occur off-Country involving students who are typically not from the language community and have little or no experience of the language and culture. They are introduced to learning the language at school as an additional, new language.

The language chosen for curriculum development should have a sizeable set of resources in a variety of media, such as local documentaries, bilingual narrative and descriptive texts, and educational materials in print and digital form. Learning is enriched and authenticated by interaction with visiting Elders and community speakers, and where possible visits to Country/Place. Information and communications technologies provide additional resources to support a range of language and culture experiences.

The curriculum content and achievement standards in the Second Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a second language. The content descriptions, content elaborations and achievement standards for the Second Language Learner pathway will need to be adapted for use with the particular language being taught and will need to be modified if the program occurs on-Country or if the learners are from the language community.

Children enter the early years of schooling with established communication skills in one or more languages and varying degrees of early literacy acquisition. For young students at this level, learning typically focuses on the immediate world of their family, home, school, friends and local environment. They are learning how to socialise with new people, share with others, and participate in structured routines and activities at school.

Language learning and use

The language is learnt in parallel with English language and literacy development. Learning in the two languages progresses at very different levels but each supports and enriches the other.

The language is used in classroom interactions, routines and activities and is supported by the use of visual and concrete materials, gestures and body language. At this stage, there is a focus on play and imaginative activities, games, music, movement and familiar routines, which provide scaffolding and context for language development.

Oral language is developed through listening to the sounds, shapes and patterns of the language, through activities such as rhymes, songs, clapping and action games and through imitating and repeating sounds in aural texts as modelled by the teaching team, visiting Elders and community speakers.

Learners experiment with simple formulaic expressions and with one- or two-word responses and single-idea phrases to prompts and cues. As they progress to using language for interactions such as greetings, asking for help, talking about self, friends and family, or asking and answering questions, they notice that the language behaves differently in different situations and that speakers communicate in some ways that are different from their own. Creative play provides opportunities for exploring these differences and for using language for purposeful interaction.

Students learn about Country/Place and community by interacting with visiting Elders and community speakers when possible, and by engaging with stories and songs and other texts such as videos, maps and pictures. They learn about the concepts of kin and social groupings, and how these are symbolised in the natural environment.

Students learn to use appropriate respect terms and to demonstrate respectful and appropriate behaviour when interacting with Elders, community speakers and community texts.

Learners will recognise the same alphabet they are learning for writing English. They write by tracing and copying, forming letters legibly. They learn to read and write words and sentences independently using modelled language, for example, matching pictures with single words, labels and captions. The use of repetition and recycling in instruction helps children to identify high-frequency words and simple phrases and to recognise the purpose and intention of simple texts.

They begin to understand how the language works, to compare it with English and to understand its place in relation to regional and national language diversity.

Contexts of interaction

Across Foundation to Year 2, learning occurs largely through interaction with peers and the teaching team, supplemented by some access to visiting Elders and community speakers. Information and communications technologies (ICT) resources provide additional access to language and culture experience.

Texts and resources

Children engage with a variety of spoken, visual, written and digital texts, which are short, clearly structured and supported by visuals and paralinguistic devices, for example, tone of voice, facial expression, gesture, with much repetition and recycling of structures and vocabulary. They listen and respond to teacher talk, share ideas and join in with song, dance, story and rap, and various forms of play, performance, conversational exchanges and activities mediated by language. Print and digital texts include stories, shared Big Books, songs, visual designs, photos, videos, environmental maps and wall charts and teacher-generated materials such as games, flashcards and items from both the local community and the target language community.

Level of support

Learning is supported through the provision of experiences that are challenging but achievable with appropriate scaffolding and support. This involves modelling, monitoring and moderating by the teacher; provision of multiple and varied sources of input; opportunities for revisiting, recycling and reviewing learned language, and continuous cueing, feedback, response and encouragement.

The role of languages

Learners are encouraged to use the language being learnt whenever possible in class interactions and daily routines with the teaching team, visiting Elders and community speakers. Using English for explanation and discussion allows learners to talk about differences and similarities they notice between the language and their first language(s) and culture(s), to ask questions about language and culture, to consider how they feel when they hear or use the language and to talk about how they view different languages and the people who speak them. This introduction to the 'meta' dimension of intercultural learning develops the ability to consider different perspectives and ways of being as mediated by language.

Foundation to Year 2 Content Descriptions

Communicating

Socialising

Elaborations

Interact with each other, the teaching team and visiting Elders/community speakers using simple language and gestures for greeting and farewelling, talking about self and family

[Key concepts: self, family, relationships; Key processes: interacting, sharing, listening]

(ACLFWC067)

- participating in everyday exchanges, such as greeting and farewelling
- interacting with the teaching team and visiting Elders/community speakers using appropriate protocols such as respect terms, behaviour and forms of address, including, for example, using assigned kinship roles
- introducing and describing self, family, friends, favourite objects and pets using familiar and modelled language, supported by visual props, for example, drawings, photos
- listening to questions (such as *what*, *who*, *where*) about self, family, friends and immediate environment, and responding with words and actions, including gesture
- expressing likes and dislikes using simple statements

Participate in guided group activities such as games, songs and simple tasks, using movement and gestures to support understanding and to convey meaning

[Key concepts: cooperation, play; Key processes: turn-taking, matching, choosing, cooperating, following instructions]

(ACLFWC068)

- participating in games, tasks and activities that involve turn taking, guessing, matching and choosing objects using modelled questions and responses
- participating in action games and songs by matching actions to words
- following instructions by moving around or locating objects in the classroom
- using rehearsed language to collaborate and follow instructions, for example, in craft activities using traditional materials such as nuts, twigs, bark, seeds, shells
- working collaboratively to decide on a class performance, activity or action
- working collaboratively to adapt and perform action songs, for example, by changing lyrics, substituting words and phrases based on modelled patterns, rehearsing and performing songs with appropriate gestures and actions

Interact in classroom routines and respond to teacher instructions

[Key concepts: routine, instruction; Key processes: participating, responding, following instructions]

(ACLFWC069)

- participating in routine exchanges such as asking and answering questions, responding to the class roll, describing the weather, requesting classroom objects
- responding to and using routine classroom language, for example, 'sit down', 'stand up', 'listen!' 'look this way', 'tidy up' in the target language
- following instructions related to transition activities, for example, 'form a circle', 'get into groups of three', 'put on your hat', 'line up'
- responding to requests and instructions in verbal and non-verbal ways, such as movement, gesture and action, for example, in class and outdoors, in games and songs, or on visits and excursions

Informing

Elaborations

Locate specific words and familiar phrases in texts such as charts, lists, photos, maps, and use information to complete guided oral and written tasks

[Key concepts: natural and built environment, community life, Indigenous knowledge; Key processes: identifying, selecting, sorting, matching, labelling, mapping Country/Place]

(ACLFWC070)

- identifying, naming, and labelling key topographical features of the target language region, for example, creeks, springs, rocky outcrops, estuaries, reefs, desert landforms, by viewing environmental maps, photos, videos and objects
- listening to an Elder/community speaker sharing knowledge about Country/Place and recording key information
- identifying and labelling significant features of the built environment, for example, dwellings, settlements, community store, health clinic, school, places to play, roads and tracks
- locating key information about the target language region, for example, weather, seasons, daily and seasonal behaviour of animals, using resources such as charts, photos, videos, films, visual prompts and by listening to visiting Elders/community language speakers
- naming, labelling and sorting bush foods, animals, plants and natural objects from the environment into culturally appropriate categories, such as, edible/non-edible, meat/non meat, salt water/fresh water, day/night animals, rough/smooth, hard/soft
- describing aspects of shared knowledge about the target language region, for example, by pointing to places on a map or at pictures of food sources, plants and animals
- identifying and labelling animal tracks in the sand, dirt or mud
- labelling, drawing and matching body parts

Give factual information using simple statements and descriptions, gestures, and captions

[Key concepts: Country/Place, community life; Key processes: labelling, describing, presenting, recounting]

(ACLFWC071)

- using some location terms to talk about and describe the region of the target language, for example, *up*, *down*, *near*, *far* and using topographical words such as *swamp*, *soakage*, *reef*
- presenting information about the target language region, for example, in relation to animals, plants, food, artefacts, using modelled sentences, matching captions to pictures and filling in gaps
- collaboratively recounting details about shared events, such as sports day, excursions, a class visit from an Elder, a visiting performing group from the target language community, for example, by making a BigBook, digital presentation or display
- labelling aspects of daily routines, selecting captions or attaching word bubbles and sharing the information with others
- developing a pictorial story to describe typical activities and routines at home and at school

Creating

Elaborations

Participate in shared listening to, viewing and reading of texts and respond through singing, reciting, miming, play-acting, drawing, action and movement

[Key concepts: storytelling, response; Key processes: responding, performing, sharing, expressing; Key text types: songs, raps, dances, traditional and contemporary stories, paintings and visual design, video clips (IndigiTUBE)]

(ACLFWC072)

- performing songs or stories that include repeated phrases, rhythms and non-verbal forms of expression, such as clapping, gestures, facial expressions and dance
- participating in shared reading of traditional and contemporary stories, responding through mime, drawings with captions, matching captions to images, dance, play-acting and other forms of expression
- listening to Elders/community speakers tell stories and responding by drawing, labelling and captioning or re-enacting with puppets, props or actions
- identifying key animals, birds and other characters in stories, songs, performances and dances and identifying the significance of particular dance or performance elements
- identifying and naming significant places, landscapes and topographical features through which travelling stories pass
- identifying key messages expressed in stories, song, dance and visual art, for example, rules for living
- predicting the content/meaning of narrative texts such as picture books, including titles, covers and illustrations, and giving reasons for their predictions
- responding to simple questions about characters and events in texts such as stories, songs, dances

Create and present shared stories, songs and performances using familiar words and patterns and support materials

[Key concepts: story, performance; Key processes: retelling, singing, re-enacting, dancing, drawing, performing; Key text types: songs, dance, stories, paintings and visual design, performances]

(ACLFWC073)

- making a shared Big Book based on an event, experience or performance
- creating own stories by sequencing a series of pictures with captions or by creating a storyboard with labels, using modelled language and repetitive phrases
- re-enacting or retelling simple stories, episodes or interactions with puppets, props, actions or gestures, using modelled language
- creating digital texts based around familiar contexts and characters, using pictures and captions
- creating simple songs or new versions of contemporary songs and raps, for example by substituting words and phrases, such as animal names, places or geographical features, adding characters, incorporating non-verbal forms of support, such as clapping, gestures and facial expressions
- creating new dance sequences, paintings and visual designs, using models from the target language and culture

Translating

Elaborations

Translate frequently used words and phrases using visual cues and resources such as word lists

[Key concepts: translation, similarity, difference, meaning; Key processes: noticing, identifying, translating]

(ACLFWC074)

- using classroom resources such as word banks, wall charts, visual dictionaries, word lists and pictures to translate the meaning of single words and common expressions
- translating and explaining in English the meaning of target language words, phrases and gestures used in everyday contexts and situations
- explaining to others culture-specific words, for example, names of artefacts or implements, kinship terms of address
- noticing elements of the target language and of English that are the same, such as the letters of the alphabet and some sounds
- showing others how different signs and hand talk are used and explaining basic signs for elements of the natural environment, for example, water, animals
- explaining symbols and their iconographies to others

Create simple oral, print or multimodal bilingual texts for the classroom environment, such as captions, labels and wall charts

[Key concepts: meaning, bilingualism; Key processes: labelling, captioning, displaying, matching]

(ACLFWC075)

- creating picture word lists and picture dictionaries and contributing to bilingual class books of words and their meanings
- creating bilingual texts for the immediate environment, for example, school/classroom signs
- performing presentations for the school community that involve both target language and English language elements, such as a contribution to an assembly or a performance for Grandparents' Day
- creating sets of word cards in the target language and in English and playing matching-word games
- writing captions, with support, for a photographic display to show parents/others about a class event, an experience such as sports day or a project to care for the school environment

Identity

Elaborations

Describe aspects of self, such as family, school/class and language/s spoken, noticing how these different elements contribute to one's identity

[Key concepts: identity, self, family, belonging; Key processes: describing, explaining, identifying]

(ACLFWC076)

- describing self and drawing pictures of family or creating a family tree, labelling with appropriate kinship terms for immediate family members
- identifying self as belonging to a family, class or peer group, representing these relationships through captioned pictures or photos or by creating digital presentations
- exploring the concept of collective identity, for example by considering the symbolic meaning of Aboriginal and Torres Strait Islander flags, items of dress, use of colour and patterns
- describing friends, favourite places, objects and languages they know/ are learning as markers of their identity
- noticing and comparing their use of words or expressions from different languages when communicating in English
- recognising the relationship between language, place and family in the formation of identity in Aboriginal and Torres Strait Islander communities and comparing these to relationships in their own lives

Reflecting

Notice what is similar or different to their own language and cultural expression when interacting with songs, stories, games, pictures and artistic expression from the target language and culture

[Key concepts: language, culture, similarity, difference, respect; Key processes: noticing, comparing, responding, reflecting]

(ACLFWC077)

Elaborations

- responding to teacher prompts in the target language or English, for example, What do you see?...or What do you notice about...? Why do you think that ...? 'How is this similar / different ...? to capture and express their impressions when viewing images or video-clips, singing songs, dancing or reading stories from the target language region
- comparing aspects of the lives of children in their own communities with those of children in target language communities as represented in digital images, video clips, IndigiTUBE and stories, for example, comparing ways of playing games, eating food, telling stories, or interacting at school, at home and in the community
- noticing similarities and differences in language that relates to culture, such as names of foods and animals particular to different climates and environments; and in cultural practices, such as sharing involved in extended families, special times, story-telling, yarnning

Understanding

Systems of language

Elaborations

Notice and imitate characteristic sounds, intonation patterns and rhythms of the target language(s) and how these relate to the written language

[Key concepts: pronunciation, rhythm, intonation, writing; Key processes: imitating, noticing, distinguishing, reading aloud]

(ACLFWU078)

- noticing and distinguishing sounds of the language and matching these with written symbols
 - distinguishing sounds in the language from English sounds and recognising when the target language is being spoken
 - experimenting with pronunciation to capture and produce speech patterns within and across single words and phrases
 - recognising, imitating and distinguishing between intonation patterns in statements, questions, commands, requests, exclamations and song, and noticing how these are distinguished in written language
 - learning that writing systems represent sounds and meanings, and becoming familiar with the alphabetic principles that associate individual sounds/ a range of sounds with particular letters/ combinations of letters
 - noticing that English and the target language share the same alphabetic base
 - associating spoken language with written morphemes, words, phrases and sentences
 - recognising alphabetic conventions particular to the target language, for example, digraphs representing a single sound, diacritics that alter the regular value of a letter
 - experimenting with sounds in songs and noticing how syllables can be separated to fit different tunes and rhythms
 - reading texts aloud, showing knowledge of sound–symbol relationships
-

Notice types of words in the target language and understand and use some elements of the target language structure
[Key concepts: word function, word order, variation, patterns, rules; Key processes: identifying, recognising, noticing]

(ACLFWU079)

- identifying people, places, things and events using:
 - nouns, for example, relating to family, kinship, items in the immediate natural and built environments
 - pronouns, for example, personal, interrogative, kinship and demonstrative
 - verbs for simple actions, states and processes
 - terms to qualify and quantify, for example, size, colour, number, or to classify or compare things
 - adverbs, for example, of location, time and manner
 - simple negation
- identifying particular forms and structures in the language, for example, those that specify, identify and describe objects and actions, time and place; those that state ownership, ask questions, convey commands
- noticing that compared to English and other known languages some words may be left out (ellipsis), or must be included or repeated in phrases and sentences, for example, “(it) went”, “big (dog) ate (it)”
- becoming aware how word order may differ from English or other known languages, for example, noun + qualifier vs qualifier + noun, ‘child happy’ vs ‘happy child’
- recognising the use of common affixes to nouns, for example, ‘the man’s dog’, ‘to the river’, ‘in the sea’
- recognising the use of common affixes on verbs, for example, to indicate tense and mood
- recognising influences across Aboriginal and Torres Strait Islander languages, for example, shared words
- understanding and using elementary metalanguage to describe word types, for example, *noun*, *pronoun*, *verb*

Recognise there are many ways of communicating messages in Aboriginal and Torres Strait Islander languages
[Key concepts: communication, narrative; Key processes: recognising, identifying]

(ACLFWU080)

- understanding that there are different ways of telling a story, such as Elders yarning, song, dance and music and associated visual design and spectacle, and through painting (body, bark, rock, sand)
- recognising that communication can also occur through sign language; identifying and using basic signs for things from the everyday environment
- understanding that texts have a purpose, for example, greetings, Welcome to Country/Acknowledgement of Country/Place, traditional stories, paintings, songs and dances convey community-wide messages
- identifying some features of narratives, for example, they are usually about journeys across Country, involving landforms, animals and plants
- recognising that writing, like speech, is rule-bound and involves following the conventions according to text type
- noticing how texts such as storybooks are sequenced and organised, for example, by identifying the main title and connections between pictures and text

Identify elements of the kinship system and its role in linking story and natural species and phenomena

[Key concepts: kinship, totemic relationships, place, cultural practices; Key processes: identifying, recognising]

(ACLFWU081)

- using kinship charts to identify kinship terms for immediate family, comparing with terms used in their own family
- recognising that Aboriginal and Torres Strait Islander peoples have their own personal relationships with animal species and natural phenomena
- recognising that people have a personal relationship with place, for example, birth place
- identifying skin names where appropriate
- understanding that ceremonial body markings, designs and paintings are determined by family, skin and story
- identifying which stories belong to which natural features, including animals and natural species, and discussing their significance

Language variation and change

Elaborations

Recognise that different words and language forms are used to address and communicate with people according to relationship and context

[Key concepts: kinship, context, relationship; Key processes: noticing, recognising]

(ACLFWU082)

- noticing that different forms of address and kinship terms are used depending on the relationship between participants
- recognising that the way someone is related to others affects how he or she speaks to them
- recognising that ways of speaking vary according to context and situation, for example, language used when interacting with peers during playground games is different to that used with the teaching team and with visiting Elders/community speakers
- recognising that language used in particular interactions can vary between cultural contexts, for example, the use of titles in English compared to kin categories in the target language

Recognise that languages borrow words from each other

[Key concepts: relatedness, word borrowing; Key processes: identifying, recognising, comparing]

(ACLFWU083)

- noticing and describing Aboriginal and Torres Strait Islander words and phrases used in everyday Australian life e.g. *jarrah*, *koala*, *euro*, *dingo*, *billabong*
- recognising words in the target language that are borrowed from English
- recognising that some words in the target language have come from other Aboriginal/Torres Strait Islander languages

Language awareness

Elaborations

Identify the region of the target language and notice how it is part of the broader regional and national language diversity
[Key concepts: linguistic diversity, language revival; Key processes: identifying, recognising]

(ACLFWU084)

- identifying regions, places and communities where the target language is spoken
- identifying immediate neighbours of the target language wherever it is spoken
- recognising that there are many different Aboriginal and Torres Strait Islander languages in Australia, for example, by viewing Language maps of their region, their state and the whole of Australia
- recognising general geographic types of Aboriginal and Torres Strait Islander languages, including the target language region, for example, desert, coastal, rain forest, sub-alpine, riverine and seas
- recognising that linguistic diversity in contemporary Australia includes Indigenous as well as non-Indigenous languages, and that Australia has many languages, for example, by identifying languages used by classmates by creating a class profile or language map
- recognising that some Aboriginal languages and Torres Strait Islander languages in Australia are strong, while others are endangered or in the process of being revived or reclaimed
- recognising shared vocabulary across groups of Aboriginal and Torres Strait Islander languages, for example, 'hand', 'water', 'crow'

Understand that language belongs to communities and that language learning requires the application of respectful and appropriate behaviour
[Key concepts: ownership, belonging, respect; Key processes: demonstrating, applying]

(ACLFWU085)

- understanding that each Aboriginal language or Torres Strait Islander language is recognised as belonging to a group of people who are the language owners or custodians
- demonstrating and applying respectful and appropriate behaviours, including the use of appropriate language forms, in the presence of visiting Elders/community members
- understanding the purpose of Welcomes to Country/Acknowledgements of Country and talking about their experiences of participating in welcomes and acknowledgements, for example, at school, sporting events, festivities

Role of language and culture

Elaborations

Notice that people use language in ways that reflect their culture, such as where and how they live and what is important to them

[Key concepts: Country/Place, Language, Culture, symbol;
Key processes: noticing, recognising, questioning, making connections]

(ACLFWU086)

- exploring culture as an essential part of human life, understanding that it is shared and passed on between generations; that it includes observables such as ways of cooking and ways of greeting, symbols such as flags and colours, as well as invisible elements such as beliefs and values, how people think about themselves and others, and how they relate to their environment
- recognising that in each culture there are general rules of what to say and do, when, where and with whom, and that these rules differ from culture to culture
- recognising that beliefs and behaviours are woven into languages and cannot be separated from them
- noticing how respect for Elders and Country/Place is built into the language
- recognising significant symbols and features in the target language, for example, in song, visual design, dance moves
- recognising that languages encapsulates values held about land and Country, for example, caring for Country

Role of language building

Recognise that Aboriginal and Torres Strait Islander languages are transmitted from generation to generation
[Key concept: oral transmission; Key processes: noticing, recognising, considering, valuing]

(ACLFWU087)

Elaborations

- recognising that Aboriginal and Torres Strait Islander languages have been maintained through an oral rather than a written tradition
- recognising that Aboriginal and Torres Strait Islander languages have been maintained and passed down through generations by means of storytelling, performance, songs and viewing Country/Place as text
- recognising that language speakers are the most important primary source of language knowledge
- considering why learning an Aboriginal language/Torres Strait Islander language is important to the school community and considering how this promotes Aboriginal languages and Torres Strait Islander languages more generally

Framework for Aboriginal Languages and Torres Strait Islander Languages

Foundation to Year 2 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages Second Language Learner Pathway are generalised in order to cater for the range of languages that may be learnt as an L2 in the school context. The achievement standards will need to be adapted for specific Aboriginal and Torres Strait Islander languages.

By the end of Year 2, students interact with the teaching team, visiting Elders and community members to talk about themselves, family, friends and immediate environment using familiar language supported by gestures. When interacting with Elders and community speakers, they use appropriate forms of address and terms of respect. They use movement, gestures and rehearsed language to participate in guided group activities, such as adapting and performing action songs. They interact in familiar classroom routines by responding to requests, following instructions and using routine classroom language, for example, to request classroom objects. Students listen to, read, view and comprehend texts that are short, clearly structured and supported by visuals and paralinguistic elements, for example, tone of voice, facial expression, gesture and repetition and recycling of structures and vocabulary. They demonstrate their understanding of the target language region, for example, by making simple statements and giving descriptions of animals, food and artefacts, labelling and sorting these into categories, or by pointing to key topographical features on a map or at pictures of food sources, plants and animals in response to questions. They respond to texts such as stories, songs, dance and visual art through singing, miming, play-acting, drawing, action and movement. They demonstrate understanding by naming key characters, significant places, landscapes or topographical features and by identifying key messages. Students use familiar words, patterns and support materials to create and present shared stories, songs and performances. They translate and explain in English the meaning of target language words, simple phrases and gestures used in everyday contexts and situations. They create simple bilingual texts for the classroom environment, such as captions, labels and wall charts. They identify markers of their own identity, such as family, school/class and language/s, and compare these to the importance of language, place and family in the formation of identity in Aboriginal and Torres Strait Islander communities. Students identify similarities and differences in the ways they interact when communicating in English and the target language.

Students distinguish between the sounds of the target language and English and link sounds to written symbols and conventions. They use simple metalanguage to describe elemental structures of the target language, such as word order and word types. They identify how messages in Aboriginal and Torres Strait Islander languages can be communicated in a number of ways, such as Elders' story-telling or through song, dance and visual design. Students identify kinship terms used for immediate family members and recognise that Aboriginal and Torres Strait Islander peoples have their own personal relationships with place, natural species and phenomena. They identify which stories belong to which natural features, including animals and natural species. They know that different forms of address and kinship terms are used and depend on relationship and context. They identify some words in the language that have been borrowed from other languages. They identify regions, places and communities where the target language is spoken and recognise that there are many different languages spoken in their class, their local community and in Australia. They recognise that language speakers are the most important primary source of language knowledge and that language use reflects where and how people live and what is important to them.

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 3 to 6

The nature of the learner, the pathway and particular language

Languages studied in the Second Language Learner Pathway (L2) are typically languages used in spoken form as the language of everyday communication by whole communities across all generations.

The second language learner pathway has been written on the assumption that learning will occur off-Country involving students who are typically not from the language community and have little or no experience of the language and culture. They are introduced to learning the language at school as an additional, new language.

The language chosen for curriculum development should have a sizeable set of resources in a variety of media, such as local documentaries, bilingual narrative and descriptive texts, and educational materials in print and digital form. Learning is enriched and authenticated by interaction with visiting Elders and community speakers, and where possible visits to Country/Place. Information and communications technologies provide additional resources to support a range of language and culture experiences.

The curriculum content and achievement standards in the Second Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a second language. The content descriptions, content elaborations and achievement standards for the Second Language Learner pathway will need to be adapted for use with the particular language being taught and will need to be modified if the program occurs on-Country or if the learners are from the language community.

At this level, children are developing awareness of their social worlds and of their membership of various groups. They are widening their social networks, experiences and communicative repertoires. They are gaining greater awareness of the world around them. They benefit from various forms of activity-based learning that build on their interests and capabilities, and make connections with other learning areas.

Language learning and use

Learners use formulaic phrases in the target language to participate in classroom routines, presentations and structured conversations with the teaching team, peers, visiting Elders and community speakers. They respond to teacher-generated questions about texts, participate in games, and follow instructions and procedures.

They focus on aspects of their personal worlds and are introduced to content related to the target language Country/Place and the communities where it is spoken.

The development of oral proficiency relies on rich language input. Learners engage in different types of listening and develop active-listening and comprehension skills using contextual, grammatical, phonic and non-verbal cues. They extend their oral fluency by focusing on sentence-level intonation and stress.

They participate in shared and guided reading and learn to apply their knowledge of key words and textual features to predict the meaning of unfamiliar language. Learners use modelled language to create new texts and to extend their language use through expanding and connecting sentences to express more complex ideas and situations. To support their developing knowledge of vocabulary and sentence construction, learners continue to build metalanguage for describing aspects of the target language and how it works.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team. Learners may have some access to visiting Elders and community speakers, opportunities to communicate with peers in the target language region using technology, perhaps visit the target language region themselves, or view touring performances or art displays from there.

Texts and resources

Learners engage with a growing range of visual, spoken, written and digital texts, such as photographs, maps, bush calendars, seasonal charts, posters, songs, raps, dances, stories, paintings and visual design accompanying performance, video clips and films.

Level of support

The primary support for learners is the teaching team, which provides instruction, explanation, examples of modelled language use, repetition, reinforcement and feedback on student work. Learning experiences and activities are carefully scaffolded and resourced, with sufficient time allowed for experimentation, drafting and redrafting. Learners need practice and guidance in using resources such as dictionaries, word charts, vocabulary lists and exemplars when translating and creating texts.

The role of languages

Learners use the target language for classroom routines and language learning tasks, for listening to, reading and viewing texts and in interactions with the teaching team, visiting Elders and other community speakers.

The language of response varies according to the nature and demands of the learning experience, with the target language used primarily for communicating in structured and supported tasks and English and other known languages used for open-ended, comparative tasks that develop learners' understanding of language and culture.

Years 3 to 6 Content Descriptions

Communicating	
Socialising	Elaborations

Interact with peers, the teaching team and visiting Elders/community speakers about aspects of their personal worlds, such as experiences at school, home, everyday routines and favourite pastimes, interests and activities
[Key concepts: relationship, kinship, family, experience; Key Processes: describing, sharing, responding, recounting]

(ACLFWC088)

- describing self in relation to daily routines, family and friends, pastimes and aspects of school and home life, using familiar and modelled language
 - sharing and comparing their responses to learning experiences such as visits or school and class activities, using gestures, illustrations and graphics to support the elaboration of meaning
 - asking and responding to questions to identify or describe features of people, creatures and objects in the environment, for example, by referring to colour, size, number, location
 - corresponding with young target language learners in other contexts in print or digital form, asking and answering factual questions about self, their class, interests, leisure activities, likes and dislikes
 - giving opinions about aspects of their personal worlds, such as interests and leisure activities
 - describing other people, such as family members, friends and teachers, for example, by identifying their kin relationship, physical appearance and characteristics/qualities
 - showing interest in and respect for others, for example, by expressing praise or encouragement
 - expressing personal experiences, feelings and plans, using modelled sentence patterns
-

Participate in guided tasks that involve following instructions, making things, cooperating with peers, planning for and conducting shared events or activities or presenting at a school performance

[Key concepts: collaboration, planning; Key processes: compiling, rehearsing, presenting, making]

(ACLFWC089)

- working with others to take action, such as producing a poster or invitation for a special event or creating a bush tucker garden
- interacting with Elders/community speakers, following instructions/procedures, for example, to make an artefact, create an art work or prepare bush tucker, including hand signs as appropriate
- discussing young people's interests and preferences in different contexts, such as favourite activities, foods, television programs, computer games, how they get to school, leisure activities at different times of the year, languages they speak at home
- participating in national celebrations and significant events, for example, NAIDOC Week, Reconciliation Week, Harmony Day, then reflecting or reporting on the experience, for example by labelling and captioning photos for a class display
- creating a skit, performance or action game to introduce a buddy class to aspects of the target language and culture, for example, protocols for introducing others, individual words or expressions that have particular social/cultural significance, common items and artefacts and gestures
- engaging in shared tasks which involve planning and collaborating, for example, preparing, rehearsing and conducting public presentations and performances, such as an item for a school assembly or a digital presentation about a significant event
- giving directions, for example, to guide others to locations or through an obstacle course

Participate in everyday classroom activities and routines, such as responding to questions and requests, asking permission, requesting help, praising or complimenting one another and apologising

[Key concepts: routine, interaction; Key processes: responding, contributing, enquiring]

(ACLFWC090)

- initiating and responding to language for classroom routines and needs, such as requesting a drink, asking permission to leave the classroom, borrowing equipment, using rehearsed phrases and sentences
- recognising and rehearsing interjections or fillers commonly used in conversations
- asking and responding to questions with simple statements, for example, asking for/providing help, repetition or clarification, asking how/explaining how to say or write something
- praising, complimenting and encouraging one another and apologising
- enquiring about and describing the location of classroom items and materials
- contributing to the creation and display of a set of class rules
- participating in class activities such as word, board, movement or digital games
- expressing preferences among different offered options

Informing

Elaborations

Gather, classify and compare information from a range of sources associated with the target language Country/Place, community and daily life

[Key concepts: community life, leisure, environment, Indigenous knowledge, health and well-being; Key processes: identifying, researching, compiling, presenting, tabulating, categorising, giving directions]

(ACLFWC091)

- labelling, ordering and classifying natural objects from the environment using, Indigenous categories
 - obtaining information from a variety of sources about characteristic elements of the target language region, such as habitats and life cycles of different animals/birds or insects; bush plants, water supply, night sky and stars, for example, by listening to visiting Elder/community speakers and presenting findings in chart, poster, table, graphic or digital form
 - viewing, reading and interpreting texts such as bush calendars and seasonal charts, identifying features of seasons, weather patterns, plant cycles, animal behaviour and associated activities and comparing these with other seasonal calendars
 - reading, viewing or listening to simple community texts such as posters from health clinics, school magazines, community notices, answering questions by selecting from options and filling in gaps
 - viewing a demonstration, for example, cooking bush tucker, cooking in an earth oven, recording key words and phrases related to the processes of collecting and preparing
 - extracting key points from a range of spoken, written or digital texts such as posters, charts or brochures on topics such as health, well-being and cultural safety, discussing key messages and relating to them to issues in their own situations
 - giving and following directions, for example, how to get to key community facilities such as the store, football ground or school, using maps or images of the relevant area
 - locating information about social and cultural events in the target language community, such as the time of year they occur and associated activities, presenting findings in chart, poster or digital form
 - obtaining and compiling information from children in the target language community about aspects of their daily lives, using face-to-face or digital modes of communication, and presenting findings to others
 - surveying peers and community members on different topics, presenting results in chart, graph or digital format, for example, favourite television programs, video games, foods, football teams, sports or bands, after school activities/ hours spent in those activities, languages spoken in their homes and communities
-

Convey information on specific topics using formats such as oral or digital presentations, displays, diagrams, timelines and guided descriptions

[Key concepts: Country/Place, community life; Key processes: creating, presenting, profiling]

(ACLFWC092)

- talking about Country/Place, using a range of location and direction terms
- presenting information in spoken, print and digital form about the target language region, events and daily activities
- using a range of methods to record and display information about the target language region, drawing on local practices used by the target language community to represent Country/Place
- creating a profile of a prominent community figure, for example, a sports personality, community negotiator/spokesperson, musician, artist
- organising and presenting information relating to aspects of target language traditional and contemporary culture, for example, art, dance, sports, artefacts, using simple sentence structures, familiar vocabulary and concrete materials

Creating

Elaborations

Listen to, read and view different real and imaginative texts, identifying and making simple statements about key elements, characters and events, and interpreting cultural expressions and behaviours

[Key concepts: visual design, representation, journey; Key processes: participating, describing, predicting, recalling, responding, listening, shared/guided reading; Key text types: songs, raps, dances, traditional and contemporary stories, paintings and visual design, video clips]

(ACLFWC093)

- recalling, illustrating and describing main characters and events in stories, songs and performances, for example, by selecting descriptive modelled statements as captions to their pictures and responding to questions, such as, *Who? Where? How long? What?*
 - reading, listening to and viewing texts, using contextual and visual cues to make predictions about the development or flow of ideas, responding to questions and sharing opinions about characters, ideas and events
 - conveying understanding of plot and sequence in texts, for example, by re-creating a sequence using a storyboard, labelling key events or creating a timeline
 - mapping sites, landforms and other features of Country through which a travelling story passes
 - listening to Elders/community speakers tell stories, interpreting signs and gestures, retelling the story to others in spoken, written or multimodal form, using a combination of key words and phrases, illustrations and visual props
 - interacting/engaging with and interpreting artistic traditions and visual designs associated with the target language community, for example, paintings, sculptures, dance
 - discussing key messages, such as social values and rules for living, that are expressed in stories, songs and dance in oral, print, digital and performance formats, comparing to messages conveyed by similar texts in their own cultures
 - responding to a creative contemporary text by manipulating the original to create a new version, for example, by re-sequencing events, adding new elements, changing locations or characters, or creating alternative endings
 - understanding and discussing the cultural importance of story and the role of storytelling in transmitting language and culture
-

Create and present imaginative texts that use familiar expressions and modelled language for a range of audiences
[Key concepts: imagination, entertainment; Key processes: imagining, creating, experimenting, performing, storytelling; Key text types: raps, songs, performances, digital texts, video clips, skits, paintings and visual design]

(ACLFWC094)

- creating and performing own stories, songs and skits, including the use of paralinguistic elements such as gesture and facial expression, to enhance audience comprehension and entertainment
- experimenting with different ways of telling stories, using a range of different texts, for example, oral texts, photo stories, e-books, dance, visual design, drawings on soft and hard surfaces
- creating, performing and presenting imaginative texts such as skits, songs and raps, using digital techniques and both rehearsed and spontaneous language
- creating and presenting real or imaginary characters, places or animals through performance, digital display or visual representation
- incorporating onomatopoeic sounds into written/performed texts to enrich the texts and entertain others
- creating imaginative texts to entertain younger audiences, for example, audio Big Books, puppet plays, performances for the school or community, cartoons, short video clips or vokis, selecting language and images that enrich the visual or listening experience
- creating shared art work (visual/ performing) to tell a story, using selected elements, symbols and conventions from the target language culture/community as appropriate
- recounting stories about their own family and community, using different styles of presentation

Translating

Translate simple texts from the target language into English and vice versa, identifying elements which require interpretation rather than translation and involve cultural references

[Key concepts: equivalence, meaning; Key processes: translating, predicting, selecting, comparing]

(ACLFWC095)

Elaborations

- using visual or print dictionaries, word lists and pictures to translate simple familiar texts, such as labels, captions, charts, posters, applying knowledge of grammatical rules and understanding of context to assist in translation, for example, by identifying word stems or removing affixes
- translating texts, identifying culture-specific concepts and expressions that do not easily translate into English, for example, language related to artefacts, place names, kinship relations, name substitutes
- interpreting terminology for parts of the body and their metaphoric use in relation to landscape and artefacts, drawing comparisons with English or other languages
- identifying words and phrases that have more than one literal meaning
- showing others how different signs and hand talk are used and explaining their meaning and symbolism
- interpreting art works and performances to others, including the use of symbolism

Create bilingual texts for the classroom and the school community, such as songs, picture dictionaries, photo stories, captions for images and displays

[Key concepts: bilingualism, expression; Key processes: performing, describing, code-mixing, captioning]

(ACLFWC096)

- creating bilingual wall charts or picture dictionaries with captions, stickers and simple descriptions in English to explain target language words and related cultural ideas
- performing bilingual versions of familiar songs, alternating between the two languages and switching key words in repeated phrases or refrains
- creating bilingual texts for the classroom and the school community, for example, posters, songs and online newsletter items, discussing with others how to represent meaning in different languages for different audiences
- creating bilingual texts such as brochures, posters or website posts to inform others about upcoming events

Identity

Interact with others, noticing how ways of communicating with and responding to each other shape and reflect identity

[Key concepts: identity, kinship, community, membership; Key processes: creating, representing, comparing]

(ACLFWC097)

Elaborations

- developing a class wall chart or creating family trees, labelling with appropriate kinship terms for extended family members
- using visual representations such as concept maps, posters or captioned slide presentations to identify group memberships, for example, friends, family, sporting, interests and community groups, discussing what such associations contribute to their sense of identity)
- creating a profile to capture their sense of self, for example, through an avatar or montage, using key words and simple expressions to comment on the significance of particular events, relationships or experiences
- considering how their own upbringing and experiences impact on assumptions they bring to in intercultural interactions, for example, in relation to concepts such as leisure and free time, family and community responsibilities, reflecting on whether these assumptions have changed in the process of learning the target language
- noticing and comparing their own and each other's ways of communicating, identifying elements that reflect cultural differences or influences of other languages
- monitoring their own development as a learner of the target language, for example, by recording learning experiences and reflections in blogs, learning logs or journals
- identifying markers of identity that may be important across all cultures, for example, family, community, location, language, age, gender

Reflecting

Elaborations

Notice and describe some ways in which the target language and associated communicative behaviours are similar or different to their own language(s) and forms of cultural expression

[Key concepts: language, culture, values, similarity, difference, communication; Key processes: noticing, comparing, describing, explaining, questioning, reflecting]

(ACLFWC098)

- noticing how respect is shown to Elders in the community through practices such as terms of address and expressions of deference, and comparing to practices associated with their own languages and cultures
- noticing and describing similarities and differences between target language and Australian-English language and communicative behaviours used in certain social situations, for example, forms of address, the use of body language, intonation, facial and vocal expression and eye contact; etiquette associated with meal times, expressions used when leaving or returning home
- identifying elements of communication and cultural expression represented in target language stories, songs, visual design, dance or audio/visual media, such as IndigiTUBE, and responding by sharing/ comparing individual responses to these
- comparing their own and each other's reflections on the experience of learning the target language, considering whether their attitudes or understandings have changed in any respects

Understanding

Systems of language

Produce sounds, stress, intonation patterns of the target language, using developing phonemic awareness linked to the writing system

[Key concepts; punctuation, upper and lower case letters, diacritics, intonation, spelling; Key processes: identifying, discriminating, noticing, listening, reading]

(ACLFWU099)

Elaborations

- discriminating meaningful sounds, morphemes and intonation patterns in words, phrases, statements, questions, commands, requests and exclamations
- using knowledge of sound–symbol correspondences in the language to identify morphemes, words and phrases in speech and to match these with their written forms
- using appropriate conventions of the written language, including punctuation, capitalisation, diacritics, digraphs to support links with spoken language
- paying attention to consistency in target language spelling with reference to the sound system of the language
- using knowledge of sound–symbol correspondences to read familiar and new words out aloud from their written forms
- noticing the various roles of the speech organs in the production of sounds in the language and comparing these with the pronunciation of English and other known languages

Expand vocabulary in the target language through word-formation and building processes, and recognise and use simple structures

[Key concepts; word formation, word class, grammatical person and number, negation; Key processes: noticing, comparing, applying, understanding, modifying meaning]

(ACLFWU100)

- understanding the concept of word formation, for example, how a word changes meaning and form with the addition/change of a suffix or prefix to convey different meanings
- constructing expressions referring to people, places, things and events in building and varying messages, using:
 - nouns and adjectives in phrases for people, characters, places and objects, for example, compound nouns, reduplications and nominalisations, adjectives used without an associated noun
 - sentences without verbs, for example, 'this (is) my bag'
 - different types of pronouns, for example, personal, kinship, demonstrative and interrogative in all persons and numbers
 - determiners and quantifiers, for example, 'some', 'every', 'other', 'few', 'much', 'all', and words for groups
 - marking to indicate possession and other types of association, for example, 'let's go for water'
 - appropriate use of transitive and intransitive verbs
 - verbs of stance used in existential expressions, for example, 'there is a creek lying near the road'
 - verbs to talk about actions, processes, thoughts and feelings
 - moods of verbs including statements, questions, imperatives, commands, intention, purpose, likelihood, reported speech
 - negation
- expressing time, manner, attitude and place, using:
 - tenses, including past, present and future/non-past
 - temporal expressions, for example, relating to day–night cycle, lunar and seasonal cycles, 'before' and 'after', 'soon', 'recent', 'long ago'
 - expressions of frequency, for example, 'often', 'always', 'once', 'briefly'
 - sentence-level attitudinal particles, for example, 'maybe', 'it is said', 'what do you say?', 'would you mind?', 'you see'
 - locational cases, for example, 'in', 'an', 'at', 'near', 'besides', 'to', 'towards', 'from'
 - adverbs of manner, location and time, for example, 'again', 'more', 'in turn', 'too late', 'as well'
 - structuring and linking clauses, for example, relating to coordination, subordination, embedding
- understanding that languages are rule-bound and systematic
- understanding that rules vary between languages, for example, in relation to word-building and word order at phrase and sentence level

- making comparisons and identifying patterns in and between languages, for example, in relation to free and fixed word order, tenses in verbs, the use of affixes versus prepositions
- noticing similarities between particular vocabulary sets in languages from the same region, such as words for body parts
- developing metalanguage for talking about elements of language, for example, noun phrases, suffixes, prefixes, tense, transitivity

Understand that texts such as stories, paintings, songs and dances have a distinct purpose and particular language features, and understand and apply text conventions
[Key concepts: purpose, genre, text features; Key processes: recognising, identifying, distinguishing, applying, linking]

(ACLFWU101)

- distinguishing the purpose of a text and its features, for example, narratives are usually about journeys across Country and convey explanations about why features of Country exist and are important, while mud-maps are for conveying basic directions
- investigating the purpose and use of sign language, for example, for hunting, for recent bereavements, for communicating at a distance, for restricting who can understand the message
- understanding and using a combination of signs to convey a message
- understanding that many Aboriginal and Torres Strait Islander languages are primarily oral and conventions of written text are being developed
- applying emerging understanding of text conventions using classroom models, for example, determining points in written versions of oral texts at which commas, full stops and paragraph breaks might be used
- accommodating features such as repetition and parallelism that characterises oral texts in written language
- recognising language features typically associated with familiar texts, for example, the use of imperatives in games, instructions and procedures, and the use of past and habitual tense in traditional narratives and recounts
- linking ideas using appropriate grammatical forms, for example, connectives, serialisation, embedding
- recognising the role played by different elements in texts to contribute to meaning-making, for example, the layout, title, illustration and use of punctuation in a picture book or the use of speech bubbles in a cartoon

Understand the core role of the kinship system in social behaviour and the relationship between Place, History and society

[Key concepts: kinship system, ways of talking, human relationships, interrelatedness; Key processes: recognising, interpreting, discussing]

(ACLFWU102)

- interpreting kinship charts to identify kin terms for wider family groupings and comparing these with their own languages and cultures, for example, maternal versus paternal grandparents, presence or absence of birth order names
- recognising that individuals may belong to certain types of sub-groups, for example, moiety, clan and skin and identifying these
- understanding that interactions and behaviour, including ways of talking, are patterned by kinship structures
- discussing the links between ceremonies, people, stories and Country/Place and the social importance of connections to History
- recognising that certain places have special significance to the community, representing special bonds between people, place and story
- understanding that ownership of songs, stories, dances and designs is determined by traditional kinship, other social groupings, place, History and story

Language variation and change

Elaborations

Understand that speakers vary language forms according to kin relationship and context of situation

[Key concepts: kinship, respect, register, silence, taboo; Key processes observing, examining, explaining, investigating; noticing, recognising]

(ACLFWU103)

- observing how language is used to establish, maintain and reflect kin-based relationships
- recognising that there are specific ways of communicating messages that are linked with relationships, for example, deference and respect within families and for respected kin, such as speaking on the side, using indirect references, silences, gestures, eye contact, different registers and modes
- investigating word taboo and reasons for their existence
- observing that expressions can be made more or less formal and more casual to suit the relationship between speakers, for example, relaxed, joking styles used between brothers-in-law
- noticing differences in the ways in which both target language speakers and English speakers communicate with different people, for example, with young children, with unfamiliar adults or with Elders
- reflecting on how they communicate with their own family and friends and with people less close to them, noticing differences in language use and communicative behaviour

Recognise that languages change over time
[Key concepts: regional languages, language shift, language loss, borrowing and relatedness; Key processes: identifying, recognising]

(ACLFWU104)

- identifying words that are the same as or similar to words in neighbouring languages
- understanding ways in which languages influence one another, for example, language shift, language loss, shared writing systems and concepts, loan words
- discussing loan words that have been incorporated from other languages to describe new concepts, for example, words for new things, including technological innovations
- understanding that language and culture together continually change as a result of contact with other languages and cultures

Language awareness

Elaborations

Explore the language situation of target language communities and the diversity of language situations in Australia
[Key concepts: language communities, language transmission, language maintenance and development, language revival, change, sign; Key processes: recognising, discussing, investigating]

(ACLFWU105)

- investigating the nature of the distribution of target language speakers across Australia, the nature and extent of target language use in Australia, the use of the target language in the media, for example, TV programs, films, IndigiTUBE
- learning about the current situation of the target language: its state of health and the nature of the speech community, particularly in relation to generational differences
- recognising that many community members are multilingual and discussing the reasons for this
- recognising that Aboriginal languages and Torres Strait Islander languages may have two or more regional varieties and consider reasons for this
- recognising how the target language has been transmitted across generations and how it has been recorded, understanding reasons for different spellings of words within the target language
- recognising that Aboriginal and Torres Strait Islander languages are in various states of maintenance, development and revival and investigate the diversity of historical reasons for this
- investigating language revival programs, for example, associated processes and protocols, success stories and challenges, and what these efforts mean to the communities
- understanding that the target language is among the small number of languages still spoken across all generations
- investigating the intergenerational transmission of Aboriginal and Torres Strait Islander languages
- exploring how physical and biological environments affect linguistic ecology
- recognising that some words are shared across several Aboriginal and Torres Strait Islander languages, understanding why there might be differences in spelling

Understand that the use of stories and names in Aboriginal and Torres Strait Islander languages is culturally determined
[Key concepts: cultural safety, protocol; Key processes: recognising, observing, discussing]

(ACLFWU106)

- understanding that there are open and closed versions of stories and ceremonies
- observing and discussing protocols surrounding the retelling and sharing of stories
- recognising and using principles and protocols of cultural safety when engaging with cultural material/property, such as names of things, peoples and places, visual and aural recordings, including art work and family homes

Role of language and culture

Elaborations

Explore connections between identity and cultural values and beliefs and the expression of these connections in an Aboriginal and/or Torres Strait Islander language
[Key concepts: Country/Place, cultural expression and transmission, values, beliefs, spirituality; Key processes: observing, making connections, discussing, investigating]

(ACLFWU107)

- understanding the role of Aboriginal and Torres Strait Islander languages and cultures in caring for Country/Place and the environment
- investigating how Aboriginal and Torres Strait Islander peoples express their relationship with the natural environment through language, for example, in relation to seasons, stars, reef, rivers, waterholes, plants and animals
- understanding the importance and significance of Welcome to Country/Place, for example, through discussions with Elders
- understanding that Aboriginal languages and Torres Strait Islander languages are storehouses of cultural, environmental and social knowledge
- recognising that song and song language play a central role as storehouses of knowledge
- understanding that Aboriginal languages and Torres Strait Islander languages have a rich oral literature, which recounts the epic journeys and events associated with totemic ancestors/cultural heroes, and understanding that these stories map the land and embody the values and mores of Aboriginal and Torres Strait Islander cultures
- understanding and discussing the importance of story and the role of storytelling in transmitting language and culture
- recognising ways cultural values are expressed in language, for example, through forms of address, speech prohibitions and styles, respect, land–language associations and non-verbal communicative behaviours
- observing that concepts may be culture-specific, for example, capturing how relationships are structured; how time and quantity are expressed; how land, water, sea and sky are viewed, spatial awareness
- recognising that Aboriginal languages and Torres Strait Islander languages have various social, spiritual and cultural functions in communities
- identifying how the target language categorises things differently from English, for example, generic words and specific words for animals and plants, such as 'kangaroo' and 'tree', and consider reasons for this

Role of language building

Elaborations

Understand ways the target language and culture can be maintained and strengthened in changing contexts

[Key concepts: language maintenance, and development ;

Key processes: discussing, exploring, considering, investigating, language building]

(ACLFWU108)

- exploring ways that language and culture have been maintained and strengthened in the target language communities, for example, using the language in families and school language programs, story-telling, writing, recording, archiving material, media services, songs and music, visual design
- recognising that there are target language materials, such as audiotapes, visual and historical documents, available through community organisations and in local, state and national archives and libraries
- exploring some of the complexities and challenges involved in keeping oral traditions strong

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 3 to 6 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages Second Language Learner Pathway are generalised in order to cater for the range of languages that may be learnt as an L2 in the school context. The achievement standards will need to be adapted for use for specific Aboriginal and Torres Strait Islander languages.

By the end of Year 6, students share information about aspects of their personal worlds, such as their family and friends, interests, everyday routines and experiences, using familiar language and modelled sentence patterns. They interact appropriately with Elders and community speakers, and apply principles and protocols of cultural safety when engaging with cultural material such as artefacts, works of art, texts and performances. When interacting in the classroom, they ask and respond to questions, request help, repetition or clarification, and respond to requests and instructions. Students locate key points of information and messages in a range of spoken, written, visual and multi-modal sources associated with the target language region, community and culture. They demonstrate their understanding of the language region, community and culture, for example, by labelling, organising and classifying natural objects, plants and animals from the environment, identifying and describing key features and landforms, seasonal characteristics, and aspects of traditional and contemporary ways of life. Students view, read and listen to stories, songs, dances and artistic traditions, and demonstrate understanding, for example, by describing characters and events, creating timelines, explaining iconographies and identifying key messages, comparing these to messages conveyed by stories in their own cultures. They recognise that ownership of songs, stories, dances and designs is determined by kinship and other social groupings. They know that song and story carry Indigenous knowledge in the context of Country/Place and family. Students use simple and formulaic language, with the support of structured models, to create short informative and imaginative connected texts in various modes and formats. They translate a range of community texts, such as signs, notices, health charts, posters, relying on key words, and they identify and describe culture-specific concepts and expressions. They create bilingual texts for the classroom and school community that explain target language words and related cultural ideas. They identify markers of identity across cultures and recognise the importance of language, Country/Place and culture to the identity and future aspirations of Aboriginal and Torres Strait Islander peoples. Students reflect on their own cultural identity in light of their experience of learning the language, explaining how their ideas and ways of communicating are influenced by their own cultural backgrounds.

Students know that the target language has its own pronunciation, spelling and grammar, and they apply this knowledge to predict the sound, spelling and meaning of new words and expressions. They use metalanguage for language explanation, for making comparisons with English forms, and for reflecting on the experience of learning the target language and culture. They identify the distinct purpose, language features and conventions of texts such as stories, paintings, songs and dances. Students demonstrate understanding of core elements of the kinship system and its role in social behaviour, by identifying and explaining kin terms, recognising that everyone belongs to certain types of sub-groups and recognising that interactions are patterned by these structures. Students know that language use must be adjusted to suit different contexts, situations and relationships. They provide examples of how languages change over time by identifying words and phrases borrowed from English and other languages, including words that are similar to or borrowed from neighbouring Indigenous languages. Students recognise that Aboriginal and Torres Strait Islander languages are in various states of maintenance, development and revival and can give some historical reasons for this. They identify connections between identity and cultural values and beliefs, and explain the importance of maintaining and strengthening Aboriginal and Torres Strait Islander languages for the particular community involved and for the broader Australian community. They make connections with their own experience when talking about languages and cultures.

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 7 to 10

The nature of the learner, the pathway and particular language

Languages studied in the Second Language Learner Pathway (L2) are typically languages used in spoken form as the language of everyday communication by whole communities across all generations.

The second language learner pathway has been written on the assumption that learning will occur off-Country involving students who are typically not from the language community and have little or no experience of the language and culture. They are introduced to learning the language at school as an additional, new language.

The language chosen for curriculum development should have a sizeable set of resources in a variety of media, such as local documentaries, bilingual narrative and descriptive texts, and educational materials in print and digital form. Learning is enriched and authenticated by interaction with visiting Elders and community speakers, and where possible visits to Country/Place. Information and communications technologies provide additional resources to support a range of language and culture experiences.

The curriculum content and achievement standards in the Second Language Learner Pathway are generalised in order to cater for the range of Aboriginal or Torres Strait Islander languages that may be learnt as a second language. The content descriptions, content elaborations and achievement standards for the Second Language Learner pathway will need to be adapted for use with the particular language being taught and will need to be modified if the program occurs on-Country or if the learners are from the language community.

At this level, students bring a range of language learning strategies to their learning. They are increasingly aware of the world beyond their own and are engaging with issues of youth, society and environment. They are increasingly independent and capable of analysis and reflection. They are considering their future pathways and choices, including how the language could be part of these.

Language learning and use

Learners interact using the target language in classroom routines and communicative tasks. They give presentations and participate in conversations, with some preparation and support, such as cue cards. They use the language more fluently, with a greater degree of self-correction and revision. They acquire skills in analysing and translating increasingly complex texts.

Learners are extending the range and quality of their writing through increased vocabulary and grammar knowledge, and by drafting and editing their own work and that of their peers. They use models to create a range of texts, including descriptions, recounts and reflections.

They are increasingly aware of connections between language and culture, noticing, for example, different language use according to kin relationships. They are learning to reflect on their own language and culture, and how identity impacts on intercultural experiences.

Contexts of interaction

Learning occurs largely through interaction with peers and the teaching team. Students may have some access to visiting Elders and community speakers, and may use technology to communicate with peers in the target language region, such as through a sister-school partnership. Some students may have opportunities to visit the target language region themselves or to view touring performances and art displays.

Texts and resources

Learners engage with a range of visual, spoken, written and digital texts, such as photographs, maps, bush calendars, seasonal charts, posters, songs, raps, dances, stories, paintings and visual design, video clips, and films.

Level of support

Learners are increasingly aware of and responsible for their own learning. They continue to access and use resources such as word lists, modelled texts and dictionaries. Teacher feedback continues to support their receptive and productive language use.

Learners require explicit instruction in the grammatical system of the target language, supported by comparisons with English and other known languages. They also require opportunities to discuss, practise and use their knowledge. They monitor their learning progress, for example by keeping records of their learning, such as journals, folios or blogs, and use these resources to reflect on their language learning and intercultural experiences.

The role of languages

The target language is used for classroom interaction, language learning activities and experiences, and reflection on learning. English is used to support analysis, comparison and reflection; it is also the medium for expressing personal views at a level beyond learners' range in the target language, such as justifying a position on a social issue or exploring and comparing linguistic and cultural practices and learning experiences.

Years 7 to 10 Content Descriptions

Communicating

Socialising

Engage with peers, the teaching team and visiting Elders/community speakers to share interests, experiences and aspirations, to exchange information about teenage life and to express opinions and feelings
[Key concepts: experience, aspiration; Key processes: recounting, exchanging, connecting]

(ACLFWC109)

Elaborations

- expressing and exchanging personal experiences, feelings, plans, goals, aspirations and viewpoints, providing reasons or justification
- asking and responding to open-ended questions, for example, *why*, *how*, *when* questions, using modelled sentence patterns
- engaging in face-to-face or online discussions with peers about shared interests, cultural practices and experiences, such as sport, food, study, music or fashion, extending or elaborating meaning, for example, by using comparisons or contrasts
- recounting experiences such as holidays, special events, milestones, sports events or celebrations
- sharing and comparing information about teenage life, daily routines and responsibilities
- sustaining and extending conversations by seeking additional information
- exchanging opinions about family, friends, teachers, subjects, entertainment, sport and leisure
- communicating with peers and other target language speakers in local or online communities, using active listening skills, turn-taking cues, requests for clarification and respectful language for agreeing or disagreeing

Engage in activities that involve collaboration, planning, organising and negotiating to take action

[Key concepts: event, experience, collaboration; Key processes: planning, organising, negotiating]

(ACLFWC110)

- participating in planning, making arrangements and negotiating details, using language related to place and activity, for example, organising class events, such as holding a lunch, party or performance
- creating displays, presentations or performances for family, friends or the school community to showcase progress in learning and using the target language
- giving and following instructions to play games or follow procedures such as recipes or making everyday items used by the target language community
- planning and preparing for a real or virtual visit to the target language community, preparing and rehearsing language forms, structures and vocabulary and considering appropriate behaviours
- planning and participating in learning experiences that combine linguistic and cultural elements, such as an excursion to a target language art exhibition or performance
- designing posters, displays and digital presentations to draw attention to issues relevant to the target language community, such as endangered wildlife, erosion, urban development, broadband access, roads and other infrastructure
- promoting events in the target language community, such as music festivals or footy matches

Interact in class activities that involve making requests and suggestions, seeking clarification, negotiating changes and expressing opinions

[Key concepts: opinion, discussion, respect; Key processes: requesting, negotiating, expressing, comparing, deciding, explaining]

(ACLFWC111)

- stating opinions, making suggestions or providing clarification
- negotiating with class members and members of the teaching team using respectful language when agreeing or disagreeing or negotiating changes
- asking for clarification, such as the spelling or meaning of a word
- making requests, offering and giving help and responding to instructions
- asking and responding to closed and open-ended questions, for example, in relation to class assignments or due dates
- expressing their responses to the experience of learning and using the target language, for example, by detailing preferences, likes and dislikes in relation to aspects/elements of the experience

Informing

Elaborations

Identify, analyse and summarise factual information obtained from a range of sources on a variety of topics and issues related to the region of the target language

[Key concepts: Indigenous knowledge, social and environmental issues, lifestyles, community initiatives and projects, community life; Key processes: summarising, synthesising, referencing]

(ACLFWC112)

- interviewing an Elder/community speaker about topics such as community initiatives and projects or life histories, observing correct respect protocols and presenting findings in formats such as digital presentations, posters, wall charts or oral summaries
- researching a social or environmental issue from the target language region, synthesising information and presenting findings on topics such as preservation of language, culture and land, health, education, transport, local food production and supplies, land management, feral animals, fish stocks, water supply
- engaging with simple texts such as school and community magazines, interviews, TV programs, IndigiTUBE, to gather facts about events, social and cultural activities or people, and reporting the information to others, for example, by creating a profile/report and structured summary of a prominent community person or significant event
- finding information and making comparisons between past and present ways of living in the target language community and presenting information using charts, pictures, PowerPoint presentations
- comparing information accessed through photos, IndigiTUBE and talks by community speakers about lifestyles and activities in the target language communities, such as major events, footy matches, dance nights, road trips/distances travelled, modes of transport, entertainment

Convey information about events, experiences or topics of shared interest, using different modes of presentation to suit different audiences and contexts

[Key concepts: audience, Country/Place, community life; Key processes: describing, explaining, creating, annotating]

(ACLFWC113)

- interpreting landscapes from photos or videos of the region and conveying information in spoken form
- creating a video clip or a photographic or journal record to share with other target language learners of activities such as school camps, excursions, performances, sporting events or visits to the target language region
- researching a social event from the target language region, such as a music festival, race meeting, sporting event, ceremony, anniversary of a key date, creating a multimodal text/resource that communicates key elements to other learners
- creating a virtual introduction to their own school and neighbourhood for a sister school from the target language region

Creating

Elaborations

Interpret and respond to a range of real and imaginative texts by sharing personal views, comparing themes, describing and explaining aspects of artistic expression and how these relate to land, people, plants, animals and social and ecological relationships

[Key concepts: representation, imagination; Key processes: interpreting, explaining, describing, discussing; Key text types: songs, raps, dances, traditional and contemporary stories, paintings and visual design, video clips, films]

(ACLFWC114)

- listening to stories told by Elders/community speakers, interpreting signs and gestures, using correct protocols to ask clarifying questions about the stories and to find out about the role of storytelling in traditional and contemporary times
 - interpreting and responding to texts such as songs, stories, films or video clips by recording key vocabulary and expressions, identifying and explaining main ideas, key themes and sequences of events and sharing personal views and reactions with others
 - discussing how key messages and beliefs are communicated through stories and through visual and creative arts, for example, comparing the role and representation of animals, people and landscapes in different types of texts
 - discussing and explaining how land, water, sea, sky, people, plants and animals and social and ecological relationships are expressed through arts, including stories, paintings, songs, dance
 - describing and explaining aspects of artistic expression to others, for example, traditional and contemporary paintings, design, dance and the different roles of social groups in relation to traditional elements of song and dance and in the use of favoured materials and processes in the making of artefacts or the construction of headdresses
 - listening to, viewing and sharing personal reactions/responses to popular contemporary music, identifying key messages, themes and styles of performance, and considering how they incorporate commentary on social issues
 - discussing how stories and songs often link neighbouring Aboriginal and Torres Strait Islander groups and nations
-

Create a range of spoken, written and multimodal texts to entertain others, involving real or imagined contexts and characters

[Key concepts: imagination, journey; Key processes: creating, collaborating, performing, composing; Key] text types: raps, songs, performances, story, cartoons, advertisements, digital texts, video clips, skits, paintings and visual designs]

(ACLFWC115)

- creating a rap or skit, including in digital formats, to perform to their peers that provides commentary on a social issue that is important or relevant to them
- creating their own visual and performing art work (visual and performing) to convey a specific message, incorporating where appropriate elements and conventions of visual design from the target language community
- taking on the role of a character from a story and responding to questions in-role
- creating and performing real or imagined experiences, using expressive language, gestures and supporting materials to create dramatic effect
- creating cartoons, short plays or stories to present in class or to share with a wider virtual audience about personal past or future imagined experiences
- composing simple songs, jingles, posters and advertisements for real or imaginary situations or products
- telling the story of a real or of an imagined journey involving a variety of characters, places and events

Translating

Translate and interpret a range of texts from the target language to English and vice versa, comparing their versions and considering how to explain elements that involve cultural knowledge or understanding

[Key concepts: equivalence, representation, meaning, interpretation, idiom; Key processes: comparing, explaining, interpreting]

(ACLFWC116)

Elaborations

- translating and interpreting short texts from the target language to English and vice versa, comparing their interpretations and discussing possible reasons for differences
- translating and interpreting a range of texts, such as narratives, song lyrics, dialogues, posters, using resources such as dictionaries and grammars and considering how to explain elements that involve cultural knowledge or understanding
- identifying, using and explaining target language words and expressions that do not easily translate into English
- demonstrating and explaining elements of non-verbal communication in the target language that require interpretation, such as hand talk, gestures, facial expressions, eye contact, lip pointing
- analysing published bilingual texts, such as children's stories, health charts, films with sub-titles, commenting on differences between how each language represents meaning
- identifying and explaining concepts, practices and expressions in the target language which do not easily translate into English, and vice versa, for example, number systems, time, colour daily and seasonal cycles, kinship terms, environmental sounds/elements/items/processes, such as 'waving of bark in the wind', noises that birds make
- understanding and applying culturally appropriate and ethical behaviour when interpreting and translating the target language

Create bilingual texts in collaboration with others for the wider community

[Key concept: interpretation, bilingualism; Key processes: designing, explaining, classifying, glossing, annotating, composing]

(ACLFWC117)

- creating shared bilingual learning resources, such as print or digital word banks or glossaries of target language and English expressions used in everyday interactions
- performing a role-play or skit for an audience, using target language for the performance and English for supporting explanations and commentary
- creating bilingual texts, using subtitles and captions, to inform the school community about aspects of target language culture
- creating a bilingual display, for example, a video-clip or photographic display showcasing events and experiences such as a trip to the target language community or a bush trip
- creating bilingual digital texts, such as songs or dialogues, which allow display in either the target language or English or both
- creating a bilingual information pack in print and/or digital form about their school and local region for a sister school in the target language region

Identity

Consider and discuss their own and each other's experiences and ways of expressing identity, reflecting on how the target language links the local, regional and national identity of its speakers with the land

[Key concepts: identity, perspective, biography; Key processes: sharing, comparing, considering, reflecting, analysing]

(ACLFWC118)

Elaborations

- considering how their own biography, including elements such as family origins, traditions, beliefs, practices, interests and experiences, shapes their sense of identity and ways of communicating
- creating spoken, written or multimodal texts, such as identity maps, timelines, digital presentations or family trees with captions and commentary, to describe key milestones and significant life influences, for example, key people, events, educational experiences, community affiliations, traditions or travel experiences, and considering how these different experiences and influences help to shape identity
- comparing and reflecting on how identity is expressed across cultures and languages, for example by considering the idea of 'belonging' as expressed in different languages
- discussing the role that language and culture play in the identity and well-being of Aboriginal and Torres Strait Islander peoples
- considering their identity as a 'second language learner' and whether it involves changes in aspirations, career considerations or social-networking opportunities
- investigating how particular policies and practices affect the sense of identity of Aboriginal and Torres Strait Islander peoples, for example, through language loss, separation from Country/Place/family/community
- reflecting on how the language links the local, regional and national identity of its speakers with land, water, sea and sky

Reflecting

Elaborations

Participate in intercultural interactions and consider own reactions when engaging with target language speakers and resources, and how these may reflect own language(s) and culture(s)

[Key concepts: intercultural experience, perspective, insight, self-reflection, ways of knowing and being, reconciliation, discrimination; Key processes: comparing, analysing, explaining, reflecting, choosing]

(ACLFWC119)

- reflecting upon the experience of authentic or virtual interaction with the target language and culture, for example, through face-to-face or online interactions with other target language speakers, through visits to the target language community, or through interacting with visitors to their own school
- reflecting on how their own ways of behaving may be interpreted when interacting with target language speakers, noticing their own body language and modifying certain behaviours, such as avoiding eye contact
- reflecting and reporting on how learning the target language provides insights into language and culture in general, and how their own assumptions about target language speakers and ways of knowing and being are changing as a result of intercultural language learning
- reflecting on how learning the target language provides a distinctive means of understanding the country in which they live, including the relationship between land, the environment and people, and issues of discrimination and reconciliation
- keeping a journal of humorous, satisfying or challenging experiences associated with learning and using the target language in various contexts, noting personal responses and reflections over time, and insights gained into their own language(s) and culture(s)
- identifying and comparing how emotions or attitudes such as respect, shyness, exuberance or embarrassment are shown/displayed/expressed across different languages and cultures
- sharing and comparing cultural and intercultural experiences and language capabilities, and exchanging views on the benefits of speaking more than one language, such as having a larger vocabulary to draw on, additional insights and perspectives and opportunities for new experiences

Understanding

Systems of language

Elaborations

Produce sounds, stress, intonation patterns of the target language, using a developing phonemic awareness linked to the writing system

[Key concepts; metalanguage, patterns, phonetic articulation, syllable; Key processes: identifying, reading, investigating]

(ACLFWU120)

- reading aloud to show comprehension of sound–symbol correspondences and flow of ideas
 - developing metalanguage to describe and talk about elements of sounds and phonology, for example, place and manner of articulation
 - investigating patterns such as consonant and vowel sequences and word level patterns, for example, allowable word final sounds, allowable consonant clusters
 - understanding the major categories of place of articulation in Aboriginal and Torres Strait Islander languages, for example, peripheral, laminal, apical and their realisation across different languages and regions in Australia
 - exploring writing systems based on principles such as syllabic or ideographic
-

Expand vocabulary and understand and use a range of grammatical structures in the target language, including inflectional and derivational processes

[Key concepts: system, grammatical case, affixation, voice, transitivity, particles, Key processes: explaining, constructing, compounding]

(ACLFWU121)

- understanding case and case marking, for example, of nouns, pronouns and adjectives, noting the sharing of several case functions by single markers, the use of different markers for the same function
 - explaining how verbs can be derived from nouns and vice versa, and comparing with similar processes in English and other known languages
 - understanding how to construct concepts referring to people, places, things and events in building and varying the message, using:
 - suffixes, including 'having', 'for want of', 'similar to', 'like'
 - verbless sentences, for example, equative, descriptive, possessive
 - verb categories, including intransitive, transitive, causative, inchoative, reflexive–reciprocal
 - verb aspect, including continuous, transitory, perfective, imperfective
 - verb-stem morphology, including compound verbs, reduplicated verbs, habitual/characteristic, derivation (for example, nouns into verbs).
 - expressing time, manner, attitude and place, using:
 - elaborations of past tense
 - temporal expressions, for example, 'beforehand', 'afterwards', 'too late', 'originally'
 - expressions of frequency, immediacy and duration, for example, 'persistently', 'at once', 'a few times', 'for a while'
 - attitudinal words, particles and interjections, for example, 'ought to'; 'I wish'; terms expressing endearment, embarrassment, 'shame', pity, including 'Don't know!', 'Really!', 'That's all!'
 - locational cases as used in locative phrases, and extensions of these, for example, expressing origin, causation
 - structuring and linking clauses, focusing on issues of agreement with transitive and intransitive verbs and using verb-linking devices such as serialisation
 - discussing relationships between the target language and other languages of the region, for example, shared words and structures
-

Investigate spoken, written and visual modes of communication and analyse the form and structures of different types of texts, including their use, function and relationship to social processes

[Key concepts: text structure, relationship; Key processes: analysing, investigating, linking, sequencing]

(ACLFWU122)

- analysing a range of texts, identifying their function, use and relationship to different social processes, for example, declaring identity, acknowledging traditional belief systems and ancestors, passing on knowledge and information, mapping resources on Country and managing natural phenomena such as weather
- understanding that Country/Place can be interpreted as text by a community
- discussing ways in which songs function to stabilise language and meaning in ways similar to literature in other cultures
- investigating the use of sign language in the target language community and its relation to spoken language
- applying principles of text organisation when developing both oral and written texts and presenting ideas, noticing differences in form and function between the two modes of expression
- linking and sequencing ideas to form cohesive texts, using appropriate grammatical forms and elements, for example, serialisation, connectives, embedding, headings and paragraphs

Investigate how connections between Law, story, ceremony, people and Country/Place are demonstrated and evident in community behaviour

[Key concepts: interconnectedness, human relationships, ownership, rights, responsibilities; Key processes: describing, explaining, investigating, exploring]

(ACLFWU123)

- describing how ceremony, place and Law are connected through kinship, story and cosmology, and how these connections are demonstrated and reflected in community behaviour
- explaining how art forms such as body markings, designs, paintings, funeral poles, songs and dances serve to identify people and places
- investigating how social groups form patterns across and through generations and determine relationships, behaviours and marriage practices
- understanding and discussing kinship as a system, and explaining its importance in maintaining and regulating social relationships in Aboriginal and Torres Strait Islander communities
- exploring how patterns of ownership, management of land and associated stories determine rights and responsibilities with respect to that land
- understanding that different roles and responsibilities in ceremonies are determined by kinship and social groupings

Language variation and change

Elaborations

Analyse variations in language use that reflect different social and cultural contexts, purposes and relationships
[Key concepts: respect, silence, kinship; Key processes: examining, explaining, analysing]

(ACLFWU124)

- examining how elements of communication such as gestures, facial expressions, choice of language and use of silence vary according to context, situation and kin relationships, for example, eye contact, pointing with lips
- recognising there are specific ways of communicating messages that are linked with particular relationships, for example, in situations of bereavement or childbirth
- distinguishing different registers of language, for example, mother-in-law language
- investigating constraints that guide forms of address and social interactions such as in certain kin relationships
- analysing intergenerational differences in language use, for example, young people's language when talking about popular culture, the strong 'right through' language of the older generation
- explaining variations in language use that reflect different levels of formality, authority and status, for example, speech styles used with respected kin, ways of asking questions of different people
- understanding connections between land, language and culture which are expressed by shifts between languages and varieties of language

Understand that languages and cultures change continuously due to contact with one another and in response to new needs and ideas, popular culture, media and new technologies
[Key concepts: contact, change; Key processes: exploring, observing, reflecting]

(ACLFWU125)

- exploring forms, usage, history and impact of contact languages, including creoles, pidgins and Aboriginal Englishes
- observing changes to language that reflect changing lifestyles, cultural trends and emerging needs, for example, youth language, words and expressions associated with new technologies, the impact of music, popular culture and media
- reflecting on changes in their own use of their first language(s) over time, noticing how and when new ways are adopted or existing ways adapted

Language awareness

Elaborations

Investigate and compare the ecologies of Aboriginal and Torres Strait Islander languages with Indigenous languages in other countries, and consider issues such as languages policy, language rights, language loss, advocacy, reform and multilingualism

[Key concepts: environment, boundaries, policy, revival; Key processes: researching, investigating, exploring, considering]

(ACLFWU126)

- investigating the geographical location of the target language and the number of its historical and contemporary speakers
- considering the future prospects of the target language in the context of its current linguistic ecology
- exploring the use of the target language, English, Aboriginal English and creoles in the speech community, and understanding the nature of Indigenous multilingualism
- researching the impact on Aboriginal and Torres Strait Islander languages in general and on the target language in particular of historical events, government policies, legislation and judicial processes, such as stolen generations, mission schools and advocacy
- identifying social and government policies and practices that have impacted positively on processes of language acquisition, for example, the performing of Welcome to Country and the Acknowledgement of Country at events, on television, in films; efforts to raise the profile of Aboriginal and Torres Strait Islander languages in the wider Australian community and in particular geographical regions
- investigating the situation of indigenous languages in other countries, for example, New Zealand, Hawaii, North America, Japan, Latin America, considering issues such as language rights, language endangerment, revival and reclamation, drawing comparisons with the situation of Aboriginal languages and Torres Strait Islander languages in Australia
- understanding how the process of language-building expands existing linguistic and cultural resources in the Australian community

Understand and apply cultural norms, skills and protocols associated with learning, using and researching Aboriginal and Torres Strait Islander languages

[Key concepts: ownership, ethical behaviour; Key processes: acknowledging, investigating, applying]

(ACLFWU127)

- using culturally appropriate protocols when engaging with and learning from Aboriginal and Torres Strait Islander peoples and communities
- acknowledging cultural and intellectual property rights and copyright over language work, in relation to song holders, story keepers, language informers, composers and choreographers
- understanding that permission and consent of the owners of languages must be sought when visiting Country/Place, investigating processes for seeking permission from cultural authorities to visit or to gain information about Country/Place/particular sites, stories and family histories
- accessing, eliciting, recording and storing information appropriately according to cultural norms/mores

Role of language and culture

Elaborations

Reflect on how ways of using language are shaped by communities' ways of thinking, behaving and viewing the world, and the role of language in passing on knowledge

[Key concepts: Indigenous knowledge, value transmission;
Key processes: reflecting, exploring, analysing, comparing]

(ACLFWU128)

- explaining the role of language in relation to culture and identity and in passing on knowledge, such as sustainable care of the environment, rules for living, ways of behaving, spiritual and cultural functions and History
- reflecting on ways the target language community divides the natural and cultural worlds and comparing this to other indigenous and western systems of classification
- analysing concepts related to cultural values in the language, including naming systems, such as kinship terms, nicknames, substitute words and pronoun systems, comparing to similar conceptual characteristics of their own language(s) and culture(s)
- exploring how aspects of traditional culture and society have been preserved through the target language, and discussing the importance of maintaining Australian Aboriginal and Torres Strait Islander languages, for their speakers and for all Australians
- identifying and discussing core cultural concepts reflected in Aboriginal languages and Torres Strait Islander languages, such as *respect, avoidance, reciprocity, obligation, responsibility*
- understanding that culturally significant attitudes and beliefs conveyed through the target language are related to the past, to land, plants, animals and celebrations
- identifying and comparing how attitudes or emotions or such as respect or embarrassment are shown/displayed/concealed across different languages and cultures
- comparing non-verbal elements of communication such as the use of silence or eye contact in different cultural contexts and exchanges
- considering how and why target language speakers use particular conversational strategies, such as indirect language to avoid conflict
- recognising that there are multiple views on and partial explanations for many events and issues
- reflecting on ways culture is interpreted by others, for example, by identifying how stereotypes influence perceptions among different groups and communities
- understanding that each Aboriginal or Torres Strait Islander person inherits language as part of their birthright, along with membership of a particular group and attachment to Country or Place, and that they become custodians and owners of land, water/ sea and language

Role of language building

Elaborations

Investigate programs, initiatives and techniques that keep Aboriginal and Torres Strait Islander languages strong
[Key concepts: language maintenance, development, building;
Key processes: discussing, exploring, investigating, evaluating, language building, language engineering]

(ACLFWU129)

- analysing domains of language use where language building has occurred, considering why this is the case and investigating some of the techniques used, for example, language engineering, adapting sounds, coining new words
- understanding the importance of intergenerational collaboration and transmission in keeping languages strong, and discussing associated challenges
- investigating programs and initiatives that maintain and strengthen language use, for example, school languages programs, bilingual education, research programs, recording and archiving of material, the creation/development of websites, databases and documentaries
- exploring the role of advocacy in supporting the maintenance and development of languages and associated cultures
- identifying keeping places for language texts and the contexts in which they exist, for example, in the community, national archives
- understanding the importance of strong and viable Aboriginal and Torres Strait Islander languages for both Indigenous and non-Indigenous Australians
- considering domains where the target language may grow in the future

Framework for Aboriginal Languages and Torres Strait Islander Languages

Years 7 to 10 Achievement Standard

The achievement standards for the Framework for Aboriginal Languages and Torres Strait Islander Languages Second Language Learner Pathway are generalised in order to cater for the range of languages that may be learnt as an L2 in the school context. The achievement standards will need to be adapted for use for specific Aboriginal and Torres Strait Islander languages.

By the end of Year 10, students use the target language to initiate, sustain and extend interactions and to express feelings and opinions. They share interests, experiences and aspirations and exchange information about teenage life. They use spontaneous language to participate in activities that involve taking action, collaborating, planning, organising and negotiating. They use culturally appropriate norms, skills and protocols when engaging with and learning from Aboriginal and Torres Strait Islander peoples and communities. When interacting in the classroom, they make requests, make suggestions and seek clarification. They locate, analyse and summarise factual information from a range of sources on topics and issues related to the target language region. They demonstrate understanding of the target language region, community, culture, way of life and History by presenting information on social and environmental issues, past and present community initiatives, projects and lifestyles. Students listen to, view and share personal responses to a range of texts such as stories, songs, visual and creative arts, films and procedural texts. They demonstrate understanding by identifying and explaining main ideas, key themes, sequences of events, and by comparing the role and representation of animals, people and landscapes. They link and sequence ideas and use expressive language, gestures, artistic and iconographic elements and conventions to create spoken, written and multimodal texts that involve real or imagined contexts and characters. They apply culturally appropriate and ethical behaviour to translate and interpret a range of texts from the target language to English and vice versa, and explain culture-specific concepts, practices and expressions. They create bilingual texts to inform the wider community about aspects of the target language region and culture. Students share experiences and ways of expressing identity, and they reflect on how the target language links the local, regional and national identity of its speakers with the land. They describe how they feel and behave when interacting with target language speakers and resources, and they reflect on how their reactions may reflect their own languages, cultures and perspectives.

Students know the sounds, stress, intonation patterns, writing systems and grammatical elements of the target language and apply this knowledge to construct extended spoken, written and multimodal texts. They use metalanguage to explain sound, writing and grammatical systems, including inflectional and derivational processes. They analyse the form and structure of a range of spoken, written and visual texts and explain their function, form and relationship to social processes, such as declaring identity, acknowledging ancestors and traditional belief systems, and passing on knowledge and information. Students demonstrate their understanding of kinship as a system by explaining its importance in maintaining and regulating social relationships in Aboriginal and Torres Strait Islander communities and links with Country/Place. They explain how and why language use is adjusted to suit different social and cultural contexts, purposes and relationships. They explain the dynamic nature of language and cultures, and identify factors that influence change, such as contact with other languages or response to new ideas and technologies. Students make comparisons between the ecologies of Aboriginal and Torres Strait Islander languages and indigenous languages in other countries, in areas such as language policy and rights, language loss, advocacy and reform, and language revival. They identify the role of language in passing on knowledge, and explain how communities' worldviews and ways of thinking and behaving shape how language is used. They identify factors that serve to maintain and strengthen language use, such as intergenerational collaboration and transmission, programs and initiatives, and explain challenges associated with such practices and initiatives.

The Australian Curriculum Languages - Framework for Classical Languages

Framework for Classical Languages

Overview

Nature and purpose of the Framework

Classical languages are distinct within the languages learning area of the Australian Curriculum. While they have ceased to be languages of everyday communication, Classical languages provide a key to the literature, history, thought and culture of the ancient worlds and societies that produced them. Each is removed from the others in time and place and boasts its own often large and rich body of ancient literature.

The **Framework for Classical Languages** (the Framework) is the first national curriculum document for Years 7–10 to guide the development of curricula and teaching and learning programs for a range of Classical languages in these years of schooling. By providing a national framework, it is intended that future educational development in Classical languages will result in curricula and school programs that are nationally consistent.

The purpose of the Framework is to guide the development of language-specific curricula or teaching and learning programs for Classical languages. The Framework was used to develop the curricula for Latin and Classical Greek. Taken together, the Framework and the language-specific curricula for Latin and Classical Greek may be used as the basis for state and territory education and school authorities to develop language-specific curricula, or for schools to develop teaching and learning programs for other Classical languages, including those that are offered in Australian schools (Classical Hebrew and Sanskrit) and others, such as Classical Chinese.

Rationale

The study of Classical languages allows students to enter and explore ancient worlds that have shaped contemporary life and societies. Authentic engagement with seminal works of great literature and antiquities gives direct access to ancient ways of living in and viewing the world, and an appreciation of the languages, cultures, literatures and traditions that are derived from those of ancient societies.

Studying Classical languages enables students to develop their understanding of how language works as a system, enhances their capability to communicate and extends their literacy repertoires. It acquaints students with basic philological principles, such as consistent sound changes between related languages and the ways in which vowels shift within a language. Students become familiar with many complex linguistic operations and with the metalanguage used to denote different usages and structures. Such principles can be applied to the study of other languages, ancient or modern, related or distant. Students are able to increase their understanding of the workings of languages they seek to learn, and those already in their background.

The study of Classical languages exercises students' intellectual curiosity; strengthens their cognitive, analytical and reflective capabilities; and enhances creative and critical thinking. Students develop skills in research, communication, self-management and collaboration – skills that are essential in preparing for life at school and beyond. Through their reading, analysis and translation of texts, students of Classical languages develop their thinking processes, such as close attention to detail, precision, accuracy, memory, persistence and logic. When translating, students make sense of ancient ideas, experiences, values and attitudes, giving prominence to shades of meaning, thus increasing their dexterity of thought. Through the focus on analysis and precise translation of texts, students develop their capacity to learn in a systematic and disciplined manner.

Studying Classical languages enhances students' enjoyment and understanding of their own and other cultures. Students examine the language used to denote values in different cultures, both ancient and modern, and understand the diversity that exists, and has always existed, in cultural values. They gain a deep understanding of literature dealing with enduring moral and social issues, such as the conflict between individual freedom and the common good of society; the role of the family; discrimination based on race, gender or religion; or the causes of revolution. Through critical reflection on and comparisons with the history, culture, values and practices of the ancient world, learning Classical languages contributes to students' development as responsible citizens, locally and globally.

Aims

The Australian Curriculum: **Framework for Classical Languages** aims to develop the knowledge, understanding and skills to ensure students:

- engage with the language, history and culture of the Classical world through interaction with texts
- understand language, culture and learning and their relationship, through the medium of ancient texts and artefacts, and thereby develop intercultural understanding
- understand how their own experiences of learning a Classical language extend their ways of viewing, engaging in and interpreting the contemporary world.

These three aims are interrelated and provide the basis for the two organising strands: Engaging with texts and Understanding.

Structure

Sequences of learning

To reflect current custom, practice and the needs of learners in Australian schools, the Framework has been developed for Years 7–10.

Strands, sub-strands and threads

The following interrelated strands are derived from the aims, and describe different facets of learning the language, and understanding and reflecting on these processes:

- Engaging with texts: engaging with the language, culture and history of the Classical world through the interpretation, analysis and translation of (language) texts
- Understanding: analysing Classical language and culture as resources for understanding meaning and interpreting the ancient and modern worlds.

A set of sub-strands has been identified within each strand; the sub-strands reflect dimensions of language learning, through which the content is organised. The strands and sub-strands do not operate in isolation but are integrated in relation to language use for different purposes in different contexts.

The sub-strands are further differentiated according to a set of 'threads' that support the internal organisation of content in each sub-strand. These threads are designed to capture, firstly, a range and variety in the scope of learning and, secondly, a means of expressing progression of content across the learning sequence.

Table 1 identifies the strands, sub-strands and threads.

Table 1: **Framework for Classical Languages** strands, sub-strands and threads

Strand	Sub-strand	Description	Threads
Engaging with texts: <i>Engaging with the language, culture and history of the Classical world through the interpretation, analysis and translation of (language) texts</i>	1.1 Accessing the ancient world through (language) texts	Engaging with people and ideas in the ancient world through texts that reveal language use and social and cultural practices	Engaging with people and ideas in the ancient world, by reading, analysing and interpreting (language) texts
			Conveying information and ideas about ancient society and culture
	1.2 Responding to texts	Engaging with and responding to (language) texts as literature	Responding to (language) texts as literature
			Responding to (language) texts through reading aloud, reciting or performing
	1.3 Translating	Translating (language) texts into English, comparing different interpretations of the same text and explaining these to others	Translating and explaining (language) texts
			Comparing and evaluating translations
Understanding: <i>Analysing Classical language and culture as resources for understanding meaning and interpreting the ancient and modern worlds</i>	2.1 Systems of language	Understanding the language system, including sound, writing, grammar, vocabulary and text structure	Sound and writing systems
			Grammatical system
			Vocabulary acquisition and building
			Text structure and organisation
	2.2 The powerful influence of language and culture	Understanding how languages vary in use (register, style, standard and non-standard varieties) and change over time and place.	(Language) in the ancient world and its linguistic legacy
			Cultural legacy of the ancient world in the modern world
	2.3 The role of language and culture	Understanding the relationship between language and culture	Relationship between language and culture

Strand	Sub-strand	Description	Threads
	2.4 Reflecting	Questioning reactions and assumptions in response to engaging with the Classical world, and considering how this affects own identity and world view	Reactions to engaging with the ancient world
			Identity as language learner

Concepts, processes, texts and text types

Concepts

Concepts are the 'big ideas' that students work with in engaging with Classical languages. The choice of the word 'concept' rather than 'topic' is deliberate: it marks a shift from description to conceptualisation. The curriculum should invite students not only to describe facts or features of phenomena, situations and events, but also to consider how facts and features relate to concepts or principles. For example, a description of a house can lead to a consideration of the concept of 'home' or 'space'. This shift is necessary because it is concepts that lend themselves most fruitfully to intercultural comparison and engage learners in personal reflection and more substantive learning.

Key concepts for Classical languages include:

- language
- culture
- experience
- representation (words, icons, symbols)
- equivalence
- nation (origins, social order, politics, religion)
- citizenship
- relationship (family, community, government)
- history and historical appreciation
- attitude, value and belief
- power
- aesthetics
- time (the past in the present)
- modernity
- tradition
- linguistic evolution
- interconnection across concepts
- intercultural comparisons.

Further examples of concepts for languages can be found in the Australian Curriculum: Languages Foundation to Year 10 Curriculum Design.

Processes

Processes include skills (reading, listening, writing) as well as higher-order thinking processes, such as translating, interpreting, obtaining, presenting, informing, conceptualising, analysing, reasoning, connecting, explaining and comparing, evaluating, simplifying, rephrasing, intertextualising, decentring, empathising, mediating and reflecting.

Texts and text types

Texts are central to curriculum development, as all work in language learning can be seen as textual work. The selection of texts for Classical languages is important because they define and reflect the linguistic and cultural identity of the ancient world. Classical languages texts may be synthetic, modified or authentic; they may be in oral, written, digital or multimodal form. Text types for Classical languages include narratives, stories, texts in the public domain, speeches, rhetoric, poetry, plays/drama, written translation, oral interpretation, discussion and explanation.

Using the Framework to develop language-specific curricula or programs for Classical languages

It is intended that the Framework will be used by state and territory jurisdictions to develop language-specific curricula, or by schools and communities to develop teaching and learning programs for Classical languages other than Latin and Classical Greek. The Framework has been designed to be applicable to the range of Classical languages that are currently or could be offered in Australian schools.

Educational jurisdictions, schools and communities may use the Framework in differing ways. This is to be expected, and is consistent with the Framework as a document of guidance. The Framework allows the freedom to be creative and innovative in devising teaching and learning programs which will engage, excite and challenge students. The curricula and programs that are developed using the Framework should be stimulating, enjoyable and challenging, reflecting students' increasing maturity and offering them inspiration to engage closely with cultures and societies that are removed in time and place from their own, and are a bridge between the contemporary world and the civilisations of the ancient world.

The language-specific curricula for Latin and Classical Greek may also be used to support and guide the process of developing curricula or programs for other Classical languages.

In developing language-specific curricula or programs, the following aspects of the curriculum will need to be modified or developed.

- A context statement that describes:
 - the place of the language and the heritage of the ancient society
 - the place of the language in Australian education
 - the nature of learning the language
 - the learning pathway and curriculum design.
- Band descriptions for Years 7–8 and Years 9–10 that outline:
 - the nature of the learners
 - language learning and use
 - contexts of interaction
 - texts and resources
 - features of target language use
 - level of support
 - the role of English.

- Content descriptions for each thread that describe the knowledge, understanding, skills, key concepts and key processes that teachers are expected to teach and students are expected to develop at each band level.
- Content elaborations that elaborate on aspects of each content description: illustrations, descriptions or examples to indicate possibilities for teaching. These are intended as complementary support material. They are neither comprehensive nor exhaustive. Content elaborations may include:
 - contexts of language use
 - further detail on dimensions of the content description
 - aspects of relevant linguistic and cultural knowledge
 - key language
 - possible tasks and experiences
 - connections across concepts.
- Achievement standards for Year 8 and Year 10 that describe what students are typically able to understand and do having been taught the curriculum content for the respective band. Across Years 7–10, the set of achievement standards should describe a broad sequence of expected learning. The sequence of achievement standards should give teachers a framework of growth and development in the language area and help teachers plan and monitor learning and make judgements about student achievement.

Language-specific examples such as concepts, key words and phrases are included in the content elaborations and achievement standards. The use of language-specific examples gives teachers a point of reference when developing programs and provides indications of pitch and expected levels of performance in language use and understanding.

More information about these aspects of the curriculum can be found in the Australian Curriculum: Languages Foundation to Year 10 Curriculum Design.

PDF documents

Resources and support materials for the Australian Curriculum: Languages – Classical are available as PDF documents.

Framework of Classical Languages - Classical glossary

Context statement

The place of Classical Greek and the heritage of the ancient Greek world

The Classical Greek language belongs to the Indo-European linguistic family. It is thus related to most of the languages of Europe, to Old Persian and, through Sanskrit, to several major Indian languages.

Classical Greek is defined as the literary Attic–Ionic dialect used by prominent Greek writers in the 5th and 4th centuries BCE, such as the playwrights Sophocles, Euripides and Aristophanes, the historians Herodotus and Thucydides, the philosophers Plato and Aristotle and the orators Lysias and Demosthenes. Students of Classical Greek also develop the linguistic knowledge to access earlier works, such as the *Iliad* and *Odyssey* of Homer, and later works, such as Hellenistic literature and the New Testament.

From the 8th century BCE, Greeks established settlements across the Mediterranean area, in Spain, Sicily, Italy, North Africa, Asia Minor and the Black Sea coast. These communities identified as Greek in language and culture, and regularly took part in festivals for Greeks only, such as the Olympic Games. The conquests of Alexander the Great in the 4th century BCE extended the influence of Greek language and culture in western Asia and Egypt, and resulted in the upsurge in Greek literature and learning known to us as the Hellenistic Age. During this period, a common dialect of Greek known as koiné became the lingua franca of the eastern half of the Mediterranean basin, persisting under Roman administration and surviving the fall of the western Roman Empire in the 5th century CE. The eastern Roman Empire, based at Constantinople, continued as a Greek-speaking, Christian community until it was conquered by the Turks in 1453 CE. Christian missionaries from Constantinople spread Orthodox Christianity and the Greek alphabet to Russia, where the Cyrillic alphabet developed from the Greek.

After the conquest of Constantinople in 1453, many Greek scholars moved to western Europe, stimulating the revival of Classical Greek learning, art and culture during the Renaissance period.

The Greek language continued to evolve and to absorb influences from other languages until the present day. Modern Greek uses the same alphabet, and much of the written language bears strong resemblance to its Classical 'mother' language.

As Classical Greek is the oldest Indo-European language readily accessible to English speakers, it gives students the opportunity to engage with the evolution of language and the connections among related languages. In addition, the intellectual flowering of the Renaissance brought to English a literary and scientific vocabulary from Greek in order to discuss and describe the new ideas. It is no accident that many school subjects have names of Greek origin such as history, geography, mathematics, physics, economics, music, drama, biology and athletics. The vocabulary of academic discourse is heavily indebted to Greek, and students of Classical Greek acquire a deep understanding of specialised words and an enriched personal vocabulary to enable them to discuss academic concepts.

The enduring achievements and rich legacy of the ancient Greek world are still evident in today's world, in modern values, customs and beliefs, our laws and the form of our governments, our buildings and our art and literature.

The place of the Classical Greek language in Australian education

In Australia, the teaching of Classical Greek has evolved since the 19th century, when it was taught, in addition to Latin, only to boys aspiring to an upper-class education in accordance with European tradition. During the educational changes of the 20th century, Classical Greek was also offered to girls, as part of the move to widen the curriculum for girls to include subjects previously thought too difficult, such as physics, advanced mathematics and Classical Greek. Since that time, Classical Greek has continued to be taught in independent and selective state schools, maintaining its small numbers steadily. Since the 1980s, the establishment of Greek Orthodox independent day schools, serving the large Greek diaspora communities, mainly in Sydney and Melbourne, has offered a new context for learning Classical as well as Modern Greek.

Pedagogy in Classical Greek has also evolved since the 1980s, and continues to do so in the 21st century. Traditionally, the study of Classical Greek began later than Latin, using the grammar and structures of Latin as a model. When the pedagogy of Latin changed in the 1970s from grammar and translation to a contextual reading approach, the teaching of Classical Greek was similarly influenced. New courses were produced for Classical Greek that did not presuppose a knowledge of Latin. The traditional emphasis on composing Classical Greek was replaced by the reading method, in which students acquire the language by reading continuous, historically accurate texts in Classical Greek, carefully structured so as to introduce the language and its literary features progressively within an engaging historical and cultural context. The pedagogy was designed to offer an enriching experience to a wide range of learners; the study of Classical Greek offered them an ongoing opportunity for the development of deep knowledge and transferable skills, including literacy and critical thinking.

Students may be attracted to learn Classical Greek for a variety of reasons, such as fascination with mythology, love of Greek history and culture, or interest in comparative language study. A growing area of interest is the comparative study of ancient European and Asian cultures and languages; for example, Greek and Chinese historiography, medical writings, or poetry.

In some states, such as New South Wales and Victoria, students have access to Classical Greek enrichment activities provided by teachers' associations and universities, such as competitions in Classical Greek recitation, literary essays and art; symposia and study days; and classical drama productions. At post-secondary level, Classical Greek is available in all Australian states and in the Australian Capital Territory, and summer schools are held regularly in New South Wales and Victoria, offering courses at all levels, from beginner to advanced.

Classical Greek has a long tradition in Australian universities, and Australian graduates have distinguished themselves in classical scholarship in this country and overseas. Some Australians have become distinguished scholars in Classics, while other students of Classical Greek have used their learning to make successful careers in law, politics, literature, education and many other fields.

The nature of learning Classical Greek

Classical Greek is a highly inflected language, with three distinct genders and numbers, noun cases and verb conjugations, including tenses, moods and voices. The Classical Greek alphabet has 24 letters, ordered from alpha to omega, and is essentially the same as the Modern Greek alphabet.

Students learn Classical Greek systematically within an authentic historical, social and cultural context. They absorb the ambience, history, society and values of ancient Greece as they read, and are encouraged to relate their discoveries to life in the modern world.

As they learn Classical Greek, students make connections with English and other languages. They expand their English vocabulary by exploring words derived from Classical Greek, and examine the complex inflections of Classical Greek, making comparisons with how meaning is conveyed in English. Their growing awareness of grammar equips them to understand the workings of other languages they may already know or wish to learn.

From synthetic reading material, students may progress to authentic Classical Greek texts, encountering selections from famous works of poetry and prose which have influenced Western literature and thought for two millennia. Students are encouraged to discuss the ideas and values embedded in texts and to convey their meaning and tone in English. They analyse how language and style are used to convey the author's purpose. As Classical Greek literature was composed to be delivered orally, students learn to read aloud, using the restored Classical pronunciation, and are encouraged to listen to oral performances so as to appreciate the impact of these works on their intended audiences.

The learning pathway and curriculum design

In the Australian Curriculum: Languages – Classical Greek, the learning pathway for students is Years 7–10.

A key dimension of the curriculum involves understanding the cultural dimension that shapes and is shaped by the language. The curriculum is designed with an intercultural language learning orientation to enable students to enter and explore an ancient world; to engage with an ancient people's ways of living, and viewing the world; to consider how an ancient civilisation influences life and thought in the modern world; and to reflect on what is special and valuable about their own language and culture.

Context statement

The place of Latin and the heritage of the ancient Roman world

Latin developed from a local dialect of central Italy to become the official language of ancient Rome, transmitting Roman law, government, literature and social and cultural knowledge and values throughout much of Europe, North Africa and West Asia during the period 753 BCE – 476 CE. The period for study is 1st century BCE to 1st century CE, when some of the most influential Latin literature extant was written.

As the institutions of the Roman empire fell into disarray in the 5th century CE, churches and monasteries became centres of education and scholarship, preserving and recopying manuscripts of Latin literary works. Latin was the language of literate Europeans throughout the Middle Ages and the Renaissance, and continued to be used in academic contexts up to the 20th century. It was the vehicle for literary, liturgical, legal, political, philosophical and scientific texts, many of lasting historical and aesthetic value. Latin continued as the language of Western Christianity, and remains so today for the official business of the Roman Catholic Church and the Vatican City State.

The enduring achievements and rich legacy of the ancient Roman world are still evident in today's world, in modern values, customs and beliefs, our laws and the form of our governments, our buildings and our art and literature. Readers of Latin have firsthand access to the great Classical writers who have shaped later world literature, such as Catullus, Lucretius, Cicero, Virgil, Horace, Livy, Tacitus and Juvenal (1st century BCE to 1st century CE). Readers can also access early Christian writers such as Augustine and documents such as *Magna Carta* (1215), and the works of mediaeval philosophers such as Thomas Aquinas, Renaissance statesmen such as Thomas More (*Utopia* 1516) and scientific pioneers such as Isaac Newton (*Philosophiæ Naturalis Principia Mathematica* 1687). The work of the Swedish scientist Carolus Linnaeus (*Systema Naturae* 1735) ensured that Latin remains the language of the classification of species in botany and zoology.

Although English is a Germanic language and not a descendant of Latin, the influence of Latin on the vocabulary of English is enormous. The greatest influence has been the adoption of countless literary, legal, political and scientific words from Latin to enable scholarly discourse to take place in English. Students of Latin increase their knowledge of English vocabulary beyond basic usage to include abstract and sophisticated language, for example, *judicial*. In addition, many Latin terms remain unchanged in English, such as *de facto*, *bona fide*, *post-mortem*, *alter ego*, *veto*. Abbreviations of Latin expressions occur in common and specialised usage, such as *etc.*, *a.m.*, *i.e.*, *ad lib.*

From the 14th century on, the various dialects of popular or 'Vulgar' Latin became recognised as distinct languages with literatures of their own: Italian, French, Spanish, Portuguese and Romanian. All these living variants of Latin are spoken today, not only in their countries of origin, but as a result of European colonisation, in many parts of the world, as confirmed by the term 'Latin America'. A knowledge of Latin facilitates the learning of any of these languages.

Although social and educational changes caused a reduction in the numbers of students of Latin in the 20th century, Latin continues to flourish. In the 21st century there has been a steady worldwide resurgence, particularly in the United Kingdom, Europe, North America and Australia.

The place of the Latin language in Australian education

Latin has featured in Australian education since the early 1800s, and was a prerequisite for university entrance in Australia until the 1950s. Educational changes in Australia in the 1950s and 1960s, such as the introduction of comprehensive secondary curricula, contributed to the removal of languages, including Latin, from a central position in the school curriculum.

By the early 1970s, it seemed that Latin would disappear from Australian schools, and it largely did, remaining viable mainly in New South Wales and Victoria, with independent schools offering Latin in other states. That Latin survived, grew and flourished in New South Wales and Victoria, with increasing growth in Queensland, is due in part to significant new directions in pedagogy. The traditional emphasis on composing Latin was replaced by the reading method, in which students acquire the language by reading continuous, historically accurate texts in Latin, carefully structured so as to introduce the language and its literary features progressively within an engaging historical and cultural context. The pedagogy was designed to offer an enriching experience to a wide range of learners; the study of Latin offered them an ongoing opportunity for the development of deep knowledge and transferable skills, including literacy and critical thinking. This method proved popular and effective for modern learners.

In some states, such as New South Wales and Victoria, active teacher associations provide stimulating activities for students of Latin, such as competitions in Latin recitation and essay writing; artistic interpretations of the Classical period; Latin quiz nights; Classical drama productions; and Latin study seminars, summer schools and weekend camps.

Latin has a long tradition in Australian universities, and Australian graduates have distinguished themselves in Classical scholarship in this country and overseas. The allied disciplines of archaeology, ancient history and philosophy often require reading skills in Latin. Latin terminology is widely used in such disciplines as science, horticulture, law and medicine.

The nature of learning Latin

Latin is a highly inflected language, with three distinct genders, as well as noun cases and verb conjugations, tenses, moods and voices. The modern English alphabet is essentially the same as the Roman alphabet.

Students learn Latin systematically within an authentic historical, social and cultural context. They engage with the ambience, history, society and values of ancient Rome as they read, and are encouraged to relate their discoveries to life in the modern world.

As they learn Latin, students make connections with English and other languages. They expand their English vocabulary by exploring words derived from Latin, and examine the complex inflections of Latin, making comparisons with how meaning is conveyed in English. Students' growing awareness of grammar equips them to understand the workings of other languages they may already know or wish to learn.

From synthetic reading material, students may progress to authentic Latin texts, encountering selections from famous works of poetry and prose which have influenced Western literature and thought for two millennia. Students are encouraged to discuss the ideas and values embedded in texts and to convey their meaning and tone in English. They analyse how language and style are used to convey the author's purpose. As Latin literature was composed to be delivered orally, students learn to read aloud, using the restored Classical pronunciation, and are encouraged to listen to oral performances so as to appreciate the impact of these works on their intended audiences.

The learning pathway and curriculum design

In the Australian Curriculum: Languages – Latin, the learning pathway for students is Years 7–10.

A key dimension of the curriculum involves understanding the cultural dimension that shapes and is shaped by the language. The curriculum is designed with an intercultural language learning orientation to enable students to enter and explore an ancient world; to engage with an ancient people's ways of living and viewing the world; to consider how an ancient civilisation influences life and thought in the modern world; and to reflect on what is special and valuable about their own language and culture.

The Australian Curriculum Languages - Framework for Classical Languages Classical Greek - Years 7–10 (Year 7 Entry) Sequence

Framework for Classical Languages

Years 7 and 8

The nature of the learners

Students are beginning their study of Classical Greek and typically have little prior knowledge and understanding of the language and ancient Greek history and culture. Most will have learnt a different language in primary school, while some will have proficiency in different home/community languages and bring existing language learning experiences and intercultural awareness to the new experience of learning Classical Greek. Students' skills in interpreting texts and their development of literacy are supported by their study of Classical Greek. Through their reading, analysis and translation of texts, students of Classical Greek develop their thinking processes, such as close attention to detail, pattern recognition, precision, accuracy, memory and logic. Students may need encouragement to take risks in learning a new language at this stage of social development and to consider how the experience of learning a Classical language impacts on their own ways of thinking and viewing the world.

Classical Greek language learning and use

Learners engage with people in the ancient Greek world, and gain direct access to their daily lives, through reading, comprehending and discussing Classical Greek texts that reveal their language use and social and cultural practices. They use vocabulary, grammar and textual cues to understand and interpret Classical Greek texts, and convey information and ideas about the daily life and attitudes of the ancient Greeks, in oral, written or digital forms, using Classical Greek as appropriate. They listen to and read Classical Greek texts, such as stories, myths and plays, and discuss characters, events, actions, settings and key emotions. They read aloud, recite or perform Classical Greek texts, such as stories, dialogues, poems or songs, to convey meaning and to entertain others. They translate Classical Greek texts into Standard English, applying their knowledge of vocabulary, accident and syntax, linguistic cues and culture. They compare the features and relative merits of different translations of Classical Greek texts to determine the features of a successful translation. Learners focus on the systems that structure the Classical Greek language (grammar, vocabulary, sounds, the written alphabet) and systematically build a vocabulary and grammatical base that allows them to access a variety of Classical Greek texts, such as narratives and short plays. They understand that Classical Greek spread with the expansion of the ancient Greek world, and explore the influence of Classical Greek on English and other languages. Learners explore the relationship between language and culture by examining particular language use that provides insights into the daily lives, ideas, feelings and attitudes of Greeks in the Classical period. They discuss the ancient origins of modern values, pursuits, citizenship, literature, the arts and architecture, reflecting on the enduring influence of the ancient Greek world on the modern world. They are encouraged to consider their own and others' reactions to and assumptions about the language and culture of ancient Greek society, and to reflect on their own approaches to learning and understanding of their own heritage, values and culture.

Contexts of interaction

Learners work both independently and collaboratively, exploring different modes and genres of communication. They pool linguistic knowledge and resources to plan and manage shared activities, problem-solve, and monitor and reflect on their work. Extra opportunities for interaction are provided through purposeful and integrated use of information and communication technologies (ICT); for example, shared research on aspects of culture and historical events, and collaborative translation of seen and unseen texts. Learners may extend their experiences relating to language and culture by participating in activities such as art competitions, drama productions and visits to museums and galleries.

Texts and resources

Learners work with a range of texts designed for language learning, such as textbooks, audio recordings, teacher-generated materials and online resources. They may also use materials designed for students of Classical Greek in different contexts, for example, comics, newsletters, online games, digital learning activities and apps. Texts from different sources give opportunities for discussion of the relationship between language and culture. Research tasks allow for exploration of themes, cultural references and historical events.

Features of Classical Greek language use

Learners become familiar with the sounds of Classical Greek, including the restored pronunciation. They use appropriate phrasing and voice inflection when reading aloud, reciting or performing Classical Greek texts, such as stories, dialogues, songs or plays, and develop their understanding of the Classical Greek alphabet. They apply their knowledge of Classical Greek grammar, including parts of speech, case, gender, number, person, for example, *οἱ τοῦ ναυκλήρου ἐρέται ἤρεσσον πρὸς τὴν θάλατταν*, verb conjugations, for example, *παύω, ἔπομαι*, agreement and tense, mood, voice, participles and infinitives, and conventions of sentence structure, for example, *μικρὸς γὰρ ἐστὶν ὁ οἶκος*, to the translation of Classical Greek texts. They use roots, derivatives and word lists to acquire and build Classical Greek vocabulary, and use dictionaries to select appropriate meanings of Classical Greek words. They explore influences of Classical Greek on English and other languages, focusing on derivatives and cognates such as *phobia*, *cryptic*, *paralysis*, and the contemporary use of Classical Greek words and expressions, for example, *kudos*, *Adonis*, *molon labe*. They make connections between texts and cultural contexts, exploring ways in which cultural values and perspectives are embedded in language and how language choices determine ways in which people and their ways of living are represented.

Level of support

A differentiated approach to teaching and task design caters for the diversity of learners. Support includes scaffolding, modelling and monitoring, explicit instruction and feedback, structured activities for practising new grammar, and access to print and electronic dictionaries. Students are supported to develop autonomy as language learners, and to self-monitor and refine strategies used in reading, listening, analysis and translation. Opportunities to review and consolidate are an important component of learning at this level.

The role of English

Classical Greek is the language of the texts studied. Classical Greek is also used for reading aloud, reciting or performing texts, and simple interactions in the classroom, such as greetings. English is used for translation, analysis, explanation, discussion, evaluation and reflection.

Years 7 and 8 Content Descriptions

Engaging with texts

Accessing the ancient Greek world through Classical Greek texts

Elaborations

Read, comprehend and discuss Classical Greek texts, using vocabulary, grammar and textual cues, to explore the ancient Greek world

[Key concepts: language, culture, meaning, experience; Key processes: reading, listening, interpreting, connecting]

(ACLCLE001)

- developing an initial sense of the structure and content of texts by inferring meaning from textual cues, for example, titles, headings, images or captions to images, maps
- listening to simple sentences in Classical Greek to infer meaning, using aural cues such as ἄρα ἤδη πονεῖτε ἐν τοῖς ἀγροῖς; ἐλθέ δεῦρο
- determining the general sense of texts through initial holistic reading, by identifying familiar people, vocabulary, places or topics, for example, ὁ Λεωνίδας μάχεται ἐν ταῖς Θερμοπύλαις, recognising modern editors' use of punctuation to guide readers
- analysing sentences, identifying and explaining the function of inflected forms, for example, ὁ δεσπότης καλεῖ τὸν δοῦλον (subject + verb + object)
- identifying and discussing linguistic features in narratives, such as word order, use of interrogative particles, striking word choice, for example, καὶ μὴν καταβαίνει ἐκ τοῦ ὄρους κένταυρος μέγιστος
- interpreting and commenting on language choices, such as patterns and length of simple and compound sentences, or use of direct speech, for example, ὁ δὲ Κύκλωψ τὸν τ' Ὀδυσσεά καὶ τοὺς ἐταίρους ὁρᾷ καί, «ὦ ξένοι» βοᾷ, «τίνες ἐστέ καὶ πόθεν πλεῖτε;»
- explaining cultural references embedded in texts, for example, μηδὲν ἄγαν
- discussing cultural information implicit in Classical Greek vocabulary, for example, ἀνὴρ, ἄριστος, σοφός, δεινός, ἥρως
- exploring cultural elements implicit in language use, for example, vocabulary and expressions particular to specific gods and festivals, such as ὦ Ζεῦ Σῶτερ/ Βρόντιε/Ξένιε, ὦ Βάκχε/Βρώμιε, ὦ Φοῖβε, ὦ Ἀθήνη Πρόμαχε
- discussing cultural representations such as symbols, for example, the owl (Athena), trident (Poseidon), olive wreath (Olympic victory), the letter lambda (Spartans)
- interpreting stated and implied meanings in texts and supporting an opinion with evidence from the Classical Greek, such as relationships between characters

Convey information and ideas about the daily life and attitudes of the ancient Greeks, in oral, written and digital forms, using Classical Greek as appropriate

[Key concepts: information, culture; Key processes: obtaining, presenting, informing]

(ACLCLE002)

- gathering, collating and presenting information about daily routine in the ancient Greek world, such as in posters or digital displays about family life, education, food, hygiene, exercise, with annotations in English or words and simple phrases in Classical Greek
- reading stories about the daily lives of ancient Greeks, and recreating their everyday experiences, for example, through role-play or an imaginative animated cartoon
- comparing details from different sources about where Greek people lived, such as in urban centres or rural settlements, for example, through dioramas or drawings with labels in English or Classical Greek, and discussing what they reveal about different lifestyles in the Classical period
- researching the purpose and function of spaces in an ancient Greek home, for example, the *ἀνδρῶν* and *γυναικῶν* rooms, for an oral or digital presentation, using labels in English and Classical Greek
- examining artefacts from the classical Greek period, such as those from ancient Athens, and discussing what they reveal about the everyday lives of ancient Greek people
- collating and sharing information online about ancient Greek inventions, engineering and infrastructure, for example, the Antikythera Mechanism, the Hippodamian urban grid plan, Archimedes' screw
- researching the attitudes of ancient Greeks revealed in their myths and legends, and acting out stories, such as the labours of Heracles, to convey these attitudes
- gathering and creating a class bank of information from texts about ancient Greek religious beliefs and practices, for example, Olympian deities, local festivals (Dionysia in Athens) and panhellenic festivals (Pythian Games at Delphi)
- reading accounts of historical events, such as Aeschylus' eyewitness account of the Battle of Salamis, and presenting information in new ways, for example, as a news report

Responding to texts

Elaborations

Listen to and read Classical Greek texts, such as stories, myths and plays; share reactions and make connections with characters, events, actions, settings and key emotions
[Key concepts: imagination, experience, character; Key processes: responding, connecting, describing]

(ACLCLE003)

- listening to and reading texts, such as stories about life in the city/country, legends or myths, for example, Theseus and the Minotaur, and responding to questions in English relating to content and context
- recognising recurring characters, settings and themes in texts, drawing on previous knowledge and experiences to make connections with the narrative
- discussing how scenes and characters are depicted in texts, such as through imagery or conversations, for example, in short plays, dialogues, retelling of well-known myths and legends
- discussing language features that encourage the audience to respond in particular ways, for example, the use of repetition
(πόλεμος αἴρεται, πόλεμος οὐ φατὸς πρὸς ἐμὲ καὶ θεοῦς), alliteration (τυφλὸς τὰ τ' ὤτα τὸν τε νοῦν τὰ τ' ὄμματ' εἶ), assonance (κατῆγεν ἦγεν ἐς μέλαν πέδον), onomatopoeia (αἰάζω, σίζω, δοῦπος, κλαγγή)
- recognising that writers use different text structures and formats for specific purposes and effects, for example, change of focus, a story within a story, plot tension
- identifying and discussing the techniques writers use to achieve specific effects, such as the use of antithesis to create humour or surprise, for example, ὁ μὲν διδάσκαλος πονεῖ, οἱ δὲ μαθηταὶ καθεύδουσιν

Read aloud, recite or perform Classical Greek texts, using phrasing and voice inflection to convey meaning and to entertain others

[Key concepts: performance, emotion; Key processes: reading, presenting]

(ACLCLE004)

- listening to and reproducing familiar and unfamiliar words, phrases and simple texts in Classical Greek to convey meaning, using restored pronunciation and appropriate phrasing and expression
- presenting orally short texts in Classical Greek, such as stories, dialogues, poems or speeches, to peers or the class, for example, a scene from Aristophanes or an epigram
- performing short extracts from comedy or passages of dialogue in collaboration with others, using strategies to convey the emotions of the characters
- reading aloud or reciting extracts from Classical Greek literature, such as the initial lines of the *Iliad* and the *Odyssey*

Translating

Elaborations

Translate Classical Greek texts into Standard English, by applying knowledge of vocabulary, accidence and syntax, and linguistic and cultural cues

[Key concepts: equivalence, representation; Key processes: interpreting, translating]

(ACLCLE005)

- reading texts to gain a sense of holistic meaning, and identifying cues, such as text type, familiar vocabulary, grammar, and cultural references
- considering multiple meanings of vocabulary, for example, by using dictionaries and electronic translation tools, and making appropriate selections according to context, for example, *ἄριστος*
- using known vocabulary, in Classical Greek or English, and context to deduce the meaning of unknown words
- identifying meanings of words by recognising change of form, such as irregular verb forms and third declension nouns, for example, *φέρω/οἶσω*, *παῖς/παιδός*
- identifying parts of speech and their function in context to determine meaning, for example, identifying the verb in a sentence
- identifying the specific function of inflected forms to determine meaning, for example, *ὁ ναύκληρος καλεῖ τὸν ναύτην* (subject + verb + direct object) or *ὁ ἀνὴρ ἐστι ποιητής* (subject + verb + complement)
- applying knowledge of grammar to recognise in context the specific function of words which may have multiple applications, such as subject or object, for example, *τὸ δένδρον θάλλει. ὁ γεωργὸς κόπτει τὸ δένδρον*
- exploring the effect of using the variety of English translations for verb tenses, for example, *ἰδὼν* ('having seen', 'after seeing', 'on seeing', 'seeing')
- selecting appropriate English meanings, identifying words and expressions that do not translate easily, for example, *ἀγαθός*, *ἄριστος*, *καλός*, *ξένος*, *δεινός*, *πρὸς τῶν θεῶν*
- determining appropriate word order in English to retain meaning and emphasis, for example, *κελεύει σε ὁ Ζεὺς*
- translating Classical Greek into idiomatic English, for example, by translating *ἐστι μοι δοῦλος*, as 'I have a slave'
- discussing how words that refer to aspects of ancient Greek culture should be translated, for example, *ὁ δῆμος* (deme, people, citizen body), *ὁ ἀνὴρ* (man, husband, hero), *ξένος* (stranger, guest, foreigner)
- developing problem-solving skills to resolve perceived issues and anomalies encountered in the translation process, for example, confusion of second declension masculine nominative and third declension feminine genitive
- discussing and correcting own translations to increase accuracy and better reflect register, tone and relationships between characters
- collaborating with peers to interpret meaning in texts and develop and edit joint translations, using a range of ICT
- translating, independently, unseen texts in Classical Greek into appropriate English

Compare different translations and interpretations of Classical Greek texts, and identify features of successful translations
[Key concepts: translation, analysis; Key processes: evaluating, explaining and comparing, intertextualising]

(ACLCLE006)

- identifying the characteristics of a successful translation, such as grammatical accuracy
- examining translations to determine how effectively Classical Greek is conveyed in English idiom, such as the use of participles
- comparing and discussing the merits of different translations of the same text, identifying differences and recognising that they may be equally valid
- giving and justifying opinions about the effectiveness of own and others' translations
- identifying and discussing effective strategies to create appropriate translations, such as skimming through the text and identifying familiar words and phrases, contextualising new vocabulary, and using these strategies to review and polish own translations

Understanding

Systems of language

Understand the phonological and orthographic systems of Classical Greek, including the restored pronunciation and the written alphabet

[Key concepts: sound system, writing system; Key processes: recognising, imitating, copying, writing]

(ACLCLU007)

Elaborations

- learning the Greek alphabet in lower and upper case, including final sigma, matching script to sound, for example, $\delta = d$, $\gamma = g$, $\theta = th$
- recognising the use of the upper case in Classical Greek to distinguish proper nouns
- mimicking or copying restored pronunciation of Classical Greek words, individually or with peers
- writing simple sentences in Classical Greek to consolidate knowledge of script
- recognising and representing diphthongs, double consonants and aspirated consonants, for example, $\alpha\iota$, $\gamma\gamma$, ψ , ξ , θ , χ , ϕ
- recognising and using diacritical marks to show aspiration and iota subscript, for example, $\eta\acute{\omicron}\delta\acute{\omicron}\varsigma$, $\tau\eta\grave{\iota}\acute{\omicron}\delta\acute{\omicron}\tilde{\omega}$
- learning the standard system of transliteration of Greek into English letters, for example, $\delta = d$, $\chi = ch$, $\alpha\iota = ae$
- recognising that punctuation in Classical Greek can be different from English, for example, the use of the semicolon as the question mark in Classical Greek

Understand concepts of accidence and syntax used in simple and compound sentences in Classical Greek, including parts of speech, case, gender, number, person, declension and conjugation, agreement and tense, mood, voice, participles and infinitives

[Key concepts: grammatical system, case, conjugation; Key processes: identifying, recognising]

(ACLCLU008)

- recognising that Greek verbs have variable endings that indicate person and number, for example, *φέρω*, *φέρουσιν*
- conjugating *-ω* verbs in the present, future, imperfect and aorist tenses, active and middle, for example, *λύω/λύομαι*
- conjugating contract verbs *-εω*, *-αω* in the present, future imperfect and aorist tenses, active and middle, for example, *φιλῶ/φιλοῦμαι*, *τιμῶ/τιμῶμαι*
- using the imperative in the present and aorist tenses, active and middle, for example, *σπεῦδε/σπεῦσον*
- using the infinitive and participles, active and middle, in the present, future and aorist tenses, for example, *παύειν/παύων*, *παύσειν/παύσων*, *παῦσαι/παύσας*
- using the irregular verb 'to be' in the present, future and imperfect tenses, for example, *εἰμί/ἔσομαι/ἦν*
- using the definite article to identify the number, gender and case of nouns, for example, *αἱ ὁδοί*, *τούς δικαστάς*
- recognising that the definite article, nouns, pronouns and adjectives inflect to show number and case, for example, *ὁ ἡμέτερος πατήρ*, *τὰ μικρά ἄροτρα*
- identifying the forms and functions of the nominative, vocative, accusative, genitive and dative cases of the definite article, nouns and pronouns, for example, *τῶν πολιτῶν πολλοί* (partitive genitive), *τῇ ὑστεραίᾳ* (dative of time when)
- identifying the three declensions of nouns and adjectives, including variants:
 - first declension: *ἡ κρήνη*, *ἡ οἰκία*, *ἡ θάλαττα*, *ὁ δεσπότης*, *ὁ νεανίας*
 - second declension: *ὁ ἀγρός*, *ἡ νῆσος*, *τὸ δένδρον*
 - third declension: *ὁ φύλαξ*, *τὸ ὄνομα*, *ὁ ἀνὴρ*, *ἡ τριήρης*, *ἡ πόλις*, *ὁ βασιλεύς*, *τὸ τεῖχος*
- identifying forms of common irregular nouns, for example, *ἡ ναῦς*, *ὁ βοῦς*
- identifying forms of common irregular adjectives, for example, *μέγας/μεγάλη/μέγα*, *πολύς/πολλή/πολύ*, *πᾶς/πᾶσα/πᾶν*
- recognising agreement between adjectives and nouns in number, gender and case, for example, *ἡ μακρὰ ὁδός*, *τοῦ ἀληθοῦς λόγου*
- recognising the comparative and superlative degrees of regular adjectives, for example, *ἀνδρεῖος*, *ἀνδρειότερος*, *ἀνδριότατος*
- identifying cardinal numbers *εἶς/μία/έν* to *χίλοι/αι/α* and *μύριοι/αι/α* and ordinal numbers *πρῶτος/η/ον* to *χιλιοστός*, *μυριοστός*
- identifying the forms and application of personal, interrogative, indefinite, demonstrative and relative pronouns, for example, *ἐγώ/σύ*, *ἡμεῖς/ὑμεῖς*, *τίς/τί*, *τις/τι*, *οὗτος/αὐτή/τοῦτο*, *ὅς/ἣ/ὅ*
- distinguishing between prepositional phrases using the accusative, genitive and dative cases, for example, *πρός τήν πόλιν*, *πρός τῶν θεῶν*, *πρός τῇ νηί*

- forming positive, comparative and superlative adverbs from adjectives, for example, ἀληθῶς/ἀληθέστερον/ἀληθέστατα
- analysing the functions of words in sentences from their inflected forms, such as subject + verb + complement, subject + verb + direct object, preposition + noun, for example, τὸ ἄνθος καλὸν ἐστίν. ὁ γεωργὸς τὸν κλῆρον σκάπτει. ὁ στρατὸς πορεύεται πρὸς τὰ τῆς πόλεως τείχη
- recognising how word order may be different in Classical Greek, such as the use of the attributive and predicative position of the adjective to vary meaning, for example, ἡ καλὴ κόρη and καλὴ ἡ κόρη
- recognising that adverbs, adverbial phrases and prepositional phrases can give important details about what is happening in a sentence, for example, νῦν, πρὸς τῇ θύρᾳ
- learning strategies for building on prior knowledge and learning new grammar, for example, mnemonic devices, paradigms, drill exercises, online learning tools

Acquire and build vocabulary by using roots, derivatives and word lists, and use dictionaries to select appropriate meanings of Classical Greek words

[Key concepts: vocabulary, meaning; Key processes: exploring, selecting]

(ACLCU009)

- developing own and class lists of vocabulary related to texts and topics, such as daily life in ancient Greece, for example, δοῦλος/δεσπότης, γυμνάσιον/παλαίστρα
- creating a class bank of words frequently found in Classical Greek, for example, μῦθος/ἥρως/θηρίον, ναῦς/ναύτης/ναύκληρος/ναυμαχίαν, πλοῦς/ἰστίον/ἐρέτης/λιμὴν, and common expressions used in everyday activities, for example, χαίρετε, τί πράττεις; ἐλθε δεῦρο, φεῦ, οἴμοι, εὗγε, εὖ ποιεῖς, σὺν ἀλλήλοις
- practising vocabulary knowledge, for example, by using electronic resources
- using print and electronic dictionaries to locate the appropriate meanings of words
- understanding that one Classical Greek word may correspond to several different English words, and selecting the most appropriate meaning of a word in its context
- developing strategies for vocabulary building by applying knowledge of roots and derivatives, for example, ἄγγελος (angel/archangel/evangelist), περὶ (periscope/perimeter/periphery), μόνος/ἡ/ον (monotony, monologue, monopoly)
- building vocabulary by recognising Classical Greek words commonly used in English, for example, idea, aroma, drama, synthesis, analysis, antithesis, hyperbole

Identify the structure and features of a range of texts in Classical Greek, such as narratives and short plays
[Key concepts: text structure, purpose; Key processes: identifying, explaining and comparing]

(ACLCLU010)

- identifying elements of different types of text, for example, stories, dialogues and speeches, and explaining the relationship between the language and structure used and the purpose of the text
- distinguishing and comparing features of a story and a play, such as narrative voice, characterisation, impact of direct speech
- making connections and comparisons between a new text and familiar texts of the same type
- using metalanguage to explain the effect of particular language features in texts on intended audiences, for example, the use of euphemisms in an attempt to substitute a mild expression for one considered improper, such as *ἀριστερός* (better) for 'left', *Εὐμενίδες* (the kindly ones) for the Furies, *Εὔξεινος Πόντος* (hospitable sea) for the Black Sea

The powerful influence of language and culture

Elaborations

Understand that Greek spread with the expansion of the ancient Greek world, and developed over time, influencing English and other languages

[Key concepts: linguistic evolution, time (the past in the present), interconnection across concepts, influence; Key processes: comparing, analysing, applying]

(ACLCLU011)

- recognising that Greek is a member of the Indo-European family of languages, related to other ancient languages, such as Latin, Sanskrit and Old Persian
- recognising that Greek has been spoken in various forms uninterruptedly from the 3rd millennium BCE to the present day and has been documented in writing since about 1450 BCE
- recognising that Classical Greek is a specific form of the language, evolved from earlier forms such as Mycenaean Greek and the Archaic Greek used in the epics of Homer
- identifying Classical Greek as the Attic/Ionic dialect of the language spoken in the 5th and 4th centuries BCE in Athens, many Aegean islands and the coast of Asia Minor
- recognising that Classical Greek was the form of the language used by significant ancient Greek authors, such as Thucydides, Sophocles, Plato, Lysias
- locating on a map the places where Greek was spoken in antiquity around the Mediterranean basin from Spain to the coast of Turkey and across the Black Sea
- investigating how the geography of mainland Greece influenced the development of independent city-states such as Athens, Sparta, Corinth and Thebes
- exploring the spread of Greek colonies across the Mediterranean and Black Sea coastlines, such as Syracuse (Sicily), Naples (Italy), Marseilles (France), Cyrene (Libya), Miletus (Turkey), Emporion (Spain)
- identifying and using Classical Greek derivatives to expand own English vocabulary, for example, *sceptic*, *cynic*, *antithesis*
- recognising connections between the spelling of Classical Greek and English words and applying understanding to improve own spelling in English, for example, *psychology*, *rhythm*, *seismology*
- identifying expressions in Classical Greek that are commonly used in English, for example, *hoi polloi*, *eureka*
- identifying words of Classical Greek origin that are used as school subjects, for example, mathematics, history, geography, music, drama, biology, chemistry, physics, philosophy, psychology, economics
- identifying and collecting word families in which the same Classical Greek root is used with different prefixes or suffixes, for example, *calligraphy*, *biography*, *biology*, *technology*, *paralysis*, *analysis*, *Palaeolithic*, *palaeontology*
- applying knowledge of Classical Greek to understand words and expressions in Modern Greek, such as signs in shops and public places, for example *ΚΙΝΔΥΝΟΣ*, *ΠΡΟΣΟΧΗ*, *ΙΧΘΥΟΠΩΛΕΙΟΝ*, *ΦΑΡΜΑΚΕΙΟΝ*, *ἐν τάξει*, *κλειστόν*
- identifying similarities between Classical Greek and other Indo-European languages by comparing cognate words, such as *ἕξ*: *sex* (Latin), *sechs* (German), *six*; *πατήρ*: *pater* (Latin), *Vater* (German), *father*

Examine the enduring influence of ancient Greek culture on the modern world, by discussing the ancient origins of modern values, pursuits, citizenship, literature, the arts and architecture

[Key concepts: aesthetics, time (the past in the present), modernity; Key processes: connecting, explaining and comparing]

(ACLCLU012)

- recognising the ancient origins of national values such as democracy, equity and justice, freedom of speech and independent thought
- comparing the concept of citizenship, rights and responsibilities in ancient Greece and the modern world
- identifying references to ancient Greek mythology and literature in visual and performing arts and literature from antiquity to the present
- exploring ancient connections with daily routines in modern society, such as sport, theatre and schooling
- identifying literary influences from the Classical Greek period on popular culture, such as brand names, cartoons, adventure films, for example, *Clash of the Titans*, *Troy*, *Hercules*
- exploring connections between ancient and modern music, for example, musical instruments such as the guitar, which is descended from the cithara or lyre
- recognising the use of Greek as the language of the New Testament and as the original language of well-known texts such as the Lord's Prayer
- researching elements of Greek engineering and architecture seen in public buildings in Australia and across the world, for example, the use of Doric, Ionic and Corinthian columns
- observing and discussing ancient Greek architectural structures and influences in Roman, Renaissance, Neoclassical and New Classical architecture

Role of language and culture

Elaborations

Recognise that the language of the ancient Greeks provides insights into their daily lives, ideas, feelings and attitudes
[Key concepts: language, culture, interdependence; Key processes: connecting, conceptualising, explaining]

(ACLCLU013)

- investigating connections between language and significant cultural attitudes, for example, discussing how the terms *ἐκκλησία*, *βουλή*, *πρυτάνεις*, *ψήφισμα* and the expressions *τις ἀγορεύειν βούλεται* and *ἔδοξε τῇ βουλῇ καὶ τῷ δήμῳ* relate to the concept of citizenship in ancient Athens
- understanding the factors, such as language, religion and culture, that unified the *Ἕλληνες* (Greeks) and set them apart from the *βάρβαροι* (non-Greeks)
- exploring and discussing language use that reflects the social structure of the *πόλις* of Athens, encompassing both city and countryside, for example, citizen classes, metics, slaves, women
- exploring and discussing references in texts to social structure in Sparta, including the Spartans, *perioikoi* and helots
- comparing and contrasting references in texts to family life, social practices and education in Athens and Sparta
- understanding the importance of religion in ancient Greek society, and its links to festivals and ceremonies, for example, by examining references in texts to worship of the Olympian gods and local heroes, the panhellenic festivals of the Olympic and Pythian Games, or the dramatic performances of the Dionysia in Athens
- comparing language that reflects the status of men, youths, women and girls in domestic affairs and public life in ancient Athens and Sparta, such as the significance of the terms *ἀνδρεία*, *κύριος*, *κηδεμών*, *παρθένος*
- exploring the colloquial language that ancient Greeks used for greetings, or answering questions about daily life, such as *χαῖρε/χαίρετε*, *πῶς ἔχεις/ἔχετε*; *τί ἔστιν*;

Reflecting

Reflect on own and others' reactions to and assumptions about the language and culture of ancient Greek society, considering similarities and differences to own language and culture
[Key concepts: identity, interconnection across concepts; Key processes: comparing, connecting, empathising, reflecting]

(ACLCLU014)

Elaborations

- considering own and others' cultural assumptions about home and leisure and how these may have been different in the ancient Greek context
- reviewing and responding to aspects of cultural practices in Classical Greek texts and ancient Greek artefacts, and discussing the reactions of peers to these
- developing an understanding of life in ancient Athens or Sparta, and reflecting on similarities and differences to own lifestyle in multicultural Australia
- describing own life at home and school and making comparisons with that of young people in ancient Greece
- discussing how young people in ancient Greece may have viewed the lives of young people in the modern world

Reflect on self as a language learner, considering how learning Classical Greek influences ways of learning and enhances understanding of own heritage, values and culture

[Key concepts: identity, interconnection across concepts, influence; Key processes: connecting, reflecting]

(ACLCLU015)

- exploring own sense of identity, considering own and others' assumptions about family, language(s) spoken, traditions, values and attitudes
- considering how learning about the ancient world offers different ways of interpreting the modern world and representing experience
- keeping a journal of experiences (humorous, satisfying or challenging) associated with learning and using Classical Greek, noting personal reactions and reflections over time
- considering how learning Classical Greek has impacted on own approaches to learning across subjects, such as setting realistic timeframes, computational thinking
- reflecting on the experience of learning Classical Greek, considering how it might add a further dimension to own sense of identity
- reflecting and reporting on how learning Classical Greek gives insights into the relationship between language and culture in general, and how own way of thinking about language, culture and identity may change through the experience

Framework for Classical Languages

Years 7 and 8 Achievement Standard

By the end of Year 8, students use their knowledge of vocabulary, grammar and textual cues to identify and interpret information in Classical Greek texts, such as narratives, about the daily life and attitudes of the ancient Greeks. They interpret grammatical structures such as inflected forms; identify linguistic features such as striking word choice, for example, *θηρίον δεινόν*, *Ἀθήνη γλαυκῶπις*; infer meaning from textual cues such as headings, images or captions; and describe social and cultural practices embedded in Classical Greek words, such as *γυμνάσιον*, *πανήγυρις*, *σπονδή*, *πομπή*. They convey information and ideas about ancient Greek society and culture, in oral, written or digital forms, using Classical Greek as appropriate, for example, a news report in English about a historical event such as the Battle of Marathon, or a digital poster about family life in ancient Greece with annotations in Classical Greek, such as *πατήρ*, *μήτηρ*, *υἴος*, *θυγάτηρ*. They share their responses to Classical Greek texts, such as stories, myths and plays, by expressing their feelings and ideas about characters, events, actions, settings and themes. They read aloud or recite Classical Greek texts, such as stories, dialogues, poems or speeches, or perform texts in Classical Greek, such as short plays, to entertain an audience, conveying meaning effectively by using appropriate phrasing and voice inflection. Students translate Classical Greek texts accurately into Standard English, applying their knowledge of vocabulary, including roots and derivatives, linguistic cues, culture, and accent and syntax, including number, gender and case of nouns, pronouns and adjectives, for example, *οὐδὲν κακὸν ἀμιγὲς καλοῦ*, conjugation and tense, such as present and future tenses of verbs, for example, *γράφω/γράφω, βάλλω/βαλῶ, δέχομαι/δέξομαι*, and conventions of sentence structure. They explain the relative effectiveness of different translations of the same text, and identify the features of a successful translation.

Students identify Classical Greek sound–script relationships and use restored pronunciation when reading aloud, such as for diphthongs, double consonants and aspirated consonants, for example, *εἴσοδος*, *ξένος*, *χάρις*. They identify the structure and features of different texts in Classical Greek, such as narratives or short plays, and explain how these elements contribute to an audience's response to the text. They describe how the Greek language spread with the expansion of the ancient Greek world, and influenced other languages during the Classical period. They explain how Classical Greek has influenced and continues to influence English vocabulary, by identifying derivatives, for example, *theory*, *dilemma*, *category*, *paragraph*, and words that are used in modern English, for example, *nemesis*, *catharsis*, *criterion*, *anathema*. Students give examples of how particular language use reflects the lifestyles, ideas, feelings and attitudes of Greeks in the Classical period, and identify connections between ancient and modern values, pursuits, citizenship, literature, the arts and architecture. They share their reactions to and assumptions about the language and culture of ancient Greek society, identifying similarities or differences to their own language and culture. They describe how learning Classical Greek impacts on their own approaches to learning and on their understanding of their own heritage, values and culture.

Framework for Classical Languages

Years 9 and 10

The nature of the learners

Students have prior experience of learning Classical Greek and bring a range of capabilities, strategies and knowledge that can be applied to new learning. They are expanding the range and nature of their learning experiences; from synthetic reading material, they may progress to some authentic Classical Greek texts, encountering selections from famous works of poetry and prose. Through their reading, analysis and translation of texts, students of Classical Greek further develop their literacy in English, through close attention to detail, precision, accuracy, memory, logic and critical reasoning. They have a growing awareness of the wider world, including the diversity of languages and cultures that have continued to be an integral feature of society since ancient times. They are considering future pathways and prospects, including how further study of Classical Greek may feature in these.

Classical Greek language learning and use

Learners gain direct access to life in the ancient Greek world through reading, analysing and interpreting Classical Greek texts that reveal the language use and social and cultural practices of the ancient Greeks. They use vocabulary, grammar and textual cues to analyse and interpret language use and cultural references in Classical Greek texts, such as historiography, drama or philosophy, and convey their interpretations of information and ideas about ancient Greek society and culture, in oral, written or digital forms, using Classical Greek as appropriate. They respond to Classical Greek texts by analysing themes, values and literary features, such as plot development and characterisation, and sharing and justifying opinions. They read aloud, recite or perform Classical Greek texts, such as oratory, history, drama or poetry, to entertain an audience, using phrasing and voice inflection to convey meaning and emotion. They translate a range of texts that incorporate complex sentence structures and extensive vocabulary into Standard English, reproducing the style and purpose of the texts. They evaluate the effectiveness of different English translations and interpretations of a text, and develop strategies for successful translations. Learners apply the principles of pronunciation for the reading of Classical Greek texts, and apply an extended knowledge of vocabulary, accidence and syntax to analysing how Classical Greek is used in complex sentences. They analyse the structure and organisation of different text types in Classical Greek, exploring how they relate to context, purpose and audience. Learners identify ancient Greek values, attitudes and beliefs implicit in Classical Greek texts, reflecting respectfully on the interdependence of language and culture. They investigate the enduring linguistic and cultural legacy of the ancient Greek world in the modern world. They question and explain their own and others' reactions to and assumptions about the language, culture and values of ancient Greek society, discussing how these relate to their own. They reflect on the power of language, and the impact of learning Classical Greek on their own style of communicating, and ways of thinking and viewing the world.

Contexts of interaction

Task characteristics and literary styles at this level are complex and challenging, providing opportunities for independent as well as collaborative language interpretation and performance, and development and strategic use of language and cultural resources. The language class remains the principal context for learning Classical Greek. Learners may participate in wider experiences relating to language and culture, such as competitions in recitation, art and essay writing; weekend camps; quiz nights; study seminars; summer schools; drama productions; and visits to museums and galleries. These experiences give learners a sense of connectedness and purpose, and allow them to make use of and extend their understanding of the ancient Greek world and their language capability beyond the school context.

Texts and resources

Learners engage with a range of texts designed for language learning, such as textbooks, audio recordings, teacher-generated materials and online resources. A variety of texts gives opportunities for discussion and analysis of the relationship between language and culture. Research tasks allow for exploration of themes, cultural references and historical events.

Features of Classical Greek language use

Learners apply the principles of pronunciation for the reading of Classical Greek texts, for example, using accentuation, crasis and elision to maintain speech flow. They apply an extended knowledge of accidence and syntax, including parts of speech, case, gender, number, person, declension, for example, *τῆς γυναικὸς ὀργιζομένης ὁ ἀνὴρ ἀπέδραμε*, and conjugation, for example, contract verbs in *-οω* and *-μι*, agreement, tense, mood, voice, participles and infinitives, to the analysis and translation of texts that incorporate complex sentence structures. They analyse texts more critically, identifying the structure and features of different text types, and explaining their relationship with context, purpose and audience. They recognise the ongoing influence of Classical Greek on English, through the transfer of specialist vocabulary and abstract concepts, for example, *sympathy*, *theorem*, *chaos*, and the coining of vocabulary for new technology and new discoveries, such as in science and medicine, for example, *phenotype*, *glycolysis* and *neurosis*. They analyse implicit values, concepts and assumptions embedded in texts, explaining the interrelationship between language and culture.

Level of support

This stage of learning involves consolidation and progression. Learners need opportunities for new challenges and more independent learning experiences. Continued scaffolding, modelling and monitoring are required to support these challenges. A range of resources is provided and processes are modelled for the development of more autonomous self-monitoring and reflecting strategies, such as online collaborating for translation, video documenting and discussion forums. Continued focused attention on grammatical and literary features supports learners in the reading, analysis and translation of texts.

The role of English

Classical Greek is the language of texts studied, such as narratives, drama, poetry, history or oratory. Classical Greek is also used for reading aloud, reciting or performing texts. English is used for translation, analysis, explanation, discussion, evaluation and reflection.

Years 9 and 10 Content Descriptions

Engaging with texts

Accessing the ancient Greek world through Classical Greek texts	Elaborations
---	--------------

Read, analyse and interpret Classical Greek texts, using vocabulary, grammar and textual cues, to engage with the ancient Greek world

[Key concepts: language, culture, meaning, experience; Key processes: reading, analysing, connecting]

(ACLCLE016)

- predicting the context and content of Classical Greek texts through initial holistic reading, by identifying key words and phrases, for example, *οἱ βάρβαροι μάλα φοβούμενοι*
- inferring meaning using knowledge of the text type and the author's purpose and technique, for example, *νῦν οὖν ἀτεχνῶς ἤκω παρασκευασμένος/βοᾶν, ὑποκροῦειν, λοιδορεῖν τοὺς ῥήτορας/ἐάν τις ἄλλο πλὴν περὶ εἰρήνης λέγῃ.* (Aristophanes' *Acharnians*)
- investigating and explaining the effect of word order in Classical Greek in producing emphasis and tone, for example, indignation, anger, suspense
- examining and interpreting complex sentence structures, such as the use of the optative mood in indirect statements, for example, *ὁ στρατηγὸς εἶπεν ὅτι οἱ σύμμαχοι δ' ὀλίγου νικήσοιεν*
- reflecting on the particular use of tenses in Classical Greek and making comparisons with English, such as use of aspect, vivid use of the present in indirect speech, or use of the aorist in gnomic statements, for example, *παθὼν δέ τε νήπιος ἔγνω*
- explaining how the coherence of complex texts relies on devices that signal text structure and guide readers, for example, *οὖν, γάρ, μέντοι, δήπου*
- discussing conventions of Classical Greek texts, such as the inclusion of speeches in historiography
- investigating how different conjunctions are used in complex sentences to extend, elaborate and explain ideas, for example, *εἶχομεν ἡμεῖς Πύδναν καὶ Μεθώνην καὶ πάντα τὸν τόπον τοῦτον*
- explaining allusions to historical or mythological characters who exemplify Greek virtues, such as Achilles, Hector, Theseus, Solon, Socrates
- recognising positive and negative connotations implicit in Classical Greek words, for example, *τύραννος, δαίμων*
- examining cultural assumptions that influence ways in which meanings are expressed or interpreted, for example, the use of pompous or tragic language for comic effect in Aristophanes' plays
- discussing the function and power of cultural representations such as symbols, for example, *the gorgon/aegis, the omphalos, Asclepius' wand, the owl*
- justifying interpretations of texts, using examples or quotations from or references to the text, such as line numbers or a paraphrase of a longer section of text
- constructing, editing and presenting interpretations of and responses to literary Classical Greek, using ICT collaboratively

Convey interpretations of information and ideas about ancient Greek society and culture, in oral, written and digital forms, using Classical Greek as appropriate

[Key concepts: information, culture; Key processes: interpreting, explaining, presenting]

(ACLCLE017)

- discussing how cultural attitudes are conveyed in Classical Greek texts, such as attitudes to slaves or women, cleanliness, food, for example, conducting a role-play, forum on salient issues, 'Q & A' session
- investigating legal rights and obligations of citizens, social classes or property rights, for example, building a digital representation of social strata
- researching ancient Greek urban planning and architecture through the study of an archaeological site, and presenting findings, for example, by creating a virtual tour of the Agora or the Acropolis of Athens, with written or oral text in English or simple sentences in Classical Greek
- examining architectural remains of ancient Greece, such as places of entertainment and worship, and discussing what they reveal about the values and attitudes of ancient Greeks
- gathering and collating information about ancient Greek art, including sculpture, jewellery and painting, for example, producing and presenting an online exhibition catalogue
- researching references in Classical Greek texts to historical or mythological characters, such as Themistocles or Achilles
- exploring Classical Greek inscriptions to elicit and present information about ancient Greek society, for example, vases, funerary stelae, ostraka, and creating own examples in English or Classical Greek

Responding to texts

Elaborations

Respond to Classical Greek texts by analysing themes, values and literary features, such as plot development and characterisation, and sharing and justifying opinions
[Key concepts: morality, characterisation, theme; Key processes: responding, analysing, discussing, explaining]

(ACLCLE018)

- reading texts in Classical Greek and responding to questions in English to demonstrate understanding of content, context, purpose and technique
- discussing how language is used to reveal character, values and key messages in texts such as narratives, dialogues, plays, poems, letters or speeches, for example, Pericles' funeral oration
- discussing epic plots and characters, such as the depiction of Croesus in Herodotus' *Histories*, Dicaeopolis in Aristophanes' *Acharnians*, for example, debating significant events and the author's purpose
- analysing plot development in texts such as plays and stories, discussing features, for example, use of comic episode, plot twist, climax, resolution
- interpreting how particular stylistic effects are created, such as emphasis, doubt, irony or supposition, for example, through the use of particles *πῶς γὰρ οὐ; καὶ γάρ, ἄρα οὐ/ἄρα μή*
- analysing how writers use language features to achieve particular aesthetic, humorous or persuasive purposes and effects, such as hyperbole, for example, *μύριοι*, or irony, for example, Socratic dialogue or dramatic irony
- evaluating the effectiveness of texts, by considering the use of techniques, for example, simile, metaphor, personification or pathos, for particular purposes, such as to entertain or persuade

Read aloud, recite or perform Classical Greek texts to entertain others, using strategies such as phrasing and voice inflection to convey meaning and emotion
[Key concepts: performance, expression, emotion; Key processes: reading, presenting]

(ACLCLE019)

- reading aloud passages or extracts from different genres of Classical Greek literature, such as Socratic dialogue, oratory, historiography, drama or poetry, with appropriate expression, phrasing, stress and tone to convey meaning
- reciting or presenting extracts from Classical Greek texts to the class or school community, using expression and movement to illustrate meaning and to entertain, for example, excerpts from Homer's *Iliad*, Pindar's victory odes
- performing extracts from Classical Greek plays for the appreciation of an audience, for example, from Sophocles' *Antigone* or Euripides' *Medea*

Translating

Elaborations

Translate a range of texts that incorporate complex sentence structures and extensive vocabulary from Classical Greek into Standard English, representing the style and purpose of the texts

[Key concepts: equivalence, meaning; Key processes: analysing, translating]

(ACLCLE020)

- reading holistically to deduce the context and content of Classical Greek texts, by identifying key words and phrases
- applying expanded knowledge of vocabulary, grammar and problem-solving skills to translate compound sentences and complex sentences with nested clauses
- conveying shades of meaning of a range of subtle vocabulary, for example, inferring the different connotations of a word in a particular context, such as *δίκη*
- inferring the meaning of new words and expressions, using knowledge of the text type and the author's purpose and technique, for example, *ὁ λόγος* (word, speech, argument, reasoning, story, computation)
- expanding the variety of English translations for verb tenses or moods, for example, to express aspect in a command, *παύου* (general/ongoing) compared to *παῦσαι* (once)
- deducing the meaning of new words, by drawing on prior knowledge, derivatives and connections with familiar words, for example, *σαρκοφάγος*, *κακοδαίμων*
- recreating mood, tone and dramatic impact in English translations by selecting appropriate vocabulary, comparing and contrasting potential choices, for example, *τύχη* (chance, luck, fortune), *συμφορά* (event, circumstance, mishap, misfortune)
- refining translations by exploring print and online Classical Greek and English dictionaries and thesauruses to consider a variety of meanings and synonyms
- conveying emphasis and tone, such as indignation, anger or suspense, embedded in Classical Greek word order, for example, *χρυσόν τε καὶ ἄργυρον φέρει ὁ Ὀδυσσεύς ἐν τῷ ἄσκει*
- translating complex sentence structures, such as subordinate clauses and indirect speech, for example, causal, purpose, result, indirect questions, commands, conditionals
- rendering the precise meaning of tenses in Classical Greek into idiomatic English, for example, *ἐλάβανον/ἐλαβον*
- conveying the meaning of idiomatic expressions and culturally specific terms, for example, *ἀρετή*, *δαίμων/δαιμόνιον/εὐδαιμονία*, *τα πρόβατα θόρυβον ποιεῖ*, *γλαύκ' Ἀθήναζε/γλαύκας εἰς Ἀθήνας*, by choosing appropriate English terms and expressions
- constructing and editing translations collaboratively with peers, using a range of ICT
- correcting own translations to increase accuracy and better reflect register, tone and relationships
- translating, independently or in collaboration with peers, unseen texts with compound or complex sentences, drawing on familiarity with the style and language of texts already studied

Evaluate different translations and interpretations of Classical Greek texts, using metalanguage to discuss their effectiveness, and develop strategies for successful translations

[Key concepts: translation; Key processes: evaluating, explaining and comparing, intertextualising]

(ACLCLE021)

- evaluating the effectiveness of translations, using criteria such as selection of appropriate vocabulary, grammatical accuracy, fluency, conciseness, clarity, idiomatic expression
- discussing how closely and effectively translations convey the author's meaning and intent
- critically analysing the merits of different translations of the same text, presenting and justifying opinions, and recognising skills of others
- discussing strategies used to convey complex ideas and structures, such as subordinate clauses, rendering of mood and the use of correlatives, for example, *τόσος/ ὅσος, τοῖος/οἷος*
- evaluating strategies used to create fluent, accurate and idiomatic translations
- applying identified strategies to the translation of seen and unseen texts

Understanding

Systems of language

Understand and apply the principles of pronunciation for the reading of Classical Greek texts

[Key concepts: sound system, fluency; Key processes: reading, applying]

(ACLCLU022)

Elaborations

- developing fluency in recognising sound and spelling changes, for example, those that occur when stops (*β/π/ φ, τ/δ/θ/ζ, κ/γ/χ*) are followed by sigma, as in *σπεύδω/ ἔσπευσα, πέμπω/ἔπεμψα, διώκω/ἐδίωξα*
- using diacritical marks for accentuation, to distinguish between words with the same spelling, for example, interrogative and indefinite adverbs and pronouns, such as *τις* and *τίς*, or verbs, such as *πονεῖ* and *πόνει*
- recognising the component parts of compound words involving transfer of aspirates, for example, *κατά + ἵστημι = καθίστημι*
- recognising non-Attic versions of common words, for example, *θάλασσα (θάλαττα), πονέω (πονῶ), ἐς (εἰς), μήτηρ (μήτηρ)*
- understanding the function of crasis and elision when reading aloud, for example, *κάγαθοί = καὶ ἀγαθοί, τᾶλλα = τὰ ἅλλα*
- noting that iota subscript is given in the upper case when reading Classical Greek inscriptions

Understand concepts of accidence and syntax used in complex sentences in Classical Greek, including subordinate clauses, pronoun forms, mood, voice, and conventions of complex sentence structure

[Key concepts: grammatical system, case, conjugation, mood, voice; Key processes: identifying, explaining]

(ACLCLU023)

- using the indefinite adjective *τις* with nouns to supply the meaning of the indefinite article in English, for example, *κακόν τι πάσχει, νήσόν τινα*
- conjugating *-ω* verbs in perfect and pluperfect tenses, active and middle, indicative, imperative and infinitive forms, for example, *εἶρηκα/εἴρημαι, ἑώρακα/εὔραμαι*
- conjugating *-ω* verbs in the passive voice in all applicable tenses including first and second aorist and future, for example, *ἐλύθην/λυθήσομαι, ἐφάνην/φανήσομαι*
- conjugating contract verbs in all tenses and voices, including verbs in *-οω*, for example, *δηλῶ, ἐλευθερῶ*
- conjugating *-μι* verbs, including *δίδωμι, τίθημι, ἵστημι, ἴημι, δείκνυμι, φημί*
- conjugating common irregular verbs, for example, *οἶδα, εἰκοι*
- forming the comparative and superlative degrees of common irregular adjectives, for example:
 - *ἀγαθός/ἀμείνων/ἄριστος, ἀγαθός/βελτίων/βέλτιστος, ἀγαθός/κρείττων/κράτιστος*
 - *κακός/κακίων/κάκιστος, κακός/χείρων/χείριστος*
 - *καλός/καλλίων/κάλλιστος*
 - *μέγας/μείζων/μέγιστος*
 - *πολύς/πλείων/πλεῖστος*
- identifying the use of participles with the genitive absolute and the accusative absolute, for example, *ἡμέρας γενομένης, ἔδοξεν ταῖς κόραις πρὸς τὸν κρήνην βαίνειν* and *δέον τὴν πόλιν ἀμύνεσθαι, οἱ ἄνδρες τὰ ὄπλα ἔφερον*
- recognising the forms and uses of the subjunctive mood, for example, *ταχέως ἴωμεν* (exhortation), *τί ποιῶμεν;* (deliberation), *μὴ δέξησθε τὰ δῶρα* (prohibition), *οἱ στρατιῶται φεύγουσιν ἵνα μὴ ὑπὸ τῶν πολεμίων ληφθῶσιν* (purpose clause), *φοβοῦμαι μὴ ὁ δεσπότης οὐκ ἐθέλῃ παῦσαι τὸν πόνον* (clause of fearing)
- recognising the forms and uses of the optative mood, for example, *εἴθε τὴν πατρίδα σώζοιμεν* (wish), *βουλοίμεθα ἂν τοῦ ἀοιδοῦ ἀκούειν* (potential optative)
- understanding the structure and use of indirect statements with *ὅτι*, the infinitive or the participle, for example, *ὁ ἄγγελος εἶπεν ὅτι οἱ πολέμοιοι ἤδη προσχωροῦσιν/ὁ πάτηρ ἔφη ἀνάγκην εἶναι οἴκαδε ἐπανιέναι/οἱ παῖδες εἶδον λύκον μέγαν πρὸς τὴν οἰκίαν προσιόντα*
- understanding the structure and use of conditional clauses, for example, *ἐὰν τῷ δημαγωγῷ πιστεῦγῃ, μῶρος εἴ/ἐὰν τὸν δοῦλον καλέσῃς, βραδέως ἀφίξεται/εἰ ὁ παῖς τοῦτο ἐποίησεν, ἐδέξατο ἂν τὸν ἔπαινον*
- understanding the structure and use of indefinite clauses, for example, *ὅστις ἂν ἔξω τῶν τῆς πόλεως ὁρῶν εὐρεθῇ, ἐν κινδύνῳ μεγάλῳ ἔσται/ἐπειδὴν γένηται ἡ πανήγυρις, πάντες οἱ Ἀθηναῖοι εἰς τὴν ἀγορὰν σπεύδουσιν*
- identifying the articular infinitive, for example, *ἀγαθὸς εἰς τὸ λέγειν τε καὶ πράττειν*
- identifying the verbal adjective in *-τέος*, for example, *οὐ*

Λεκτέοι εἰσὶν οἱ λόγοι

- identifying verbs that take supplementary participles, for example, *ἔτυχον παροῦσαι αἱ γυναῖκες/οἱ Ἀθηναῖοι ἐφαίνοντο οὐ βουλόμενοι ἀγορεύειν*
- understanding the sequence of tenses and moods in complex sentences (primary and secondary sequences), for example, *λέγει ὅτι εἰ ὁ ἀνὴρ τοῦτο εἶπεν, ἐψεύδετο/εἶπεν ὅτι εἰ ὁ ἀνὴρ τοῦτο εἶποι, ψεύδοιτο ἂν*
- recognising creative variations in Classical Greek word order to focus on action, or to create suspense by delaying a key word, phrase or clause
- elaborating strategies for building on prior knowledge and learning new grammar, for example, mnemonic devices, paradigms, drill exercises, online learning tools

Expand vocabulary by using a range of strategies, including knowledge of roots, cognates and derivatives, and use dictionaries to determine the meaning of unfamiliar vocabulary in specific contexts

[Key concepts: vocabulary, connections; Key processes: analysing, interpreting, applying]

(ACLCLU024)

- developing vocabulary lists pertinent to particular reading, for example, philosophical words, poetic words and military words, such as *στρατός, στρατηγός, στρατιώτης, στρατόπεδον*
- using a dictionary to investigate how vocabulary choices in Classical Greek and English can express shades of meaning, *ὑπεροράω* ('look down on', 'overlook', 'despise')
- extrapolating knowledge of word origins, roots and cognates to interpret unfamiliar vocabulary, for example, *δίκη/δίκαιος, λάμπω/λαμπρός, φοβοῦμαι/φοβερός*
- extending vocabulary through word-building from Classical Greek roots, for example, *τιμῶ/τιμή, ἔργον/ἐργάζομαι, πόλις/πολίτης/πολιτικός/πολιτεία*
- identifying and interpreting compound words, for example, *προσβάλλω/καταβάλλω/ἐκβάλλω*
- recognising common patterns of vowel change to identify words from the same root, for example, *γίγνομαι/γένεσις, λέγω/λόγος*
- expanding vocabulary by using connections between conceptually related words, for example, chronology, chronic, anachronism

Analyse the structure and features of different text types in Classical Greek, exploring how they relate to context, purpose and audience

[Key concepts: text organisation, genre; Key processes: analysing, explaining and comparing, intertextualising]

(ACLCLU025)

- identifying the purpose and specific features of prose and verse texts, such as in the structure of Classical Greek plays, for example, *πρόλογος, πάροδος, ἐπεισόδια, στάσιμα, ἐξοδος*
- making connections and comparisons between a new text and familiar texts of the same type
- analysing texts to understand how different points of view are expressed, for example, the response of several characters to a dramatic decision, such as the recall of military generals to Athens to stand trial after the Athenian victory at Arginusae in 406 BCE
- recognising different ways of presenting the same story, for example, from the viewpoint of different characters or in the form of a flashback
- analysing language features used to influence the intended audience, such as imagery, rhetorical devices

The powerful influence of language and culture

Elaborations

Understand that Greek became the dominant language of the ancient Mediterranean world and facilitated the spread of Greek civilisation and culture, and that Classical Greek continues to enrich English through specialist vocabulary and abstract concepts embodied in the language

[Key concepts: linguistic evolution, power, ancient/modern, influence; Key processes: analysing, conceptualising, explaining and comparing]

(ACLCLU026)

- recognising that, from the Hellenistic period onwards, Koine Greek developed from Classical Greek to become the lingua franca of Eastern Mediterranean lands and the language of the New Testament
- discussing the spread of Greek influence across the Mediterranean and Black Sea, including the use of Greek as the common language for government, trade, commerce, education and law
- investigating how the Greek language allowed the spread of innovative Greek ideas in the areas of science, medicine, mathematics, historiography, geography and philosophy, for example, *μαθηματικά, γεωγραφία, ιστορία, φιλοσοφία*
- recognising that there were many dialects of Greek spoken in antiquity, such as Doric, Aeolic, Arcado-Cypriot
- exploring famous centres of Greek learning and culture such as Alexandria, Antioch and Ephesus
- recognising the spread of Greek ideas in the Roman world, shown by the use of borrowed Greek vocabulary in Latin to denote such concepts as *stadium, palaestra, rhetor theatrum, comedia, stoica, philosophia*
- exploring abstract concepts derived from Classical Greek, such as philanthropy, idol, autonomy, paradox, aesthetics, nostalgia, agony
- exploring and discussing the meaning of Classical Greek sayings used in literature, such as *μηδὲν ἄγαν, γνῶθι σαυτόν, μολὼν λαβέ*
- recognising words in English that are a hybrid of Classical Greek and Latin, for example, metalanguage, quantum physics, teleconference, television, automobile
- discussing Classical Greek derivatives that are used in fields such as business and education, for example, macroeconomics, monopoly, pedagogy, syllabus
- examining the Classical Greek roots of English words in subjects across the school curriculum, such as theorem, metaphor, photosynthesis, chlorine, atom, planet, geophysical, ecosystem, orchestra, music, scene, dialogue, chorus, athletics
- identifying Classical Greek roots in English scientific, technical and medical terminology, for example, catalyst, aerodynamic, pathogen, bacteria, atherosclerosis, acne, asthma, chromatography, symmetry, thermometer, seismic
- exploring how Classical Greek is used to coin terms for new technology and new discoveries in science and medicine in the modern world, such as gigabyte, nanotechnology, antioxidant, polymer, genotype, triglyceride
- applying knowledge of Classical Greek to form plurals of borrowed English words, for example, criterion/criteria, phenomenon/phenomena, crisis/crises, thesis/theses, stigma/stigmata
- discussing the enduring use of Classical Greek in religious contexts, for example, *κύριε ἐλέησον, Χριστός,*

ἐκκλησία, βάπτισμα, συναγωγή, κλήρος, ἄγγελος,
πρεσβύτερος, ὕμνος, βίβλος, εὐαγγέλιον

Discuss how the ancient Greek world has influenced the modern world, in its social, political and legal structures; philosophy; literature; arts; and medical and scientific practices

[Key concepts: ancient/modern, aesthetics, time (the past in the present); Key processes: analysing, connecting, conceptualising]

(ACLCLU027)

- discussing the ancient origins of modern political and legal structures and concepts, such as jury service, elections, trials
- exploring modern social issues, such as class, the role of women and civil rights, and making comparisons with the Classical Greek period
- researching the influence of leading Greek intellectuals, such as Socrates, Plato, Aristotle, on modern Western philosophy
- discussing influences of Classical Greek literature on modern novels, poetry, drama and film, such as World War I poetry, David Malouf's *Ransom*, Anouilh's *Antigone*, *A Dream of Passion* (Medea)
- recognising the importance of literary genres such as epic, tragedy, comedy, epigram, ode, history, myth
- viewing artworks to investigate the incorporation of classical techniques and themes by later artists, for example, Botticelli, Michelangelo, Bernini
- investigating ancient practices in medicine and science still relevant in the modern world, such as the theories of Hippocrates, Democritus, Pythagoras, Archimedes, Eratosthenes, Aristarchus

Role of language and culture

Identify how cultural values, attitudes and beliefs of the ancient Greeks are embedded in their language

[Key concepts: language, culture, interdependence, values; Key processes: analysing, explaining and comparing, conceptualising]

(ACLCLU028)

Elaborations

- discussing ancient Greek values that are embedded in terms such as *σοφία* and *ξενία* and considering their significance in the modern world
- understanding how language and cultural practices are interconnected, for example, by explaining religious origins or connotations associated with words and expressions such as *ἱερόν/τέμενος/ἥρωον/ἄβατον/μυστήρια/εὐσέβεια*
- investigating the use of dialects to denote differences in ethnicity and social status in ancient Greece, for example, Aristophanes' use of Doric to ridicule a Spartan character
- exploring the formal language that ancient Greeks used for greetings, or responding to the challenges of public life, such as *ἔρρωσθε καὶ ἐδαιμονεῖτε, ἀσπάζομαι, ὦ ἄνδρες Ἀθηναῖοι, ὦ δικασταί*, and making comparisons with own language use in formal contexts
- reflecting on how language, texts and artefacts provide a means of understanding the social and cultural practices of ancient Greeks and how they conceptualised their world

Reflecting

Elaborations

Question and explain own and others' reactions to and assumptions about the language, culture and values of ancient Greek society, discussing how these relate to own language and culture

[Key concepts: attitude, value and belief; identity; Key processes: reflecting, decentring, empathising, mediating, explaining]

(ACLCLU029)

- discussing how values, attitudes and practices of people living in ancient Athens or Sparta are similar to or different from their own
- exploring how cultural identity was manifested in the ancient world, and making comparisons with own cultural identity in modern Australia
- exploring the identity and loyalty of the ancient Greeks as members of separate city-states and members of a broader Greek world and relating this to their own identity as a member of a local community, a state/territory/nation and as a global citizen
- describing and comparing own public and private lives with those of people in ancient Greece
- considering how cultural diversity has continued to be an integral feature of society since ancient times
- exploring the process of decentring from own linguistic and cultural standpoint and considering how own ways of behaving and communicating may have been perceived by people of the past

Reflect on self as a language learner, explaining how the study of Classical Greek influences own communicative behaviours, ways of thinking and viewing the world

[Key concepts: identity, interconnection across concepts, influence; Key processes: connecting, reflecting, explaining]

(ACLCLU030)

- exploring own sense of identity, challenging own and others' assumptions about family and civic responsibilities, traditions, values and attitudes
- drawing on knowledge of ancient society to examine and interpret own world, including aspects such as ancestry, values, traditions, social status, family and national pride
- reflecting, such as in discussions, blogs and journals, on experiences in the course of learning Classical Greek and their impact on perceptions of own cultural experience and ways of communicating
- identifying challenges and achievements associated with learning Classical Greek, for example, learning to 'read between the lines' to identify thought implicit in the use of language
- reinterpreting own experience of learning Classical Greek, listening to others' perspectives and comparing these with own experience
- discussing how learning Classical Greek impacts on own ways of thinking and viewing the world

Framework for Classical Languages

Years 9 and 10 Achievement Standard

By the end of Year 10, students analyse a range of Classical Greek texts to obtain information and ideas about ancient Greek society and culture. They use vocabulary, grammar and textual cues to analyse and interpret language use and cultural references in Classical Greek texts, such as poetry, plays or narratives, for example, by deducing the meaning of complex sentence structures, such as those with subordinate clauses or indirect speech, for example, *ὁ ἄγγελος λέγει ὅτι οἱ πολέμοι προσέρχονται*, and explaining the impact of word order on emphasis and tone, for example, *ὁ δὲ ἀνεξέταστος βίος οὐ βιωτὸς ἀνθρώπῳ, ἐν οἷδ' ὅτι οὐδὲν οἷδ' αἶν' ἔστιν, πρῶτον μὲν γάρ*, and implicit values, concepts and assumptions embedded in language use, for example, *ἀριστεία, μίσσος*. They convey their interpretations of information and ideas about ancient Greek society and culture, in oral, written or digital forms, such as role-plays or debates in English about how cultural attitudes are conveyed in Classical Greek texts, or a digital presentation of an archaeological site, using simple sentences in Classical Greek, for example, *τὸ μαντεῖον τῶν Δελφῶν*. They share their responses to Classical Greek texts, such as narratives, dialogues, plays, poems or letters, by describing themes, values and literary features, such as plot development and characterisation, and expressing and justifying their opinions with support from the text. They read aloud, recite or perform Classical Greek texts, such as oratory, history, drama or poetry, to entertain different audiences, conveying meaning and emotion effectively by using appropriate phrasing and voice inflection. Students translate a range of texts that incorporate complex sentence structures and extensive vocabulary, from Classical Greek into Standard English that represents the style and purpose of the texts, applying their knowledge of roots, cognates and derivatives to infer the meaning of unfamiliar vocabulary, and using dictionaries to select the appropriate meaning of words. They analyse how the language is used in grammatically complex sentences, including subordinate clauses, non-finite verb forms, pronoun forms, mood and voice, such as case usage of nouns, pronouns and adjectives, for example, *τούτων τῶν ἀνθρώπων, τὰ μείζονα κακά*, perfect and pluperfect conjugations, for example, *λέλοιπα/έλελοίπη*, subjunctive and optative moods, for example, *μὴ κρύψῃς τὴν μάστιγα ᾧ δοῦλε, ὁ δεσπότης ἠρώτησε τις λύσειε τοὺς βοῦς*, and passive voice, for example, *ὁ ἵππος ἐλύθη, τῷ οἰστῷ βληθείς*. They evaluate the effectiveness of different translations of the same Classical Greek text, and identify strategies for successful translations.

Students apply the principles of pronunciation for the reading of Classical Greek texts. They identify the structure and organisation of different text types in Classical Greek, such as prose and verse, and explain how they relate to context, purpose and audience. They explain the role of Classical Greek in facilitating the spread of Greek civilisation and culture across the Mediterranean world, and the contribution of Classical Greek to the enrichment of English through the transfer of specialist vocabulary, for example, *antithesis, ellipsis, euphemism, hyperbole*, abstract concepts, for example, *enthusiasm, patriotism, democracy, idiosyncrasy*, and the coining of vocabulary for new technology and new discoveries, for example, *thermodynamics, epigenomics*. Students describe ancient Greek values, attitudes and beliefs that are embedded in particular language use, such as *μέτρον* and *κλέος*. They explain how the ancient Greek world has influenced social, political and legal structures, philosophy, literature, the arts, and medical and scientific practices in the modern world. They share reactions to and assumptions about the language, culture and values of ancient Greek society, explaining how these relate to their own language and culture. They compare ways of communicating and living in the ancient world with those of the modern world, and explain how learning Classical Greek influences their own ways of thinking and viewing the world.

The Australian Curriculum Languages - Framework for Classical Languages Latin - Years 7–10 (Year 7 Entry) Sequence

Framework for Classical Languages

Years 7 and 8

The nature of the learners

Students are beginning their study of Latin and typically have little prior knowledge and understanding of the language and Roman history and culture. Most will have learnt a different language in primary school, while some will have proficiency in different home/community languages and bring existing language learning experiences and intercultural awareness to the new experience of learning Latin. Students' skills in interpreting texts and their development of literacy are supported by their study of Latin. Through their reading, analysis and translation of texts, students of Latin develop their thinking processes, such as close attention to detail, pattern recognition, accuracy, memory and logic. Students may need to be encouraged to take risks in learning a new language at this stage of social development and to consider how the experience of learning a Classical language impacts on their own ways of thinking and viewing the world.

Latin language learning and use

Learners engage with people in the Roman world, and gain direct access to their daily lives, through reading, comprehending and discussing Latin texts that reveal their language use and social and cultural practices. They use vocabulary, grammar and textual cues to understand and interpret Latin texts, and convey information and ideas about the daily life and attitudes of the Romans, in oral, written or digital forms, using Latin as appropriate. They listen to and read Latin texts, such as stories, myths and plays, and discuss characters, events, actions, settings and emotions. They read aloud, recite or perform Latin texts, such as stories, dialogues or songs, to convey meaning and to entertain others. They translate Latin texts into Standard English, applying their knowledge of vocabulary, accident and syntax, linguistic cues and culture. They compare the features and relative merits of different translations of Latin texts to determine the features of a successful translation. Learners focus on the systems that structure the Latin language (grammar, vocabulary, sounds, the written alphabet) and systematically build a vocabulary and grammatical base that allows them to access a variety of Latin texts, such as narratives and short plays. They understand that Latin spread during the expansion of the Roman empire and developed over time into the Romance languages, and they explore the influence of Latin on English vocabulary. Learners explore the relationship between language and culture, by examining particular language use that provides insights into the daily lives, ideas, feelings and attitudes of Romans in the Classical period. They discuss the ancient origins of modern customs, religion, literature and architecture, reflecting on the enduring influence of the Roman world on the modern world. They are encouraged to consider their own and others' reactions to and assumptions about the language and culture of Roman society, and to reflect on their own approaches to learning and understanding of their own heritage, values and culture.

Contexts of interaction

Learners work both independently and collaboratively, exploring different modes and genres of communication. They pool linguistic knowledge and resources to plan and manage shared activities, problem-solve, and monitor and reflect on their work. Extra opportunities for interaction are provided through purposeful and integrated use of information and communication technologies (ICT), for example, shared research on aspects of culture and historical events, and collaborative translation of seen and unseen texts. Learners may extend their experiences relating to language and culture by participating in activities such as art competitions, weekend camps, quiz nights, drama productions and visits to museums and galleries.

Texts and resources

Learners work with a range of texts designed for language learning, such as textbooks, audio recordings, teacher-generated materials and online resources. They may also use materials designed for students of Latin in different contexts, for example, comics, newsletters, online games, digital learning activities and apps. Texts from different sources give opportunities for discussion of the relationship between language and culture. Research tasks allow for exploration of themes, cultural references and historical events.

Features of Latin language use

Learners become familiar with the restored pronunciation of Latin. They use appropriate phrasing and voice inflection when reading aloud, reciting or performing Latin texts such as stories, dialogues, songs or plays, and develop their understanding of the sounds of the Latin alphabet. When translating Latin texts, students apply their knowledge of Latin grammar, including parts of speech, case, gender, number, person, verb conjugations, noun declensions and conventions of sentence structure. They use roots, derivatives and word lists to acquire and build Latin vocabulary, and use dictionaries to select appropriate meanings of Latin words. They explore influences of Latin on English vocabulary, focusing on derivatives, such as 'circumnavigate' from *circum* + *navigare*, and the contemporary use of Latin words and expressions, for example, *vice versa* or *modus operandi*. They make connections between texts and cultural contexts, exploring ways in which cultural values and perspectives are embedded in language and how language choices determine ways in which people and their ways of living are represented.

Level of support

A differentiated approach to teaching and task design caters for the diversity of learners. Support includes scaffolding, modelling and monitoring, explicit instruction and feedback, structured activities for practising new grammar, and access to print and electronic dictionaries. Students are supported to develop autonomy as language learners, and to self-monitor and refine strategies used in reading, listening, analysis and translation. Opportunities to review and consolidate are an important component of learning at this level.

The role of English

Latin is the language of the texts studied. Latin is also used for reading aloud, reciting or performing texts, and for simple interactions in the classroom, such as greetings. English is used for translation, analysis, explanation, discussion, evaluation and reflection.

Years 7 and 8 Content Descriptions

Engaging with texts

Accessing the Roman world through Latin texts	Elaborations
---	--------------

Read, comprehend and discuss Latin texts, using vocabulary, grammar and textual cues, to explore the Roman world
[Key concepts: language, culture, meaning, experience; Key processes: reading, listening, interpreting, connecting]

(ACLCLE031)

- developing an initial sense of the structure and content of texts by inferring meaning from textual cues, for example, titles, headings, images or captions to images, maps
 - listening to simple sentences in Latin to infer meaning, using aural cues such as *ecce*; *olim*; *cur*; *ubi*; *euge*; *eheu*
 - determining the general sense of texts through initial holistic reading, by identifying familiar people, vocabulary, places or topics, and recognising modern editors' use of punctuation to guide readers
 - analysing sentences, identifying and explaining the function of inflected forms, for example, *puella canem vocat* (subject + object + verb) or *Aemilia est soror mea* (subject + verb + complement)
 - identifying and discussing linguistic features in narratives, such as word order, use of the interrogative particle, striking word choice, for example, *media in via*; *venitne*; *ululavit*; *iratissimus*
 - interpreting and commenting on language choices, such as patterns and length of simple and compound sentences, use of direct speech or imagery, for example, the writer's choice of a dramatic verb to make an action more vivid, as in *in atrium volat* rather than *in atrium intrat*
 - exploring social, contextual and cultural references embedded in texts, for example, *patronus*, *cliens*; *civis*; *patria potestas*; *bullae*; *toga praetexta*; *mehercle*!
 - interpreting stated and implied meanings in texts and supporting an opinion with evidence from the Latin, such as relationships between characters, for example, *servi dominum timent*; *ancilla servum delectat*
-

Convey information and ideas about the daily life and attitudes of the Romans, in oral, written and digital forms, using Latin as appropriate

[Key concepts: information, culture, imagination; Key processes: obtaining, presenting, informing]

(ACLCLE032)

- gathering, collating and presenting information about daily routine in the Roman world, such as posters or digital displays about family life, education, food, hygiene, exercise, with annotations in English or words and simple phrases in Latin
- reading stories about the daily lives of ancient Romans, and recreating their everyday experiences, for example, through role play or an imaginative animated cartoon
- comparing details from different sources about where Roman people lived, such as in tenements or houses, or on country estates, for example, through dioramas or drawings, with labels in English or Latin, and discussing what they reveal about different lifestyles in the Classical period
- researching the purpose and function of spaces in a Roman home, such as in a *domus* or a *villa*, for an oral or digital presentation, using labels in English and Latin, for example, *vestibulum*, *atrium*, *triclinium*, *cubicula*, *peristylum*
- examining artefacts from the Roman period, such as those from Pompeii, and discussing what they reveal about the everyday lives of Romans
- collating and sharing information online about Roman engineering and infrastructure, such as roads, aqueducts, *cloaca maxima*
- researching the attitudes of Romans revealed in Graeco-Roman myths and legends and acting out stories, such as Romulus and Remus, or Hercules' labours, to convey these attitudes
- gathering and creating a class bank of information from texts about Roman religious beliefs and practices, for example, Olympian deities, *Lares et Penates*, special festivals such as the *Liberalia* and the *Vestalia*
- reading accounts of historical events, such as Pliny's eyewitness account of the eruption of Vesuvius, and presenting information in new ways, for example, creating and recording own news report or documentary, making comparisons between Pliny's account and an online reconstruction of the eruption

Responding to texts

Elaborations

Listen to and read Latin texts, such as stories, myths and plays; share reactions and make connections with characters, events, actions, settings and key emotions

[Key concepts: imagination, experience, character; Key processes: responding, connecting, describing]

(ACLCLE033)

- listening to and reading texts, such as stories about daily life in the city/country or public entertainment, and responding to questions in English relating to content and context
- recognising recurring characters, settings and themes in texts, drawing on previous knowledge and experiences to make connections with the narrative, for example, the domineering master or the insolent slave; Pompeii; Vesuvius
- discussing how scenes and characters are depicted in texts, for example, in short plays, dialogues, retelling of well-known myths and legends, through devices such as imagery or conversations
- discussing language features that encourage the audience to respond in particular ways, for example, the use of repetition, alliteration, assonance, onomatopoeia
- recognising that writers use different text structures and formats for specific purposes and effects, for example, change of focus, a story within a story, plot tension
- identifying and discussing the techniques writers use to achieve specific effects, such as the use of antithesis to create humour or surprise, for example, *omnes pueri rident sed Publius non ridet*.

Read aloud, recite or perform Latin texts, using phrasing and voice inflection to convey meaning and to entertain others

[Key concepts: performance, emotion; Key processes: reading, presenting]

(ACLCLE034)

- listening to and reproducing familiar and unfamiliar words, phrases and simple texts in Latin to convey meaning, using appropriate phrasing and expression, and the restored pronunciation, for example, *cachinnare; clamare; vituperare; furcifer; monstrum horribile*
- presenting short texts orally in Latin, such as stories, dialogues or songs, to peers or the class, for example, singing songs such as *gaudeamus igitur; duc, duc navem duc*
- performing short Latin plays or dialogues in collaboration with others, using strategies to convey the emotions of the characters
- reading aloud or reciting, individually or in a class group, extracts from Latin literature, such as the initial lines of Virgil's *Aeneid* or an epigram

Translating

Elaborations

Translate Latin texts into Standard English, by applying knowledge of vocabulary, accidence and syntax, and linguistic and cultural cues

[Key concepts: equivalence, representation; Key processes: interpreting, translating]

(ACLCLE035)

- reading texts to gain a sense of holistic meaning, and identifying cues, such as text type, familiar vocabulary, grammar and cultural references
 - considering multiple meanings of vocabulary, for example, by using dictionaries and electronic translation tools, and making appropriate selections according to context, for example, *petit*; *ago*; *de*
 - using known vocabulary, in Latin or English, and context to deduce the meaning of unknown words, for example, *clamor*, *exclamare*; *puer in cubiculo dormit* (dormitory)
 - identifying meanings of words by recognising change of form, such as third declension nouns and irregular verbs, for example, *nomen*, *nominis*; *est*, *sunt*
 - identifying parts of speech and their function in context to determine meaning, for example, identifying which noun is the subject of the verb
 - identifying the specific function of inflected forms to determine meaning, for example, *puella canem videt* (subject + object + verb) or *puella est laeta* (subject + verb + complement)
 - applying knowledge of grammar to recognise in context the specific function of words which may have multiple applications, such as whether *nomen* or *cives* is subject or object
 - developing problem-solving skills to resolve perceived issues and anomalies encountered in the translation process, for example, confusion of genitive and nominative forms such as *domini*
 - exploring the effect of using the variety of English translations for tenses and making selections according to context, for example, *clamat* – ‘she is shouting’, ‘she shouts’, ‘she does shout’
 - selecting appropriate English meanings, identifying words and expressions that do not translate easily, for example, *res*; *virgo*; *vir*; *consul spectaculum dat*
 - discussing how words that refer to aspects of Roman culture should be translated, for example, *servus* (‘slave’ rather than ‘servant’)
 - determining appropriate word order in English to retain meaning and emphasis, for example, *agricolam in agro taurus petit*
 - translating Latin into idiomatic English, for example, by translating *ego et tu* as ‘you and I’
 - discussing and correcting or improving own translations to increase accuracy and reflect register, tone and relationships between characters
 - collaborating with peers to interpret meaning in texts and develop and edit joint translations, using a range of ICT
 - applying appropriate strategies to translate, independently, unseen Latin texts
-

Compare different translations and interpretations of Latin texts, and identify features of successful translations

[Key concepts: translation, analysis; Key processes: evaluating, explaining and comparing, intertextualising]

(ACLCLE036)

- identifying the characteristics of a successful translation, such as grammatical accuracy
- examining translations to determine how effectively Latin is conveyed in English idiom, such as the use of articles
- comparing and discussing the merits of different translations of the same text, identifying differences and recognising that they may be equally valid
- giving and justifying opinions about the effectiveness of own and others' translations
- identifying and discussing effective strategies to create appropriate translations, such as skimming through the text and identifying familiar words and phrases, contextualising new vocabulary, and using these strategies to review and polish own translations

Understanding

Systems of language

Understand the phonological and orthographic systems of Latin, including the restored pronunciation and the written alphabet

[Key concepts: sound system, writing system; Key processes: recognising, imitating, copying, writing]

(ACLCLU037)

Elaborations

- recognising that the written alphabet used by the Romans is the basis for the modern English alphabet, although some letters are pronounced differently, for example, *u/v*, *i*, *c* and *g*
- mimicking or copying the restored pronunciation of Latin words, individually or with peers
- matching script to sound, using the restored pronunciation, for example, single consonants, long and short vowels, vowels before final *m*, diphthongs, *h* and aspirated *h*, consonant combinations/clusters as in *ingens*, *magnus*, *urbs*
- distinguishing *i* as a vowel and as a consonant, for example, *intrat*, *ianua*
- using the spoken stress of Latin, and dramatic expression appropriate to the tone and purpose of a text
- acknowledging the absence of punctuation in Latin in comparison with English, for example, by working with a sentence spelt out with no pauses between words
- recognising conventions of punctuation used by editors of Latin texts to assist comprehension

Understand concepts of accidence and syntax used in simple and compound Latin sentences, including parts of speech, case, gender, number, person, declension and conjugation, agreement and tense, and conventions of sentence structure [Key concepts: grammatical system, case, conjugation; Key processes: identifying, recognising]

(ACLCLU038)

- identifying parts of speech and their functions in texts, such as in statements, direct speech, commands and questions
- exploring the concepts of number, gender, case and the metalanguage used to describe nouns
- understanding noun inflections and their usage in first, second and third declensions:
 - case: nominative, vocative, accusative, genitive, dative, ablative, for example, *amicus, amice, amicum, amici, amico, amico*
 - number: *villa, villae*
 - gender: masculine *dominus*, feminine *domina*, neuter *atrium*, common *canis, parens*
- recognising personal pronouns and pronominal adjectives, and identifying number, gender and case, for example, *ego, tu, nos, vos; meus, tuus*
- recognising interrogative pronouns, for example, *quis, quid*
- recognising demonstrative pronouns, for example, *hic, haec, hoc; ille, iste*
- identifying cardinal numbers *unus* to *viginti* and ordinal numbers *primus* to *decimus*
- recognising prepositional phrases and the different forms of prepositions, for example, *e villa, ex urbe*
- distinguishing between the meanings of prepositions when governing different cases, for example, *in villam, in villa*
- exploring the concepts of verb number, person and tense, the metalanguage used to describe verbs
- identifying endings of verbs in the four conjugations, and regular and irregular verbs in the present tense, active voice
- identifying the use of the imperative, for example, *tacete vos omnes*
- identifying first/second and third declension adjectives, for example, *laeta/laetus; tristis*
- recognising agreement of adjectives and nouns in number, gender and case, for example, *puella tristis, frater magnus*, and how word order may differ from English
- interpreting compound sentences using conjunctions, for example, *canis intrat sed non latrat*
- recognising adverbs, for example, *servus diligenter laborat*
- understanding conventions of word order in Latin sentences, such as subject + direct object + indirect object + verb, for example, *puella librum fratri legit*, and how those conventions can be used to anticipate the development of a sentence
- developing strategies for building on prior knowledge and learning new grammar, for example, mnemonic devices, paradigms, drill exercises, online learning tools

Acquire and build vocabulary by using roots, derivatives and word lists, and use dictionaries to select appropriate meanings of Latin words

[Key concepts: vocabulary, meaning; Key processes: exploring, selecting]

(ACLCLU039)

- developing own and class lists of vocabulary related to texts and topics, such as daily life in ancient Rome, for example, *thermae, caldarium; magister, ludus*
- creating a class bank of words that are frequently used, for example, *tamen; alii ... alii ...; eheu!*, and common expressions used in everyday activities, for example, *salvete; ludere volo*
- practising vocabulary knowledge, for example, by using online tools such as drills
- using print and electronic dictionaries to locate the appropriate meanings of words
- understanding that one Latin word may correspond to several different English words and selecting the most appropriate meaning of a word in its context
- developing strategies for vocabulary building by applying knowledge of roots, for example, *ager/agricola* and derivatives, for example, agriculture
- building vocabulary by recognising Latin words commonly used in English, for example, exit, video, arena

Identify the structure and features of a range of texts in Latin, such as narratives and short plays

[Key concepts: text structure, purpose; Key processes: identifying, explaining and comparing]

(ACLCLU040)

- identifying elements of different types of text, for example, stories, dialogues and plays, and explaining the relationship between the language and structure used and the purpose of the text
- distinguishing and comparing features of a story and a play, such as narrative voice, characterisation, impact of direct speech
- making connections and comparisons between a new text and familiar texts of the same type
- using metalanguage to explain the effect of particular language features on intended audiences, for example, exclamations, interjections, such as *o me miserum; euge; eheu*

The powerful influence of language and culture

Elaborations

Understand that Latin spread with the expansion of the Roman empire, developed over time into the Romance languages, and influenced English vocabulary

[Key concepts: linguistic evolution, time (the past in the present), interconnection across concepts, influence; Key processes: comparing, analysing, applying]

(ACLCLU041)

- recognising that Latin is a member of the Indo-European family of languages, related to other ancient languages, such as Classical Greek, Sanskrit and Old Persian
 - recognising that Latin was influenced by languages of other ancient peoples, such as Greek
 - locating on a map the places where Latin was spoken across the area of Roman influence, from Britain to West Asia
 - researching how Latin evolved into its modern descendants, the Romance languages, and comparing words, such as numbers, *duo* (Latin) – *deux* (French) – *due* (Italian) – *dos* (Spanish) – *doi* (Romanian) – *dois* (Portuguese), or words such as 'hand' or 'friend' across languages
 - applying knowledge of Latin to understand words and expressions in Romance languages, for example, *tempo*; *liberté*, *égalité*, *fraternité*; *amigo*; *la dolce vita*
 - identifying and using Latin derivatives to expand own English vocabulary, for example, maternal/paternal, nominate, puerile
 - recognising connections between spelling of Latin and English words and applying understanding to improve own spelling in English, for example, first conjugation verb such as *portat* – English 'portable', compared with fourth conjugation verb *audit* – audible
 - identifying expressions and abbreviations in Latin that are commonly used in English, for example, *post mortem*, *in loco parentis*; e.g., i.e., am, pm, etc.
 - identifying words of Latin origin that are used in subjects across the school curriculum, for example, data, agriculture, commerce, equilateral, formula, mesa, tablet
 - identifying and collecting word families in which the same Latin root is used with different prefixes or suffixes, for example, reduce, introduce, deduce, conduct, produce
 - exploring and discussing the meaning of simple Latin mottoes used by modern institutions, such as the Olympic motto *citius, altius, fortius*
-

Examine the enduring influence of Roman culture on the modern world, by discussing the ancient origins of modern customs, religion, literature and architecture

[Key concepts: aesthetics, time (the past in the present), modernity; Key processes: connecting, explaining and comparing]

(ACLCLU042)

- recognising the ancient origins of national values such as citizenship, liberty, equity and justice
- exploring ancient connections with daily routines in modern society, such as family life, occupations, schooling, the calendar, and leisure pursuits such as dice, board games
- tracing Roman customs still used in modern ceremonies, such as weddings and funerals
- identifying influences from Latin literature on popular culture, for example, Harry Potter, Romeo and Juliet, Percy Jackson, superheroes such as Superman and Hercules
- exploring connections between ancient and modern music, for example, musical instruments such as the cithara, flutes, drums and contemporary songs composed in Latin, such as Bastille's *Pompeii* with Latin lyrics
- recognising the Roman influence on religion, such as Christian traditions
- researching elements of Roman engineering and architecture in bridges, aqueducts, amphitheatres, drainage systems and public buildings in Australia and across the world

Role of language and culture

Recognise that the language of the Romans provides insights into their daily lives, ideas, feelings and attitudes

[Key concepts: language, culture, interdependence; Key processes: connecting, conceptualising, explaining]

(ACLCLU043)

Elaborations

- investigating connections between language and significant cultural attitudes, for example, discussing how the terms *civis*, *libertus*, *servus* relate to rights of citizens
- exploring and discussing language use that reflects social structure in ancient Rome, for example, *pater familias*, *patronus/clients* relationships, *matrona*; Julia = daughter of Julius
- exploring references in texts to life at home, daily bathing, dining and entertainment, such as public spectacles, and discussing the importance of family and social life to the Romans
- recognising language that reflects the nature and use of private spaces, such as *domus*, *villa*, *atrium*, *hortus*, *insula*
- understanding the importance of religion and festivals in Roman society, for example, by examining references in texts to worship of the Olympian gods, or festivals such as *Saturnalia*
- considering the impact of stories about major early Roman heroes on the formation and transmission of Roman values, for example, Cloelia helping the kidnapped girls to escape, Horatius guarding the bridge
- discussing the influence on Romans of myths and legends, as represented in their literature and visual arts such as sculpture and mosaics, for example, Romulus and Remus, Aeneas, Hercules
- exploring the colloquial language that Romans used, such as *salvete*; *gratum*; *licet*

Reflecting	Elaborations
<p>Reflect on own and others' reactions to and assumptions about the language and culture of Roman society, considering similarities and differences to own language and culture [Key concepts: identity, interconnection across concepts; Key processes: comparing, connecting, empathising, reflecting]</p> <p>(ACLCLU044)</p> 	<ul style="list-style-type: none"> considering own and others' cultural assumptions about home and leisure and how these were different or similar in the Roman context reviewing and responding to aspects of cultural practices in Latin texts and Roman artefacts, and discussing the reactions of peers to these describing own life at home and school and making comparisons with that of young people in the Roman world developing an understanding of life in multicultural Rome, and reflecting on similarities and differences to own lifestyle in multicultural Australia discussing how young people in ancient Rome may have viewed the lives of young people in the modern world
<p>Reflect on self as a language learner, considering how learning Latin influences ways of learning and enhances understanding of own heritage, values and culture [Key concepts: identity, interconnection across concepts, influence; Key processes: connecting, reflecting]</p> <p>(ACLCLU045)</p> 	<ul style="list-style-type: none"> exploring own sense of identity, considering own and others' assumptions about family, language(s) spoken, traditions, values and attitudes considering how learning about the ancient world offers different ways of interpreting the modern world and representing experience keeping a journal of experiences (humorous, satisfying or challenging) associated with learning and using Latin, noting personal reactions and reflections over time considering how the strategies adopted while learning Latin have impacted on own approaches to learning across subjects, such as setting realistic timeframes, computational thinking reflecting on the experience of learning Latin, considering how it might add a further dimension to own sense of identity reflecting and reporting on how learning Latin gives insights into the relationship between language and culture in general, and how own way of thinking about language, culture and identity may change through the experience
